PARLIAMENTARY DEBATES

(HANSARD)

SIXTH SERIES—VOLUME 421 (Part 2)

HOUSE OF COMMONS

OFFICIAL REPORT

THIRD SESSION OF THE FIFTY-THIRD PARLIAMENT
OF THE UNITED KINGDOM OF GREAT BRITAIN
AND NORTHERN IRELAND
FIFTY-THIRD YEAR OF THE REIGN OF
HER MAJESTY QUEEN ELIZABETH II

SESSION 2003–04

COMPRISING PERIOD
10 May—27 May 2004

£105
(Two parts not sold separately)

HER MAJESTY'S GOVERNMENT

MEMBERS OF THE CABINET

(FORMED BY THE RT. HON. TONY BLAIR, MP, JUNE 2001)

PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
SECRETARY OF STATE FOR FOREIGN AND COMMONWEALTH AFFAIRS—The Rt. Hon. Jack Straw, MP
SECRETARY OF STATE FOR THE HOME DEPARTMENT—The Rt. Hon. David Blunkett, MP
SECRETARY OF STATE FOR ENVIRONMENT, FOOD AND RURAL AFFAIRS—The Rt. Hon. Margaret Beckett, MP
SECRETARY OF STATE FOR TRANSPORT AND SECRETARY OF STATE FOR SCOTLAND—The Rt. Hon. Alistair Darling, MP
SECRETARY OF STATE FOR HEALTH— The Rt. Hon. Dr. John Reid, MP
SECRETARY OF STATE FOR NORTHERN IRELAND—The Rt. Hon. Paul Murphy, MP
SECRETARY OF STATE FOR DEFENCE—The Rt. Hon. Geoffrey Hoon, MP
SECRETARY OF STATE FOR WORK AND PENSIONS—The Rt. Hon. Andrew Smith, MP
SECRETARY OF STATE FOR TRADE AND INDUSTRY—The Rt. Hon. Patricia Hewitt, MP
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
PARLIAMENTARY SECRETARY TO THE TREASURY—The Rt. Hon. Hilary Armstrong, MP
SECRETARY OF STATE FOR EDUCATION AND SKILLS—The Rt. Hon. Charles Clarke, MP
CHIEF SECRETARY TO THE TREASURY—The Rt. Hon. Paul Boateng, MP
LEADER OF THE HOUSE OF COMMONS, SECRETARY OF STATE FOR WALES AND LORD PRIVY SEAL—The Rt. Hon. Peter Hain, MP
MINISTER WITHOUT PORTFOLIO—The Rt. Hon. Ian McCartney, MP
LEADER OF THE HOUSE OF LORDS AND PRESIDENT OF THE COUNCIL—The Rt. Hon. The Baroness Amos
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS AND LORD CHANCELLOR (FOR THE TRANSITIONAL PERIOD) —The Rt. Hon. The Lord Falconer of Thoroton, QC
SECRETARY OF STATE FOR INTERNATIONAL DEVELOPMENT—The Rt. Hon. Hilary Benn, MP

DEPARTMENTS OF STATE AND MINISTERS

Office of the Deputy Prime Minister—
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
MINISTERS OF STATE—
Minister for Local and Regional Government—The Rt. Hon. Nick Raynsford, MP
Minister for Regeneration and the Regions—The Rt. Hon. The Lord Rooker
Minister for Housing and Planning— The Rt. Hon. Keith Hill, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Yvette Cooper, MP
Phil Hope, Esq, MP

Cabinet Office—
MINISTER FOR THE CABINET OFFICE AND CHANCELLOR OF THE DUCHY OF LANCASTER—Douglas Alexander, Esq, MP

Constitutional Affairs—
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS—The Rt. Hon. The Lord Falconer of Thoroton, QC
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Christopher Leslie, Esq, MP
David Lammy, Esq, MP
The Lord Filkin, CBE
Anne McGuire, MP (Parliamentary Under-Secretary of State for Scotland)
Don Touhig, Esq, MP (Parliamentary Under-Secretary of State for Wales)

Culture, Media and Sport—
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
MINISTERS OF STATE—
Minister for Sport and Tourism—The Rt. Hon. Richard Caborn, MP
Minister for the Arts—The Rt. Hon. Estelle Morris, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
The Rt. Hon. The Lord McIntosh of Haringey (Minister for Media and Heritage)

Defence—

SECRETARY OF STATE—The Rt. Hon. Geoffrey Hoon, MP

MINISTER OF STATE—

The Rt. Hon. Adam Ingram, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

The Lord Bach (Minister for Defence Procurement)

Ivor Caplin, Esq, MP

Education and Skills—

SECRETARY OF STATE—The Rt. Hon. Charles Clarke, MP

MINISTERS OF STATE—

Minister for School Standards—David Miliband, Esq, MP

Minister for Children—The Rt. Hon. Margaret Hodge, MP

Minister for Lifelong Learning, Further and Higher Education—The Rt. Hon. Alan Johnson, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

The Baroness Ashton of Upholland

Ivan Lewis, Esq, MP

Stephen Twigg, Esq, MP

Environment, Food and Rural Affairs—

SECRETARY OF STATE—The Rt. Hon. Margaret Beckett, MP

MINISTERS OF STATE—

Minister for Rural Affairs and Local Environmental Quality—The Rt. Hon. Alun Michael, MP

Minister for the Environment— Elliot Morley, Esq, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

The Lord Whitty

Ben Bradshaw, Esq, MP

Foreign and Commonwealth Affairs—

SECRETARY OF STATE—The Rt. Hon. Jack Straw, MP

MINISTERS OF STATE—

Minister for the Middle East—The Rt. Hon. The Baroness Symons of Vernham Dean

Minister for Europe— Denis MacShane, Esq, MP

Minister for Trade and Investment—Mike O'Brien, Esq, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

Bill Rammell, Esq, MP

Chris Mullin, Esq, MP

Health—

SECRETARY OF STATE—The Rt. Hon. Dr. John Reid, MP

MINISTERS OF STATE—

The Rt. Hon. John Hutton, MP

Rosie Winterton, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

Miss Melanie Johnson, MP

Dr. Stephen Ladyman, MP

The Lord Warner

Home Office—

SECRETARY OF STATE—The Rt. Hon. David Blunkett, MP

MINISTERS OF STATE—

Minister for Crime Reduction, Policing and Community Safety— Ms Hazel Blears, MP

Minister for Criminal Justice System and Law Reform—The Baroness Scotland of Asthal, QC

Minister for Citizenship and Immigration—Desmond Browne, Esq, MP

PARLIAMENTARY UNDER-SECRETARIES OF STATE—

Paul Goggins, Esq, MP

Caroline Flint, MP

Fiona Mactaggart, MP

International Development—

SECRETARY OF STATE—The Rt. Hon. Hilary Benn, MP

PARLIAMENTARY UNDER-SECRETARY OF STATE—Gareth Thomas, Esq, MP

Law Officers' Department—
ATTORNEY-GENERAL—The Rt. Hon. Lord Goldsmith, QC
SOLICITOR-GENERAL—The Rt. Hon. Harriet Harman, QC, MP
ADVOCATE-GENERAL FOR SCOTLAND—Dr. Lynda Clark, QC, MP

Leader of the House of Commons—
LEADER OF THE HOUSE OF COMMONS—The Rt. Hon. Peter Hain, MP
DEPUTY LEADER OF THE HOUSE OF COMMONS—Phil Woolas, Esq, MP

Northern Ireland Office—
SECRETARY OF STATE—The Rt. Hon. Paul Murphy, MP
MINISTER OF STATE—
The Rt. Hon. John Spellar, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Ian Pearson, Esq, MP
Angela Smith, MP
Barry Gardiner, Esq, MP

Paymaster General's Office—
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP

Privy Council Office—
LORD PRESIDENT OF THE COUNCIL AND LEADER OF THE HOUSE OF LORDS— The Rt. Hon. The Baroness Amos

Trade and Industry—
SECRETARY OF STATE AND MINISTER FOR WOMEN AND EQUALITY—The Rt. Hon. Patricia Hewitt, MP
MINISTERS OF STATE—
Minister for Energy, E-Commerce and Postal Services—Stephen Timms, Esq, MP
Minister for Trade and Investment—Mike O'Brien, Esq, MP
Minister for Industry and the Regions and Deputy Minister for Women and Equality— The Rt. Hon. Jacqui Smith, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Sainsbury of Turville (Minister for Science and Innovation)
Nigel Griffiths, Esq, MP (Minister for Small Business and Enterprise)
Gerry Sutcliffe, Esq, MP (Minister for Employment Relations, Competition and Consumers)

Transport—
SECRETARY OF STATE—The Rt. Hon. Alistair Darling, MP
MINISTER OF STATE—
Dr. Kim Howells, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
David Jamieson, Esq, MP
Tony McNulty, Esq, MP

Treasury—
PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
CHIEF SECRETARY—The Rt. Hon. Paul Boateng, MP
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP
FINANCIAL SECRETARY—Ms Ruth Kelly, MP
ECONOMIC SECRETARY—John Healey, Esq, MP
PARLIAMENTARY SECRETARY—The Rt. Hon. Hilary Armstrong, MP
LORDS COMMISSIONERS—
John Heppell, Esq, MP
Nick Ainger, Esq, MP
Jim Murphy, Esq, MP
Derek Twigg, Esq, MP
Joan Ryan, MP
ASSISTANT WHIPS—
Fraser Kemp, Esq, MP
Charlotte Atkins, MP
Gillian Merron, MP
Vernon Coaker, Esq, MP
Paul Clark, Esq, MP
Margaret Moran, MP
Bridget Prentice, MP

Work and Pensions—
SECRETARY OF STATE—The Rt. Hon. Andrew Smith, MP
MINISTERS OF STATE—
Minister for Work—The Rt. Hon. Jane Kennedy, MP
Minister for Pensions—Malcolm Wicks, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Rt. Hon. The Baroness Hollis of Heigham
Maria Eagle, MP
Chris Pond, Esq, MP

Her Majesty's Household—
LORD CHAMBERLAIN—The Rt. Hon. The Lord Luce, GCVO
LORD STEWARD—The Duke of Abercorn, KG
MASTER OF THE HORSE—The Lord Vestey
TREASURER—Bob Ainsworth, Esq, MP
COMPTROLLER—Thomas McAvoy, Esq, MP
VICE-CHAMBERLAIN—Jim Fitzpatrick, Esq, MP
CAPTAIN OF THE HONOURABLE CORPS OF GENTLEMEN-AT-ARMS—The Rt. Hon. The Lord Grocott
CAPTAIN OF THE QUEEN'S BODYGUARD OF THE YEOMAN OF THE GUARD—The Lord Davies of Oldham
LORDS IN WAITING—The Lord Bassam of Brighton, The Lord Evans of Temple Guiting
BARONESSES IN WAITING—The Baroness Farrington of Ribbleton, The Baroness Andrews, OBE, The Baroness Crawley

---

SECOND CHURCH ESTATES COMMISSIONER, REPRESENTING CHURCH COMMISSIONERS— Sir Stuart Bell, MP

HOUSE OF COMMONS

THE SPEAKER—The Rt. Hon. Michael J. Martin, MP

CHAIRMAN OF WAYS AND MEANS—The Rt. Hon. Sir Alan Haselhurst, MP

FIRST DEPUTY CHAIRMAN OF WAYS AND MEANS—Mrs. Sylvia Heal, MP

SECOND DEPUTY CHAIRMAN OF WAYS AND MEANS—Sir Michael Lord, MP

CHAIRMEN'S PANEL—
Mrs. Irene Adams, MP, David Amess, Esq, MP, Janet Anderson, MP, Nigel Beard, Esq, MP, Miss Anne Begg, MP, Joe Benton, Esq, MP, Sir John Butterfill, MP, Martin Caton, Esq, MP, David Chidgey, Esq, MP, Derek Conway, Esq, MP, Frank Cook, Esq, MP, James Cran, Esq, MP, John Cummings, Esq, MP, The Rt. Hon. Eric Forth, MP, Roger Gale, Esq, MP, Win Griffiths, Esq, MP, Mike Hancock, Esq, MP, Jimmy Hood, Esq, MP, Kevin Hughes, Esq, MP, Alan Hurst, Esq, MP, Eric Illsley, Esq, MP, John McWilliam, Esq, MP, Bill O'Brien, Esq, MP, Edward O'Hara, Esq, MP, Bill Olner, Esq, MP, Peter Pike, Esq, MP, Mrs. Marion Roe, MP, Jonathan Sayeed, Esq, MP, George Stevenson, Esq, MP, David Taylor, Esq, MP, The Rt. Hon. Miss Ann Widdecombe, MP, Sir Nicholas Winterton, MP

HOUSE OF COMMONS COMMISSION—
The Rt. Hon. The Speaker (Chairman), The Rt. Hon. Peter Hain, MP, Oliver Heald, Esq, MP, Sir Archy Kirkwood, MP, Sir Stuart Bell, MP, Sir Patrick Cormack, FSA, MP

SECRETARY OF THE COMMISSION—Robert Rogers

ASSISTANT SECRETARY —Shona McGlashan

AUDIT COMMITTEE—
Oliver Heald, Esq, MP (Chairman), Sir Archy Kirkwood, MP, Sir Thomas S. Legg, KCB, QC, David Taylor, FCA

SECRETARY OF THE AUDIT COMMITTEE—Dr. Mark Egan

BOARD OF MANAGEMENT—
Roger Sands, (Chief Executive), George Cubie, CB (Clerk of Committees, Department of the Clerk of the House), Sir Michael Cummins (Serjeant at Arms), Priscilla Baines (Librarian), Andrew Walker (Director of Finance and Administration), Bill Garland (Editor of the Official Report), Sue Harrison (Director of Catering Services)

SECRETARY OF THE BOARD OF MANAGEMENT—Richard Ware, DPhil

SPEAKER'S SECRETARY—Roger Daw

SPEAKER'S COUNSEL—John Vaux

SPEAKER'S CHAPLAIN—Rev. Canon Robert Wright

MEDICAL ADVISER TO THE SPEAKER—Dr. Ron Zeegen, OBE, FRCP, MRCS, DObst, RCOG

PARLIAMENTARY COMMISSIONER FOR STANDARDS—Sir Philip Mawer

Written Ministerial Statements

Monday 10 May 2004

HOME DEPARTMENT

Race Equality Monitoring

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): I have today placed in the Library copies of the 2003 annual report on the Home Secretary's race equality employment targets and the 2002–03 employment monitoring report under the Race Relations (Amendment) Act 2000.

INTERNATIONAL DEVELOPMENT

Humanitarian Mine Action

The Secretary of State for International Development (Hilary Benn): Following an internal review by the Department for International Development, I am announcing today a revision to the Department's management of its support to Humanitarian Mine Action. The review team consulted a wide range of stakeholders including the United Nations, Civil Society, mine action organisations and other Government Departments.

In 2000 DFID decided to channel the majority of its funds for mine action through the United Nations. The objectives of the review were to assess whether DFID's policy objectives of channelling most of its funds in this way were being met, and to consider DFID's resourcing of mine action and to look at future options.

The review concluded that the overall policy approach should remain unchanged. The four existing main pillars of support remain valid. These are to: support humanitarian mine action focused on the poorest countries; improve the effectiveness of the international mine action system to mine pollution; develop new technologies to improve mine clearance; and promote the globalisation of the mine can convention. Additionally DFID's commitment to spend at least £10 million per annum on humanitarian mine action will continue.

The policy in 2000 established Partnership arrangements with the United Nations Mine Action Service (UNMAS), the United Nations Development Programme (UNDP) and the Geneva Centre for Humanitarian Demining (GICHD). This support has contributed to improved coordination in the international system. These partnerships will continue but with revised overall funding levels. UNMAS and UNDP will continue to receive similar levels of funding to assist in strengthening their capacity but will receive less towards country programme activity. Support to UNMAS will primarily be for its co-ordination role rather than its mine clearance operations, except in cases requiring short-term emergency response. In the case of UNICEF, DFID's ongoing three-year partnership for support to mine risk education will continue.

As a result of these changes, DFID will now consider other funding options including bilateral funding via non-Government organisations (NGOs) and commercial companies. NGOs have an important role to play in advocating and implementing mine action. The revised policy reflects this by ensuring that more bilateral resources will be available to fund mine clearance by NGOs. Within DFID, the conflict and humanitarian affairs Department (CHAD) will continue to be the central point for humanitarian mine action policy. However in view of the increasing mainstreaming of mine action into development programmes, DFID regional desks/offices also have an important role where mine action features in DFID country assistance plans. This creates an additional potential source of funding from within DFID.

DFID will continue to fund research and technology and the generation of knowledge. The Department expects to commit approximately 10 per cent. of its mine action funding in this area.

DEPUTY PRIME MINISTER

Planning Out Crime

The Minister for Housing and Planning (Keith Hill): This statement is to bring to the attention of the House the launch of good practice guidance on Wednesday 28 April, prepared jointly by The Office of the Deputy Prime Minister and the Home Office, on how the planning system may play its part in tackling crime. This guide will support the updated policy advice on planning out crime, which is set out in the draft planning policy statement 1 "General policy and principles".

Through the sustainable communities plan the Government reaffirmed its commitment to delivering good quality villages towns and cities. Safety and security are essential to achieving his. Such places are well-designed, attractive environments where freedom from crime, and the fear of crime, improves the quality of life. Yet once a development has been completed the main opportunity to incorporate crime prevention measures will have been lost. The Government recognises that there are far too many examples of poor quality development because of insufficient attention to crime issues at the outset of the planning process.

The Government considers that this guide will help to provide practical advice as to effective methods of implementing crime prevention measures and securing community safety through the planning system. It challenges all those who influence the design and layout of developments, to think holistically about each development. In doing so the Government recognises

that there is no one solution that applies to every situation. That is why this guide stresses the importance of understanding the context and unique nature of the locality, and the importance of close co-operation between the many professional disciplines, if planning is to lay an effective role in preventing crime and the fear of crime.

The Government intends that those who read this guide will be inspired to use its suggestions and help to deliver the high quality and safe development that we all wish to see and from which all can benefit.

Copies of the document will be made available in the Libraries of the House.

Written Ministerial Statements

Tuesday 11 May 2004

WORK AND PENSIONS

Barking and Dagenham Council (Benefit Fraud Inspectorate)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on London Borough of Barking and Dagenham Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expect local authorities to aspire to and achieve in time.

In 2002–03, London Borough of Barking and Dagenham Council administered some £65.4 million in housing benefits, about 16 per cent. of its gross revenue expenditure.

BFI inspected London Borough of Barking and Dagenham Council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The report finds that the council's benefits service, part of the revenues services, was embarking on a major programme of change that included improving its performance management, planning the replacement of its benefits IT system, planning the procurement of an electronic document management system, and reviewing its staffing structure.

There was no structured approach to staff training and development of staff, and there were no documented procedures to support staff and ensure consistency of approach. Managers had limited access to performance reports and did not make routine use of those that were available. The IT systems were inadequate and required high levels of manual intervention, hindering rather than supporting the benefits service.

The report finds that the average time taken to process new benefit claims was 43 days, compared to the performance standard of 36 days, and 90 per cent. of new claims were processed within 14 days of receiving all information. However, there were delays in dealing with changes of circumstances and appeals and there was no management checking of work.

The council's telephone service was poor with 54 per cent. of calls not being answered. Customers were often required to attend the offices on more than one occasion because they had not been asked to provide all the necessary information at the first point of contact. There were weaknesses in the management of documents with staff being unable to locate paperwork, resulting in further unnecessary contact with customers. The council's benefit claim forms and decision letters needed to improve to give clearer guidance and information to customers.

The report also finds that all areas of the council's counter-fraud activity were weak. The council had no management information concerning fraud referrals, and very limited investigation activity had been carried out. New investigation staff had been appointed in 2003 but there were inadequate systems in place to allow them to progress investigations promptly.

The council was unable to provide verifiable performance information relating to overpayments of benefit, and no single officer had overall control of overpayment recovery. Also the council did not use the full range of recovery methods available.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Vulnerable Customers (Payments by Cheque)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): Direct Payment is a modern, reliable, secure and efficient method of payment which is proving popular with those pensioners and benefit recipients who are using it. More customers now have their pensions and benefits paid into an account than by order book. We will be writing to the remainder before the end of the year inviting them to convert to direct payment.

Eighty seven per cent. of DWP customers already have access to an account suitable for direct payment (the figure rises to 91 per cent. for pensioners). The wide availability of new, easy to operate accounts (including basic bank accounts and the Post Office card account) means that there should only be a very small number of people that cannot genuinely open an account—including, for example, some homeless people and some people with an illness or disability. There will also be some people who cannot manage an account—some will never be able to manage one (again due to illness or disability), while others may be in this position for only a short period (perhaps due to the absence of a regular carer or a short period of mental illness).

Several meetings have been held with customer representative groups (including CAB, Help the Aged, Age Concern, MIND etc) to ensure there was a shared understanding of the needs of the customers who cannot be paid directly into an account. These meetings helped us develop a detailed list of requirements and played a key role in shaping the detailed design of the exceptions arrangements.

In assessing options for the ongoing method of payment for customers who are unable to open or manage an account a number of criteria were taken into account including; the ability to meet the needs of customers, timescales for delivery, reliability and cost. To meet customer needs and maintain a robust delivery service we have decided to continue with the existing system of cheques, with improvements to the security of the service.

Customers who will require a cheque payment are likely to include those who are least able to cope with change, but will already have had experience of, and be familiar with, cashing paper instruments of payment at the Post Office. The cheque solution replicates this process and will best suit these customers.

Cheques can be issued on a weekly basis to the customer's home address (less frequently for some people) and are cashable at Post Office branches (as well as payable into bank accounts). Very importantly, they offer the flexibility needed for those customers who have a series of different people collecting their money for them and will be a solution for those people who are unable to operate PIN-based or cheque based accounts.

Safeguards will be in place to ensure people get their money in the event that the cheque does not arrive on time.

Paying by cheque is a well-established method of payment. We will closely monitor the operation of cheque payments to ensure that they meet the needs of some of our most vulnerable customers. If this identifies significant problems with these arrangements then we will make the necessary improvements.

As we have made clear cheque payments are designed for those vulnerable people whose benefits or pensions we cannot pay into any type of account. In order that we can provide the necessary level of support to this group we will, in parallel, introduce measures to ensure the maximum number of people who can use an account understand the comparative benefits of direct payment.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Landfill Allowance Trading Scheme

The Minister for the Environment (Mr. Elliot Morley): My Department today published the outcome of the Landfill Allowance Trading Scheme Consultation, which contains final details on the operation of the scheme. This is available on the DEFRA website www.Defra.gov.uk.

The aim of the scheme is to enable England to meet the targets set by the landfill directive for reducing the amount of biodegradable municipal waste sent to landfill in the most cost effective way. It will be launched on 1 April 2005.

The Landfill Allowance Trading Scheme is thought to be the first trading scheme in the world involving waste. The Government will allocate a decreasing number of allowances for each waste disposal authority in England for each year between 2005 and 2020. Authorities can then choose to trade these with other authorities, to borrow up to 5 per cent. of allowances from their next year's allocation or to bank unused allowances for use in future years. The scheme is designed to give waste disposal authorities as much flexibility as possible, whilst ensuring that the landfill directive targets are met. This is an innovative scheme that forms part of a comprehensive commitment to reduce waste in England.

DEFENCE

AFPRB 2004 Pay Award

The Secretary of State for Defence (Mr. Geoffrey Hoon): The supplement to the 2004 report of the Armed Forces' Pay Review Body making recommendations on the pay of service medical and dental officers has been published today. Copies of the supplement are available in the Vote Office and the Library of the House.

The Review Body recommends an increase of 3.225 per cent. for all regular and reserve defence medical services medical and dental officers. The Review Body also recommends a pay increase of 3.225 per cent. for medical and dental cadets and an out-of-hours supplementary payment of £4,500 to junior doctors. In addition, the Review Body recommends that there should be an increase of 3.225 per cent. in the values of trainer pay and distinction awards.

The cost of these recommendations to the defence budget will be some £6.3 million. This will be met within existing Departmental expenditure limits.

The Review Body's final recommendations are to be accepted in full, with implementation effective from 1 April 2004.

TREASURY

Aggregates Levy Relief Scheme

The Economic Secretary to the Treasury (John Healey): The Government are extending the aggregates levy relief scheme in Northern Ireland. The relief, which will continue to cover aggregate in processed products, will be extended to cover virgin aggregate exploited in Northern Ireland. Instead of the relief reducing annually until it ended in April 2007, the level of relief will now be fixed at 80 per cent. of the full rate from 1 April 2004 and it will apply until 31 March 2011. The introduction of the new scheme follows notification from the European Commission on 7 May that the Government's proposals for extended relief have received state aid clearance.

Quarry operators in Northern Ireland will be able to claim the extended relief straight away, providing they enter into agreements that will commit them to making significant environmental improvements to the way their operations are run. Initially operators will need to satisfy the Department of the Environment in Northern Ireland (DoENI) that they hold or have applied for

relevant regulatory authorisations, and enter into an agreement with DoENI, which will commit businesses to arrange a site audit, agree site-specific targets and comply with the code of practice for the aggregates industry in Northern Ireland. Continued eligibility for relief will depend on businesses meeting their agreed environmental targets, which will be regularly monitored and reviewed.

Written Ministerial Statements

Wednesday 12 May 2004

INTERNATIONAL DEVELOPMENT

Higher Education Links Programme

The Secretary of State for International Development (Hilary Benn): Having reviewed the higher education links programme, I have decided to continue with a redesigned programme, maintaining current levels of annual investment (£3 million) but with some modifications to the existing scheme (which will end in March 2006). I expect the new scheme to commence in April 2005, with commitments being made over the following seven years (until March 2012).

The review report identified a number of strengths of the current scheme, but there were also some areas for improvement. The redesigned programme will tackle these issues.

The overall goal of the redesigned programme will be the reduction of poverty, the promotion of sustainable development in poor countries; and the building of human capital and skills. Only countries where DFID has bilateral country programmes will be eligible for funding; there will therefore be more emphasis on sub-Saharan Africa and low-income countries.

The revised programme should also support south-south links and links between southern partners and non-UK partners in the North, and it will also give more attention to science and technology. An independent evaluation will take place after five years.

DFID's Parliamentary Under-Secretary of State has written to Professor Robert Boucher, vice-chancellor of the University of Sheffield and Chair of the existing Higher Education Links Steering Committee, setting out the features of the new scheme. His letter is on DFID's website. Copies have been placed in the Library of the House.

HOME DEPARTMENT

Controls on Firearms

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): The Home Office consultation paper on firearms controls is published today. Copies have been placed in the House Library. The paper invites a wide-ranging debate on the principles that should underpin firearms licensing and how the existing system might be improved. People will have until 31 August to respond.

United Kingdom Immigration Control

The Minister for Citizenship and Immigration (Mr. Desmond Browne): The Government are firmly committed to maintaining effective immigration controls while at the same time ensuring that genuine passengers are able to pass through our ports with the least possible inconvenience.

The number of people arriving at UK airports who are found to be inadmissible is unacceptably high. Certain nationals, who are required to hold a valid visa to enter the UK, may transit this country for up to 24 hours without a visa. This provides a relatively easy and inexpensive way for those who are intent on circumventing our immigration controls to do so. Last year we introduced measures to tackle this problem with the introduction of a direct airside transit visa (DATV) requirement for 23 nationalities. For the three months following the introduction on 16 October of DATV regimes for Angola, Bangladesh, Cameroon, India, Lebanon and Pakistan, the number of asylum applications made at ports by those nationalities fell by 58 per cent. DATV requirements have been shown to work and we now need to take further action to strengthen the regime. Intelligence would suggest that some individuals travelling on Kenyan and Tanzanian documents to the United Kingdom are destroying these documents either en route or after gaining entry to the UK, and are then applying for asylum as Somalian nationals. Therefore from 00.01 hours on Thursday 13 May all nationals of Kenya and Tanzania wishing to transit the UK will require a visa to do so.

To avoid undue hardship for those who had already made their travel plans, we have agreed to operate a grace period. Until 23.59 hours on Wednesday 19 May, any transit passenger who bought their ticket on or before 12 May will not be refused entry solely on the basis of not holding a valid transit visa. Also, any person on the return leg of a journey they commenced before 13 May and who passed through the UK on the outward leg of their journey will be allowed to transit the UK without a visa until 23.59 on 9 June.

In parallel with those measures, we are introducing changes to the arrangements that allow certain groups of low risk passenger to be exempt from a transit visa requirement if they are in possession of specific documents. The exemption applying to those holding a valid visa for the United States of America or Canada has been widened to enable visa-free transit of the United Kingdom irrespective of the routing chosen to reach the USA or Canada. Similarly, a passenger returning from a trip to the USA or Canada will be able to transit the United Kingdom irrespective of the routing they choose providing they are in possession of an onward air ticket and they are not seeking to transit the UK more than six months since they last entered the USA or Canada with a valid visa.

We have also decided to introduce an exemption for holders of diplomatic or official passports issued by the Vietnamese Government, who will be exempt from the requirement to hold a visa when transiting the UK for up to 24 hours.

HEALTH

Cardiac Arrhythmias and Sudden Cardiac Death

The Parliamentary Under-Secretary of State for Health (Miss Melanie Johnson): The national service framework for coronary heart disease, published in

March 2000, heralded a new era for the development of fast and modern services for the prevention and treatment of heart disease.

With significant progress now secured for patients with coronary artery disease, the national health service is now well placed to deliver similar improvements for patients with arrhythmia and with syndromes that can lead to sudden cardiac death.

Dr. Roger Boyle, the national director for heart disease, is today launching a consultation paper on a new national service framework chapter for these conditions. The views received will be considered by a new expert group that is being established by the Department of Health to take forward the task of writing the new national service framework chapter.

The Government have already shown their determination to tackle coronary heart disease through the publication of the national service framework. The prospect of a new the national service framework chapter setting out the standards and models of care for patients with arrhythmia marks a major step forwards for cardiac patients in England.

Copies of "New NSF Chapter on Arrhythmias and Sudden Cardiac Death: A Consultation Paper", have been placed in the Library.

New NSF Chapter on Arrhythmias and Sudden Cardiac Death

A Consultation Paper

Introduction

The national service framework for coronary heart disease, published in March 2000, heralded a new era for the development of fast and modern services for the prevention and treatment of heart disease. Four years on from its publication, the combination of a clear set of national standards, sustained levels of investment and reform and redesign of services has delivered real improvements for patients. Primary care has made extraordinary progress in ensuring that patients with heart disease are on the right combination of drugs to lengthen their lives. Waiting times for bypass surgery and angioplasty have fallen dramatically. Patients with a heart attack are treated quickly with life-saving clot busting drugs.

With significant progress now secured for patients with coronary artery disease, the NHS is now well placed to deliver similar improvements for patients with arrhythmia and with syndromes that can lead to sudden cardiac death. These patients have already benefited from the substantial growth in NHS staff, equipment and facilities. The Government have now agreed to drive further progress for these patients by working with patients, families and NHS professionals to develop new NSF standards or practice recommendations for these conditions.

The strength of the existing NSF has been that it is based on the views of clinicians, patients and their families. Its aims and approaches have credibility with those who deliver it and those who benefit from it. The aim of this consultation paper is to invite initial comments from everyone with an interest in these issues to ensure that we can build a similar consensus for this new NSF chapter.

The views received will be considered by a new expert group that is being established by the Department of Health to take forward the task of writing the new NSF chapter. Detailed membership of the group will be published shortly, but it will include patients, relatives of patients, patient organisations, professional bodies, experts in the field, health service managers and other Government Departments with an interest. The group will be chaired by Dr. Roger Boyle, national clinical director for heart disease, and is aiming to produce the new chapter within twelve months.

The attached paper sets out the proposed scope of the work and how we propose to take the work forward. In addition to your comments on this way forward, we would welcome specific views on:

- Whether the scope covers all the aspects of these conditions which the new NSF chapter should cover;
- Examples of existing good practice in the management of these conditions that might inform the work of the expert group;
- Views on the obstacles to progress on developing state of the art services for these patients, and suggestions on how these might be overcome;
- Areas where further research is needed to improve understanding of these conditions;
- Views on what the immediate, medium term and long term priorities should be for these services; and
- How best to ensure that the patient, family and carer perspective is at the forefront of policy and service development.

Details of how to respond to this consultation are included at the end of this document.

Expert Group

Membership

The group will be composed of external stakeholders similar to the expert external reference groups who helped create the national service framework for coronary heart disease with voluntary and professional organisations being invited to take part. Patients, cardiologists, GPs, nurses and members of voluntary and professional organisations (including CRY, the Ashley Jolly SAD Trust, Hearty Voices, the British Cardiac Society and the British Pacing and Electrophysiology Group) will be asked to join. Representatives from Wales, Scotland and Northern Ireland will also be invited.

Other Stakeholders

We will be holding a stakeholders' event during the consultation period to raise awareness of the new group and invite wider consultation and participation. This will help to ensure that the key issues are covered and that the outcomes address the needs of all the interested parties. If you would be interested in attending this event, please e-mail your name and contact details to Jennifer.francis@doh.gsi.gov.uk

Proposed Workstreams

We propose four key workstreams for the expert group to manage its work, sudden cardiac death and screening; acute care; cardiac interventions; and patient involvement and support.

Sudden Cardiac Death and Screening

It is estimated that 200–400 young people die from sudden cardiac death syndrome each year. Dari Taylor MP's recent Private Members Bill highlighted a number of important issues that the new NSF chapter will need to address. These include:

- Raising awareness of signs and symptoms of conditions that may lead to sudden cardiac death;
- Support for those who have lost relatives or friends;
- Considering the feasibility of guidelines on how these deaths are certified;
- Setting standards or practice recommendations around how suspected cases are treated in primary care;
- Promoting models of good practice for local use; and
- Design of an evidence-based protocol that clarifies when it is recommended that patients and/or their relatives should ideally be invited for screening.

Acute Care

For many patients the first sign of their cardiac condition is an emergency admission to hospital. Those who know they have the condition but whose care is not well managed may also need urgent treatment. Arrhythmia is consistently in the top 10 reasons for hospital admission, using up significant A&E time and bed days. This workstream will cover:

- Design of a care pathway showing the ideal treatment of those who require emergency care for these conditions;
- Outlining what information patients require when in hospital to help them successfully manage their condition after discharge;
- Considering the feasibility of setting or practice recommendations around readmission rates for those with conditions which could be better managed; and
- Development of a set of audit indicators and suitable performance indicators that might be used locally around emergency care for those with arrhythmias and conditions which may lead to sudden cardiac death.

Cardiac Interventions

Since publication of the NSF there have been significant improvements in both the technology and the clinical capacity to intervene to treat arrhythmias and related conditions, giving more options for this group of patients in terms of both diagnosis and treatment. New emerging technologies such as the implantable cardioverter defibrillator (ICD) or more sophisticated pacing devices, with good medical evidence for their use, has given the cardiologist many more treatment options in 2004 compared to the 1990s. This workstream will cover:

- Design of a care pathway for the diagnosis, management and treatment of arrhythmias and conditions which may lead to sudden cardiac death (considering cardiomyopathies, atrial fibrillation and electrical conduction disorders);
- Identification of models which deliver the appropriate interventions reliably; and
- Development of audit measures and suitable performance indicators around the care and treatment of people with these conditions, which might be used locally.

Patient Involvement and Support

Patients with a lifelong or long term cardiac problem need continuing support to help them manage their condition and live as full a life as possible. Assistance also needs to be available for carers and family members where they wish it. Patients need to be involved in decisions about their own care and in helping to shape the planning of services. This workstream will include:

- Design of care pathway for management and control of specific conditions (for example, atrial fibrillation);
- Development of guidance on monitoring patients with chronic conditions;
- Identifying effective ways of providing emotional support to patients and their relatives where appropriate; and
- Identifying effective means of involving patients in their own care and in influencing the way that services are provided.

Next Steps

Ideas and proposals should reach the project team by 4 August 2004 at the latest.

The Department of Health would welcome contributions throughout the consultation. Emerging issues and contributions will be fed into the discussions of the expert group and used to develop the proposed new NSF chapter on arrhythmias and sudden cardiac death.

The information you send to us may need to be passed to colleagues within the Department of Health and/or published in a summary of responses to this consultation. We will assume that you are content for us to do this and, if you are replying by e-mail, that your consent overrides any confidentiality disclaimer that is generated by your organisation's IT system, unless you specifically include a request to the contrary in the main text of your submission to us.

Annex: Consultation Criteria

Code of Practice on Consultation

We will ensure that this consultation meets the following criteria:

- Consult widely throughout the process, allowing a minimum of twelve weeks for written consultation at least once during the development of the policy.
- Be clear about what your proposals are, who may be affected, what questions are being asked and the timescale for responses.
- Ensure that your consultation is clear, concise and widely accessible.
- Give feedback regarding the responses received and how the consultation process influenced the policy.
- Monitor your department's effectiveness at consultation, including through the use of a designated consultation coordinator.
- Ensure your consultation follows better regulation best practice, including carrying out a regulatory impact assessment if appropriate.

WORK AND PENSIONS

Benefit Fraud Inspectorate Report (Milton Keynes Council)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) inspection report on Milton Keynes Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, Milton Keynes council administered some £48.3 million in housing benefits, about 18.5 per cent. of its gross revenue expenditure. BFI inspected Milton Keynes council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The report finds that the benefits service had been given low priority within the council in the past and performance overall had been poor. However, several significant changes had taken place over the past two years, including a complete service restructure and the replacement of its benefits IT system.

The December 2002 comprehensive performance assessment classified the council as poor. Since then progress had been made across many areas of the performance standards. The claims backlog had reduced considerably since 2002 but it was still having an impact on claims processing times. Times taken to process new benefit claims and changes of circumstances were reducing but still did not meet the performance standards. Processing times for new claims had reduced to an average 49 days from 68 days compared with the performance standard of 36 days. The council processed changes of circumstances in 13 days, compared to the standard of nine days.

The council's counter-fraud performance was strong, with successful sanctions against benefit fraudsters and excellent relations with the Department's counter fraud investigation service. However, the council needs to develop procedural guidance for investigators and do more management checks.

The council did not have an overpayment policy or debt recovery strategy. However, actions plans, developed with the support of BFI's performance improvement action team, had been in place since March 2003 and these were having a positive impact on the recovery of overpaid benefits.

The council further demonstrated its commitment to improvement by entering into a public private partnership agreement, in January 2004, to deliver a number of its services, including benefits.

The major challenge for the council now is to continue to improve its benefits processing performance. This will be helped by a more systematic approach to planning, backed up by improvements to its management information and reporting systems.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Over 50s Outreach Pilot

The Secretary of State for Work and Pensions (Mr. Andrew Smith): In December 2002, the Government published the Pensions Green Paper: "Simplicity, Security and Choice: Working and Saving for Retirement." Chapter 6: "Extending Opportunities for Older Workers" sets out a range of measures to increase employment among older workers, which is considered essential to address the pensions challenge.

The Over 50s Outreach pilot is one of these measures and supports PSA target 4c: In the three years to 2006, to increase the employment rate of people aged 50 and over, taking account of the economic cycle, and significantly reduce the difference between their employment rate and the overall rate.

Research has shown that contact from Jobcentre Plus can concern people aged over 50, particularly those on benefits such as incapacity benefit (IB), income support (IS), and severe disability allowance. Clients on these benefits may be concerned about Jobcentre Plus forcing them into work, or reducing their benefits, if queries about work are made, in spite of assurances from Jobcentre Plus to the contrary.

The pilot involves external organisations acting as an intermediary between the Jobcentre and the customer. These organisations will:

- contact people aged 50 and over who are not in work, and encourage their use of Jobcentre Plus services or volunteering opportunities;
- market the back to work help, employment and volunteering opportunities available and overcoming the concerns of some IB and IS clients that their benefits may be affected if they approach a Jobcentre Plus office with a work related enquiry; and
- promote the back to work help available through Jobcentre Plus to people aged 50 and over who may not be aware of this help or who do not normally have contact with Jobcentre Plus.

The evaluation of these pilots will demonstrate what methods of contact and awareness raising worked most successfully to encourage people who would not otherwise have asked about or taken up Jobcentre Plus services and work or volunteering opportunities to do so. The methods that are most successful can then be disseminated throughout Jobcentre Plus to be incorporated into the continuous improvement of their services.

The pilot will run in seven Jobcentre Plus regions for two years and commenced in April 2004. The organisations that successfully tendered for the pilot are as follows:

Region	*District*	*Partner Organisation*
Wales	Cardiff & Vale	Working Links
North East	Newcastle & North Tyneside	Age Concern North Tyneside
North West	Wigan	Adactus Housing Group
North West	Liverpool	Forty Plus
West Midlands	Dudley & Sandwell	Pertemps Employment Alliance
Scotland	Lanarkshire	South Lanarkshire Council
Scotland	Fife	Instep

DEPUTY PRIME MINISTER

Design Coding (Pilot Programme)

The Deputy Prime Minister (Mr. John Prescott): The Office of the Deputy Prime Minister is today launching the design coding pilots programme. Kate Barker in her review of housing supply identified significant levels of undersupply, and a lack of certainty and speed in the planning process. This programme aims to test the use of design coding as a means to accelerate the delivery of housing while maintaining the high level of design content required to ensure that new development contributes fully towards improving the quality of our villages, towns and cities.

A design code is a set of specific rules or requirements to guide the physical development of a site or a place. The aim of design coding is to provide clarity as to what constitutes acceptable design quality, and thereby a level of certainty for developers and the local community alike, that can help to accelerate the delivery of good quality new development.

Operating over a number of different development circumstances, the pilots will be carefully monitored over the coming year and will provide the means to evaluate various models and approaches for developing, adopting and implementing design codes. Depending on the outcome, the review may inform the development of future planning policy.

The Government wish to test the potential for design coding as a means of delivering higher quality development at greater speed through the planning process. The development projects which they have chosen to monitor and evaluate in order to assess the effectiveness of the coding approach are subject to approval through the planning system in the normal way. It is possible that some of these projects may, at a later stage, be referred to the Secretary of State for decision (for example on whether an application should be called in for his own determination or on an appeal against the decision of a local planning authority).

For the avoidance of doubt, partners involved in the design coding exercise should understand that the Office of the Deputy Prime Minister is encouraging the use of coding on these sites without prejudice to any decisions the Secretary of State may be required to take through his formal role in the planning process. The fact that development is proposed in accordance with a design code does not imply that the Secretary of State is content for any particular development proposal to proceed. Any decisions which fall to be made will be taken having regard to the facts and merits of the case, taking into consideration all relevant matters.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

US Naval Ships

The Minister for the Environment (Mr. Elliot Morley): Following the incident in 2003 in which four redundant US naval vessels were transferred from the USA to Hartlepool without the necessary authorisations for them to be dismantled there, I announced in the House on 3 November that

"We will require a full evaluation of the situation to set out why the problems have arisen and what lessons we can learn."—[*Official Report*, 3 November 2003; Vol. 412, c. 535–42.]

Subsequently, the Environment Agency has carried out its own internal Review of the events surrounding the incident. Similarly, DEFRA commissioned its own Review. Both Reviews' terms of reference were to identify lessons that could be learned from the incident.

The reports of each Review are available on my Department's website www.defra.gov.uk, and have today been placed in the Libraries of both Houses.

The Government will carefully consider the conclusions and recommendations of both Reviews, which were broadly compatible, before issuing a further statement.

TRADE AND INDUSTRY

Commission for Equality and Human Rights

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): Creating a fair and more inclusive society is fundamental to building a prosperous country. Equality and human rights must be at the heart of modern Britain. Discrimination has no place in our society.

We need a step change in the fight against discrimination. We need to create a culture of respect based on equal value, the dignity and worth of every individual.

Extending opportunities to all means removing unfair barriers. Delivering prosperity for all means harnessing the skills and potential of every member of society, whatever their background. Equality and human rights matter to everyone—they are not minority concerns.

Last October, we announced the Government's plan for a single equality body to realise this vision of a fairer, more inclusive and prosperous Britain. Today we are setting out how we propose to deliver that vision. Our White Paper on: "Fairness for All: A New Commission for Equality and Human Rights", detailing our proposals has been placed in the Libraries of both Houses.

It is a bold and innovative plan. The new Commission will have a dual remit to challenge discrimination and promote equality of opportunity and human rights.

We believe there is an opportunity for it to create a strong, proactive relationship with private sector employers, both large and small, and service providers to maximise progress towards equality.

The Commission for Equality and Human Rights will bring together the work of three existing equality commissions—the Commission for Racial Equality (CRE), the Equal Opportunities Commission (EOC) and the Disability Rights Commission (DRC). It will also support new laws outlawing workplace and vocational training discrimination on grounds of religion or belief, sexual orientation and, in time, age.

We owe the existing Commissions a debt of gratitude for their work in changing attitudes and practice on disability, gender and racial equality and their hard work in bringing us to this point. Now we are ready to adopt fresh approaches to meet new challenges.

In making today's announcement, we have taken account of the responses to the Government's consultation document Equality and Diversity: "Making It Happen" and the Sixth report of the Joint Committee on Human Rights.

The White Paper owes much to the discussions of the CEHR Taskforce whose membership reflected the broad range of interests involved in this issue, including the existing Commissions. The Taskforce advised Government on a number of key issues for the new body through an innovative and open process.

We are grateful to all its members for so willingly sharing their depth of expertise. Their participation and contributions are an important aspect of our wider policy development, and have informed the White Paper significantly.

The White Paper sets out the proposed vision, functions, powers and governance arrangements for the CEHR. It outlines the work the body will be expected to carry out to support key stakeholders; it sets out the Scottish and Welsh dimensions of the new body and also maps out the road to implementation.

The Core Duties of the New Body

The proposed core duties of the CEHR set out in the document will be to:

Encourage awareness and good practice on equality and diversity.

Promote equality of opportunity between people in the different groups protected by discrimination law.

Promote awareness and understanding of human rights.

Work towards the elimination of unlawful discrimination and harassment.

Promote good relations among different communities and between these communities and wider society.

Additional responsibilities will include:

Keeping relevant legislation under review.

Acting as a centre of expertise on equality and human rights.

Key Issues in the White Paper

The increasing complexities of our diverse society require appropriate tools to challenge discrimination and enforce the law. Our proposals build on the existing Commissions' powers and create a selection of tools for the CEHR to enforce discrimination law effectively.

The White Paper sets out detailed proposals on the role of the CEHR in promoting a culture of respect for human rights and improving public service delivery. The human rights framework will also be used to help balance potentially conflicting rights.

The Government propose that the CEHR will have an obligation to consult stakeholders on its strategic plan. The CEHR will clearly set out how, when and with whom, it intends to consult.

To ensure experience and expertise is not lost from the existing Commissions, the CEHR Board will also, for a transitional period, have three additional reserved seats for a commissioner from the CRE, the DRC, and the EOC.

The White Paper recognises the distinctive issues that arise for disabled people in the establishment of the CEHR and the need to ensure effective transition from the DRC. The Government propose that the nominated transitional DRC commissioner is appointed to sit on the CEHR board until vesting day. After that date, we will ensure, via a statutory requirement, that at least one person who has, or has had, a disability is appointed to the CEHR Board.

The White Paper also proposes a Disability Committee, with disabled people making up the majority of its members. This Committee will have authority to set strategy, develop policy and monitor delivery for specific areas of the CEHR's disability work, and will be subject to a mandatory review after 5 years of the continuing case for the committee. This will give disabled people a clear voice in the CEHR's work.

We recognise the unique and important local racial equality work that has historically been supported by the CRE. The White Paper proposes a commitment to maintaining existing levels of support for local race work.

The White Paper also confirms that the Government will start detailed, preparatory work on the nature and shape of a new statutory duty on public bodies to promote gender equality in fulfilment of its longstanding commitment to introduce such a duty. This duty will oblige public bodies to ensure that their actions (either as employers or service providers) will promote equality of opportunity between women and men and make public services more responsive to their different needs. Part of the preparatory work will involve learning from the experiences of the public sector duty introduced for race through the Race Relations (Amendment) Act 2000, and will be informed by the proposed public sector duty for disability. The Government will consult interested stakeholders and parties as this work develops.

Establishing the CEHR will require primary legislation. We intend to bring a Bill before Parliament as soon as Parliamentary time allows. The Commission will not be fully operational before the end of 2006 at the earliest. A planning phase, beginning shortly, will become progressively more detailed over the next 12–18 months. Plans for bringing in the "new strands" of equality, religion and belief, sexual orientation and age, are outlined in the White Paper.

The Government look forward to consulting and debating on all these issues, and particularly welcomes views responding to the White Paper's questions on regional and local issues and how the body should work with stakeholders. We welcome the eleventh report of the Joint Committee on Human Rights on the structures, functions and powers of the new body, and will consider this further alongside responses to the consultation.

FOREIGN AND COMMONWEALTH AFFAIRS

Overseas Art Exhibitions

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Chris Mullin): The British Council, although not a Government Department, receives a substantial grant-in-aid from the Foreign and Commonwealth Office. The Council regularly organises or sponsors exhibitions overseas of works of art loaned from National Galleries and private collections in the United Kingdom. It provides certain assurances or guarantees in respect of loss or damage while these works are on loan.

In the year ended 31 March 2004, the British Council provided such assurances to six national lenders and undertakings to 206 private lenders. The value of the contingent liabilities that remained outstanding as at 31 March 2004 was £2,807,500 in respect of national lenders and £7,247,453 in respect of private lenders.

Written Ministerial Statements

Thursday 13 May 2004

WORK AND PENSIONS

Benefit Fraud Inspection (Sandwell Metropolitan Borough Council)

The Parliamentary Under Secretary of State for Work and Pensions (Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) third inspection report on Sandwell metropolitan borough council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, Sandwell metropolitan borough council administered some £106.3 million in housing benefits, about 12.5 per cent. of its gross revenue expenditure.

BFI inspected Sandwell metropolitan borough council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached Standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

This was the third BFI inspection of Sandwell metropolitan borough council, instigated because of a deterioration in the performance of the council's benefits service.

The report finds that the council's benefits service had failed to fully implement 54 per cent. of the recommendations made in the earlier follow-up inspection report, published in March 2001. This led to poor performance in key areas including customer services, processing of claims and overpayments.

Since the follow-up inspection in 2001, the council had embarked on an ambitious programme of change. There had been an improvement in the verification of supporting information before benefit was paid, following implementation of the verification framework. However, BFI has concerns about the council's speed of claims processing and its lack of quality checking. New claims were taking an average 86 days to clear compared with 61 days in 2001 and the performance standard of 36 days. Between January and September 2003, the council had failed to comply with regulations when it made awards of benefit in a significant number of cases when it did not have a claim for the period in question. And in early 2003 it decided to implement changes of circumstances from a current date instead of the date of change.

Customers experienced real difficulties in accessing the service, either through the council's call centre or in person at the enquiry counters. Limited performance monitoring of this area made it difficult to identify performance issues and target resources effectively.

There was insufficient training on overpayments and a lack of monitoring. The range of management information collected on overpayments was poor.

The report finds good practices in the council's counter-fraud work including a history of high levels of sanction activity against benefit fraudsters, publicising its counter-fraud policy and having accurate staff guidance.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax Benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

NORTHERN IRELAND

Health and Social Services Estates Agency (2004–05 Performance Targets)

The Parliamentary Under-Secretary of State for Northern Ireland (Angela Smith): The targets, which have been set for 2004–05, are based on the strategic aims and objectives of the agency as set out in section 4 of its corporate and business plan. The targets are in line with the Department's policy of seeking to improve the service provided to the agency's clients in terms of both quality and value for money and I am satisfied that they present a demanding challenge for the agency. A copy of the corporate and business plan will be placed in the Libraries of both Houses.

The targets are as follows:

Quality

95 per cent. of the service provided by the Agency's Client Support staff to external clients to be regarded as satisfactory, of which 35 per cent. of the service to be regarded as either very good or excellent.

95 per cent. of the service provided by the Agency's Project Management staff to external clients to be regarded as satisfactory, of which 35 per cent. of the service to be regarded as either very good or excellent.

95 per cent. of the service provided by the Agency's Trust Consultancy Support staff to external clients to be regarded as satisfactory, of which 35 per cent. of the service to be regarded as either very good or excellent.

90 per cent. of the service provided by the Agency's Specialist Engineering staff to external clients to be regarded as satisfactory, of which 30 per cent. of the service to be regarded as either very good or excellent.

Throughput/Service Delivery

Complete eight Firecode audits on HSS bodies by 31 March 2005.

Complete testing against Health Service guidance and relevant British and European Standards and issue Test Reports to the Authorised Person in respect of 110 sterilizers and washer disinfectors by 31 March 2005, based on an estimate of 99 installed machines at April 2004 and eleven new machines installed in-year.

Respond to requests for Clinical Engineering support within 10 working days of receipt of a request.

Issue all Medical Device/Equipment Alerts with an "Immediate Action" level of urgency designation initiated by the Medicines and Healthcare products Regulatory Agency (MHRA) within three working days on receipt of final MHRA Alert (provided that no further consultation is involved).

Issue all Medical Device/Equipment Alerts with an "Action" level of urgency designation initiated by the Medicines and Healthcare products Regulatory Agency (MHRA) within five working days on receipt of final MHRA Alert (provided that no further consultation is involved).

Financial Management

Ensure that the Agency lives within its running cost allocation for the year.

Demonstrate that the full costs of the Agency are recouped, on a notional basis, through Service Level Agreements with its clients.

CONSTITUTIONAL AFFAIRS

Public Guardianship Office (Performance)

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): My hon. Friend, Lord Filkin, has today set the following key performance indicators and targets for the Public Guardianship Office (PGO) Executive Agency for 2004–05.

KPI 1: To increase the satisfaction of its customers in the delivery of its services.

Target:

To achieve an overall customer satisfaction rating, covering professional and lay receivers, of at least 75 per cent. as measured by its annual customer survey.

KPI 2: To increase the proportion of effective visits by the Lord Chancellor's visitors.

Targets:

To maintain a minimum of 6,000 visits per year to include all receivership division clients.

To achieve 80 per cent. effective visits over the year.

During 2004–05, to develop and implement a system to measure customer satisfaction in the visitor's service.

KPI 3: To maintain an effective system to collect and review accounts, and use this process to review the case management regime to ensure that it is meeting the needs of each customer and client.

Targets:

To collect 60 per cent. of accounts within two calendar months of the accounting end date, 85 per cent. within four calendar months of the accounting end date, and 100 per cent. within six calendar months of the accounting end date, referring cases to the Court of Protection where necessary or taking other steps to ensure proper accounts are produced on behalf of clients (applies to protection clients only i.e. those clients who have an external receiver).

To complete the review of, or to have requested further information for, 100 per cent. of accounts within 20 working days of receipt (to apply to both receivership and protection clients).

KPI 4: To deliver an improved service to clients.

Targets:

Correspondence

To respond to 20 per cent. of correspondence within five working days of receipt; 50 per cent. of correspondence within 10 working days of receipt; and 98 per cent. of correspondence within 15 working days of receipt.

Release of funds

Where access to a client's capital is requested, the PGO will give directions to the court funds office (CFO), or dispatch directions to an external receiver within five working days in 80 per cent. of cases and within 10 working days in 95 per cent. of cases; or explain why it cannot release funds.

Applications for receivership

Providing it has all the appropriate forms and information required in support of an application, PGO will list a case for hearing and notify the applicant within 10 working days in 95 per cent. of cases. The hearing date will be within 35 working days of the date the hearing was listed in 95 per cent. of cases.

After the hearing, PGO will notify applicants of the outcome of the hearing and request any further information the court requires within five working days in 95 per cent. of cases.

PGO will issue orders within 10 working days in 95 per cent. of cases where all information and documents have been received.

Closing cases

Where a client dies and PGO has a complete application for final directions, it will prepare and dispatch directions to transfer assets to personal representatives within 15 working days in 30 per cent. of cases, within 20 working days in 80 per cent. of cases, and within 25 working days in 100 per cent. of cases.

Enduring powers of attorney

To register and return 98 per cent. of correctly lodged EPAs, where there are no objections, within five working days of the end of the statutory waiting period.

Accuracy of orders

To reduce the level of orders returned with errors to 3 per cent.

KPI 5: To demonstrate improvements in efficiency by meeting a unit cost target.

Targets:

To meet a unit cost target of not more than £510 per case.

Written Ministerial Statements

Friday 14 May 2004

DEPUTY PRIME MINISTER

CBRN Decontamination Guidance

The Minister for Local and Regional Government (Mr. Nick Raynsford): The Office of the Deputy Prime Minister has today published the "Strategic National Guidance for the Decontamination of Buildings and Infrastructure Exposed to Chemical, Biological, Radiological or Nuclear (CBRN) Substances or Material". The guidance is available on the ODPM website www.odpm.gov.uk and the UK Resilience website http://www.ukresilience.info/. The guidance may be downloaded from those sites. A copy of the guidance is also available in the Libraries of the House.

The guidance has been prepared to help everyone who may be involved in planning for and decontaminating buildings and infrastructure in the event of a deliberate or accidental release of CBRN material.

The guidance is part of a suite of CBRN guidance developed under the CBRN Resilience Programme led by the Home Office. This particularly complements the guidance my hon. Friend the Minister for the Environment and Agri-Environment published on 25 March 2004 on decontamination of the open environment.

The guidance will be updated periodically. These updates will be available on the ODPM and UK Resilience websites. We welcome feedback on the document. This can be sent to cbrnenquiries@homeoffice.gsi.gov.uk.

The strategic guidance is accompanied by publication today of separate guidance on "Precautions to Minimise Effects of a CBRN Event on Buildings and Infrastructure". This is available in hard copy and on the ODPM and UK Resilience websites. A copy of this guidance is also being made available in the Libraries of the House. Comments and queries can be sent to cbrnenquiries@homeoffice.gsi.gov.uk.

The guidance on precautions provides generic advice to building and infrastructure owners and managers on pre-planning measures to prevent contamination from CBRN events, to limit the extent of any contamination which does occur, and to facilitate the decontamination process itself.

DEFENCE

Tornado GR4A ZG710 (Accident Summary)

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): The Ministry of Defence has today placed in the Library of the House copies of the military aircraft accident summary of the RAF Board of Inquiry into the accident to Tornado GR4A ZG710, which was shot down during Operation TELIC by a US Patriot battery on 22 March 2003.

The Board of Inquiry found that the immediate cause of the accident was that the Patriot battery, in following its self-defence rules of engagement, misidentified Tornado ZG710 as a hostile anti-radiation missile and engaged it. However, like most aircraft accidents, no single cause was to blame. There were several contributory factors. These included the failure of the Tornado's IFF (identification friend or Foe), the wide classification criteria for anti-radiation missiles programmed into Patriot system and the Patriot rules of engagement, which were not sufficiently robust to prevent a friendly aircraft without a functioning IFF system being classified as an anti-radiation missile.

The war in Iraq was completed in a highly efficient and effective manner, for which all those involved must take great credit. As part of that campaign, the crew of ZG710 conducted a dangerous and demanding combat mission in an exemplary manner yet did not return safely. ZG710 was the only Royal Air Force aircraft lost during the war. The Board of Inquiry has established the causes of this tragic accident and has highlighted the various factors that contributed to it. The Board's recommendations are now being implemented.

HOME DEPARTMENT

Communications Data Code of Practice

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): The voluntary code of practice for retention of communications data under Part 11 of the Anti-terrorism, Crime and Security Act 2001 came into force on 5 December 2003, pursuant to the retention of communications data (code of practice) order 2003 (SI 2003/No. 3175). Paragraph 33 of the code requires that its effectiveness would be assessed, against criteria identified in the code, three months from the date it received parliamentary approval. The review period, which began on 5 March 2004, will assess the code against the criteria:

- Has it improved investigative work;
- How many requests for data have been made;
- Is the voluntary scheme working;
- What percentage of the market is covered by communication service providers who have adopted the code of practice;
- Are sectors of the industry, which have not adopted the Code, enjoying an unfair commercial advantage.

The voluntary scheme is working in the sense that there are a number of communications service providers that have volunteered, or are volunteering, to retain communications data in line with the code. However most of these volunteers need to prepare themselves, in technical terms, to be able to do so. Consequently it is still premature to evaluate whether investigative work has been facilitated by the voluntary retention of communications data in line with the code or to determine what data has been acquired by investigators that was available only because of its voluntary retention in line with the code.

Although communications service providers are volunteering to retain data in order to support the important task of safeguarding of national security,

service providers are sensitive to any commercial impact from being identified as volunteers. The Government shall not be identifying providers that have volunteered or are indicating a likelihood of volunteering. Equally there are no indications that sectors of the industry that have not adopted the code of practice, are enjoying an unfair commercial advantage.

We do not believe, at this time, that identifying the volunteers' precise share of the communications service market is helpful, since it could enable deductions to be made, accurately or inaccurately, about which providers have volunteered. However the Government are confident that a significant proportion of communications data is being retained in line with the code.

Once the volunteers are able to indicate that they are retaining data in line with the code, it will be possible to conduct a more thorough evaluation of the effectiveness of the code.

The Government are keeping the issue of retention of communications data under review in the context of the recommendations of Lord Newton's Committee, who reviewed the Anti-terrorism, Crime and Security Act 2001, and the declaration of European Council on 25 March 2004 that proposals for establishing rules on the retention of communications traffic data be examined by the Council with a view to their adoption by June 2005.

In the meantime the voluntary code of practice remains in place and the Government are continuing to engage with service providers which are considering volunteering.

HEALTH

NHS (Overseas Visitors)

The Minister of State, Department of Health (Mr. John Hutton): We are publishing today a consultation paper on proposals to revise and clarify the rules on eligibility for free National Health Service primary medical services. Copies have been placed in the Library.

The consultation paper sets out proposals to strengthen the current system so that eligibility for primary medical services would be aligned as closely as possible with that for free hospital care. It sets out proposals for introducing a system of charges for those overseas visitors who would not be eligible for free treatment and seeks views on how such charges should operate.

Under the proposals overseas visitors would continue to be entitled to receive emergency or immediately necessary treatment free of charge. The paper also invites views on whether any other treatments should continue to be free for the protection of public health.

The proposed new rules are intended to allow general practice staff and primary care trusts to distinguish more easily between those eligible for free treatment and those not.

The consultation begins today and runs until 13 August 2004.

FOREIGN AND COMMONWEALTH AFFAIRS

EU Presidency 2005: European Council Dates

The Minister for Europe (Mr. Denis MacShane): The United Kingdom will hold the Presidency of the European Union from 1 July until 31 December 2005. During that period my right hon. Friend the Prime Minister will chair two meetings of the European Council: on 27–28 October 2005 and 15–16 December 2005. Both meetings will take place in Brussels.

WORK AND PENSIONS

Pensions

The Secretary of State for Work and Pensions (Mr. Andrew Smith): The Pensions Bill introduces the pension protection fund that will ensure workers get a worthwhile pension when the sponsoring employer becomes insolvent and their scheme winds up underfunded. But the protection the fund gives is cover for the future, and cannot help those who have already lost out.

The severe losses that some individuals have already suffered in insolvent pension wind-ups has caused considerable hardship. The Government will therefore make available £400 million of public money to be paid in instalments over 20 years with the possibility of further contributions from industry, to provide assistance in such cases.

Details of the fund's operation will be worked out in consultation with stakeholders, and we will review the operation of the fund in three years' time.

The Government are tabling an amendment to the Pensions Bill today. A copy of this is set out below:

PENSIONS BILL, AS AMENDED

Financial assistance scheme for members of certain pension schemes

Mr Secretary Smith 1

To move the following Clause:—

'(1) The Secretary of State must make provision, by regulations, for a scheme for making payments to, or in respect of, qualifying members of qualifying pension schemes ("the financial assistance scheme").

(2) For the purposes of this section—

"qualifying member", in relation to a qualifying pension scheme, means a person—

(a) who, at such time as may be prescribed, is a member of the scheme in respect of whom the scheme's pension liabilities are unlikely to be satisfied in full because the scheme has insufficient assets, or

(b) who, at such time as may be prescribed, had ceased to be a member of the scheme and in respect of whom the scheme's pension liabilities were not satisfied in full, before he ceased to be such a member, because the scheme had insufficient assets,

and in respect of whom prescribed conditions are satisfied at such time as may be prescribed;

"qualifying pension scheme" means an occupational pension scheme (including such a scheme which has been fully wound up)—

(a) which, at such time as may be prescribed, is not—

(i) a money purchase scheme, or

(ii) a scheme of a prescribed description,

(b) the winding up of which began during such period as may be prescribed, and

(c) the employer in relation to which satisfies such conditions as may be prescribed at such time as may be prescribed;

"scheme's pension liabilities", in respect of a member of a qualifying pension scheme, means the liabilities of the scheme to, or in respect of, the member in respect of pensions or other benefits (including increases in pensions),

and a qualifying pension scheme has, or had, insufficient assets if the assets of the scheme are, or were, insufficient to satisfy in full the liabilities of the scheme calculated in the prescribed manner.

(3) Regulations under subsection (1) may, in particular, make provision—

(a) for the financial assistance scheme to be managed by the Secretary of State, a body established by or for the purposes of the regulations or such other person as may be prescribed;

(b) for the person who manages the financial assistance scheme ("the scheme manager") to hold (whether on trust or otherwise), manage and apply a fund in accordance with the regulations or, where the fund is held on trust, the deed of trust;

(c) for the property, rights and liabilities of qualifying pension schemes to be transferred to the scheme manager in prescribed circumstances and for the trustees or managers of a qualifying pension scheme in respect of which such a transfer has occurred to be discharged from prescribed liabilities;

(d) prescribing the circumstances in which payments are to be made by the scheme manager to, or in respect of, qualifying members of qualifying pension schemes and the manner in which the amount of any payment is to be determined, and, where the fund is held by the fund manager on trust, the circumstances and manner may be prescribed by reference to the deed of trust;

(e) authorising the Secretary of State—

(i) where he is not the scheme manager, to pay grants to the scheme manager;

(ii) where he is the scheme manager, to pay amounts into the fund held by him in accordance with the regulations;

(iii) to pay grants to other prescribed persons in connection with the financial assistance scheme;

(f) prescribing the circumstances in which amounts are to be paid into or out of the fund held by the scheme manager;

(g) conferring functions in relation to the financial assistance scheme on the Pensions Regulator or the Board of the Pension Protection Fund;

(h) providing for a person to exercise a discretion in dealing with any matter in relation to the financial assistance scheme;

(i) applying any provision of Part 1 or 2 with such modifications as may be prescribed;

and such regulations may make different provision for different cases or descriptions of case and include such incidental, supplementary, consequential or transitional provision as appears to the Secretary of State to be expedient.

(4) Any amount which, by virtue of subsection (3)(e), the Secretary of State pays under regulations under subsection (1) is to be to paid out of money provided by Parliament.

(5) A time or period prescribed under subsection (2) may fall (or, in the case of a period, wholly or partly fall) at a time before the passing of this Act.

(6) Nothing in this section prejudices the operation of section 272 (subordinate legislation (general provisions)).'.

Written Ministerial Statements

Monday 17 May 2004

HOME DEPARTMENT

Fraud Law Reform

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): It is estimated that fraud currently costs the UK economy £14 billion a year. To equip law enforcement agencies to tackle the threat we face from fraud, the existing law needs to be modernised. The main problem is that the existing statutes focus on very specific types of fraudulent behaviour, so they do not effectively cover all the potential varieties of fraud and cannot keep pace with rapidly developing technology.

The Government is today publishing a consultation paper on fraud law reform. Its proposals are based on those made by the Law Commission in 2002, following a reference made to them in 1998 by the then Home Secretary. In particular he asked the Law Commission to consider whether a general offence of fraud would improve the criminal law. The Commission concluded that it would help to make the law simpler and more easily understandable for juries, defendants and the general public and make the prosecution process more efficient and effective.

The central proposal is that there should be a general offence of fraud which can be committed in three different ways: by false representation, by wrongfully failing to disclose information or by abuse of position. In each case the behaviour must be dishonest, and must intend to make a gain for the defendant or cause a loss to another. However the gain does not actually have to be obtained, as it does under the existing statutory offences.

We also propose a new offence of 'obtaining services dishonestly', to close a current loophole regarding fraudulent use of machines. The current offence of obtaining services by deception does not cover, for example, giving false details to access data from the internet for which a charge is made. This is because a machine has no mind and so cannot be deceived.

The consultation paper also seeks views on whether all behaviour which is currently prosecuted as conspiracy to defraud can be prosecuted under the proposed new law of fraud (or under other existing law) so that the common law offence of conspiracy to defraud can be repealed. It also seeks views on the possible extension of the existing offence of fraudulent trading, and on the creation of a new offence of possessing equipment to commit frauds. The proposals will cover England, Wales and Northern Ireland.

This legislative reform is only part of a wider set of current initiatives which will help tackle fraud. For its part the Government has:

set up the Assets Recovery Agency and implemented the Proceeds of Crime Act 2002. These will take the profit out of crime by increasing powers to find and recover money from those who benefit from and launder the proceeds of frauds and other crimes;

agreed extra resources for the Serious Fraud Office and City of London Police to tackle fraud;

included new procedures to deal with multiple offending in the current Domestic Violence, Crime and Victims Bill;

included proposals to ensure effective incentives for criminals who give evidence against their associates, which will help in fraud cases, in the White Paper "One Step Ahead", published on 29 March 2004;

proposed new methods of tackling identity fraud in the White Paper on legislation on identity cards, published on 26 April 2004. The introduction of identity cards incorporating biometrics (such as finger or iris scans) will help people to identify themselves uniquely and protect their identity against fraud.

Combating fraud requires vigilance from all and we very much welcome the measures that financial institutions and the retail industry have taken to protect credit cards by a chip-and-PIN system. That step has been found to cut card fraud dramatically in other countries.

Cannabis Reclassification Campaign Evaluation

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): On 1 April the Opposition spokesman for Home Affairs, the right hon. Member for Haltemprice and Howden asked a parliamentary question regarding the evaluation of the effectiveness of the advertising campaign on the reclassification of cannabis.

I replied that the report was being collated and it was expected to be placed in the Library. I can announce that the results of the evaluation are being placed in the Library today. I thought I would take this opportunity to summarise the findings and highlight the next steps the Government is taking with regard to emphasising the risks and harms of taking cannabis.

The document 'Tracking the effectiveness of Advertising/Publicity for Reclassifying Cannabis from Class B to Class C' was produced by an independent research company, LVQ Research. It evaluated the Home Office cannabis campaign target under 18s which comprised of:

Four weeks of radio advertising the message that cannabis remained illegal;

The distribution of two leaflets: (1) Cannabis and the law, which provided clear and simple information on reclassification; and (2) Drugs and the law, which provided more general information about the law and penalties for Class A, B and C drugs;

Press coverage in youth magazines.

LVQ was commissioned to survey a representative sample of 14–17 year olds both before and after the advertising to measure the effectiveness of the campaign. The results were very positive and show that 93 per cent. of respondents were aware that cannabis is illegal which is a significant increase on pre-reclassification levels (88 per cent.); 81 per cent of respondents agreed that smoking cannabis can be harmful—again a significant increase on pre-reclassification levels (74 per cent.).

It is certainly encouraging to note that most young people are aware of the illegal status of cannabis and this information will continue to be communicated through the FRANK campaign along with the health effects and risks of the drug. It is no less important to highlight the dangers to health of taking cannabis as well as the legal issues. We are now embarking on a targeted campaign to ensure that cannabis users are fully aware of the dangers to physical and mental health cannabis poses and to provide avenues where they can reduce intake and stop taking cannabis at all.

We will be producing information targeted at heavy and frequent users. Although that would traditionally be aimed at the 16–24 age group it could equally apply to older cannabis smokers in their thirties.

It is important that anyone can access this information and so we are also producing an all purpose FRANK leaflet in the next few months for light and less frequent smokers aimed mainly at 14–17 but could also be applicable to students in higher education and for parents of occasional users.

The final strand of the proposed education campaign is getting the message across about links with mental health. We are starting to work with relevant stakeholders to devise the appropriate messages and to agree the most effective means of getting them across, for example through mainstream mental health organisations and families of those with mental health problems.

The Advisory Council on the Misuse of Drugs reported that there was no proven causal link between taking cannabis and developing mental health problems it is recognised that an existing mental health problem can certainly be worsened by taking the drug. So the Government message will be clear the only way to protect your physical and mental health from the damage of cannabis is not to smoke it.

FOREIGN AND COMMONWEALTH AFFAIRS

Iraq: Export Licence Applications

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): Following consultation with the Foreign and Commonwealth Office and the Ministry of Defence, the Department of Trade and Industry recently approved a further licence to export military list goods to Iraq. The arms embargo against Iraq remains in place under United Nations Security Council resolution 1483 (2003), with the exception of arms and other related material required by the coalition provisional authority to serve the purposes of this and other related resolutions. As this includes promoting the development of free and fair media, Her Majesty's Government consider it appropriate to grant exemptions for the export of armoured vehicles for use by media organisations working in Iraq. Her Majesty's Government has included conditions for these licences, including a limit to the quantities. The export is consistent with the consolidated EU and national arms export licensing criteria. Future applications will continue to be assessed on a case by case basis against the UN embargo and consolidated criteria, taking into account the circumstances prevailing at the time.

CONSTITUTIONAL AFFAIRS

Draft Criminal Defence Service Bill

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy):): My noble Friend Lord Falconer of Thoroton, Secretary of State for the Department of Constitutional Affairs and Lord Chancellor, has today announced the publication of a draft Criminal Defence Service Bill and a consultation paper seeking views on a number of possible models for the delivery of a restructured criminal legal aid scheme. Copies have been placed in the Libraries of both Houses.

It has been the shared belief of this Government and previous Administrations that those found guilty of offences who can afford to pay their defence costs should be required to do so. This is right in principle and will ensure that a greater amount of finite legal aid funds can be targeted at the poor, the vulnerable and the victimised in line with the commitments set out in the DCA manifesto by the Secretary of State for Constitutional Affairs.

The draft Bill contains two key proposals:

- reintroduction of a financial eligibility (means) test; and
- transfer of the authority to grant the right to publicly funded representation away from the courts and into the scope of the Legal Services Commission.

My Department believes that, taken together, the two measures will bring a greater level of consistency and better control over grant as well as ensuring that those found guilty of offences pay where they are able to do so.

The accompanying consultation paper discusses in more detail, and invites comments on, the implications of these changes and outlines a number of ways in which they might work in practice. The paper will be sent to the key opinion formers within the legal community, including the professions and the judiciaries and will be published on the DCA's website at www.dca.gov.uk/. Responses are requested by the 6 August.

The Bill itself will also be simultaneously examined by the Constitutional Affairs Committee as part of the pre-legislative scrutiny procedure and interested parties will have an opportunity to comment as part of that process.

TREASURY

Customs and Excise

The Economic Secretary to the Treasury (John Healey): The Chief Secretary and I have today presented to Parliament this year's spring departmental report for HM Customs and Excise (Cm 6224).

The spring report provides an interim update on Customs' activities and sets out the department's priorities and expenditure plans for the coming year. This year it confirms strong growth in VAT receipts, which are more than £2.5 billion ahead of the Budget 2003 forecast—including an estimated £1 billion from our crackdown on "missing trader" VAT fraud. It reports continued success in tackling tobacco smuggling, and over £30 million of criminal assets seized. The spring report also outlines the major changes facing the department following the announcement of

plans to create a serious organised crime agency and a single revenue department—Her Majesty's Revenue and Customs.

Alongside this update, the spring report marks a change in policy in relation to the publication of statistics of Customs' seizures. I have decided that Customs will include in their annual and spring reports summary seizure data in relation to those prohibitions and restrictions that they enforce at the frontier but which are not already included in the reports as part of updates on PSA priorities. Customs have not published this information in their annual reports since reporting was streamlined after 1999, but will do so in each spring and annual report from now on.

There has been continuing interest in the number of seizures Customs make in the areas where they protect society, including particular interest in Customs' new anti-smuggling role on imported meat and other products of animal origin. Customs will therefore publish seizure information on:

meat and other products of animal origin;

articles seized under the Convention on the International Trade in Endangered Species (CITES);

plants and plant-based goods;

pornography and paedophilia;

firearms, offensive weapons and explosives;

various other prohibited and restricted goods.

The data published in this report show that, in the nine months from April to December 2003, Customs made 9,571 seizures of illegal meat and other animal products with a total weight in excess of 119 tonnes. In comparison, there were 2,053 seizures by all agencies involved in these controls in 2001–02, a figure that increased to 7,819 in 2002–03.

Customs will continue to consider requests for further information in accordance with the "Code of Practice on Access to Government Information". They will only withhold information under exemption 4 (law enforcement and legal proceedings) or exemption 7 (effective management and operations of public service) of that code where information would be of value to those who seek to circumvent customs controls or in the clearest cases of risk to the effective management of their operations.

INTERNATIONAL DEVELOPMENT

Palestinian Authority

The Secretary of State for International Development (Hilary Benn): I am today announcing a £7 million initial UK contribution to the World Bank's public financial management reform trust fund to support the Palestinian Authority.

The Palestinian Authority has been in fiscal crisis since late 2000. Lack of revenues due to economic collapse prevents it from delivering services effectively to the Palestinian people. In 2004 its total budget is $1.45 billion. Revenues are expected to be $800 million, leaving a financing gap of about $650 million. Donor budget support in 2003 was $270 million, a sharp fall from 2001 and 2002. The PA has large and growing debts to the private sector and commercial banks. This is an unsustainable situation, and a continued fiscal crisis could lead to the termination of social and administrative services to the population, and poverty (already at over 60 per cent.) increasing further.

At a meeting of the ad hoc liaison committee in December 2003, attended by the Palestinian Authority (PA), Israel, major donors to the PA and other Arab countries, the PA asked the World Bank to create a new mechanism through which donors could provide pooled contributions to support the PA's budget. The public financial management reform trust fund was approved by the World Bank's board on 22 April and launched on 27 April. The objectives of the reform fund are to mobilise additional donor resources in support of the PA budget, to harmonise donor assistance in exchange for a commonly agreed reform programme and to simplify procedures for the PA. Use of direct budget support also reflects World Bank analysis that this is the most efficient of all the emergency assistance instruments currently employed by donors, with substantial macroeconomic and welfare benefits.

An important precondition for creation of the reform fund was a satisfactory assessment of the current financial management procedures of the PA. The World Bank has carried out a detailed country financial accountability assessment (CFAA), which found that major and highly creditable improvements in budgeting and fiscal transparency have been introduced during the tenure of the present Palestinian Finance Minister. Weaknesses in financial accountability remain, related in particular to the lack of adequate public financial statements, inadequate auditing and the undeveloped oversight role of the Palestinian Legislative Council. But the CFAA confirms that the current systems are adequate to justify World Bank budget support. It also identifies key actions needed to further improve the systems, and these have now been agreed with the PA as performance benchmarks for the reform fund. Disbursement of funding will be conditional on achievement of reform benchmarks. This is an approach successfully used by the EC in its recent bilateral provision of budget support to the PA.

The use of donor funds provided to the PA through the reform fund will be carefully monitored. Prior conditions for the first disbursement, such as passage of a 2004 Budget law, and the payment of all security personnel salaries by direct bank transfer, have already been met. Funding will be disbursed in six-month tranches depending on progress with further reforms, such as revised external audit arrangements, containment of the wage bill, maintaining a minimum level of social sector expenditure, and full control of the Ministry of Finance over all PA procurement. World Bank staff will monitor the implementation of the benchmarked actions on a regular basis. Every quarter, the PA will prepare a progress report. Using these reports, the bank will lead quarterly technical and fiduciary supervision missions to review compliance with agreed prior actions and benchmarks, budget implementation and general economic and social developments. DFED will participate in these missions.

In the event of the PA not meeting all benchmarks, the World Bank would assess the specific situation and consult contributing donors on whether a waiver were appropriate. Should no waiver be granted, the release of the next tranche of funding would be held back pending fulfilment of the benchmarks. The World Bank could

also, in consultation with contributing donors, suspend disbursements if the PA reversed already implemented policy actions, until remedial action were taken, donors have the option of bilaterally withdrawing their money from the reform fund at any time.

In addition to the PA's own external auditing arrangements, an external auditor contracted by the World Bank will perform annual audits of the reform fund's deposit account at the PA Ministry of Finance. These audits will verify the extent to which the World Bank's requirements under the grant agreement are being met, and whether the PA's procedures are adequate to achieve this result.

We expect several donors to contribute to the reform fund. Norway and Canada have already decided to do so. Other countries are considering contributions. The World Bank plans to contribute $20 million of its own alongside the fund. The EC has been providing budget support to the PA since 2000, and is likely to continue doing so. The IMF is involved in a technical capacity. The USA has been actively involved in the design of the fund, and will participate in its management. The G8 has urged the international community to increase and accelerate their assistance provided to the PA. We and other contributors will be urging other donors to give money to the reform fund. Arab states continue to be the biggest supporters of the PA's budget, although some may prefer to contribute outside the reform fund.

DFID has thoroughly appraised a UK contribution to the reform fund, in line with our published policy on the provision of direct budget support. This policy reflects our commitments under Government accounting that aid should be properly accounted for, used for the intended purposes and represent value for money. When appraising budget support, we ensure the following:

(i) a thorough evaluation of public financial management and accountability systems, and associated risks, has been carried out;

(ii) the recipient government has a credible programme to improve standards of these systems;

(iii) the potential developmental benefits justify the risk, taking account of any safeguards that can be put in place to buttress and develop these systems; and

(iv) these assessments are explicitly recorded as part of the decision-making process to provide assistance.

In the case of the Palestinian Authority, we share the World Bank's assessment that there is a significant fiduciary risk, but that a satisfactory programme of reforms is in place to reduce this risk. This level of risk is not unusual in countries where DFID provides budget support. I have judged that the developmental benefits of providing budget support, and the risks of not providing it, justify this fiduciary risk.

In making this judgment I have also looked at the impact on poverty of PA spending. The PA does not have an internationally recognised poverty reduction strategy. But it has started to develop short-term planning frameworks to guide its own prioritisation. I share the judgment made by the International Development Committee in its report in February that, although unusual, given the current state of the Palestinian economy, "wage payment maintained by budget support is an effective method of emergency poverty alleviation". The PA Ministry of Planning is beginning to develop a more comprehensive approach to poverty reduction. DFID will work with other donors to help them do this, alongside the provision of budget support.

I have, of course, considered the many allegations made against the PA about diversion of funds. In particular, there have been accusations that budget support previously provided by the European Commission was used to finance terrorist activities. A EU independent anti-fraud investigation into these allegations has been going on for over a year and has not yet concluded. An inquiry by a European Parliament Working Group on budgetary assistance to the Palestinian Authority reported in March 2004, after a one-year investigation. The majority report concluded that "there is no conclusive evidence, to date, that the EU non-targeted direct budgetary support was used to finance illegal activities, including the financing of terrorism", and that "there is no evidence that EU budget support has not been fully transferred into the PA budget or that it was used outside the budget". It further concluded that budget support had "contributed to bring about concrete changes in the PA financial system and impacted on the PA reform process towards more transparency, accountability and good governance". Recommendations from the report have largely been addressed in the design of the World Bank reform fund, notably that "future budget support should be accompanied by clear, specific conditionalities subject to strict monitoring", and that "such conditionalities should be established in full co-operation and in close co-ordination with the other international donors".

It has been suggested that aid to the PA should be conditional on progress with security sector reform, and other measures to reduce terrorism against Israeli citizens, such as action against incitement. We agree with the World Bank and other donors that at this stage it will be more effective to link disbursement of budget support to conditions related to financial management, budget allocation and accountability. The Government have made action on Palestinian security its highest diplomatic priority in our relations with the PA. We are also providing practical assistance to help them take this action. Particularly under current circumstances, we do not think an underfunded PA that risks not being able to pay salaries is in the interests of Israeli security. We have informed the Government of Israel of our decision to contribute. The Israeli Government have told us that they welcome international humanitarian and economic assistance to the Palestinians and support the World Bank reform fund, provided the money is properly spent and monitored.

Contributing to the PA's budget is in line with the Government's strategy for supporting Palestinians. Our new Palestinian country assistance plan says we will work with partners to help end conflict and create a viable Palestinian state that will reduce poverty. The strategy has three aims:

prospects for peace enhanced;

more effective, accountable and inclusive Palestinian institutions and governance systems;

and humanitarian and development assistance delivered more effectively.

Contributing to the reform fund will address all three outcomes. It will also address the Government's wider political objectives on the middle east peace process, by helping the PA to meet its roadmap commitments. Our initial contribution to the reform fund is for 2004. We will consider later this year, in light of monitoring of the PA's use of donor funds and their likely financing gap and spending plans for 2005, whether we should continue contributing.

I am placing in the Library of the House the World Bank's board paper describing the rationale for, and operational arrangements of, the reform fund, which includes as an annex the Palestinian Authority's statement of development policy and a matrix of further reform actions the PA is undertaking. I am also placing in the Library of the House copies of the finalised "Palestinian Country Assistance Plan".

Written Ministerial Statements

Tuesday 18 May 2004

DEPUTY PRIME MINISTER

China

The Deputy Prime Minister (Mr. John Prescott): Following my right hon. Friend the Prime Minister's successful visit to the China in July last year, he asked me to head a short-term task force on China, to make recommendations for taking forward Sino-UK relations. Against the backdrop of our already extensive relationship with China, and considerable interaction across the range of Government business, the group was asked to come up with concrete proposals in four particular areas: trade and investment; science and technology; education and sustainable development and the environment.

I chaired three meetings of the task force, which generated an excellent range of proposals in the areas mentioned. I was delighted to report back to the Prime Minister on our progress, as scheduled, ahead of Premier Wen Jiabao's visit this week. I was also delighted to introduce Premier Wen to the members of the task force at our meeting on 10 May and to present him with a summary of our recommendations.

I have passed a copy of those recommendations to the Chair of the all party China group, and am today making copies available in the Libraries of the House. Details of the task force's composition, and the dates of their meetings, are contained therein. The recommendations will now be taken forward by the relevant departments, and I am grateful for the support of my right hon. Friends the Secretary of State for Trade and Industry and the Secretary of State for Education and Skills, in particular, in agreeing to help implement them. I intend to hold a further meeting of the task force in the autumn, to review progress to that point, and to visit China again myself as soon as possible thereafter.

WORK AND PENSIONS

Benefit Fraud Inspectorate Report (Bromley Council)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) follow-up inspection report on the London Borough of Bromley council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The 'performance standards for housing benefits' allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, London Borough of Bromley Council administered some £69.5 million in housing benefits, about 13.9 per cent. of its gross revenue expenditure. BFI inspected London Borough of Bromley Council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The report finds that the council's benefits service had improved its performance since the earlier inspection report, published in September 2001, implementing 72 per cent. of the recommendations from the earlier report. There was commitment and professionalism in the council's efforts to improve benefits administration and examples of innovation and good practice.

The backlog of work identified in the first inspection had been cleared and processing times for new benefit claims had reduced from 120 to 81 days. Challenging targets had been set for 2004–05 but there was still much to do to reach the 36-day performance standard. Although the verification framework, the national standard for verifying evidence supporting benefit claims, had not been implemented, the council planned to be fully compliant by May 2004. The introduction of an electronic benefit claim form was helping claims to be processed more effectively and BFI commends the council for the quality and level of management checking, providing assurance on accuracy.

The council's internal security controls were found to be inadequate but it quickly responded to BFI's recommendations to rectify these problems.

The council had made major improvements in its counter-fraud work by entering into a partnership with London Borough of Greenwich Council, and there had been substantial improvements in the number of administrative penalties and prosecutions undertaken.

The council had comprehensive plans to improve its benefits overpayment work and had good management information for this area of work. However, it accepted that more work was needed to improve its recovery of overpaid benefits. The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Employers Liability Compulsory Insurance

The Minister for Work (Jane Kennedy): Further to the written statement on 4 December 2003 by the Minister for Work, my hon. Friend the Member for Kilmarnock and Loudoun (Mr. Des Browne), *Official Report*, columns 68–70WS, when the Government gave a commitment to produce and publish a "Framework for Vocational Rehabilitation" by late summer 2004, I am pleased to announce the publication today of a

discussion paper on vocational rehabilitation. Comments on the discussion paper will feed into the development of the framework.

The discussion paper describes the scope of vocational rehabilitation, outlines why the Department is developing a framework for vocational rehabilitation and describes what the framework will look like. The discussion paper also gives stakeholders an opportunity to share their thoughts and experiences on vocational rehabilitation.

Copies of the discussion paper have been placed in the Library.

Pension Credit

The Minister for Pensions (Malcolm Wicks): I can now provide the latest monthly progress report on the take-up of pension credit, which became payable on 6 October 2003.

There are now 2.45 million pensioner households (2.96 million individuals) being paid pension credit, an increase of 44,000 households (54,000 individuals) during April. As at 30 April, there are 1.78 million households (2.15 million individuals) now receiving more money as a result of the introduction of pension credit. The pension credit application line, at our four sites across the country, has received 3.54 million calls since it became operational on 7 April 2003 and 94 per cent of calls have been answered within 30 seconds. The average pension credit award is £41.67 per week.

We have now written to every pensioner household in the country to tell them about pension credit. We are continuing to work with organisations such as Help The Aged, Age Concern and Citizens Advice, amongst others, both at a national and local level, to encourage eligible people to take up their entitlement. The current phase of the campaign is focusing on those customers who are less likely to take up their entitlement.

There is plenty of time for pensioners to apply for pension credit. To ensure that pensioners do not lose out there is a twelve-month backdating provision, as announced in the Budget statement. This will allow applications to be backdated for a year, or to the date entitlement begins if this is later.

I am placing in the Library a report showing progress so far, including regional breakdowns of the number of pension credit households and numbers of pension credit awards in parliamentary constituencies in Great Britain. Copies of the report are also available for hon. Members in the Vote Office.

Written Ministerial Statements

Wednesday 19 May 2004

HOME DEPARTMENT

Criminal Cases Review Commission (CCRC)

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): I would like to inform the House that Ms Penelope Barrett and Mr. Alastair MacGregor have been appointed as members of the Criminal Cases Review Commission. Copies of the press release relating to these appointments are available in the House Library.

Community Cohesion and Race Equality Strategy

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): I am announcing today the launch of the consultation pamphlet, "Strength in Diversity: Towards a Community Cohesion and Race Equality Strategy". The pamphlet sets out the Government's analysis of the issues and challenges that we need to address in developing our community cohesion and race equality strategy, which we plan to publish in the autumn. Our aim in publishing the consultation pamphlet is to promote an honest and open debate on a range of issues that are profoundly important to us all.

Hard copies of the document, available today, have been placed in the Library of the House. It is also on the Home Office website, http://www.homeoffice.gov.uk/comrace/

Immigration Review

The Minister for Citizenship and Immigration (Mr. Desmond Browne): This is a further report to the House on the Government's comprehensive review of legal migration schemes, including details on lifting the suspension of visa restrictions in Bulgaria and Romania.

On 30 March, my right hon. Friend the Home Secretary announced that, as part of this wider review, Ken Sutton had been asked to investigate allegations of abuse of the European Community Association Agreements (ECAA) scheme by nationals from Bulgaria and Romania. At the same time, consideration of all visa and after-entry applications from these countries was suspended.

From 13 April, the suspension was lifted for the majority of visa applications in Bulgaria and Romania—for business and family visits, and low-risk categories such as official staff. Visa applications remained suspended for the ECAA scheme, which relates to the self-employed, and for the employment schemes which were being investigated as part of the wider migration review. After-entry applications remained suspended.

At the same time we were in contact with employers and operators who regularly employed Bulgarian and Romanian nationals under the temporary low-skill employment schemes. On 8 April we advised them that if they had pressing short-term labour needs, they should make alternative arrangements, since it could take several weeks before these schemes could be fully reviewed, and any necessary action taken, before they could be re-opened.

On 22 April my right hon. Friend announced that a series of taskforces had identified a number of measures which would be implemented to reduce abuse of migration schemes, across all countries. The first set of measures concerned people posing as students, people pretending to provide education or training, and people marrying for immigration purposes. He indicated also that he had ordered a review (again across all countries) of the temporary low-skill employment schemes.

Following that review, I am today announcing changes to the quotas that apply to two temporary low-skill employment schemes, the seasonal agricultural workers scheme (SAWS) and the sectors based scheme (SBS). I am also announcing measures which will ensure that these schemes are not open to abuse.

These schemes serve a valuable role in helping UK employers to recruit workers in sectors (agriculture, food processing and hospitality) where there are difficulties in meeting labour needs from the resident workforce. At the same time, it is important that these schemes should now reflect the fact that workers from the countries which joined the EEA on 1 May are now free to seek work in these sectors. Most important of all, it is important that these schemes are protected from abuse.

I am therefore announcing that the quota for 2005 for the seasonal agricultural workers scheme will be 16,250, a 35 per cent. reduction on the current quota; and from 1 June 2004, the existing overall quota for the sectors based scheme will be cut by 25 per cent. There will be a quota of 6,000 SBS permits for the food processing sector and 9,000 SBS permits for the hospitality sector. These quotas will be released in two half-yearly stages.

These reductions are based on the level of take-up of these schemes by Accession nationals, prior to accession on May 1.

I am also announcing that the Home Office will introduce measures intending to ensure that those participating in our temporary employment schemes leave the United Kingdom at the end of their stay. These measures will include applying country-specific quotas within the overall quotas. These country-specific quotas will only be made available where we are confident that the source country will accept their nationals back if they are found to be here illegally.

The Home Office will consult industry on the detail of how these quotas will be applied, and will have immediate discussions in particular with the SAWS operators about action to ensure that the students who come in under this scheme return home at the end of their assignment.

I intend also to change the immigration rules so that those admitted under the SBS will no longer be able to switch into permanent migration schemes, such as work permit employment. Those admitted under SAWS are

currently not allowed to switch into permanent migration schemes, and new guidance will be issued to ensure that these rules are being enforced consistently.

We are also issuing new guidance to ensure that applicants for SBS and SAWS are subject to rigorous checks, and to ensure that we act swiftly on the basis of intelligence of abuse, including the use of fraudulent documents.

With these additional controls in place on the temporary low-skill schemes, and in the light of our continuing review of abuse across all migration schemes, we are now in the position to take the next step in the progressive re-opening of visa applications from Bulgaria and Romania. With effect from today, I am announcing the lifting of the suspension on applications from Bulgaria and Romania for the temporary low-skill (SAWS and SBS) schemes, for the high-skill schemes (work permits and HSMP), and for all after-entry cases. The one exception is applications from the self-employed under the ECAA scheme, which will remain suspended in the light of the ongoing investigation by Ken Sutton.

Further announcements will be made in due course relating to other aspects of the managed migration review.

DEPUTY PRIME MINISTER

Housing Bill

The Minister for Housing and Planning (Keith Hill): The Housing Bill introduces measures to help create a fairer and more effective housing market, and will protect those that are most vulnerable in that market.

The Government have listened carefully during Commons consideration of the Bill and also to external stakeholders. It now plans to add two further measures to the Bill: provisions to tackle empty homes; and measures to protect tenancy deposits. These amendments will be tabled in due course.

Empty homes

The Government are committed to finding ways of bringing empty homes back into use. We have already encouraged voluntary measures wherever possible, but recognise that more is needed to reduce significantly the number of privately owned homes that remain vacant for long periods of time.

The Government therefore intend to enable local authorities to make management orders in respect of long-term empty homes. The legislation will contain the evidence a local authority would need to provide in support of an application to make a management order on an empty home. We will ensure intervention is proportionate, appropriately targeted and compliant with the Human Rights Act. Voluntary arrangements will continue to be appropriate in many circumstances.

Empty homes management orders would support measures to increase housing supply. We will set out the precise scope of intervention in legislation. Our intention is to apply this measure to genuine cases of housing vacancy. We do not consider it would be appropriate to apply it to property that is genuinely occupied, albeit not on a regular basis, or property subject to an action that will result in it coming back into use without the need for intervention.

A management order would enable a local authority to put in place arrangements to enable a property to be let. In the case of a dilapidated property, this might entail renovation. The legal estate would be retained by the owner who would be entitled to any rental income generated by the local authority after deduction of its relevant costs. The owner would be entitled to sell the property or request revocation of the management order.

Tenancy deposit protection

The Government also propose to add to the Housing Bill some provisions on tenancy deposits.

The Government remain of the view that providing a link between the safeguarding of tenancy deposits and a requirement for all tenants to have written agreements is a sensible objective. However it accepts that the Law Commission proposals on tenure reform will take time to put into effect and need careful consideration.

Our intention is to add provisions to the Housing Bill to require that tenancy deposits should be subject to safeguarding arrangements. The Government accept that they will need to sponsor a scheme to provide for the safeguarding of the deposits sought by the majority of landlords. But they also recognise that members of trade or professional bodies should be able to look to those bodies to provide their own schemes if these schemes provide sufficient protection and the Government are able to approve them.

The provisions will need to define the term "tenancy deposit" and provide that where such deposits are required by landlords or their agents they should be safeguarded by a scheme approved by the Government. There will need to be civil sanctions for non-compliance. There will need to be provisions for the timely return of deposits and for their repayment following dispute resolution.

These measures—on empty homes and tenancy deposits—follow extensive consultation with the key stakeholders, and there will be an opportunity for further debate when they are tabled for inclusion in the Housing Bill.

Co-ordinated On-line Register of Electors

The Minister for Local and Regional Government (Mr. Nick Raynsford): Today, I am pleased to announce to the House the launch of a consultation on modernising electoral registration. This follows on from my written statement on the 15 January 2004, *Official Report*, columns 42–43WS, when I announced the launch of the coordinated online register of electors (CORE) project. At that time I gave a commitment to consult with local government and others on the details for taking forward the project, including the proposed funding arrangements.

This project will contribute to the modernisation of the electoral registration process in Great Britain by, first, standardising local electoral registers and, secondly, allowing authorised users to access local registration data centrally. It will support the achievement of our aim to hold a multi-channelled e-enabled general election sometime after 2006.

Stakeholders will have until 13 August 2004 to send in their responses.

Copies of the consultation document are available in the Libraries of both Houses and will also be made available on the website of the Office of the Deputy Prime Minister.

CULTURE, MEDIA AND SPORT

Digital Switchover

The Secretary of State for Culture, Media and Sport (Tessa Jowell): The Government is continuing to work with the broadcasting industry and consumer representatives to facilitate the switch to digital television. Already over half of all households receive digital television services. In view of the progress to date switchover between 2006 and 2010 remains attainable. However it is apparent that more concerted action by broadcasters, retailers and manufacturers, supported by Government and Ofcom, is required if the full benefits of digital television are to be made available to the whole population within the desired period.

Completing the switch to digital will bring significant benefits to consumers, to broadcasters and to the UK economy as a whole:

- It will bring digital terrestrial television signals to the 25 per cent. of the population who live in areas that cannot currently receive them because of spectrum limitations;
- Increased quality and choice for viewers;
- Broadcasters will no longer have to incur the costs of transmitting signals in both formats, releasing resources for investment in programming and other services for consumers; and
- Spectrum will be released to allow the development of more television and other services for consumers.

The BBC and the commercial public service broadcasters have a lead role in achieving switchover. They have an established relationship with virtually all Britain's households and are therefore uniquely placed to ensure a smooth transition to digital broadcasting. They will also benefit from reduced costs and from the ability to offer consumers a wider range of services.

The Government have now written to the commercial terrestrial broadcasters and the BBC inviting them to engage with us and with Ofcom on how to achieve a complete switchover and to establish an appropriate timetable, in liaison with other stakeholders. The outcome of these discussions will be reflected in the digital licences which Ofcom will grant to ITV companies, Channel 4 and 5, and in the BBC's charter review.

Further stages in establishing the plan for switchover will be reported to the House in due course.

TREASURY

Financial Services and Europe

The Financial Secretary to the Treasury (Ruth Kelly): The Chancellor of the Exchequer is today publishing two documents on financial services and Europe, which have been prepared jointly by Her Majesty's Treasury, the Financial Services Authority and the Bank of England. Copies of The "EU Financial Services Action Plan: Delivering the FSAP in the UK" and "After the Financial Services Action Plan: A New Strategic Approach" are available in the Library of the House.

WORK AND PENSIONS

"Building on New Deal: Local Solutions Meeting Individuals' Needs"

The Secretary of State for Work and Pensions (Mr. Andrew Smith): I have today published a paper "Building on New Deal: Local Solutions Meeting Individuals' Needs" which provides a summary of our strategy for building on the success of our employment programmes. A copy has been placed in the Library.

The UK employment rate is now the highest in the G7, and the unemployment rate the lowest. Employment has risen in every region of the UK5 and risen more in areas that previously had the lowest employment rates. The number of unemployed people has fallen by over 600,000 on both measures since 1997 to its lowest level for over a quarter of a century.

This success reflects the comprehensive economic strategy that the Government have put into place since 1997. At the heart of this success have been our welfare to work policies, such as the new deal programmes, which have helped well over a million people to find work.

We have achieved significant falls in unemployment and rises in the employment levels of lone parents and older workers. But we are determined to do even more for those who face the most difficult barriers to work. We will build upon the success of the new deal, strengthening the new deal's ability to help people who face particular difficulties in moving into employment. This requires a personalised approach where personal advisers, local managers and service providers are given sufficient flexibility to deliver solutions appropriate for individuals and local labour markets. This strategy builds on existing policies to secure social justice for those who too often have been left behind, and to enable them to realise their full potential, to the economic and social benefit of the whole community and to achieve the goal of full employment in every region and nation of the UK.

We are currently consulting on these proposals with a range of stakeholders, including the devolved administrations, Social Security Advisory Committee, the Disability Employment Advisory Committee, and the National Employment Panel. Once the views of stakeholders have been considered, a final paper setting out the full details of the proposals will be published.

Kerrier District Council (Benefit Fraud Inspectorate Report)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) follow-up inspection report on Kerrier district council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper, "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "performance standards for housing benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002-03, Kerrier district council administered some £23.1 million in housing benefits, about 60 per cent. of its gross revenue expenditure.

BFI inspected Kerrier district council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

In the first BFI inspection report, published in October 2001, BFI reported that claims processing was poor with a backlog of work, overpayment recovery was improving, and counter-fraud activity was working well.

The follow-up report finds that the council's benefits service had made progress in improving its performance, implementing 68 per cent. of the recommendations from the earlier report.

Kerrier district council had a clear vision, which was underpinned by policies, strategies and effective planning. Good progress had also been made in the area of overpayments, where sound practices were evident and recovery from benefit was strong.

Verification of evidence supporting benefit claims was good in the majority of areas and management checking was clearly evidenced and used to good effect. However, speed of claims processing remained poor, compounded by the continuing backlog of work, with the council taking an average 88 days to process new benefit claims compared to the Performance Standard of 36 days.

The council's three-year best value plan set local targets for new claims, reported changes of circumstances and renewal claims processing. Although these were realistic targets for the council to achieve, they did not meet the performance standards.

The council's counter-fraud policy and positive drive towards quality fraud investigations had prompted a number of successful and publicised sanctions and prosecutions. This demonstrated that the council is serious about tackling benefit fraud. However, the report finds weaknesses, which included inadequate management control and poor communications between benefits and investigation staff.

A comprehensive benefits overpayments policy and procedures manual was in place, high levels of management checks and controls were utilised, and most overpayment recovery methods were used.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Council of the Isles of Scilly (Benefit Fraud Inspectorate Report)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on the Council of the Isles of Scilly was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2001-02, the Council of the Isles of Scilly administered some £96,000 in housing benefits, about 2.5 per cent. of its gross revenue expenditure.

BFI inspected the Council of the Isles of Scilly against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The inspection was prompted by the council's failure, over several years, to provide its quarterly performance management information to the Department for Work and Pensions.

The council is the smallest in England with an average housing benefit and council tax benefit caseload of 60 cases. The report finds that although the council complied with some elements of the performance standards there were few formal policies and procedures in place, and no formal management checking was undertaken.

There was a strong commitment at all levels within the council to provide an efficient and effective benefits service and a high proportion of customers expressed satisfaction with the service provided. The council met the 36-days performance standard for processing new benefit claims.

At the time of the inspection, the council had just entered into a temporary partnership arrangement with the neighbouring Penwith district council to provide a more effective benefits service.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Social Security Advisory Committee

The Secretary of State for Work and Pensions (Mr. Andrew Smith): Today I have published the Government response (Cm 6190) to the Work and Pensions Committee First Report of Session 2002–03 (HC 296) inquiry into the Social Security Advisory Committee. I have today also published my response to the report of the review of the Social Security Advisory Committee carried out by Professor Hazel Genn CBE as part of the internal review of SSAC (Cm 6189).

I am grateful to the Select Committee and to Professor Genn for their reports which are both detailed, comprehensive and helpful. It has been very helpful for the Select Committee to carry out its inquiry when it did and to be able to consider the two complementary reports together.

Written Ministerial Statements

Thursday 20 May 2004

HOME DEPARTMENT

Firearms

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): Following the Home Secretary's decision not to extend further the life of the Firearms Consultative Committee, we have been considering how best to establish a forum for consultation and to assist in the current review of legislation. We have decided to establish a broad-based Firearms Advisory Committee with around 21 members to be drawn in equal measure from shooting interests; law enforcement/regulation; and organisations and community groups with an interest in the social consequences of firearms use and misuse.

The committee's terms of reference will be:

> To advise the Home Secretary on the law and policy on firearms, having regard to the need to maintain public safety and prevent criminal misuse and taking into account the interests of legitimate shooters and the efficient, effective administration of controls.

It will be assisted in this task by a technical sub-committee with 12 to 15 members drawn principally from representatives of law enforcement bodies and shooting organisations with knowledge and experience of firearms matters. The sub-committee's terms of reference will be:

> To consider the technical and legal aspects of administering and enforcing firearms controls and to make recommendations to the Firearms Advisory Committee on these and such other matters as may be referred to them.

We will be approaching interested organisations and individuals to seek nominations to serve on one, or both, committees with a view to appointing members as soon as possible.

The committee will be asked to submit a report of its work after 12 months and copies will be placed in the Library.

WORK AND PENSIONS

Disability Discrimination Act

The Parliamentary Under-Secretary of State for Work and Pensions (Maria Eagle): I have today laid before both Houses, in draft, two codes of practice concerning the provisions of the Disability Discrimination Act 1995 (DDA) relating to employment and associated matters. The codes have been prepared by the Disability Rights Commission (DRC) under section 53A of the DDA.

The issue of the new codes is necessitated by changes to the legislation by virtue of the Disability Discrimination Act 1995 (Amendment) Regulations 2003 and the Disability Discrimination Act 1995 (Pensions) Regulations 2003, which transpose requirements of European Council Directive 2000/78/EC concerning disability discrimination, and come into force on 1 October this year.

The draft code on employment and occupation covers the provisions of the DDA (as amended) relating to disabled employees, contract workers, police officers, partners in firms, barristers and advocates and persons undertaking practical work experience. The other draft code concerns the duties, under the amended Act, of Trade Organisations and Qualifications Bodies.

The new codes will replace the existing ones issued by the Secretary of State in 1996 and 1999, which deal only with employment and trade organisations, respectively. The codes are issued by the DRC, subject to approval by my right hon. Friend the Secretary of State and after laying them in draft before Parliament for 40 sitting days. The codes are intended to give practical guidance to those to whom the relevant provisions of the DDA apply.

Section 53A of the DDA provides that failure to observe any provision of a code of practice does not of itself make a person liable to any proceedings, but that any provision of a code which appears to a court or tribunal to be relevant to any question arising in any proceedings under the Act shall be taken into account in determining that question.

The draft codes have undergone public consultation, and a report of the process has been published by the DRC on its website.

The changes to the legislation from October will bring significant improvements in the rights of disabled people in employment and in vocational training. In particular, they will extend the employment provisions of the DDA to one million additional employers and seven million further jobs, including 600,000 in which disabled workers are already employed. Employers and others with new duties from 1 October have no need to be apprehensive about these new duties, as they will not be required to make unreasonable changes. The new codes of practice will help them to decide what is reasonable in particular circumstances.

The Commission will be publishing the codes in advance of the legislative changes coming into force, so that those with new duties under the DDA can consider what reasonable adjustments they may need to make.

The intended commencement date is 1 October 2004, to coincide with the date on which the changes to the legislation come into force.

DEPUTY PRIME MINISTER

Right to Buy (Homes for the Elderly)

The Minister for Housing and Planning (Keith Hill): The Government has today issued a consultation paper seeking the views of social landlords and tenant groups on its proposals to update guidance issued in 1993 on the exception from the right to buy scheme of homes that are particularly suitable for occupation by elderly persons.

From the inception of the right to buy in 1980, certain kinds of property have been excepted from the scheme. These are listed in paragraph 11 of schedule 5 to the Housing Act 1985. One of these exceptions is that a

landlord may deny a tenant the right to buy if his home is particularly suitable for occupation by elderly persons, having regard to its location, size, design, heating system and other features paragraph 11 also provides that a tenant denied the right to buy on these grounds may appeal to the Secretary of State. A joint Department of the Environment and Welsh Office circular, issued in 1993, provides guidance on the main points on which the Secretary of State will normally expect to be satisfied when determining such appeals.

The Government's Housing Bill proposes that such appeals by tenants living in England should, in future, be determined by a residential property tribunal rather than by the Secretary of State. This will provide administrative benefits but will make no substantive difference to landlords or to tenants who appeal under paragraph 11. Such appeals in Wales will continue to be determined by the National Assembly for Wales. The Government do not propose to change the terms of the exception in paragraph 11 in any way.

In support of this transfer of jurisdiction, the Government proposes to review and update the guidance in the 1993 circular. Clearer guidance will benefit both tenants and landlords by reducing ambiguities that have led to unnecessary work, disagreements, and disappointment. Among other things, the Government proposes that landlords should explain the effect of the paragraph 11 exclusion to their tenants, and that elderly tenants who are being rehoused should be advised if in their landlords' view the right to buy would be unlikely to apply to the properties that they are being offered.

The responses to the consultation paper will be taken into account in preparing the revised guidance. It is intended that the new circular will be issued by the end of 2004.

HEALTH

Bureaucracy

The Secretary of State for Health (Dr. John Reid): On 30 October, I announced to the Health Committee that the Department would be conducting a review of its arm's length bodies (ALBs). The first stage of this has now been completed. I wanted to update the House on the decisions that I have taken and how the review will move forward to the next stage.

In his Budget speech, my right hon. Friend the Chancellor of the Exchequer remarked on the importance the Government attach to improving public sector efficiency and reducing bureaucracy. In the Budget report, he set out that "the pursuit of efficiency also includes reducing bureaucracy, that both cuts headquarters' administration costs and frees up time of front line professionals to respond better to the needs of their customers". The Department's ALB review needs to be seen in this context and related to the work of Sir Peter Gershon in reviewing public sector efficiency. It is about putting the frontline first, and it is clear from the first stage of the ALB review that, although much good work continues to be done by ALBs, there is considerable scope for improving efficiency and reducing bureaucracy.

The review covers bodies undertaking national functions sponsored by the Department that were in existence or in the pipeline in 2003–04. The 42 ALBs included in the review are listed below. In a full year, ALBs spend more than £2.5 billion and employ more than 22,000 staff. If left unchanged, they would employ about 10 times the number of staff of the Department itself after completion of its change programme. It is clear from the analysis we have done during the first stage of the review that:

- there are overlapping and duplicated functions;
- there is scope for reducing unnecessary regulatory and policy activities;
- back-office functions such as human resources, finance, information technology and estates could be carried out more effectively;
- a considerable number of bodies could be merged, thereby reducing overheads and integrating like functions;
- some bodies could be moved to a more independent status with greater stakeholder control; and
- there is scope for significant efficiency and productivity gains particularly in the area of services acquired centrally for the National Health Service.

The ALB sector has grown over several decades and, as currently constituted, does not best meet the health and social care needs of today and tomorrow. I have therefore asked my Department to take forward with the sector a reform agenda that delivers the following objectives:

- maximum devolution of responsibility to front line NHS and social care;
- improved efficiency across the sector with minimal bureaucratic overhead;
- closer working across the boundaries between health and social care; and
- minimised burden of inspection and regulation on health and social care services without reduced effectiveness.

These objectives are aimed at putting the frontline first and improving services for the public while ensuring value for public money.

In light of preliminary findings of the first stage, I have set the parameters for the next stage of this review. These are, against a baseline year of 2003–4:

- a 50 per cent., reduction in the number of ALBs;
- a saving in expenditure by ALBs of £0.5 billion by 2007–08; and
- a reduction in posts of 25 per cent., in the same period.

Changes on this scale will enable considerable extra resources to be redeployed to the frontline. For example another £0.5 billion would provide for four new hospitals, or 20,000 more nurses, or 6,250 consultants, or 7,500 general practitioners.

I recognise that the changes in prospect will cause uncertainty and disruption but they are needed. I intend for the next stage of the review to be completed as quickly as possible, within my parameters, and taking into account the need for proper discussion with the ALBs concerned and the devolved administrations. The Department will be in touch with ALB chairs and chief executives shortly to discuss our ideas for change. We want to work with them on the detail of our proposals over the next two months. We are hoping to complete this next stage by the end of June so that decisions can be announced before the summer recess.

List of ALBs considered in the review ALBs in 2003-04

1. † CHI—Commission for Health Improvement
2. CPPIH—Commission for Patient & Public Involvement in Health
3. CRHP—Council for the Regulation of Health Care Professionals
4. † DPB—Dental Practice Board
5. DVTA—Dental Vocational Training Authority
6. FHSAA—Family Health Services Appeals Authority
7. GSCC—General Social Care Council
8. HDA—Health Development Agency
9. HFEA—Human Fertilisation & Embryology Authority
10. HPA—Health Protection Agency
11. † MHAC—Mental Health Act Commission
12. MHRA—Medicines & Health Care Products Regulatory Authority
13. NBA—National Blood Authority
14. NBSB—National Biological Standards Board
15. † NCSC—National Care Standards Commission
16. NCAA—National Clinical Assessment Authority
17. NHS AC—NHS Appointments Commission
18. NHS CFSMS—NHS Counter Fraud & Security Management Service
19. NHS Direct
20. NHS Estates
21. NHS IA—NHS Information Authority
22. NHS LA—NHS Litigation Authority
23. NHS Logistics Authority
24. NHS Modernisation Agency
25. NHS PASA—NHS Purchasing & Supplies Authority
26. NHS PA—NHS Pensions Agency
27. NHS Professionals
28. NHSU
29. NICE—National Institute for Clinical Excellence
30. NPSA—National Patients Safety Agency
31. † NRPB—National Radiological Protection Board
32. NTA—National Treatment Agency for Substance Misuse
33. OIR—Office of the Independent Regulator of NHS Foundation Trusts
34. † PHLS—Public Health Laboratory Service
35. PMETB—Postgraduate Medical Education & Training Board
36. PPA—Prescriptions Pricing Authority
37. † ROC—Retained Organs Commission
38. UKT-UK Transplant

† These separate organisations have now gone or are planned to go.

Others covered by the review

These are now operational:

39. CHAI—Commission for Health Care Audit & Inspection
40. CSCI—Commission for Social Care Inspection

These are planned but not yet operational:

41. Dental Special Health Authority
42. HTA—Human Tissue Authority

CABINET OFFICE

Regulatory Impact Assessments

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): The Government is committed to ensuring that regulations are necessary, give effective protection, balance cost and risk, are fair and command public confidence. In accordance with this, we require Departments to produce and publish regulatory impact assessments (RIAs) for all regulatory proposals likely to have an impact on business, charities or voluntary bodies.

I have today presented to Parliament a Command Paper listing RIAs published between 1 July and 31 December 2003. Copies of those RIAs listed are available in the Library. This is the twentieth such Command Paper.

Correspondence

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): I am today publishing a report on Departments' and Agencies' performance on handling Members' and Peers' correspondence for 2003. Details are shown in the table. Departmental figures are based on substantive replies unless otherwise indicated.

The footnotes on the table provide general background information on how the figures have been compiled.

Correspondence from MPs/Peers to Ministers and agency chief executives[1]

Department or Agency	*2002*			*2003*

Health and Safety Executive	—	—	—	10	195	91

[1] Departments and Agencies which received 10 MPs/Peers letters or less during 2003 are not shown in this table. Holding or interim replies are not included unless otherwise indicated.

[2] DCA is currently undertaking changes to its processes for handling correspondence. In the short term these have lead to delays in response time, but in the longer term will improve the quality of responses. These changes include quality control of all responses, and revising the DCA correspondence monitoring system.

[3] Formerly the Public Record Office.

[4] Includes all Ministerial correspondence.

[5] The statistics for the FSA are dominated by a single lobbying campaign which accounted for almost 70% of its total annual correspondence. The Agency is reviewing its procedures for handling peaks of work arising from such a campaign. Majority of replies are signed by Health Ministers.

[6] 2003 figures also include a small number of letters from members of the public.

[7] Department of Health improved its performance to just under 70% in the last quarter of 2003.

[8] Figures include a small number of interim replies relating to correspondence sent to HM Prison Service. 2003 performance figures also include 16,268 cases answered directly by the Director General of the Immigration and Nationality Directorate. Response times to these cases relate to drafting performance only. Figures based on final replies will be available for 2004. Immigration and Nationality Directorate response target was increased to 20 working days with effect from 1 April 2003 to account for the wide geographical spread of offices and the nature of the correspondence which is predominantly about specific cases rather than policy issues.

[9] The CRB target was raised from 5 to 10 working days at the beginning of 2003 to reflect the standard set out in the CRB's Corporate Plan.

[10] Performance suffered due to the exceptionally high volume of correspondence following the introduction of the Working and Child Tax Credits in April 2003 and because, early in 2003–04, the Revenue's priority was to get claimants into payment. Since the processing of tax credits claims has been stable, the Revenue has restored normal complaints-handling procedures and increased the resources on its complaints teams. As a result, performance should begin to improve.

[11] DTI increased its response target from 10 to 15 working days with effect from 1 January in line with other main Whitehall departments.

[12] 2003 data currently not available because of transfer to OFCOM.

[13] The Child Benefit Centre transferred to the Inland Revenue with effect from 1 April 2003. Figures quoted are for the period 1/1/03 to 31/3/03.

Written Ministerial Statements

Friday 21 May 2004

HOME DEPARTMENT

Animal Experiments

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): The Government believe that current developments in science are providing significantly more opportunities to do work on the reduction of the number of animals used, the refinement of the procedures involved to minimise suffering, and the replacement of animal use (the 3Rs), and that to take advantage of these opportunities we should put more resources into this area and broaden the community of interest.

I am, therefore, pleased to inform the House that the Government are setting up a new national centre for research into the 3Rs and animal welfare. The Centre for Best Practice for Animals in Research (CBPAR), established by the Medical Research Council, will form the core of the new centre. The new centre will be called the National Centre for Replacement, Refinement and Reduction of Animals in Research, and will act as a focal point for research into the 3Rs.

This decision implements the recommendation by the House of Lords Select Committee on Animals in Scientific Procedures, in its report published in July 2002, that such a centre should be established, which we broadly accepted in the Government's reply in January 2003. The Government have today published a report prepared by the inter-departmental group on the 3Rs (IDG3Rs) on the implementation of the Select Committee recommendation and has accepted its recommendation that responsibility the new national centre should rest with the Office of Science and Technology, with its wider scientific remit, rather than with the Home Office, whose role is constrained by its regulatory function under the Animals (Scientific Procedures) Act 1986. A copy of the inter-departmental group's report has been placed in the Library of the House.

Placing the lead responsibility with the Office of Science and Technology emphasises that the 3Rs, humane experimental techniques, and the development of advanced research methods are part of the mainstream United Kingdom science base. It also acknowledges that Department's leading role in signalling both the financial and scientific benefits of such developments. In the initial stages the Centre will need the wider support and structure that the MRC can offer.

A new board will be set up to direct the centre and I am delighted to announce that Lord Turnberg has agreed to chair this board, aided by Professor Paul Flecknell as vice-chair. The remaining membership of the board will be appointed shortly. It is envisaged that all major stakeholder groups will be represented, including academics, Government, industry and animal welfare groups.

The mission statement for the Centre will be:

> The National Centre for the Replacement, Refinement and Reduction of Animals in Research is dedicated to the 3Rs—replacing, refining and reducing the use of animals in research and testing licensed under the Animals (Scientific Procedures) Act 1986.
>
> Replacement is the ultimate aim for the Centre, but for so long as the use of animals continues to be necessary, it is essential that every effort is made to minimise their use and improve welfare. Ensuring that laboratory welfare is optimised is critical for scientific, legal and ethical reasons.

The Centre's mission is to advance and promote the 3Rs in research and testing using animals. This will be progressed by:

> Developing a UK strategy for the implementation of the 3Rs;
>
> Supporting high-quality research that advances the 3Rs;
>
> Promoting a co-ordinated approach to 3Rs research;
>
> Providing advice and guidance on the 3Rs and animal welfare to the scientific community;
>
> Supporting the UK scientific community's commitment to best practice in all aspects of laboratory animal science and welfare;
>
> Working with regulators on the acceptance of alternative methods for regulatory toxicology.

The first task of the new board will be to develop the mission statement into a detailed action plan.

The Centre will require more funding than currently being made available to CBPAR. The Medical Research Council and the Biotechnology and Biological Sciences Research Council have both agreed to double the level of funding provided this year and the Home Office will transfer its budget for research into the 3Rs currently administered by the Animal Procedures Committee to the Centre once current commitments have been honoured. It is envisaged that funding for the centre will increase further in future years and Lord Turnberg will be discussing this with Government. He will also discuss funding commitments with other funders of research involving animals.

Fatalities in Emergencies

The Minister for Crime Reduction, Policing and Community Safety (Ms Hazel Blears): Guidance on dealing with fatalities in emergencies has been published today on the UK resilience website www.ukresilience.info. Copies have been placed in the Library of the House. The purpose of this guidance—which is directed primarily at local planners and responders—is to reaffirm, update and consolidate what emergency officers should consider when planning the response to an emergency involving fatalities. It is the product of consultation with a range of stakeholders—central and local government, and the emergency services amongst others—and builds on earlier guidance in "dealing with disaster", revised third edition.

Thankfully mass fatality incidents have not occurred frequently in the United Kingdom. The emphasis of any response will focus on saving lives—but we must be prepared should the worst happen.

But the guidance is by no means intended to be a stand-alone solution to ensure that there is sufficient

capacity across the country to deal with such incidents. Work is being taken forward by the Home Office, in collaboration with the regions, the devolved administrations, planners and responders to establish existing levels of national capability. This should inform the development of a framework for a national response.

The guidance will be revisited in light of developments stemming from the Civil Contingencies Bill, currently before Parliament, and a review of the coroner system, set out in the Home Office position paper "Reforming the Coroner and Death Certification Service". We will also update and revise the guidance as findings emerge from research and scientific projects, and lessons are learned from incidents both at home and abroad. Feedback on the guidance should be sent to: feedback.massfatalitiesguidance@homeoffice.gsi.gov.uk. It would be helpful to have these by 30th June 2004.

TRADE AND INDUSTRY

Petroleum Act

The Minister for Energy, E-Commerce and Postal Services (Mr. Stephen Timms): I am pleased to announce to the House that I am today offering a petroleum exploration and development licence (PEDL 133) to Composite Energy plc to cover acreage in the counties of Falkirk and Clackmannanshire (Blocks NS88, NS89, NS97, NS98 and NS99).

The company will have a fixed period in which to decide whether or not to accept the offer.

Written Ministerial Statements

Monday 24 May 2004

HOME DEPARTMENT

Fingerprinting (Asylum Applicants)

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I have today made an authorisation under section 19D of the Race Relations Act 1976 as amended which enables the Home Office to continue to implement measures targeting the top five nationalities in terms of third country/Dublin cases for additional examination on the grounds of nationality. This follows an authorisation made by my predecessor my right hon. Friend the Member for Stretford and Urmston (Beverley Hughes) on 24 February 2004 which enabled the Home Office to initiate these measures.

These authorisations enable my officials to compare the fingerprints of asylum seekers of these five nationalities against other Governments' fingerprint databases of asylum seekers, failed asylum seekers and those granted some form of leave to remain.

They also allow my officials to compare the details of asylum seekers from the five prioritised nationalities with the details of individuals originally from those countries but now holding a form of immigration status elsewhere who have been granted a visa to travel to the UK.

The purpose of these measures is to enable my officials to identify individuals who have claimed asylum, are failed asylum seekers or absconders, or enjoy some form of status in another country who subsequently claim asylum in the UK.

I have decided to continue these measures to allow further time to gather evidence to test our assumptions that significant numbers of asylum applicants from these five nationalities are entering the country on legitimate EU and other western countries' documents and subsequently claiming asylum as a refugee, and to acquire further information on this abuse in order to inform future Home Office policy. I have also decided to make this authorisation continuous, and I will review the operation of it at three monthly intervals to consider the implementation and outcome of the measures and the top five nationalities targeted.

Iraq, Turkey, Iran, Somalia and Sudan were the top five nationalities subject to third country/Dublin action in the last six months of 2003. These nationalities remain the top five over the previous six months from October 2003—March 2004. This means that other EU member states are properly responsible to consider the asylum claim of the individuals concerned.

Any individuals identified under these processes may be returned to the safe third country identified as responsible for them under existing immigration law.

Immigration

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I have today made an authorisation under section 19D of the Race Relations Act 1976, as amended, which will enable immigration officers to prioritise the examination of passengers of Somali national origin. For a period of three months this will allow such people to be examined more rigorously than would otherwise be the case.

The purpose of this measure is to enable the immigration service to obtain information on the number and profiles of Somali-born passengers entering the UK. The aim is to establish how many of in-country asylum applicants claiming to be a Somali, apparently without documentation, enter the UK.

This authorisation extends one that was made by my predecessor as Minister for Immigration on 24 February this year.

CONSTITUTIONAL AFFAIRS

Legal Aid

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): The Secretary of State for Constitutional Affairs has issued a direction that brings cases related to the running of a business, and brought under the Proceeds of Crime Act 2002, into the scope of legal aid. The standard criteria for receiving legal aid, as set out by the Access to Justice Act 1999, will still have to be met. The full text of the direction has been placed in the Library of the House.

Written Ministerial Statements

Tuesday 25 May 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Pesticides Safety Directorate

The Minister for Rural Affairs and Local Environmental Quality (Alun Michael): I have set the Pesticides Safety Directorate the following performance targets for 2004–05.

To evaluate pesticide approval applications and contribute to the EU review programme.

To develop policy initiatives to reduce the negative impact of pesticides and to encourage alternative control measures.

To ensure UK objectives are reflected in EU legislation and regulation.

To monitor actively pesticide use and limit illegal use by taking appropriate enforcement action.

To increase public awareness and understanding of safe use and regulation of pesticides.

To recover the full cost of our operations from the industry and DEFRA, and achieve efficiency savings.

Further details are given in the business plan, a copy of which has been provided to the Library of the House.

INTERNATIONAL DEVELOPMENT

Vietnam Programme

The Parliamentary Under-Secretary of State for International Development (Mr. Gareth Thomas): The Department for International Development (DFID) will be increasing its support to Vietnam to £40 million in 2004–05 and to £60 million in 2005–06 to help Vietnam meet its challenges. Our new Country Assistance Plan for Vietnam (copies of which I have placed in the Library) will support the Government of Vietnam's own strategies for growth and poverty reduction. It sets out three key objectives for our contribution to the collective development effort. First, we will promote fair, efficient and effective use of public financial resources. Second, we will seek to strengthen the Government of Vietnam's efforts to achieve social and economic development that includes all groups of society. Third, we will support Vietnam in its transition to market-based economy. A fourth pillar of our programme in Vietnam will be to help improve the effectiveness of the international development effort.

DFID intends to provide £20 million a year over the next three years in the form of poverty reduction budget support. This commitment will constitute the single largest element of our programme in Vietnam and will provide a significant boost to Vietnam's overall reform programme. I can also announce today a £500,000 project to help improve the quality of public investment in Vietnam by supporting the introduction of a modern and efficient inspection system in the Ministry of Planning and Investment.

DEPUTY PRIME MINISTER

Local Government Reviews (Boundary Committee's Final Recommendations)

The Minister for Local and Regional Government (Mr. Nick Raynsford): I have today received the independent boundary committee's final reports and recommendations on options for unitary local government for each of the existing two-tier county areas in the three northern regions. We welcome the completion of this significant step towards the holding of referendums for elected regional assemblies in the autumn.

We will now carefully consider the recommended options and any representations about them that are made to us before taking decisions about the options that will be included in a draft order. We do not intend to take decisions about the options until 6 July.

In the meantime, those who wish to make representations to us may do so. We will have regard to those before deciding what options we propose to put to electors. These options, together with the date of the referendums, will be contained in an order to be made following parliamentary approval.

FOREIGN AND COMMONWEALTH AFFAIRS

Iran (Export Licence Application)

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): The Government have recently issued a licence for the BBC to export to Iran up to three civilian armoured vehicles which are of military specification. Although military rated, these vehicles are manufactured for civilian use and would provide essential protection for journalists working for the BBC. Her Majesty's Government believed that an exception to the UK unilateral arms embargo should be made to allow the free and secure movement of journalists throughout the region and that approval of the application was otherwise consistent with the consolidated EU and national arms export licensing criteria. Specific provisos about usage and disposal are attached and Her Majesty's Government are satisfied that there is minimal risk of diversion to a military end-use or for use in internal repression.

Written Ministerial Statements

Wednesday 26 May 2004

TRADE AND INDUSTRY

National Minimum Wage

The Parliamentary Under-Secretary of State for Employment Relations, Competition and Consumers (Gerry Sutcliffe): The Government have placed in the Libraries of the House the latest tables showing the estimated number of workers who have benefited directly from the National Minimum Wage between its introduction and the next uprating in October 2004. Members of Parliament wishing to know the number of beneficiaries in each area of the UK over this period are advised to consult this information. The information can also be found on the Department of Trade and Industry's website at www.dti.gov.uk/er/emar. The information will be updated every six months to take account of future increases to minimum wage rates and the release of new data from the Office for National Statistics.

I am also attaching below a regional breakdown of the number of people who are expected to receive a pay rise as a direct result of the forthcoming increase in minimum wage rates in October 2004.

Number of jobs that stand to benefit from the forthcoming October 2004 NMW up-rating by region

North East	*110,000–120,000*
North West	*210,000–240,000*
Yorkshire and Humberside	*180,000–210,000*
East Midlands	*150,000–180,000*
West Midlands	*150,000–190,000*

Source: DTI estimates based on ONS's Spring 2003 central estimates of low pay, Labour Force Survey and New Earnings Survey

Note: These data are based on 10p pay bands from the ONS central estimates and take account of earnings and prices inflation between the period Spring 2003 and October 2004; uprating from £3.80 to £4.10 for 18–21 year olds and from £4.50 to £4.85 for those 22 and over.

The DTI and the ONS do not possess any information on the number of workers who have benefited from the National Minimum Wage by constituency.

Company Law

The Secretary of State for Trade and Industry (Patricia Hewitt): I am today publishing a consultation document "Company Law: Flexibility and Accessibility", containing proposals designed to help ensure that company law remains up-to-date in future, and to make it clearer and more easily-accessible in particular for smaller firms.

The proposals are for the introduction of new types of legislative power enabling company law in future to be amended by a special form of secondary legislation, making it easier to keep the legislation updated over time. The powers would also be used to rewrite relevant parts of the law to make it simpler to understand for all its users, particularly smaller firms and their advisers.

The use of the powers would be governed by stringent requirements for public consultation and for Parliamentary scrutiny, and by criteria which would ensure that the needs of smaller users were at the heart of any reform proposals. Over time, I would look forward to being able to bring all the key operational provisions relating to smaller private companies together, clearly and logically, in one place.

The powers would be introduced as part of the major new Companies Bill which we are preparing for introduction as soon as parliamentary time allows. The Bill will implement the work of the independent Company Law Review, which provided an authoritative assessment of the guiding principles for future reform, and my proposals proceed very much in that spirit.

The consultation period will close on 24 September 2004 to allow full time for consideration of these important proposals, and I have placed copies of the consultation document in the Libraries of both Houses.

NORTHERN IRELAND

Rivers Agency

The Parliamentary Under-Secretary of State for Northern Ireland (Ian Pearson): The Rivers Agency is an Executive Agency of the Department of Agriculture and Rural Development for Northern Ireland. It acts on behalf of the Department as the statutory drainage and flood defence authority for Northern Ireland.

I have set the following key targets for the Agency for the 2004–05 business year:

Urban flood defences

To construct or refurbish 612 metres of urban flood defences.

Drainage infrastructure

To accommodate increased storm run-off from 91 hectares of development land.

To replace/refurbish 653 metres of dangerous culverts.

Maintenance watercourses

To complete identified maintenance works on 1235 of the 1585 designated open watercourses included in the Notice of Annual Maintenance as part of a six-year scheduled maintenance programme.

Replies to written enquiries

To issue substantive replies to 80 per cent. of written enquiries within 15 working days of receipt.

Schedule 6 applications

To respond to 98 per cent. of Schedule 6 applications within three months.

DEFENCE

Pay and Personnel Agency Targets 2004–05

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): The Key Targets that I have set the Chief Executive of the Pay & Personnel Agency for 2004–05 are as follows:

Customer Service and Satisfaction

Key Target 1. Achieve 99.0 per cent. average timeliness and 96.8 per cent. average accuracy for salary payments, expenses payments and pension awards.

Key Target 2. Achieve 90 per cent. average responsiveness against key service standards.

Key Target 3. Improve customer satisfaction index score from 72.6 per cent. in 2002–03 to 75 per cent.

Key Target 4. Achieve Charter Mark accreditation by December 2004.

Processes

Key Target 5. Achieve Main Gate approval for the future pay system by September 2004.

Efficiency

Key Target 6. Achieve unit costs of no more than: salary payments £10.60; expenses payments £4.50; pension awards £125.00.

CONSTITUTIONAL AFFAIRS

Queen's Counsel

The Parliamentary Under-Secretary of State, Department for Constitutional Affairs (Mr. Christopher Leslie): My right hon. and Noble Friend the Secretary of State (Lord Falconer of Thoroton) has made the following Written Ministerial Statement.

"I have been considering the outcome of the consultation on the future of Queen's Counsel in England and Wales, and Northern Ireland. In July 2003 I published a consultation paper on the future of Queen's Counsel. 376 responses were received. I published a summary of these responses on 26 January 2004.

While the consultation did not produce a consensus as to whether the title of Queen's Counsel should continue to exist, it is clear to me that as Lord Chancellor and Secretary of State I should no longer play a part in assessing and selecting candidates to be appointed as QCs. None of the consultees could demonstrate that such involvement in the selection process is fundamental to the Silk mark's value; nor does it add value for consumers of legal services. I will, therefore, not continue that role.

Yet respondents from within the legal services market were equally clear about the value of maintaining a kitemark for advocacy services—both to recognise excellence, and to provide useful information for consumers. For this reason, the Government have invited the Bar Council and the Law Society, and their counterparts in Northern Ireland, to develop and implement new schemes for accrediting leading advocates, which will replace the existing arrangements. The professions are far better placed to fulfil this function than the Secretary of State for Constitutional Affairs. I do have a responsibility, however, for ensuring that the resultant scheme is fair and in the interests of the public and the consumers of legal services.

My intention is to work with the professions to ensure that the replacement schemes meet as many as possible of the objections that have been raised over the Silk appointments process. Kitemarking must be designed to serve the interests of consumers by identifying genuine excellence. It must provide fairness for members of the professions. I would also want it to encourage diversity within the professions, with a continually widening range of backgrounds and experience represented amongst those the professions recognise as leaders in advocacy. I have every confidence that the professions can deliver this aim. To achieve these goals, there must be rigorous selection against clearly defined objective criteria. There must also be provision for the kitemark to be removed where the holder has failed to meet the high standards required. The professional bodies have agreed to work together to achieve a single scheme for both branches of the profession, and are already collaborating with each other and my Department in working out the details of a joint approach to reform. I will set out these plans in a further statement.

The professions will be responsible for selection and will send a list of suitable candidates to the DCA. I will retain responsibility for recommending as a minister to Her Majesty that she appoint those on the list to the rank of Queen's Counsel. I will of course need to satisfy myself that the interim scheme meets the goals I have set for it, and consider whether the professions' recommendations are consistent with its terms and whether I should depart from them in exceptional circumstances.

The new arrangements should be ready to receive the first applications towards the end of this year. They will ensure, as the great majority of those who responded to the consultation asked, that there continue to be effective arrangements for recognising advocacy of outstanding quality in the higher courts. At the same time, those arrangements will have particular regard to the need for a competitive market.

The consultation process also demonstrated the need for a wider review not just of kitemarking, but of the information available to consumers in relation to the whole spectrum of legal services. That review will seek to establish what shortfalls there are in the information available, and what solutions can be implemented to serve better the interests of the consumer. An important part of this process will be establishing what types of accreditation scheme might be beneficial, and how they should be set up and administered. The evaluation will not be restricted to advocacy alone, but will cover all fields of legal practice in which there is a need for better consumer information. It will be based on the principles that we are already establishing for the advocacy scheme—fairness, diversity, and a stronger focus on consumer interests. In particular, it will take full account of the wider context of competition law and the free market. While we carry out this longer-term market study, we will be careful to keep the work consistent with the review of the regulation of legal services that Sir David Clementi is conducting. If the conclusion of the market study is that new ways are required to meet consumers' information needs, one of the essential questions will be who will best be able to meet these

needs. That will have to be decided in the light of the presentation of Sir David's conclusions that are due at the end of this year. Because of this linkage, and if any legislation is needed to implement the results of the market study, the Government expect that any scheme would be implemented at the same time as the conclusions on the wider review.

The reformed kitemark for higher court advocacy is an interim measure. We have adopted it to provide continuity and to maintain the advantages that the consultation process has identified, in the international market for example. It will be reviewed when the results of the long-term market study are available, to confirm first whether legal services customers need it, and—if they do—that it is still compatible with the principles that will be established in the study.

The interim scheme will retain the title of QC. The use of the QC title will be reviewed along with the other details of the scheme once the market study is complete. But I stress that although the title will not be changed in the interim scheme, the substance of the award will be different, since it will be based on improved criteria and selection processes.

The interim solution does not aim to remove the title of QC from existing holders. We are looking for ways to improve the current system, and at the wider picture. It makes sense to consider what, if anything, to do about the current titleholders only when that process is complete.

This decision affects only the jurisdictions for which I have responsibility: England and Wales, and Northern Ireland. It does not affect the position in Scotland, or the Crown Dependencies, or any of the Overseas Territories or Commonwealth countries where the rank of Queen's Counsel is in use."

Written Ministerial Statements

Thursday 27 May 2004

HOME DEPARTMENT

Assets Recovery Agency

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): I am pleased to announce that the Assets Recovery Agency's annual report 2003–04 has been laid before Parliament today.

The Report covers the Agency's first full year of operation in the financial year 2003–04. The agency became operational on 24 February 2003. The report covers an assessment of the Agency's performance against its business plan 2003–04.

The agency is already making an impact. In its first year of operation it had 62 cases under investigation, with freezing orders, interim receiving orders and tax assessments made at a total value of £14.8 million. Where it has assisted law enforcement agencies in conducting confiscation investigations it has obtained restraint orders with a total value of over £4 million. The agency has also delivered an extensive training programme for financial investigators and successfully implemented a communications strategy to raise awareness of the Proceeds of Crime Act 2002.

I am also pleased to announce the agency's business plan 2004–05, which is annexed to the annual report. The plan has been prepared by the director of the agency and has been approved by my right hon. Friend the Home Secretary after consultation with my right hon. Friend the Secretary of State for Northern Ireland. The plan focuses on the agency's aims, priorities and targets for the year ahead and sets out how the director intends to exercise her functions in Northern Ireland.

The establishment of the agency, with extensive powers to investigate and recover criminal assets, demonstrates the Government's commitment to taking the profit out of crime and to ensuring that crime does not pay.

Offender Management

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): The 2004–05 targets for offender management—including agreed key performance indicators for the Prison Service (covering public prisons), targets for contracted prisons and service delivery agreement targets for the Probation Service—have been published together today in the leaflet "*Targets for Offender Management, 2004–05*". Copies have been placed in the Library.

Public Charitable Collections

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): The Government's consultation paper on proposals for a new local authority licensing scheme, "Public Collections for Charitable, Philanthropic and Benevolent Purposes", was published on 9 September 2003, with a closing date for responses of 2 December 2003. Over 250 responses were received. In addition, officials from my Department hosted a series of 12 consultation events across the English Regions and in Wales. I am extremely grateful to all those who contributed. A summary of the responses received has been placed in the Library and will also be available on the Home Office website at:
www.homeoffice.gov.uk/comrace/active/charitylaw/index.html.

The consultation exposed a wide range of views on the issues involved. Although there was a clear consensus on some of these issues, on others key stakeholders held different and sometimes opposing views. The Government do not wish to impose solutions and the proposals I am announcing today are accordingly intended as a basis for further discussion. Provisions giving effect to these proposals will be included in the draft Charities Bill which was announced in the Queen's Speech, and the Government will take account of comments on the draft Bill as well as any recommendations of the joint Committee before taking a final decision on the provisions to be included in the Bill when it is formally introduced.

Against this background the Government make the following proposals.

First, we propose that the scope of the licensing scheme should be extended to cover face-to-face as well as other forms of public collection: 222 respondents commented on this proposal and a clear majority (92 per cent.) agreed that face-to-face fundraising should be brought within the scope of the new scheme.

Secondly, we propose to extend the definition of a public place within which public charitable collections must be authorised to cover areas such as station concourses and supermarket forecourts. This proposal was also widely supported. As explained in the consultation document, part III of the 1992 Act would have covered collections in stations, airports, shopping precincts and other similar property, and we accordingly propose to implement the relevant provisions as part of the new scheme. There will be a new provision to ensure that organisations like the National Trust are able to organise public collections on their own land without needing to seek permission from the local authority.

Thirdly, we propose that the granting of a permit to collect would be subject to a two stage test. The first stage would require the organisation which wishes to collect to satisfy the appropriate local authority that they are fit to collect. Fitness would focus on whether the applicant had been convicted of a relevant offence; whether the person promoting the collection was duly authorised to do so; whether the applicant had taken steps to be satisfied that collectors were fit and proper persons; and whether appropriate steps had been taken to safeguard badges and other certificates of authority. The ratio of the costs of undertaking the collection to the total funds raised would not be a matter for the local authority to take into consideration. If satisfied, the authority would issue a certificate of fitness which would be valid for up to five years. In the case of a house to house collection, an organisation would have to obtain only a certificate of fitness and not satisfy the second

stage of the test. The organisation would, however, be under an obligation to notify the local authority of their intention to collect in the area. The reason for distinguishing between house to house and street collections in this way is that it is believed that house to house collections present fewer capacity problems (i.e. that the collection would inconvenience members of the public or that other collections had already been organised to take place in the same locations or at the same times. The second stage of the test would be to determine whether there was capacity in the area. If there was such capacity, the local authority would issue a permit to collect. No charge would be made for the issue of either the certificate or the permit.

Fourthly, we propose to discontinue exemption orders which are issued by the Home Office to large organisations conducting house to house collections in a significant area of England and Wales. Instead a "lead authority" concept would be introduced which would apply to both street and house to house collections. Organisations which propose to collect cash or direct debits in more than one local authority area would be required to apply to a lead authority for a certificate of fitness. In order to prevent organisations from making multiple applications for such a certificate to more than one authority, an organisation would be required to apply for a certificate to a designated local authority. In the case of a registered charity, it would be the authority in whose area the charity's address is. The address would be the one which appears on the Charity Commission's register. For all other organisations the application should be made to the authority within whose boundaries the promoter's principal address is. The holder of a certificate of fitness would still have to apply to each local authority for permission to undertake a street collection, but the local authority would be able to refuse permission only on grounds of capacity. In the case of house to house collections, organisations which have a certificate of fitness would be obliged to notify the relevant local authorities of their intention to collect. Although the lead authority proposals in the consultation paper were not widely supported, there is support for the principle that decisions on fitness should be separated from those on capacity, and we believe that the consultation paper proposals have been modified to meet most of the objections raised.

Fifthly, we propose that all collections, in a public place and by means of visits door to door, which are local and short-term in nature should not come within the licensing scheme, as is already the case for house to house collections of that nature under the legislation now in force. The organisers of any local, short-term collections would continue to be required to give advance notification, but the notification would be given to the local authority rather than, as is required at present, to the police.

Sixthly, in a significant measure of deregulation we propose that house to house collections of goods should also be completely removed from the scope of the licensing scheme; 84 per cent. of the 189 respondents who commented thought it was sensible to make separate arrangements for the collection of goods. Respondents argued that the collection of goods from house to house does not raise any significant issues of capacity or inconvenience to householders, and that the risk in terms of fraud and loss is significantly smaller than for cash collections. Organisers of house to house goods collections would accordingly be under an obligation only to notify the local authority of their intention to collect.

Seventhly, we propose that responsibility for authorising public charitable collections in London should pass from the Metropolitan Police to the London boroughs, except in the City of London where responsibility already rests with the Common Council. The 129 respondents who commented were almost evenly split on this: 47 per cent. thought that responsibility should be transferred to the boroughs, as Parliament agreed in 1992, and 48 per cent. thought it should stay with the police. London is the only place in England and Wales where responsibility for licensing public charitable collections rests with the police. The Government does not believe this is an appropriate function for the police service to take on, but we will discuss further with key stakeholders in London whether any arrangements are needed over and above the lead authority proposals described above for collections which take place in more than one London borough (including the City).

Eighthly, the right of appeal against a local authority decision to refuse either a certificate of fitness or a permit to collect will be to the magistrates' courts as proposed in 1992 rather than under the legislation now in force to my right hon. Friend the Home Secretary. It is not appropriate for decisions of this kind to be taken by central Government.

Finally, we propose to set up a group to include the local government associations, the police service, charities, charity sector umbrella organisations and the Charity Commission to oversee the preparation of regulations and guidance and ensure effective implementation and delivery of the proposed arrangements.

These proposals constitute, we believe, a balanced package which seeks to minimise the burdens on local authorities and charities whilst ensuring effective regulation. The overall impact in public expenditure terms is expected to be neutral. However, in the case of the London local authorities, funding would be made available to cover the new duties which would fall to them under these proposals. Similarly, the transfer of the responsibility for hearing appeals to the magistrates' court would call for a transfer of funding to the Department for Constitutional Affairs. A detailed regulatory impact assessment based on information provided through the consultation period has also been prepared. The regulatory impact assessment forms part of Command Paper Cm 6199—Draft Charities Bill. A copy has been placed in the Library and will be available on the Home Office website at

www.homeoffice.gov.uk/comrace/active/charitylaw/index.html.

The Government's underlying aim is to increase public confidence in charities and the charity sector by putting in place an up to date and effective regulatory framework. With these changes, the Government believe it should be possible to give effect to the provisions already passed by parliament into law as part III of the Charities Act 1992. The draft Bill will

accordingly proceed by way of amendment to the 1992 Act rather than the pre-war legislation still in force which the 1992 Act would have repealed.

Charities Bill

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): The Charities Bill has today been published in draft for pre-legislative scrutiny by a specially constituted joint Committee of both Houses. The remit of the Committee is to consider the draft Bill, and to report to both Houses by the end of September 2004.

Charities are active in every area of national endeavour, helping to transform people's lives and to build strong communities. They are a strong force for good in society. The Government believe that a vibrant and diverse charitable sector, independent of Government, is essential for the health of our democracy. The Government support the charitable sector in many different ways. One of the most important things we can do for the sector is to create a legal framework which will enable established and new charities to thrive and to achieve their full potential and which will sustain high levels of public confidence in charities through effective regulation.

The draft Charities Bill will deliver significant benefits both to the public and to the charitable sector itself. For the first time there will be a clear definition of charity containing all the purposes that are, or ought to be, recognised as charitable, with the requirement of public benefit. It introduces a range of law reforms designed to enable charities to be administered more efficiently and to be more effective in their work. It provides for better regulation of public collections by charities. It will put in the public domain an improved range and quality of information about charities and it will introduce improvements to the Charity Commission's objectives, functions and accountability to enable it to be an even more effective regulator.

Copies of the draft Bill have been placed in the Library and are available from the Stationery Office and from the Home Office website at:

www.homeoffice.gov.uk/comrace/active/charitylaw/index.html/

WORK AND PENSIONS

Pension Service

The Secretary of State for Work and Pensions (Andrew Smith): I am today able to announce the 2004–05 annual performance standards for The Pension Service, an executive agency of the Department for Work and Pensions. The standards I have agreed are set out below.

Further information on The Pension Service's plans for 2004–05 is contained in the annual business plan that has been published today. Copies have been placed in the Library.

The Pension Service in-year standards for 2004–05 are:

Ensure that 90 per cent. of telephone calls to The Pension Service Centres are answered by Customer Agents and that no more than 1 per cent. of attempted telephone calls receive the engaged tone or message;

Clear 95 per cent. of State Pension claims in 60 days;

Achieve a State Pension claims accuracy rate of 98 per cent.

Achieve a Pension Credit accuracy rate of 94 per cent;

Issue Winter Fuel Payments for 2004–05 (all automatic payments, and successful claims received before 25 September 2004) b, Christmas 2004;

Deal with State Pension Forecast requests in an average of 20 days;

Reduce the losses as a result of fraud and error to no more than 4 per cent. of benefit paid;

85 per cent. of customers to have their entitlements made by Direct Payments;

Reduce sick absence rates to 8.5 days per capita.

TRADE AND INDUSTRY

Nuclear Decommissioning Authority

The Secretary of State for Trade and Industry (Patricia Hewitt): The Energy Bill currently before this House will enable radical changes to current arrangements for nuclear clean-up funded by the taxpayer. The Bill provides for the establishment of the Nuclear Decommissioning Authority—the NDA—to deal with the nuclear "legacy" represented by the 20 nuclear sites currently operated by BNFL and the UKAEA and which were developed in the 1940s, 50s and 60s to support Government nuclear research programmes. The aim of the NDA will be to ensure those sites are cleaned-up and decommissioned more safely, securely, and cost-effectively, and in an environmentally-friendly manner. The NDA is to be fully operational from 1 April 2005. The total cost of the programme is some £50 billion over the next century and initially some £2 billion a year. US experience has shown that effective programmes can save of the order of 20 per cent. The Government want to make savings of a similar magnitude through the introduction of competitive practices in the nuclear clean up industry and by better management of nuclear sites. The NDA's headquarters will be in West Cumbria.

In order to establish the NDA on schedule, my Department proposes to undertake necessary preparatory work. Treasury approval has been given to this. This work relates principally to recruiting—subject to Royal Assent—the NDA Board and other personnel, to activities relating to IT and finance systems, to property searches, and to a definitive salary and benefits survey. My Department considers that making this expenditure prior to Royal Assent will provide a net benefit to the taxpayer, through savings to the public purse to be achieved by the early establishment of the NDA.

Parliamentary approval for additional resources for this new service will be sought in a Supplementary Estimate for the DTI. Pending that approval urgent expenditure estimated at £500,000 will be met by repayable cash advances from the Contingencies Fund.

DEFENCE

D-Day (60th Anniversary)

The Parliamentary Under-Secretary of State for Defence and Minister for Veterans (Mr. Ivor Caplin): I am pleased to update the House on the events planned, both in France and in the United Kingdom, to commemorate the 60th Anniversary of D-Day.

The main events in Normandy on 5 June are the Normandy Veterans Association Parade and Homage to Field Marshal-Montgomery in Colleville-Montgomery; a Service held by the 3rd Parachute Brigade at Bavent-le-Mesnil; a Tree-Planting Ceremony at the Royal Naval and Royal Marine Memorial in Ouistreham organised by the RN/RM Landing Craft Association; the inauguration by HRH the Prince of Wales at the Pegasus Museum of a HORSA Replica Glider; a Parachute Drop by soldiers of 1st Battalion The Parachute Regiment; the inauguration of the British Garden of Remembrance at Caen; a Poppy Drop to The Royal British Legion's chartered vessel the MV Van Gogh; and a symbolic crossing of ships from Portsmouth to Ouistreham. Also travelling with veterans will be the winning school from our nationwide competition who will be collecting experiences from veterans before and after the events.

On 6 June, there will be a Service at Bayeux Cathedral organised by the Calvados Branch of The Royal British Legion; a Bi-National Ceremony at the Commonwealth War Graves Commission Cemetery in Bayeux, attended by HM The Queen and President Chirac, a Landing Craft Exhibition on GOLD Beach at Asnelles; the International Event on the cliff top above Arromanches, attended by 17 Heads of State, including a Naval Review, March Past and Fly Past; the Normandy Veterans' Association Final Parade and March Past in Arromanches, attended by HM the Queen, the Duke of Gloucester, the Prime Minister, the Defence Secretary and myself; and a Commemorative Concert at the Abbaye Aux Hommes in Caen.

Several commemorative events will take place in the United Kingdom, including a full programme organised by the City of Portsmouth during the weekend, and on 6 June a Service at the National Memorial Arboretum near Lichfield reflecting the event being held at Bayeux Cemetery.

The Government recognise the huge significance of this anniversary to the D-Day veterans, around 8,000 of whom plan to travel to Normandy to play their part once again. We have experienced very constructive co-operation with the French authorities and the Normandy Veterans Association. There is extremely high level of interest in these events and limited space, especially in Arromanches Town Centre and Bayeux. We are working with the French authorities to alleviate any problems that may occur. Veterans, of course, will be given first priority.

There are several schemes in place to assist those veterans who wish to return to the areas where they saw active service during the Second World War. As I announced to the House on 9 February, the New Opportunities Fund has made available £10 million of national lottery funding to help with travel costs. The Home Office has provided free one-year passports to veterans travelling for the 60th anniversary commemorations scheme. P&O Ferries have generously offered a 50 per cent. reduction in ferry fares to Normandy.

The role of other Government departments, the Imperial War Museum and the National Lottery means that this important commemoration offers a real opportunity to pass on the baton of remembrance to future generations. A commemorative booklet (the third in a series) is being produced and will be sent to all members of the House early next week.

Despite heavy commitments in Iraq and elsewhere around 1,000 troops will be in Normandy. Our Armed Forces today are proud to be able to offer support to the Veterans and their associations of yesterday as they commemorate this important anniversary.

TREASURY

Child Trust Funds Regulations

The Financial Secretary to the Treasury (Ruth Kelly): The Government have today laid before Parliament the Child Trust Funds Regulations 2004.

The regulations set out further detail of how the Child Trust Fund scheme will work when accounts open in April next year. They also cover the period from January to March 2005 when the first CTF vouchers will be sent to parents. A draft of these regulations was published on 2 February. Many of the regulations are unaltered from those in the draft regulations.

Changes that have been made include the wording of the requirement for providers to offer a stakeholder account. This has been revised to allow more providers to enter the Child Trust Fund market. What is in and out of the charge cap for the stakeholder account has been clarified and the number of means of payment required for the account has been reduced in response to providers' feedback. Regulations relating to the content and timing of annual statements have been amended. The regulations now take into account the reduction in the age, from 18 to 16, at which a child can manage their CTF account.

The Government have decided to make early access to CTF accounts available to children under 18 years of age who meet the criteria for entitlement to Disability Living Allowance under the Special Rules arrangements for terminally ill people. Inland Revenue and DWP officials are taking forward work on the operational details. Regulations setting out the detail of access in these circumstances will be made after the summer, as will regulations providing for the Official Solicitor in England, Wales and Northern Ireland and the Accountant of Court in Scotland to instruct on the management of CTF accounts for looked-after children for whom there is no-one with parental responsibility. Further regulations will also be made for CTF appeals and the corporation tax treatment of CTF insurance business.

NORTHERN IRELAND

Statement on Dealing with the Past

The Secretary of State for Northern Ireland (Paul Murphy): The Prime Minister has highlighted the need for Northern Ireland to find ways of dealing with the past which recognise the pain, grief and anger associated with it, but which also enable it to build a better future for the next generation. I have reflected carefully on what role I might play.

This is a complex and profoundly sensitive subject. There are no ready-made solutions. Opinion is divided on some aspects of the way forward. And the pain of victims and their families remains very real. I want, therefore, to proceed in a way that respects the feelings of all concerned, and which takes nothing for granted.

Over the weeks ahead, I will be embarking on a programme of discussions with a wide range of people with relevant experiences and expertise. These discussions will initially take the form of private soundings, which will in due course lead to wider consultation. I will also be commissioning work on relevant international experience, which will cover the sort of processes that others have used in seeking to come to terms with the past.

My hon. Friend the Member for Basildon (Angela Smith), as victims' Minister, has already engaged in careful and detailed consultation about the needs of victims and the ways in which Government and society should respond. She has been speaking to victims and survivors, their representative groups, experts, academics and practitioners in the field. That work will continue, and be brought to fruition. I will take full account of it in the discussions that I am setting in train. I will also have regard to relevant initiatives in a number of related areas.

Written Answers to Questions

Monday 10 May 2004

SOLICITOR-GENERAL

Bribery

Malcolm Bruce: To ask the Solicitor-General pursuant to the answer of 2 February 2004, *Official Report*, column 613W, on bribery, from which countries the request for mutual legal assistance to the Serious Fraud Office came where there was a suspicion of corruption offences involving a UK citizen or company. [168656]

The Solicitor-General: The request for mutual legal assistance referred to in this question came from the USA.

Harassment

Bob Spink: To ask the Solicitor-General if she will issue guidance to the police and Crown Prosecution Service on the issuing of first stage warnings under the Protection from Harassment Act 1997. [170016]

The Solicitor-General: The Protection from Harassment Act 1997 has been in force since June 1997. Guidance regarding the scope of this Act has been issued to all the criminal justice agencies, including the police and the Crown Prosecution Service, by way of Home Office Circulars 34/1997 and 28/2001. In addition, further guidance on the Act is provided to Crown prosecutors via the CPS Legal Guidance which can be accessed electronically through the Crown Prosecution Service's website.

The issue of warnings is a matter for the police rather than the Crown Prosecution Service. There is no obligation on the police to provide warnings before an arrest under this Act. However, guidance on the issuing of warnings in suitable cases was provided in the Home Office commissioned paper "Stalking and other forms of harassment—An investigators guide" published in 2001.

Iraq

Mr. Robathan: To ask the Solicitor-General what assessment she has made of whether prosecutions can be brought against those United Kingdom citizens whose names appear on the list of non-Iraqis who are alleged to have benefited from the United Nations oil for food programme for Iraq. [170743]

The Solicitor-General: To date the Crown Prosecution Service has not received a file from the police nor been consulted regarding matters relating to recent allegations concerning the United Nations oil for food programme in Iraq.

If a file or request for advice is received it will be considered against the relevant law and the tests set down in the Code for Crown Prosecutors.

LEADER OF THE HOUSE

Advisers/Consultants

Bob Spink: To ask the Leader of the House how much his Office spent on external consultants and advisers in each of the last three years. [171873]

Mr. Woolas: The Office of the Leader of the House of Commons was established in June 2003 and since then has spent £38,514.67 on external consultants and advisers. This expenditure was required for the development and hosting of the Office website (www.commonsleader.gov.uk).

Parliamentary Questions

John Thurso: To ask the Leader of the House (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions his office received in (i) the 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month; [170770]

(2) what proportion of *(a)* Ordinary Written Questions to his office were answered within five sitting days of tabling and *(b)* Questions for a Named Day received a substantive answer on that day in (i) 2002–03 and (ii) the current parliamentary session up to the most recent date for which figures are available, broken down by month. [170771]

Mr. Hain: Ministers have an obligation to parliament to ensure that Members receive a substantive response to their named day question on the named day and to endeavour to answer an ordinary written question within a working week of it being tabled.

Ministers and their Departments should also make every effort to ensure that the live load of questions still awaiting a substantive reply should be kept to a minimum at all times.

During the 2002–03 session my office received 91 Ordinary Written and 46 Named Day Questions, of which 88 per cent. and 96 per cent. respectively were answered within the above targets.

So far this session my office has received 44 Ordinary Written and 19 Named Day Questions, of which 84 per cent. and 100 per cent. respectively were answered within the above targets.

The breakdown per month and the proportion of Questions answered are shown in the following tables:

2002–03	*Ordinary Written*	*Percentage answered within five sitting days*	*Named Day*[1]	*Percentage answered on Named Day*
November	3	67	7	100
December	5	80	2	100
January	10	90	5	100
February	8	75	5	60
March	7	86	8	100

2002-03	Ordinary Written	Percentage answered within five sitting days	Named Day[1]	Percentage answered on Named Day
April	23	96	10	100
May	10	80	3	100
June	5	60	2	—
July	9	100	0	—
August	0	—	0	100
September	5	100	1	100
October	1	100	3	100
November	5	100	0	—

2003-04	Ordinary Written	Percentage answered within five sitting days	Named Day[1]	Percentage answered on Named Day
November	5	80	0	—
December	2	100	5	100
January	2	100	3	100
February	12	83	4	100
March	19	42	3	100
April	4	100	4	100

[1] Named Day figures include Questions not answered orally.

Productivity

Bob Spink: To ask the Leader of the House what his policy is for *(a)* increasing the productivity and *(b)* cutting the costs of his Office. [172192]

Mr. Hain: I refer the hon. Member to the reply being given today by my hon. Friend the Financial Secretary to the Treasury.

My Office does, however, constantly look to achieve efficiency savings.

CABINET OFFICE

Contingency Planning

Patrick Mercer: To ask the Minister for the Cabinet Office whether the formula used to calculate the civil defence grants include a weight towards coastal councils to mitigate for potential terrorist attack by sea. [170057]

Mr. Alexander: The formula used for the allocation of Civil Defence Grant starts with a flat-rate component that gives each of the 179 eligible local authorities £53,000. For shire counties carrying out emergency planning on behalf of their districts, an additional £12,000 per district is allocated. The remainder of the overall sum (approximately 35 per cent.) is distributed according to each authority's Bellwin threshold.

The formula does not recognise particular risks as the Grant represents a contribution to local authority emergency planning, sufficient to provide a core service. The formula was introduced following the Civil Defence (Grant) Act 2002, and after negotiations with the Local Government Association on its detail.

The Government separately commits substantial sums to counter terrorist activity by departments and front line responders such as the police.

Departmental Procurement

Michael Fabricant: To ask the Minister for the Cabinet Office what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170793]

Mr. Alexander: The information is not held centrally.

The Cabinet Office bases all procurement decisions on value for money considerations and information on nationality of companies is recorded only for contracts subject to EU advertising procedures.

EU Directives

Mr. Alan Duncan: To ask the Minister for the Cabinet Office if he will list the EU directives since May 1997 which have been incorporated into UK law by Parliament; and which items of UK legislation so incorporating an EU directive have subsequently been *(a)* revised and *(b)* repealed. [171163]

Mr. Alexander *[holding answer 5 May 2004]:* The information requested is not available centrally and could be obtained only at disproportionate costs.

Green Minister

Norman Baker: To ask the Minister for the Cabinet Office (1) what work his Department's Green Minister has undertaken in the last three months in that capacity; [167738]

(2) what meetings his Department's Green Minister has attended in the last 12 months in that capacity. [167739]

Mr. Alexander: Work has mainly focused on how the Cabinet Office is working towards taking a more strategic approach in embedding sustainable development into work disseminated to other Government Departments including our internal policies and operations. This work includes discussions with Ministerial colleagues and their officials.

As regards discussions in Cabinet Committees it is established practice under Exemption 2 of Part II of the Code of Practice on Access to Government Information not to disclose such information.

Recycled Paper

Norman Baker: To ask the Minister for the Cabinet Office what percentage of copying paper used by the Department in 2002–03 was from recycled sources; and how much post-consumer waste this paper contained. [167732]

Mr. Alexander: Copying paper used by the Department in 2002–03 was from 'sustainably managed' sources.

Since May 2003 the majority of copying paper used by the Department is 100 per cent. recycled with a minimum post consumer waste content of 100 per cent.

Norman Baker: To ask the Minister for the Cabinet Office what measures he has put in place to ensure that his Department meets the quick win targets set by the Department for Environment, Food and Rural Affairs

to ensure that all copying paper bought by the Department is 100 per cent. recycled with a minimum of 75 per cent. post-consumer waste content. [167734]

Mr. Alexander: The Cabinet Office has already implemented in full the quick win target for copying paper. Performance is monitored for the purpose of reporting progress in the annual Sustainable Development in Government report.

Norman Baker: To ask the Minister for the Cabinet Office what measures he has put in place to ensure that his Department meets the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that all paper for printed publications bought by the Department is 60 per cent. recycled of which a minimum is 75 per cent. post-consumer waste. [167735]

Mr. Alexander: The Cabinet Office has already implemented in full the quick win target for paper for printed publications. Performance is monitored for the purpose of reporting progress in the annual Sustainable Development in Government report.

Sustainable Development

Norman Baker: To ask the Minister for the Cabinet Office what progress has been made on his Department's Sustainable Development Strategy. [167742]

Mr. Alexander: The Cabinet Office's Sustainable Development Strategy is being reviewed in light of the "Framework for Sustainable Development on the Government Estate" including looking at how best to consider the policy aspects in light of the principles of Sustainable development.

Cabinet Office progress towards meeting the commitments in the Framework is detailed in the Sustainable Development in Government's 2nd Annual Report published in November 2003. Copies of which are available in the Library.

CULTURE, MEDIA AND SPORT

Arts Council Visits (West Bromwich)

Mr. Watson: To ask the Secretary of State for Culture, Media and Sport how many *(a)* board members and *(b)* head office based staff of the Arts Council for England have visited projects in West Bromwich East in each of the last five years. [171596]

Estelle Morris: Arts Council England do not hold records of visits by council members and national office staff to projects. In April 2004, five members of the Arts Council, including the chair, visited the site of pUBLIC in the centre of West Bromwich. National office based staff are in frequent contact with Sandwell Borough Council, Jubilee Arts and pUBLIC.

Digital Television

Mr. Gregory Campbell: To ask the Secretary of State for Culture, Media and Sport what percentage of homes in each of the regions of the UK has switched to digital television in the last 12 months. [172066]

Estelle Morris: OFCOM estimated digital penetration by ITV region in mid-2003, as follows.

Region	*Percentage*
Wales	56
Channel Islands	55
South and South East	48
London	47
Central Scotland	47
North West	47
East	46
Midlands	44
North Scotland	44
West	44
North East	43
Yorkshire	42
Ulster	42
Border	40
South West	37

Libraries (Stockton, South)

Ms Dari Taylor: To ask the Secretary of State for Culture, Media and Sport how much money has been spent on the digitisation of content in libraries in Stockton South since 1997. [171460]

Estelle Morris: This information is not held centrally.

The New Opportunities Fund £50 million Digitisation of Learning Materials Programme has delivered 150 projects across the UK to enable resources which support learning of all kinds held in libraries as well as museums, archives and other public-sector institutions, to be made available online through the People's Network and the National Grid for Learning. This initiative has created a body of material containing over two million images, tens of thousands of sound and video clips and documents and over 1,000 learning packages. All projects can be accessed via the EnrichUK portal at http://www.enrichuk.net.

Information on grants awarded to individual local authorities and their expenditure can be obtained from the relevant authority.

Licensing Act

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what her estimate is of the date for the first appointed day, as specified in the Licensing Act 2003; and if she will make a statement. [171396]

Mr. Caborn: The timetable for the first appointed day, when licensing authorities will be able to accept applications for the conversion of existing licences and club registration certificates, will be dependent on the date when, or if, Parliament approves the draft Guidance made under section 182 of the Act which has been laid before it.

Parliament will not be able to consider the draft Guidance until the Joint Committee on Statutory Instruments have completed their scrutiny of it and reported to the Houses. We expect the first appointed day to be six months later than the date of Parliamentary approval. The timetable we hope for would see approval by Parliament at the end of this month which would therefore lead to a first appointed day in November.

National Lottery (Stockton, South)

Ms Dari Taylor: To ask the Secretary of State for Culture, Media and Sport how much money from the New Opportunities Fund was allocated to Stockton, South in each year since 1997. [171462]

Estelle Morris: The New Opportunities Fund began making grants in 1999. The awards to Stockton, South are shown in the table.

Financial year	*Amount (£)*
1999–2000	267,764
2000–01	140,100
2001–02	461,842
2002–03	1,706,395
2003–04	1,185,453

The information is freely available from the Department's searchable Lottery award database at www.lottery.culture.gsi.gov.uk, which uses information supplied by the Lottery distributors.

New Opportunities Fund

Mr. Meacher: To ask the Secretary of State for Culture, Media and Sport how much money from the New Opportunities Fund was allocated to Oldham West and Royton in each year since 1997. [170943]

Estelle Morris: The New Opportunities Fund began making grants in 1999. The awards to Oldham West and Royton are shown in the table, from the latest figures available.

Financial Year	*Amount (£)*
1999–2000	8,834
2000–01	205,919
2001–02	993,803
2002–03	798,785
2003–04	1,200,336
2004–05	525

The information is freely available from the Department's searchable Lottery award database at www.lottery.culture.gsi.gov.uk which uses information supplied by the Lottery distributors.

Tourism (Stockton, South)

Ms Dari Taylor: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the work of regional development agencies in developing tourism in Stockton, South. [171461]

Mr. Caborn: One North East (ONE) has secured the work programme of the former Northumberland Tourist Board through funding of £2.3 million and has committed an additional £1 million for tourism in line with its Corporate Plan. The development of the Tees corridor has been identified as a key priority for ONE's resources and this will have significant benefits for Stockton, South. Tourism development will also benefit from the Regional Image Strategy and Marketing budgets. ONE is also supporting the sub-regions in developing their own destination management organisations.

TRANSPORT

A13

Bob Spink: To ask the Secretary of State for Transport what investigations he has *(a)* conducted and *(b)* planned into solutions to the congestion problem on the A13 in Hadleigh. [171087]

Mr. Jamieson: The A13 east of Tilbury is not a trunk road and so is the responsibility of Essex County Council as local highway authority. I understand that Essex CC has recently carried out work in High Street, Hadleigh (the A13) to update an earlier environmental scheme and that some carriageway widening works and the provision of a new pedestrian crossing have been undertaken in conjunction with a new superstore. The carriageway will be resurfaced later this year.

The council also plans to undertake a route management strategy for the A13/A127 which will address the problem of congestion amongst other issues.

Accountancy Services

Mr. Cousins: To ask the Secretary of State for Transport what the *(a)* nature and *(b)* value was of all contracts, consultancies or other services placed with the accountancy firms (i) Deloitte & Touche, (ii) Ernst & Young, (iii) KPMG and (iv) PricewaterhouseCoopers since 2000–01 by the Department and its agencies. [166094]

Mr. McNulty: The Department was formed in May 2002. The information for the central Department for financial years 2002–03 and 2003–04, and the agencies for the financial years 2000–01 to 2003–04 is set out in the following tables.

Contracts, consultancies and other services placed by DFT(C) during 2002–03

	Date	*Net value*	*Description*
Ernst & Young	21 August 2002	400	Consultancy service; Project management
Total		400

Air Safety

Mr. Watson: To ask the Secretary of State for Transport what assessment he has made of rocket-assisted parachutes in improving aircraft safety. [170168]

Mr. McNulty: Since September 2003, responsibility for the safety regulation of most aircraft and aircraft products lies with the European Aviation Safety Agency (EASA) except for various smaller or specialist aircraft such as microlights which remain the responsibility of national aviation authorities.

The UK Civil Aviation Authority (CAA) recognises the potential safety benefits of ballistic parachutes in otherwise potentially catastrophic accident situations. The authority introduced an amendment to the UK Design Requirements for Microlights in 1999 allowing for the installation of ballistic parachutes in such aeroplanes. Approval was on the basis that this did not introduce any additional hazard during normal conditions of flight.

EASA will include an assessment of an installed ballistic parachute system when investigating aircraft for the issue of a type Certificate. We understand that the Federal Aviation Administration (FAA) has approved the installation and use of a ballistic parachute in the Cirus SR20 light aeroplane and that this aircraft is now the subject of an application for approval in Europe.

Coastguard Station, Tynemouth

Mr. Alan Campbell: To ask the Secretary of State for Transport what plans he has for the former coastguard station at Tynemouth. [170409]

Mr. Caborn: I have been asked to reply.

As part of a general audit of its property portfolio, English Heritage has been reviewing the operation of Tynemouth Priory. They will shortly be carrying out an options appraisal on the future use of the former coastguard station within the Priory grounds. The views of the local community will be taken into account in this appraisal.

Departmental Expenditure

Mr. Laws: To ask the Secretary of State for Transport what his latest estimate is of the amount spent by his Department on official entertainment in each year from 1996–97 to 2004–05. [169104]

Mr. McNulty: The costs of entertainment incurred were:

	£000
1996–97	[1]31
2002–03	[1]24
2003–04	[1]16

[1] Department for Transport

For the current-financial year (2004–05) it is forecast that the Department for Transport's costs will be approximately £15,000.

From 1997–98 to 2001–02 transport formed part of the DETR and DTLR. Transport specific information is not readily available and could be provided only at disproportionate cost.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Transport what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170812]

Mr. McNulty: The Department for Transport was formed 29 May 2002 since when all DfT procured crockery is manufactured in the UK, all cutlery is manufactured abroad in various countries, and all glassware is manufactured in France.

Mr. Sanders: To ask the Secretary of State for Transport if he will make it his policy to source all sea bass used in catering outlets for which his Department is responsible from hand-line fishermen rather than pair trawlers. [167535]

Mr. McNulty: Defra supports the sourcing of sea bass from sustainable fisheries and handlining, as a relatively low impact method of fishing, can play a part in ensuring fisheries remain sustainable. However, the last report in 2003 by the International Council for the Exploration of the Seas on sea bass advised that the level of exploitation of the stock at that time was sustainable and did not recommend closure of the offshore pair trawl fishery. There are currently no restrictions at a UK or Community level on the method of fishing that can be used to target bass. In addition, to address the dolphin bycatch problem associated with the pair trawl fishery, Defra-funded trials of a separate grid device to reduce dolphin bycatch are currently taking place, with the co-operation of the fishing industry.

In these circumstances, I do not believe that recommending a specific source of supply for bass could be justified at this stage.

Green Transport Schemes

Mr. Drew: To ask the Secretary of State for Transport if he will publish the research evidence produced by studies made by the Department on the potential land value benefits of development within easy access of a railway station. [168798]

Mr. McNulty: The Department contributed to the Jubilee Line Extension Impact S Study carried out for TfL by the University of Westminster. As part of that study the views of local agents on the impact of the JLE on the property market were sought and a general review of the commercial and residential market along the line was performed. The property report and the overall summary report for the JLE Impact Study will be released in May 2004.

The Department also contributed to a research project by ODPM and the Royal Institution of Chartered Surveyors on "Property Values and Public Transport Investment". The main objective of the study was the development of a suitable methodology for the estimation of the impact of public transport investment on property values. RICS published the report on Stage I, which was a literature review, as 'Land Value and Public Transport: Stage 1—Summary of findings' in October 2002 and plan to publish the Stage 2 report 'Land value and public transport: Stage two—Summary of findings' on 25 May.

Omega Site (Warrington)

Helen Jones: To ask the Secretary of State for Transport what recent discussions he has had on providing public transport links to the Omega site in Warrington as it is developed. [171018]

Mr. McNulty: The Highways Agency, acting on behalf of the Secretary of State, has been in discussions regarding the transport implications of the Omega site on the strategic highways network. The applicants and the borough council will be considering the public transport implications as part of the planning process.

Railways

Mr. Drew: To ask the Secretary of State for Transport if he will ask Network Rail to launch an urgent inquiry into track quality between Swindon and Paddington. [169332]

Mr. McNulty: This is an operational matter for Network Rail. However, Network Rail advises me that it is already undertaking a comprehensive programme to manage and monitor the track quality in this area and, at the same time, is investing to upgrade the track.

Network Rail has liaised closely with the Health and Safety Executive's Railway Inspectorate over those sections of poorer quality track, which are being monitored though an enhanced regime of inspections. It is investing in maintenance of the track, and switches and crossings (S&C) sites have been receiving additional attention from heavy maintenance gangs. There is also an on-going extensive programme of track and S&C renewals.

John McDonnell: To ask the Secretary of State for Transport with which stakeholders he has held difect discussions in connection with his review of the structure and organisation of the railways. [171213]

Mr. McNulty: Ministers and officials in the Department of Transport have had discussions with a wide range of people and organisations in the course the current review of the structure and organisation of the rail industry.

Mr. Jim Cunningham: To ask the Secretary of State for Transport if he will make a statement on the decision of Network Rail to postpone the installation of a radio system for drivers until 2015. [168372]

Mr. McNulty: Network Rail advise me that they are currently implementing a new system for drivers known as the Global System for Mobile Communications for Railways (GSM-R). Its phased introduction is due for completion in 2013.

The installation work has already commenced in Strathclyde. GSM-R will be implemented on all high-speed lines by 2006 and the majority of the GSM-R upgrade will be completed by 2008–09.

The original timetable envisaged completion by 2008. The new time scales and expenditure profile reflect the outcome of the Rail Regulator's Interim Review and are believed to be realistic and deliverable.

Mr. Lidington: To ask the Secretary of State for Transport if he will place in the Library copies of the reports on the Central Railway project prepared for him by the Strategic Rail Authority. [171282]

Mr. McNulty *[holding answer 6 May 2004]:* The Strategic Rail Authority's report took the form of a letter to Ministers from the SRA Chairman. The letter constitutes advice to Ministers. It is not the practice to make available such advice.

David Taylor: To ask the Secretary of State for Transport how often he meets officials of the Strategic Rail Authority to discuss improvements to the national rail network. [171479]

Mr. McNulty: Ministerial colleagues and I have very frequent meetings with the Strategic Rail Authority.

David Taylor: To ask the Secretary of State for Transport (1) what the Department's role was in the formulation of the Route Utilisation Strategy (Part One) for the East Midlands published in March by the Strategic Rail Authority; [171504]

(2) what assessment he has made of the Strategic Rail Authority's Route Utilisation Strategy (Part One) for the East Midlands. [171506]

Mr. McNulty: The role of the Department in formulating the Strategic Rail Authority's (SRA) Route Utilisation Strategies is to ensure that the SRA's approach is consistent with broader Government policy, is in the best interests of the taxpayer and is in accordance with expected resources. The framework informing and underpinning all Route Utilisation Strategies was set out in the SRA's Network Utilisation Strategy, published in June 2003. The detail of individual Route Utilisation Strategies is a matter for the SRA.

Norman Baker: To ask the Secretary of State for Transport if he will make a statement on the profit levels of train leasing companies. [171514]

Mr. McNulty: The profits earned by the rolling stock leasing companies (ROSCOs) are set out in their filed accounts. Their operations are subject to the scrutiny of the competition authorities in the usual way.

Road Works

Mr. Chope: To ask the Secretary of State for Transport what the average duration of works carried out by highway authorities necessitating occupation of *(a)* Highways Agency roads and *(b)* local authority roads was in (i) 2000, (ii) 2001, (iii) 2002 and (iv) 2003. [170652]

Mr. Jamieson *[holding answer 4 May 2004]:* This information is not held centrally.

Rural Bus Services (Cambridgeshire)

Mr. Djanogly: To ask the Secretary of State for Transport how many rural bus services in *(a)* the Huntingdon constituency and *(b)* Cambridgeshire are supported by rural bus grants. [170861]

Mr. McNulty: Rural Bus Subsidy Grant (RBSG) is paid to local transport authorities, in the case of Huntingdon this is Cambridgeshire County Council. It is for the authority to decide which services should be supported with the grant. We understand from the county council that there are 25 rural bus services operating in Cambridgeshire that are currently supported by RBSG, of these 13 services operate in Huntingdon.

Transec

Patrick Mercer: To ask the Secretary of State for Transport (1) what Transec's chain of command is; and how Transec's staff are *(a)* recruited and *(b)* vetted; [169968]

(2) if he will make a statement explaining the central command structure of Transec. [170061]

Mr. McNulty: The Department's Transport Security Directorate (Transec) is headed by a director supported by two divisional managers. The director reports direct to my right hon. Friend the Secretary of State for Transport on security matters, and to the Department's Director General for Railways, Aviation, Logistics, Maritime and Security on management issues. The director and her staff play a full and active role as part of the Whitehall counter-terrorist community working closely with colleagues in the police and other Government Departments.

Transec's staff is recruited in a variety of ways, depending on the job and the knowledge and skills needed to do it. Transec's staff includes career civil servants from the Department for Transport and other departments; people recruited through open competition who have relevant experience from industry and/or the security sector; and staff on secondment.

Members of staff are subject to security vetting according to the nature of their work and the access they require to classified assets. The vetting is carried out in accordance with the rules set out in the Government's Manual of Protective Security.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Abattoirs

Mr. O'Hara: To ask the Secretary of State for Environment, Food and Rural Affairs what the total cost to the Department in the financial years *(a)* 2002–03 and *(b)* 2003–04 was of charges brought successfully against abattoirs for breaches of meat hygiene and animal welfare regulations. [166079]

Mr. Bradshaw: The total legal costs incurred by both this Department and the Food Standards Agency (which is responsible for meat hygiene prosecutions, as well as being involved with animal welfare cases) in pursuit of charges that were successfully brought against abattoirs for breaches of meat hygiene and animal welfare regulations were:

	£
2002–03	44,031.61
2003–04	90,748.11

Mr. Benton: To ask the Secretary of State for Environment, Food and Rural Affairs what the total cost was to the Department in the financial years *(a)* 2002–03 and *(b)* 2003–04 of all charges brought against abattoirs for breaches of meat hygiene and animal welfare regulations, including those which were successfully prosecuted and those which were dropped before they came to court. [166092]

Mr. Bradshaw: The total legal cost incurred by both this Department and the Food Standards Agency (which is responsible for meat hygiene prosecutions, as well as being involved with animal welfare cases) in pursuit of all charges brought against abattoirs for breaches of meat hygiene and animal welfare regulations was:

2002–03—£48,311.26

2003–04—£123,050.62

British Wildlife

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the effect of the introduction of genetically modified crops on wildlife; and what studies the Government commissioned on the subject. [169944]

Mr. Morley: The effects on wildlife from the cultivation of each particular GM crop is assessed on a case-by-case basis in accordance with the criteria in European Directive 2001/18 on the deliberate release of genetically modified organisms.

In the case of GM herbicide tolerant oilseed rape, beet and maize the effects of the management of these crops on wildlife was studied in the GM crop farm scale evaluations. The results of these evaluations for spring

sown oilseed rape, beet and maize were published in October last year. Results for winter sown oilseed rape will be published later this year.

BSE

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what the *(a)* total and *(b)* average monthly cost of the Over-30-Month scheme has been since its inception. [170187]

Alun Michael: The total and average monthly cost of the Over-30-Month scheme are shown in the table.

£ million

	Total cost of the scheme including compensation	*Average cost per month*
1996–97	858	78
1997–98	432	36
1998–99	380	32
1999–2000	394	33
2000–01	401	33
2001–02	301	25
2002–03	367	31
2003–04	[1]321	[1]27
Total	3,454	36

[1] Forecast.

The average monthly costs have decreased over the years reflecting lower compensation rates and disposal costs and fewer animals entering the scheme.

The 1996–97 figure reflects the high compensation rate in the first year. The low 2001–02 figure reflects the reduced numbers entering the scheme as a result of the foot and mouth outbreak.

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the cost of maintaining the Over-30-Month scheme for cattle born after August 1996 until January 2005. [170188]

Alun Michael: The estimated direct cost (compensation and disposal) of maintaining the Over-30-Month scheme for cattle born after August 1996 from April 2004 until January 2005 is £120 million.

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the cost of maintaining the Over-30-Month scheme for cattle born before August 1996. [170189]

Alun Michael: The cost of maintaining the Over-30-Month scheme after April 2004 for cattle born before August 1996 will be spread over several years. The aggregate cost is estimated at £400 million. However, the annual cost will depend on how quickly the cattle are disposed of.

Conferences/Seminars

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what plans were made by her Department for *(a)* conferences and *(b)* seminars in conjunction with its consultations on (i) the sustainable management of wild deer in England, (ii) hazardous chemicals and (iii) dioxins and dioxin-like polychlorinated biphenyls in the UK environment; what the total cost of organising each of those events was; and how many people attended in each case. [161389]

Alun Michael: The public consultation exercise on the sustainable management of wild deer in England ended recently on 16 April. The consideration of written responses began on 27 April and it is too early to make decisions on how to present the outcome of this exercise. However, when the appropriate stage is reached consideration will be given to the use of conferences and/or seminars.

The Advisory Committee on Hazardous Substances has held an extraordinary meeting to discuss the consultation on the UK chemicals strategy and the review of the UK Chemicals Stakeholder Forum. The Government invited companies in, and organisations representing, the small and medium-size business sector to a seminar on the consultation on 15 April but there was insufficient interest expressed to run this. The approximate cost of these events was £3,100. The consultation on the UK Strategy ends on 4 May.

The Government consultation on the new EU chemicals strategy (REACH) was launched on 30 March 2004. The deadline for comment is 25 June. As part of the consultation process, I chaired a stakeholder conference on 27 April in Birmingham. Approximately 150 delegates were expected to attend representing our main stakeholder groups: industry, environmental, trade unions, and animal welfare and consumer organisations. The cost of organising the conference is estimated at approximately £25,000.

The consultation on dioxins and dioxin-like polychlorinated biphenyls in the UK environment was the first step in the development of a UK action plan on dioxins and related compounds which is a requirement of the Stockholm Convention on Persistent Organic Pollutants. Work is still under way and the Government are seeking further views in a second round of consultation which will feed directly into the finalisation of the action plan. To date no conferences or seminars have been held in conjunction with this consultation, but we will consider the need for such events when we are closer to completion.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what plans were made by her Department for *(a)* conferences and *(b)* seminars in conjunction with its consultations on (i) a strategy for fly-tipping, (ii) the definition of wild birds and (iii) a new strategy on bovine TB; what the total cost of organising each of those events was; and how many people attended in each case. [161390]

Alun Michael:

Fly-tipping

Defra has worked with ENCAMS to organise a series of nine regional seminars in conjunction with the Environment Agency, the Local Government Associations, the National Assembly for Wales and the Welsh Local Government Association.

The events have used the Flycapture database system but also included discussion on Defra's Fly-Tipping Strategy.

The total cost of the seminars for England and Wales was £77,000 and over 400 delegates have attended the events that have been held so far. More detailed numbers of attendees will be available when the events have finished.

Wild birds

We are currently conducting a public consultation on an amendment to the Wildlife and Countryside Act 1981 in order to ensure that the definition of "wild bird" correctly transposes the EC Wild Birds Directive (79/409/EEC) by protecting all species of birds occurring in the wild state in the European territory of the member states. A short consultation document was issued on the 17 February and the consultation period concludes on 11 May 2004. The proposed amendment will not restrict trade in legally taken or captive bred specimens. The Department has no plans for conferences or seminars in conjunction with this consultation.

Bovine tuberculosis

Defra is holding workshops across England to discuss with stakeholders the issues raised in the consultation document "Preparing for a new GB strategy on bovine tuberculosis". There will be some seven regional workshops and a national meeting in London between 26 March and 5 May 2004, with some 50 delegates at each event. The estimated cost of organising these events is £60,000 to £65,000.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by her Department over the last five years is of British manufacture. [170800]

Alun Michael: Defra was formed in June 2001. The information requested cannot be provided, as it is not held centrally. Under public procurement rules, it would be illegal to discriminate between suppliers on grounds of nationality.

Discarded Needles

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received about the collection and disposal of discarded needles and other drug paraphernalia; and if she will make a statement. [170836]

Alun Michael: Over the last two years my officials have received representations from the Chartered Institute of Wastes Management about problems associated with discarded drug paraphernalia, in particular needles. My officials are leading discussions with a number of Government Departments, notably the Home Office, Department of Health and the Office of the Deputy Prime Minister, looking at what action might be taken to address the problem. A drugs related litter conference took place on 12 February 2004 in Bristol which looked at identifying key issues and discussed how to take matters forward. Work in this area will continue to build upon the positive outcomes of the conference.

Environmental Protection

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs how much Government funding was available in each of the past three years to Government programmes *(a)* to stop people littering and polluting, *(b)* to promote energy efficiency and *(c)* to cut traffic pollution. [168808]

Alun Michael: *(a)* Defra funding is provided to ENCAMS (formerly Tidy Britain Group) annually. Funding over the last three years is as follows:

	£
2001–02	3,762,000
2002–03	4,597,000[1]
2003–04	3,574,000

This funding supports ENCAMS work on a range of local environmental quality issues, including programmes to discourage littering. In addition ENCAMS is able to undertake additional work funded by or undertaken jointly with local government or other government departments and agencies.

(b) Defra currently provides grants to aid energy efficiency through four main routes.

1. The Carbon Trust—to support and promote energy efficiency and low carbon innovation for business and public sector
2. The Energy Saving Trust—to support and promote energy efficiency in the domestic sector.
3. The Community Energy programme—capital and development funding to refurbish existing and install new community heating schemes.
4. The Warm Front programme—to provide energy efficiency measures to the vulnerable.

[1] Defra allocated an additional 1m to local authorities through ENCAMS for the Local Environmental Quality Pathfinder Programme that forged partnerships between local authorities and the local community. Some of the projects developed reduced fast food litter, railway land litter and schools litter.

The funding made available by Defra and its predecessors to support and promote efficiency measures in the last three years (including the Energy Saving Trust and the Carbon Trust) is of the scale set out as follows:

	£
2001–02	256,000,000
2002–03	225,000,000
2003–04	[1]243,000,000

[1] Budget

(c) Government currently provides funding through the Transport Energy Powershift and CleanUp programmes, which are administered by the Energy Saving Trust. Powershift provides grants towards the purchase of cleaner and more efficient alternatively fuelled vehicles e.g. LPG, natural gas and hybrid vehicles. CleanUp provides grants towards the cost of purchasing exhaust treatment systems which reduce NO_x and Particulate emissions. Both programmes contribute to reducing traffic pollution and were allocated the following Government funding.

CleanUp	£
2001–02	7,400,000
2002–03	8,300,000
2003–04	12,900,000

Powershift	£
2001–02	5,400,000
2002–03	2,200,000
2003–04	7,000,000

Note:
These figures refer to grant spend and do not include management and Administration costs.

Food Export Standards

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment she has made of the effectiveness of *(a)* the UK Government's and *(b)* the EU's regulatory systems to prevent the export of food produced in the EU accession countries which does not fully comply with EU slaughter and production standards. [167324]

Mr. Bradshaw *[holding answer 22 April 2002]*: It is the responsibility of the relevant competent authorities in each accession country and EU Member State to ensure that all food is produced in accordance with EU legislation. Once food is placed on the market in the EU, it is up to the relevant central competent authorities in Member States to ensure that the legal requirements continue to be met. The European Commission's Food and Veterinary Office is responsible for ensuring that competent authorities comply with these responsibilities. The Food and Veterinary Office have carried out a series of visits to accession countries to check that they have appropriate control systems in place, and will carry out further visits to ensure continuing compliance.

The Food Standards Agency and the Department for Environment, Food and Rural Affairs and its agencies are responsible for food safety and food standards in the UK. Enforcement responsibilities are delegated to environmental health and trading standards departments in Local Authorities and the Meat Hygiene Service who carry out checks on food to ensure compliance with food safety and food hygiene standards.

Farm Income

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the impact of the *(a)* ending of the Over-Thirty-Months Scheme and *(b)* start of single farm payments on livestock holdings. [170136]

Alun Michael: The information is as follows:

(a) If the Over-Thirty-Months-Scheme were to end for cattle born after 1 August 1996 this would lead to an increase in domestic beef production, amounting to an additional 175,000 tonnes in 2005. Consequent changes in price will depend on the initial volumes and perceived quality of cow beef, the rate of import substitution, market demand, and changes to the Date Based Export Scheme. Any losses to producers should be relatively short term and market prices for OTM cattle could, in the longer term, be expected to recover to levels close to the EU average. As the present OTMS compensation rate is below the EU market price for cull cows and demand for manufacturing beef is strong, UK farm prices for OTM cattle are expected to rise especially as exports open up leading to a positive effect on the incomes of dairy and suckler beef farmers.

(b) Under the single farm payment scheme, direct subsidies are being decoupled from production which will provide an opportunity for farmers to respond to market signals thereby producing products that consumers demand rather than producing those that they have historically produced, or which attract larger subsidies. Payments under the single payment scheme will initially be composed of an element based on farmers' historic payment in the reference period and an element based on their farm area. Area payments will be fully implemented by 2012. There will be some redistribution of monies within the regions defined by the area payments from the more intensive to the more extensive types of farming, but the impact on individual holdings will also depend on how they respond to opportunities presented by CAP reform.

Mr. Ben Chapman: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on farm income levels for farmers in Wirral South. [170273]

Alun Michael: Due to the small number of farms in Wirral South, there are no robust data available on farm incomes for farmers in that area. Net farm income for farms in the EU North Region[1] and for England over the last five years are show in the following table.

Net Farm Income

£

	EU North Region	*England*
1998–99	8,272	10,359
1999–2000	8,659	7,981
2000–01	12,456	9,886
2001–02	16,457	13,558
2002–03	18,512	16,435

Source:
Farm Business Survey

Net farm income is the return to the principal farmer and spouse for their manual and managerial labour and to the tenant-type capital of the business.

[1] Comprising Government Office Regions North East, North West and Yorkshire and the Humber.

Mr. Meacher: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on farm income levels for farmers in Oldham, West and Royton in the past five years. [170880]

Alun Michael: Due to the small number of farms in Oldham West and Royton, there is no robust data available on farm incomes for farmers in that area over the last five years. Net farm income for farms in the EU North Region and for England over the last five years are show in the following table.

Net Farm Income

	1998–99	1999–2000	2000–01	2001–02	2002–03
EU North Region	8,272	8,659	12,456	16,457	18,512
England	10,359	7,981	9,886	13,558	16,435

Source:
Farm Business Survey

Net farm income is the return to the principal farmer and spouse for their manual and managerial labour and to the tenant-type capital of the business

Fisheries

Mr. Beith: To ask the Secretary of State for Environment, Food and Rural Affairs what progress she has made in setting up regional fisheries advisory councils. [171136]

Mr. Bradshaw: A Council Decision to establish Regional Advisory Councils (RACs) is likely to be adopted later this month. This will provide basic principles and guidelines for setting up RACs, and should enable interested parties to take forward their proposals quickly. RACs are intended to be stakeholder bodies, not Government bodies, but we are working actively with interested organisations to help set up those RACs in which the UK has an interest.

RACs will be international organisations, developed and run by their members. Interested parties in the UK have been at the forefront of action, and with their partners in Europe they have made excellent progress towards developing proposals for RACs in the North Sea and in North Western Community Waters.

Flood Defences

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what recent measures her Department has taken to protect against flooding in the Vale of York. [170009]

Mr. Morley: Decisions on which projects are promoted and their timing rests with the operating authorities.

Within the Vale of York constituency, the Environment Agency has recently improved protection at Boroughbridge and restored flood defences at Rawcliffe which were damaged following the floods in autumn 2000. They are also promoting a series of flood warning improvements in the region.

A number of long-term strategies looking at ways to reduce flood risks are being promoted by EA; included are studies on the rivers Ouse, Nidd and Ure.

Defra regional engineers are assisting Hambleton district council with studies into looking at options to reduce the flood risk from Cod Beck in Thirsk. If these studies should result in a project meeting our standard criteria, Defra will consider it for grant aid.

Finally, Rawcliffe IDB has looked into flood risks at Blue Beck and have introduced (in co-operation with York city council) a programme of maintenance to reduce the build up of debris at key installations.

GM Soya

Mr. Watson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the environmental impact of GM soya cultivation in the Colonia Loma Senes region of Argentina in order to inform her policy for the United Kingdom. [170167]

Mr. Morley: I am aware of various reports of the environmental benefits from the cultivation of GM soya and some reported disadvantages apparently due to mishandling of herbicides. However the Department has not made an assessment of GM soya cultivation in Argentina or elsewhere. Soya is not suitable for general cultivation in the UK and no application has been made to cultivate GM soya in the European Union.

GM Micro-organisms

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment she has made of the potential impacts on the European fermentation industry of the decision to be taken in Europe about whether to include within the traceability and labelling regulations those products produced with genetically modified micro-organisms; and if she will make a statement; [170078]

(2) what discussions she has held with and what representations she has received from *(a)* the Food and Drink Federation, *(b)* the European Federation of European Food Additives and Food Enzymes Industries, *(c)* the Confederation of Food and Drink Industries of the European Union, *(d)* individual companies involved in the fermentation sector and *(e)* other stakeholders about the interpretation of the new traceability and labelling regulations in relation to products produced with genetically modified micro-organisms; [170079]

(3) what recent representations she has received about the forthcoming discussions with the European Commission and other member states about the interpretation of the new traceability and labelling regulations in relation to products produced with genetically modified micro-organisms; [170082]

(4) what her policy objectives are for the forthcoming discussions with the European Commission and other member states about the interpretation of the new traceability and labelling regulations in relation to products produced with genetically modified micro-organisms when those organisms are not contained in the final product; and what specific communication she *(a)* has had and *(b)* intends to have with other member states to secure those objectives. [170083]

Mr. Morley: The Secretary of State has not discussed the interpretation of the new traceability and labelling regulations in relation to products produced with genetically modified micro-organisms with stakeholders. However, last autumn officials from the Food Standards Agency and my Department held a series of stakeholder meetings with those interested in the new legislation, including industry bodies and associations, to discuss the implications and scope of both the Genetically Modified Food and Feed Regulation (EC) 1829/2003 and the Traceability and Labelling Regulation (EC) 1830/2003.

At one of these meetings and subsequently, the food and feed industry raised specific concerns in relation to the labelling of products arising from a fermentation process using either genetically modified micro-organisms and/or genetically modified substrates. The UK and other member states raised this issue with the Commission who have undertaken to take forward a discussion at Standing Committee where the Food Standards Agency will seek clarification on the status of these products.

During negotiations on the content of the regulations at European level in 2001 my Department held a separate consultation on the content of the regulations, which provided an additional opportunity for stakeholders, including those in the fermentation industry, to raise issues and concerns.

The Commission produced a Regulatory Impact Assessment (RIA) of the new Regulations prior to negotiations. Furthermore, following meetings with stakeholders last year and subsequent discussions with the European Commission to promote consistency of interpretation across the European Union, my Department and the Food Standards Agency have recently launched a new public consultation on the domestic implementation of the new regulations. This includes draft guidance and draft Regulatory Impact Assessment. Final versions will be published once responses have been considered.

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects further substantive discussions to take place in Europe about the interpretation of the new Traceability and Labelling Regulations in relation to products produced with genetically modified micro-organisms; and by whom the United Kingdom will be represented in those discussions. [170084]

Mr. Morley: The Department expects that substantive discussions about the interpretation of the new Traceability and Labelling Regulations vis-a-vis products produced with genetically modified micro-organisms will take place in the relevant European Union Regulatory and Standing Committees. Officials from my Department and/or the Food Standards Agency will represent the UK at these meetings. A Standing Committee discussing general food law considered the issue on 30 April 2004. The Commission has suggested that a working group to discuss these issues concerning products produced with genetically modified micro-organisms in more detail should take place before the next Standing Committee in June. However, no date has been finalised as yet.

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs whether she intends to make it her policy that discussions about the interpretation of the new Traceability and Labelling Regulations in relation to products produced with genetically modified micro-organisms should continue as part of the two-year review process for the Regulations. [170085]

Mr. Morley: The new Regulations contain specific review provisions, on which the Commission is tasked to report to the European Parliament and to the Council by respectively October and November 2005. The review report may cover any aspect of the Regulations, including in relation to products produced with genetically modified micro-organisms. The UK Government will play a full part in contributing to the Commission's review and will discuss UK stakeholders' concerns within the context of the Regulations' provisions where appropriate.

Horse Exports

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs how many horses were exported from the United Kingdom in the last year for which figures are available. [169882]

Alun Michael: Computer based systems relating to export health certification from the UK show that during 2003 export health certificates for 733 horses were issued to non-EU destinations and for 8,478 horses to ED destinations. These figures include horses in transit from non-EU countries to EU Member States and animals exported temporarily from the UK for competition purposes. The figures exclude the movement of certain horses to France and Ireland which under a Tripartite Agreement do not require export health certification.

Horse Passports

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what the cost to the Government has been of the introduction of *(a)* horse passports and *(b)* the equine database. [170758]

Alun Michael: Work began in the financial year 2002–03 to extend the requirement for passports to all equines and introduce a national equine database in partnership with industry.

The cost to the Exchequer in that financial year was less than £130,000 and in financial year 2003–04 the cost was less than £500,000, including publicity. These funds were found from within existing resources.

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the cost to the horse industry of the introduction of *(a)* horse passports and *(b)* the equine database. [170759]

Alun Michael: A regulatory impact assessment was deposited in the House Libraries with the Horse Passport (England) Regulations 2003. That assessment is being updated and a copy will also be deposited in the House Libraries when the 2004 regulations are laid shortly. This will include an assessment of costs linked to the introduction of the database.

The equine database is being introduced following an initiative by the equine industry in partnership with the Government. It will include some statutory data, though potentially the largest volume of data will be provided by the industry for the industry on a voluntary basis. This will be breeding, performance and evaluation data.

Intensive Farming

Sir Archy Kirkwood: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what plans

she has to propose changes to EU animal welfare regulations to improve the conditions of intensively farmed livestock and poultry; [170592]

(2) if she will commission further research into the efficacy of existing welfare standards applying to intensively reared livestock and poultry. [170593]

Mr. Bradshaw: It is for the EU Commission to propose changes to EU animal welfare legislation. In drawing up proposals, the Commission takes account of advice from its own scientific committee—the Animal Health and Animal Welfare Panel of the European Food Safety Authority; the results of research undertaken by Member States and developments in husbandry techniques.

Defra's farm animal welfare research programme is wide ranging, with projects on all the main livestock species. Details of our current projects can be found on the Defra website. The research provides a sound scientific basis to inform our policies and helps identify areas where we can press the Commission to come forward with proposals to improve the legislation.

Sir Archy Kirkwood: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment she has made of the standard of enforcement of animal welfare regulations governing intensive livestock and poultry units; [170594]

(2) how many inspectors are engaged in maintaining animal welfare regulations governing intensive livestock and poultry units in the UK; and if she will make a statement on the levels of qualifications of inspectors. [170595]

Mr. Bradshaw: This Government is committed to ensuring a high standard of welfare on farms and to properly enforcing the legislation. The State Veterinary Service is the primary enforcement authority in the UK and 368 veterinary officers are engaged in the enforcement of on-farm welfare legislation. These officers are all qualified veterinary surgeons and have received comprehensive training and written instructions on how to enforce the legislation.

In 1999, the Farm Animal Welfare Council (FAWC), an independent body which advises Ministers on animal welfare issues, published its report on the enforcement of animal welfare legislation. Our response to FAWC's report can be found on the Defra website.

The EU Commission's Food and Veterinary Office (FVO) is responsible for carrying out audits of the implementation and enforcement of animal welfare legislation in all Member States to ensure that it is being carried out uniformly across the Community.

Licensed Abattoirs

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs how many licensed abattoirs there were in England *(a)* in 1991, *(b)* in 1997 and *(c)* on the latest date for which figures are available. [169749]

Alun Michael: The number of licensed abattoirs in England is as follows:

	Red meat	*White meat*
1991	593	98
1997	375	131
April 2004	278	110

Mechanically Propelled Vehicles

Lady Hermon: To ask the Secretary of State for Environment, Food and Rural Affairs when she intends to publish her Department's response to the use of mechanically propelled vehicles on rights of way consultation document. [170248]

Alun Michael: We received more than 15,000 letters and e-mails about the consultation on the use of mechanised vehicles on rights of way. These are currently being analysed and I expect to make a statement on the way ahead once I have fully considered that analysis.

Parish and Town Councils

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what advice and assistance *(a)* her Department and *(b)* the Countryside Agency provide to parish and town councils who wish to (i) start up and (ii) develop their own website. [170577]

Alun Michael: Defra has supported the Countryside Agency's work to promote the use of ICT within the parish sector.

In 2002 the Agency worked with the Local Government Association (LGA), the National Association of Local Councils (NALC) and the Improvement and Development Agency (IDeA), to develop and implement a web-based management and good practice guide for the parish and town council sector. It has a focus on partnership working between parish and town councils and principal local authorities. This 'toolkit' was launched in September 2002 and is hosted within the existing 'Knowledge' website created and managed by IDeA to serve as local government's own management good practice 'warehouse' of information and guidance.

The Countryside Agency has advised NALC on a current project, 'Connecting with Communities'. ODPM, the LGA, IDeA and the Audit Commission have jointly produced a good practice toolkit offering comprehensive communications support to local authorities. This toolkit, found at www.idea-knowledge.gov.uk contains professional advice, best practice case studies and hundreds of documents that can be downloaded free-of-charge to help spread good practice.

The Countryside Agency continues to work with NALC to explore ways in which ICT skills, acquisition of suitable equipment and its usage within the parish and town council sector can be enhanced and supported.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what research *(a)* her Department and *(b)* the Countryside Agency

have commissioned into the role, functions and relevance of parish and town councils in the last five years. [170578]

Alun Michael: The information is as follows:

(a) The Department for Environment, Food and Rural Affairs funds came into being in June 2001 and took over responsibility for the Countryside Agency whose responsibilities have included relevant research. Prior to 2001 the Agency was funded by the Department for Environment, Transport and the Regions.

(b) Relevant research commissioned by the Countryside Agency in the last few years is as follows:

(i) The report, Training for Local Councils' was produced for the Countryside Agency by the (then) Cheltenham and Gloucester College of Higher Education and was published in 2000.

(ii) In 2003 the University of Gloucestershire was commissioned to research internet resources available to local councils, including websites, e-groups and networks. The study researched how the internet was being used by parish and town councils by identifying good practice, barriers to use, and gaps in provision. The resulting research report, 'Internet resources for town and parish councils', is available from the Agency's website.

(iii) In 2004 the Countryside Agency commissioned UKVillages On Line to manage an on-line poll on attitudes towards parish and town councils. The results have been reported in 'Local Councils Review' and are also available on the Countryside Agency's website.

Radon Gas

Mr. Burstow: To ask the Secretary of State for Environment, Food and Rural Affairs what regulations govern *(a)* testing for radon gas in homes and *(b)* disclosure of radon gas levels when houses are bought and sold. [169718]

Keith Hill: I have been asked to reply.

There are currently no regulations that govern the testing for radon gas in homes.

Approximately 450,000 radon measurements, mostly Government-funded, have been carried out by the National Radiological Protection Board (NRPB) since 1987. By 1998, every home in England with a greater than 5 per cent. probability of being at or above the radon level of 200 becquerels per cubic metre of air—known as the Action Level—had been offered a free measurement.

The Government have designated areas where new homes should include radon protective measures during their construction to satisfy the requirements of the Building Regulations. This was introduced in 1988 and applied only to parts of Devon and Cornwall, but in 1999 was broadened to include all parts of England and Wales where there is a significant probability of exceeding the Action Level.

It is standard practice for potential home-buyers to carry out a local search. This currently includes information on whether or not the property is located within a radon affected area. Guidance to local authorities from the Local Government Association asks them to provide further information to enquirers where this is the case.

The Government intend to include standard searches in home information packs, legislation for which is in the Housing Bill.

Rural Payments Agency

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment her Department has made of the Rural Payments Agency's performance; how many complaints were received against the Rural Payments Agency in *(a)* 2001 and *(b)* 2003, broken down by type of complaint; when the full development of the Rural Payments Agency will be completed; and what her assessment is of the ability of the Rural Payments Agency to cope with changes owing to reform of the common agricultural policy. [170008]

Alun Michael: My right hon. Friend the Secretary of State agreed to the creation of the Rural Payments Agency (RPA) on 16 October 2001.

The RPA's second Annual Report and Accounts, which records performance against the agency's key performance targets, as set by the Secretary of State, was published on 18 September 2003.

An Ownership Board chaired by the Permanent Secretary of the Department of Environment, Food and Rural Affairs meets quarterly to monitor the performance of the agency, on behalf of the Secretary of State. In addition, I receive weekly progress reports, as the RPA is part of my ministerial portfolio. I also monitor the response to issues raised by MPs and regularly discuss relevant issues with the agency.

The number of complaints dealt with under the RPA's complaints procedure in 2001 and 2003 are set out in the table. These have been broken down into complaints regarding Integrated Administration and Control System (IACS) and Non-IACS schemes.

Schemes	*2001*[1]	*2003*
IACS	3	134
Non-IACS	0	21
Total	3	155

[1] Figures for calendar years from creation of RPA 16 October 2001.

The RPA could not extrapolate the data required to break these figures down to 'type of complaint' without incurring disproportionate costs.

The RPA undertakes regular customer research through a third party to monitor attitudes to its standards of service. The verbatim comments from the 2003 survey indicate that the vast majority of complaints are aimed at the scheme rules and payments rather than at the level of service received.

The primary development of the RPA is through the RPA Change Programme, which now includes the implementation of the changes resulting from CAP

reform. It is planned that these changes will be largely completed by December 2005. The RPA are monitoring the on-going development of the Change Programme to ensure that customer satisfaction is maintained. This may mean future changes to the schedule in order to meet quality requirements. Full year benefits from the Change Programme will be delivered in the financial year 2006–07.

I have every confidence in the ability of the RPA to implement the changes owing to reform of the common agricultural policy.

Timber

Ms Walley: To ask the Secretary of State for Environment, Food and Rural Affairs whether her Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167628]

Mr. Morley: The Department for Environment, Food and Rural Affairs has lead responsibility for establishing a central point of expertise on timber procurement (CPET) and is responsible for organising the resources necessary for its operation.

In December 2003 Defra announced that as a first step the CPET would assess forest certification schemes in relation to Government contract requirements. Bids for this project have been received and are being evaluated. It is intended that this work will culminate in revised guidance that will be made public at the end of August 2004 or thereabouts.

The experience gained from operating the first phase of the CPET will help shape the plans for services in the subsequent phases. This is a new venture and the Government is concerned to ensure that the value of its output is matched with the appropriate level of investment. Defra will consult other Government Departments and other stakeholders to determine the detailed objectives for the next phase of the project, when that phase should be implemented and how the resources should be provided. The investment appraisal will consider, among other options, whether an expanded CPET service could become self-financing to some extent.

The Government remains firmly committed to the establishment of the CPET as integral to implementing its timber procurement policy and its wider efforts to tackle illegal logging and promote sustainable development in forest management.

Vale of York

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what measures she has taken to ensure that officials employed by *(a)* her Department and *(b)* executive agencies reporting to her Department who deal with the Vale of York (i) have visited the Vale of York and (ii) have a full working knowledge of the area. [170012]

Alun Michael: The following list shows those Defra organisations who operate 'in the field' in the Vale of York.

Core Defra Departments

Rural Development Service

State Veterinary Service

Plant Health and Seeds Inspectorate

Egg Marketing Inspectorate

Defra Executive Agencies

Central Science Laboratory

Pesticides Safety Directorate

Rural Payments Agency

Veterinary Laboratories Agency

Non-Departmental Public Bodies

Countryside Agency

English Nature

Environment Agency

Public Corporations Sponsored by Defra

British Waterways Board

Defra Funded Organisations

Howardian Hills Area of Outstanding Natural Beauty

Related Organisations

Government Office for Yorkshire and The Number Rural Team

Forestry Commission

English Heritage

A minimum of 16 members of Defra and related organisations staff have within their field/operational responsibility the Vale of York area.

Due to time constraints it is not possible to produce an accurate figure for the actual number of staff involved, nor objectively assess individual's levels of experience.

However, in recognition of this complexity, a Defra Implementers Group (DIG) has been formed in York and Number with an agreed vision statement "To achieve improved implementation of schemes and programmes delivered by the Defra family from the perspective of our customers". This activity pre-dated the Haskins review of Rural Service Delivery and was the first of it's kind to look at better co-ordination of frontline service delivery in Defra. Workshops were held between Jan and May 2003 to consider practical ideas to improve 'frontline delivery' of Defra 'family' work, in terms of service to customers, quality and effectiveness. A pilot project is currently looking to develop these ideas under the following headings;

awareness Raising across the Defra 'family'

using Information Technology to improve service delivery

closer Working of Defra staff

integrated Rural Development projects demonstrating joined up working

In an attempt to positively engage with constituency issues such as this, Gordon Kingston (GOYH Rural Director) attends the hon. Member's "Yorkshire First" Westminster Round Table quarterly events.

In addition, all Defra staff are encouraged to have an understanding of customer and other stakeholders needs via our competency framework which are used to measure their performance e.g. the 'Building Relationships' competency.

EDUCATION AND SKILLS

Child Minders (Regulation)

Mr. Simmonds: To ask the Secretary of State for Education and Skills if he will make a statement on the effectiveness of Ofsted in regulating child minders. [171303]

Margaret Hodge: The effectiveness of Ofsted in regulating child minders is a matter for the Office of Standards in Education (Ofsted) and I have asked HM Chief Inspector for Schools, David Bell, to write to the hon. Gentleman and place a copy of his letter in the Library.

Classroom Assistants

John Mann: To ask the Secretary of State for Education and Skills how many new classroom assistant positions have been created in England in the last seven years. [171313]

Mr. Miliband: The Department collects information on the number of classroom assistants employed in England in January of each year. In January 2004 there were, provisionally, 132,600 teaching assistants employed on a full-time equivalent basis in maintained schools in England, an increase of 71,400 since January 1997.

Correspondence

Mr. Illsley: To ask the Secretary of State for Education and Skills how many letters received during this session by *(a)* Ministers and *(b)* officials from universities enclosed letters written by hon. Members or which included details of any hon. Members' comments on, or their voting intentions in respect of, the Higher Education Bill. [171106]

Mr. Stephen Twigg: Since the beginning of the parliamentary session 2003–04, the Department has received over 1,400 letters on the Higher Education Bill. Correspondence is not systematically analysed to provide this information. Scrutiny of the correspondence to provide this information could be provided only at disproportionate cost.

Education Funding

Mr. Meacher: To ask the Secretary of State for Education and Skills how many children in Oldham, West and Royton have benefited from the Excellence in Cities programme; and what the per pupil spending was in each year since the programme's inception. [170919]

Mr. Miliband: The following table shows the number of children in Oldham, West and Royton benefiting from EiC, and the annual spend per pupil for the years in question.

	Number of children	*Total EiC expenditure*[1] *(£)*	*Spend per pupil (£)*
2001–02	8,299	549,988	66.27
2002–03	8,184	1,833,178	224.00
2003–04	8,218	2,301,203	280.02

[1] All funding figures supplied by Oldham Excellence in Cities Team.

The large increase in the rate of EiC funding in 2002–03 is due to the extra funding provided through the Behaviour Improvement Programme and the increase in 2003–04 is due to the introduction of the Leadership Incentive Grant.

Education Maintenance Allowances

Jim Dobbin: To ask the Secretary of State for Education and Skills how many extra people in the North West he expects to stay in education as a result of the introduction of education maintenance allowances; and what plans he has to provide extra funding to further education colleges in the North West to support these extra students. [171134]

Alan Johnson: We estimate that there will be about 3,900 extra 16 year olds in the North West Region in further education this September who would not be participating without the EMA. There will also be a significant number of extra 17 and 18 year olds in further education in the pilot areas.

The 2002 Spending Review settlement allowed for the expected impact of national EMA in further education institutions, including further education colleges.

Educational Attainment

Mr. Collins: To ask the Secretary of State for Education and Skills what percentage of 11-year-olds achieved level 4 at Key Stage 2 in England in *(a)* literacy, *(b)* numeracy and *(c)* science in each year since 1997, broken down by parliamentary constituency. [167566]

Mr. Miliband: The information requested has been placed in the Library.

Failing Schools

Mr. Meacher: To ask the Secretary of State for Education and Skills how many schools in Oldham West and Royton deemed to be failing since 1997 have since reached satisfactory standards. [170920]

Mr. Miliband: Two primary schools in Oldham West and Royton deemed to be failing have since reached satisfactory standards.

Free School Milk

Mr. Willis: To ask the Secretary of State for Education and Skills if he will list the local education authorities which do not offer free milk to children eligible for free school meals; and if he will make a statement. [166865]

Mr. Stephen Twigg *[holding answer 26 April 2004]:* The Department for Education and Skills does not collect any data on school milk provision.

Further Education Colleges

Jim Dobbin: To ask the Secretary of State for Education and Skills what plans he has to provide funding to help further education colleges in *(a)* Heywood and Middleton and *(b)* the North West specifically to refurbish and rebuild their estates. [171133]

Alan Johnson: We have set out plans for 60 per cent. real terms increase in capital expenditure in the post-16 learning and skills sector in 2005–06 compared to 2002–03.

The Department does not provide a specific budget to the Learning and Skills Council (LSC) for rebuilding/refurbishing further education colleges. It is for the LSC to determine for itself the right level of capital investment in further education colleges from the funds allocated to it by the Department for capital investment. This includes decisions about the level of funding that it expects colleges to contribute to capital projects.

This is an operational matter for the LSC. Mr. Haysom, the Council's Chief Executive, will write to the hon. Member on this matter. A copy of his reply will be placed in the House Library.

GCSE

Mr. Benton: To ask the Secretary of State for Education and Skills what percentage of 15 and 16-year-olds in Bootle achieved more than five GCSEs at grade A*-C or GNVQ equivalent in each of the last seven years. [171300]

Mr. Miliband: The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A-C*

Academic Year	*Bootle*	*England*
1997	24.3	45.1
1998	22.1	46.3
1999	29.5	47.9
2000	28.7	49.2
2001	31.4	50.0
2002	36.1	51.6
2003	34.7	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year i.e. 31 August and therefore reaching the end of compulsory education at the end of the school year.

Higher Education

Mr. Meacher: To ask the Secretary of State for Education and Skills how much public funding has been spent on higher education in Oldham, West and Royton in each of the last seven years. [170924]

Alan Johnson: The only publicly funded institution providing higher education in Oldham, West and Royton is Oldham College. The amounts of public funding spent in the years for which figures are available are shown in the table below. Expenditure was by the Higher Education Funding Council for England (HEFCE) and by the Students Loans Company (SLC). The latter relates only to spending on tuition fees, student loans (cash cost) and the Dependants Grant. Data prior to 1999/2000 are not available. The figures for student support do not include spending on other additional grants, namely, Disabled Students Allowances, Care Leavers Grant and Travel Grant. These were paid through local education authorities, up to 2003/04, and figures are not held centrally.

£000

Academic year	*HEFCE funding*	*SLC funding*
1997–98	275	n/a
1998–99	422	n/a
1999–2000	908	409.1
2000–01	1,100	653.8
2001–02	1,300	926.1
2002–03	1,400	1,094.7
2003–04	1,600	n/a

In addition, institutions located outside Oldham, West and Royton may be undertaking activities in the area, for example outreach to raise the attainment and aspirations of potential higher education entrants, or special arrangements with schools and colleges to improve progression into higher education. This information is not held centrally.

Mr. Pike: To ask the Secretary of State for Education and Skills how much public funding has been spent on higher education in Burnley in each of the last seven years. [167930]

Alan Johnson: The only publicly funded institution providing higher education in Burnley is Burnley College. The amounts of public funding spent in academic years and for which figures are available are shown in the following table. Expenditure was by the Higher Education Funding Council for England (HEFCE) and by the Student Loans Company (SLC).

£000

	1999/2000	*2000/01*
HEFCE funding[1]	134	n/a
SLC expenditure[2]	0	4.1

[1] The 1999/2000 figure is the Basic Teaching Grant from HEFCE. Burnley College transferred their directly funded numbers to the University of Central Lancashire (UCLAN) as from 2000/01 and HEFCE do not hold information on the amount of funding passed by UCLAN to Burnley College in respect of students covered by their franchise arrangements. Figures for HNC and HND provision funded via the Further Education Funding Council prior to 1999/2000 are not held centrally.

[2] Expenditure by the Student Loans Company includes fees, loans (cash costs) and the Dependants Grant. Data prior to 1999/2000 are not available. Expenditure information on other grants (Disabled Students' Allowances, Care Leavers' Grant and Travel Grant) that were, until 2003/04, paid through local education authorities is not held centrally.

Mr. Neil Turner: To ask the Secretary of State for Education and Skills how much public funding has been spent on higher education in Wigan in each of the last seven years. [169288]

Alan Johnson: The only publicly funded institution providing higher education in Wigan is Wigan and Leigh College. The amounts of public funding spent in academic years and for which figures are available are shown in the following table. Expenditure was by the Higher Education Funding Council for England (HEFCE) and by the Student Loans Company (SLC).

£ million

	HEFCE funding[1]	SLC expenditure[2]
1997/98	0.951	n/a
1998/99	1.2	n/a
1999/2000	2.1	1.407
2000/01	1.934	1.098
2001/02	1.935	0.971
2002/03	1.621	0.935
2003/04	1.611	n/a

[1] This is the Basic Teaching Grant from HEFCE.

[2] SLC expenditure includes fees, loans (cash costs) and the Dependants Grant. Data prior to 1999/2000 and for 2003/04 is not available. Expenditure information on other grants (Disabled Students' Allowances, Care Leavers' Grant and Travel Grant) paid through local education authorities until 2003/04 is not available.

Medical Students

Mr. Clappison: To ask the Secretary of State for Education and Skills (1) what assessment he has made of the criteria for selecting students to participate on medical courses under his programme for widening participation in medicine; and what opportunities there are for students with 30 or more points at A Level who have failed to obtain a place to study medicine to participate in this programme; [168202]

(2) how much funding has been allocated by the Government to the widening access programme in medical education in the current academic year; how much he plans to allocate in subsequent years; and if he will break down such funding by individual institution; [168203]

(3) how much funding has been allocated to the improving retention pot for university medical schools for *(a)* the academic year 2004–05 and *(b)* subsequent years. [168204]

Alan Johnson: The admission and selection of students is a matter for individual institutions. Admissions should always be based on individual merit. Professor Steven Schwartz, Vice-Chancellor of Brunel University, is leading a review which will produce a set of high level principles on admissions and help universities learn from best practice at home and abroad.

We know that both the new and existing medical schools are themselves doing excellent work to address some of the access and diversity issues that surround the application and selection process. One of the criteria for the establishment of new medical schools in recent years has been the need to demonstrate an active commitment to widening participation from a broad range of social and ethnic backgrounds to reflect the patterns of populations which are served by the NHS.

In addition, there are projects under the Government's Aimhigher programme aimed at the healthcare professions. Aimhigher, the national outreach programme which operates most intensively in disadvantaged areas, provides funds to local partnerships to increase the attainment levels of young people and raise their aspirations towards university and progression.

In addition, the Higher Education Funding Council for England (HEFCE) has earmarked £273 million for widening participation in 2004–05, which is allocated as part of the block grant to institutions. Included in this sum is £49 million for widening access and £213 million for improving retention. The breakdown by institution is published in the HEFCE document, "Recurrent Grants for 2004–05" (March 2004/12). No decisions on allocations after that date have yet been made.

The HEFCE widening participation allocation provides some assistance to universities with the additional costs of recruiting and retaining students from non-traditional backgrounds. The allocation is not an incentive. It is paid to the institution, not to individual schools or departments, towards the support costs of students from non-traditional backgrounds who complete a year of their studies. How the funds are used is entirely a matter for the institution.

Middle Schools

Andrew Selous: To ask the Secretary of State for Education and Skills in which local education authorities there are middle schools as part of a three tier school system. [171162]

Mr. Miliband *[holding answer 5 May 2004]:* The following local education authorities have middle schools as part of a three tier school system:

Bedfordshire
Cambridgeshire
Devon
Dorset
Harrow
Hertfordshire
Isle of Wight
Kent
Kirklees
Leicestershire
Milton Keynes
Newcastle upon Tyne
Norfolk
North
Tyneside
North Yorkshire
Northamptonshire
Northumberland
Poole
Somerset
Staffordshire
Suffolk
West Sussex
Wiltshire
Windsor and Maidenhead
Worcestershire

Music and Dance Scheme

Chris Grayling: To ask the Secretary of State for Education and Skills (1) what the annual budget is of the Music and Dance scheme; [171406]

(2) if he will make a statement on the remit of the Music and Dance scheme. [171408]

Mr. Miliband: The budget for the Music and Dance scheme in the current financial year 2004–05 is £15.9 million.

The scheme currently supports over 800 exceptionally talented children at eight independent specialist schools, four music schools and four dance schools, which are regarded as centres of excellence in their field. In addition, around 80 choristers are helped each year through a subset of the scheme, the Choir Schools Scholarship scheme. Through outreach and partnership working the schools share their expertise and provide music, singing and dance experiences and training for many who would not otherwise get the chance. From September 2004, the scheme is being extended to give greater opportunities for talented children to receive the specialist training they need. A new national grants scheme will enable them to gain access locally to such training out of school hours at four new centres for advanced training and at the junior departments of the six music conservatoires.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Education and Skills how many *(a)* Ordinary Written and *(b)* Named Day Questions his Department received in (i) 2002–03 and (ii) this parliamentary session, broken down by month. [171185]

Mr. Stephen Twigg: The information appears in the following tables.

	Named Day Questions	*Ordinary Written Questions*
Year 2002		
November	23	12
December	82	213
Year 2003		
January	58	320
February	45	294
March	51	296
April	53	343
May	48	248
June	87	445
July	37	359
August	0	3
September	41	236
October	62	323
November	43	312
Total	630	3,404

Current session	*Named Day Questions*	*Ordinary Written Questions*
Year 2003		
November	10	36
December	84	331
Year 2004		
January	98	451
February	89	360
March	122	525
April	48	509
Total	451	2,212

John Thurso: To ask the Secretary of State for Education and Skills what proportion of Ordinary Written Questions to his Department were answered within five sitting days of tabling, and what proportion of Questions for a Written Answer on a named day received a substantive answer on that day, in *(a)* the 2002–03 parliamentary session and *(b)* this parliamentary session, broken down by month. [171186]

Mr. Stephen Twigg: The requested information is listed in the following tables. DfES Ministers take their parliamentary responsibilities very seriously and endeavour to reply to all Parliamentary Questions within the specified deadline.

2002–03 parliamentary session

Percentage

	Percentage of ordinary written questions answered within five sitting days of tabling	*Percentage of named day questions receiving a substantive answer on named day*
November	45	57
December	68.87	37
January	81.33	24
February	63.71	27
March	74.64	42
April	52.43	26
May	57.75	50
June	70.33	22
July	80.92	26
August	n/a	n/a
September	82.15	54
October	76.82	42
November	92.46	52

Current parliamentary session 2003–04

Percentage

	Percentage of ordinary written questions answered within five sitting days of tabling	*Percentage of named day questions receiving a substantive answer on named day*
November	—	[1]n/a
December	65.6	21
January	71.47	20
February	70.47	22
March	81.45	38
April	80.74	20

[1] The current Parliamentary session began on 28 November. No questions were due for answer between then and 30 November

Postgraduate Students

Mr. Sheerman: To ask the Secretary of State for Education and Skills what representations he has received from universities regarding difficulties in attracting and retaining postgraduate students from within the United Kingdom. [166734]

Alan Johnson: Both my right hon. Friend and I have received a number of representations from universities about postgraduate education and research. These have included trends and participation in postgraduate programmes. Over the period 1996–97 to 2002–03 there has been a 16 per cent. increase in the number of UK domiciled postgraduate students. The Government recognise the importance of encouraging more students into postgraduate and research study and have taken a number of initiatives to achieve this, including increases to stipends for PhD students and post-doctoral salaries.

Private Sector HE Colleges

Mr. Boswell: To ask the Secretary of State for Education and Skills what the criteria are relating to private sector colleges of higher education *(a)* for Government support for fees charged to individual students and *(b)* for acceptance of the institution for support from a funding council. [171608]

Alan Johnson: If their course has been 'specifically designated' for student support by my Department, eligible students on courses of higher education at private institutions can apply for support for fees, loans for maintenance and, where appropriate, disabled students' allowance. Generally, the fee rate for a specifically designated course at a private institution will be lower than the publicly funded rate and is not subject to means test. For 2004/05, the fee rate is £1,075.

To be designated for support, a course must be:

at least Certificate of Higher Education level and less than postgraduate level;

validated by a recognised UK degree awarding body; and

of at least one academic year in duration.

Institutions funded by the Higher Education Funding Council for England (HEFCE) are able to franchise courses to private sector colleges, which would receive indirect funding. To be directly funded by HEFCE, a private sector college would need to be designated for funding by the Secretary of State under section 129 of the Further and Higher Education Act 1992. The Secretary of State, in reaching a decision on designation, will seek advice from HEFCE. In addition to considering what is affordable to fund, the criteria which the Council use in forming their advice can be found in HEFCE publication 01/05, "Transfers Between the Further and Higher Education Sectors", which I have placed in the House of Commons Library.

Recycled Paper

Mr. Willis: To ask the Secretary of State for Education and Skills when his Department expects to implement in full the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that *(a)* all copying paper bought by the Department is 100 per cent. recycled with a minimum of 75 per cent. post-consumer waste content and *(b)* all paper for printed publications bought by the Department is 60 per cent. recycled, of which a minimum is 75 per cent. post-consumer waste. [166787]

Mr. Stephen Twigg: The "quick win targets" set by DEFRA were communicated widely within the Department, particularly to procurement sections, in October 2003. Due to a lack of re-contracting opportunities since that date it has not so far been possible to implement specific measures to ensure the Department meets the quick win targets. Procurement sections have undertaken to introduce these as soon as re-contracting opportunities arise.

Mr. Willis: To ask the Secretary of State for Education and Skills if he will list the Department's main suppliers of *(a)* copier paper, *(b)* stationery, *(c)* envelopes and *(d)* paper for reports, in each case stating (i) the name of each paper used and (ii) the recycled and post-consumer recycled content of each paper. [166788]

Mr. Stephen Twigg: My Department's main suppliers of *(a)* copier paper and *(d)* paper for reports are Banner Business Supplies, Guilbert UK Ltd., Glenmore Business Papers, the Paper Company (formerly known as Twenty c Paper) and Premium Paper. Suppliers for *(c)* envelopes are Banner Business Supplies and *(b)* stationery are Banner Business Supplies and AlphaGraphics. However information for parts (i) and (ii) is not held centrally and could be obtained only at disproportionate cost.

Mr. Willis: To ask the Secretary of State for Education and Skills what percentage of copying paper used by the Department in 2002–03 was from recycled sources; and how much post-consumer waste this paper contained. [166789]

Mr. Stephen Twigg: My Department had no procedures in place to capture information on copying paper in 2002–03. New environmental monitoring arrangements were put in place when new departmental printing contracts were introduced in 2003–04 but the available part-year data have not yet been compiled and analysed.

Mr. Willis: To ask the Secretary of State for Education and Skills what percentage of paper for printed publications used by the Department in 2002–03 was from recycled sources; and how much post-consumer waste this paper contained. [166790]

Mr. Stephen Twigg: My Department had no procedures in place to capture information on paper for printed publications in 2002–03. New environmental monitoring arrangements were put in place when new departmental printing contracts were introduced in 2003–04 but the available part-year data have not yet been compiled and analysed.

Mr. Willis: To ask the Secretary of State for Education and Skills what measures he has put in place to ensure that his Department meets the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that all copying paper bought by the Department is 100 per cent. recycled with a minimum of 75 per cent. post-consumer waste content. [166791]

Mr. Stephen Twigg: The "quick win targets" set by DEFRA were communicated widely within the Department, particularly to procurement sections, in October 2003. Due to a lack of re-contracting opportunities since that date it has not so far been possible to implement specific measures to ensure the Department meets the quick win targets. Procurement sections have undertaken to introduce these as soon as re-contracting opportunities arise.

School Buildings

Mr. Caton: To ask the Secretary of State for Education and Skills (1) if he will set a target date for the completion of outstanding repairs to school buildings; [171237]

(2) if he will make a statement on the Government's progress towards achieving its target of rebuilding or remodelling 650 schools by 2004; [171239]

(3) if he will make a statement on the Government's progress towards its target for substantial repairs to be made to 7,000 schools by this year. [171240]

Mr. Miliband: Central government capital support for investment in school buildings in England has increased from under £700 million in 1996–97 to £4.5 billion this year and will rise further to over £5 billion in 2005–06. Most of this funding is allocated by formula to schools and local education authorities so that they can address their investment needs, which are prioritised locally in asset management plans. My department does not collect detailed information on local investment decisions, in view of the unacceptable bureaucratic burden this would impose. The targets mentioned by the hon. Member were realistic estimates based on the increased levels of capital funding available to schools and to authorities. However, we are confident that local education authorities and schools have the investment available for their schools to reach these targets.

For instance, funding includes direct capital funding for every school. From 2002–03 to 2004–05, a typical secondary school has received over £200,000 of its own capital, and a typical primary school over £60,000, enabling them to improve their buildings in line with their priorities. Therefore, we believe that virtually every school in the country has now benefited from substantial repairs or improvements to its buildings, far in excess of the target of £7,000.

Further, funding also includes support for PFI projects. By September 2004, from signed PFI contracts, about 130 newly built or rebuilt schools are scheduled to be operating, plus a similar number of refurbished schools. There are a further 220 schools, new built and refurbished, which are also scheduled to benefit from these PFI contracts. Over 80 schools benefited from substantial investment from New Deal for Schools funding. In the voluntary aided sector, where we allocate funding directly to schools, there have been 90 new or rebuilt school projects in the last five to six years. In addition, authorities are investing in new and rebuilt schools to meet local population growth and the needs of 21st century teaching and learning.

By 2004–05, this government will have provided a total of £24 billion for investment in school buildings in England, enabling schools and authorities to address the backlog of repairs that had built up as a result of years of under-funding and to begin to make schools suitable for the teaching and learning needs of the 21st century.

Earlier this year, I announced the first wave of authorities to benefit from the Building Schools for the Future (BSF) programme, which aims to renew all secondary schools in England in 10–15 years from 2005–06, subject to future spending decisions. In addition to the BSF programme, we will continue to make substantial funding available for schools in the primary sector and those in the secondary sector not prioritised in BSF. School buildings will continue to be improved in line with local priorities, and support provided for the continuing cyclical, predictive and reactive maintenance needs which are a necessary part of the upkeep of all school buildings so that they do not again decay. In value for money terms, there may be occasions when it is preferable to wait for strategic renewal of a school rather than continue to patch and mend. This will be a local decision. Given this, I do not intend to set a target date for completion of outstanding repairs.

School Funding

Mr. Hoban: To ask the Secretary of State for Education and Skills (1) if he will break down funding for each category under school spending in table 2.4 of the Department's Annual Report for 2004 between *(a)* grants provided by the Department, *(b)* revenue support grant, *(c)* amounts collected through the council tax and *(d)* other revenue streams for each local education authority for each financial year since 1998–99; [171769]

(2) pursuant to Table 2.2 of the Department's 2004 Annual Report, if he will break down the spending on schools between primary and secondary schools. [171770]

Mr. Miliband: It is not possible to answer these questions in precisely the way they have been asked as data are not collected centrally on this basis and local authorities are generally free to determine the distribution of grant between the primary and secondary sectors as they see fit, although the data in Table 2.3 indicate an approximate 45:55 split between primary and secondary schools.

Table 2.2 provides details of DfES grants to schools and local education authorities that support schools. The bulk of Government support for schools for the figures in Table 2.4 is provided through the Education Formula Spending Share, details of which are provided in Table 2.1, but it is not possible to sub-divide this distribution accurately between the sectors in Table 2.4.

School Results

Mr. Meacher: To ask the Secretary of State for Education and Skills what percentage of 15 and 16-year-olds in Oldham, West and Royton achieved five or more GCSRs at grade A*–C or GNVQ equivalent in each of the last seven years. [170923]

Mr. Miliband: The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A–C*

Percentage

Academic year	*Oldham, West and Royton*	*England*
1997	34.6	45.1
1998	35.8	46.3
1999	34.8	47.9
2000	38.5	49.2
2001	37.8	50.0
2002	38.1	51.6
2003	40.9	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year i.e. 31 August and therefore reaching the end of compulsory education at the end of the school year.

School Sports

Mr. Meacher: To ask the Secretary of State for Education and Skills (1) if he will make a statement on

the effects on schools of changes since 1997 in the level of investment in school sports in Oldham, West and Royton; [170906]

(2) how much money has been invested in school sports in Oldham, West and Royton since 1997. [170907]

Mr. Stephen Twigg: The information is not held in the format requested. Within the context of the statutory National Curriculum, where Physical Education (PE) is compulsory for pupils aged 5 to 16, it is for individual schools to use their budgets as they judge appropriate.

The Government are investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of 5 to 16-year-olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

The Department is providing just over £316,000 to support the delivery of a School Sport Partnership in the Oldham LEA area. The partnership includes five secondary and 25 primary schools and provides enhanced sports opportunities for all young people to ensure that their pupils spend a minimum of two hours a week on high quality PE and School Sport. A key objective for all School Sport Partnerships is to ensure that the improvements and enhanced opportunities that they deliver are sustainable and embedded within schools to ensure a lasting legacy. The New Opportunities Fund has provided schools in the Oldham LEA area with over £3.3 million specifically to enhance PE and school sport facilities.

Mr. Benton: To ask the Secretary of State for Education and Skills if he will make a statement on the effects on schools of changes since 1997 in the level of investment in school sports in Bootle. [171483]

Mr. Stephen Twigg: The information is not held in the format requested. Within the context of the statutory National Curriculum, where physical education (PE) is compulsory for pupils aged five to 16, it is for individual schools to use their budgets as they judge appropriate.

The Government are investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of five to 16-year-olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

The Department is providing £273,121 to support the delivery of a School Sport Partnership in the Sefton area. The partnership includes six secondary and 19 primary schools and provides enhanced sports opportunities for all young people to ensure that their pupils spend a minimum of two hours a week on high quality PE and school sport. A key objective for all School Sport Partnerships is to ensure that the improvements and enhanced opportunities that they deliver are sustainable and embedded within schools to ensure a lasting legacy. The New Opportunities Fund has provided schools in the Sefton LEA area with over £3,331,000 specifically to enhance PE and school sport facilities.

Schools (South Ribble)

Mr. Borrow: To ask the Secretary of State for Education and Skills how many schools in South Ribble deemed to be failing since 1997 have since reached satisfactory standards. [171661]

Mr. Miliband: No schools in South Ribble have been deemed to be failing since 1997.

Mr. Borrow: To ask the Secretary of State for Education and Skills how much money has been spent to develop school sports in South Ribble since 1997. [171671]

Mr. Stephen Twigg: The information is not held in the format requested. Within the context of the statutory National Curriculum, where Physical Education (PE) is compulsory for pupils aged 5–16, it is for individual schools to use their budgets as they judge appropriate.

The Government is investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of 5–16 year olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

The Department is providing £440,130 to support the delivery of a School Sport Partnership in the South Ribble area. The partnership includes 6 secondary and 20 primary schools and provides enhanced sports opportunities for all young people to ensure that their pupils spend a minimum of two hours a week on high quality PE and School Sport. A key objective for all School Sport Partnerships is to ensure that the improvements and enhanced opportunities that they deliver are sustainable and embedded within schools to ensure a lasting legacy. The New Opportunities Fund has provided schools in the Lancashire LEA area with nearly £12 million specifically to enhance PE and school sport facilities.

Mr. Borrow: To ask the Secretary of State for Education and Skills (1) if he will list the building improvements in each school in South Ribble since 1997; and how much was spent on each improvement; [171672]

(2) how much public funding has been spent on repairing schools in South Ribble in each year since 1997; [171665]

(3) how much funding each school in South Ribble has received from the New Deal for Schools. [171663]

Mr. Miliband: The majority of capital support is allocated to schools and local education authorities (LEAs) by formula, and they decide how to invest it in line with their asset management plans. The Department does not, therefore, have complete information about capital investment at constituency level. Table A sets out the capital support given by the

Government to Lancashire LEA since 1997–98, in total and by programme, including devolved formula capital grants to each school. Table B shows the schools in the South Ribble constituency that benefited from investment through the New Deal for Schools (NDS) programme, which ran between 1997–98 and 2000–01.

[1] Further allocations to be announced.

Table B: NDS allocations to schools in the South Ribble constituency

£

	School	Project details	Grant awarded	
1997–98	Balshaw's Church of England High School	Refurbishment of technology areas and laboratories	LEA-wide grant	2,006,000[1]
	St. Anne's Catholic Primary School, Leyland	Schemes submitted by District Liaison Committees (cont)	LEA-wide grant	2,006,000[1]
1999–2000	Penwortham Priory High School	Replacement of roof and floor and remedial drainage work		80,059
	Farington Primary School	Boilers/heating	Project including 17 schools	601,900[2]
	Lostock Hall Community Primary School	Playground repairs	Project including 25 schools	300,000[2]
	Woodlea Junior School	Window repairs/replacement	Project including 14 schools	516,000[2]
	Whitefield Primary School	Playground repairs	Project including 25 schools	300,000[2]
	Lever House Primary School	Rewires	Project including 18 schools	1,007,100[2]
	Penwortham Middleforth Church of England Primary School	Playground repairs	Project including 25 schools	300,000[2]
	Our Lady and St. Gerard's Roman Catholic Primary School, Lostock Hall	Boilers/heating	Project including 17 schools	601,900[2]
	Leyland St. Mary's Roman Catholic Primary School	Rewires	Project including 18 schools	1,007,100[2]
	Wellfield High School	Window repairs/replacement	Project including 14 schools	516,000[2]
	Wellfield High School	Roof works	Project including 13 schools	549,700[2]
	Penwortham Girls High School	Roof works	Project including 13 schools	549,700[2]
2000–01	St. Catherine's RC Primary School	Replacement of two classroom Portakabin		6,671
	Woodlea Junior School	Playground repairs	Project including 29 schools	270,090[2]
	Woodlea Junior School	Replacement of boilers/heating systems	Project including 36 schools	1,143,110[2]
	Worden High School	Roof repairs/replacement	Project including 11 schools	548,460[2]
	Penwortham Girls High School	Roof repairs/replacement	Project including 11 schools	548,460[2]

[1] For NDS 1 grant was allocated for Lancashire LEA-wide projects, part of which was used for work at each of two schools in the South Ribble constituency. The LEA will be able to say how much was allocated to each school.

[2] Allocations shown are the totals for packages of projects within Lancashire LEA which included the schools shown that are in the South Ribble constituency. The LEA will be able to say how much was allocated to each school.

Sexual Health

Lembit Öpik: To ask the Secretary of State for Education and Skills what measures his Department is taking to ensure that young people receive clear and accurate information in schools to enable them to make informed choices about their sexual health; and if he will make a statement. [171171]

Margaret Hodge: Teaching about sexual health and safer sex are key elements of the Government's sexual health strategy and are covered by our Sex and Relationship Education (SRE) guidance, which was sent to all schools in July 2000. All maintained secondary schools have a statutory responsibility to teach SRE. Through SRE pupils learn about sexual health, contraception and the range of advice and support services which are available. Young people should be made aware of the risks of contracting sexually transmitted infections and know about prevention, diagnosis and treatment. In addition, we have made a new resource on 'Teaching and Learning about HIV' available to all schools.

Schools (Stockton, South)

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many teacher vacancies there were in Stockton, South on the latest date for which figures are available; and what steps are being taken to reduce them. [171450]

Mr. Miliband: Information on teacher vacancies is not available by constituency as it is collected at local education authority level. In January 2003, the latest information available, there were seven full-time teacher vacancies in Stockton-on-Tees local education authority.

Like other areas, since 1997 Stockton-on-Tees has benefited from the initiatives that the Government have put in place to recruit and retain teachers and to increase the number of staff supporting them in schools. Since 1997, the number of full-time equivalent regular teachers in maintained schools in the Stockton-on-Tees LEA area has risen by 110, from 1,650 to 1,760 in 2003. Over the same period, the number of full-time equivalent school support staff in the area has grown by 340 from 460 to 800 in 2003.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many teaching assistants there were in schools in Stockton South in *(a)* each of the last seven years and *(b)* on the latest date for which figures are available. [171451]

Mr. Miliband: The following table gives the numbers of full time equivalent teaching assistants in maintained schools in the Stockton South constituency in January of each year' between 1997 and 2003, the latest year for which data are available.

	Number
1997	90
1998	90
1999	100
2000	120
2001	160
2002	110
2003	150

Source:
Annual Schools' Census

Ms Dari Taylor: To ask the Secretary of State for Education and Skills if he will make a statement on the effects on schools of changes since 1997 in the level of investment in school sports in Stockton South. [171470]

Mr. Stephen Twigg: The information is not held in the format requested. Within the context of the statutory National Curriculum, where Physical Education (PE) is compulsory for pupils aged five-16, it is for individual schools to use their budgets as they judge appropriate.

The Government is investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of five-16 year olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

The Department is providing £751,475 to support the delivery of a School Sport Partnership in the Stockton-on-Tees area. The partnership includes five secondary and 25 primary schools and provides enhanced sports opportunities for all young people to ensure that their pupils spend a minimum of two hours a week on high quality PE and School Sport. A key objective for all School Sport Partnerships is to ensure that the improvements and enhanced opportunities that they deliver are sustainable and embedded within schools to ensure a lasting legacy. The New Opportunities Fund has provided schools in the Stockton-on-Tees LEA area with over £2.4 million specifically to enhance PE and school sport facilities.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills what percentage of 15 and 16-year-olds in Stockton, South achieved five or more GCSEs at Grade A* to C or GNVQ equivalent in each of the last seven years. [171471]

Mr. Miliband: The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A to C*

Percentage

Academic year	*Stockton, South*	*England*
1997	42.9	45.1
1998	44.0	46.3
1999	43.6	47.9
2000	45.9	49.2
2001	49.8	50.0
2002	48.6	51.6
2003	51.8	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year ie 31 August and therefore reaching the end of compulsory education at the end of the school year.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many schools in Stockton, South deemed to be failing since 1997 have since reached satisfactory standards. [171473]

Mr. Miliband: No schools in Stockton, South have been deemed to be failing since 1997.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many children in Stockton, South have benefited from the Excellence in Cities programme; and what the per pupil spending was in each year since the programme's inception. [171475]

Mr. Miliband: The following table shows the number of children in Stockton, South benefiting from EiC, and the annual spend per pupil for the years in question.

	Number of children	*Total EiC expenditure*[1] *(£)*	*Spend per pupil (£)*
2000–01	8,196	574,495	70.09
2001–02	8,219	1,148,283	139.71
2002–03	8,238	1,700,191	206.38
2003–04	8,295	2,585,332	311.67

[1] All funding figures supplied by Stockton Finance Office.

The large increase in the rate of EiC funding in 2002–03 is due to the extra funding provided through the Behaviour Improvement Programme and the increase in 2003–04 is due to the introduction of the Leadership Incentive Grant.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills (1) how much public funding money has been spent on repairing schools in Stockton South in each year since 1997; [171476]

(2) how much funding each school in Stockton South has received from the New Deal for Schools. [171474]

Mr. Miliband: The majority of capital support is allocated to schools and local education authorities (LEAs) by formula, and they decide how to invest it in line with their asset management plans. The Department does not, therefore, have complete information about capital investment at constituency level. Table A sets out the capital support given by the Government to Stockton LEA since 1997–98, in total and by programme, including devolved formula capital grants to each school. Table B shows the schools in the Stockton South constituency that benefited from investment through the New Deal for Schools (NDS) programme, which ran between 1997–98 and 2000–01.

Table A: Stockton LEA capital allocations

£000

	Egglescliffe Church of England Voluntary Controlled Primary School	Boiler plant replacement (single boiler installation)	Project including 10 schools	545,801[2]
	St. Cuthbert's RC Voluntary Aided Primary School	Boiler plant replacement (single boiler installation)	Project including 10 schools	545,801[2]
	St. Mark's Church of England Voluntary Aided Junior School, Stockton	Boiler plant replacement (single boiler installation)	Project including 10 schools	545,801[2]
2000–01	Conyers School	Replacement of 11 temporary classrooms		1,021,668
	St. Patrick's Roman Catholic Primary School, Thornaby	Replacement of asbestos roof tiles		16,430
	Preston Primary School	Replacement of obsolete/leaking boilerplant and asbestos insulation	Project including 10 schools	678,800[2]
	Christ The King RC Primary School	Replacement of obsolete/leaking boilerplant and asbestos insulation	Project including 10 schools	678,800[2]
	Egglescliffe School	Replacement of obsolete/leaking boilerplant and asbestos insulation	Project including 10 schools	678,800[2]
	Grangefield School	Replacement of obsolete/leaking boilerplant and asbestos insulation	Project including 10 schools	678,800[2]
	Ian Ramsey Church of England Aided Comprehensive School	Replacement of obsolete/leaking boilerplant and asbestos insulation	Project including 10 schools	678,800[2]

[1] For NDS 1 grant was allocated for Stockton LEA-wide projects, part of which was used for work at each of three schools in the Stockton South constituency. The LEA will be able to say how much was allocated to each school.
[2] Allocations shown are the totals for packages of projects within Stockton LEA which included the schools shown that are in the Stockton South constituency. The LEA will be able to say how much was allocated to each school.

Student Finance

Mr. Lazarowicz: To ask the Secretary of State for Education and Skills pursuant to his Answer of 19 April 2004, *Official Report*, column 51W, on student finance, if he will make a statement on the outcome of his discussions with Scottish Ministers. [171114]

Alan Johnson: My right hon. Friend the Secretary of State for Education and Skills and the Deputy First Minister agreed that the Scottish Executive and the Department for Education and Skills would keep each other informed as they develop their policies on HE funding, and that the programme of Ministerial meetings on cross border issues would continue.

Student Grants

Mr. Cousins: To ask the Secretary of State for Education and Skills what the evidential basis is for the estimation that 30 per cent. of full-time students will receive full combined grant in 2006/07. [169245]

Alan Johnson: Our estimate that around 30 per cent. of students will be eligible for the full grant of £2,700 in 2006/07 has been produced using:

a specially commissioned survey from a sample of LEAs providing details of the actual incomes of students used in the assessment for entitlement to student support in 2002/03;

Family Resources Survey (FRS) data to estimate the effects of changes to the definition of income introduced in 2004/05;

forecasts of future inflation rates

estimates of future earnings growth;

The estimate does not take into account possible future changes in the demand for higher education from different income groups.

Sustainable Development

Mr. Willis: To ask the Secretary of State for Education and Skills what steps his Department is taking to promote the delivery of sustainable development within Government. [166785]

Mr. Stephen Twigg: My Department is implementing an Environmental Management System at each of its sites. Various initiatives are in place within DfES to promote sustainable development within Government, including publicity on the internet, our internal website and hard copy notices and posters in all buildings.

In addition we operate a number of recycling schemes. All of our toner and printer cartridges and our spent fluorescent tubes and light bulbs are recycled and the revenue generated contributes to costs incurred. Other initiatives include recycling cans, paper, batteries and textiles and we are constantly reviewing the position to extend the range of items recycled.

Teachers

Mr. Collins: To ask the Secretary of State for Education and Skills how many vacant *(a)* head teacher, *(b)* deputy head teacher and *(c)* teacher posts there were in (i) primary, (ii) secondary, (iii) special and (iv) all schools, expressed as a percentage of the total number of each, in each year since 1997, broken down by local education authority. [167573]

Mr. Miliband: The information requested has been placed in the Libraries. It shows deputy head teacher and classroom teacher vacancy rates in maintained nursery and primary, secondary and special schools by local education authority. Rates have not been provided for head and deputy head teachers in special schools because of the very small numbers involved. There were 10 head teacher vacancies in special schools in England in 2003 and 20 deputy head vacancies. For 2004 overall vacancy rates for head teachers were 0.5 per cent., deputy heads 0.8 per cent. and classroom teachers 0.7 per cent.. Overall vacancy rates by LEA will be published later in the year.

Teaching Assistants

Mr. Borrow: To ask the Secretary of State for Education and Skills how many teaching assistants there were in schools in South Ribble in *(a)* each of the last seven years and *(b)* on the latest date for which figures are available. [171709]

Mr. Miliband: The following table gives the numbers of full time equivalent teaching assistants in maintained schools in South Ribble constituency in January of each year between 1997 and 2003, the latest year for which data are available.

1997	70
1998	70
1999	90
2000	90
2001	120
2002	100
2003	200

Source:
Annual Schools' Census.

Mr. Pickthall: To ask the Secretary of State for Education and Skills how many teaching assistants there were in West Lancashire schools in each of the last seven years; and what the current figure is. [171489]

Mr. Miliband: The following table gives the numbers of full time equivalent teaching assistants in maintained schools in the West Lancashire constituency in January of each year between 1997 and 2003, the latest year for which data are available.

	Number
1997	140
1998	150
1999	160
2000	180
2001	220
2002	180
2003	300

Source:
Annual Schools' Census.

University Students

Jeff Ennis: To ask the Secretary of State for Education and Skills how many students from Barnsley East and Mexborough are attending university; and how many of these students pay *(a)* no tuition fee and *(b)* a partial tuition fee. [170659]

Alan Johnson: In England and Wales students on full-time undergraduate courses and their families are expected to make a contribution towards the cost of their tuition only if they can afford to do so.

For entry in 2002, there were 776 applicants domiciled in Barnsley LEA who were accepted through UCAS to full-time first degree and HND courses at UK institutions.

The number and percentages of students in England and Wales in academic year 2002–03 (latest year for which data are available) who have been assessed to make a nil or partial contribution towards the cost of their tuition is shown in the table:

England and Wales: academic year 2002–03[1]

	Student support scheme student numbers thousands[2]	*Student support scheme students Percentage*[2]
Nil contribution towards the cost of tuition from student/parents/ spouse/ partner[3]	330	43
Partial contribution towards the cost of tuition from student/ parents/spouse/partner	116	15

[1] Provisional.
[2] Contributions towards the cost of tuition are assessed by local education authorities in England and Wales for students normally domiciled in their area and studying in the UK.
[3] Includes students on courses where the fee support was not subject to income-assessment (e.g. PGCE courses, and some other ITT courses; and designated courses at private institutions).
Source:
F503G survey of local education authorities.

National level data are published annually in the Department's Statistical First Releases.

Data are collected from the local education authorities (LEAs) to produce national estimates and the data collection exercise does not allow for the production of firm figures below this level, and therefore data by constituency or local education authority are not available.

INTERNATIONAL DEVELOPMENT

St. Helena

Bob Spink: To ask the Secretary of State for International Development if he will make a statement on the £26.3 million previously committed by the British Government towards the building of an airport on St. Helena and if he will make a statement. [170215]

Mr. Gareth Thomas: It was included, as a possible DFID contribution, in last year's international invitation for possible private sector participation in developing air access for St. Helena. I announced on 19 April 2004, *Official Report*, column 1WS, that none of the responses offered a basis upon which, with DFID

financial assistance as described in the invitation, DFID might enter negotiations. Instead, we are now investigating and costing all options to follow expected withdrawal of the present ship from service by around the turn of the decade, including possible development of air access through alternative arrangements. A specialist team will arrive on the island later this week to progress this work and to initiate geo-technical investigations on a possible airport site.

Africa

Tony Baldry: To ask the Secretary of State for International Development what evaluation has been carried out of the value to developing countries in Africa of the *(a)* United States American Growth and Opportunity Act and *(b)* EU Everything But Arms Initiative. [169723]

Hilary Benn: A publication of the United Nations Conference on Trade and Development (UNCTAD) entitled: "Trade Preferences for LDCs: an early assessment of benefits and possible improvements" reference UNCTAD/ITCD/TSB/2003/8, published in 2003, includes an early assessment of the United States American Growth and Opportunity Act.

The Everything But Arms Initiative (EBA) is delivered through the EU's Generalised Scheme of Preferences arrangement (GSP). The GSP is subject to an annual reporting mechanism. The most recent annual report covering the period of 1 July 1999 to 31 December 2001 was produced by the European Commission on 6 June 2003. Given that the EBA initiative was introduced in March 2001, the analysis on EBA is limited in this report.

There is also some analysis, albeit limited because of similar problems in collecting the most recent data, contained in the UNCTAD publication referred to above.

Aid Projects (Asia)

Tom Cox: To ask the Secretary of State for International Development what aid projects his Department expects to develop in Asia during the next three years; and if he will make a statement. [171246]

Hilary Benn: DFID's bilateral programmes in Asia are focused on helping countries achieve the Millennium Development Goals. Projected spend on bilateral programmes in Asia, excluding countries of the former Soviet Union and Iraq, are:

DFID allocation by programme

£000

South and East Asia and Pacific	*2003–04 Estimated Outturns*	*2004–05 Plans*	*2005–06 Plans*
Afghanistan	72,000	75,000	75,000
Bangladesh	65,000	100,000	100,000
China	26,000	45,200	35,200
India	197,000	250,000	280,000
Nepal	26,000	35,000	47,000
Pakistan	64,000	70,000	74,000
Asia Other[1]	56,000	93,700	106,900
Asia Directorate[2,3]	4,000	15,000	15,000
Asia Performance Fund Reserve	4,000	13,100	51,900
Total	514,000	697,000	785,000

2003/04 Estimated

[1] Includes country programmes for Sri Lanka, Indonesia, Vietnam, Cambodia and Burma

[2] Includes 2003–04 movement in working capital for the division

[3] Covers regional funds and programmes including the Pacific region

Source:

DFID Departmental Report 2004 (http://www.dfid.gov.uk/Pubs/files/dr2004 default.htm)

DFID's published Country Assistance Plans (CAPs) give details of proposed activities in the larger bilateral country programmes. Copies are placed in the House of Commons library. Finalised CAPs for Afghanistan, Bangladesh, India and Vietnam and draft CAPs for Burma and Nepal are available at: http://www.dfid.gov.uk/News/Consultations/files/caps.htm. CAPs for other recipients of significant bilateral aid in Asia are currently under preparation.

Children's Welfare

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the effectiveness of the children's parliament in Malawi in influencing public policy there. [171693]

Hilary Benn: DFID has not made an assessment of the effectiveness of the children's parliament in Malawi in influencing public policy.

In Malawi, DFID prioritises support for the National Assembly, particularly to enable parliamentary committees to fulfil their oversight function and to strengthen citizen's interaction with Parliament. Through membership of the Government of Malawi Task Force on Support for Parliament, DFID notes that UNICEF prioritises support for the children's parliament in Malawi.

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the contribution made by children to the improvement of sanitary practice in Bangladesh. [171698]

Hilary Benn: An estimated 110,000 children under five die each year from diarrhoeal disease in Bangladesh. In 1990 the figure was much higher at 260,000.

There are a number of reasons for this improvement; access to improved water supplies increased from 94 per cent. to 97 per cent. and access to improved sanitation rose from 41 per cent. to 48 per cent. Improved hygiene behaviour also makes as important contribution but one which is more difficult to assess. One indicator is the use of soap or ash for hand washing after defecation—surveys suggest a current figure of 26 per cent. for Bangladesh.

The individual contribution made by children in achieving the above improvements cannot be separated out. However, the DFID Bangladesh Water and Sanitation programme explicitly recognises their important role in promoting improvements in sanitary practice. For instance:

(i) DFID's programme with UNICEF and the Bangladesh Department of Public Health Engineering includes a School Sanitation and Hygiene Education component, through which children are encouraged to monitor sanitary practices in their immediate neighbourhoods, and

(ii) DFID has been supporting an NGO (PHULKI) through our programme with WaterAid, which works explicitly with the children of garment workers, using child-to-child approaches for hygiene promotion.

Commonwealth Development Corporation

Mr. Bercow: To ask the Secretary of State for International Development whether the re-organisation of the Commonwealth Development Corporation has been completed. [171687]

Hilary Benn: The legal documents to establish the Commonwealth Development Corporation (CDC)'s new investment management company, Actis were signed on 2 April 2004. These will formalise the new arrangements that I advised Parliament about in my statement of 8 January 2004. However, there are a number of 'conditions precedent' that must be met before the documents can take legal effect. These are largely administrative measures and CDC and DFID staff are now working through with these. It is expected to complete them by the end of June. I shall make a further statement to Parliament at that time and I shall also be placing the relevant documents into the Library.

Departmental Expenditure (Entertainment)

Mr. Laws: To ask the Secretary of State for International Development what his latest estimate is of the amount spent by his Department on official entertainment in each year from 1996–97 to 2004–05. [168997]

Hilary Benn: The following table shows recorded expenditure by DFID on entertainment for the years in question, to the nearest £000.

	£
1996–97	10,000
1997–98	24,000
1998–99	43,000
1999–2000	62,000
2000–01	48,000
2001–02	55,000
2002–03	82,000

In 2003–04 DFID introduced a new method of assessing administration costs, which had previously been recorded on programme budgets. This included entertainment expenditure previously incurred by overseas offices. The provisional figure for 2003–04 was £246,000 and the projected figure for 2004–05 is £261,000. These changes have increased transparency and will enable DFID to manage administrative costs more effectively, but they mean that the 2003–04 figures and 2004–05 projections are not comparable with earlier years.

The upward trend in entertainment expenditure reflects DFID's increased focus on wider development issues, and the expansion in its representation overseas; with increased devolution to a growing number of country offices.

All expenditure on official entertainment is made in accordance with published departmental guidance on financial procedures and propriety, based on the principles set out in Government Accounting.

Ghana

Mr. Watson: To ask the Secretary of State for International Development what work his Department is supporting to improve literacy in Ghana. [171247]

Hilary Benn: DFID is preparing a new programme of £50 million over five years in support of the Government of Ghana's Education Strategic Plan (ESP). Increasing literacy is a key basic education target of the ESP. This programme follows DFID's five year £50 million Education Sector Support Programme, which similarly aimed to improve literacy levels.

DFID also provided £200,000 between 2000 and 2003 towards the Ghana Institute of Linguistics, Literacy and Bible Translation Literacy Programme, which worked on adult literacy among 34 minority language groups.

A recent survey has shown an improvement in literacy from 48 per cent. of Ghanaians aged 15 or above in 1997–8 to 53 per cent. in 2003.

Global Fund

Tom Brake: To ask the Secretary of State for International Development what research his Department has conducted on *(a)* the amount of disbursements made by the Global Fund to fight AIDS, Tuberculosis and Malaria in 2003 and *(b)* the amount of money actually spent by recipient governments; and if he will publish his findings. [171210]

Hilary Benn: As a partner and Board member of the Global Fund to Fight AIDS, Tuberculosis and Malaria, DFID does not conduct its own separate research on the amount of disbursements made by the Global Fund or on money spent by recipient governments. The Global Fund is a public and private partnership and DFID works collaboratively with other partners through the Board to ensure that the financial reporting systems of the Fund are strong and transparent.

DFID is an active member of the Monitoring, Evaluation, Finance and Audit (MEFA) Committee of the Fund. Part of the mandate of this Committee is to review the Global Fund's performance, including areas such as financial audit and results-based disbursement.

Tom Brake: To ask the Secretary of State for International Development how much has been pledged to the Global Fund to fight AIDS, tuberculosis and malaria; how much has been disbursed by the Global Fund; and how much has been spent on administration costs in that period. [171211]

Hilary Benn: The total amount pledged to the Global Fund to Fight AIDS, Tuberculosis and Malaria is currently US$5.3 billion. Disbursements by the Global Fund currently total US$ 285 million.

Administration costs are kept low and are subject to regular review by the Board. DFID expects these costs to decrease over time as disbursement accelerates. For 2002, they were US$12.8 million and for 2003 they were US$31.8 million. Costs for the first quarter of 2004 were US$10 million. Operating costs are expected to decline as grant expenditure increases. The Global Fund operates in a transparent way and information—including budgets for its operating expenses—can be viewed on the Global Fund website at www.theglobalfund.org.

Heavily Indebted Poor Countries

Mr. Bercow: To ask the Secretary of State for International Development when in 2004 he estimates the Department's objective of securing relief of unsustainable debt for all heavily indebted poor countries will be achieved. [171690]

Hilary Benn: DFID's current Public Service Agreement with HM Treasury sets the target of working to ensure that three-quarters of all eligible Heavily Indebted Poor Countries (HIPCs) committed to poverty reduction receive irrevocable debt relief by 2006. DFID is on track to meet this target.

While progress in implementing the HIPC Initiative has not been as rapid as previously projected, the number of countries reaching Completion Point—the point at which irrevocable debt relief is granted—has increased in recent months. Five countries have reached Completion Point since December 2003 and DFID expects a further five before the end of this year. This would bring the number of countries at Completion Point to 18 out of the 27 eligible countries that have already passed Decision Point. Of the remaining nine countries, it is estimated that all will reach Completion Point by end 2006.

Iraq

Mr. Bercow: To ask the Secretary of State for International Development (1) how many international aid workers have left the British controlled sector of Southern Iraq in the last month; [171153]

(2) how many international aid workers have left Iraq in the last month; [171155]

(3) how many international aid workers there were in the British controlled sector of Iraq on the latest date for which figures are available; [171154]

(4) how many international aid workers there were in Iraq on the latest date for which figures are available. [171156]

Hilary Benn: Comprehensive statistics are not available on the numbers of people working for donor agencies in Iraq, nor of their movements in and out of the country.

In addition to the deployment of their own staff, many donors, including DFID, contract individuals and companies to work in Iraq on particular projects and programmes for specific periods of time. The number of people working for each donor in Iraq is likely to vary from week to week.

We are aware that some people working on reconstruction in Iraq may have left the country over the last month as a result of increased security concerns, and others may be delaying their arrival pending a stabilisation of the situation.

DFID temporarily delayed the deployment of some consultancy staff during April. However, no staff have been withdrawn, and essential workers took up or resumed their postings in late April.

Over the next two months, DFID aims to reduce the number of personnel seconded to the Coalition Provisional Authority as part of the process of handing over authority to an Iraqi Interim Government.

Mr. Bercow: To ask the Secretary of State for International Development (1) what his estimate is of the level of unemployment in *(a)* Iraq and *(b)* the British-controlled sector of Iraq immediately before the start of the recent conflict; [171172]

(2) what his estimate is of the level of unemployment in the British-controlled sector of Iraq immediately after the cessation of hostilities in the recent conflict; [171173]

(3) what his estimate is of the current level of unemployment in *(a)* Iraq and *(b)* the British controlled sector of Iraq; [171179]

(4) what the level of unemployment in Iraq was immediately after the cessation of hostilities in the recent conflict; [171180]

(5) what his estimate is of the level of *(a)* female unemployment, *(b)* male unemployment and *(c)* unemployment among workers under the age of 30 in (i) Iraq and (ii) the British-controlled sector of Iraq immediately after the end of hostilities in the recent conflict; [171181]

(6) what his estimate is of the level of unemployment in *(a)* Iraq and *(b)* the British-controlled sector of Iraq immediately before the start of the recent conflict for (i) males, (ii) females and (iii) workers under the age of 30; [171182]

(7) what his estimate is of the level of female unemployment in *(a)* Iraq and *(b)* the British-controlled sector of Iraq for workers under the age of 30; [171195]

(8) what his estimate is of the level of *(a)* male and *(b)* female unemployment in (i) the British controlled sector of Iraq and (ii) Iraq. [171203]

Hilary Benn: No official figures on the Iraqi labour force exist, so only very broad estimates of unemployment are available. It is not possible to break these down accurately by age, gender or geographic region.

Current estimates suggest that total unemployment levels now are broadly similar to those before the 2003 war. The United Nations and World Bank social and economic needs assessments, which were undertaken after the conflict last year, estimated that the unemployment rate before the 2003 war was around 30 per cent. Current unemployment rates are unofficially estimated at between 20 and 30 per cent. It is believed however that the rate may well be higher for those under 20-years-old.

It is estimated that women make up only 20 to 25 per cent. of the workforce but figures are not available on the numbers of women seeking work, who would be classified as unemployed.

Mr. Bercow: To ask the Secretary of State for International Development (1) what proportion of international aid workers based in the British-controlled sector of Southern Iraq are Iraqi citizens; [171176]

(2) what proportion of international aid workers in Iraq are Iraqi citizens. [171177]

Hilary Benn: Comprehensive figures are not available on the nationalities of staff working for donor agencies in Iraq. For several agencies, such as United Nations bodies, the World Bank and some NGOs, only Iraqi national staff are working in Iraq at present. In other cases, such as DFID and USAID, non-Iraqi staff are also working in-country.

DFID aims to increase, as far as practicable, the numbers of Iraqis working on our reconstruction programmes.

Mr. Bercow: To ask the Secretary of State for International Development (1) what the level of inflation is in Iraq; [171198]

(2) what the level of inflation was in Iraq immediately before the start of the recent conflict. [171204]

Hilary Benn: The pre-2003 conflict inflation rate is estimated to have been between 20 and 30 per cent. although the data is not considered to be very reliable. The Coalition Provisional Authority is working on the development of sound methodologies for measuring inflation in Iraq's post-Saddam era.

Mr. John Bercow: To ask the Secretary of State for International Development (1) what proportion of Iraqi households have access to running water; [171199]

(2) what proportion of Iraqi households in the British-controlled sector of Iraq currently have access to *(a)* running water and *(b)* electricity; [171200]

(3) what proportion of Iraqi households in *(a)* Iraq and *(b)* the British controlled sector of Iraq had access to (i) running water and (ii) electricity immediately before the start of the recent conflict. [171201]

Hilary Benn: Until the Gulf War in 1991 safe water was accessible to over 95 per cent. of the urban and 75 per cent. of the rural population of Iraq. The last reliable pre-conflict figures are for the year 2000 when urban and rural coverage had dropped to 92 per cent. and 46 per cent. respectively. Deterioration of the system had been particularly severe in the south, including Basra, due to the discriminatory policies of the former regime.

Access to safe water deteriorated further as a result of the conflict in 2003 and the subsequent looting. Estimates suggest that the immediate post-conflict coverage was 60 per cent. for urban and 30 per cent. for rural populations.

Considerable work has taken place since the end of the conflict to improve the quantity, quality and reliability of water supplies. There are no reliable statistics of current coverage, but informal estimates by the Coalition Provisional Authority (South) indicate that, in the south, coverage has increased by 10–15 per cent. since May 2003. By the summer of 2004, water quality and volume in Basra is expected to have exceeded pre-conflict levels.

The electricity supply in Iraq is measured by total power generated and the number of hours per day for which power is available. Recent reports by the Coalition Provisional Authority (CPA) record that average electricity production is in the region of 4,000 megawatts (MW), approximately the same as before the 2003 conflict. A number of generating units are undergoing maintenance and should be back in service by the summer peak demand period. The CPA power generation target for 1 June 2004 is 6,000 MW, significantly above the pre-conflict levels.

The most recent figures for the availability of power by governorate are as follows:

	Average hours of power available per day as of 1 April 2004	*Megawatts*
Southern Governorates under British Control		
Multanna	18	59
Basrah	24	258
Dhi Qar	20	103
Maysan	20	64
Najaf	13	88
Other Governorates under British Control		
Najaf	13	88
Qadisiyah	14	60
Wasit	11	86
Karbala	19	84
Babil	15	100
Anbar	15	175
Salah Ad Din	15	210
Baghdad	17	1,155
Dyala	15	98
Naynawa	15	360
Dahok	14	90
Arbil	16	—
Tamim	16	134
Sulamaniyah	16	—

Mr. Bercow: To ask the Secretary of State for International Development what the total amount of investment has been in the Iraqi *(a)* public, *(b)* private and *(c)* voluntary sector, over the past year. [171202]

Hilary Benn: Statistics are not available on aggregate levels of investment by sector in Iraq.

Maldives

Mr. Paice: To ask the Secretary of State for International Development how much aid has been provided by *(a)* the UK and *(b)* the EU to the Maldives Government in each of the last three years. [172053]

Hilary Benn: The information is as follows:

(a) UK bilateral assistance to the Maldives totalled £286,000 in 2000–01, £83,000 in 2001–02 and £195,000 in 2002–03. Data for 2003–04 is not available yet for publication. UK assistance is part of the Small Grants Scheme, administered locally by the High Commission on behalf of DFID for poverty alleviation. Funds go mainly to small projects and institutions.

(b) The European Union has given no aid to the Maldives government in 2000 and 2001. Data for 2002 and 2003 are not yet published.

Parliamentary Questions

John Thurso: To ask the Secretary of State for International Development what proportion of *(a)* Ordinary Written Questions to his Department were

answered within five sitting days of tabling and *(b)* Questions for written answer on a named day received a substantive answer on that day in *(a)* the 2002–03 parliamentary session and *(b)* this parliamentary session, broken down by month. [171193]

Hilary Benn: We are unable to provide information in the format requested without incurring disproportionate cost. DFID endeavours to respond to all Parliamentary Questions within deadlines where possible. I refer the hon. Member for Caithness, Sutherland and Easter Ross to the statement made by the Leader of the House on 3 March 2004, *Official Report*, column 907W.

Poverty Reduction

Mr. Bercow: To ask the Secretary of State for International Development if he will list in ascending order of progress the 16 key countries in Sub-Saharan Africa for which the Millennium Development Goal on poverty reduction was set. [171681]

Hilary Benn: The PSA target for poverty reduction relates to the entire region of Sub-Saharan Africa and is not based on the 16 key countries because comparable data over time are not available at the country level. The latest figures show that the percentage of the population below $1 a day[1] in Sub-Saharan Africa is 49 per cent. (compared to a 1990 figure of 47.4 per cent.). The latest comparable figures for nine of our 16 key countries are given in the following table.

	Percentage of population below $1 a day[1]
South Africa	<2
Kenya	23.0
Mozambique	37.9
Malawi	41.7
Ghana	44.8
Zambia	63.7
Nigeria	70.2
Ethiopia	81.9
Uganda	82.2
Congo, DR	[2]
Lesotho	[2]
Rwanda	[2]
Sierra Leone	[2]
Sudan	[2]
Tanzania	[2]
Zimbabwe	[2]
Sub-Saharan Africa	49.0

[1] The percentage of the population living below the commonly used international $1 a day standard, measured in 1993 international prices and adjusted for local currency using purchasing power parities.
[2] Not available.

Primary Education

Helen Jones: To ask the Secretary of State for International Development what recent discussions he has had on improving access to primary education; and if he will make a statement. [171016]

Hilary Benn: Discussion with international agencies, partner governments and civil society on improving access to primary education is a continuing priority. Recent examples include strengthening the Fast Track Initiative led by the World Bank; improving girl's education in collaboration with UNICEF in support of the 2005 gender equity MDG target; participating in the Global Campaign for Education for All (GCE), led by British NGOs, in which 460 MPs, and children's representatives took part; and providing education guidance for the Africa Commission.

Both the Parliamentary Under-Secretary of State and I have also recently taken part in Parliamentary discussions—a Children's Parliament at Central Hall and an MPs' meeting, respectively—as part of the GCE Week of Action in April to discuss the importance of education for all children.

Progress has been made in many countries with global enrolment in primary education increasing from 596 million in 1990 to 648 million children in 2000. However, with over 100 million still out of school, much still remains to be done.

Helen Jones: To ask the Secretary of State for International Development what progress has been made in providing primary education for girls in developing countries; and if he will make a statement. [164510]

Mr. Gareth Thomas: Please accept my apologies for a slight error contained in the previous reply published on 31 March 2004, *Official Report*, column 1429W.

Pursuant to that reply, the EFA Global Monitoring Report 200304 shows that the net enrolment ratio (NER) for girls' primary enrolment in developing countries has increased from 73.5 per cent. in 1990, to 78.9 per cent. in 2000. The ratio between girls and boys' enrolment rates, has also improved from 0.86 in 1990 to 0.93 in 2000 for primary education.

However, much still remains to be done. DFID is planning to increase its investment in primary education to £1 billion over the next four years.

Sustainable Development

John Barrett: To ask the Secretary of State for International Development what steps he is taking to promote the delivery of sustainable development within Government. [165432]

Hilary Benn: The Department for International Development works with other departments to assist in the delivery of Sustainable Development (SD).

The World Summit on Sustainable Development's Plan of Implementation provides the international framework for the promotion of sustainable development. The lead UK departments are DFID, DTI, FCO and Defra (coordinator), all represented on the Ministerial SD Task Force. DFID leads in four areas,

Water and sanitation

Integrating environment into poverty reduction strategies

Access to clean energy

Finance (volume and effectiveness of aid—joint lead with Treasury)

The UN Commission on Sustainable Development tracks progress on United Nations Conference on Environment and Development (UNCED)/World Summit on Sustainable Development (WSSD) follow-up (including MDGs). It works to a two-year cycle—progress review years followed by policy development years. The 2004–5 biennium covers (1) water and

sanitation, (2) human settlements, and (3) "Type 2" partnerships. DFID officials have been involved in the CSD 12 meetings just concluded (1/05/04).

HOME DEPARTMENT

Commission for Racial Equality

13. **Jeremy Corbyn:** To ask the Secretary of State for the Home Department what assessment he has made of the likely impact on staffing levels of changes to the budget of the Commission for Racial Equality. [171328]

Fiona Mactaggart: The Home Office, like other public sector bodies, is seeking to improve Value for Money. As part of this, it has set itself a target to generate significant savings in administration costs, for redirection to support front line services, over the next three years.

We have agreed with Commission for Racial Equality (CRE) that, following a successful exercise last year to reduce its budget deficit, its administration costs should be reduced this year by 4.5 per cent., the same percentage as the Home Office. This will have some effect on staffing levels, which the CRE are assessing, but will not effect work to deliver key objectives.

CCTV

14. **Mr. Bill O'Brien:** To ask the Secretary of State for the Home Department what advice is given by his Department on the provision and funding of CCTV in urban areas; and if he will make a statement. [171329]

Caroline Flint: Since 1997, the Home Office has provided a variety of funding, which has been used to establish and run CCTV schemes in large and small urban areas, as well as residential and rural locations. Under the Crime Reduction Programme CCTV initiative, which ended in 2003, £170 million was invested in 684 CCTV schemes.

Crime and Disorder Reduction Partnerships have funding of £72.3 million in 2003–04 and £74 million in 2004–05 available for crime reduction initiatives under the Building Safer Communities Fund, which could include CCTV, and £50 million per annum to police BCUs in 2003–04 and 2004–05.

Anti-Social Behaviour Act

15. **Mr. George Howarth:** To ask the Secretary of State for the Home Department if he will make a statement on the implementation of powers contained in the Anti-Social Behaviour Act 2003. [171330]

Mr. Blunkett: The majority of the powers in the Ant-Social Behaviour Act 2003 have now been commenced.

This is the biggest single package of measures in tackling anti-social behaviour. They have been introduced after widespread consultation with communities and practitioners. The new powers are part of the Government's "Together Campaign" to help local people and agencies tackle the menace of yob behaviour.

Migration (EU Accession States)

17. **Angela Watkinson:** To ask the Secretary of State for the Home Department what assessment he has made of the potential impact of migration from EU accession states on public services in the UK after 1 May. [171332]

Mr. Browne: The measures that we have taken to regulate the UK labour market and prevent access to benefits and housing by nationals of the accession countries who are not in work, should mean that nationals of those countries coming to the United Kingdom are likely, as a group, to place relatively low demands on key public services. They will also, of course, be contributing like everyone else to the costs of those services by the taxes they pay.

Police Recruitment

18. **Mr. Bellingham:** To ask the Secretary of State for the Home Department if he will make a statement on police recruitment policy. [171333]

Fiona Mactaggart: Our general policy is to ensure that our national recruitment standards programme attracts recruits in sufficient number and of the right quality. In particular, our policy is to encourage more ethnic minority, graduate and female applicants to the Police Service and ensure that police officer numbers do not fall below current record levels.

Recruitment policy is drawn up in consultation with the Association of Chief Police Officers and the Association of Police Authorities.

Sex Offenders

20. **Mrs. Helen Clark:** To ask the Secretary of State for the Home Department if he will make a statement on the resettlement of sex offenders within the community. [171335]

Paul Goggins: Those who receive a prison sentence of 12 months or more are supervised by the National Probation Service on their release from custody. Those who are assessed as the highest risk are supervised under the Multi-Agency Public Protection Arrangements. The provision of stable accommodation is a major factor in the resettlement of offenders and approved probation and bail hostels have a key role to play.

Serious Organised Crime Agency

21. **Phil Sawford:** To ask the Secretary of State for the Home Department if he will make a statement on the proposed Serious Organised Crime Agency. [171336]

Paul Goggins: Serious organised crime poses a substantial and sophisticated threat to the UK. The Serious Organised Crime Agency will provide an effective response by reducing organisational boundaries, linking intelligence and operations, and providing a single point of contact for all matters related to such crimes.

Persistent Arsonists

22. **Hywel Williams:** To ask the Secretary of State for the Home Department what assessment he has made of the current aftercare of persistent arsonists; and if he will make a statement. [171337]

Caroline Flint: The Multi-Agency Public Protection Arrangements we established in 2001 have provided the means by which all agencies involved in protecting the public from offenders—including persistent arsonists—can co-ordinate their efforts and provide a much closer supervision of high-risk offenders.

The OPDM-led Arson Control Forum (established in April 2001) provides the strategic direction of the national fight against arson. The forum has also invested a total of £9.3 million in local arson prevention over three years.

We will also be identifying young people with targeted measures before they become involved in offending as part of our new Prolific and Priority Offender Strategy.

Terrorism (Mental Illness)

23. **Harry Cohen:** To ask the Secretary of State for the Home Department what action he proposes to take in respect of the arrangements for individuals suspected of having a terrorist connection or intent who may be deemed to be suffering from mental illness. [171338]

Mr. Blunkett: The prisons where those suspected of terrorist connections or intent are held have good medical facilities providing 24-hour cover. In addition, prisons have access to relevant hospitals, including secure hospitals, where referral is appropriate on medical grounds. Provisions therefore exist to deal with any mental or other health problems regardless of the reasons for detention.

Where an individual is not detained in prison he will be treated within the national health system.

Anti-Social Behaviour

24. **Gareth Thomas:** To ask the Secretary of State for the Home Department what measures are being taken to build up local expertise in measures to tackle anti-social behaviour. [171339]

Mr. Blunkett: Tackling anti-social behaviour is a key priority for the Government. That is why we have launched the Together Campaign, ensuring local practitioners gain real expertise in tackling anti-social behaviour.

A key part of the Together Campaign is the Together Academy and Actionline. The academies are designed to train front-line workers in the use of new and existing powers. In total there were 10 events held during March 2004 across England and Wales, training just over 2,000 academy graduates.

The Actionline ensures new and existing powers and best practice are used and understood. There have been over 1,000 since March.

The campaign will help improve the response to tackling anti-social behaviour by placing the focus within the heart of our communities and providing them with the opportunity to work together and also the tools to take action to tackle anti-social behaviour.

We have provided funding for every crime and disorder partnership across England and Wales and introduced specialist anti-social behaviour prosecutors to develop local expertise.

Criminal Justice Interventions Programme

25. **Mr. Michael Jabez Foster:** To ask the Secretary of State for the Home Department what progress has been made on extending the criminal justice interventions programme. [171340]

Caroline Flint: Criminal Justice Interventions Programme (CJIP) was successfully introduced into 30 areas with the highest levels of acquisitive crime in April 2003. The full programme—which includes drug testing on charge, arrest referral and through care and aftercare packages—has been expanded to a further 36 areas in April 2004. In the CJIP areas, waiting times for treatment have fallen significantly over the past year and the numbers starting treatment increased by 47 per cent.

Alcohol-related Violence

Mr. Denham: To ask the Secretary of State for the Home Department, what further action he proposes to reduce alcohol-related violence. [171334]

Mr. Blunkett: In March the Government launched the national alcohol harm reduction strategy for England. We intend to work together with all our stakeholders including the alcohol industry to implement all the recommendations in the strategy.

At the end of April, I announced a clampdown to be led by Paul Evans, the former Police Chief, who was so successful in achieving results in Massachusetts.

This will be a concerted enforcement campaign in the early summer to tackle under age drinking and selling alcohol to those already drunk. We want to rid our town centres of late night alcohol related violence. We will also work closely with local authorities, licencees and retailers to ensure that the full powers of the law are used effectively.

Advertising Campaigns

Mr. Greg Knight: To ask the Secretary of State for the Home Department what the estimated cost of the current police advertising campaign warning of the dangers of terrorism is; and from which budget that cost is being met. [164278]

Ms Blears *[holding answer 31 March 2004]:* There are currently two publicity campaigns that are being run warning of the danger of terrorism. One is the Life Savers Campaign and the other is the "Who owns this Bag?" campaign. The total cost of these campaigns is estimated at £355,500 and is being met jointly by the Metropolitan Police Service, the City of London Police, the British Transport Police, Transport for London and the Association of Chief Police Officers.

Ammonium Nitrate

Mr. Watson: To ask the Secretary of State for the Home Department what discussions he has had on the security implications of the commercial sale of ammonium nitrate fertiliser. [166840]

Ms Blears: I refer my hon. Friend to the answer given by my right hon. Friend the Secretary of State for the Environment, Food and Rural Affairs (Elliot Morley) on 28 April 2004, *Official Report*, column 1002W.

Criminal Record Checks

Tim Loughton: To ask the Secretary of State for the Home Department whether he plans to charge charities for criminal record checks. [169860]

Ms Blears: The Criminal Records Bureau charges a fee for all Disclosures, except that Disclosures are issued free in the case of volunteers. We have no plans to charge volunteers.

Departmental Computers

Bob Spink: To ask the Secretary of State for the Home Department what plans he has to update computer *(a)* hardware and *(b)* software standard packages used in his Department. [166364]

Fiona Mactaggart: In line with Government procurement policy most Information Communication Technology (ICT) in the Home Office is now delivered through service contracts which include a requirement to update both software and hardware to ensure that technologies are kept up to date and do not reach end of usable life. While there are major projects managing step changes of both software and hardware there is also ongoing work to ensure that both are up to date and relevant to the business use the ICT is being put to. The extent to which either is fully up to date depends on the relevance of up to date technologies to Government business requirements. All ICT investments need also to pass the test of best value and be subject to appropriate investment justification.

The following table illustrates updates to software and hardware planned or under consideration.

Home Office area	*Updates planned or under consideration*
Core Home Office and parts of Immigration and Nationality Directorate	On going programme of server infrastructure, desktop hardware and software refreshment underway, affecting all core Home Office users and approximately 7,000 IND users.
Immigration and Nationality	The current ICT service provider contract for the IND caseworking system expires shortly. Competitive tendering process for ongoing ICT service provision is in hand. An upgrade of network, desktop and server hardware and software are planned as part of contract.
National Offender Management—Prisons Service	Infrastructure rollout of PC's and telephones has completed. Service contract has a requirement for upgrade to hardware and software on two more occasions during the contract lifecycle.
National Offender Management—Probation Service	An ongoing programme upgrading servers, desktops and printers across the estate is underway. Latest versions of Microsoft Windows will be deployed on desktops.
United Kingdom Passport Service	Consideration underway for moving networks away Windows NT and for desktop refreshment replacing current ICT before end of useful life.

Departmental Procurement Policy (Sea Bass)

Mr. Sanders: To ask the Secretary of State for the Home Department if he will make it his Department's policy to source sea bass used in catering outlets for which his Department is responsible from hand-line fishermen rather than pair trawlers. [167541]

Fiona Mactaggart: The Home Office does not serve sea bass in any of the catering outlets for which it is responsible. Should this position change the Home Office would follow Department for Environment, Foods and Rural Affairs (DEFRA) policy, who are the lead Department on fisheries issues, on sourcing sea bass as follows:

> Defra supports the sourcing of sea bass from sustainable fisheries and handlining, as a relatively low impact method of fishing, can play a part in ensuring fisheries remain sustainable. However, the last report in 2003 by the International Council for the Exploration of the Seas on sea bass advised that the level of exploitation of the stock at that time was sustainable and did not recommend closure of the offshore pair trawl fishery. There are currently no restrictions at a UK or Community level on the method of fishing that can be used to target bass. In addition, to address the dolphin bycatch problem associated with the pair trawl fishery, Defra-funded trials of a separate grid device to reduce dolphin bycatch are currently taking place, with the co-operation of the fishing industry.

In these circumstances, Defra's policy is not to recommend a specific source of supply for sea bass at this stage.

Drugs

Mr. Clapham: To ask the Secretary of State for the Home Department what the estimated level of drugs-driven crime for the UK was in each of the last five years for which figures are available; and if he will make a statement. [168726]

Caroline Flint: Recorded crime figures, which are used to measure trends in crime, include statistics on drugs offences, such as possession, and on property crimes, such as burglary, but do not record whether the latter are related to an offender's drug habits. There are therefore no figures currently available for levels of drug-driven crime over the last five years.

The Home Office sponsored New English and Welsh Arrestee Drug Abuse Monitoring (NEW-ADAM) survey, which involved interviewing and drug testing those arrested by the police, provides an insight into the proportion of crimes that are drug related. However, these figures are not nationally representative.

Analysis of the data from the first eight sites in the survey, collected during 1999–2000, showed that 65 per cent. of arrestees tested positive for one or more illegal drug, with up to 29 per cent. testing positive for opiates (including heroin) and/or cocaine (including crack). Those arrestees reporting no drug use in the year before this study reported an average of 46 acquisitive crimes compared to 432 among heroin and/or cocaine/crack users.

Identity Cards

David Winnick: To ask the Secretary of State for the Home Department what information he has collated on countries which have suffered terrorism since 1986 and which, while suffering from terrorism, used identity cards; and which of these countries used cards with biometric data. [169728]

Mr. Blunkett *[holding answer 29 April 2004]:* Unfortunately, the information requested is not available. Neither the Home Office nor the Foreign Office have records on terrorist incidents which date back to 1986.

The Government has made it clear that the key to an effective identity card scheme is the security of the issuing process and rigorous and consistent procedures for using the card, together with the inclusion of biometrics stored on a central database.

This is where the proposals for a UK identity card scheme differ from card schemes in many other countries which do not have the kind of biometric security that is proposed for the UK scheme.

The Government believes that a secure identity card scheme would disrupt the use of false identities by terrorist organisations, for example in the money laundering and organised crime, which support terrorist activities.

As I set out in my evidence to the Home Affairs Select Committee on 4 May 2004, this is an assessment shared by the Director General of the Security Service and indeed also by the Commissioner of the Metropolitan Police.

Internet Watch Foundation

Brian White: To ask the Secretary of State for the Home Department what analysis he has undertaken of the Internet Watch Foundation's Annual Report 2004; and if he will make a statement. [166799]

Ms Blears: We welcome the Annual Report of the Internet Watch Foundation (IWF) 2003, which was published in March 2004, and congratulate the IWF on their achievements.

The report shows a continued increase in the number of reports made to the IWF, to just under 20,000 in 2003. The report also highlights the fact that only 1 per cent. of illegal content identified by IWF in 2003 was hosted in the UK: this represents a significant improvement from 18 per cent. in 1997, and demonstrates the willingness of UK industry to work effectively to remove illegal content. These figures also demonstrate the continuing need for international co-operation to deal with illegal content on the internet: the report shows that the IWF themselves have active partnerships with hotlines and other agencies abroad, and support the UK police in their efforts to encourage such co-operation.

Overall, the report clearly shows the value of a co-operative approach involving a wide variety of partners in combating child pornography on the Internet and other illegal content. It shows a welcome increase in the number and range of companies supporting the IWF, and particularly the involvement of companies from sectors not previously engaged with the IWF. The involvement of such groups as mobile telecommunications providers, search engines and the finance industry in discussions with the IWF and others to reduce access to illegal content is further demonstration of the value of this approach.

Prisons

Mr. Gerrard: To ask the Secretary of State for the Home Department what assessments of *(a)* Private Finance Initiative and *(b)* market testing have been carried out by the Prison Service since January 2000; who carried out the work; and what the main findings were. [167363]

Paul Goggins: In late 2000 the Prison Service commissioned Patrick Carter, then a non-executive director of the Strategy Board for Correctional Services, to consider how best to develop the contribution of the private sector, particularly the Private Finance Initiative (PFI), to achieving the objectives of the Prison Service. Mr. Carter reported in January 2001. The main findings relevant to the question were that past market tests demonstrated beyond doubt the value of the competitive process in driving down costs and improving performance in public sector prisons, that PFI had proved successful in attracting capital investment and delivering high quality prisons and that competition should continue. Ministers welcomed the report.

Security Services

Llew Smith: To ask the Secretary of State for the Home Department what proposals he has to provide more information to the public on the protection work done by the security services. [166036]

Mr. Blunkett: The Security Service (MI5) has a long standing role and depth of experience in providing protective security advice to Government and those sectors of the business community critical to the national infrastructure. The service has recently expanded its work in this area into a new structure, the National Security Advice Centre (NSAC). As part of the expansion, the service launched its upgrade website (www.mi5.gov.uk) on 30 April. This provides a substantial body of material offering practical advice on sensible security precautions for business organisations and anyone with responsibility for the safety of others. Its purpose is to put the terrorist threat into context and set out sensible security precautions. The website is publicly accessible and will be updated regularly.

The website complements information for the public on the Home Office, UK Resilience, Foreign and Commonwealth Office and Metropolitan Police sites. It represents a further step forward in the drive to put more information about the terrorist threat in the public domain. Advice on protection against electronic attack will remain the responsibility of the National Infrastructure Security Co-ordination Centre (NISCC) (www.niscc.gov.uk).

TRADE AND INDUSTRY

Security Threat (Mox Plutonium)

Llew Smith: To ask the Secretary of State for Trade and Industry whether she has initiated a review of the security of the sea transport of Mox plutonium fuels in response to the heightened international threat from terrorism. [171652]

Mr. Timms: Any such future shipment will be carried out in accordance with the Nuclear Industries Security Regulations 2003, which are administered and enforced by The Office for Civil Nuclear Security (OCNS). OCNS will not allow a shipment to proceed until all necessary security measures, commensurate with the threat pertaining at the time, are in place. It is Government policy not to disclose details of these security arrangements.

Berkeley Nuclear Research Laboratories

Llew Smith: To ask the Secretary of State for Trade and Industry what physical protection measures exist at the Berkeley nuclear research laboratories in Gloucestershire against the accidental or deliberate crash of an aircraft onto the site; and whether these have been enhanced since 2002. [171649]

Mr. Timms: The UK's civil nuclear sites apply stringent security measures regulated by the Office for Civil Nuclear Security (OCNS), the security regulator. The security regulator works closely with the Health and Safety Executive, the safety regulator, which provides advice on the safety implications of events, including external hazards such as plane crashes, at nuclear installations. Security at nuclear sites is kept under regular review in the light of the prevailing threat and has been significantly enhanced since the terrorist attacks in the USA on 11 September 2001. It is Government policy not to disclose details of these measures which could potentially be of use to terrorists.

Businesses

Mr. Neil Turner: To ask the Secretary of State for Trade and Industry (1) how many businesses have started up in Wigan since 1997; [169315]

(2) how many new businesses have been established in Wigan since 1997. [169317]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 500 in Wigan Local Authority (which contains the constituency of Wigan), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 1,900 business start-ups in Wigan Local Authority in 2003. Data for Local Authorities are not available for before 2003.

DTI figures based solely on VAT registrations for Wigan Local Authority (which includes the constituency of Wigan) are shown below for the period 1997 to 2002. Data for 2003 will be available in Autumn 2004.

VAT Registrations: 1997–2002

	1997	*1998*	*1999*	*2000*	*2001*	*2002*
Wigan	640	635	620	670	580	630

Source:

Business Start-ups and Closures: VAT Registrations and de-registrations 1994–2002, Small Business Service

Mr. Wyatt: To ask the Secretary of State for Trade and Industry what steps the Government has taken to help small businesses in Sittingbourne and Sheppey since 1997. [170292]

Nigel Griffiths: Enterprise Grants of more than £391,000 and Research and Development Grants of more than £587,000 have been awarded to SME's in Sittingbourne and Sheppey since 1997. In addition, an application for a Freight Facilities grant (to enable businesses to transport their goods by means other than by road) resulted in a company receiving more that £403,000.

The total number of businesses in Swale is currently 3,828. Penetration of the business population by Business Link Kent has increased fourfold since 1997. The number of unique businesses that have been assisted by the Business Link has risen from 9 per cent. in 1997–98 to 36 per cent. in 2003–04.

Around 60 businesses have been recognised and 52 committed to Investors in People (KP) during the period as a result of an intervention with Business Link Kent.

In the past two years, a number of specific European funded programmes have significantly assisted 28 companies in Sittingbourne and Sheppey by providing Mentors who have undertaken various projects in the companies to enable them to develop their business.

Women Entrepreneurs in Swale were targeted in a programme during 2001–02, 128 women attended and 26 new businesses started as a result.

Coalminers' Compensation

John Mann: To ask the Secretary of State for Trade and Industry how many respiratory test centres have been paid by her Department for medical assessment for the coalminers' compensation scheme; by whom they are run; and what Government payments they have received. [170786]

Nigel Griffiths *[holding answer 5 May 2004]:* At present, the Department's respiratory disease medical providers are Atos Origin who are currently responsible for 29 test centres and two mobile test centres. The total cost to the Department for the provision of the medical assessment process since 1999 is £146 million.

John Mann: To ask the Secretary of State for Trade and Industry what percentage of claimants have received *(a)* interim payments and *(b)* full and final settlements of the claims registered by the top 10 solicitors, determined by number of claims lodged, for respiratory disease and vibration white finger under the coalminers' compensation scheme. [170787]

Nigel Griffiths *[holding answer 5 May 2004]:* As of 4 May 2004 the figures are as follows:

Top 10 Solicitors[1]	*[2]Percentage of Claimants who have received an Interim payment*	*[3]Percentage of Claimants who have received a full and final settlement*
Beresfords Solicitors	0.46	7.97
Thompsons	19.13	29.73
Hugh James Ford Simey	14.17	32.08
Raleys Solicitors	12.08	28.40
Browell Smith & Co.	13.10	22.88
Mark Gilbert Morse	8.82	24.69
Avalon	0.27	1.57
Union of Democratic Mineworkers	7.66	30.27
Watson Burton	8.19	30.41
Barber & Co.	0.06	4.23

[1] Top 10 Solicitors are in descending order and based on the number of claims received
[2] Total number of claimants who have received an interim
[3] Total number of settlements include claims settled by denial/ withdrawal

A very large number of claims for respiratory disease have been registered in the last six months and will not yet have been through to the stage of a possible payment.

John Mann: To ask the Secretary of State for Trade and Industry how many privately funded medical assessments have been received under the coalminers' compensation scheme where the claimant has rejected the assessments paid for by the Government under the scheme. [170788]

Nigel Griffiths *[holding answer 5 May 2004]:* The Department's Contractors do not record whether claimants have privately funded their own medical assessment.

John Mann: To ask the Secretary of State for Trade and Industry how many different claims handling agreements were signed by Government under the coalminers' compensation scheme; with whom; by whom and when. [170789]

Nigel Griffiths *[holding answer 5 May 2004]:* The Claims Handling Agreements (CHA) for respiratory disease and Vibration White Finger were negotiated with the claimants' solicitors. Separate CHAs were negotiated with the Union of Democratic Miners (UDM), the only difference being costs which are lower.

The agreements are:

Respiratory disease CHAs:

England and Wales—signed in September 1999

Scotland—June 2000

Australia and New Zealand—January 2003

UDM—November 1999

VWF CHAs:

England and Wales—All signed in January 1999

Scotland

UDM

John Mann: To ask the Secretary of State for Trade and Industry what amount is budgeted by Government for paying solicitors under the miners' compensation scheme for *(a)* 2004, *(b)* 2005 and *(c)* 2006. [170790]

Nigel Griffiths *[holding answer 5 May 2004]:* The figures according to the forecast at the end of 2003 are:

£ million

Financial year	*COPD*	*VWF*
2003–04	126.20	21.56
2004–05	154.28	38.11
2005–06	181.50	23.30

The forecasts will be revisited in the light of the number of claims now received in the respiratory disease scheme.

Payments made to solicitors will of course depend on the volume of cases processed and offers accepted.

Miners' Compensation Scheme

John Mann: To ask the Secretary of State for Trade and Industry how many claims have been registered under the coalminers' compensation scheme for chronic obstructive pulmonary disease and vibration white finger by Beresfords Solicitors in each year since the scheme began to the latest date for which figures are available. [171640]

Nigel Griffiths: As of 7 May 2004 the figures are as follows:

	COPD	*VWF*
1995	0	5
1996	17	23
1997	4	29
1998	120	45
1999	373	413
2000	2,697	4,270
2001	1,872	1,196
2002	6,788	5,317
2003	50,914	347
2004	16,886	0
Total	79,671	11,648

Note:
The COPD claim receipts are those claims that are fully registered, i.e. exclude partially registered claims (website claims yet to be fully registered on ICMS due to a submission error during input) and claims in the holding policy (pool of claims accepted with minimum data, awaiting further information to permit cross referencing and duplicate checks prior to full registration).

John Mann: To ask the Secretary of State for Trade and Industry what the average final settlement for chronic obstructive pulmonary disease and vibration white finger was for the top 10 solicitors as determined by fees charged to her Department under the miners' compensation scheme. [170740]

Nigel Griffiths: As of 6 May 2004 the figures are as follows:

Top 10 Solicitors[1]	*[2]Average full and final settlement (£)*
Thompsons	9,187
Hugh James Ford Simey	9,390
Raleys Solicitors	8,683

Top 10 Solicitors[1]	[2]Average full and final settlement (£)
Browell Smith and Co.	8,175
Mark Gilbert Morse	4,373
Graysons	4,420
Beresfords Solicitors	1,679
Union of Democratic Mineworkers	4,532
Watson Burton	4,851
Towells Solicitors	8,581

[1] 'Top 10' solicitors are in descending order and based on solicitors costs received.

[2] Average full and final settlements include claims denied/withdrawn.

John Mann: To ask the Secretary of State for Trade and Industry which 10 solicitors had the most new claims lodged under the miners' compensation scheme in 2004. [170741]

Nigel Griffiths: As at 6 May 2004 the figures are as follows:

Top 10 Solicitors[1]	Claim Receipts in 2004[2]
Raleys Solicitors	19,890
Beresfords Solicitors	16,886
Avalon	13,797
Browell Smith & Co.	13,363
Hugh James Ford Simey	13,180
Thompsons	12,820
Delta Legal	6,818
Corries	4,750
AMS Law	4,697
Union of Democratic Mineworkers	4,145

[1] 'Top 10' solicitors are in descending order and based on the number of claims received.

[2] Claim receipts are those claims that are fully registered. These figures exclude claims registered partially on the website (yet to be fully registered within ICMS due to a submission error during input) and claims held within the holding policy (pool of claims accepted with minimum data, awaiting further information to permit cross referencing and duplicate checks prior to full registration).

Departmental Annual Report

Llew Smith: To ask the Secretary of State for Trade and Industry whether any of the grant-in-aid to countries of the former Soviet Union in respect of nuclear legacy programmes mentioned at paragraphs 16.18 to 16.21 of her Department's Annual Report, Cm 6216, has been *(a)* used and *(b)* earmarked for future use to help deal with the surplus military plutonium stockpile in Russia. [170983]

Mr. Timms: £70 million over 10 years is allocated to help deal with the disposition of surplus Russian military plutonium. The precise details of the disposition programme have not yet been agreed between Russia and the US and, as a result, none of the UK allocation has so far been spent. Consideration is therefore being given to the use of these funds to assist in closing down the three remaining plutonium-producing reactors in Russia.

Norman Lamb: To ask the Secretary of State for Trade and Industry how much the production of her Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171078]

Ms Hewitt: The cost incurred by the Department for design and artwork of the latest Departmental Report (April 2004) was approximately £9,036. This figure includes the costs incurred in placing an electronic version of the report on the Departmental website. Other costs of printing and publication were met directly by the publisher, The Stationery Office Limited (TSO), and did not fall to the Government. TSO recoups these costs through sales and uses its commercial judgment as to the number of copies printed. The latest departmental report was only published on 28 April 2004 and 469 copies were sold at the cover price (£32) by TSO or through its accredited agents and other booksellers within the first week.

The Department is in the process of circulating some 430 complimentary copies to Ministers, Opposition Front Bench spokesmen, Select Committee Members and staff, the Parliamentary Libraries, DTI officials and external Board Members (including in agencies and NDPBs), officials in other Government Departments and journalists.

Departmental Procurement (Sea Bass)

Mr. Sanders: To ask the Secretary of State for Trade and Industry if she will make it her Department's policy to source all sea bass used in catering outlets for which her Department is responsible from hand-line fishermen rather than pair trawlers. [167544]

Ms Hewitt: DTI follows the guidance issued by Defra on this issue. Defra supports the sourcing of sea bass from sustainable fisheries and handlining as both are relatively low impact methods of fishing.

Departmental Publications

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will list the newspapers, magazines and periodicals her Department *(a)* produces and *(b)* funds, stating (i) the title and subject matter, (ii) the cost to her Department in 2003–04, (iii) the number produced, (iv) the readership and (v) the cost per publication. [168861]

Ms Hewitt: My Department does not hold this detailed information centrally. To provide this information could only be done at disproportionate cost.

Disconnections (Utilities)

Bob Russell: To ask the Secretary of State for Trade and Industry (1) what assessment she has made of the burden of proof in the warrants process for disconnection; and if she will make a statement; [170376]

(2) when she next expects to meet the Chief Executive of Ofgem to discuss disconnections to residential customers. [170377]

Mr. Timms: The DTI has discussed, and will continue to discuss as appropriate, disconnections matters with Ofgem. With DTI's encouragement, Ofgem has been in discussion with gas and electricity suppliers about the arrangements governing disconnections, particularly for vulnerable customers. Ofgem has now issued an industry consultation paper that sets out proposed revisions to, and clarification of, those arrangements. The arrangements governing the warrants process are set out in the Rights of Entry (Gas and Electricity Boards) Act 1954, as amended. If a supplier wishes to disconnect, it must give the customer two days' notice of its intention to visit the premises. It has the right of entry to disconnect, but, if the customer is not at home or refuses entry, it may only exercise this right after it has obtained a warrant from a court. The court may require evidence of the debt, and of the supplier's efforts to recover that debt. The customer should be advised when and where the supplier will apply for a warrant, and can defend the application.

Equal Opportunities Commission

Mrs. Mahon: To ask the Secretary of State for Trade and Industry if she will make a statement on the reduction in the planned growth budget for the Equal Opportunities Commission. [168064]

Ms Hewitt *[holding answer 29 April 2004]:* My right hon. Friend the Chancellor of the Exchequer has rightly set targets for all government departments to achieve spending efficiencies.

My Department, like others, seeks to deliver its demanding objectives as efficiently as possible. I set similarly high standards for our Agencies and non-departmental public bodies, including the Equal Opportunities Commission. I have therefore asked the EOC to make a reduction in its budget for 2005–06 and 2006–07. I am confident that the EOC will meet the challenge of reducing its operational costs while continuing its excellent work of promoting gender equality in 21st century Britain.

Fathers Direct Conference

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the date was of the press release issued by the Institute of Directors making reference to women of childbearing age referred to in her speech of 5 April at the Fathers Direct conference; and if she will make a statement. [170278]

Ms Hewitt: The press release issued by the Institute of Directors (IoD), while Ruth Lea was Head of Policy Unit, around the time of the introduction of the new work and parent laws that I referred to was dated 3 April 2003. In summarising the views expressed by the IoD regarding the impact on women of childbearing age I also drew on other press releases issued which criticised the steps the Government have made to increase the provision of family-friendly policies. These were issued on 17 April 2001 and 4 March 2002.

I used my speech to highlight the initial evidence on the impact of the flexible working legislation is showing that many parents and employers are taking advantage of flexible working to both their benefit. Since the law was introduced almost 800,000 parents of children under six have had their request for flexible working either fully or partly accepted and the proportion of requests being refused has reduced by almost a half.

Fuel Cell Technologies

Mr. Todd: To ask the Secretary of State for Trade and Industry what assessment she has made of the steps taken to engage UK industry in the development of fuel cell technologies; and if she will make a statement. [171280]

Mr. Timms: The Energy White Paper contained a number of commitments on fuel cells. These involved the development of institutional support for the emerging UK fuel cell industry. We have made good progress in taking these forward. Fuel Cells UK was established in May 2003 with pump-priming support from DTI. Fuel Cells UK played the leading role in developing a UK Fuel Cell Vision, which was launched at the Grove Fuel Cell Symposium in September 2003. Also launched at that event was the Fuel Cells Forum, an IT based knowledge transfer network, informing UK stakeholder of worldwide activity and allowing the opportunity to easily engage business, academia and the Regions.

DTI has supported industrial fuel cell R&D under the DTI Advanced Fuel Programme since 1992. Funding for Collaborative Research and Development in Fuel Cells is now available as part of the Technology Programme, launched on 26 April. The DTI will continue to engage with industry to identify and address the technical and non-technical barriers to the deployment of fuel cell technologies in order to support UK Business.

Mr. Todd: To ask the Secretary of State for Trade and Industry what support will be given to those UK companies involved in the development of fuel cell technologies. [171281]

Mr. Timms: The DTI has supported industrial R and D on fuel cells since 1992, under the DTI New and Renewable Energy Programme, with a value of approximately £2 million per year. DTI has recently reviewed and simplified its business support products. In future, fuel cell proposals may be eligible for funding under the DTI Collaborative Research and Development product, part of the DTI Technology Programme. A call for proposals (which includes fuel cells) is currently open. Details are available on the DTI website.

Basic research in universities on both fuel cells and hydrogen is supported by the Engineering and Physical

Sciences Research Council (EPSRC), most recently under its SUPERGEN initiative. The Carbon Trust is also able to support fuel cell and hydrogen projects, including taking strategic investments.

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Insurance

Mr. Bellingham: To ask the Secretary of State for Trade and Industry if she will make a statement on proposals under discussion in the European Council working group to abolish gender discrimination in insurance claims. [168897]

Ms Hewitt: The Government has welcomed the development of European sex discrimination legislation through an Equal Treatment Directive. The Government strongly supports most of this Directive, but is aware of concerns about some aspects, including the effects of prohibiting the use of sex-based factors in insurance pricing. The UK will continue to negotiate constructively to achieve a final agreement that reflects UK priorities and concerns.

International Development

Sir Archy Kirkwood: To ask the Secretary of State for Trade and Industry (1) what further steps she proposes to promote international trade with developing countries; [169371]

(2) what trade proposals she has to enable countries in Africa to increase levels of trade with the UK. [169372]

Mr. Mike O'Brien: The best opportunity for promoting trade with developing countries is a successful and ambitious result from the Doha Development Agenda in the World Trade Organisation. We are working closely with the European Commission, other member states and other governments to secure this. While the Doha Round remains our top priority, we are also working with the Commission on the revision of the EU's Generalised System of Preferences, which offers preferential access for developing countries to the now even larger European market, and totally tariff and quota free access for the Least Developed Countries, many of which are in sub-Saharan Africa. In addition, negotiations for Economic Partnership Agreements with the African, Caribbean and Pacific (ACP) countries are under way.

The forthcoming Trade and Investment White Paper will consider, among other issues, the trade framework between the EU and developing countries. The UK is also supporting capacity building in developing countries in trade policy and negotiations to the tune of £165 million over three years, by supporting organisations such as the Centre for WTO Law and the South Centre. We hope that the Commission for Africa, announced by the Prime Minister on 26 February, will consider what more can be done to help specifically African countries reap the benefits of increased world trade.

Large Combustion Plants Directive

Mr. Caton: To ask the Secretary of State for Trade and Industry what assessment the Government have made of the impact on the United Kingdom coal industry of introducing a national emissions reduction plan in order to implement the Large Combustion Plants Directive. [171238]

Mr. Timms: The Government have commissioned independent research into the potential impact on United Kingdom coal production of the alternative routes to implement the Large Combustion Plants Directive. The results of this research will help to inform the choice of implementation route and will be published in due course.

Liabilities Management Unit

Llew Smith: To ask the Secretary of State for Trade and Industry if she will list the members of her Department's liabilities management unit; what the qualifications of each are; and what the permanent place of employment of each secondee to the unit is. [170978]

Mr. Timms: The DTI organisational structure contains a Coal Liabilities Unit and a Nuclear Liabilities Management Unit.

There are 39 staff in the Coal Liabilities Unit, 37 of whom are civil servants and two of whom are seconded from our claim handlers IRISC.

There are 15 staff in the Nuclear Liabilties Management Unit, consisting of four civil servants and 11 secondees, from BNFL, UKAEA and RW Newchem.

In addition, both Units have contracts with a number of consultants to provide additional support and advice.

London Development Agency

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many London Development Agency board members have *(a)* current and *(b)* recent business experience. [168710]

Jacqui Smith: The information is as follows.

(a) 11.

(b) 11.

Manned Space Travel

James Purnell: To ask the Secretary of State for Trade and Industry what Government support is available for research into manned space travel. [170454]

Ms Hewitt: In December 2003 the Government published its Space Strategy, which targets investment at those projects that offer the best commercial opportunities, scientific knowledge and environmental information, rather than national prestige. As we do not believe that human spaceflight programmes fall within these targets, we are focusing on the robotic exploration

of the solar system. For example we are currently examining the scientific and industrial benefits of participation in the European Space Agency's Aurora programme.

Micro-satellites

James Purnell: To ask the Secretary of State for Trade and Industry what her assessment is of British industry's readiness to take advantage of the market for launching micro-satellites; and what action her Department is taking to improve that readiness. [170453]

Ms Hewitt: In December 2003 the Government published clear priorities in its support for the UK space industry, the particular strengths of which lie in the Earth observation, satellite navigation and satellite communications sectors, both in their supply-side and in their fast-growing downstream segments. While the Government are alert to the need to ensure access to space, including for our leading-edge micro-satellite industry, we believe that the current over-supply in the global commercial launches market makes intervention unnecessary.

New Businesses (Oldham, West and Royton)

Mr. Meacher: To ask the Secretary of State for Trade and Industry how many new businesses have been established in Oldham West and Royton since 1997. [170936]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 400 in Oldham Local Authority (which contains the constituency of Oldham West and Royton), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 1,900 business start-ups in Oldham Local Authority in 2003. Data for Local Authorities are not available for before 2003.

DTI figures based solely on VAT registrations for Oldham Local Authority (which contains the constituency of Oldham West and Royton) are shown in the table for the period 1997 to 2002. Data for 2003 will be available in autumn 2004.

VAT Registrations: 1997–2002

	Oldham
1997	480
1998	470
1999	465
2000	480
2001	440
2002	510

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

North Sea Energy Production

Mr. Alan Campbell: To ask the Secretary of State for Trade and Industry what proportion of the value of contracts for oil and gas production platforms in the North sea in areas for which the UK Government granted licences was awarded to UK-based firms in each of the last five years. [170410]

Mr. Timms: Information on UK companies winning contracts from UKCS oil and gas operators is compiled only for major fields, such as Millom (approved 1999), Leadon (2000), Clair (2001), Goldeneye (2002) and Buzzard (2003). The involvement in these projects by UK-based companies with the necessary capability ranged from around 60 per cent. to 75 per cent. by contract value over this period.

Nuclear Security

Llew Smith: To ask the Secretary of State for Trade and Industry what the main points were of the agreement reached with the United States Nuclear Regulatory Commission for the exchange of nuclear security information to which reference is made at paragraph 16.17 of her Department's Annual Report, Cm 6216. [170989]

Mr. Timms: The agreement between the United States Nuclear Regulatory Commission and the Department of Trade and Industry facilitates the exchange of classified information regarding the safety and security of civil nuclear installations. Such agreements are vital in combating the threat of global terrorism.

Omega Site (Warrington)

Helen Jones: To ask the Secretary of State for Trade and Industry what assessment she has made of the impact of the development of the Omega site in Warrington on *(a)* Warrington and *(b)* the regional economy. [171019]

Jacqui Smith: My right hon. Friend, the Secretary of State for Trade and Industry has not made an assessment of the impact of the development of the Omega site in Warrington. Omega South is one of the North West Development Agency's strategic regional sites. It has the potential to create some 12,000 jobs and it is essential that the development of this scale and significance is consistent with both national and regional planning policies.

Pilot Joint Taskforce

Llew Smith: To ask the Secretary of State for Trade and Industry what the annual cost to her Department of participation in the Pilot joint taskforce on the future of the UK oil and gas industry *(a)* has been and *(b)* is expected to be in the next five years; and how her Department measures value for money from participation in the Pilot taskforce. [170977]

Mr. Timms: provides the PILOT Secretariat, plus around £100K annually in direct support of industry initiatives and other related activity.

DTI's financial commitment to PILOT is expected to remain the same for the next £5 years, subject to continual review and reflecting the situation in the UKCS (United Kingdom Continental Shelf).

PILOT has set itself a number of challenging objectives that includes specific targets for production, investment and job creation. These objectives are transparent and measurable and DTI continually monitors progress.

Post Office

Mr. Jack: To ask the Secretary of State for Trade and Industry if she will place in the Library details of the business case underpinning the Post Office's closure proposals for the Fylde constituency. [171800]

Mr. Timms: No. Under the public consultation process, Post Office Limited supplies extensive information to assist stakeholders and other interested parties in their consideration of post office closure proposals, but detailed financial information is, necessarily, commercially confidential.

Mr. Hoyle: To ask the Secretary of State for Trade and Industry if she will urge Post Office Limited to make more time for consultation available to *(a)* the public and *(b)* other interested bodies when post offices are being considered for closure. [172069]

Mr. Timms: No. The public consultation period for proposed closure of post offices under Post Office Limited's urban reinvention programme has already been extended from four to six weeks. In addition, Postwatch receives notification of proposals two weeks in advance, and Members of Parliament one week in advance, of the start of public consultation. Local authorities are invited to provide relevant information, in advance, on infrastructure and regeneration projects to assist Post Office Limited in preparing its proposals.

Mr. Dismore: To ask the Secretary of State for Trade and Industry if she will make a statement on the performance of Royal Mail delivery services in Hendon constituency. [170192]

Mr. Timms: Delivery services are the operational concern of Royal Mail Group and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Premium Rate Telephone Numbers

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what steps she is taking to reduce the incidence of companies providing misleading information regarding premium rate telephone numbers; and if she will make a statement. [169377]

Mr. Timms: The regulation of Premium Rate Services is a matter for the Independent Committee for the Supervision of Standards of Telephone Information Services (ICSTIS). Their Code of practice sets out the requirement for companies to provide clear pricing information and specifically prohibits the use of misleading pricing information.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what recent representations and discussions she has had regarding misleading information by companies charging premium rate costs for telephone services; and if she will make a statement. [169378]

Mr. Timms: My right hon. Friend the Secretary of State has had no recent representations on this matter. Misleading information about such services is a matter for the Premium Rate Services regulator, the Independent Committee for the Supervision of Standards of Telephone Information Services (ICSTIS).

Regeneration (Hampshire)

Mr. Hoban: To ask the Secretary of State for Trade and Industry how much money her Department has spent on the South Hampshire Priority Area for Economic Regeneration in *(a)* 2001–02, *(b)* 2002–03 and *(c)* 2003–04; and how much is budgeted to be spent in (i) 2004–05 and (ii) 2005–06. [165319]

Jacqui Smith *[holding answer 1 April 2004]:* The DTI, alongside a number of other Government Departments, funds the South East of England Development Agency (SEEDA) to catalyse and carry out economic development and regeneration activities in the South East region. Funds are provided to SEEDA as a Single Budget and it is not possible to separate out DTI funded activity within the Agency's work. Activity by the Agency is however very relevant to the DTIs economic development objectives and is an important element of spend in the South Hampshire Priority Area for Economic Regeneration.

SEEDA's priority areas are based on Regional Planning Guidance (RPG) 9. SEEDA has spent some £34 million in 2001–02, £32.6 million in 2002–03, and £20.4 million in 2003–04 in the South Hampshire Priority Area for Regeneration, which for RPG purposes includes Portsmouth, Southampton, Fareham, Gosport, Havant and Eastleigh.

Known allocated spend in 2004–05 will be in the order of £10 million with further expenditure of around £9 million in 2005–06. The amount spent may, however, vary from this, for example, because of land and property spend in 2005–06 for which there is not a current estimate. Future expenditure will be determined through the Area Investment Framework process which the Agency has developed, which defines local priorities and brings together not just SEEDA funding but multiple mainstream funding streams.

Besides this, investment made directly by the Department of Trade and Industry in the area is as follows.

£

	2001–02	*2002–03*	*2003–04*	*2004–05*	*2005–06*
Smart and Enterprise Grant	485,754	1,007,191	332,605	76,000	51,000
Knowledge Transfer Partnerships (following on from the Teaching Company Scheme)	25,500	20,000	77,000	76,000	51,000

Phoenix Fund

A sum of £839,000 has been allocated from the Phoenix Fund for two projects in the area within the period. This grant is not annualised but is drawn down as spent.

Small Firms Loan Guarantee

In addition the Small Firms Loan Guarantee (SFLG) guaranteed 38 loans in the year 2001–02 valued at £2.15 million, 37 loans in 2002–02 valued at £2.9 million and 66 loans in 2003–04 valued at £4 million. These figures do not equate to spend. Government expenditure only arises if there is a subsequent default and the guarantee is called upon. Figures for future years are not available as SFLG is demand led.

Business Link Wessex

Spend in South Hampshire by Business Link Wessex on providing business support to SMEs is approximately £1.3 million per year for the years 2001–02, 2002–03 and 2003–04. Expenditure in 2004–05 will be of the same order. The budget for 2005–06 is not yet firm.

Regional Development Agencies

Mr. Hammond: To ask the Secretary of State for Trade and Industry if she will list, for each of the nine regional development agencies in England, *(a)* the aggregate amount of forward funding commitments entered into by the Agency at 31 March and *(b)* the annual budget of the Agency for financial year 2004–05. [169491]

Jacqui Smith: The figures are set out in the following table; the information on commitments has been provided by the Regional Development Agencies.

£ million

	Budget for 2004–05	*Committed spend in relation to 2004–05*
Advantage West Midlands	245	245
East of England Development Agency	99	65
East Midlands Development Agency	124	47
London Development Agency	379	260
North West Development Agency	358	346
ONE North East	237	224
South East England Development Agency	130	96
South West of England Regional Development Agency	130	127
Yorkshire Forward	266	245

Regulations

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will list the regulations that have been *(a)* introduced and *(b)* removed by her Department in each year since 1990. [169165]

Jacqui Smith *[holding answer 28 April 2004]*: There have been 1713 regulations introduced by the Department in the period 1991 to 2003. A listing of these Statutory Instruments will be placed in the Libraries of the House.

There is no centrally held information about the regulations removed during the period. But a recent OECD Economic Survey of the United Kingdom noted that "economic and administrative regulations inhibiting competition and barriers to trade are amongst the lowest in the OECD".

Renewables Obligation

Mr. Drew: To ask the Secretary of State for Trade and Industry if she will make a statement on the implications for the renewables obligation of the liquidation of Atlantic Electric and Gas; and whether its renewables obligation liabilities have been acquired by another going concern. [171385]

Mr. Timms: My officials are discussing the implications for the renewables obligation of the liquidation of Atlantic Electric and Gas with Ofgem. At this stage it is too early to assess the impact on the renewables obligation.

Mr. Drew: To ask the Secretary of State for Trade and Industry if she will assess the effectiveness of the mechanism of the trading of renewable obligation certificates (ROCs), with specific reference to the liquidation of an energy company possessing ROCs. [171386]

Mr. Timms: In the event of the liquidation of an energy company possessing ROCs, the ROCs are one of the company's assets and can be sold by the liquidators, either to a company acquiring the business of the insolvent supplier or separately to another purchaser.

Small Business Office, Brussels

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the planned *(a)* resource budget, *(b)* administration costs and *(c)* staff numbers are for 2004 of the Small Business Office in Brussels sponsored by her Department. [168449]

Nigel Griffiths: For the financial year 2004–05 the budget provided by the Small Business Service for the UK SME liaison office in Brussels (Smallbusinesseurope) is £127,500.

Two full time staff are engaged in the office's work, and a university placement student is also employed for 10 months each year.

Small Business Service

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry pursuant to the written ministerial statement of 28 April 2004, *Official Report*, columns 43–44WS on small business service, how much financial support her Department intends to provide for the Phoenix Fund Building scheme from April; and for what period. [171611]

Nigel Griffiths: The total budget for the Phoenix Fund is £50 million from April 2004-March 2006. From that, the following allocations have been made to those parts of the Fund referred to in the written ministerial statement of 28 April 2004, *Official Report*, columns 43–44WS:

City Growth Strategies—£3.5 million

Building on the Best element of the Phoenix Development Fund—£13.4 million

Building on the Best element of the Challenge Fund for Community Development Finance Institutions—£8.4 million.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry if she will make a statement on the devolution of Small Business Services. [169102]

Nigel Griffiths: As announced in the 2004 Budget statement the Government will devolve regional and local Business Link services to the RDAs, within a framework for setting national standards and services to be developed by the Small Business Service, the RDAs and other Government Departments funding business support. The Government intend to implement devolution from April 2005, and will publish more details on these new arrangements in the 2004 Spending Review.

Small Businesses

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what steps her Department is taking to protect small businesses from late payments. [168905]

Nigel Griffiths: This Government has done more than any other to specifically address the problem of late payment. We introduced the Late Payment of Commercial Debts (Interest) Act 1998 which allows small businesses to claim interest and debt recovery costs on late paid invoices and also gives representative organisations the right to challenge unfair contract terms on behalf of SMEs.

The Government helped to create the Better Payment Practice Group (BPPG) a cooperative forum of Industry associations and Government that seeks to improve the payment culture in the UK. The BPPG provides a range of information and advice to all businesses, its website www.payontime.co.uk includes a guide to using the legislation as well as other tools.

A recent survey by the REL Consultancy Group looked at average days payable outstanding (DPO) and concluded that UK companies' payment performance is 33.6 days against 42.4 days for Europe as a whole, whilst countries such as Italy (67.9) and France (63.4) perform considerably less well.

Mr. Meacher: To ask the Secretary of State for Trade and Industry what steps the Government has taken to help small businesses in Oldham West and Royton since 1997. [170935]

Nigel Griffiths: The Business Link Operator for North Manchester has provided assistance to 887 businesses in the Oldham West and Royton constituency since 2001. The Small Business Service was set up as an agency of the Department of Trade and Industry in April 2000. Contracts were exchanged with a national network of 45 Businesses Link operators (seven in the North West) to provide Business Support to small and medium sized enterprises from April 2001. Before this date Government Support to businesses was provided through Training and Enterprise Councils and the SBS does not have access to this data.

The 887 companies have received assistance on Business Finance, Environmental, E-Services, High Growth, International, Innovation Technology and Design, Micro Support, Supply Chain, and Workforce Development and other Account Management assistance.

Eight companies have received offers of grant from the Research and Development Grant scheme with a total value of £195,000.

Mr. Hendrick: To ask the Secretary of State for Trade and Industry (1) how many new businesses have been established in Preston since 1997; [169672]

(2) how many new businesses have started up in Preston since 1997. [169678]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 2,600 in Lancashire County (which contains the constituency of Preston), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 10,200 business start-ups in Lancashire County in 2003. Data for counties are not available for before 2003.

DTI figures based solely on VAT registrations for Preston local authority and South Ribble local authority (parts of both include the constituency of Preston) are shown in the table for the period 1997 to 2002. Data for 2003 will be available in Autumn 2004.

VAT registrations: 1997–2002

	1997	*1998*	*1999*	*2000*	*2001*	*2002*
Preston	465	420	410	395	365	345
South Ribble	275	300	255	280	240	250

Source:

Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Software Patents Directive

Brian White: To ask the Secretary of State for Trade and Industry what the Government's stance is on the proposed EU Software Patents Directive. [171107]

Ms Hewitt: The Government continues to support the thrust of the proposal put forward by the European Commission for a Directive on the patentability of computer-implemented inventions that clarifies the existing position and reduces uncertainty in this field. Recent discussions on this subject have taken place between my officials and officials of other Member States with a view to a discussion in the Competitiveness Council on 17 and 18 May 2004. My Department continues to work with interested parties and other Member States to achieve a Directive that offers benefits for both innovators and users of this technology in the UK and Europe.

Steel Industry

Bob Spink: To ask the Secretary of State for Trade and Industry what assessment she has made of the *(a)* level and *(b)* effects on the UK steel industry of steel dumping in Europe; and if she will make a statement. [167847]

Mr. Timms: None. Complaints about dumping in the European Union relating to steel or any other product and its effects on the Community industry, including the UK, are assessed by the European Commission against the criteria laid down in the EC's Basic Anti-dumping Regulation. The European Commission determines whether dumping has occurred and the extent to which the industry has been injured. If it finds dumping and injury, it may recommend anti-dumping measures which usually take the form of additional duties. It is then up the Member States, including UK government officials, to support or oppose any Commission recommendation for anti-dumping measures.

Sub-post Offices (Leicester)

Mr. Dorrell: To ask the Secretary of State for Trade and Industry (1) how many *(a)* benefit, *(b)* postal order and *(c)* Girobank transactions were completed in each of the last five financial years by the sub-post offices at (i) 30 Went Road, Birstall, Leicester and (ii) 778 Melton Road, Thurmaston, Leicester; [170638]

(2) what the cost to Post Office Ltd. was in each of the last five financial years of keeping open the sub-post offices at *(a)* 30 Went Road, Birstall, Leicester and *(b)* 778 Melton Road, Thurmaston, Leicester. [170639]

Mr. Timms: These are operational maters for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Sustainable Energy

Sir Archy Kirkwood: To ask the Secretary of State for Trade and Industry what plans she has to promote sustainable technologies to generate power supplies in future. [169370]

Nigel Griffiths: The Government's target for renewables is that, by 2010, 10 per cent. of our electricity sales will come from renewable sourced electricity. The target is challenging as we are starting from a low base.

The Government's main policy mechanism for achieving the target is the Renewables Obligation (and Renewables Obligation Scotland) Introduced in April 2002, it places an obligation on all licensed electricity suppliers to supply a specified and growing proportion of their sales from electricity generated from a range of eligible renewable sources.

Through the Renewables Obligation (RO), we are looking to accelerate the development of renewables in a wide range of sources and technologies. In order to encourage a more vigorous and diverse renewable energy sector, the Government has allocated a total of £350 million over four years for capital grants and research grants to promote forms renewable energy that are further from becoming commercially competitive. This includes among other things grants of £117 million for offshore wind, £66 million for energy crops and biomass, £25 million for solar photovoltaics (PV), £10 million for community schemes and £5 million for wave and tidal demonstration projects.

The Government additionally has a target of achieving at least 10 gigawatts of good Quality combined heat power (CHP) capacity by 2010 and published its Strategy for CHP to 2010 on 26 April of this year confirming its continued aim towards that target. CHP is a highly fuel-efficient energy technology which (puts to use waste heat produced as a by-product of the electricity generation process and) can make a significant contribution to the UK's sustainable energy goals.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what plans she has to make a statement on the first annual report on sustainable energy; and what form such a statement will take. [170279]

Mr. Timms: My right hon. Friend the Secretary of State for Environment, Food and Rural Affairs, wrote on 26 April to Mr. Speaker, the hon. Member for Maidenhead (Mrs. May) and the hon. Member for Lewes (Norman Baker) informing them that the Government was publishing on that day the first annual report on the Energy White Paper, among other documents, and that copies of the report had been placed in the Libraries of the House. My right hon. Friend also made a written ministerial statement on 27 April 2004, *Official Report*, column 37WS, announcing that the annual report had been published and that copies had been placed in the Libraries of the House.

My right hon. Friend the Secretary of State for Trade and Industry has no plans to make a further statement.

Tokamak Experimental Reactor

Mr. Watson: To ask the Secretary of State for Trade and Industry if she will make a statement on progress being made to build the International Tokamak Experimental Reactor. [170165]

Ms Hewitt: The international partners are trying to reach a compromise on the two proposed locations for ITER that will be acceptable to the whole ITER partnership. Extensive negotiations are also taking place between the candidate hosts Europe and Japan to see whether the issue can be resolved bilaterally.

Unsolicited Faxes

John Robertson: To ask the Secretary of State for Trade and Industry what steps her Department is taking to protect consumers from unsolicited faxes. [171348]

Mr. Timms: Individual subscribers are offered protection from unsolicited direct marketing faxes under the Privacy and Electronic Communications (EC Directive) Regulations 2003 and the sending of such faxes is prohibited unless individuals have given their prior consent.

Corporate subscribers are protected from receiving unsolicited direct marketing faxes if they have previously notified the sender that they do wish to receive such faxes or have been registered for at least 28

days with the Fax Preference Service (FPS), which is an "opt-out" scheme and is run on Ofcom's behalf by the Direct Marketing Association.

Utilities (Disconnections)

Jonathan Shaw: To ask the Secretary of State for Trade and Industry what assessment she has made of the benefits of expanding the moratoria on disconnections for vulnerable groups beyond the winter months; and if she will make a statement. [171315]

Nigel Griffiths: Last month, Ofgem issued an industry consultation paper that set out proposed revisions to, and clarification of, the arrangements for gas and electricity disconnections. This should ensure that vulnerable customers are not, in the future, disconnected. I very much welcome this development, which will benefit vulnerable customers throughout the year.

West Lancashire

Mr. Pickthall: To ask the Secretary of State for Trade and Industry how many businesses have started up in West Lancashire since 1997. [171725]

Nigel Griffiths: Barclays bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 2,600 in Lancashire county (which contains the constituency of West Lancashire), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 10,200 business start-ups in Lancashire county in 2003. Data for counties are not available for before 2003.

DTI figures based solely on VAT registrations for West Lancashire local authority (which contains the constituency of West Lancashire) are shown as follows for the period 1997 to 2002. Data for 2003 will be available in autumn 2004.

VAT registrations: 1997–2002

West Lancashire	*Number*
1997	260
1998	245
1999	290
2000	265
2001	285
2002	265

Source:

Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were-registered for VAT at the start of 2002.

PRIME MINISTER

Departmental Procurement

Michael Fabricant: To ask the Prime Minister what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Office over the last five years is of British manufacture. [170806]

The Prime Minister: I refer the hon. Member to the answer given by my right hon. Friend the Minister for the Cabinet Office (Mr. Alexander) today, *Official Report*, 10 May, c. 4W.

Dr. Salim Abu Hunak

Mr. Drew: To ask the Prime Minister whether he raised the case of Dr. Salim Abu Hunak, held in Abu Salim Prison in Tripoli, when he recently met Colonel Gadaffi; and what action the Government is taking to make progress towards the release of Dr. Hunak. [171645]

The Prime Minister: My discussions with Colonel Gadaffi on 25 March focused on international and regional security issues.

We are aware of the case of Salem Abu Hanak and are monitoring developments.

We remain concerned about Libya's human rights record and will continue to press Libya to implement its recent announcements to sign international agreements against torture and abolish the "People's Courts".

Early Retirement

Bob Spink: To ask the Prime Minister how many employees in his office took early retirement in the last financial year; and at what total cost. [171729]

The Prime Minister: None.

House of Lords

Mr. Gregory Campbell: To ask the Prime Minister if he will list the peers appointed since 1997 who are members of Northern Ireland political parties, broken down by party. [171741]

The Prime Minister: Since the beginning of 1997, five Ulster Unionist Party working peers have been appointed: Lord Molyeaux of Killead, Lord Rogan, Lord Laird, Lord Maginnis of Drumglass and Lord Kilclooney.

House of Lords Appointments Commission

Lady Hermon: To ask the Prime Minister how many times the House of Lords Appointments Commission has met since its formation. [172009]

The Prime Minister: The full House of Lords Appointments Commission has met 26 times since its formation.

Menus

Mr. Sanders: To ask the Prime Minister whether he is consulted on the menus at functions where he is the host. [171779]

The Prime Minister: Catering at official functions held at No. 10 Downing Street is provided by a variety of approved caterers. Menus are created to suit the nature of the function and to take into account the dietary needs of guests.

WALES

Departmental Annual Report

Norman Lamb: To ask the Secretary of State for Wales how much the production of his Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171082]

Mr. Touhig: The 2004 Wales Office Annual Report cost £11,515. The minimum order of 250 copies were printed for the Wales Office, of which 112 copies were provided free of charge to: all Welsh MPs; all members of the Welsh Affairs Committee; all Assembly Members; the Secretaries of State for Scotland, Northern Ireland and the Department for Constitutional Affairs; the Conservative Shadow Secretary of State for Wales; and, the Permanent Secretaries of the National Assembly for Wales and the Department for Constitutional Affairs. A further four copies were laid in the House.

The Stationary Office (ISO) also printed a further 600 copies for their own stores. As the report has only recently been published, TSO are unable to provide figures on purchases from their stores.

Farming

Llew Smith: To ask the Secretary of State for Wales how many farms in Wales, comprising what land areas and in what locations, have restrictions applied to them in respect of land use as a result of the residual radioactivity from the Chernobyl nuclear accident. [169879]

Mr. Touhig: The figures show the number of farms in Wales, their location and area of land covered by restrictions on the movement of sheep, as a result of the residual radioactivity from the Chernobyl nuclear accident. There have been no restrictions on land use as a result of the Chernobyl accident.

Restrictions in Wales at 30 April 2004[1]

Number of farms	359
Land area (hectares)	53,000
Location	Snowdonia, North Wales

[1] Statistics provided by the Food Standards Agency

Mold Flood Alleviation Scheme

Mr. Wiggin: To ask the Secretary of State for Wales what discussions he has had with the National Assembly for Wales Government about providing exceptional costs to implement the Mold Flood Allevation Scheme; and if he will make a statement. [169774]

Mr. Touhig: I understand that the National Assembly has made £3.713 million available to the Environment Agency, this financial year, to support flood defence works within its approved programme. It is up to the Agency to determine priorities within its budget. The Agency is currently reviewing its capital programme, to see how it can maximise the funding available for the Mold scheme.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Wales (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions his Department received in (i) the 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month; [170762]

(2) what proportion of *(a)* Ordinary Written Questions to his Department were answered within five sitting days of tabling and *(b)* Questions for a Named Day received a substantive answer on that day in (i) 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month. [170763]

Mr. Touhig: The information is not available in the format requested. However, during session 2002–03 the following parliamentary questions were tabled:

290 (Ordinary Written Questions) of these 41 per cent. were answered within five sitting days.

42 (Named Days) of these 61.9 per cent.were answered on the specified date.

For 2003–04:

91 (Ordinary Written Questions) of these 52.7 per cent. were answered within five sitting days.

6 (Named Days) of these 100 per cent. were answered on the specified date.

DEPUTY PRIME MINISTER

Business Rate

Harry Cohen: To ask the Deputy Prime Minister what plans he has to take steps to enable business rate income to remain with local authorities; how much business rate was collected by the London Borough of *(a)* Waltham Forest and *(b)* Redbridge in the last year for which figures are available; and if he will make a statement. [171445]

Mr. Raynsford: The amounts of business rates collected in 2002–03, the most recent year for which figures are available, are:

(a) London Borough of Waltham Forest: £35.412 million

(b) London Borough of Redbridge: £38.511 million

These figures are taken from the QRC4 return from each authority.

The Office of Deputy Prime Minister is planning to introduce the Local Authority Business Growth Incentives scheme from April 2005. This scheme will allow retention of some business rates revenue by local authorities whose areas experience business rates

growth above a predetermined threshold. We shall issue a consultation paper about the preferred scheme in the summer.

The Balance of Funding Review, which I chair, has received evidence for and against the complete return of business rates to local authority control. The Review is due to report in the summer.

Business Rates (Chorley)

Mr. Hoyle: To ask the Deputy Prime Minister how much was collected in business rates in Chorley in each of the last three years. [172108]

Mr. Raynsford: The figures for National Non Domestic Rates (NNDR) collected in Chorley in each of the last three years are tabled as follows:

£

	In year collection
2001–02	16,300,841
2002–03	16,824,868
2003–04	16,672,318

The figures for 2003–04 have been calculated, but as yet not audited and certified by the Audit Commission.

Committee of the Regions

Ann Winterton: To ask the Deputy Prime Minister whether the representatives to the Committee of the Regions will come from the elected members to the proposed regional assemblies. [171782]

Mr. Raynsford: At present, in addition to nominations received from the Local Government Association, each English regional chamber and the Greater London Authority nominate one member and one alternate to be proposed by the Government as English members of the Committee of the Regions.

As stated in the White Paper, Your Region, Your Choice: Revitalising the English Regions (Cm 5511—May 2002), the Government intends that in those regions where an elected regional assembly is established, the assembly will take the role for its region currently exercised by the regional chamber. The Office of the Deputy Prime Minister will consult on the detail of the nomination process in advance of nominations for the committee to be instituted in 2006.

Council Tax (Greater London)

Simon Hughes: To ask the Deputy Prime Minister what estimate he has made of the total of unpaid council tax in Greater London, broken down by borough, in each year since 1997. [170502]

Mr. Raynsford: Tabled are figures for the amounts of council tax payable for each financial year from 1996–97 to 2002–03 that had not been collected by the end of the year to which they related.

Amounts of council tax uncollected at the end of the financial year

£ thousand

Amounts of council tax uncollected at the end of the financial year

£ thousand

	1996–97	1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03
Richmond upon Thames	1,564	1,507	2,187	2,100	2,134	1,886	2,040
Sutton	720	1,039	1,323	1,303	1,366	1,553	1,673
Waltham Forest	3,378	3,738	5,659	6,066	6,357	5,313	4,141
Total Outer London	57,060	59,585	64,009	72,243	71,668	70,245	72,864
Total Greater London	116,602	116,546	121,744	132,875	132,233	126,506	127,462

[1] Amounts relate only to the financial year shown: arrears carried forward from earlier years are not therefore included.

In addition, the total level of council tax arrears includes amounts uncollected from previous years. Reliable figures for these are not currently available for individual local authorities. It is estimated, however, that nationally, the level of arrears carried forward from previous years is currently equal to approximately twice the amount not collected in-year.

Emergency Vehicles (Speed Cameras)

Simon Hughes: To ask the Deputy Prime Minister if he will list *(a)* the official meetings he has had with the Mayor of London since July 2000 and *(b)* the dates and subject of each meeting. [170567]

Yvette Cooper: My right hon. Friend the Deputy Prime Minister has had no official meeting with the Mayor of London since July 2000.

Mr. Hancock: To ask the Deputy Prime Minister what recent discussions he has had with the Secretary of State for the Home Department on the cost to fire and rescue authorities of dealing with the paperwork resulting from fire engines on emergency calls captured on speed cameras contravening speed limits. [170734]

Mr. Raynsford: None.

Mr. Hancock: To ask the Deputy Prime Minister (1) on how many occasions in each of the last 12 months fire authority vehicles on emergency calls have been captured on speed cameras contravening speed limits in each fire and rescue authority; [170735]

(2) how many administrators were involved, and at what annual cost, in each fire and rescue authority to deal with paperwork resulting from emergency vehicles captured on speed cameras contravening speed limits. [170732]

Mr. Raynsford: The information requested is not held centrally, and could be provided only at disproportionate cost.

Fire Authority Precepts

Mr. Michael Foster: To ask the Deputy Prime Minister (1) how many complaints he received about the precepts of combined fire authorities for 2004–05 between 10 February and 28 April; [171404]

(2) how many complaints he received about the Hereford and Worcester Combined Fire Authority's precept for 2004–05 between 10 February and 28 April. [171405]

Mr. Raynsford: Over the last three months the Office of the Deputy Prime Minister has received a large volume of correspondence about council tax, some covering specific local authorities and others about the council tax system in general. The information requested could be provided only at disproportionate cost.

Football Stadium, Falmer

Norman Baker: To ask the Deputy Prime Minister pursuant to the answer of 19 April, *Official Report*, column 348W, on the football stadium, Falmer, if he will define the nature of representations received following the closure of the inquiry into the proposal for a football stadium at Falmer, East Sussex, which he deems to be relevant in his consideration of the report from his planning inspector. [171513]

Keith Hill: The Inspector's report into the applications made by Brighton and Hove Albion Football Club Ltd. for a new stadium at Falmer is currently before the First Secretary of State, my right hon. Friend the Deputy Prime Minister for decision, which will be made on the basis of all the available evidence. Representations received after the close of the public inquiry will be taken into account, so far as they are relevant, in making that decision. For reasons of procedural propriety, it is not possible to discuss the nature of the post-inquiry representations received. However, it will be clear from the decision letter what matters have been taken into account and the weight that has been accorded to any particular matter.

My right hon. Friend the Deputy Prime Minister is currently engaged in a reference back exercise where he is inviting comments from the relevant parties about issues arising since the close of inquiry. Representations made in relation to this exercise will be copied to those parties. Given the hon. Member's interest in the case, copies of the reference back correspondence will be sent to the hon. Member.

My right hon. Friend the Deputy Prime Minister will take into account all comments received in making his decision.

Norman Baker: To ask the Deputy Prime Minister on what date he received the report from his planning inspector into the proposal for a football stadium at Falmer, East Sussex; and for what reasons he has not yet announced his decision. [171540]

Keith Hill: The Inspector's report into the applications by Brighton and Hove Albion Football Club Ltd. was received by the First Secretary of State, my right hon. Friend the Deputy Prime Minister on 11 December 2003.

A decision has yet to be made because my right hon. Friend the Deputy Prime Minister is currently engaged in a reference back exercise in relation to this case, which was initiated on 19 March 2004. Comments from the relevant parties about issues arising since the close of inquiry have been invited, specifically representations received about the draft Brighton and Hove Local Plan. It is my right hon. Friend the Deputy Prime Minister's view that this exercise will enable him to take a more fully informed decision. It should not be read as an indication of my right hon. Friend the Deputy Prime Minister's attitude to the proposals generally one way or the other.

My right hon. Friend the Deputy Prime Minister will take into account all comments received in making a decision on the application. Given the hon. Member's interest in the case, copies of the reference back correspondence will be sent to the hon. Member.

Green Belt

Norman Baker: To ask the Deputy Prime Minister what acreage of land identified as green belt in 1997 has been subsequently declassified, broken down by county; and what acreage classified as non-green belt in 1997 has since been classified as green belt, broken down by county. [171539]

Keith Hill: The hectares of land classified as non-Green Belt in 1997 but classified as Green Belt in 2003 and land declassified as Green Belt between 1997 and 2003 are tabled as followed.

Changes to the extent of Green Belt in England: 1997—2003
hectares

	New classified Green Beltland	*Declassified Green Beltland*
Berkshire	10	0
Cheshire	1,080	0
Derbyshire	0	60
Dorset	160	0
Durham	280	0
Essex	160	0
Hertfordshire	20	30
Kent	0	20
Lancashire	3,850	270
London	0	20
Merseyside	0	160
North Yorkshire	760	60
Northumberland	12,810	0
Nottinghamshire	0	190
Somerset	120	0
South Yorkshire	670	0
Staffordshire	130	0
Surrey	110	50
Tyne and Wear	0	110
West Midlands	200	0
West Yorkshire	0	340
Total	20,360	1,310

Housing

Mr. Meacher: To ask the Deputy Prime Minister what assessment he has made of the effect of the Starter Homes Initiative on the residents of Oldham, West and Royton. [170878]

Keith Hill: I refer my right hon. Friend to the answer given on 29 April 2004, *Official Report*, column 1228W.

Mr. Pickthall: To ask the Deputy Prime Minister if he will make a statement on his assessment of how the change in the level of council funding for housing has affected the residents of West Lancashire since 1997. [171546]

Keith Hill: Since 1997 allocations of capital funding to local authorities for housing purposes have risen consistently by about 15 per cent. per annum on average. This includes the Major Repairs Allowance we introduced in 2001–02 specifically for the improvement of local authority stock alongside the Decent Homes standard which sets out minimum standards to be met by 2010. West Lancashire's allocations in the period 1997 to 2003–04 have risen by over 300 per cent. In addition to this welcome increase there has been support through the Community Housing Task Force and Government Office for the North West that has helped the local authority and its tenants to choose the best strategy for long term improvement.

16 local authorities in the North West have transferred all their stock, and five local authorities have transferred part of their stock. This has unlocked £1,739 million in private finance, of which £553 million has gone to local authorities in capital receipts, with the remaining £1,186 million going directly into renovating and maintaining the transferred properties. Four local authorities have schemes on the programme that have not yet transferred, three of which have had positive ballot results. Ellesmere Port and Neston, Halton, Hyndburn, Macclesfield and West Lancashire have been granted places on the 2004 programme.

Ms Oona King: To ask the Deputy Prime Minister when he plans to announce the decision on the 2004 housing stock transfer programme. [171266]

Keith Hill: I refer my hon. Friend to the written statement made by my right hon. Friend the Deputy Prime Minister on 5 May 2004, *Official Report*, column 80WS.

Ordnance Survey

Mr. Sayeed: To ask the Deputy Prime Minister how much money from Government *(a)* grants and *(b)* contracts, Ordnance Survey has used to support its commercial aerial activities. [153755]

Yvette Cooper: None.

Mr. Sayeed: To ask the Deputy Prime Minister for what reason Ordnance Survey rejected Getmapping's bid for the Millennium Map to be adopted as the Imagery Layer in Digital National Framework in November 2001. [153757]

Yvette Cooper: Ordnance Survey takes third party data into its databases only after full and careful consideration of content, quality, price and management of intellectual property rights associated with the data

being evaluated. The OJEU process is always used for this purpose when there are alternative sources. To ensure value for money, the costs, benefits and quality of Ordnance Survey's own in-house capability is taken into consideration in these evaluations.

The reasons for rejecting particular third party data are confidential between Ordnance Survey and the third party.

Mr. Sayeed: To ask the Deputy Prime Minister how many sales Ordnance Survey made of the Millennium Map during the period of its contract as a re-seller of the map. [153759]

Yvette Cooper: Ordnance Survey gave notice to terminate its contract with Getmapping for distribution of Getmapping products in April 2002.

Statistics of commercial sales of partners' products by Ordnance Survey are confidential between Ordnance Survey and its partners.

Planning

John Mann: To ask the Deputy Prime Minister what the key performance indicators for local authorities are for the delegation of planning decisions to officers. [171432]

Keith Hill: The Local Government Association and the Office of the Deputy Prime Minister have jointly published revised guidance on schemes of delegation. The document is called "Delivering Delegation" and apart from re-affirming policy on delegation, the document also details the types of decisions that can be delegated and provides best practice models of delegation schemes. This is agreed to be a more effective way of ensuring appropriate levels of delegation than measurement through a formal performance indicator.

Regional Assemblies

Mr. Jenkin: To ask the Deputy Prime Minister if he will list the current and projected elements of the Your Say campaign; and what the total estimated cost is of each. [169259]

Mr. Raynsford: I refer the hon. Member to the answer given on 19 April 2004, *Official Report*, column 366W.

Ann Winterton: To ask the Deputy Prime Minister what security the proposed regional assemblies would have to give in order to borrow cash. [171498]

Mr. Raynsford: The Office of the Deputy Prime Minister expects the provisions on security for money borrowed by elected regional assemblies to be similar to those for local authorities following the Local Government Act 2003.

Swarcliffe Pathfinder Scheme

Colin Burgon: To ask the Deputy Prime Minister when he expects final approval to be given for the Pathfinder Scheme for Swarcliffe to proceed. [171758]

Keith Hill: Final approval for the Swarcliffe scheme to proceed will be issued following the submission and approval of the Scheme's Final Business Case.

NORTHERN IRELAND

Castlereagh College

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what action has been taken to ensure Castlereagh College is able to offer assistance and training to people who face redundancy in the Castlereagh/East Belfast and Strangford areas; and if he will make a statement. [171028]

Mr. Spellar: As part of its role in supporting local economic development, Castlereagh College is well placed to offer assistance and training to people facing redundancy in the Castlereagh, East Belfast and Strangford areas. Of particular relevance is the College's new service, "Conexus" which links the College's vocational, employability and business programmes. The range of services offered by Conexus includes:

individual career advice and guidance;

individual guidance on learning and retraining opportunities;

identification of learning needs and the development and delivery of tailored solutions;

a range of programmes to enhance employability and provide qualifications linked to industry's needs; and

extensive links with other economic agencies and local employers.

Cigarettes

Mr. Beggs: To ask the Secretary of State for Northern Ireland (1) when he expects to reply to the questions, reference *(a)* 159955 and *(b)* 159956, tabled by the hon. Member for East Antrim on 8 March 2004; [172047]

(2) how many container loads of cigarettes have been reported stolen in Northern Ireland in the last 12 months for which records are available; [159956]

(3) what the *(a)* total number of cigarettes and *(b)* total amount of tobacco seized by Customs and Excise in Northern Ireland was in the last 12 months for which records are available. [159955]

Mr. Pearson: I am sorry for the delay in replying.

Regarding the number of container loads of cigarettes stolen in Northern Ireland (question reference 159956), a substantial search of records is required to collate the information requested. I will write to the hon. Gentleman with this information once it is available. A copy of the letter will be placed in the Library.

The total quantity of cigarettes and hand rolling tobacco seized by Customs in 2002–03 (question reference 159955) is set out in the Annual Report of the Commissioners of HM Customs and Excise published in December 2003, copies of which are available in the House of Commons Library. The location of a seizure is by no means an indication of the location of the illicit market for which they are bound. Specifically in Northern Ireland in 2002–03 Customs seized 31.5 million cigarettes and 731 kilos of hand rolling tobacco.

Disabled People (Education)

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what provision is being made to assist disabled people in undertaking courses at each of Northern Ireland's universities. [171004]

Mr. Gardiner: The Department for Employment and Learning has in place a number of specific actions designed to promote access to Higher Education by students with disabilities. These include a funding premium, special project funding and capital funding. The universities might, for example, use this funding to provide specialist equipment or specific support for students with a disability.

The Department also provides the universities with special project funding under the "Improving Provision for Disabled Students" initiative. Queen's University Belfast (QUB) has received special project funding to support a Disability Services Co-ordinator, and to support a project entitled "To Enhance Employment opportunities for Students with Disabilities". The University of Ulster (UU) has received special project funding to establish, in partnership with QUB Institute, a register of freelance professional and non-professional support workers, including dyslexia support workers, readers and notetakers, to assist students with disabilities.

QUB and UU have received Disability Capital Funding from the Department, which is aimed at assisting the universities in funding essential capital works to provide, for example, ramps, lift adaptations, disabled toilets, carparking for the disabled, alarm system adaptations for the deaf and visually impaired and automatic doors.

Energy Efficiency

Mr. Beggs: To ask the Secretary of State for Northern Ireland what measures are in place to encourage energy efficiency in Northern Ireland. [168191]

Mr. Gardiner: Statutory responsibility for energy efficiency in Northern Ireland is shared between a number of Government Departments and Agencies which have committed approximately £16 million in programmes sponsored during 2003. In addition the private sector is also playing an active role.

The Department of Enterprise Trade and Investment is responsible for overall energy policy, including the development of a strategic and co-ordinated approach to energy efficiency. In addition, Invest NI promotes energy efficiency in the industrial and commercial sectors and provides a programme of support to businesses. During January 2004 Invest NI ran the Northern Ireland Energy Show attended by almost 1,000 delegates. A programme of 10 master classes, facilitated by industry experts, supported the exhibition.

The Department for Social Development has lead responsibility for energy efficiency in the domestic housing sector, working closely with the Northern Ireland Housing Executive. Details of the housing measures are contained in the Home Energy Conservation Report which is published annually and copied to all Northern Ireland MPs and MLAs. A copy is available in the Library.

Northern Ireland Electricity manages the Customer Energy Efficiency Levy programme, with an annual fund of approximately £3.8 million, 80 per cent. of which is used for 'whole house' solutions in homes that are likely to be at risk from fuel poverty.

The Energy Savings Trust funds two Energy Efficiency Advice Centres which provide free and impartial energy advice to domestic consumers.

The Carbon Trust, with funding support from Invest NI, manages the "Action Energy" programme, including promotional events, advice on energy efficiency best practice, and interest free loans for energy efficiency projects to small and medium enterprises (SMEs). Over the past three years, through over 800 energy audits with North Ireland businesses, the Action Energy programme has identified energy savings in excess of £30 million.

The Department of Finance and Personnel operates a programme of energy efficiency measures in the public sector that includes the:

Benchmarking of each building occupied by a public body for its energy performance and emissions of carbon dioxide;

Provision of additional funding to enable public bodies to implement energy saving improvements to buildings which cannot be funded from normal budget allocations;

Provision of training courses in energy awareness and management for relevant staff throughout all Government Departments; and

Purchase of electricity generated from renewable sources (green electricity) where this represents value for money.

Football

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make it his policy not to draw from the £8 million Soccer Strategy budget the money required to bring the Windsor Park stadium up to the required standard to permit the World Cup qualifying matches against England and Wales to be held at the stadium. [170202]

Angela Smith: To date, no element of the £8 million Soccer Strategy budget has been earmarked for Windsor Park. However, an indicative sum of £3 million has been earmarked from Soccer Strategy monies for playing facilities generally. Bringing Windsor Park up to the required standard for the World Cup qualifiers against England and Wales could be considered as part of the playing facilities component of the Strategy but I would emphasise that responsibility for resolving any deficiencies at Windsor Park, and identifying appropriate sources of funding for that purpose, rests with the IFA and the owners of the venue.

Lady Hermon: To ask the Secretary of State for Northern Ireland how much money has been allocated to bring Windsor Park stadium up to the required standard to permit the World Cup qualifying matches against England and Wales to be held at the stadium. [170203]

Angela Smith: Responsibility for bringing Windsor Park stadium up to the required standard to permit the World Cup qualifiers against England and Wales to be held at the stadium rests with the governing body of Football in Northern Ireland, the Irish Football Association (IFA), and the owners of Windsor Park, Linfield FC. As no request for Government funding has been received either from the IFA or Linfield FC for this purpose, no Government money has been allocated.

Lady Hermon: To ask the Secretary of State for Northern Ireland what the nature is of the relationship between Windsor Park and the Northern Ireland international football team in relation to the staging of international fixtures. [170205]

Angela Smith: Responsibility for staging international football matches rests with the Irish Football Association (IFA). Under an agreement, between Linfield Football Club and the IFA the home internationals are staged at Windsor Park.

Lady Hermon: To ask the Secretary of State for Northern Ireland what Government assistance has been provided for the Irish Football Association's youth development programme through its School of Excellence. [170244]

Angela Smith: Government has provided via the Sports Council for Northern Ireland, a £1.6 million funding package for the Irish Football Association's (IFA) Youth Development Programme over a three-year period. This funding package is directed to the IFA's Football Development Centres rather than a School of Excellence. So far 25 youth Football Development Centres, have been established across Northern Ireland with a total spend of £1.2 million to date.

Independent Monitoring Commission

Bob Spink: To ask the Secretary of State for Northern Ireland what sanctions are available to the Government regarding the Independent Monitoring Commission Report and its conclusions in respect of Sinn Fein. [170455]

Mr. Spellar: Under the Northern Ireland Act 1998, as amended by the Northern Ireland (Monitoring Commission etc.) Act 2003 and the Northern Ireland Act 1998 and Northern Ireland Act 2000 (Modification) Order 2004 (S.I. 2004/1164), my right hon. Friend the Secretary of State for Northern Ireland, may take steps to reduce financial assistance to Assembly parties or the pay of Members of the Assembly for a period of up to 12 months if *(a)* the Monitoring Commission has made a report containing a recommendation about steps which are steps that the Assembly might consider taking were section 1 of the Northern Ireland Act 2000 not in force; and *(b)* the taking of those steps would have required the passing of an Assembly resolution in relation to a political party.

The Secretary of State must also be satisfied either that the party in question is not committed to non-violence and exclusively peaceful and democratic means; or that the party is not committed to such of its Members as might become Ministers or junior Ministers observing the other terms of the pledge of office.

La Mon Bombing

Mr. Beggs: To ask the Secretary of State for Northern Ireland pursuant to the answer of 30 March 2004, *Official Report*, column 1332W, whether search and log records for the night of 17 February 1978 have been retained in a location other than within the investigations file and HM Coroner's reports relating to the La Mon bombing. [165692]

Mr. Pearson: Further to the answer that my right hon. Friend (Jane Kennedy) gave the hon. Gentleman on 30 March 2004, *Official Report*, column 1332W, I am advised that further inquiries have been carried out as a result of the hon. Gentleman's Question by the District Commander of Castlereagh into the retention of any search records and logs for the La Mon bombing in 1978. The inquiries were carried out in Castlereagh District Command Unit, Ards District Command Unit and in other DCUs where persons were arrested in connection with the incident, however no search records or logs have come to light.

I understand that force policy in respect of search records was first issued in 1983.

Lyric Theatre (Belfast)

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment he has made of the amount of Lottery Art Fund money being made available for the re-development of the Lyric Theatre in Belfast. [168471]

Angela Smith: Since 1996 the Arts Council Lottery Fund has made awards totalling £95,000 towards proposals for the re-development of the Lyric Theatre. The Council also awarded £2 million in-principle in December 2003 towards the costs, estimated at £117 million, of rebuilding the Theatre on its current site. With an annual income of approximately £7 million (dependent on ticket sales) the Arts Council is not in a position to make large capital awards.

Decisions on individual arts lottery awards are a matter for the Arts Council and are made independently of Government, although I welcome the awards made.

The current condition of the Lyric Theatre is one of a number of identified weaknesses in Belfast's arts infrastructure. My Department is working with the Arts Council to develop an investment strategy for addressing these deficiencies, building on the lottery funding already committed by the Arts Council.

National Stadium

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on *(a)* the progress with the search for a site for the proposed National Stadium for Northern Ireland and *(b)* the proposed timescale of the project. [170242]

Angela Smith: Recently, I invited the Strategic Investment Board (SIB) to undertake a robust business planning exercise to consider whether a multi-sports stadium to accommodate Soccer, Rugby and Gaelic Games is a long-term, commercially viable proposition in revenue terms. The issue of location is not being addressed at this stage but may be considered if the viability of a multi-sports stadium is established.

Planning Policy

Lady Hermon: To ask the Secretary of State for Northern Ireland what progress has been made in reviewing the remit and powers of the Planning Appeals Commission; and if he will make a statement. [169921]

Angela Smith: The Planning Appeals Commission (PAC) was subject to a quinquennial review during 2002 and the report of that review is available on the OFMDFM website (http://www.ofmdfmni.gov.uk/pac/pacreport/index.htm).

The purpose of the quinquennial review was to consider three main issues: the need for the functions performed by the PAC, organisational options for delivery of these functions and the performance of the PAC in meeting the needs identified.

There are no plans at present to conduct a further review.

Police Service

Lady Hermon: To ask the Secretary of State for Northern Ireland whether the Police Service of Northern Ireland will be adopting the colour vision requirements arising from his Department's review of the medical assessment process for police recruits. [170204]

Mr. Pearson: The Home Office undertook a review of police recruitment medical standards. Part of this work entailed a review of the eyesight standards relating to both visual acuity and colour vision. The work was completed last year and the recommendations introduced in England and Wales.

When the new standard was introduced PSNI considered the findings. An area of concern centred on the fact that the new standards took no cognisance of handling firearms safely since this is not a requirement for officers in England and Wales.

It was therefore decided not to adopt the new standard until the particular circumstances pertaining to PSNI were reviewed. A research project has been established to ascertain the justifiable requirements for visual standards for recruits to PSNI.

PSNI are presently awaiting the findings of this research, which will be considered in association with the standards in England and Wales.

Policing Board

Mr. McNamara: To ask the Secretary of State for Northern Ireland how many meetings of *(a)* the Northern Ireland Policing Board, *(b)* its sub-committees and *(c)* other events related to their membership each member of the board (i) was entitled to attend and (ii) actually attended. [170406]

Mr. Pearson: The information requested in respect of meetings of the Northern Ireland Policing Board is detailed in the following table.

In respect of the information relating to attendance at sub committees and other events I would invite my hon. Friend to write directly to the Chairman of the Policing Board for Northern Ireland at the following address.

Professor Desmond Rea,
Chairman
Policing Board for Northern Ireland,
Waterside Tower,
31 Clarendon Road,
Clarendon Dock,
Belfast
BT1 3BG.

Attendance at Northern Ireland Policing Board meetings held during the period 4 November 2001 to 30 April 2004

Member	*Number of meetings attended (possible)*
Mr. Alex Attwood	28 (29)
Mr. Denis Bradley (Vice Chairman)	28 (29)
Viscount Brookeborough	25 (29)
Mr. Joe Byrne	27 (29)
Mr. Fred Cobain	28 (29)
Mr. Ivan Davis	5 (5)
Mr. Brian Dougherty	27 (29)
Mr. Sam Foster	23 (24)
Mr. Barry Gilligan	28 (29)
Mr. Willie Hay	26 (29)
Mr. Tom Kelly	21 (29)
Lord Kilclooney	18 (29)
Mr. James Leslie	5 (5)
Mrs. Pauline McCabe	28 (29)
Mr. Alan McFarland	24 (24)
Mr. Eddie McGrady	22 (29)
Mrs. Rosaleen Moore	25 (29)
Mr. Ian Paisley Jnr.	29 (29)
Prof Desmond Rea (Chairman)	29 (29)
Mr. Suniel Sharma	21 (29)
Mr. Sammy Wilson	29 (29)

Notes:

1. The total number of board meetings that it would have been possible for each member to attend is shown in brackets.
2. Mr. Ivan Davis and Mr. James Leslie left the board on 19 February 2002 and were replaced by Mr. Sam Foster and Mr. Alan McFarland on 20 February 2002.

School Transport

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland if he will amend the relevant legislation to reduce the number of pupils Translink is entitled to carry on each school bus journey. [171002]

Angela Smith: Home-to-school bus transport was the subject of an extensive inquiry instigated by the Northern Ireland Assembly's Environment Committee. The Department of the Environment is at present engaged in the initial stages of preparing a Regulatory Impact Assessment of the Committee's main recommendations, including those aimed at reducing the number of children permitted to travel on each bus. The way forward will be considered in the light of findings arising from this exercise.

Tourist Board

Mr. Trimble: To ask the Secretary of State for Northern Ireland how much capital grant has been paid by the Northern Ireland Tourist Board in each parliamentary constituency during the last five years. [170436]

Mr. Pearson: The total capital grant paid by the NITB in each parliamentary constituency during the last five years is as follows.

Financial assistance paid to all tourism projects by constituency

£

Constituency	1999	2000	2001	2002	2003	Total
Across all constituencies and Cross border	5,295	76,143	54,740	34,842	500	171,520
Belfast, East	38,300	2,200	2,000	10,500	26,000	79,000
Belfast, North	213,256	232,515	15,529	5,000	2,000	468,300
Belfast, South	555,579	1,335,651	1,941,769	16,686	13,801	3,863,486
Belfast, West	3,461	20,000	741,500	20,000	0	784,961
East Antrim	4595	74,613	1,004,280	132,330	700	1,252,518
East Londonderry	58,975	680,564	424,041	394,880	30,114	1,588,574
Fermanagh and South Tyrone	490,529	513,891	1,529,299	216,671	3,000	2,753,390

Triple Test (Pregnant Women)

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what guidelines have been issued to each of the Northern Ireland health boards regarding the triple test for pregnant women. [171797]

Angela Smith: I refer the hon. Gentleman to the answer I gave him on 25 March 2004, *Official Report*, column 954W.

CONSTITUTIONAL AFFAIRS

Social Security Appeals

Mr. Frank Field: To ask the Parliamentary Secretary, Department for Constitutional Affairs when he expects the appeal lodged with the social security commissioners by John Sheridan of Birkenhead to be heard. [171444]

Mr. Lammy: Mr. Sheridan's application to set aside the previous Commissioners' ruling of 6 January 2004, which deemed the application for Leave to Appeal to be Out of Time, is currently before a Social Security Commissioner for consideration of the grounds. A notice will be issued to all parties in the coming weeks.

19th Century Census

Mr. Borrow: To ask the Parliamentary Secretary, Department for Constitutional Affairs in which year MyFamily.com. Inc. is likely to make the census for *(a)* 1861, *(b)* 1871, *(c)* 1881 and *(d)* 1891 available on the internet. [171705]

Mr. Leslie: The census returns 1861–1891 for England and Wales are included in the non-exclusive licence granted by the National Archives to MyFamily.com. The timing of the public release of the material covered by non-exclusive licences is entirely a matter for the company concerned.

MyFamily.com has announced on its website that the 1891 Census returns for England and Wales are now available online. The 1871 Census returns are also in the early stages of release on their website. There is currently no information on its website relating to the release of the 1861 or 1881 Census returns.

Mr. Borrow: To ask the Parliamentary Secretary, Department for Constitutional Affairs when the non-exclusive licence was granted to MyFamily.com Inc. to digitise the decennial population census return from 1841 to 1901; and at what rate a royalty charge is made for the licence. [171706]

Mr. Leslie: MyFamily.com was granted a non-exclusive licence agreement with the National Archives to digitise and distribute images of the enumerators' census returns for England and Wales 1841–1891 in June 2002, with a subsequent amendment in September 2002 to include the 1901 Census returns.

In line with HMSO guidelines, the royalty rate for such a non-exclusive licence is a flat 7 per cent. of net revenues.

Crown Courts

Mr. Swayne: To ask the Parliamentary Secretary, Department for Constitutional Affairs what guidance is given to Crown courts regarding the provision of facilities for the press; and if he will make a statement. [171573]

Mr. Leslie: The Court Standards and Design Guide sets out the accommodation requirements for courts and includes provision for a press assembly room at all Crown court centres for use by members of the press attending court. The number of courtrooms in the building determines the size of the room. Dedicated seating for members of the press is also provided within each courtroom. Additional facilities can be made available for the press where there is a specific need, such as when a court is hearing a case attracting high public interest.

Departmental Procurement

Michael Fabricant: To ask the Parliamentary Secretary, Department for Constitutional Affairs

what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170794]

Mr. Leslie: The vast majority of my Department's catering requirements are provided by contracts which include the provision of crockery, cutlery and glassware. When my Department procures these products directly it is done locally, on an ad hoc basis. Detailed information could only be provided at disproportionate cost.

European Constitution Referendum

Llew Smith: To ask the Parliamentary Secretary, Department for Constitutional Affairs what his policy is on the apportionment of public funds to the *(a)* No and *(b)* Yes campaigns on the European Constitution Referendum. [170985]

Mr. Leslie: The Political Parties, Elections and Referendums Act 2000 makes the Electoral Commission responsible for distributing public funds to the designated organisations that will serve as the No and Yes campaigns in any referendum. The legislation provides for grants from the Electoral Commission of up to £600,000 to be distributed to each designated organisation.

Each designated organisation is allowed to send one referendum address free of charge; to use, on application, public rooms such as schools and libraries free of charge for holding public meetings in the 28 days ending with the day before the date of the poll; and is entitled to referendum campaign broadcasts, the length and frequency of which will be determined by the licensing body having regard to any views expressed by the Electoral Commission.

Fine Collection

Mr. Hoyle: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will make a statement on the collection of fines imposed by magistrates' courts in *(a)* Chorley, *(b)* Leyland, *(c)* Preston, *(d)* Blackburn and *(e)* West Lancashire. [172067]

Mr. Leslie: Data on the collection of fines is collected at Magistrates' Court Committee (MCC) level. I am therefore only able to provide data for Lancashire MCC as a whole. There has been a steady improvement in the fine collection performance of Lancashire MCC over the last year. The payment rate stood at 90 per cent. in the last quarter of the 2003–04 financial year, against the national payment rate of 76 per cent. for the same period.

Ms Dari Taylor: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will make a statement on the collection of fines imposed by magistrates' courts in Stockton South. [171463]

Mr. Leslie: Data on the collection of fines is collected at Magistrates' Court Committee (MCC) level. I am therefore only able to provide data for Cleveland MCC as a whole. There has been a steady improvement in the fine collection performance of the Cleveland MCC over the last year. The 2003–04 payment rate stands at 91 per cent. at the end of March 2004 against the national payment rate of 76 per cent. in the last quarter of the 2003–04 financial year.

Older People

Mr. Webb: To ask the Parliamentary Secretary, Department for Constitutional Affairs for what *(a)* initiatives, *(b)* campaigns and *(c)* advisory bodies relating to older people his Department and its predecessor (i) is responsible and (ii) has provided funding since 2001; and what the cost in each year was for each one. [166241]

Mr. Lammy: For the last two years, my Department has been a member of the Employers Forum on Age and paid a subscription of £2,115 in 2002 and again in 2003.

My Department is also responsible for policy on mental incapacity, which affects a significant number of older people, and plans to introduce legislation better to protect those affected by incapacity.

From 1 April, the Public Guardianship Office, whose role is to protect the finances of people with mental incapacity has embarked on a project to raise awareness of its services. Activities are being piloted in Dorset and will include things such as having leaflets in doctors' surgeries, as well as being available to district and practice nurses. Information will also be given to Pension Service staff running pension clinics/surgeries, as well as to relevant local authority staff

Details of other relevant initiatives are provided in the table below:

£

Name of Initiative	*Funding 2001*	*Funding 2002*	*Funding 2003*
Establishment of a mental Incapacity Consultative Forum involving a wide range of stakeholders including organisations representing older people.	—	5,000	5,000
Review and improvement of the procedures for creating Enduring Powers of Attorney (EPAs) to better enable people to plan for the future by delegating decision making about financial affairs to relatives, friends or professionals in the event of loss of mental capacity.	—	No funding involved as the professionals involved in the working group did so on a voluntary basis.	No funding involved as the professionals involved in the working group did so on a voluntary basis.
Research project—The role of the Public Guardianship Office in safeguarding vulnerable adults against financial abuse (Funded by the Public Guardianship Office)	—	—	60,000
Publication of the Draft Mental Incapacity Bill	—	—	Ongoing
Making Decisions Booklet—Planning for future incapacity	—	—	10,000 approx.

FOREIGN AND COMMONWEALTH AFFAIRS

Brazil

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the UK Government has made to the Government of Brazil over its stance on international inspection access to its uranium enrichment facilities. [170864]

Mr. MacShane: As with all other states that have not done so, we regularly urge Brazil to sign and ratify the Additional Protocol to the Nuclear Non-Proliferation Treaty, which covers access to facilities by International Atomic Energy Agency (IAEA) inspectors.

Discussions between the Government of Brazil and the IAEA concerning access are continuing, and we look forward to a satisfactory outcome in due course.

Colombia

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received concerning the plans of President Uribe in Colombia to pass a constitutional amendment in order to allow him to run for a second term; and if he will make a statement. [170239]

Mr. Rammell: Through our Embassy in Bogota we are monitoring the on-going debate within Colombia on the question of allowing a serving or former President to stand for re-election. Clearly such a step must be agreed through the proper constitutional channels. This is an internal matter for the people of Colombia and their elected representatives to decide, and one that would involve a lengthy legislative process including approval from the country's Constitutional Court. In any event, we will continue to work with the democratically elected Government of Colombia on issues of mutual interest.

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations Her Majesty's Government have made to the Colombian Government concerning the protection of human rights defenders in that country; and if he will make a statement. [170241]

Mr. Rammell: We make frequent representations to the Government of Colombia on human rights matters, including the important issue of the safety of human rights defenders. Human rights are at the heart of our policy towards Colombia. Our Embassy in Bogota last discussed these issues with the Colombian Government on 21 April. The need to respect human rights defenders and the work of their organisations was highlighted in the statement by the Chairperson on "the Situation of Human Rights in Colombia" at the UN Commission on Human Rights in Geneva only last month. It was also underlined in the EU statement on Colombia at the same forum.

Cuba

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received from the mission in Havana concerning the commencement of the trial of the human rights dissident Juan Carlos Gonzalez Leiva. [170268]

Mr. Rammell: Juan Carlos Gonzalez Leiva was tried and found guilty, at his trial on 26 April 2004, of disrespect for authority, public disorder, disobedience and resisting arrest. He was sentenced to four years. At the time of his trial, Mr. Leiva had already spent two years in jail without trial. He was released by the court on 26 April, under terms similar to parole. The trial was originally scheduled for 27 April but was brought forward by a day at short notice, presumably to avoid attendance by international observers.

The EU regularly issues statements condemning the imprisonment of human rights activists, and most recently, on 12 March 2004, we again called upon the Cuban Government to release without delay all the imprisoned dissidents.

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government requested observer status at the trial in Cuba of Juan Carlos Gonzalez Leiva; and if he will make a statement. [170269]

Mr. Rammell: Officials of the British Embassy in Havana did not request observer status at the trial, but have followed Juan Carlos Gonzalez Leiva's case closely and have been in regular contact with his family. Embassy officials spoke to Mr Leiva on Tuesday 27 April, a day after his trial.

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations Her Majesty's Government has made to the Cuban Government concerning the imprisonment of human rights activists in Cuba; and if he will make a statement. [170270]

Mr. Rammell: UK policy on Cuba is governed by the EU Common Position, which has human rights enshrined as its key principle. The EU regularly issues statements condemning the imprisonment of human rights activists and other political prisoners. Most recently, on 12 March 2004 we called upon the Cuban Government to reflect on the significance of the granting of the UNESCO World Press Freedom Prize to Raul Rivero and again called for the release of all the imprisoned dissidents. I also raised our concerns at these imprisonments with the Cuban Ambassador in London.

Departmental Officials

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs, which former officials of the Department have asked for permission to join *(a)* PricewaterhouseCoopers, *(b)* Deloitte & Touche, *(c)* Ernst and Young and *(d)* KPMG. [156902]

Mr. Mike O'Brien *[pursuant to his answer, 3 March 2004, Official Report, c. 978W]:* I have become aware that Sir Andrew Woods, ex-Ambassador to Moscow sought permission in April 2000 to join Ernst and Young, and took up the appointment in May 2000. This was listed in the Fourth Report of the Advisory Committee on Business Appointments. I am unaware of any former officials of the Foreign and Commonwealth Office who since 1998 have asked for permission to join PricewaterhouseCoopers, Deloitte & Touche or KPMG.

To locate individual requests from officials earlier than 1998 would incur disproportionate costs.

EU Constitution

Mr. Gerald Howarth: To ask the Secretary of State for Foreign and Commonwealth Affairs how much money, and what assistance in kind, his Department is giving to support the Conference on the proposed EU Constitution organised by the Federal Trust and scheduled to take place on 1 and 2 July 2004; and how much money his Department *(a)* has committed and *(b)* plans to commit to support events which are favourably disposed towards UK accession to a treaty creating an EU constitution. [169390]

Mr. MacShane: The Foreign and Commonwealth Office will provide a speaker and £2,000 to fund the associated lunch for the conference to take place on 1 and 2 July organised by the Federal Trust for Education and Research and the University Association for Contemporary European Studies (UACES). This is an academic event co-organised by the main coordinating body of academics interested in Europe (UACES), and seeks to debate rather than 'promote' the draft EU Constitutional Treaty. Agreement has not yet been reached on the EU Constitutional Treaty and decisions on funding of related events will be taken in due course.

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs in what way the proposed European constitution takes into consideration cultural and religious diversity. [171308]

Mr. MacShane: Article 1.3.3 of the draft EU Constitution states that, as one of its objectives, "the Union shall respect its rich cultural and linguistic diversity and shall ensure that Europe's cultural heritage is safeguarded and enhanced". Article 1.51 makes it clear that while religion remains a matter for individual Member States, the Union equally respects the status of all religious and secular organisations.

European Council of Ministers

Ann Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on *(a)* the transitional arrangements for voting and *(b)* the qualified majority voting requirements in the Council of Ministers. [171499]

Mr. MacShane: Under the terms of the 2003 Treaty of Accession, which came into force on 1 May 2004, the new Member States have been incorporated into the present system of voting in the Council of Ministers.

The allocation of votes when the Council is required to act by a qualified majority is as follows:

Belgium	5
Czech Republic	5
Denmark	3
Germany	10
Estonia	3
Greece	5
Spain	8
France	10
Ireland	3
Italy	10
Cyprus	2
Latvia	3
Lithuania	3
Luxembourg	2
Hungary	5
Malta	2
Netherlands	5
Austria	4
Poland	8
Portugal	5
Slovenia	3
Slovakia	3
Finland	3
Sweden	4
United Kingdom	10

For their adoption, acts of the Council require at least 88 votes in favour cast by at least two-thirds of the members.

This will continue until the new voting arrangements under the Treaty of Nice come into effect on 1 November 2004.

Gaza Strip

Mr. Lazarowicz: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the Israeli Government concerning the effect of border restrictions on the ability of the United Nations Relief and Works Agency to distribute emergency food aid to refugees in the Gaza Strip. [171119]

Mr. Mike O'Brien: We have made clear to the Israeli Charge in London and to the Ministry of Foreign Affairs in Israel, our view that the restrictions placed on UN Relief and Works Agency aid operations at Erez crossings are inconsistent with Israel's acknowledgement that humanitarian assistance should be provided to the Palestinian population. We have urged the Israeli Government to ensure aid agencies have clear guidelines concerning access to Gaza and that restrictions are significantly eased. The EU Presidency was lobbied along similar lines.

Indonesia

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Government of Indonesia concerning *(a)* the attack by masked gunmen on Christians at the Tabernacle Church in Kilo Village, Poso District, Sulawesi, *(b)* the murder of the Reverend Freddy Wuisan, *(c)* the shooting of Rosia Pilongo, the Dean of the Law Department of Sintuwu Maroso University, Silawesi, and *(d)* the shooting of Jhon Christian Tanalida close to Poso City, Silawesi. [168574]

Mr. Mike O'Brien: The British Ambassador in Jakarta last raised our concerns about the situation in Central Sulawesi, including the cases referred to at a meeting with the Coordinating Minister for Welfare on 20 April 2004. We continue to urge the Indonesian Government to do all they can to ensure the safety and security of communities that have been affected by the violence in Central Sulawesi.

Together with our European partners we are in regular dialogue with the Indonesian Government and urge them to encourage religious freedom, maintain law and order and promote reconciliation in areas of conflict. We also seek opportunities to work with the Indonesian authorities on measures to resolve inter-communal violence in areas such as Sulawesi. We welcome the Indonesian Government's initiatives to bring peace to its troubled provinces.

Iraq

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs how many incidents of *(a)* unlawful destruction of property and *(b)* collective punishment there were in each month since the end of the original major conflict in Iraq, in the sector controlled by the British occupying forces. [168078]

Mr. Rammell: The UK strongly denies allegations that we have been involved in collective punishments, including the destruction of property, and would fully investigate any such allegation. Where property or land has been destroyed during the course of coalition activities we understand that the owners have been compensated.

Adam Price: To ask the Secretary of State for Foreign and Commonwealth Affairs whether all public servants acting on behalf of the United Kingdom in Iraq after the hand-over of sovereignty will continue to enjoy legal immunity in Iraqi law. [170184]

Mr. Mike O'Brien: We are finalising the detailed arrangements for the transition. An important element of those arrangements will be to ensure that appropriate measures are in place to safeguard the legal position of UK public servants after the handover of power to the Iraqi Interim Government.

Israel (Targeted Assassinations)

Mr. George Osborne: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his policy towards Israel's targeted assassinations policy. [169853]

Mr. Mike O'Brien: We have repeatedly made clear to the Government of Israel that their policy of targeted assassinations is illegal, unjustified and counter-productive. Both Israel and the Palestinians must refrain from actions that may further escalate tensions, including any more such killings.

Maldives

Mr. Paice: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the Government's relations with the Maldives. [172054]

Mr. Rammell: The UK enjoys good relations with the Maldives, a fellow member of the Commonwealth. The British High Commissioner in Colombo (accredited to the Maldives) visits regularly, most recently from 19 to 22 March when he met the Foreign Minister and the Minister for Home Affairs among others.

Mr. Paice: To ask the Secretary of State for Foreign and Commonwealth Affairs what action the Commonwealth has taken to encourage multi-party politics in the Maldives. [172055]

Mr. Mike O'Brien: It is for the Commonwealth Secretariat to comment on any action they may have taken to encourage multi-party politics in the Maldives. The Commonwealth Secretary General visited the Maldives in January 2003.

Mr. Paice: To ask the Secretary of State for Foreign and Commonwealth Affairs what official contacts his Department has had with representatives of the Democratic Party of the Maldives. [172056]

Mr. Mike O'Brien: Officials in London and at our High Commission in Colombo (accredited to the Maldives) have met representatives of the Maldivian Democratic Party several times, most recently on 24 March.

Nuclear Non-Proliferation

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs what means other than the Nuclear Non-Proliferation Treaty the Government are seeking to use to *(a)* strengthen the inspection and monitoring of uranium enrichment facilities and *(b)* restrict the extension of such facilities. [171037]

Mr. MacShane *[holding answer 6 May 2004]:* As my right hon. Friend the Foreign Secretary made clear in his statement of 25 February 2004, *Official Report*, columns 46–49WS, on Weapons of Mass Destruction, recent experience has shown there is a need for more wide-ranging inspections of national nuclear industries. The International Atomic Energy Agency's (IAEA) Additional Protocol provides the basis for carrying out such inspections. We seek universal adherence to the Additional Protocol and believe suppliers of nuclear technology should increasingly see this as a key commitment when they judge export licence applications. We are working with partners to enhance the effectiveness of the IAEA and strengthen its ability to ensure that nations comply with their safeguards agreements.

There is a strong argument that states which fail to comply with their safeguards obligations should forfeit the right to develop the nuclear fuel cycle, particularly the enrichment and reprocessing capabilities which are of such proliferation sensitivity. This would not deprive them of the possibility of constructing and running civil nuclear power stations but would prevent a seemingly civil programme masking a weapons programme.

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs what action the UK Government have taken to *(a)* support and *(b)* implement the Proliferation Security Initiative. [171038]

Mr. MacShane *[holding answer 6 May 2004]:* Since the launch of the Proliferation Security Initiative (PSI) in May 2003 the UK has been one of a core group of countries working to drive the initiative forward. This has involved intensive worldwide lobbying efforts in

support of the Statement of Interdiction Principles agreed at Paris in September 2003. To date, more than 60 countries have expressed their support for PSI and their intention to apply its principles.

We want the PSI to become an established, accepted and effective part of the international security architecture. To that end, we are working with partners in the context of the International Maritime Organisation to make it an internationally recognised offence to transport weapons of mass destruction (WMD), their delivery systems and related materials on commercial vessels. To extend the legal base of interdiction operations we are opening negotiations with major commercial flag states to allow for the boarding of vessels which may be carrying cargoes which could be used in WMD programmes. We are currently examining a range of measures to deter proliferators and further raise the political and economic costs of trafficking in WMD.

We will continue to take the necessary steps to strengthen our capacity to act effectively as and when required to take action consistent with the PSI Statement of Interdiction Principles.

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent steps the Government have taken to prevent the proliferation of missile and nuclear weapon technology from North Korea. [171039]

Mr. MacShane *[holding answer 6 May 2004]:* The Government support fully the six-party talks process aimed at ensuring compliance by North Korea with the ideals of a nuclear-free Korean peninsula, and persuading them to comply with their obligations under the Nuclear Non-Proliferation Treaty.

We are also playing a principal role in the Proliferation Security Initiative which, while it does not specifically target any particular state, aims to prevent the proliferation of weapons of mass destruction and technology associated with such weapons.

Peru

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what reports the UK mission in Peru has received concerning the date of the review of the case of Walter Cubas Balathazar; and if he will make a statement; [170240]

(2) what representations the Government have made to the Peruvian Government *(a)* in support of Mr. Cubas Balathazar and *(b)* in opposition to his detention; and if he will make a statement. [170277]

Mr. Rammell: Our Embassy in Lima raised the matter with the Ministry of Justice in July and November 2002, and again this April. We understand from the Peruvian authorities that the first hearing of Walter Cubas Balathazar's re-trial before the normal criminal justice system will be held on 14 May 2004. Our Embassy will continue to monitor closely this and all other similar cases. We support the Peruvian Government's efforts to improve and protect human rights for all Peruvians. We maintain a good dialogue with Peru on human rights.

DEFENCE

Arctic Convoys

Mr. Gerald Howarth: To ask the Secretary of State for Defence how many of those who served on the Arctic convoys during the Second World War received the Russian 40th Anniversary of Victory in the Great Patriotic War medal. [170357]

Mr. Caplin: The Royal Navy Medal Office issued approximately 15,000 Russian 40th Anniversary of Victory in the Great Patriotic War medals during the early 1990s to eligible Royal Navy, Royal Marine, Army, Royal Air Force and Merchant Navy personnel. It would not be possible to provide a more precise figure without a manual trawl through the relevant service records at disproportionate cost. In addition the Russian Embassy in London issued medals directly to members of both the Russian Convoy Club and the North Russia Club, but the numbers involved are not known.

Mr. Gerald Howarth: To ask the Secretary of State for Defence how many of those who served on the Arctic Convoys during the Second World War received the Atlantic Star. [170358]

Mr. Caplin: There is no definitive Medal Roll which indicates how many people received the Atlantic Star. It would not, therefore, be possible to establish how many recipients of the Atlantic Star sailed in Arctic waters on the convoys to Russia without undertaking an individual check of all the wartime personnel records which could be done only at disproportionate cost.

Mr. Allen: To ask the Secretary of State for Defence what estimates he has made of the cost to the Department of awarding a medal for service on the Arctic convoys. [171121]

Mr. Caplin: It is not possible to determine with any certainty how many people served in Arctic waters during the Second World War, but it is estimated that more than 95,000 Royal Navy personnel may have done so. The cost of issuing a new medal to Royal Navy veterans alone, including staff costs and the cost of the medal itself, would be at least £14 million if all those eligible or their next of kin applied.

Catterick Barracks (Medical Personnel)

Miss McIntosh: To ask the Secretary of State for Defence how many medical personnel are based at Catterick Barracks, broken down by *(a)* service, *(b)* rank and *(c)* specialisation. [170004]

Mr. Caplin: There are 32 medical personnel, six GPs and 26 Combat Medical Technicians, based at Catterick Garrison, all of whom are Army personnel. They are ranked as follows: two Lieutenant Colonels; one Major; three Captains; one Colour Sergeant; three Sergeants; four Corporals; five Lance Corporals and 13 Privates.

Defence Agencies (Scotland)

Angus Robertson: To ask the Secretary of State for Defence (1) how many people worked for *(a)* the Defence Evaluation and Research Agency in Scotland and *(b)* the Defence Secondary Care Agency in

Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170439]

(2) how many people worked for the *(a)* Veterans Agency, *(b)* British Forces Post Office, *(c)* Defence Vetting Agency and *(d)* Defence Medical Education and Training Agency in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170443]

(3) how many people worked for *(a)* the Armed Forces Personnel and Administration Agency, *(b)* the Defence Intelligence and Security Centre, *(c)* Defence Estates and *(d)* the Defence Geographic and Imagery Intelligence Agency in Scotland on 1st April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1st April 2003; and if he will make a statement; [170447]

(4) how many people worked for *(a)* the United Kingdom Hydrographic Office, *(b)* the Defence Export Services Organisation in Scotland, *(c)* the Defence Medical Services in Scotland and *(d)* the Base Repair Organisation in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1April 2003; and if he will make a statement; [170441]

(5) how many people worked for the *(a)* Defence Transport and Movements Agency, *(b)* Medical Supplies Agency, *(c)* Defence Communications Services Agency and *(d)* Defence Storage and Distribution Agency in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170444]

(6) how many people worked for the *(a)* RAF Personnel Manning Agency, *(b)* RAF Training Group Defence Agency, *(c)* Warship Support Agency and *(d)* Defence Procurement Agency in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170445]

(7) how many people worked for *(a)* the Disposal Services Agency, *(b)* the Pay and Personnel Agency, *(c)* the Defence Aviation Repair Agency and *(d)* the Meteorological Office in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170442]

(8) how many people worked for *(a)* the Naval Manning Agency, *(b)* Service Children's Education, *(c)* the Duke of York's Royal Military School and *(d)* the Naval Recruiting and Training Agency in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1 April 2003; and if he will make a statement; [170446]

(9) how many people worked for the *(a)* Army Personnel Centre, *(b)* Army Training and Recruiting Agency, *(c)* Defence Dental Agency and *(d)* Defence Bills Agency in Scotland on 1 April; what the overall personnel costs were for each agency (i) on that date and (ii) on 1April 2003; and if he will make a statement. [170448]

Mr. Caplin: Information on the number of Service personnel at regional level is not available centrally and could be obtained only at disproportionate cost. Information on Civilian personnel at regional level for 1 April 2004 and for personnel expenditure by the organisations named for 2003–04 is not yet available.

The Defence Evaluation and Research Agency was disestablished on 1 July 2001, when two new organisations, QinetiQ plc and the Defence Science and Technology Laboratory (DSTL), were created. QinetiQ is a public limited company, and all operational inquiries should be directed to its Chief Executive. DSTL remains a part of the Ministry of Defence.

The Defence Secondary Care Agency was abolished on 1 April 2003 and its education functions transferred to the Defence Medical Education and Training Agency; its remaining functions were transferred to Defence Medical Services.

I will write to the hon. Member in due course and a copy of the letter will be placed in the Library of the House.

Defence Personnel (Vale of York)

Miss McIntosh: To ask the Secretary of State for Defence (1) when he expects details of numbers of service and civilian personnel in the Vale of York for July 2003 to become available; [170000]

(2) how many service personnel were serving in the Vale of York on 27 April. [170001]

Mr. Caplin: Service personnel data by local authority is published in Tri-Service Publication (TSP) 10. Currently the Defence Analytical Services Agency are reviewing the source data and process by which location statistics are produced so data from TSP10 as at 1 July 2002 is the latest available. An investigation into the viability of the inclusion of Parliamentary Constituency data will be conducted as part of the review. The target date for completion of the review is December 2004.

The number of civilian personnel working for the Ministry of Defence as at 1 July 2003 in Yorkshire and the Humber was 3,080. The latest available figure is 3,160 as at 1 March 2004.

The numbers are for permanent, full-time equivalent staff, non-industrial and industrial, including Trading Funds and excluding those on career breaks, long term sick leave, secondment etc. Reliable data are not available as follows:

Government Office Region level.

Green Minister

Mr. Breed: To ask the Secretary of State for Defence (1) if he will list the meetings at which his Department has been present regarding the delivery of sustainable development across Government as co-ordinated by the Ministerial Sub-Committee of Green Ministers; [171803]

(2) what work his Department's Green Minister has undertaken in the last three months in that capacity; and what meetings his Department's Green Minister has attended in the last 12 months in that capacity. [171802]

Mr. Caplin: I represent the Ministry of Defence on the Ministerial Sub-Committee of Green Ministers. It has been established practice under successive Governments not to disclose information relating to the proceedings of Cabinet Committees. This practice is now formalised by Exemption 2 of Part II of the Code of Practice on Access to Government Information. However, my work as the Ministry of Defence's Green Minister involves regular correspondence outside that committee with Government Ministers in order to ensure that the Ministry of Defence's interests in environmental and sustainable development issues are fully and properly represented.

Iraq

Mr. Evans: To ask the Secretary of State for Defence what assessment he has made of the number of *(a)* private military companies and *(b)* British private military companies working in Iraq. [166133]

Mr. Mike O'Brien: I have been asked to reply.

We are not aware of any private military companies (UK or otherwise) operating in Iraq in military operations. A number of British (and other) private security companies are providing security advice and assistance to the reconstruction effort. The number of security personnel working in Iraq fluctuates, but we are aware of up to 1,000 British nationals working in this sector.

Adam Price: To ask the Secretary of State for Defence whether any member of the UK armed forces has been charged in relation to the deaths of civilians in Iraq caused by Coalition action. [170226]

Mr. Ingram *[holding answer 4 May 2004]:)* As at 30 April 2004, no member of the United Kingdom armed forces had been charged in relation to the deaths of civilians in Iraq.

Land Release (Hampshire)

Mr. Hancock: To ask the Secretary of State for Defence pursuant to the answer of 22 April 2004, *Official Report*, column 662W on land releases (Hampshire), when he expects to complete the review on estate rationalisation relating to *(a)* Arborfield, *(b)* Deepcut and *(c)* Bordon/Whitehill. [170469]

Mr. Caplin: As my right hon. Friend the Minister of State advised in his written statement on 25 November 2002, *Official Report*, column 2WS, the Defence Training Review identified Arborfield, Deepcut and Bordon as sites that are likely to be surplus to Defence requirements.

Any decisions on any of these sites will be announced to the House in the usual way but none have been taken to date.

Low Flying

Adam Price: To ask the Secretary of State for Defence how much has been paid in compensation to farmers for livestock losses caused by low flying military aircraft in *(a)* England, *(b)* Scotland and *(c)* Wales in each year since 1994. [170874]

Mr. Caplin: The information is not held in the format requested, but the value of compensation paid (inclusive of legal costs) in relation to livestock losses caused by low flying military aircraft in England, Scotland and Wales for each financial year since 1994 is as follows:

£

	Amount paid
1993–4	337,569
1994–5	259,814
1995–6	261,328
1996–7	169,092
1997–8	169,867
1998–9	401,326
1999–2000	220,112
2000–1	491,663
2001–2	272,334
2002–3	236,453
2003–4	330,082

Adam Price: To ask the Secretary of State for Defence how many training sorties have been undertaken within the mid-Wales military tactical training area by military aircraft flying below 250 feet in each year since 1994 for which figures are available. [170875]

Mr. Caplin: The amount of military low flying that takes place in the United Kingdom is better expressed in hours rather than by number of sorties, which can vary significantly from minutes to several hours. The information is only available for the last four training years, as previously the data was compiled in a different manner. The figures for the training year 2003–04 are due to be published in the next statement on the pattern of military low flying that will be available to the House in Summer 2004.

The following information reflects the actual amount of operational low flying carried out within 7T, the tactical training area in mid-Wales. These statistics are consistent with the information provided annually in the statement on the pattern of military low flying.

Training year

1999–2000—38 hours 8 minutes

2000–01—25 hours 21 minutes

2001–02—30 hours 23 minutes

2002–03—33 hours 12 minutes

Adam Price: To ask the Secretary of State for Defence how many *(a)* representations and *(b)* complaints have been received by the (i) RAF and (ii) Department about low flying military aircraft in (A) England, (B) Scotland and (C) Wales in each year since 1994. [170876]

Mr. Caplin: In maintaining our records we do not differentiate between representations and complaints; all complaints, whether received centrally or at individual establishments are recorded on a central database and it is not possible to distinguish between them. Detailed records are only retained for three years; it is therefore not possible to provide the information requested for earlier years.

The number of complaints received based on information provided by the complainant for (A) England, (B) Scotland, (C) Wales regarding military low flying over the last three training years are outlined in the table.

	2000–01	2001–02	2002–03
England	3,003	3,194	3,248
Scotland	759	687	831
Wales	496	454	488
Isle of Man	0	1	1
No county provided	11	13	11
Total	4,269	4,349	4,579

MOD Sites (Portsmouth)

Mr. Hancock: To ask the Secretary of State for Defence what research he has *(a)* commissioned and *(b)* evaluated on his Department's land bounded by Halliday Crescent, Melville Road and Henderson Road in Portsmouth; and if he will make a statement. [169403]

Mr. Caplin: The site formed part of the married quarter estate transfer to Annington Homes in November 1996. No trace of any records can be found on any research for the site, although legal searches into title in connection with the sale would have been completed at the time.

Nepal

Mr. Caton: To ask the Secretary of State for Defence if he will list the items of military equipment gifted to the Government of Nepal since January 2000. [170991]

Mr. Ingram: I refer my hon. Friend to the answer given on 12 March 2004, *Official Report*, column 1789W by my hon. Friend the Under Secretary of State for Foreign and Commonwealth Affairs (Mr. Rammell) which listed all equipment gifted to the Government of Nepal under the Global Conflict Prevention Pool. In addition to this, a Departmental Minute has recently been placed before the House of Commons setting out the intention to gift two Short Take-Off and Landing (STOL) Islander aircraft, radios and Explosive Ordnance Disposal equipment to the Government of Nepal.

Mr. Caton: To ask the Secretary of State for Defence if he will make a statement on the methods the Government employs to ensure that military helicopters it has provided to the Royal Nepalese Army are only used for logistical, medical and humanitarian purposes. [170992]

Mr. Ingram: A letter of agreement was signed by the Nepalese Chief of the Army Staff and by HM Ambassador. This set out the understanding on which the two MI-17 transport helicopters were being gifted to the Government of Nepal. In particular, it was specified that the helicopters were being gifted as part of the non-lethal support the UK provided to support the Government's campaign against the Maoist insurgency. It was further agreed that combat and attack roles were precluded for the lifetime of the aircraft, and that the helicopters would only be used for logistic, humanitarian and medical purposes. We have no grounds to believe that the aircraft gifted by the UK have been misused.

Nuclear Weapons

Llew Smith: To ask the Secretary of State for Defence pursuant to his answer of 19 April 2004, *Official Report*, column 339W, on nuclear contingent liability arrangements, what criteria he used to determine what constituted an objection. [171120]

Mr. Ingram: The ways in which a Member of Parliament can object to a contingent liability are as detailed in Government Accounting 2000 Paragraph 26.4.7.

Adam Price: To ask the Secretary of State for Defence if he will make a statement on the importance of nuclear deterrence as a military strategy in the war against terrorism. [170212]

Mr. Hoon: I refer the hon. Member to the answer I gave on 30 January 2004, *Official Report*, column 577W, to the hon. Member for Moray (Angus Robertson).

Mr. Keetch: To ask the Secretary of State for Defence (1) how many NSQEP personnel in the UK are able to maintain the UK's nuclear weapons and naval nuclear reactors; what their age profile is; what their names are; and if he will make a statement; [170323]

(2) what estimate he has made of the adequacy of the supply of people suitably qualified and experienced to maintain *(a)* the UK's nuclear weapons and *(b)* the Royal Navy nuclear reactors; what steps the Government is taking to secure the supply of people with such qualifications; and if he will make a statement. [170354]

Mr. Ingram: In the United Kingdom, there are some 10,000 (as at December 2002) Nuclear Suitably Qualified and Experienced Personnel (NSQEP) who are able to support the MOD's nuclear weapon and nuclear propulsion programmes. Personal details of these individuals are not held centrally in the MOD. However, the number of shore-based NSQEP employed by the MOD in support of these programmes is some 1,400. Their average age is 49.

Throughout 2002 the MOD's NSQEP Head of Profession actively participated in a cross-Government Department Nuclear and Radiological Skills study that provided an estimate of the adequacy of personnel to support the UK's nuclear and radiological sector. The report identified that while there is no immediate overall general cause for concern, there are a number of shortages in some disciplines. There are, however, concerns about the general age profile and the supply of suitably qualified and experienced personnel to replace those who retire over the next 15 years. One aspect of the Government response to the Nuclear and Radiological Skills study, in line with the Government Skills Strategy, was the development and licensing, in March 2004, of a Sector Skills Council for the UK's nuclear sector. The MOD's NSQEP Head of Profession co-ordinates Defence Nuclear skills interests at the Industry Nuclear Skills Group and engages closely with the Sector Skills Council.

Llew Smith: To ask the Secretary of State for Defence if he will make a statement on safety reviews conducted on nuclear submarines. [171000]

Mr. Ingram: Safety reviews on nuclear submarines are conducted routinely at several levels in accordance with rigorous and well-rehearsed procedures. Prior to sailing, rigorous checks are undertaken to validate all aspects of a vessel's seaworthiness. Regular safety reviews, that comply fully with legal requirements, are also carried out on board to ensure the material state of the submarine is monitored and maintained.

Adam Price: To ask the Secretary of State for Defence if he will make a statement on research and development of low yield nuclear weapons in the UK. [170211]

Mr. Ingram: No such research or development is being undertaken.

Mr. Keetch: To ask the Secretary of State for Defence what the estimated cost is of *(a)* designing and *(b)* manufacturing a new nuclear warhead; and if he will make a statement. [170337]

Mr. Hoon: The December 2003 Defence White Paper clearly stated the Government's position that decisions on whether to replace Trident are likely to be required in the next Parliament. The costs of the design and manufacture of any nuclear warhead would depend on a range of factors, and these will be considered as part of any such decision.

Mr. Keetch: To ask the Secretary of State for Defence what the age profile is of the staff of *(a)* his Department's Chief Scientific Advisor and *(b)* the maintenance contractor SERCO who possess the qualifications necessary to (i) maintain the design intent of the current nuclear warheads and (ii) design the next generation of warheads; and if he will make a statement. [170338]

Mr. Ingram: There are several staff working in the Chief Scientific Adviser's area in support of, and providing advice on the nuclear weapons programme, a number of whom have previously worked at AWE. However, with the exception of one AWE secondee, they are not "qualified" to conduct nuclear warhead design work, since only AWE plc, the design authority under the contract, can "qualify" people to undertake such work.

MOD's contract for the management and operation of AWE sites is with AWE Management Limited (AWE ML), a consortium of three equal partners, including SERCO. Responsibility for the day-to-day management of AWE sites is delegated to a separate company, AWE plc, which is owned by AWE ML.

It is not possible to categorise the capabilities of qualified AWE plc personnel in the way requested. However, the following table provides data on those AWE plc employees engaged in maintaining the relevant research and development capabilities who are formally qualified to degree level and above.

Age range	*Percentage age of total formally qualified and employed in R and D*	*Numbers employed in R and D who are qualified to degree level and above*
20 to 30	26	212
31 to 40	34	282
41 to 50	23	194
51 to 60	15	121
60 plus	2	21
Total	100	830

Wind Farms

Norman Baker: To ask the Secretary of State for Defence how many wind farm applications his Department has been consulted upon; and to how many of these objections were made. [171515]

Mr. Caplin: Under arrangements agreed with the British Wind Energy Association, Civil Aviation Authority and DTI, the Ministry of Defence is voluntarily consulted by wind farm developers. Since 1 January 2000, the date from which accurate records have been maintained, some 3,139 proposals have been received of which we have been unable to approve 1,040.

As regards formal planning applications for the construction of wind farms upon which MOD has been consulted by the planning authority, some 58 have been notified, of which we have objected to nine.

WORK AND PENSIONS

Over-70s Payment

Tony Baldry: To ask the Secretary of State for Work and Pensions when the £100 payment for people aged 70 or over that was announced in the 2004 Budget statement will be made. [170531]

Malcolm Wicks: The intention is for the payments to be made automatically with the 2004–05 winter fuel payment, to those who are eligible and who do not need to claim it, before the end of the year. People who do not get a winter fuel payment will need to claim the one-off payment from the Department for Work and Pensions before 31 March 2005.

Child Support Agency

David Winnick: To ask the Secretary of State for Work and Pensions when the Child Support Agency will be able to refund the money owed to the constituent of the hon. Member for Walsall, North, ref: 321042956341. [169296]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr David Winnick, dated 10 May 2004:

In reply to your recent Parliamentary questions about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked, when the Child Support Agency will be able to refund the money owed to the constituent of the hon. Member for Walsall North ref: 321042956341.

As individual cases are confidential, I will write to you separately about it. This is in line with Para 12, Part 2, of the Code of Practice on Access to Government Information.

Correspondence

David Winnick: To ask the Secretary of State for Work and Pensions when the hon. Member for Walsall, North will receive a reply from the Chief Executive of the Child Support Agency to his letter of 24 March concerning a constituent, ref. PCO 130778. [172013]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to my hon. Friend with the information requested.

Letter from Doug Smith to Mr. David Winnick, dated 10 May 2004:

In reply to your recent Parliamentary questions about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked when the honourable Member for Walsall North will receive a reply from the Chief Executive of the Child Support Agency to his letter of 24th March concerning a constituent, ref PCU 130778.

A full response to your letter of 24 March was issued on 7 May 2004. I apologise for the delay in providing this.

Mr. Kaufman: To ask the Secretary of State for Work and Pensions when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 1 April with regard to Mr. Alan McCabe. [172261]

Mr. Andrew Smith: I replied to my right hon. Friend on 4 May.

Disability Living Allowance

Mr. O'Hara: To ask the Secretary of State for Work and Pensions what percentage of families containing one or more children in receipt of disability living allowance have incomes below 60 per cent. of median contemporary incomes *(a)* before and *(b)* after housing costs, excluding any disability living allowance received. [170643]

Maria Eagle: 30 per cent. of families with children, in receipt of disability living allowance have incomes below 60 per cent. of median contemporary income before housing costs. 42 per cent. of families with children, in receipt of disability living allowance have incomes below 60 per cent. of median contemporary income after housing costs.

Notes:

1. Figures are for 2002–03, the latest date for which data are available.
2. Estimates are for Great Britain.
3. Estimates relate to the household's status at the time they were interviewed for the FRS.
4. The estimates are based on sample counts, which have been adjusted for non-response using multipurpose grossing factors that control for tenure, council tax band and a number of other variables. Estimates are subject to both sampling error, and to remaining variability in non-response which is not corrected by the grossing regime.
5. The income measure used is weekly net (disposable) equivalised household income (that is to say income that is adjusted to reflect the composition of the household).
6. The question has been interpreted and presented as those families in receipt of disability living allowance, who have children. The alternative interpretation, which would look at families where a child is in receipt of disability living allowance, cannot be presented due to insufficient sample sizes of this group.
7. For the purpose of calculating whether a family is below 60 per cent. of median income, any DLA received has been excluded from the household income. The median income of the population is the same as that used in HBAI, and therefore has not been recalculated following deduction of disability living allowance.

Source:

Family Resources Survey (FRS).

Mr. O'Hara: To ask the Secretary of State for Work and Pensions what percentage of *(a)* single people under pension age, *(b)* couples under pension age and *(c)* adults under pension age have incomes below 60 per cent. of median contemporary incomes (i) before and (ii) after housing costs, excluding any disability living allowance received. [170644]

Mr. Pond: The information requested is presented in the table:

	Percentage with incomes below 60 per cent. of median contemporary income
(i) Before housing costs	
(a) Single people under pension age	20
(b) Couples under pension age	13
(c) Adults under pension age	16
(ii) After housing costs	
(a) Single people under pension age	30
(b) Couples under pension age	16
(c) Adults under pension age	21

Notes:

1. Figures are for 2002–03, the latest date for which data are available.
2. Estimates are for Great Britain.
3. Estimates relate to the household's status at the time they were interviewed for the FRS.
4. Estimates for 'couples under pension age' include all individuals under SPA who cohabit with a partner.
5. The estimates are based on sample counts, which have been adjusted for non-response using multipurpose grossing factors that control for tenure, council tax band and a number of other variables. Estimates are subject to both sampling error, and to remaining variability in non-response which is not corrected by the grossing regime.
6. The income measure used is weekly net (disposable) equivalised household income (that is to say income that is adjusted to reflect the composition of the household).

Source:

Family Resources Survey (FRS).

Mr. O'Hara: To ask the Secretary of State for Work and Pensions what percentage of *(a)* single female pensioners, *(b)* single male pensioners, *(c)* pensioner couples and *(d)* all pensioners have incomes below 60 per cent. of median contemporary incomes (i) before and (ii) after housing costs excluding attendance allowance or disability living allowance received. [170645]

Mr. Pond: The requested information is presented in the table.

	Percentage with incomes below 60 per cent. of median contemporary income
(i) Before housing costs	
(a) Single female pensioners	26
(b) Single male pensioners	21
(c) Pensioner couples	28
(d) All pensioners	27
(ii) After housing costs	
(a) Single female pensioners	25
(b) Single male pensioners	21
(c) Pensioner couples	30
(d) All pensioners	28

Notes:

1. Figures are for 2002–03, the latest date for which data are available.
2. Estimates are for Great Britain.
3. Estimates relate to the household's status at the time they were interviewed for the FRS.
4. Estimates for 'pensioner couples' includes all individuals over SPA who cohabit with a partner. 'Single pensioners' are defined as those over SPA.
5. The estimates are based on sample counts, which have been adjusted for non-response using multipurpose grossing factors that control for tenure, council tax band and a number of other variables. Estimates are subject to both sampling error, and to remaining variability in non-response which is not corrected by the grossing regime.
6. The income measure used is weekly net (disposable) equivalised household income (that is to say income that is adjusted to reflect the composition of the household).

Source:

Family Resources Survey (FRS).

Mr. Caton: To ask the Secretary of State for Work and Pensions if he will extend eligibility for the higher rate of the mobility component of the disability living allowance to people who become disabled after the age of 65 years to enable them to benefit from the Motability Scheme. [170990]

Maria Eagle: No. It is normal for pensions and benefits schemes to contain different provisions for people at different stages of their lives, and the higher rate mobility component of disability living allowance is focussed on providing extra help to people who are severely disabled early, or relatively early, in life.

Based on the need for personal care, attendance allowance provides help with the disability-related extra costs of people who experience the onset of disability after age 65. This help is part of the wide range of support that the Government make available to older people so that they can have a decent and secure income in retirement and share fairly in the rising prosperity of the country.

Disabled Workers

Mr. Borrow: To ask the Secretary of State for Work and Pensions if he will make a statement on the measures introduced to improve the working conditions of disabled workers in South Ribble over the last seven years. [172141]

Maria Eagle: We have a number of measures in place nationally to help improve conditions for disabled people at work, as well as measures to improve their access to services generally. None of these are specific to South Ribble, but all are available to disabled people who live and work there.

From 1996, the employment provisions of the Disability Discrimination Act required most employers of 20 or more staff not to discriminate against, and to make reasonable adjustments for, disabled job applicants or employees; in December 1998, we reduced this threshold to 15 employees. From October this year, the small employer exemption will be removed and most currently excluded occupations, such as police officers, fire-fighters, and partners in business partnerships will be brought within the scope of the Disability Discrimination Act employment provisions.

Jobcentre Plus runs a number of specialist programmes providing help for disabled people, including New Deal for Disabled People, Workstep, Access to Work, the Job Introduction Scheme, and Work Preparation. All these programmes provide practical advice and support to disabled people and their employers to help overcome work related obstacles resulting from disability. Since 1997–98 there have been year-on-year increases in both numbers helped and programme spend.

To help people access appropriate help, Jobcentre Plus has established a network of Disability Service Teams. The teams are made up of Disability Employment Advisors, Access to Work Advisers and Occupational Psychologists; their services are accessed through local Jobcentres.

Since April 2003, disabled people in work have been receiving financial support through the Working Tax Credit. This is available if a person is working an average of at least 16 hours per week (self-employed or for an employer); and have a disability which puts them at a disadvantage in getting a job. 70,000 families (including over 32,000 adults without children) are benefiting from the disability element within the Working Tax Credit, compared to 38,000 who benefited from the old Disabled Person's Tax Credit.

Incapacity Benefit

Mr. Goodman: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of incapacity benefit claimants covered by the new incapacity benefit pilot projects in *(a)* 2003–04 and *(b)* 2004–05. [170459]

Maria Eagle *[holding answer 4 May 2004]:* We have projected that there will be approximately 14,000 new claims for incapacity benefits (Incapacity Benefit and Income Support on the grounds of incapacity) in the pilot areas during 2003–04, and 65,000[1] during 2004–05. The pilots will continue to the end of 2005–6 when we estimate that there will be approximately 66,000 new claims.

In addition, all the pilot provision is available to existing incapacity benefit recipients in the pilot areas, numbering approximately 193,000. Their participation is currently on a voluntary basis.

[1] The number of pilots in 2004–05 will increase from three to seven, hence the higher projection of new claims.

Mr. Goodman: To ask the Secretary of State for Work and Pensions what estimate he has made of possible savings generated by the new incapacity benefit pilot projects in each year from 2004–05 to 2008–09. [170460]

Maria Eagle *[holding answer 4 May 2004]:* One of the purposes of the incapacity benefit pilot projects is to establish whether there is scope for savings to support further re-investment in this and other Government priority areas. We believe that the pilots have the potential to generate savings which will outweigh the projected pilot costs of approximately £40 million a year. However there has been limited previous success in this area on which to make a firm assessment of the financial implications.

The primary purpose of our agenda for reform of incapacity benefits is to help considerably greater numbers of those with health conditions and disabilities to achieve their aspirations to return to employment and to avoid long-term incapacity.

Mr. Goodman: To ask the Secretary of State for Work and Pensions what estimate he has made of the cost of extending the new incapacity benefit pilot projects to all incapacity benefit claimants. [170461]

Maria Eagle *[holding answer 4 May 2004]:* We estimate that the cost for a full year at national level of the provision now available to new claimants in the incapacity benefit reform pilots and the additional provision for existing recipients announced in the recent Budget and due to be introduced early next year, would be of the order of £700 million—£800 million.

Mr. Goodman: To ask the Secretary of State for Work and Pensions what estimate he has made of *(a)* the start-up costs and *(b)* the annual running costs of the new incapacity benefit pilot projects, broken down by cost of (i) personal advisers, (ii) the new return to work credit, (iii) condition management courses and (iv) other costs. [170462]

Maria Eagle *[holding answer 4 May 2004]:* The start-up costs for the Incapacity Benefit Reform Pilots were all incurred in the 2003–04 financial year and amounted to £6,137,080.

The unconfirmed running costs for the Incapacity Benefit Reforms Pilots during 2003–04 are shown as follows and the latest estimates for the running costs from 2004 to 2006 are as outlined:

£

	2003–04	*2004–05*	*2005–06*
Personal advisers	625,895	3,020,839	3,160,150
Return to Work Credit	248,560	5,594,400	9,038,400
Condition Management Programme	887,500	8,651,211	8,202,00
Other costs	3,577242	22,733,550	19,599,450

The figures for the Personal Advisers also include some costs for processing Incapacity Benefit which cannot be separated out.

The majority of the 'other1 costs given above consist of estimated funding to help customers find and maintain employment, either directly through, for example, New Deals, Work Based Learning for Adults and Access to Work, in-work support and the adviser discretionary fund, or indirectly through better medical assessments, training and evaluation of the project.

These costs do not include the additional provision for existing clients announced in the recent Budget.

Incapacity Benefit (Rhondda)

Chris Bryant: To ask the Secretary of State for Work and Pensions how many people in each ward in the Rhondda constituency have received incapacity benefit in each year since 1992. [170987]

Maria Eagle: The available information is in the table.

People claiming incapacity benefit and severe disablement allowance in the Rhondda constituency broken down by ward

Ward name	*1998*	*1999*	*August 2000*	*2001*	*2002*
Cwm					
Clydach	475	460	425	435	430
Cymmer	800	780	780	800	805
Ferndale	610	585	600	570	575
Llwyn-y-pia	405	385	390	400	380
Maerdy	690	645	635	630	625
Pentre	675	660	660	650	645
Pen-y-graig	845	800	810	820	805
Porth	785	750	720	735	725
Tonypandy	455	450	435	440	450
Trealaw	585	595	575	620	575
Treherbert	915	910	865	820	780
Treorchy	955	935	900	905	910
Tylorstown	805	805	795	760	730
Ynyshir	490	490	465	480	475
Ystrad	835	820	815	845	820

Notes:

1. The figures are a snapshot of all claimants of incapacity benefit (including credits only cases) and severe disablement allowance at August each year.
2. Wards are based on 2003 ward boundaries.
3. All benefit counts have been rounded to a multiple of five to protect the confidentiality of individual claimants.

IAD Information Centre, Department for Work and Pensions.

Income-related Benefits

Joyce Quin: To ask the Secretary of State for Work and Pensions how many and what percentage of employees in his Department are in receipt of income-related benefits. [168606]

Maria Eagle: The Department does not hold this information.

Jobcentre Plus

Mr. Andrew Turner: To ask the Secretary of State for Work and Pensions if he will place in the Library copies of the *(a)* disabled access audit of 1 Steephill Road, *(b)* consultation document dated June 2002 and list of recipients, *(c)* specification of requirements for a Jobcentre Plus centre, as issued to his property advisors and *(d)* responses received to *(b)* relating to the Jobcentre Plus roll-out in the Isle of Wight. [169170]

Jane Kennedy: The available information has been placed in the Library.

No responses were received to the consultation document dated June 2002.

Mayor of London (Meetings)

Simon Hughes: To ask the Secretary of State for Work and Pensions on what dates he has held official meetings with the Mayor of London since July 2000; and what the subject of each meeting was. [171439]

Mr. Andrew Smith: Since July 2000, I have held no official meetings with the Mayor of London.

ME

John Robertson: To ask the Secretary of State for Work and Pensions how many ME sufferers were *(a)* successful and *(b)* unsuccessful in their applications for disability living allowance in the last 12 months. [171342]

Maria Eagle: For the year ending 30 November 2003, there were approximately 2,200 new awards for customers whose primary disabling condition is ME, Chronic Fatigue Syndrome or other Post Viral conditions. Information on unsuccessful claims to Disability Living Allowance by sufferers of ME is not available.[1]

[1] When inputting an unsuccessful claim to the computer system from which these figures are drawn, a disability code, which highlights the main disabling condition, is not input.

Note:
Figures taken from 5 per cent. samples. Figures are in thousands and rounded to the nearest hundred. From November 2002, the methodology for producing these figures was changed to allow statistics to be published much sooner. This has resulted in a small increase in the reported caseload. This is because some cases which have actually terminated but have not yet been updated on the computer system are now included.

IAD Information Centre.

Pension Credit

Mr. Willetts: To ask the Secretary of State for Work and Pensions how much was spent on advertising the Pick it Up, It's Yours campaign in *(a)* national newspapers and *(b)* the regional and local press; and what the basis was for the decision on which publications would carry the advertisements. [170590]

Malcolm Wicks: The total cost of publicity for the Pick It Up It's Yours campaign in 2003–04 was £15,580,000. The cost for press advertising media was £6,086,146 which is broken down as follows:

	£
National press	4,752,598
Regional press	1,308,352
Other press	25,196

The Department uses the Government's publicity agency COI Communications to buy media. Media are selected on the basis of the most cost effective method of reaching the target audience.

Mr. O'Hara: To ask the Secretary of State for Work and Pensions how many and what proportion of *(a)* single men, *(b)* single women and *(c)* couples are expected to be entitled to pension credit in October; and how many of these will be entitled to (i) guarantee credit alone, (ii) savings credit alone and (iii) both guarantee and savings credit. [170642]

Malcolm Wicks: Estimates of the numbers of people eligible for pension credit, based on data from the Family Resources Survey for 2002–03, will be available later this month. The information will be placed in the Library.

Mr. Willetts: To ask the Secretary of State for Work and Pensions whether his Department advertises pension credit in any language other than English. [172004]

Malcolm Wicks: Pension credit advertising has appeared in the following languages other than English:

TV—Welsh

Radio—Gujarati, Punjabi, Cantonese and Hindi

Press—Welsh, Bengali, Cantonese, Gujarati, Punjabi and Urdu.

Pensions

Valerie Davey: To ask the Secretary of State for Work and Pensions if the Government will make changes to the current system to ensure that all women have access to a basic state pension in their own right. [170966]

Malcolm Wicks: All women have access to a state pension. They become entitled to a basic state pension by paying, being treated as paying or being credited with national insurance contributions. The amount of basic state pension will depend on the number of qualifying years built up before they reach state pension age.

However, additional policies such as home responsibilities protection exist to enable people to acquire a higher amount of basic state pension.

Property Disregards

Mr. Sanders: To ask the Secretary of State for Work and Pensions for what reason the rules relating to property disregards are different for pensioners moved from income support to pension credit. [169455]

Malcolm Wicks: It was always our intention that the capital disregards on second properties should be the same in all income-related benefits.

Currently in Income Support, the main property occupied as the home is ignored unless any part of it could be reasonably sold off separately. The value of any second property is normally taken into account, but there are a number of exceptions. In particular, the value of a second property which is occupied by someone who is aged 60 or over or incapacitated and who is a relative of the Income Support claimant or their partner is ignored.

We have recently discovered that due to an oversight, this rule was not carried forward into Pension Credit legislation when the principal regulations were drafted. This means that the disregard only applies if the occupier is a close relative of the Pension Credit claimant themselves. We will make the changes needed to the legislation to ensure that this is corrected at the earliest opportunity.

Meanwhile, we will be considering extra-statutory payments to anyone who has lost out.

Recruitment

Matthew Taylor: To ask the Secretary of State for Work and Pensions what the cost of recruitment of civil servants

for the Department was in each financial year since 1996–97, broken down by *(a)* delegated or contracted out recruitment procedures and *(b)* recruitment procedures carried out by the Department. [158175]

Maria Eagle: The majority of external recruitment at all levels within DWP is carried out on a direct basis by the Department. However, for a small number of vacancies, particularly of a specialist or senior nature, the services of a recruitment agency may be used.

The information is not collected centrally and could be provided only at disproportionate cost.

Social Security Advisory Committee

Mr. Webb: To ask the Secretary of State for Work and Pensions when he will publish the Quinquennial Review into the Social Security Advisory Committee. [171855]

Mr. Andrew Smith: The Quinquennial Review into the Social Security Advisory Committee will be published in the next two weeks.

Statutory Maternity Pay

Malcolm Bruce: To ask the Secretary of State for Work and Pensions how many women have *(a)* requested and *(b)* received statutory maternity pay since its introduction; and if he will make a statement on the success of the take-up of this entitlement. [169297]

Mr. Pond *[holding answer 29 April 2004]:* The information is not available in the format requested.

Employers are not required to make returns on the numbers of women to whom they pay Statutory Maternity Pay (SMP). However, numbers are estimated from the returns employers make to the Inland Revenue for the SMP they recover.

Between 1987, when SMP was introduced, and 2001–02 it is estimated that approximately 4.1 million women have received SMP.

A recent survey found that 93 per cent. of eligible women received Statutory Maternity Pay.

Sure Start Maternity Grant

Martin Linton: To ask the Secretary of State for Work and Pensions how many mothers in Battersea have *(a)* applied for and *(b)* obtained the Sure Start maternity grant. [167640]

Mr. Pond: The information is not available in the format requested. The available information is in the tables.

Sure start maternity grants in South West Thames social fund district

	Applications	*Awards*
2000–01	1,360	1,165
2001–02	1,678	1,400
2002–03	1,952	1,487
2003 to October	1,494	978

Sure start maternity grants in South West Thames interim district

	Applications	*Awards*
November and December 2003	479	325

Sure start maternity grants in Lambeth, Southwark and Wandsworth Jobcentre Plus district

	Applications	*Awards*
January to March 2004	1,627	1,162

Notes:

1. Data is not available by Parliamentary Constituency. Battersea Parliamentary Constituency used to be part of South West Thames Social Fund District. This District was involved in a very complex set of interlocking boundary changes affecting most of Greater London and some neighbouring areas, which took place from April 2003 to January 2004. Changes affecting South West Thames Social Fund District happened in November 2003 and the district then became known as South West Thames interim district. Changes to this district occurred in January 2004, resulting in the formation of Lambeth, Southwark and Wandsworth Jobcentre Plus district. Battersea Parliamentary Constituency was part of South West Thames interim district and is now part of Lambeth, Southwark and Wandsworth Jobcentre Plus district. The three areas for which data is given above are thus different, so the data is not comparable.
2. Sure Start maternity grants were introduced on 27 March 2000. The very small number of cases for 1999–2000 has been excluded for data protection reasons.
3. Data is given for all applications and awards, irrespective of whether the application was made by the mother or her partner.

DWP Social Fund Policy, Budget and Management Information System.

Winter Fuel Allowance (Oldham, West and Royton)

Mr. Meacher: To ask the Secretary of State for Work and Pensions how many senior citizens in Oldham, West and Royton have benefited from the winter fuel allowance since 1997. [170951]

Malcolm Wicks: The number of senior citizens in the Oldham, West and Royton constituency who have benefited from a Winter Fuel Payment in each year since 1999–2000 (including provisional figures for 2003–04) is in the table. Information relating to the 1997–98 and 1998–99 winters is not available.

	Payments made
1999–2000	15,840
2000–01	17,330
2001–02	17,270
2002–03	17,170
2003–04	17,160

Notes:

1. Numbers are rounded to the nearest 5.
2. Please note that the figures for 2003–04 refer only to the main payment run i.e. they do not include the late payment run figures. We estimate that there are approximately 100,000 people in Great Britain paid via late payment runs (0.8 per cent. of all payments). However, since late payment runs are mainly in respect of non-system cases whose claim had not been received by Qualifying Week, they are heavily skewed towards men aged 60.

Source:

IAD Information Centre, 100 per cent. samples.

TREASURY

Child Benefit

Bob Spink: To ask the Chancellor of the Exchequer what the total funding allocation for his Department was in 2003–04 for child benefit. [170820]

Ruth Kelly: The funding provision for 2003–04 for child benefit can be found on page 524 in the Central Government Supply Estimates 2004–05, (published April 2004).

National Minimum Wage (Oldham, West and Royton)

Mr. Meacher: To ask the Chancellor of the Exchequer how many workers in Oldham, West and Royton have benefited from the national minimum wage. [170946]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Meacher, dated 10 May 2004:

As National Statistician, I have been asked to reply to your recent question about the number of workers in Oldham, West and Royton who have benefited from the national minimum wage (NMW). (170946)

Estimates for Parliamentary Constituencies are not available.

However, the Office for National Statistics (ONS) calculates estimates of the number of jobs paid less than NMW rates for the United Kingdom and Government Office Regions. A guide to measuring low pay and associated articles and data can be found on the National Statistics website at: http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=5837&Pos=l&ColRank=l&Rank=272

Teenage Pregnancy

Tim Loughton: To ask the Chancellor of the Exchequer how many teenage girls *(a)* below the age of 16 years and *(b)* over the age of 16 years fell pregnant in (i) 2003–04 and (ii) each of the previous five years. [171070]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Tim Loughton, dated 10 May 2004:

As National Statistician I have been asked to reply to your recent question asking how many teenage girls *(a)* below 16 and *(b)* over 16 conceived in (i) 2003/4 and (ii) each of the previous five years. (171070)

For this purpose, teenagers are interpreted as the under 18 age group, in line with the target set by The Government Strategy on Teenage Pregnancy.

The table gives the number of conceptions among girls aged under 16, 16 and 17 in England and Wales for 1997 to 2001, the most recent year for which figures are available.

	Age at conception		
	Under 16	*16*	*17*
1997	8,271	14,058	21,029
1998	8,452	13,802	21,865
1999	7,945	13,334	20,749
2000	8,114	13,153	20,081
2001[1]	7,891	13,103	19,972

[1] Provisional.

Numbers of conceptions are estimated from registrations of births and notifications of abortions. Miscarriages before the 24th week of gestation are not included.

Average Earnings

Mr. Hoyle: To ask the Chancellor of the Exchequer what assessment he has made of the average earnings of *(a)* women and *(b)* men in (i) Lancashire and (ii) the North West. [172070]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Lindsay Hoyle, dated 10 May 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking what assessment has been made of the average earnings of *(a)* women and *(b)* men in (i) Lancashire and (ii) the North West. (172070)

Average earnings are estimated from the 2003 New Earnings Survey (NES) and are provided for full-time employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for MRS tables. The NES does not collect data on the self employed and people who do unpaid work.

The 2003 NES estimates that the total average weekly earnings of full-time adult employees in Lancashire were £471.30 for males and £357.40 for females, and in: the North West £483.10 for males and £367.90 for females. Please note that the former two estimates relate to the administrative county of Lancashire, which excludes Blackburn with Darwen unitary authority.

More detailed information on earnings in each of these areas is available in the published tables from the 2003 NES. The relevant estimates can be found in table A22.1 for males and A23.1 for females, and are available on the National Statistics website at: http://www.statistics.gov.uk/downloads/theme_labour/NES2003_Analyses_By_Region/NES2003_Analyses_By_Region.pdf

The NES, carried out in April of each year, is the most comprehensive source of earnings information in Great Britain. It is a 1 per cent. sample of all employees who are members of pay-as-you-earn (PAYE) schemes, but because of its sampling frame, it has difficulty capturing data on people with very low pay. It is therefore likely to under-represent relatively low paid staff earning below the tax threshold.

The New Earnings Survey publication criteria ensures that all estimates are undisclosive and of reliable quality. A number of estimates have been removed from the published tables for these reasons.

Butterfield Review

Norman Lamb: To ask the Chancellor of the Exchequer (1) what effect the proposed merger of the Inland Revenue and HM Customs and Excise will have on *(a)* plans to establish an independent Customs and Excise prosecutions office and *(b)* the implementation of other recommendations in the Butterfield Review; and if he will make a statement; [171051]

(2) if he will make a statement on the implementation of the recommendations of the Butterfield Review; [171059]

(3) to what extent lawyers acting on behalf of HM Customs and Excise have relinquished responsibility for prosecutions resulting from Customs investigations; [171061]

(4) pursuant to his written ministerial statement of 8 December 2003, *Official Report*, column 72–3WS on the Butterfield Review, when he intends to establish an

independent Customs and Excise prosecutions office; what practical issues he is discussing with the Attorney-General regarding the creation of an independent Customs and Excise prosecutions office; and if he will make a statement. [171062]

John Healey: As indicated in the joint statements I made with the Attorney-General on 15 July and 8 December 2003, the Government have accepted the recommendations contained in Mr. Justice Butterfield's report in respect of Customs and Excise's investigative practices, and that offences investigated by Customs officers should be prosecuted by an independent prosecuting authority. These are being implemented.

Legislation will be required to establish fully the independent prosecuting authority and we aim to introduce this in the course of this year.

Prior to legislation being put in place, it is our aim to continue as far as possible the separation of the prosecution function from Customs and Excise begun following the Butler report of 14 April 2000. Various options are currently being examined with several steps already agreed, including appointing a new director for the organisation and amending the Memorandum of Understanding agreed on 9 January 2003—in line with the Gower Hammond report of 5 December 2000—between myself, the Attorney-General and the Commissioners of Customs and Excise. This Memorandum of Understanding concerns the conduct, resourcing and accountabilities for Customs and Excise prosecutions under the auspices of the Attorney-General as well as the arrangements for the prosecution of offences investigated by Customs officers. That Memorandum can be found at Appendix 9 of the Butterfield Report and makes it clear that since 1 April 2002 those lawyers who prosecute criminal cases arising from Customs investigations are accountable to the Attorney-General for the conduct of those prosecutions rather than to Treasury Ministers or the Commissioners of Customs and Excise. The amendments envisaged include the role of the new director.

Among the practical issues presently under discussion with the Attorney-General are the future relationship between the independent prosecuting authority, the new revenue department and the Serious and Organised Crime Agency (SOCA).

Credit Unions

Mr. Drew: To ask the Chancellor of the Exchequer what discussions he has had recently with the Association of British Credit Unions Ltd. on expansion of credit unions in the UK. [168800]

Ruth Kelly: Treasury Ministers and officials meet with representatives of ABCUL regularly to discuss a wide range of issues. As was the case with previous Administrations, it is not the Government's practice to provide details of all such meetings, as provided for under Exemption 7(b) of the Code of Practice on Access to Government Information. Treasury meetings are conducted in accordance with the Ministerial Code and the Civil Service Code, as appropriate.

Customs and Excise

Norman Lamb: To ask the Chancellor of the Exchequer (1) when HM Customs and Excise were first informed of the discovery of the informant record for Mr. Alfred Allington; and for what reasons the existence of this record was not referred to in the Butterfield Review; [171048]

(2) if he will make a statement on effects of excise diversion fraud on London City bonded warehouses; [171049]

(3) whether he intends to re-open the Butterfield Inquiry following recent court evidence concerning Mr. Alfred Allington's relationship with HM Customs and Excise; [171058]

(4) pursuant to his written ministerial statement of 8 December 2003, if he will make a further statement on the practices and procedures of disclosure, associated investigation techniques and case management in HM Customs and Excise criminal cases; [171060]

(5) when *(a)* he and *(b)* Ministers in his Department were first informed of the existence of the informant record for Mr. Alfred Allington; and if he will make a statement; [171074]

(6) how many prosecutions relating to London City Bond *(a)* have been reviewed, *(b)* are to be reviewed and *(c)* have been overturned. [171075]

John Healey: The effects of the excise diversion frauds involving the London City Bond warehouse, and the validity of HM Customs and Excise's practices and procedures of disclosure, associated investigation techniques and case management in criminal cases, were fully considered in independent reviews by Mr. John Roques and Mr. Justice Butterfield, both of which are available in the Library of the House. Recommendations arising from those reviews are being implemented, as announced most recently in the Written Ministerial Statements of 15 July and 8 December 2003 by the Attorney-General and I.

24 London City Bond-related cases have been reviewed. There are no further cases to be reviewed. 48 convictions, in 8 cases, have to date been overturned on appeal, of which 5 appeals (totalling 35 convictions) had been heard before the Customs and Excise Prosecutions Office launched its wider review of cases following the decision in November 2002 to offer no evidence in London City Bond-related cases before Liverpool Crown Court.

Customs has trawled all areas of the Department for any material of potential relevance. Where further disclosable material has been uncovered, it has been passed directly to the Metropolitan Police to assist their investigation into the circumstances of the collapse of the London City Bond cases, and to Mr. Justice Butterfield. That trawl, by Customs officials, brought to light the record relating to Mr. Alfred Allington at the end of June 2003; the documents were handed over to Mr. Justice Butterfield in mid July. The Customs and Excise Prosecutions Office informed the Attorney-General of the Alf Allington informant record issue on 20 January 2004, as part of a general briefing about the review of London City Bond-related cases. A copy of that submission was sent to me on that date. It would not be proper to comment on the significance of this

material, and whether it gives rise to any need to re-open Mr. Justice Butterfield's review, until any other proceedings to which it is relevant have been completed.

Employment (Oldham, West and Royton)

Mr. Meacher: To ask the Chancellor of the Exchequer (1) what the *(a)* change and *(b)* percentage change was in full-time permanent jobs in Oldham West and Royton from 1997 to 31 December 2003; [170903]

(2) how many new jobs have been created in Oldham West and Royton since 1997. [170904]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Meacher dated 10 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Questions about full-time jobs and jobs created in Oldham West and Royton. (170903, 170904)

While statistics of jobs created are not available explicitly, statistics from surveys enable comparisons to be made of net changes, in numbers of jobs, from year to year.

The attached table shows the information requested, relating to all jobs and full-time jobs, in Oldham West and Royton Parliamentary Constituency, for 1997 and the latest year available, 2002.

Information is not available about whether the jobs were permanent.

Number of full-time employees and total number of employees in Oldham West and Royton Parliamentary Constituency: 1997 and 2002

percentage

	Full-Time	*Total*
Number of employees		
1997	31,400	45,000
2002	32,100	45,300
Change from 1997 to 2002		
Absolute	700	300
Percentage	2.3	0.7

[1] Employee jobs only, not self-employed jobs

Source:

1997: Annual Employment Survey, rescaled 2002; Annual Business Inquiry (ABI)

Fuel Cell Technology

Mr. Todd: To ask the Chancellor of the Exchequer what fiscal incentives are available to UK companies involved in the development of fuel cell technologies; and if he will make a statement. [171264]

John Healey: The Chancellor announced in Budget 2002 that hydrogen would be exempt from fuel duty for a limited period, to encourage further development and early take-up. Budget 2002 also introduced enhanced capital allowances for investments in hydrogen fuelling infrastructure. In addition, companies developing fuel cell technologies can benefit from research and development tax credits, announced in Budget 2000. The Department of Trade and Industry is responsible for other measures to support the development of fuel cell technologies, including through the Advanced Fuel Cells Programme. The Carbon Trust, which is funded by revenue recycled from the Climate Change Levy, supports the development of innovative technologies.

Income Tax

John Mann: To ask the Chancellor of the Exchequer how income tax receipts as a percentage of the total tax take have varied over the last 20 years. [171310]

Dawn Primarolo: The information requested can be found on the Inland Revenue website: www.inlandrevenue.gov.uk/stats/tax_receipts/table1–2.pdf Personal tax credits are classified as negative income tax in these statistics to the extent that they offset the income tax liability of the family. This affects the figures from October 1999 onwards. Total tax take is defined as net taxes and social security contributions. The data are not published as a series. However the figure for 2002–03 can be found in the Budget 2004 Financial Statement and Budget Report, Table C8.

Inland Revenue Guidance

Mr. Barnes: To ask the Chancellor of the Exchequer if he will arrange for the Inland Revenue to publicise the hardship provisions in its Code of Guidance on overpayments. [170096]

Dawn Primarolo: I refer my hon. Friend to the replies I gave my hon. Friend, the Member for Glasgow Anniesland (John Robertson) on 21 January 2004, *Official Report*, column 1259W and the hon. Member for North Norfolk (Norman Lamb) on 27 February 2004, *Official Report*, columns 570–71W.

Job Vacancies (Oldham, West and Royton)

Mr. Meacher: To ask the Chancellor of the Exchequer how many job vacancies there were in Oldham West and Royton in *(a)* 1997 and *(b)* 2003. [170898]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Meacher dated 10 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about job vacancies in Oldham West & Royton. (170898)

According to Jobcentre Plus administrative records the number of unfilled vacancies in the Manchester travel-to-work area was 9,767 on average during 1997. This represents only a proportion of all the vacancies available, as not all vacancies are notified to Jobcentres.

Figures are not available for Oldham West & Royton alone because the vacancies are allocated to local Jobcentres, not according to constituency boundaries, and because of the practice of notifying some vacancies centrally with one Jobcentre taking vacancies for others in the same district.

Jobcentre vacancy statistics were withdrawn from National Statistics in September 2001 as a result of distortions to the data, which occurred following the introduction of new administrative procedures by Jobcentre Plus. Comparable figures for vacancies in 2003 are therefore unavailable.

Results from the ONS Vacancy Survey were released as National Statistics from July 2003, but are not available for local areas.

Productivity

Bob Spink: To ask the Chancellor of the Exchequer what action he is taking to *(a)* increase the productivity and *(b)* cut the costs of his Department and its agencies and non-departmental public bodies. [171882]

Ruth Kelly: The Chancellor of the Exchequer announced in the Budget that the Government are setting a stretching but realistic target for the whole public sector to deliver efficiencies of 2.5 per cent. a year over the three years of the 2004 Spending Review period. Meeting this target would deliver efficiency gains equivalent to £20 billion a year by 2007–08. The administration costs of all Departments are to be capped at or below the 2005–06 nominal level for 2006–07 and 2007–08. The Budget set out detailed proposals for meeting this target in relation to DWP, IR and HMCE.

All Departments continue to work closely with Sir Peter Gershon to prepare detailed efficiency proposals for consideration in the 2004 Spending Review. Departments' agreed efficiency programmes will be published in parallel with the Spending Review settlement.

Public Sector Employment

John Mann: To ask the Chancellor of the Exchequer how much he expects employment in the public sector, excluding the areas of health and education, to change from financial year *(a)* 2004–05 to 2005–06 and *(b)* 2005–06 to 2006–07. [171259]

Mr. Boateng: A gross reduction of at least 54,000 civil servants by 2008 was announced in the Budget, and further reductions will be realised as efficiency plans are implemented. This will reflect back office workforce reductions and redeployment to the frontline.

John Mann: To ask the Chancellor of the Exchequer if he will make a statement on variations in the workforce employed in the public sector in England over the last 20 years. [171312]

Mr. Boateng: Public sector workforce figures are set out in ONS Labour Market Trends (September) publication.

Public Spending

John Mann: To ask the Chancellor of the Exchequer what *(a)* change and *(b)* percentage change he expects in levels of public spending excluding health, education and defence (i) in 2004–05 compared with 2003–04 and (ii) in 2005–06 compared with 2004–05. [171243]

Mr. Boateng: The latest figures for spending in these years for education were set out in table 1.2 of Public Expenditure Statistical Analyses (PESA) 2004 (CM6201), and on every function in tables 3.8 and 3.9 of PESA 2004.

Statutory Paternity Pay

Malcolm Bruce: To ask the Chancellor of the Exchequer how many men have *(a)* requested and *(b)* received statutory paternity pay since its introduction; and if he will make a statement on the success of the take-up of this entitlement. [169299]

Dawn Primarolo *[holding answer 29 April 2004]:* The statistics requested are not currently available.

Tax Credits

Mr. Willetts: To ask the Chancellor of the Exchequer when he expects to complete the process whereby families in receipt of income support and jobseeker's allowance move on to the child tax credit. [169393]

Dawn Primarolo *[holding answer 29 April 2004]:* I refer the hon. Member to my answer to the hon. Member for Tatton (Mr Osborne) on 11 March 2004, *Official Report*, column 1645W.

Mr. Willetts: To ask the Chancellor of the Exchequer how many families in receipt of *(a)* income support and *(b)* jobseeker's allowance have been moved on to the child tax credit. [169395]

Dawn Primarolo *[holding answer 10 May 2004]:* I refer the hon. Member to my reply to the hon. Member for Romford (Mr. Rosindell) on 11 March 2004, *Official Report*, column 1645W.

John Barrett: To ask the Chancellor of the Exchequer if he will compensate those people who have received tax credit payments above the level to which they were entitled because of administrative errors and who are to have future payments reduced as a result. [170050]

Bob Spink: To ask the Chancellor of the Exchequer what compensation is available to people whose *(a)* working tax credit and *(b)* family tax credit payments are improperly stopped; and if he will make a statement. [171090]

Dawn Primarolo: I refer the hon. Members to what I said during the debate in the House on 7 July 2003, *Official Report*, column 860.

Mr. Willetts: To ask the Chancellor of the Exchequer when he expects awards for *(a)* child tax credit and *(b)* working tax credit in 2003–04 to be finalised. [170220]

Dawn Primarolo *[holding answer 4 May 2004]:* I refer the hon. Member to the reply I gave the hon. Member for Birmingham Northfield (Richard Burden) on 19 November 2003, *Official Report*, columns 1099–1100W.

Bob Spink: To ask the Chancellor of the Exchequer (1) if he will make a statement on the payment of working tax credit from the start of the current financial year and the adequacy of computer systems; [171088]

(2) if he will make a statement on the payment of family tax credit from the start of the current financial year and the adequacy of computer systems. [171089]

Dawn Primarolo: The new IT systems for tax credits were introduced as planned. As at 5 April 2004, there are 6.0 million families benefiting from tax credits. The publication date of the next issue of tax credits statistics by the Office for National Statistics will be announced in due course.

Geraldine Smith: To ask the Chancellor of the Exchequer what assessment has been made of hardship caused to families as a result of the way tax credit overpayments are being recovered. [165418]

Dawn Primarolo: Additional payments were made in 2003–04, to help ensure that paying back tax credits overpayments did not cause hardship. In addition,

because of the increased generosity of Child and Working Tax Credits the overall level of support to low and moderate income families is higher, reducing the risk of hardship.

The Inland Revenue's Code of Practice 26, "What happens if we have paid you too much tax credit?", sets out the rules that the Inland Revenue follows when adjusting an award to recover an overpayment.

As the Code sets out, the maximum amounts by which payments would be reduced is 10 per cent. for claimants receiving the maximum award; 100 per cent. for claimants receiving only the family element of Child Tax Credit and 25 per cent. for all other claimants.

Mr. Laurence Robertson: To ask the Chancellor of the Exchequer what assessment he has made of the amounts of over-payments made to people through the working tax credit scheme; how many people have been overpaid; what arrangements are in place to enable people to manage to pay back these amounts; and if he will make a statement; [166041]

Mr. Wood: To ask the Chancellor of the Exchequer if he will conduct a review of the *(a)* investigation and *(b)* recovery of over-payments of (i) child and (ii) working tax credits by the Inland Revenue; and if he will make provision for claimants to appeal against (A) over-payment decisions and (B) recovery actions. [167058]

Dawn Primarolo *[holding answer 19 April 2004]:* I refer the hon. Members to the replies I gave the hon. Member for South Down (Mr. McGrady) on 3 February 2004, *Official Report*, column 828W, and the hon. Member for Norfolk North (Mr. Lamb) on 22 March 2004, *Official Report*, column 664W.

Tax Evasion

Brian Cotter: To ask the Chancellor of the Exchequer how many prosecutions the Inland Revenue has attempted to bring under the Finance Act 2000 for income tax evasion; what the value was of the revenue the Inland Revenue has attempted to recoup; how many attempted prosecutions have been successful; and how much has been recouped by the Treasury as a result. [167510]

Dawn Primarolo: The Board of Inland Revenue has prosecuted, in total, 215 individuals since the introduction of the new offence in S144, Finance Act 2000. Most have involved charges of cheating the public revenue or false accounting. The total includes eight people who have been successfully prosecuted using the offence in section 144 of Finance Act 2000 of fraudulently evading income tax. There have been no acquittals in cases where charges were brought under that offence. In the eight cases successfully prosecuted, approximately £100,000 tax loss has been recouped.

There are presently a further eighteen cases where criminal proceedings involving the offence in Finance Act 2000 are in the course of being instituted.

Tax Returns

Mr. Flook: To ask the Chancellor of the Exchequer how many PAYE scheme notices were sent out by the Inland Revenue to companies it had been notified were dormant and would file nil returns in each tax year since 1997. [167585]

Dawn Primarolo: There are various PAYE scheme notices, such as reminders to pay and employers' end of year returns. No such notices should have been issued since 1997 where the relevant PAYE scheme record has been noted as "dormant". IR hold records for companies on a number of different IT systems. Some PAYE notices may have been issued for dormant companies where records held on other IR systems have been noted "dormant" but the PAYE scheme record has not. No numbers of such cases are available.

Mr. Flook: To ask the Chancellor of the Exchequer how many and what proportion of penalty notices following the 31 January 2004 deadline for filing tax returns were sent out by 7 February. [167586]

Dawn Primarolo: In line with previous years, 90.6 per cent. of self assessment tax returns for 2003–04 were filed on time. Over 1 million returns were filed electronically. The Inland Revenue issued 952,766 Late Filing Penalty Notices on 17 February 2004 for returns not submitted by the due date.

HEALTH

Drug Misuse (Liverpool)

Mr. Kilfoyle: To ask the Secretary of State for Health what assessment he has made of the number of drug addicts in Liverpool, Walton. [166986]

Miss Melanie Johnson: This information is not available because there is no longer a register of heroin addicts. The Home Office register of heroin addicts ceased in 1997 as resistance to register by heroin users meant the data were so inaccurate, it was unusable.

Agency Doctors/Nurses

Mr. Hoyle: To ask the Secretary of State for Health what the cost was of agency *(a)* doctors and *(b)* nurses in (i) Preston and (ii) Chorley hospitals in each of the last three years. [148374]

Miss Melanie Johnson: The National Health Service does not separately record the cost of employing agency staff.

Agriculture Council

Joan Ruddock: To ask the Secretary of State for Health who will represent the UK Government at the meeting of the European Agriculture Council in Luxembourg on 26 and 27 April. [167173]

Miss Melanie Johnson *[holding answer 22 April 2004]:* I refer my hon. Friend to the response given to her by my hon. Friend, the Minister for Environment, Food and Rural Affairs (Mr. Bradshaw), on 27 April 2004, *Official Report*, column 861W.

Anti-depressants

Paul Flynn: To ask the Secretary of State for Health what assessment he has made of the correlation between the number of prescriptions for anti-depressant drugs and recorded suicides in each of the last 10 years. [166858]

Ms Rosie Winterton: The Department has not analysed any relationships between the number of prescriptions for anti-depressant drugs and recorded suicides in each of the last 10 years.

Asthma

Dr. Stoate: To ask the Secretary of State for Health what plans he has to commission research targeted at the needs of people whose asthma fails to respond to current treatments. [170237]

Dr. Ladyman: The National Health Service health technology assessment programme has commissioned a systematic review to examine the impact of psycho-educational interventions on health outcomes and costs in adults and children with difficult asthma. The report is expected for publication in early 2005.

The Medical Research Council (MRC) always welcomes high quality applications from the scientific community for support for research into any aspect of human health, including severe difficult asthma, and these are judged in open competition with other demands in funding. Awards are made according to their scientific quality and importance to human health. In 2001–02, MRC expenditure on its respiratory disorders portfolio was an estimated £11.9 million, which included work on asthma.

Bedside Televisions

Mr. Lansley: To ask the Secretary of State for Health if he will estimate the cost of *(a)* fixing so that they turn off and *(b)* replacing the faulty bedside televisions that have been provided. [167606]

Mr. Hutton: The bedside televisions provided are not faulty; no fixing or replacement is required and no additional costs are involved. Patients can turn off screens or turn them to face the wall if they prefer.

Mr. Lansley: To ask the Secretary of State for Health which companies have contracted with NHS trusts to provide bedside televisions. [167607]

Mr. Hutton: Over 59,000 patients in 126 national health service hospitals have access to bedside televisions and telephones. The companies listed have contracts with NHS trusts to provide the service.

Patientline

Wandsworth Electrical Ltd.

Hospital Telephone Services

Kerfone

Premier Managed Payphones

Patientpal.

Mr. Lansley: To ask the Secretary of State for Health what estimate he has made of the cost to the NHS of providing bedside televisions for patients. [167659]

Mr. Hutton: The bedside televisions are provided at no cost to the national health service.

Private companies provide the televisions and bear the cost of installation, managing and running of them. As a result, the NHS has benefited from over £100 million of private sector investment.

Blood Transfusion

Nick Harvey: To ask the Secretary of State for Health if he will take steps to ensure that those prevented from giving blood as a consequence of precautions against the transmission of variant Creutzfeld-Jakob disease are not disadvantaged in the provision of *(a)* insurance, *(b)* mortgages and *(c)* other relevant financial services. [164281]

Ruth Kelly: I have been asked to reply.

Individual medical information can be relevant to applications for life and health insurance in particular. We are not aware of any specific issues arising in connection with those people who have had a blood transfusion since 1 January 1980, or in connection with anyone who has been prevented from giving blood as a consequence of precautions against the transmission of variant Creutzfeld-Jakob disease.

Cancer

Mr. Lansley: To ask the Secretary of State for Health how many consultants in cancer specialities were working in the NHS in England in each year since 1999. [167700]

Mr. Hutton: Information on the number of consultants working in cancer specialties in England in each year since 1999 is shown in the table.

Hospital, Public Health Medicine and Community Health Services (HCHS): Consultants in the six main cancer specialties

Numbers (headcount)

England[1]	*1999*	*2000*	*2001*	*2002*	*2003*	*December 2003*
All main cancer specialties	3,362	3,528	3,721	3,913	4,169	4,240
of which:						
Clinical oncology	305	307	333	315	347	358
Clinical radiology	1,507	1,585	1,645	1,702	1,810	1,822
Haematology	510	527	556	588	609	632
Histopathology	836	865	915	968	1,021	1,036
Medical oncology	110	133	147	185	202	211
Palliative medicine	94	111	125	155	180	181

[1] Data as at 30 September each year, except December 2003 data, which is at 31 December.

Department of Health medical and dental workforce census

Cancer Patients Survey

Mr. Burstow: To ask the Secretary of State for Health pursuant to his answer of 12 February 2004, *Official Report*, column 1684W, on the Cancer Patients Survey, when he expects to publish the analysis. [167534]

Miss Melanie Johnson: The analysis of the Cancer Patients Survey was published on 22 April 2004. Copies of the report have been placed in the Library and on the Department's website.

Commission for Patient and Public Involvement in Health

Mr. Randall: To ask the Secretary of State for Health how many forum members of the Commission for Patient and Public Involvement in Health have resigned since its inception. [167994]

Ms Rosie Winterton: Since their establishment on 1 December 2003, 662 members of Patients' Forums have resigned, which represents a turnover of 11 per cent.

Consultancy Posts

Bob Spink: To ask the Secretary of State for Health what his policy is on matching the number of consultant vacancies to the number of qualified trainees. [167061]

Mr. Hutton: We are investing in future growth in the medical workforce by increasing both medical school places and specialist registrar training places. We have already exceeded the autumn 2005 England medical school intake target of 5,894, two years early. In autumn 2003, intake was 6,030 compared with 3,749 in autumn 1997 and as at 30 September 2003, there were 14,619 specialist registrars working in the national health service, an increase of 2,709 since September 1997.

A range of national recruitment initiatives is in place to support doctors looking for consultant vacancies most suited to them. A new website at: www.doh.gov.uk/consultantjobs hosts thousands of consultant vacancies in England for domestic specialist registrars as well as potential international consultant recruits. Similarly, the national roll-out of e-recruitment, an online recruitment service for the NHS, will allow doctors to search and apply for consultant vacancies on one website. This new service at: www.nhs.uk/jobs will streamline and modernise the process of recruitment of all NHS staff. In addition, the new consultant entry scheme facilitates the placement of specialist registrars looking for fixed term placements to known consultant vacancies.

Consultants

Mr. Lansley: To ask the Secretary of State for Health what estimate he has made of the liability in the 2003–04 accounts of NHS Trusts of the implementation of the new consultant's contract. [168906]

Mr. Hutton: Funding for the consultant contract, based on the methodology agreed with the British Medical Association during the negotiations, was allocated to primary care trusts in full in December 2002 as part of main allocations. For 2003–04, additional funding worth 0.3 per cent. of allocations was allocated to primary care trusts for the implementation of the new consultant contract. We have given clear guidance to the National Health Service about how to manage costs within the financial envelope and how to manage funding flows, but decisions on how to spend this funding are made locally.

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* headcount and *(b)* whole-time equivalent consultants there were in each year between 1979 and 1997 inclusive. [168995]

Mr. Hutton: The information requested is shown in the table.

Hospital, Public Health Medicine and Community Health Services (HCHS) consultants by year—numbers and whole time equivalents (wtes)—as at 30 September each year

	Number	Wte
1979	13,034	11,578.4
1980	13,276	12,045.1
1981	13,545	12,300.4
1982	13,672	12,438.9
1983	13,987	12,723.8
1984	14,259	13,016.9
1985	14,535	13,257.4
1986	14,838	13,505.7
1987	15,081	13,681.5
1988	15,385	14,052.1
1989	15,883	14,517.5
1990	16,525	15,011.4
1991	16,834	15,332.8
1992	17,279	15,695.9
1993	17,605	16,044.5
1994	18,155	16,537.5
1995	19,524	17,899.6
1996	20,402	18,602.6
1997	21,474	19,661.3

Notes:

1. Figures before 1987 exclude staff on KE payscales (district directors of public health) as data on these are unavailable before 1987.

2. In 1987 there were 68 such staff.

Department of Health medical and dental workforce census.

Continuing NHS Care

Mr. Burstow: To ask the Secretary of State for Health pursuant to his answer of 24 March 2004, *Official Report*, columns 914–15W, on continuing NHS care, what information will be available centrally when the review is completed on *(a)* the number of people who should have been eligible for continuing NHS care who had been excluded and *(b)* the cost of reimbursing those people. [167940]

Dr. Ladyman: In due course, the Department expects information to be available centrally on the number of people granted recompense for being wrongly denied fully funded National Health Service continuing care and the aggregate cost of that recompense.

Correspondence

Sir Michael Spicer: To ask the Secretary of State for Health when a response will be sent to the letter from the hon. Member for West Worcestershire to the Parliamentary Under Secretary of State, Lord Warner, on 23 March. [168952]

Miss Melanie Johnson *[holding answer 27 April 2004]:* A reply was sent to the hon. Member on 29 April 2004.

Drug Action Teams

John Mann: To ask the Secretary of State for Health what the key performance indicators are for Drug Action Teams. [171431]

Miss Melanie Johnson: The Commission for Healthcare Audit and Inspection has included two performance indicators relating to drug action teams (and drug and alcohol action teams) in their performance rating assessment of national health service primary care trusts in England in 2003–04. They are:

drug misuse treatment—increase in drug misusers accessing treatment; and

drug misuse shared care—percentage of general practitioner practices in a shared care scheme for problematic drug misusers.

Foundation Trusts

Mr. Lansley: To ask the Secretary of State for Health what the public dividend capital was at 31 March of those NHS trusts becoming NHS foundation trusts on 1 April; whether in each case this is the initial public dividend capital of those foundation trusts; and what requests he has received for the issuing of additional public dividend capital to those foundation trusts under section 11 of the Health and Social Care (Community Health and Standards) Act 2003. [165729]

Mr. Hutton *[holding answer 19 April 2004]:* The amount of public dividend capital (PDC) outstanding on 31 March 2004 at each of the national health service trusts that became NHS foundation trusts on 1 April 2004 is shown in the table. The information is taken from the Department's records. The amount of PDC shown in the annual accounts of these trusts is subject to audit and may differ for technical accounting reasons. The initial PDC of a NHS foundation trust is the same as the closing PDC of the predecessor NHS trust.

To date, no requests have been received from NHS foundation trusts for additional public dividend capital under section 11 of the Health and Social Care (Community Health and Standards) Act 2003.

£ million

NHS foundation trust	*Amount of PDC outstanding at 31 March 2004*
Peterborough and Stamford Hospitals	68,379
Basildon and Thurrock University Hospitals	50,878
Moorfields Eye Hospital	27,810
Homerton University Hospital	77,160
The Royal Marsden	46,257
Bradford Teaching Hospitals	103,245
Stockport	65,686
Countess Of Chester Hospital	45,123
Royal Devon and Exeter	124,159
Doncaster and Bassetlaw Hospitals	113,495
Total	722,193

GP Surgeries

Mr. Burstow: To ask the Secretary of State for Health if he will list the maintenance backlog cost of general practitioner surgeries in the NHS in *(a)* England, *(b)* each strategic health authority and *(c)* each primary care trust in each year since 1997. [167413]

Mr. Hutton: There are some 10,500 general practitioner surgeries in England, of which 85 per cent. are either owner-occupied or rented by GPs, who are responsible for maintenance of their premises. The information requested is not held centrally and cannot be obtained without disproportionate cost.

Health Professionals (Training Costs)

Mr. Burstow: To ask the Secretary of State for Health if he will estimate the cost of training a *(a)* occupational therapist, *(b)* physiotherapist, *(c)* speech and language therapist, *(d)* district nurse and *(e)* health visitor. [169708]

Mr. Hutton: Information for England on the cost of training pre-registration occupational therapists, physiotherapists, speech and language therapists, excluding bursaries, and district nurses and health visitors are shown in the table.

Staff group	*2003–04 cost (£)*
Occupational therapist	20,420
Physiotherapist	20,980
Speech and language therapist	20,430
District nurse	23,600
Health visitor	23,600

Financial and Workforce Information Return (FWIR) November 2002.

Health Services

Mr. Djanogly: To ask the Secretary of State for Health if he will make a statement on the provision of NHS dental services in *(a)* the Huntingdon constituency and *(b)* Cambridgeshire. [170858]

Dr. Ladyman: The information relating to the provision of national health service dental services in the Huntingdon constituency and Cambridge have been placed in the Library.

Primary Care Trusts (PCTs) will have increased influence and control over the spread of NHS dental provision across their catchment area, and will have budgets devolved to them, so that the PCT will be able to keep the money locally for dentistry if a dentist leaves.

Nationally we have provided new investment totalling £90 million over the last year. £59 million will support access, and strategic health authorities have been advised of their shares and are working with their PCTs to address access issues. £30 million is to support information technology and the balance of £1 million will support organisational development locally.

Mr. Djanogly: To ask the Secretary of State for Health how many and what percentage of suspected cancer patients in the Huntingdon constituency saw an NHS consultant within two weeks in each of the last seven years. [170859]

Dr. Ladyman: The number of patients with suspected cancer who saw consultants within two weeks are as shown in the table for the two trusts within the Huntingdon constituency.

	Number of urgent GP referrals for suspected cancer	*Percentage seen by specialist with two weeks of referral*
Hinchingbrooke Healthcare National Health Service		
March 2002	468	99.8
March 2003	415	100.0
June 2003	499	100.0
September 2003	576	99.8
December 2003	593	100.0
Papworth hospital NHS Trust		
March 2002	7	100.0
March 2003	13	100.0
June 2003	8	100.0
September 2003	5	100.0
December 2003	5	100.0

Source:
Department of Health Statistics

Mr. Djanogly: To ask the Secretary of State for Health what changes there have been to NHS waiting list times in the last seven years for the residents of the Huntingdon constituency. [170860]

Dr. Ladyman: The table shows the changes in national health service waiting list times over the past seven years for the residents of Huntingdon constituency.

The total number of patients on the in-patient waiting list fell by 28,198 between the end of January 2004 and the end of February 2004 to 941,162. This is the ninth successive month the waiting list has been below a million.

DH form KH07

Mr. Kilfoyle: To ask the Secretary of State for Health how many *(a)* overseas doctors and *(b)* overseas nurses there were in Liverpool in (i) 1997 and (ii) 2003. [166949]

Miss Melanie Johnson: The information requested on overseas doctors has been placed in the Library. The equivalent information on overseas nurses is not collected centrally.

Mr. Ben Chapman: To ask the Secretary of State for Health if he will make a statement on the levels of elective admissions to the NHS in Wirral, South in the past five years. [166618]

Miss Melanie Johnson: The information requested is shown in the table.

Provider of treatment RBL Wirral Hospitals NHS Trust, count of finished elective (waiting list, planned and booked) admission episodes—NHS hospitals, 1998–99 to 2002–03

	Finished Admission Episodes
1998–99	36,667
1999–2000	29,759
2000–01	32,018
2001–02	33,351
2002–03	29,664

Notes:
1. A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Figures have not been adjusted for shortfalls in data (i.e., the data are ungrossed).

Hospital episode statistics, Department of Health.

Hearing Aids

Bob Spink: To ask the Secretary of State for Health (1) if he will make a statement on the implementation of the modernising hearing aid services programme; [171091]

(2) what continuation funding will be available for the modernising hearing aid services programme after central funding ends in 2005; and if he will make a statement. [171092]

Dr. Ladyman: The modernising hearing aid services (MHAS) programme has resulted in the provision of digital hearing aids and the modernisation of services in two thirds of the audiology departments in England. By the end of March 2005, all audiology departments will have been through the programme. An extra £26.4 million capital and £12 million revenue is scheduled to be distributed to lead primary care trusts for the financial year beginning April 2005 as part of the general allocations.

Bob Spink: To ask the Secretary of State for Health what proportion of NHS hearing aids are digital in *(a)* Essex and *(b)* England; and if he will make a statement. [171093]

Dr. Ladyman: This information is not collected centrally.

Bob Spink: To ask the Secretary of State for Health what progress has been made in Essex on the modernising hearing aid services programme. [171094]

Dr. Ladyman: Four of the five acute trusts in Essex have modernised audiology departments and are fitting digital hearing aids. Epping Forest Primary Care Trust (St. Margaret's Hospital) will commence fitting digital hearing aids in 2005.

Bob Spink: To ask the Secretary of State for Health when he expects full take-up of NHS digital hearing aids to be achieved in *(a)* Essex and *(b)* England. [171095]

Dr. Ladyman: All audiology departments in England will routinely be fitting digital hearing aids by March 2005, two thirds are already doing so.

The Department is investing a further £94 million in the financial years 2003–04 and 2004–05. This is additional to a total of £30.75 million invested since the Modernising Hearing Aid Services (MHAS) project began in September 2000.

Essex Strategic Health Authority, and primary care and other trusts within Essex continue to work towards meeting the March 2005 target.

Hearing-impaired Patients

David Taylor: To ask the Secretary of State for Health what measures are in place to ensure that patients who are deaf or have hearing problems have full access to the NHS services by October. [170965]

Dr. Ladyman: The Department is working in partnership with the Disability Rights Commission on a range of measures to support the National Health Service in improving access to information and services, communications and levels of awareness of disability issues. These measures include, for example, developing health sector-specific practical guidance and promoting awareness of the access duties within the NHS.

Helen Jones: To ask the Secretary of State for Health what steps he is taking to improve the way that the NHS communicates with patients who are deaf or who have a hearing impairment. [171013]

Dr. Ladyman: The Disability Discrimination Act 1995 requires service providers to make reasonable adjustments to the way they deliver their services so that disabled people can use them. In January 1999, the Department issued guidance to chief executives of National Health Service Trusts on providing good quality services meeting the needs of disabled people. This guidance contains a section explaining the needs of people who are deaf or who have a hearing impairment setting out a range of ways in which better communication can be supported. For example, the, guidance recommends that interpreters used for medical consultations should be appropriately qualified, that hospitals and health centres should maintain an up to date list of accredited sign language interpreters, and that letter headings, leaflets and information sheets should include text phone, fax and email numbers to facilitate responses from deaf people.

NHS organisations are responsible for their own compliance with the provisions of the Disability Discrimination Act. However, the Department is working in partnership with the Disability Rights Commission on a range of measures to support the NHS in improving access to information and services, communications and levels of awareness of disability issues. These measures include, for example, developing health sector-specific practical guidance and promoting awareness of the access duties within the NHS.

Hunters Moor Hospital (Newcastle)

Mr. Cousins: To ask the Secretary of State for Health how many business cases have so far been *(a)* submitted and *(b)* rejected for a replacement neuro-disability centre for Hunters Moor Hospital, Newcastle; what the date was of the first such submission; and whether a business case has now been accepted. [168699]

Miss Melanie Johnson: Three business cases have been submitted.

The first outline business case was submitted in 1995. It was not progressed further because of changes in the time scale of implementing the Newcastle Strategic Review.

The second outline business case was submitted in 1998 to provide interim accommodation. It was rejected by the community health council. The former Newcastle City Health Trust withdrew the proposal and agreed to explore further options.

The third outline business case was developed following a period of public consultation. It was approved by Northumberland, Tyne and Wear Strategic Health Authority in 2003. The full business case is now being developed.

Internet Medicine Sales

Mr. Burstow: To ask the Secretary of State for Health if he will make a statement on his Department's monitoring of the sale of *(a)* licensed and *(b)* unlicensed medicines over the internet. [167803]

Ms Rosie Winterton: The Medicines and Healthcare products Regulatory Agency (MHRA) works in co-ordination with world-wide enforcement bodies to address this area of criminal activity. The MHRA is a member of the Permanent Forum on International Pharmaceutical Crime (PFIPC). This forum was set up by the United Kingdom in 1998 to promote good practice and develop intelligence links and networks. Internet crime is a frequent topic for discussion.

An initiative to co-ordinate action within the European Community and pre accession countries was established this year to advise and assist prospective members and to raise awareness of issues relating to the internet.

An initiative is currently in progress to identify a commercially available internet monitoring software package for use by the MHRA.

In addition, the MHRA and the former Medicines Control Agency (MCA) has been involved with three initiatives involving the availability of medicines on the internet sponsored by other Government agencies and local authorities, such as the Office of Fair Trading, Inland Revenue and trading standards departments. These initiatives identified websites which appeared to be in breach of medicines legislation. The MHRA/MCA investigated the services offered by those websites and took appropriate action.

Mr. Burstow: To ask the Secretary of State for Health if he will make a statement on his Department's policy on enforcing the General Medicine Council's ruling on the sale of medicines over the internet. [167804]

Ms Rosie Winterton: In November 1998 the General Medical Council (CMC) issued guidance to doctors on providing advice and medicine on line or by telephone. The GMC guidance promotes good medical practice but is not for the Government to enforce.

Mr. Burstow: To ask the Secretary of State for Health what plans he has to seek to amend the law relating to sales of drugs over the internet; and if he will make a statement. [167805]

Ms Rosie Winterton: There are no plans to amend medicines legislation relating to the internet. Legal controls on the retail sale or supply of medicines are set out in the Medicines Act 1968 and associated regulations.

These controls apply without distinction to medicines sold or supplied through internet transactions. Although there are strict legal controls in legislation on the sale, supply and advertisement of medicinal products within the European Community, the Medicines and Healthcare products Regulatory Agency (MHRA) accepts that the sale of medicines over the internet poses unique challenges to national authorities.

Along with counterparts in other member states and other enforcement bodies world-wide (including the Food and Drugs Administration), the MHRA continues to monitor developments. However, by its very nature, the internet, with its broad reach, relative anonymity and the ease of creating new websites (plus removing old ones) means that ensuring effective compliance with legislative requirements requires a global commitment.

Mr. Burstow: To ask the Secretary of State for Health how many investigations have been carried out into the sale of unlicensed medicines via the internet by *(a)* the Medicines Control Agency for each year between 1997 and 2003 and *(b)* the Medicines and Healthcare Regulatory Agency in the last year. [167808]

Ms Rosie Winterton: The number of internet investigations carried out by the Medicines Control Agency (MCA) and the Medicines and Healthcare products Regulatory Agency (MHRA) involving unlicensed medicinal products year-on-year since 1997 is shown in the table.

	Number of cases
1997–2001[1]	3
2001–02[1]	1
2002–03[1]	5
2003–04[2]	7

[1] Investigated by the MCA.
[2] Investigated by the MHRA.

Mr. Burstow: To ask the Secretary of State for Health how many prosecutions against sellers of unlicensed medicines via the internet *(a)* have been undertaken, *(b)* have been successful and *(c)* are in preparation by (i) the Medicines Control Agency for each year between 1997 and 2003 and (ii) the Medicines and Healthcare Regulatory Agency in the last year. [167809]

Ms Rosie Winterton: To date, there has been one successful prosecution, by the then Medicines Control Agency, relating to the sale of unlicensed medicines on the internet. This took place in 1999. No other such prosecutions have been brought.

The Medicines and Healthcare products Regulatory Agency currently has two cases prepared for prosecution involving the sale of unlicensed medicines on the internet.

Mr. Burstow: To ask the Secretary of State for Health how many employees are engaged in the Special Inquiry Unit of the Medicines and Healthcare Regulatory Agency investigating drugs sales through the internet. [167810]

Ms Rosie Winterton: The work of the special enquiry unit of the Medicines and Healthcare products Regulatory Agency (MHRA) was absorbed into the mainstream criminal investigation unit in October 2001.

The MHRA currently employs 14 full time investigators. The investigators cover all allegations relating to breaches of medicines legislation and do not exclusively investigate sales via the internet.

Mr. Burstow: To ask the Secretary of State for Health what training is undertaken by employees of the Special Inquiry Unit of the Medicines and Healthcare Regulatory Agency investigating drug sales through the internet. [167811]

Ms Rosie Winterton: All investigation officers in the Medicines and Healthcare products Regulatory Agency (MHRA) receive training in how to undertake investigations into cases involving the internet. Also, specialist administrative staff involved in internet casework have received additional training in internet search techniques.

In addition, senior officers from the MHRA visited United States federal agencies in Washington at the end of last year as part of a familiarisation exercise on electronic investigative techniques currently in use in the United States. They received demonstrations of training and software packages on the market and in operation. Senior officers in the MHRA are in the process of evaluating which systems will be best suited to its needs.

Learning Disabilities

Paul Holmes: To ask the Secretary of State for Health how much money has been invested in the Learning Disability Development Fund; from what sources the funding comes; and if he will make a statement. [170197]

Dr. Ladyman: "Valuing People—a New Strategy for Learning Disability for the 21st Century" announced the creation of the learning disability development fund (LDDF) to provide central support for key aspects of the strategy. It was introduced in 2002–03.

The revenue allocations were £20.6 million in 2002–03, and £21.1 million in 2003–04. The capital allocations for both years were £20 million.

The revenue element of the LDDF is formed from that element of the old long stay adjustment within general health allocations which is released as former long stay patients die.

The LDDF capital is additional investment which resulted from the 2002 spending review.

Paul Holmes: To ask the Secretary of State for Health how many people with learning disabilities have access to a health facilitator; how many have received an health action plan, broken down by region; and if he will make a statement. [170199]

Dr. Ladyman: The number of people with learning disabilities with access to a health facilitator and a health action plan is not available.

Good practice guidance was issued in July 2002 on two key elements of the strategy for improving the health of people with learning disabilities: health action plans and health facilitation. This was followed up with a series of regional workshops. In the light of these the percentage 'Valuing People' support team has been working with local learning disability partnership boards to help them implement health action plans and health facilitation in their areas.

"Building on the Best", our response to the consultation on choice, responsiveness and equality in the national health service, published in December 2003, said that we will bring forward proposals during 2004 to offer disabled people the option of taking up an annual health check. We are considering how to take this forward in a way that will further support the health action planning process.

Long-term Care

Bob Spink: To ask the Secretary of State for Health (1) if he will, in the light of the recent Ombudsman's report on Mr. Curran, assess the criteria used by the Castle Point and Rochford Primary Care Trust to determine payment of the long-term health and care costs; and if he will make a statement on their consistency with the principle of free NHS care for those with serious health problems; [171717]

(2) if he will refund to families the costs they have been charged for the long-term care of their loved ones where these charges have been found to relate primarily to clinical care necessary because of severe illness; and if he will make a statement; [171731]

(3) if he will make it his policy to ensure that people with severe irreversible brain damage who need long-term health care are not required to pay for that care; [171733]

(4) if he will list the strategic health authorities under which the long-term care of people with Parkinson's disease is *(a)* funded under the NHS and *(b)* not funded under the NHS; [171734]

(5) if he will make a statement on the consistency among strategic health authorities' policies on paying for long-term care costs for people with Parkinson's disease and other serious health needs. [171735]

Dr. Ladyman: Recompense payments have been made, and will continue to be made, in cases where investigations have revealed that individuals were wrongly denied fully funded national health service continuing care. Eligibility for fully funded NHS continuing care is based on the individual's level of assessed health care needs, not on a condition specific basis. All strategic health authorities have recently reviewed their criteria and have provided the Department with evidence of the legal advice sought to ensure their criteria's compliance with the NHS' legal responsibilities.

Malnutrition

Sandra Gidley: To ask the Secretary of State for Health how many elderly people were diagnosed as suffering from malnutrition *(a)* in total and *(b)* broken down by health authority, in each year since 1997; and if he will make a statement. [166009]

Miss Melanie Johnson: In the NHS Plan (2000) the Government made a commitment to reduce under nutrition by developing a hospital nutrition policy to

improve the outcome of care of patients by 2004. A number of measures and strategies are in place to manage, monitor and screen patients for under nutrition in hospitals, residential care and the wider community. Nutritional screening is recommended for the care of specific groups, such as those outlined in the national service framework for older people (2001).

Data from Hospital Episode Statistics showing the count of finished admission episodes to hospitals in England from 1997–98 to 2002–03 by the health authority of residence for malnutrition, where the primary diagnosis is malnutrition and the age on admission was 65 plus, are shown in the table.

Maternity Services (Asylum Seekers)

Sandra Gidley: To ask the Secretary of State for Health pursuant to the answer of 29 March 2004, *Official Report*, column 1217W, on maternity services (asylum seekers) what *(a)* maternity and *(b)* antenatal services will be available to women who have had their application for asylum refused. [171398]

Dr. Ladyman: Pregnant women whose application for asylum has been finally rejected will continue to be able to access National Health Service hospital antenatal and maternity services but they may be charged for any services provided, depending on how long they have been in the United Kingdom at the time their claim is turned down. In primary care settings, free treatment will be given only where, in the opinion of a health care professional, it is an emergency or is immediately necessary. In other circumstances, failed asylum seekers should be de-registered and should receive treatment (maternity medical services) only from General Practitioners practices on a private, paying basis.

Meningitis

Bob Spink: To ask the Secretary of State for Health what assessment he has made of the meningitis risk to young people entering universities; and if he will make a statement. [170818]

Miss Melanie Johnson: The risk of meningitis in young people entering higher education has reduced substantially since the introduction of the MenC vaccine. The number of cases of meningitis C per year in all age groups has declined by over 90 per cent., since the vaccine was introduced.

Meningitis B still presents a risk, as there is no vaccine available to protect against this disease. In order to raise awareness of the signs and symptoms of meningitis, the Department distributes the 'Look out for your mate' leaflet which is targeted specifically at the student age group.

Bob Spink: To ask the Secretary of State for Health what immunisation advice he has given to young people due to enter higher education this year in respect of meningitis. [170821]

Miss Melanie Johnson: United Kingdom students entering higher education should have received MenC vaccine as part of the vaccination campaign. We

recommend that every effort should be made to ensure that all individuals are immunised even if they are older than the recommended age range, and that no opportunity should be missed.

Mental Health

Tim Loughton: To ask the Secretary of State for Health (1) how many mental health beds are occupied by people being treated for physical health conditions; [169038]

(2) what his policy is on mental health beds in hospitals being used for treating people for physical health conditions. [169039]

Ms Rosie Winterton: The information requested is not centrally available. The Department monitors the average daily number of open and staffed beds in National Health Service hospitals. Figures can be sub-divided into different ward classifications, such as 'neonates and children' or into sectors such as 'mental illness'. However, it is not possible to provide the information requested using these figures.

The Department does not have a specific policy on the use of mental health beds being used for treating people for physical health conditions. The national service framework for mental health standard five envisages each mental health service user who is assessed as requiring a period of care away from their home to have timely access to an appropriate hospital bed or alternative bed or place. Strategic health authorities have a responsibility to ensure trusts' compliance with this standard.

Tim Loughton: To ask the Secretary of State for Health (1) when he expects to publish a timetable for the pre-legislative scrutiny committee stages of the Mental Health Bill; [169021]

(2) when the Government will publish the responses to the consultation on mental health. [169588]

Ms Rosie Winterton: A revised and completed Mental Health Bill will be brought forward for pre-legislative scrutiny in this session. The Government's response to consultation on the draft Mental Health Bill will be published prior to consideration of the revised Bill by the pre-legislative scrutiny committee.

Mumps

Mr. Burstow: To ask the Secretary of State for Health (1) what plans he has to appeal to all teenagers not vaccinated against mumps to be immunised; [167409]

(2) what guidance has been produced by his Department on inoculation against mumps for people who did not receive the MMR vaccine as children. [167414]

Miss Melanie Johnson: All children need two doses of measles, mumps and rubella (MMR) vaccine to ensure that they are properly protected against measles, mumps and rubella.

We advise that children who have either had no or one dose of MMR should be offered a further dose. In our information resources, we already advise young people to check that all their immunisations, including MMR, are up to date at the time they have their teenage immunisations. We also advise healthcare professionals that entry to higher educational establishments provides a further opportunity to check the immunisation history.

Nappies

Tim Loughton: To ask the Secretary of State for Health whether his Department has received a copy of the recent report from the Women's Environmental Network on the economic and environmental costs of the promotion, use and disposal as clinical waste of disposable nappies within the National Health Service. [169044]

Dr. Ladyman: Officials at the Department have received and responded to the recent report from the Women's Environmental Network on the use of disposable nappies within the National Health Service.

Tim Loughton: To ask the Secretary of State for Health if he will estimate *(a)* the average unit cost of disposal as clinical waste of disposable nappies within the National Health Service and *(b)* the total cost to the NHS of the disposal of such nappies in the last year for which figures are available. [169045]

Dr. Ladyman: National Health Service trusts establish their own policy on the disposal of nappies and will decide whether to treat them as domestic waste, and therefore send them to landfill sites or clinical waste and therefore incinerate them. The cost of clinical waste involving disposable nappies is not collected centrally.

Tim Loughton: To ask the Secretary of State for Health whether officials of his Department have met officials of the Waste Implementation Programme of the Department of the Environment, Food and Rural Affairs to discuss how best to identify and promote best practice in nappy use, promotion and disposal within the National Health Service. [169046]

Dr. Ladyman: Officials at the Department have not met officials of the waste implementation programme at the Department for Environment Food and Rural Affairs to discuss the use of nappies in the National Health Service. In July 2003 my hon. Friend, the Parliamentary Under Secretary of State for Public Health, met my hon. Friend the Minister of State for Environment and Agri-Environment (Elliot Morley), along with representatives from the Women's Environmental Network to discuss disposable nappy waste and the use of reusable nappies in the NHS.

Tim Loughton: To ask the Secretary of State for Health if he will meet representatives of the Nappy Alliance to discuss policy and practice in the use of nappies within NHS facilities. [169047]

Dr. Ladyman: I will consider meeting representatives of the Nappy Alliance following a written request to the Department.

National Service Frameworks

Tim Loughton: To ask the Secretary of State for Health whether the children's national service framework will make reference to the good practice in continence services guidelines. [169051]

Dr. Ladyman: It is not intended that the children's national service framework will set standards for the treatment of specific conditions, but rather will outline what support should be available to children and their parents in managing a whole range of problems. In doing so it will emphasise the promotion of evidence-based clinical guidelines and provide examples of good practice.

Tim Loughton: To ask the Secretary of State for Health when he expects to publish the full national service framework for children. [169020]

Dr. Ladyman: The national service framework for children, young people and maternity services will be published this year.

Mr. Waterson: To ask the Secretary of State for Health if he will make a statement on progress towards the national service framework milestone for systems to explore user and carer experience in primary care trusts. [170618]

Dr. Ladyman: The responsibility for planning for and monitoring progress against this milestone of the national service framework for older people lies with strategic health authorities.

Mr. Waterson: To ask the Secretary of State for Health (1) if he will make a statement on progress towards the national service framework milestone for general practitioner practices in identifying, treating and managing patients at risk of stroke; [170621]

(2) if he will make a statement on progress towards the national service framework milestone for general practitioner practices in identifying and treating people who have had a stroke; [170622]

(3) if he will make a statement on progress towards the national service framework milestone for general practitioner practices to establish clinical audit systems for stroke; [170623]

(4) if he will make a statement on progress towards the national service framework milestone for general practitioner practices to use agreed protocols for rapid referral of patients with TIAs to local specialist services; [170626]

(5) if he will make a statement on progress towards the national service framework milestone for general hospitals caring for people with stroke to have a specialised stroke service. [170627]

Dr. Ladyman: The planning and priorities framework for 2003–06 contained as a key 'must do' target the provision of specialist stroke services in hospitals caring for people with stroke by April 2004. This target is being monitored as part of the quarterly monitoring process and information on progress at the end of March 2004 will be available in June. 2003–04 local delivery plans and subsequent discussions with strategic health authorities (SHAs) suggest that the target will be fully met. At December 2003, around three-quarters of hospitals had already met the target.

Planning for and measuring progress on all the other milestones in Standard 5 of the national service framework for older people, relating to the development of stroke services, is the responsibility of SHAs.

Neonatal Intensive Care

Tim Loughton: To ask the Secretary of State for Health (1) what the vacancy rate is for nurses in intensive care units for new born babies in each hospital trust in England; [169056]

(2) how many *(a)* nurses and *(b)* whole-time equivalent nurses work in intensive care units for new born babies. [169055]

Mr. Hutton: The information requested is not collected centrally.

New Variant CJD

Bob Spink: To ask the Secretary of State for Health how many new cases of new variant CJD were reported in each of the last five years; and if he will make a statement. [167073]

Miss Melanie Johnson: The information requested is shown in the table.

Annual cases of variant Creutzfeld Jakob disease by notification since 1999

	Reported cases
1999	16
2000	29
2001	21
2002	15
2003	15
2004[1]	0
Total	96

[1] As of 5 April 2004

NHS

Mr. Burstow: To ask the Secretary of State for Health pursuant to the written ministerial statement of 30 March 2004, *Official Report*, column 83WS, on NHS charges, what the cost of providing *(a)* sight tests, *(b)* dental check-ups and *(c)* prescription charges free on the NHS will be following the changes. [166430]

Ms Rosie Winterton: The estimated additional annual cost to the national health service in England following the changes to the National Health Service (Travel Expenses and Remissions of Charges) Regulations from 6 April 2004 is as follows:

provision of free sight tests—around £6,000;

provision of free dental treatment—around £70,000 (the additional cost of provision of free dental check-ups has not been identified separately; and

loss of prescription charge revenue—around £580,000.

Tim Loughton: To ask the Secretary of State for Health what his policy is on childcare provision for NHS staff. [162997]

Mr. Hutton: The National Health Service childcare strategy has a key role to play in the recruitment, retention and return of staff to the NHS.

The NHS Plan introduced the idea of a childcare strategy, as part of the improving working lives standard. National targets were set for 150 new on-site nurseries providing an additional 7,500 subsidised places, and for all NHS staff to have access to a childcare co-ordinator. Over £70 million has been made available for this over the three years from April 2001.

So far, 140 new nursery schemes, new builds or extensions to existing nurseries, have been opened or are in the pipeline, which will provide an extra 6,000 new nursery places for NHS staff. Further schemes are being considered.

Tim Loughton: To ask the Secretary of State for Health how many children of NHS staff use NHS-provided childcare facilities. [163059]

Mr. Hutton: The national health service childcare strategy has a key role to play in the recruitment, retention and return of staff to the NHS.

We do not keep central figures on the numbers of NHS staff using NHS provided childcare facilities.

The NHS Plan introduced the idea of a childcare strategy, as part of the Improving Working Lives standard. National targets were set for 150 new on-site nurseries providing additional 7,500 subsidised places, and for all NHS staff to have access to a childcare co-ordinator. Over £70 million has been made available for this over the three years from April 2001.

So far, 140 new nursery schemes—new builds or extensions to existing nurseries—have been opened or are in the pipeline. These will provide an extra 6,000 new nursery places for NHS staff. Further schemes are being considered.

Mr. Yeo: To ask the Secretary of State for Health what proportion of calls to NHS Direct were resolved by NHS Direct without the need for further NHS intervention in the last year for which figures are available. [162055]

Ms Rosie Winterton: Last year NHS Direct handled 6,427,321 calls and the proportion of these calls to NHS Direct that were resolved by NHS Direct without the need for further NHS intervention in the last year for which figures are available was 44.3 per cent.

Mr. Baron: To ask the Secretary of State for Health (1) what percentage of new nursing recruits into the NHS have been recruited through recruitment agencies which have not signed up to the Government's code of practice on ethical recruitment; [170315]

(2) what percentage of all nursing recruits into the NHS have been through recruitment agencies. [170316]

Mr. Hutton *[holding answer 4 May 2004]:* This information is not held centrally.

National health service trusts should use only those commercial agencies which comply with the Code of Practice and which are listed on the Department's website.

Mr. Baron: To ask the Secretary of State for Health what the country of origin was of nurses recruited into the NHS from overseas in each of the last five years for which figures are available. [170317]

Mr. Hutton *[holding answer 4 May 2004]:* The Department does not collect information on the country of origin of nurses recruited to the national health service.

The Nursing and Midwifery Council holds information on the number of admissions of nurses and midwives to the register by country. This information is available on the Council's website on www.nmc-uk.org.

Mr. Baron: To ask the Secretary of State for Health what mechanisms are in place to ensure the Government can guarantee that no recruitment agencies are used by the NHS to recruit nurses which have not signed up to the Government's code of practice on ethical recruitment. [170318]

Mr. Hutton *[holding answer 4 May 2004]:* National health service trusts should use only those commercial agencies which comply with the Code of Practice and which are listed on the Department's website.

Strategic health authorities (SHAs) are working with trusts to ensure they comply with the Code of Practice and only work with agencies who are compliant.

This is in line with the government policy as it is for primary care trusts in partnership with SHAs and other local stakeholders to determine how best to meet national and local priorities for improving health, tackling health inequalities and modernising services.

Jim Dobbin: To ask the Secretary of State for Health how many NHS therapists were located in Heywood and Middleton in each of the last seven years. [168485]

Miss Melanie Johnson: The information requested is shown in the table.

NHS hospital and community health services: qualified scientific, therapeutic and technical staff in the Greater Manchester Strategic Health Authority area as at 30 September each specified year

NHS/Foundation Trusts

Mr. Lansley: To ask the Secretary of State for Health how much public dividend capital has been issued by his Department to NHS trusts in *(a)* 2002–03 and *(b)* 2003–04; and how much is estimated to be issued in 2004–05 to (i) NHS trusts and (ii) Foundation trusts. [168946]

Mr. Hutton *[holding answer 27 April 2004]:* The information requested is shown in the table. The forecast split of public dividend capital (PDC) between national health service trusts and NHS foundation trusts for 2004–05 will be refined during the year as better information becomes available on NHS foundation trusts spending plans and in year starts.

£ million

	Total PDC issued/forecast		
Financial year	*PDC to NHS trusts*	*PDC to NHS foundation trusts*	*Total*
2002–03	1,434	0	1,434
2003–04	1,833	0	1,833
2004–05[1]	2,634	150	2,784

[1] Estimate.

Nurses

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* headcount and *(b)* whole-time equivalent nurses there were in each year between 1979 and 1997 inclusive. [168994]

Mr. Hutton: The information requested is shown in the table.

Between 1983, the first comparable year with current information, and 1997, the number of qualified nurses increased by 62,515. Since 1997, the number of qualified nurses employed in the National Health Service has increased by 67,503.

NHS hospital-based and community[1] qualified nursing, midwifery and health visiting staff including Practice Nurses employed by Unrestricted Principals and Equivalents[5] in England as at 30 September each specified year[9]

	Whole-time equivalent	*Headcount*
1979	[1,4]161,359	[1,4,8]190,243
1980	[1,3]167,097	[1,3,8]196,361
1981	[1,3]179,144	[1,3,8]206,029
1982	[1,2,3]185,913	[1,2,3,8]212,512
1983	224,971	[8]256,341
1984	229,646	[8]262,908
1985	236,340	[8]271,382
1986	239,271	[8]274,670
1987	241,981	[8]279,552
1988	245,404	[8]284,242
1989	249,240	296,937
1990	250,080	298,966
1991[6]	252,010	[8]293,774
1992[6]	255,691	[8]297,351
1993[6]	251,456	[8]293,379
1994[6]	247,883	305,784
1995[7]	256,567	316,893
1996[7]	256,891	316,515
1997	256,093	318,856

[1] Figures for 1979–1982 are hospital staff only and are therefore not directly comparable with later years

Obesity

Tim Loughton: To ask the Secretary of State for Health how much the NHS spent on medical research into obesity in each of the last 10 years. [169050]

Miss Melanie Johnson: Management of much of the research supported by national health service research and development funding is devolved and expenditure at project level is not held centrally by the Department. Research relating to obesity is usually carried out in the context of wider programmes.

Paddington Health Campus

Mr. Lansley: To ask the Secretary of State for Health further to the Minister of State for Health's answer of 23 March 2004, *Official Report*, column 695, on Paddington Health Campus, when he expected to make an announcement about the future of the campus scheme before the end of March; and when he now expects to make an announcement. [166572]

Mr. Hutton *[holding answer 19 April 2004]:* Discussions on the future of the Paddington Health Campus are now reaching a conclusion and it is envisaged that the North West London Strategic Health Authority will shortly be in a position to issue a statement on the investment needed to modernise the health economy in North West London.

Paediatric Provision

Tim Loughton: To ask the Secretary of State for Health how many paediatric *(a)* doctors and *(b)* nurses (i) are working in the NHS and (ii) were working in the NHS in each of the last seven years, broken down by (A) those working full-time, (B) those working part-time and (C) gender. [169019]

Mr. Hutton: The information requested is shown in the tables.

NHS hospital and community health services: qualified paediatric nurses in England by nature of contract as at 30 September each specified year

Headcount and percentage headcount

	All staff	Full-time	Part-time	Unknown	Percentage full-time	Percentage part-time
2003	18,437	10,011	6,998	1,428	58.9	41.1

Patient Records

Mr. Lansley: To ask the Secretary of State for Health if he will list those NHS trusts which do not yet use electronic patient records. [167703]

Mr. Hutton: Most hospitals now have existing patient administration systems and limited or stand alone clinical systems. By the end of 2005, all National Health Service trusts will have some integrated functionality through electronic records to support patient care as part of the NHS care records service. This will begin to be rolled out alongside the electronic appointment booking service from summer 2004, with phased implementation to provide richer functionality over time to 2010.

Patients Passports

Mr. Burstow: To ask the Secretary of State for Health pursuant to his statement of 22 March 2004, *Official Report*, column 594, what the basis was for the statement that a policy of patients' passports paying for operations in the private sector would divert £2 billion of taxpayers' money away from the national health service. [164648]

Mr. Hutton: The Government calculate that the deadweight cost to the Exchequer of subsidising those who already pay for operations and other care in the private sector would be £2 billion per annum. The patient passport policy, whereby a voucher would cover 60 per cent. of the national health service cost of an operation in the private sector would cost an estimated £1 billion. This has been calculated using data on the number and distribution of private sector treatments, together with 2003 NHS reference costs to estimate the subsidy per procedure. A further £1 billion would be required to fund tax relief on national insurance contributions and income tax for company and private schemes. This is based on projections for company and private schemes from the Inland Revenue and Association of British Insurers.

The £2 billion figure does not contain any estimate of the additional administration costs which would be required to operate such policies.

Prescription Pre-payment Certificates

Mr. Dhanda: To ask the Secretary of State for Health if he will introduce a monthly instalment scheme for the prescription prepayment certificate. [167597]

Ms Rosie Winterton: The prescription prepayment certificate (PPC) scheme is designed to be simple so that it can be administered easily and with the minimum of cost. To introduce payment by instalments would inevitably increase the administrative costs involved. This could lead to higher PPC fees and so reduce the potential savings and make the certificates less attractive for those who continue to make use of them.

However, we are, with the Prescription Pricing Authority, currently considering the implications of introducing such a scheme, including the practicalities of payment collection.

Prison Health Service

Mr. Burstow: To ask the Secretary of State for Health pursuant to his answer of 27 April 2004, *Official Report*, column 961W, on the Prison Health Service, what issues had been raised by local services concerning the existing local protocols for ambulance and paramedic access. [171267]

Dr. Ladyman: Feedback from local services highlighted the scope to strengthen protocols for ambulance and paramedic access to prisons in three specific areas:

ensuring that ambulances are called promptly to incidents within prisons when required, and that there are clear arrangements for doing so in emergencies without the need first to consult prison health care staff;

distinguishing between access for an ambulance vehicle and access for a paramedic to attend the patient; and

taking account of the potential impact of new European Committee for Standardisation Regulation for Ambulance Vehicles (British Standard Specification EN 1789), given the need for a suitably risk assessed Prison Service escort to attend with the vehicle.

Scanners

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* MRI scanners and *(b)* PET scanners there are in England; and how many of these scanners have been bought (i) directly by the NHS and (ii) through alternative funding arrangements. [167712]

Miss Melanie Johnson: There are approximately 221 magnetic resonance imaging (MRI) scanners and four positron emission tomography (PET) scanners installed in the National Health Service in England. In addition, there are approximately 75 MRI scanners and eight PET scanners installed in non-NHS institutions in England.

Of the 221 NHS MRI scanners, it is estimated that just over 100 were purchased directly by the NHS. Approximately 60 were purchased through central capital programmes funded by the New Opportunities Fund (NOF) and the Department. Approximately 60

were purchased through other arrangements, including lease arrangements, managed service contracts and charitable funding.

This information is not held centrally for PET scanners.

By the end of 2004, central cancer capital funding will mean that there will be approximately 277 MRI scanners in the NHS in England. In addition, on 8 April 2004, the Department launched a procurement from the private sector to provide an extra 80,000 mobile MRI scans per year for the NHS for five years.

Sexual Health Services

Lembit Öpik: To ask the Secretary of State for Health what measures his Department is taking to ensure that sexual health services and contraception advice for young people are made more accessible; and if he will make a statement. [171170]

Miss Melanie Johnson: The Government are working to improve access to sexual health services and contraception advice for young people through both the "Teenage Pregnancy Strategy and the National Strategy for Sexual Health and HIV."

The first ever "National Strategy for Sexual Health and HIV" (2001) (which links closely to the Government's teenage pregnancy strategy) identifies young people as a priority group for action. The Department's 'Sex Lottery' and the teenage pregnancy (RUthinking) media campaigns are raising awareness among young people of sexually transmitted infections (STIs), and how to avoid them. We are also tackling the most common STI through our national chlamydia screening programme, which already covers a quarter (84) of primary care trusts in England. Further details on the Strategy and its implementation are available from the Department's website at www.dh.gov.uk/sexualhealthandhiv/.

The teenage pregnancy strategy aims to tackle the high levels of teenage pregnancy. Increasing and improving access to contraception and sexual health advice services is also a very important part of this work.

Stroke Services

Mr. Lansley: To ask the Secretary of State for Health how the stroke milestone in the older people's National Service Framework is defined; and how many hospitals have access to *(a)* peripatetic specialised teams and *(b)* a team in place in the hospital. [171077]

Dr. Ladyman: Standard 5 of the national service framework (NSF) for older people sets out the requirements for a specialised stroke service.

The Department is monitoring on a quarterly basis the number of hospitals that have stroke services and the number of these that have introduced specialised stroke services. The NSF makes it clear that all specialised stroke services should be co-ordinated through an integrated team, although the exact make up of that team will bedetermined locally. This more detailed information is not collected centrally.

Telecommunications Masts

Dr. Cable: To ask the Secretary of State for Health what plans he has to review and publish further health research evidence relating to the impact of *(a)* mobile phone masts and *(b)* mobile phone use subsequent to the report of Sir William Stewart. [167845]

Miss Melanie Johnson: The health implications of mobile phones and base stations were reviewed in a report issued in January 2004 by the National Radiological Protection Board's (NRPB) advisory group on non-ionising radiation (Documents of the NRPB, Vol 14, No. 2, 2003). The report, entitled, "Health Effects from Radiofrequency Electromagnetic Fields", concluded that:

> "The weight of evidence now available does not suggest that there are adverse health effects from exposures to RF (radiofrequency) fields below guideline levels, but the published research on RF exposures and health has limitations, and mobile phones have only been in widespread use for a relatively short time. The possibility therefore remains open that there could be health effects from exposure to RF fields below guideline levels; hence continued research is needed."

More specifically, for base stations it concluded:

> "Exposure levels from living near to mobile phone base stations are extremely low, and the overall evidence indicates that they are unlikely to pose a risk to health."

The report is available on the NRPB website at www.nrpb.org. The advisory group will continue to review the scientific literature both national and international that is relevant to the issue of mobile telephony and health.

The mobile telecommunications and health research (MTHR) programme reports on progress at its open seminars. The majority of projects are due to be completed in time for the seminar expected in November 2005. A few remaining projects may take up to three years longer depending on their complexity. Descriptions of these projects can be found on the website at www.mthr.org.uk.

In addition, the World Health Organisation (WHO) electromagnetic fields project is expected to publish a health risk assessment of radiofrequency effects in 2007, which will be available on the WHO website at www.who.int/peh-emf.

University Medical Training

Mr. Best: To ask the Secretary of State for Health what measures the Government is taking to increase the number of British university trained *(a)* doctors and *(b)* nurses in the NHS. [167730]

Mr. Hutton: We have invested significantly both in the national health service and higher education. The medical school intake in England has increased by more than 2,250 since 1997, an increase of over 60 per cent., and, as a result, we have exceeded the autumn 2005 intake target two years early. We have created four new

medical schools, opened four new centres of medical education, three of which are associated with established medical schools, significantly increased the capacity of most other medical schools and introduced graduate-entry four-year courses.

There has been an increase of almost 8,000 nurses and midwives entering pre-registration training between 1996–97 and 2002–03, a 53 per cent, increase. Latest figures suggest a further increase of around 1,800 nurses and midwives entering pre-registration training in 2003–04.

Responsibility for Scottish, Welsh and Northern Ireland universities and numbers of students in undergraduate medical and nursing pre-registration training is a matter for the devolved administrations.

MRI Scans

Mr. Lansley: To ask the Secretary of State for Health what the average waiting time for an MRI scan in each strategic health authority was for each year since 1997. [167710]

Miss Melanie Johnson: Data on waiting times for diagnostic tests, including Magnetic Resonance Imaging, are not collected centrally.

Mr. Pike: To ask the Secretary of State for Health how many and what percentage of women in Burnley with suspected breast cancer saw a specialist within two weeks in each of the last five years. [167957]

Miss Melanie Johnson: The information requested is not collected on a constituency basis. The information shown in the table relates to the National Health Service organisations serving the Burnley area.

Waiting times for 1st consultant outpatient appointment for suspected breast cancer following urgent GP referral

		Seen within two weeks	
	NHS Trust	*Percentage*	*Number*
1999–2000	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	82.6	19
1999–2000	Burnley Healthcare NHS Trust	100.0	10
2000–01	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	96.2	50
2000–01	Burnley Healthcare NHS Trust	100.0	53
2001–02	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	100.0	84
2001–02	Burnley Healthcare NHS Trust	100.0	89
2002–03	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	100.0	84
2002–03	Burnley Healthcare NHS Trust	100.0	114
2003–04	East Lancashire Hospitals NHS Trust	100.0	209

Note:
East Lancashire Hospitals NHS Trust was formed from the merger of Blackburn, Hyndburn and Ribble Valley Health Care NHS Trust and Burnley Healthcare NHS Trust on 1 April 2003.

Wanless Report

Mr. Maples: To ask the Secretary of State for Health what funds will be made available to implement the Wanless Report recommendations. [169271]

Mr. Hutton: In his 2002 budget, my right hon. Friend, the Chancellor of the Exchequer, accepted the conclusions of the report and announced an historic five-year settlement for the national health service, which represented a real terms increase in spending of 7.3 per cent. a year from 2003–04 to 2007–08. This will take total NHS expenditure to over £90 billion by 2007–08.

Warrington Hospital

Helen Southworth: To ask the Secretary of State for Health what advances have been made in coronary care in Warrington Hospital since 1997; and what further plans are in progress. [168706]

Miss Melanie Johnson: In June 2002, 24 people were waiting over nine months for heart surgery in the Cheshire and Merseyside Strategic Health Authority area. Today, no-one is waiting for over nine months. Warrington coronary care unit will be relocated to the accident and emergency department in June to provide an improved pathway for patients. Warrington Hospital will benefit also from a new cardiac catheterisation laboratory that is being jointly funded by the New Opportunities Fund and the Department of Health.
Source:
Department of Health and North Cheshire Hospitals National Health Service Trust.

Whooping Cough Vaccine

Norman Baker: To ask the Secretary of State for Health whether the NHS is able to provide mercury-free whooping cough vaccine for babies in the UK. [167768]

Miss Melanie Johnson: The United Kingdom uses a wholecell containing whooping cough vaccine (which contains thiomersal) because this vaccine offers the best protection against the disease. Whooping cough is a serious disease in young babies that can lead to death. The acellular whooping cough vaccine (which is thiomersal-free) does not provide the same high level of protection. The UK will move to thiomersal-free vaccines as soon as an equally effective alternative to the current vaccine becomes available.

Written Answers to Questions

Tuesday 11 May 2004

LEADER OF THE HOUSE

Department Annual Report

Norman Lamb: To ask the Leader of the House how much the production of his Office's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171151]

Mr. Hain: My office does not produce an annual report. Its functions are included in the Privy Council Office's Departmental Report, details of which can be found on the Department's website (www.privy-council.co.uk/output/page40.asp).

Departmental Procurement

Michael Fabricant: To ask the Leader of the House what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Office over the last five years is of British manufacture. [170804]

Mr. Woolas: The Office of the Leader of the House of Commons was established in June 2003. Since then only a small amount of crockery and glassware has been purchased, and no cutlery. All the crockery was of British manufacture.

In line with current Government policy the decision to purchase goods for the Office is taken on value for money grounds: restricting purchases to British-only goods would not necessarily achieve this.

As a trading nation the UK has commitments under both EC and WTO procurement rules to ensure our access to export markets, and a 'Buy-British' policy would make UK companies less competitive by closing down likely export markets. One of the five principles underlying the EC Treaty is one of non-discrimination on the grounds of nationality and this would also exclude a 'Buy-British' policy. In these days of global markets it is increasingly difficult to determine whether goods are British.

House Facilities

Bob Spink: To ask the Leader of the House what assessment he has made of the implications of the Independent Monitoring Commission Report for the use of House facilities by Sinn Fein. [170658]

Mr. Hain: The Government has already taken steps in respect of the financial assistance payable to Sinn Fein and the PUP, in line with the recommendation of the Independent Monitoring Commission. The IMC's recommendations made no mention of parliamentary facilities. We hope the next report on paramilitary activity, due in the autumn, will reflect significant progress. But we will need to consider the implications of that report at that time.

Sinn Fein Members

Mr. Gregory Campbell: To ask the Leader of the House how much has been paid to Sinn Fein since the decision by the House to pay allowances to Sinn Fein hon. Members who have not taken the oath. [171739]

Mr. Hain: Since 8 January 2002, Sinn Fein Members have been able to claim against the incidental expenses provision, staffing allowance and additional costs allowance. They can also claim certain free travel for themselves, their families and their staff; they can use centrally-provided computer equipment on loan without charge, and they can draw on centrally purchased stationery.

Figures showing what each Member has spent against the allowances will be publicly available from the autumn of this year. Figures for the years in question are currently being compiled and checked by the House authorities.

FOREIGN AND COMMONWEALTH AFFAIRS

Tyrannical Regimes

10. **Mr. Allen:** To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to take further steps to improve international law and the structures of the UN to end tyrannical regimes. [171838]

Mr. Rammell: We are working with the UN Secretary-General's High Level Panel to improve the UN response to all threats to global and human security. The UN's International Tribunals and the International Criminal Court have shown that there is no impunity for the perpetrators of crimes against humanity. We also need to do more to develop an international consensus in favour of humanitarian intervention where it is justified.

Middle East

14. **Mr. Blunt:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Mr. Sharon's disengagement plan and the realities on the ground to be taken into consideration in future negotiations. [171842]

Mr. Rammell: The UK welcomes Prime Minister Sharon's proposed withdrawal of all settlements from Gaza and four from the West Bank. We hope it will go ahead. As the Prime Minister said on 19 April, it is a statement of fact that final status negotiations cannot ignore the reality on the ground. But all final status issues, including borders and refugees, can be decided only by negotiations between the parties.

18. **Richard Burden:** To ask the Secretary of State for Foreign and Commonwealth Affairs which Israeli settlements in the west bank, Gaza, east Jerusalem and the Golan Heights are regarded as legal by the UK Government. [171846]

Mr. Rammell: We consider all settlements in the Occupied Territories to be illegal.

Iran

15. **Hugh Robertson:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on bilateral relations with Iran. [171843]

Mr. Straw: Our policy towards Iran is one of constructive but critical engagement. We aim to support Iran's efforts to reform while continuing a robust dialogue on matters of concern such as Iran's nuclear programme, human rights record, and attitude to the fight on terrorism and the Middle East Peace Process. Ministers are in close contact with Iranian leaders on all these issues of concern; I last met my Iranian counterpart in London on 22 April.

17. **Julie Morgan:** To ask the Secretary of State for Foreign and Commonwealth Affairs what support he has offered to President Khatami to reduce use of torture and repression in Iran. [171845]

Mr. Rammell: We remain seriously concerned at human rights violations in Iran, including the alleged use of torture. We welcome the statement by the head of the Iranian judiciary on 28 April that torture is forbidden and that confessions extracted through torture are not legal. We hope this will be reflected in practice throughout Iran. Ministers have raised human rights concerns with their Iranian counterparts bilaterally on many occasions and we have done so through the EU/Iran Human Rights dialogue. The EU has made clear that its relations with Iran can move forward only if Iran takes action to address our concerns in areas such as human rights.

Cyprus

16. **Mr. Love:** To ask the Secretary of State for Foreign and Commonwealth Affair what assessment he has made of the results of the referendums in Cyprus. [171844]

Mr. MacShane: We respect the outcome of both referendums and the right of the Greek Cypriots to say "no". However, we hope they will take time to reflect on the decision they made and consider whether it was the right one.

The reunification of Cyprus remains the Government's objective. But there is no immediate prospect of a resumption of talks. We await the UN Secretary General's report on his Good Offices mission to Cyprus, which we expect later this month.

Mr. Lyons: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the prospects for re-unification of Cyprus. [171776]

Mr. MacShane: I draw my hon. Friend's attention to my right hon. Friend the Foreign Secretary's written statement on 28 April 2004, *Official Report*, columns 44–46WS.

Iraq

19. **Tom Brake:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has held with Mr. Paul Bremer on the handover of sovereignty to the Iraqi governing council from the coalition provisional authority. [171847]

Mr. Rammell: The Foreign Secretary has discussed the political transition process with Ambassador Bremer during his visits to Baghdad, but the handing over of sovereignty to the Iraqi Governing Council has never been coalition policy. The coalition is committed to handing over sovereignty on 30 June to an Iraqi Interim Government, whose structure and composition will be decided by the UN Secretary-General's Special Adviser, Lakhdar Brahimi after consultation with a wide range of Iraqis.

20. **Mr. Wareing:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the most recent findings of the Iraq survey group. [171848]

Mr. MacShane: The most recent published findings of the Iraq Survey Group were contained in the report of the leader of the Group, Charles Duelfer, on 30 March, a copy of the unclassified version of which was placed in the Library of the House. There is nothing that I can add to the Written Statement made by my right hon. Friend the Secretary of State for Foreign and Commonwealth Affairs on 31 March 2004, *Official Report*, column 94WS.

Mr. Best: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made with investigations into Iraq's mass graves following the recommendations of the UK forensic team which visited Iraq last summer. [167870]

Mr. Rammell: Since the recommendations were made the UK has seconded four UK forensic experts to the Coalition Provisional Authority (CPA) who have been leading CPA efforts on mass graves. A Mass Grave Action Plan has been produced, which details how to deal with the hundreds of reported mass grave sites. A centralised system for reporting potential sites has been set up in co-ordination with the Human Rights Ministry. Around a quarter of reported sites have been assessed. Training seminars have been held in anthropology, archaeology, surveying, crime scene management and scene searching to build Iraqi capacity to undertake mass grave exhumations. A full equipment list for exhumations has been completed and equipment is on order. In addition, the Government has funded a forensic NGO, Inforce, to produce standard protocols and operating procedures to enable Iraqis and international teams to undertake this work to the same standards.

Unfortunately, the mobility of the forensic team was severely restricted by the upsurge in violence and kidnappings in Iraq in early April. Security problems have been a major hindrance to them in doing their jobs, which include an unusually high level of travel outside of Baghdad. We have therefore withdrawn them temporarily from Iraq. The forensic team will be able to continue some of this work from outside Iraq. We hope they and other teams will be able to resume work on mass grave sites in Iraq shortly.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his Answer of 27 April 2004, *Official Report*, column 965W, on Iraq, if he will place a copy of the Transitional

Administrative Law (TAL) agreed by the Iraqi Governing Council on 8 March, and the annexe to the TAL, in the Library. [171123]

Mr. Rammell: A copy of the Transitional Administrative Law has been placed in the Library of the House. The annexe will be added once it is completed.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the Answer of 27 April 2004, *Official Report*, columns 964–65W, on Iraq, who will be consulted; what the consultation process will be prior to 30 June; and who will be eligible to vote to elect the Advisory Council. [171158]

Mr. Mike O'Brien: UN Special Envoy Lakhdar Brahimi is leading consultations with a wide variety of Iraqis on the formation of an Interim Government. He is returning to Iraq this week to continue his consultations. He aims to make his recommendations on the structure and personnel of the Interim Government by 31 May. He will also continue consultations on his proposal for a National Conference to be held after 30 June, including the best method of selecting delegates to the Conference. The Conference will elect the Advisory Council, which will advise and monitor Ministers until elections to a Transitional National Assembly in January 2005.

North Korea

22. **Mr. Hammond:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will condemn north Korea's decision to ban south Korean aid supplies crossing the land border during the recent emergency. [171850]

Mr. Rammell: We regret any unnecessary delay to the urgent provision of emergency humanitarian aid to victims of the Ryongchon explosion. We understand that the DPRK authorities have since decided to allow shipments of relief materials over land from south Korea and that these began on 7 May.

Zimbabwe

23. **Mr. Wiggin:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the arrest of the former Zimbabwean Finance Minister, Mr. Chris Kuruneri. [171851]

Mr. Mullin: We understand that Mr. Kuruneri is alleged to have externalised foreign currency. His arrest and the investigations into the allegations against him are a matter for the Government of Zimbabwe.

Burma

24. **Mr. David Stewart:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the human rights situation in Burma and the representations he has made about the treatment of Aung San Suu Kyi. [171852]

Mr. Mike O'Brien: We remain deeply concerned about the human rights situation in Burma. The UK co-sponsored a widely supported resolution at the UN Commission on Human Rights on 21 April which condemned human rights violations in Burma. We fully support the efforts of Sergio Pinheiro the UN Special Rapporteur for Human Rights in Burma and regularly call on Burma's military regime to co-operate fully with him.

I have repeatedly called on the Burmese regime to release Daw Aung San Suu Kyi from house arrest.

Belarus

Mr. Spring: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the Council of Europe's reports on the human rights situation in Belarus. [171129]

Mr. Rammell: The issues raised in the two Council of Europe reports on Belarus remain of serious concern. We welcome the reports and support their recommendations. Together with EU partners we will respond to the findings of the reports and consider what measures to take in light of the recommendations.

China

Mr. Laxton: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Chinese Government concerning the arrest of the North Korean refugee Kang Byong-sop. [171525]

Mr. Rammell: The EU carried out a demarche on North Korean border crossers in February 2004 specifically to request safe passage to a third country for the Kang family. The case was also raised at the EU/China Human Rights Dialogue in February. However, the Kang family was repatriated to the Democratic People's Republic of Korea (DPRK) in March.

I raised the issue of China's treatment of DPRK border crossers with Zhang Zhijun, Deputy Director of the International Department of the Chinese Communist Party, when we met in March. I also expressed concern about the treatment of the Kang family to Choe Tae Bok, a senior DPRK official, when he visited London during that month. Foreign and Commonwealth Office officials have made official representations to the Chinese and DPRK Ambassadors in London and also the Chinese authorities in Beijing about the repatriation. We expect the EU to take follow-up action shortly.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Foreign and Commonwealth Affairs what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170799]

Mr. Rammell: 97 per cent. of all crockery, cutlery and glassware is British manufactured.

Embassies

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs what the annual overall running cost was for the UK embassy in *(a)* Washington and *(b)* Paris in 2003–04; and how many staff were employed in each of these embassies. [170819]

Mr. Rammell: Final running cost figures for financial year 2003–04 will not be available until November 2004 at the earliest. I will send them to the hon. Member when they are. The number of staff at each post are as follows:

	FCO UK	*OGD[1] UK*	*FCO LE[2]*	*OGD LE*
Washington	63.00	20.00	158.50	16.15
Paris Embassy	46.00	15.00	151.80	4.40

[1] Other Government Department
[2] Locally employed.

The figures reflect the total number of full-time equivalents and include part time positions.

Internet Child Pornography

Brian White: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what steps his Department has taken to export the UK model of co-operation between Government, police and industry to tackle child pornography on the internet; [166800]

(2) what measures his Department is taking to increase international co-operation among law enforcement agencies to combat child pornography on the internet. [166802]

Paul Goggins: I have been asked to reply.

While the Government have actively encouraged, and worked towards, the development of a partnership approach between the various agencies and organisations which deal with tackling child abuse on the internet in the UK, how this issue is dealt with by other jurisdictions is a matter for each individual country to consider. The Government have promoted the success of multi agency co-operation to tackle child abuse on the internet, using examples such as the Task Force on child protection on the internet, in speeches, at conferences, in the international fora it operates within, through ministerial and officials' visits overseas, and to the many visitors it receives with a relevant interest in this issue.

There are a variety of mechanisms to assist in furthering international co-operation between law enforcement agencies on this issue. This may be through the provision of equipment and training to overseas law enforcement by UK agencies, or by the development and hosting of specialist training courses or conferences. For example, the Foreign and Commonwealth Office and National Crime Squad recently co-funded a conference for international law enforcement experts, NGOs and officials concerning child abuse and the internet. The National Crime Squad is also engaged in a global initiative with partner countries currently comprising Canada, USA, Australia and Interpol which seeks to establish new and imaginative ways of combating and reducing child abuse on line, seeking to produce a virtual police presence which will ultimately make the internet a safer place.

A problem for all law enforcement agencies is the identification of children featured in child abuse images. As part of a G8 strategy on Protecting Children from Sexual Exploitation on the Internet, the UK is leading the development of an international (not restricted to G8 countries) Child Image Database, housed at Interpol. It aims to act as a global repository of images of child abuse with the capacity to carry out automated analysis. It will be a significant tool for international law enforcement contributing to the identification of victims and offenders and analysis of images. The strategy also seeks to promote mechanisms for sharing information and best practice internationally to further protect from exploitation online.

Kashmir

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Indian Government regarding elections for the Indian Parliament in Jammu and Kashmir this year. [171380]

Mr. Mike O'Brien: The elections have been discussed with Indian Government Ministers in general terms but we have not made any formal representations to them regarding the current elections for the Indian Parliament in Jammu and Kashmir.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his counterparts in Pakistan and India regarding peace negotiations in Kashmir. [171381]

Mr. Mike O'Brien: Both my right hon. Friend the Foreign Secretary and I have discussed the recent moves towards dialogue between India and Pakistan with our counterparts in both countries during visits to the region between December 2003 and March 2004. The Foreign Secretary also issued a statement welcoming the breakthrough in relations between the two countries following the South Asian Association for Regional Co-operation Summit on 6 January. A copy of the statement is available on the Foreign and Commonwealth Office website: www.fco.gov.uk/policy/news/press-releases. We continue to take every opportunity to encourage the Indian and Pakistani Governments to build confidence through peaceful engagement that will, in time, lead to the resolution of all their outstanding differences, including over Kashmir.

Ministerial Visits

Matthew Taylor: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list visits made by each Minister in the Department between December 2003 and April 2004, broken down by *(a)* date, *(b)* constituency visited and *(c)* cost. [171571]

Mr. Straw: For details on overseas visits by Foreign and Commonwealth Office (FCO) Ministers please refer to my answer to the hon. Member for Castle Point (Bob Spink) on 4 May 2004, *Official Report*, columns 1440–43W.

No central record of costs for UK travel by FCO Ministers is kept. During the period December 2003 to April 2004, FCO Ministers made the following visits within the UK:

The right hon. Jack Straw MP, Secretary of State for Foreign and Commonwealth Affairs

	Destination	*Purpose of trip*
16 January 2004	Cheltenham	Visit to GCHQ
29 April 2004	Leeds	To speak at the Leeds University Centenary Dinner.

Denis MacShane, Minister of State

	Destination	Purpose of trip
4 December 2003	London and Tunbridge Wells	To promote awareness of EU enlargement
7 January 2004	Edinburgh	Appear before the Scottish Parliament European Affairs Committee
8 January 2004	Perth, Glasgow and Dundee	To promote awareness of EU enlargement
2 March 2004	Oxford	To promote awareness of EU enlargement

Mike O'Brien, Minister of State

	Destination	Purpose of trip
15 January 2004	Stratford-on-Avon	Address the British Chambers of Commerce Annual International Trade Conference
5 February 2004	Bosworth	Meetings with members of Muslim communities
9 March 2004	Glasgow	Foreign and Commonwealth Office Partnerships and Network Development Unit Seminar
11 March 2004	Cambridge	Address the International High Technology Transfer Event
24 April 2004	Blaby	British-American Business Council Spring Conference Dinner

Chris Mullin MP, Parliamentary Under-Secretary of State

	Destination	Purpose of trip
11 February 2004	Reading	Visa Road Show
10 March 2004	Bradford	Visa Road Show
25 March 2004	Cheltenham	Attendance with HM Queen at the opening of the new GCHQ Building

Bill Rammell MP, Parliamentary Under-Secretary of State

	Destination	Purpose of trip
21 March 2004	Warwick	Policy Forum
3 April 2004	Reading	UNA Conference at Reading University

Baroness Symons of Vernham Dean, Minister of State:

No UK visits were made between December 2003 and April 2004.

Myanmar

Mr. Laxton: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the EU Common Position on Myanmar/Burma. [171115]

Mr. Mike O'Brien: The EU is willing to support national reconciliation in Burma, leading to the restoration of democracy and respect for human rights in Burma.

The EU shares the view of a number of international partners that the best interests of the people of Burma continue to be served, in current circumstances, by a balanced approach of carefully targeted measures against those responsible for the obstruction of reform and progress, together with humanitarian support to ensure that the ordinary people of Burma do not suffer as a result of the damaging policies of their Government.

In these circumstances, the EU has decided to maintain the existing measures, as set out in the Common Position for 12 months. The EU stands ready to react proportionately to future developments in Burma, positive or negative, and will keep the situation under review.

Mr. Laxton: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will press the UN for a full implementation of the resolutions that the General Assembly has passed on Myanmar/Burma. [171116]

Mr. Mike O'Brien: We welcome the recent adoption of a resolution by the UN Commission on Human Rights criticising Burma's human rights record. The British Government encourages all the appropriate bodies of the UN to help bring about national reconciliation, respect for human rights and democracy in Burma. We fully support the efforts of the UN Secretary General's Special Representative to Burma, Tan Sri Razali Ismail, and the UN Special Rapporteur for Human Rights, Sergio Pinheiro, and call on Burma's military regime to co-operate fully with them.

Paper Recycling

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs what percentage of copying paper used by the Department in 2002–03 was from recycled sources; and how much post consumer waste this paper contained. [171812]

Mr. Rammell: 93 per cent. of copying paper supplied throughout the Department in 2002–03 contained at least 80 per cent. post consumer waste. This was reported in the Sustainable Development in Government 2nd Annual report 2003.

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs what percentage of paper for printed publications used by the Department in 2002–03 was from recycled sources; and how much post consumer waste this paper contained. [171813]

Mr. Rammell: Our Publications and Print Services departments used a number of different papers in this period and the information requested could be provided only at disproportionate cost as detailed records were not kept. Current guidelines in our Publications and Print Services departments stipulate 75 per cent. post consumer waste content for publications paper.

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs when his Department expects to implement in full the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that *(a)* all copying paper bought by the Department is 100 per cent. recycled with a minimum of 75 per cent. post consumer waste content and *(b)* all paper for printed publications bought by the Department is 60 per cent. recycled, of which a minimum is 75 per cent. post consumer waste. [171815]

Mr. Rammell: We aim to meet the copying paper target by the autumn of this year.

From the beginning of May this year we have been meeting the publications paper target.

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the Department's main suppliers of *(a)* copier paper, *(b)* stationery, *(c)* envelopes and *(d)* paper for reports; and what the (i) name of each paper used and the (ii) recycled and post consumer recycled content is in each case. [171816]

Mr. Rammell: Copier paper is supplied by the Sappi Heritage Paper Company. We do not have details of the names of each kind of paper used but it contains 80 per cent. recycled content of which 100 per cent. is post consumer waste

Stationery is supplied by Banner. We purchase numerous stationery items and our records do not allow for analysis of recycled content across the board. Banner has a strong environmental record, having been awarded the British Office Supplies and Services Federation Environmental Certificate every year since 1996. Many of the stationery items available to Foreign and Commonwealth Office customers have a high recycled content.

Envelopes are supplied by Banner. All the envelopes are 80 to 100 per cent. recycled content with 60 to 85 per cent. post consumer waste.

Premier Paper is our main supplier of paper for reports. We buy a variety of papers from them. Our Publications and Print Services teams' guidelines stipulate a minimum recycled content of 75 per cent. post consumer waste for publications paper.

Sudan

Mr. Laxton: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the human rights situation in Sudan and what steps his Department is taking to encourage progress towards peace. [171117]

Mr. Mullin: We are seriously concerned about the human rights situation in Darfur, western Sudan. Civilian protection there remains a major concern, with reports of systematic attacks on civilians, including rape, pillage and destruction of livelihoods. The promotion of human rights throughout Sudan, through advocacy with the Government and support for NGOs, remains one of our priorities. We welcome the recent signing of a humanitarian ceasefire agreement. We are working with the parties and other members of the international community to try to get the ceasefire monitoring mechanism on the ground as soon as possible.

Good progress has been made at the Sudanese peace talks in Kenya. Both sides have said that the peace process is irreversible and they are hopeful on reaching a final agreement very soon.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what peace proposals are being taken forward to bring an early end to conflict in Darfur, Sudan. [171388]

Mr. Mullin: The 8 April Ceasefire Agreement provides for a Commission to monitor the ceasefire, and for a role for the international community. We are in close contact with the parties and other members of the international community to try to help set up such a monitoring mechanism as quickly as possible. Officials attended an African Union (AU) meeting about this in Addis Ababa on 19–20 April, and since then we have discussed the matter with the US and in the EU. An AU reconnaissance mission to Chad and Darfur began on 7 May. The mission includes representatives from the EU, the US and the UN, as well as the AU.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

British Wildlife

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what financial support her Department provides to charities working with Britain's wildlife. [169881]

Mr. Bradshaw: The Department's principal direct support to charities working with Britain's wildlife is the Environmental Action Fund. In the period 2002–05, £4,115,782 has been provided to voluntary bodies to undertake 23 biodiversity projects. Other voluntary bodies working with Britain's wildlife have received funding for understanding and awareness projects, including education for sustainable development. Full details of the Environmental Action Fund grants can be found at: www.defraweb/environment/eaf/index.htm

Voluntary bodies working with biodiversity in England also receive support from the funding provided to the Department's conservation agencies, English Nature, Environment Agency and Forestry Commission.

In addition, the Department provides funding—usually through contractual arrangements—or voluntary wildlife bodies for particular purposes such as research and monitoring. Examples of funding of this sort in 2003–04 included £248,145 for the National Biodiversity Network, £72,981 for a mammal monitoring project and £25,000 to the Bat Conservation Trust to run a helpline and set up a database.

Civil Servants

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list for each civil service grade within her *(a)* Department and *(b)* Department's executive agencies, the total number of staff employed, broken down by (i) gender, (ii) ethnic group and (iii) age group; and how many are registered disabled. [166391]

Alun Michael: Data on staffing levels in the Civil Service are collected by the Cabinet Office and published in Civil Service Statistics. A copy of Civil Service Statistics 2002 is available in the Library, and at www.civil-service.gov.uk/statistics. The 2003 edition will be published in summer 2004.

Data on staff in Defra and its Agencies for 2004 have been placed in the Library of the House.

Co-operative Party

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs whether the Minister for Rural Affairs is a member of the Co-operative Party. [170756]

Alun Michael: Yes. I am proud to have represented the Co-operative Party as well as the Labour Party since I was first elected as a Cardiff City Councillor in 1973 and as a Member of Parliament since 1987, in accordance with the long-standing formal agreements between the two parties at national level. I am one of 30 Labour and Co-operative MPs currently serving in the House of Commons and I represent Wales on the Party's National Executive Committee.

Electric Shock Dog Collars

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the welfare implications of the use of electric shock collars for dogs. [170190]

Mr. Bradshaw: The scientific evidence concerning the welfare implications of the use of electric shock collars for dogs is not conclusive. In the absence of conclusive evidence it would not be appropriate to make an assessment but we will carefully consider any further evidence that is produced.

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received on electric shock collars for dogs; and if she will make a statement. [170191]

Mr. Bradshaw: The Department has received a number of representations both in support of and in opposition to the use of electric shock collars for dogs.

Fly-tipping

Mrs. May: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the effect on fly-tipping of *(a)* the Landfill Directive and *(b)* the most recent rise in landfill tax. [167515]

Margaret Beckett: No formal assessment has been made of the effect on fly-tipping of implementing the Landfill Directive in England and Wales, or the £1 increase in the landfill tax rate for a tonne of active waste that occurred on 1 April this year. However, Defra is commissioning a comprehensive research project looking at the causes and incentives of illegal waste disposal that will result in a good practice guide focusing on pro-active, preventative policies. We expect the results of the research to be available in late 2005.

Defra launched a consultation on its proposed Fly-Tipping Strategy on 23 February 2004.

National Assembly for Wales

Mr. Simon Thomas: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions *(a)* she and *(b)* her ministerial colleagues held with National Assembly colleagues on each day in the week up to and including 24 February; and on which topics. [158359]

Margaret Beckett *[holding answer 3 March 2004]:* My Ministerial colleagues and I have regular discussions with National Assembly colleagues, those of the Scottish Parliament and Northern Irish Ministers across a wide range of topics.

Radioactive Contamination (Chernobyl Accident)

Llew Smith: To ask the Secretary of State for Environment, Food and Rural Affairs how many farms in England, comprising what land areas and in what locations, still have restrictions applied to them in respect of land use as a result of the residual radioactivity from the Chernobyl nuclear accident. [169877]

Miss Melanie Johnson: I have been asked to reply.

There have been no restrictions on land use as a result of the Chernobyl accident. However, restrictions have been placed on the sale, movement and slaughter of sheep in areas affected by the Chernobyl accident, to prevent contaminated sheep meat from entering the food supply.

The number of farms and area of land affected, as of 30 April 2004, are as follows:

Number of farms—nine

Land area (ha)—12,100

Location—West Cumbria.

Rolls-Royce Marine Power Operations

Judy Mallaber: To ask the Secretary of State for Environment, Food and Rural Affairs (1) how many representations have been received on the Environment Agency's proposed decision document relating to the operation of Rolls Royce Marine Power Operations, Derby in the consultation closing in January; and when she will reach a decision on their proposals; [171376]

(2) whether objections have been received to the Environment Agency's proposed new authorisations for Rolls Royce Marine Power Operations, Derby and the related decision to end authorisation of disposal of radioactive waste at Hills Quarry, Crich in the consultation ending in January 2004. [171377]

Mr. Morley: Ministers have received 17 representations in response to Rolls Royce Marine Power Operation's applications for disposal of radioactive waste from the company's nuclear fuel production plant and the Neptune Reactor, Raynesway, Nuclear Licensed sites. These were all in relation to the disposal of solid low-level radioactive waste at Hilts Quarry landfill site.

Ministers are currently considering the Agency's proposed decision document. An announcement will be made shortly.

Sites of Scientific Interest

Mr. Hunter: To ask the Secretary of State for Environment, Food and Rural Affairs what guidelines she issued to English Nature prior to English Nature's recent assessment of sites of special scientific interest. [171071]

Mr. Bradshaw: English Nature assesses the condition of Sites of Special Scientific Interest (SSSIs) according to common standards agreed for the UK through the Joint Nature Conservation Committee (JNCC), and not on the basis of Government guidelines. Detailed standards for individual habitats and species are also prepared through the JNCC.

Mr. Hunter: To ask the Secretary of State for Environment, Food and Rural Affairs what English Nature's policy is regarding informing relevant landowners of its intention to conduct assessments of sites of special scientific interest. [171072]

Mr. Bradshaw: English Nature will seek permission from an owner before entering onto land within a Site of Special Scientific Interest (SSSI) to make a condition assessment. In the rare cases where permission is refused, or where ownership cannot be ascertained (four out of 4,699 assessments of SSSI units in 2003–04), English Nature has power of entry onto land to carry out condition assessments.

Mr. Hunter: To ask the Secretary of State for Environment, Food and Rural Affairs what English Nature's policy is on allowing relevant landowners *(a)* to see the information it holds on sites of special scientific interest and *(b)* to comment on it before it is published. [171073]

Mr. Bradshaw: The English Nature website gives information on the conservation interest of Sites of Special Scientific Interest (SSSIs), and their condition. The ecological and geological information on SSSIs is generally available from English Nature, on request, under the Environmental Information Regulations. Owners and occupiers are welcome to offer comments on the information on SSSIs on the website. There is a comments section on the website, under the heading 'Contact Us'.

Tobacco

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 28 April 2004 to question no.167068, to what uses the tobacco grown in EU countries is put; and what proportion was exported from the EU in the last period for which figures are available. [171184]

Alun Michael: Tobacco grown in the EU is used in the manufacture of tobacco products for consumption within the EU and for export.

In 2002, production of tobacco in the EU was 334,000 tonnes. EU exports of raw tobacco to third countries were 189,131 tonnes (about 57 per cent. of EU production).

Woodcraft Folk

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what Government funding is provided to the Woodcraft Folk; what the purpose of that funding is; and what its constitution and governance arrangements are. [170752]

Alun Michael: The records for Defra's main funding streams to voluntary organisations show no payments to the Woodcraft Folk. We do not keep records of payments from other parts of Government.

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what the relationship is between the Woodcraft Folk and the Co-operative Party. [170757]

Alun Michael: As I was not aware of any relationship I have consulted the General Secretary of the Co-operative Party who has confirmed that there is no connection between the Party and the Woodcraft Folk.

DEPUTY PRIME MINISTER

Sea Bass

Mr. Sanders: To ask the Deputy Prime Minister if he will make it his Department's policy to source all sea bass used in catering outlets for which his Department is responsible from hand-line fishermen rather than pair trawlers. [167540]

Yvette Cooper: The purchasing policy of the Office of the Deputy Prime Minister reflects the Government's policy. I refer the hon. Member to the answer given by my hon. Friend the Under-Secretary of State for Environment, Food and Rural Affairs on 30 April 2004, *Official Report*, column 1344W.

Deprivation Indicators (Newcastle)

Mr. Cousins: To ask the Chancellor of the Exchequer if he will list the deprivation indicators for the electoral wards in the City of Newcastle as designated in 2003. [171157]

Yvette Cooper: There are 37 indicators underpinning the Index of Multiple Deprivation. These fall into seven separate dimensions of deprivation (income, employment, health, education, barriers to housing and services, crime and living environment). Further details on these indicators can be found in the full report on the Indices of Deprivation 2004, which is available at www.odpm.gov.uk/indices.

While the Indices of Deprivation 2000 was produced at ward level, the new Indices—The Indices of Deprivation 2004—have been produced at Super Output Area, lower layer.

A decision was taken to explore another base geography for the Indices to overcome the problems associated with frequent ward boundary changes and the inconsistency in the size of wards. This new base geography is intended to be more stable over time and more consistent in size. The decision to use Super Output Areas was taken after an extensive period of consultation.

Super Output Areas cover between 1000 and 3000 people and are, in most cases, smaller than wards. They allow us to better identify small pockets of deprivation and provide a richer picture of local variations in deprivation. They will also help to ensure that the Government continues to focus its efforts on tackling disadvantage at those areas most in need.

Electoral Commission Report

Sue Doughty: To ask the Deputy Prime Minister when he received the report by the Electoral Commission on Guildford Borough Council Elections of 1 May 2003, The Integrity and Security Report; and when and in what form he will publish the report. [171747]

Phil Hope: I refer the hon. Member to the answers given on 29 April 2004, *Official Report*, column 1226W. The statutory evaluation report referred to is the only report that the Electoral Commission has published on the all-postal pilot election held in Guildford in May 2003.

Fire Service (Gloucestershire)

Mr. Laurence Robertson: To ask the Deputy Prime Minister (1) if he will make a statement on plans to remove the fire control from the Gloucestershire Tri-Service Centre at Quedgley; [172365]

(2) what assessment he has made of the likely impact on the performance of the Fire Service of a move away from the Gloucestershire Tri-Service Centre at Quedgley; and if he will make a statement. [172366]

Mr. Raynsford: The Office of the Deputy Prime Minister announced on 4 March the Government's response to the consultation exercise on regional fire and rescue control rooms. The regional control centres will be able to communicate effectively with police and ambulance controls as well as with each other. They will provide a unified, resilient national network and enable enhanced service delivery by all Fire and Rescue Authorities. No decisions have yet been made on the location of the new regional control centres, and there are no specific plans in respect of any existing control rooms.

Homelessness (Easington)

Mr. Cummings: To ask the Deputy Prime Minister how many homeless persons applications were made to the District of Easington Council in *(a)* 2001, *(b)* 2002 and *(c)* 2003; and how many were accepted and housed in each year. [170118]

Yvette Cooper: Information reported to the Office of the Deputy Prime Minister by Easington District Council in relation to its activities under homelessness provisions of Housing Acts is in respect of households rather than persons. A summary of the latest data supplied by Easington DC is tabled as follows.

Decisions taken by Easington DC in respect of applications by homeless households

	Applications	*Acceptances*[1]	*Housed*[2]
2001	166	81	49
2002	343	178	117
2003	756	337	81

[1] Acceptances refer to eligible households found to be unintentionally homeless and in a priority need category.

[2] The number of accepted households initially placed in temporary accommodation arranged by the local authority, or which accepted a placement in settled accommodation (such as a "Part 6" offer or a Qualifying offer of an assured shorthold tenancy). Excludes "homeless at home" cases.

Source:

ODPM quarterly P1E homelessness returns.

Green Belt

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to the answer of 30 April 2004, *Official Report*, column 1331W, on Green Belt, how many applications for development on Green Belt land have been refused planning permission since 1 May 1997. [172481]

Keith Hill: The information requested is not held centrally and could be provided only at disproportionate cost.

Housing Stock Transfer

Mr. Austin Mitchell: To ask the Deputy Prime Minister what conditions must be fulfilled before a council may apply to transfer management of its housing stock to an arm's length management organisation; and whether the council is required to demonstrate that it is performing to the Government's satisfaction. [172283]

Keith Hill: A local authority requires the approval of the Secretary of State, my right hon. Friend the Deputy Prime Minister under section 27 of the Housing Act 1985 to enter into an agreement for its housing stock to be managed by an Arm's Length Management Organisation (ALMO). The criteria for approval are set out in "Guidance on Arms Length Management of local authority housing" issued by the Office of the Deputy Prime Minister in March 2003. The performance of the local authority is not a relevant criterion, though the performance of the ALMO must be rated at least 2* (good) by the Housing Inspectorate to qualify for additional funding.

Milton Keynes

Dr. Starkey: To ask the Deputy Prime Minister when the last meeting of the Inter-regional Board on the Milton Keynes growth area was; what issues were discussed; and what the outputs were. [170142]

Yvette Cooper: The Milton Keynes and South Midlands growth area Inter-regional Board convened for the first time on 11 February 2004. The board contains senior representatives from the key organisations involved in delivering the MKSM growth proposals, and is designed to provide top-level oversight. The board is chaired by my noble Friend Lord Rooker and is scheduled to meet around three times a year. All meetings are open to the public. At the initial meeting the board discussed a number of issues, including infrastructure delivery and the MKSM public examination. The minutes of the meeting and news release are available on the Office of the Deputy Prime Minister's website.

Roadside Advertising

Mr. Ben Chapman: To ask the Deputy Prime Minister what assessment he has made of the cost to local authorities of administering schemes of roadside and roundabout advertising. [172106]

Keith Hill: The Office of the Deputy Prime Minister has not made such an assessment.

Telecommunications Masts

Mr. David Amess: To ask the Deputy Prime Minister how many planning applications for mobile phone masts have been refused in Essex in the last 12 months; and if he will list the *(a)* applicants and *(b)* sites. [171097]

Yvette Cooper: The information requested is not held centrally and could be provided only at disproportionate cost.

However, during September and October every year the mobile network operators write to every local authority with details of their network rollout for the year ahead. When they write to the local authority they also provide details of their existing sites within the local authority area. The hon. Member may want to contact the network operators for copies of their plans.

Timber

Ms Walley: To ask the Deputy Prime Minister whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167616]

Phil Hope: I refer my hon. Friend to the answer given by my hon. Friend the Minister for the Environment on 10 May 2004, *Official Report*, column 31W.

DEFENCE

Iraq

Mr. Edwards: To ask the Secretary of State for Defence if he will make a statement on reports that the US Army has been firing on ambulances in Falluja. [171251]

Mr. Ingram: We are not aware of any incidents of Coalition Forces firing on ambulances.

Paul Flynn: To ask the Secretary of State for Defence what steps have been taken since the end of the Iraq war to monitor levels of uranium in *(a)* milk and *(b)* drinking water. [166869]

Mr. Ingram: The Ministry of Defence will provide advice on carrying out risk assessments on depleted uranium (DU) within urban areas and on long-term monitoring of DU in the environment, to the United Nations Environment Programme.

Al Yamamah Contracts

Mr. Gerald Howarth: To ask the Secretary of State for Defence what discussions his Department has had with BAE Systems regarding the proposed disposal of its shipbuilding business; and if he will make a statement. [170750]

Mr. Ingram: The Ministry of Defence has had one approach from BAE Systems to discuss procedure. However, no proposals have been received from the company regarding change of ownership or control of its ship building business.

Army Air Corps (Medical Care)

Miss McIntosh: To ask the Secretary of State for Defence how many medical personnel are based at *(a)* AAC Aldergrove, *(b)* AAC Hereford, *(c)* AAC Wattisham, *(d)* AAC Middle Wallop and *(e)* AAC Netheravon, broken down by (i) service, (ii) rank and (iii) specialisation. [169987]

Mr. Caplin: The following tables detail the medical personnel based at AAC Aldergrove, AAC Wattisham, AAC Middle Wallop and AAC Netheravon broken down by service, rank and specialisation. I am withholding information for AAC Hereford under exemption 1 of the Code of Practice on Access to Government Information.

Service	*Rank*	*Number*	*Specialism*
AAC Aldergrove			
Army	Lieutenant Colonel	1	Medical Officer
	Captain	1	Occupational Health Nurse
	Sergeant	1	Combat Medical Technician
RAF	Wing Commander	1	Medical Officer
	Flight Lieutenant	1	Medical Officer
	Flight Sergeant	1	Medical Admin
	Sergeant	1	Medical Admin
	Sergeant	1	Pharmacy Technician
	Sergeant	1	Practice Nurse
	Corporal	2	Medical Admin
	Corporal	1	Practice Nurse
	Junior Technician	1	Environmental Health Technician
	Medical Assistants	6	Medical Assistants
Civilian		1	Civilian Medical Practitioner
		1	Practice Nurse
		2	Physiotherapists
		2	Admin Officers
		3	Admin Assistants
AAC Wattisham			
Army	Lieutenant Colonel	1	Consultant Aviation Medicine
	Major	1	Specialist Aviation Medicine
	Sergeant	1	Combat Medical Technician
	Corporal	4	Combat Medical Technician
	Lance Corporal	5	Combat Medical Technician
Civilian		1	Civilian Medical Practitioner
		1	Practice Nurse
		2	Locum Physiotherapists

Service	Rank	Number	Specialism
AAC Middle Wallop			
Army	Lieutenant Colonel	1	Consultant Aviation Medicine
	Major	1	Specialist Aviation Medicine
	Sergeant	1	Combat Medical Technician
	Corporal	1	Combat Medical Technician
	Lance Corporal	2	Combat Medical Technician
Civilian		2	Civilian Medical Practitioner (part-time)
		1	F Grade Nurse
		1	E Grade Nurse
		1	Locum Physiotherapist
		7	Civilian Medical Technicians
AAC Netheravon			
Army	Lieutenant Colonel (TA)	1	Consultant Aviation Medicine
	Colonel (Retired)	1	Regimental Medical Officer
	Sergeant	1	Practice Manager
	Corporal	1	Combat Medical Technician
	Lance Corporal	1	Combat Medical Technician

Atomic Weapons Establishment

Adam Price: To ask the Secretary of State for Defence if he will make a statement on current and future research and development projects to be undertaken by the Atomic Weapons Establishment at Aldermaston, Berkshire. [170210]

Mr. Ingram: The research and development activities undertaken at AWE are designed to ensure the safe stewardship of the UK's stockpile of Trident warheads and our ability to maintain the capability necessary to meet the policy described in the 1998 Strategic Defence Review. As indicated in Paragraph 3.11 of the Defence White Paper of December 2003 (Cm 6041–1), this includes the need to take appropriate steps to ensure that the range of options for maintaining a nuclear deterrent capability is kept open until decisions are required on whether to replace Trident. This policy is consistent with our international treaty obligations. Research and development activities fall under four principal headings: computer simulation; hydrodynamics; high energy density plasma physics; and materials ageing. The precise nature and scope in the future of such programmes will depend on the outcome of the processes referred to in the December 2003 Defence White Paper.

Civilian Staff

Angus Robertson: To ask the Secretary of State for Defence how many full-time equivalent, permanent *(a)* industrial and *(b)* non-industrial civilian staff are employed by his Department in the UK, excluding Trading Funds, Royal Fleet Auxiliaries and those on career breaks, long-term sick leave and secondments; what the equivalent figures were in each of the last three years; and if he will make a statement. [170449]

Mr. Caplin: The number of full-time equivalent, permanent and casual, industrial and non-industrial civilian staff employed by the Ministry of Defence, excluding Trading Funds, Royal Fleet Auxiliaries and those on career breaks, long-term sick leave, secondments etc. as at the latest available date and for the last three years is as follows.

Number

	1 March 2004[1]	*1 April 2003*	*1 April 2002*	*1 April 2001*
Permanent non-industrial	62,560	59,910	58,270	58,700
Permanent industrial	13,800	14,370	16,490	18,890
Permanent total	76,370	74,280	74,760	77,580
Casual total	260	1,140	1,500	1,200
All staff	76,630	75,420	76,260	78,780

[1] The increase in the numbers between 1 April 2003 and 1 March 2004 reflects an increase in the number of civil servants falling under the categories detailed in the question, rather than an increase in the total number of civilians working for the Ministry of Defence.

Note:

The figures have been rounded to the nearest 10.

Contract Cancellations

Mr. Gerald Howarth: To ask the Secretary of State for Defence what expenditure was incurred by his Department at the cancellation of *(a)* Counter Anti-Radiation Missile Suite, *(b)* Mine Detection and Neutralisation and *(c)* Microwave Landing System in 2003–04 cash terms. [170559]

Mr. Ingram: I will write to the hon. Member and place a copy of my reply in the Library of the House.

Defence Personnel (Vale of York)

Miss McIntosh: To ask the Secretary of State for Defence how many departmental *(a)* civilian and *(b)* service personnel are based at (i) RAF Leeming, (ii) RAF Linton on Ouse, (iii) AAC Dishforth and (iv) Alanbrooke Barracks. [170002]

Mr. Caplin: Reliable data are not available centrally (except at Government Office Region level) and could be provided only at disproportionate cost.

Defence Projects

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will name *(a)* customer one and *(b)* customer two for the (i) Advanced Air-Launched Anti-Armour Weapon, (ii) Advanced Short Range Air-to-Air Missile, (iii) Airborne Stand-Off Radar Astute Class Submarine, (iv) Attack Helicopter WAH-64 Apache,

(v) Conventionally Armed Stand-Off Missile, (vi) Typhoon Extended Range Ordnance/Modular Charge System and (vii) Hercules C-130J projects. [170745]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will name *(a)* customer one and *(b)* customer two for the (i) Future Strategic Tanker Aircraft, (ii) Ground Based Air Defence, (iii) Guided Multiple Launch Rocket System, (iv) Indirect Fire Precision Attack, (v) Light Forces Anti-Tank Guided Weapon Systems, (vi) Next Generation Anti-Armour Weapon and (vii) Terrier projects. [170746]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will name *(a)* customer one and *(b)* customer two for the (i) High Velocity Missile System, (ii) Landing Platform Dock (Replacement), (iii) Merlin HC Mk 3 Helicopter, (iv) Merlin HM Mk1 Helicopter, (v) Multi-Role Armoured Vehicle, (vi) Nimrod Maritime Reconnaissance and Attack Mk 4, (vii) Seawolf Mid-Life Update, (viii) Spearfish Heavyweight Torpedo and (ix) Sting Ray Lightweight Torpedo projects. [170747]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will name *(a)* customer one and *(b)* customer two for the (i) Swiftsure and Trafalgar Class Submarine Update, (ii) Tornado GR1 Mid-Life Update, (iii) Challenger II, (iv) A400M, (v) Landing Ship Dock (Auxiliary) (formerly Alternative Landing Ship Logistic), (vi) Beyond Visual Range Air-to-Air Missile, (vii) Typhoon Aircrew Synthetic Training Aids, (viii) Future Joint Combat Aircraft and (ix) Short Term Strategic Airlift projects. [170748]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will name *(a)* customer one and *(b)* customer two for the (i) Sonar 2087, (ii) Successor Identification Friend or Foe, (iii) Trojan and Titan, (iv) Type 45 Destroyer, (v) Skynet 5 Support Vehicle, (vi) Battlefield Light Utility Helicopter, (vii) Future Aircraft Carrier and (viii) Future Integrated Soldier Technology projects. [170751]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Sea Bass

Mr. Sanders: To ask the Secretary of State for Defence if he will make it his Department's policy to source sea bass used in catering outlets *(a)* in the armed services and *(b)* for which his Department is responsible from hand-line fishermen rather than pair trawlers. [167543]

Mr. Ingram: All food for use by the armed forces is sourced through a central food supply contract with a bespoke price list. Sea bass is not currently listed and is not supplied under the contract.

Defra supports the sourcing of sea bass from sustainable fisheries and handlining, as an relatively low impact method of fishing, can play a part in ensuring fisheries remain sustainable. However, the last report in 2003 by the International Council for the Exploration of the Seas on sea bass advised that the level of exploitation of the stock at that time was sustainable and did not recommend closure of the offshore pair trawl fishery. There are currently no restrictions at a United Kingdom or Community level on the method of fishing that can be used to target bass. In addition, to address the dolphin bycatch problem associated with the pair trawl fisher, Defra-funded trials of a separate grid device to reduce dolphin bycatch are currently taking place, with the co-operation of the fishing industry.

In these circumstances, I do not believe that recommending a specific source of supply for bass could be justified at this stage.

Equipment Contracts

Mr. Gerald Howarth: To ask the Secretary of State for Defence (1) what the date of contract signature for the *(a)* Typhoon Aircrew Synthetic Training Aids, *(b)* Future Joint Combat Aircraft, *(c)* Short Term Strategic Airlift, *(d)* Sonar 2087, *(e)* Successor Identification Friend or Foe, *(f)* Trojan and Titan, *(g)* Type 45 Destroyer and *(h)* Skynet 5 projects are; [170555]

(2) what the date of contract signature for the *(a)* Spearfish Heavyweight Torpedo, *(b)* Sting Ray Lightweight Torpedo, *(c)* Swiftsure and Trafalgar Class Submarine Update, *(d)* Tornado GR1 Mid-Life Update, *(e)* Challenger II, *(f)* A400M *(g)* Landing Ship Dock (Auxiliary) and *(h)* Beyond Visual Range Air-to-Air Missile projects are; [170556]

(3) what the date of contract signature for the *(a)* Hercules C-130J, *(b)* High Velocity Missile System, *(c)* Landing Platform Dock (Replacement), *(d)* Merlin HC Mk 3 Helicopter, *(e)* Merlin HM Mk 1 Helicopter, *(f)* Multi-Role Armoured Vehicle, *(g)* Nimrod Maritime Reconnaissance and Attack Mk 4 and *(h)* Seawolf Mid-Life Update projects are; [170557]

(4) what the date of contract signature for the *(a)* Advanced Air-Launched Anti-Armour Weapon, *(b)* Advanced Short Range Air-to-Air Missile, *(c)* Airborne Stand-Off Radar, *(d)* Astute Class Submarine, *(e)* Attack Helicopter WAH-64 Apache, *(f)* Conventionally Armed Stand-Off Missile, *(g)* Typhoon and *(h)* Extended Range Ordnance/ Modular Charge System projects are. [170558]

Mr. Ingram: I will write to the hon. Member and place a copy of my reply in the Library of the House.

Equipment Costs

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the forecast cost was on 31 March 2003 for the Landing Ship Dock (Auxiliary) and Support Vehicle. [170359]

Mr. Ingram: Forecast costs for the Landing Ship Dock (Auxiliary) and Support Vehicle programmes were excluded from the published Major Projects Report 2003, due to commercial sensitivity. The situation remains unchanged. Negotiations with the Landing Ship Dock

(Auxiliary) contractor are continuing, and the Support Vehicle Preferred Bidder is yet to be announced. I am, therefore, withholding this information under Exemption 7 of the Code of Practice on Access to Government Information.

Mr. Gerald Howarth: To ask the Secretary of State for Defence (1) what the forecast costs on 31 March 2002 were for *(a)* Spearfish Heavyweight Torpedo, *(b)* Advanced Short Range Air-to-Air Missile, *(c)* Extended Range Ordnance/Modular Charge System, *(d)* Swiftsure and Trafalgar Class Submarine Update, *(e)* Landing Platform Dock (Replacement), *(f)* Hercules C-130J and *(g)* Seawolf Mid-Life Update; [170360]

(2) what the forecast costs on 31 March 2001 were for *(a)* Short Term Strategic Airlift, *(b)* A400M *(c)* Beyond Visual Range Air-to-Air Missile, *(d)* Type 45 Destroyer Successor Identification Friend or Foe, *(e)* Landing Ship Dock (Auxiliary), *(f)* Typhoon Aircrew Synthetic Training Aids, *(h)* Trojan and Titan Future Joint Combat Aircraft and *(i)* Sonar 2087. [170361]

Mr. Ingram: I will write to the hon. Member and place a copy of my reply in the Library of the House.

Equipment Service Dates

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the forecast in-service dates on 31 March 2001 were for *(a)* A400M Beyond Visual Range Air-to-Air Missile, *(b)* Successor Identification Friend or Foe, *(c)* Typhoon Aircrew Synthetic Training Aids, *(d)* Trojan and Titan and *(e)* Future Joint Combat Aircraft. [170362]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the forecast in-service dates were on 31 March 2003 for *(a)* Sting Ray Lightweight Torpedo, *(b)* Multi-Role Armoured Vehicle and *(c)* Future Joint Combat Aircraft. [170364]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the forecast in-service dates were on 31 March 2002 for *(a)* Spearfish Heavyweight Torpedo, *(b)* Advanced Short Range Air-to-Air Missile and *(c)* Future Joint Combat Aircraft. [170365]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Future Joint Combat Aircraft

Mr. Hancock: To ask the Secretary of State for Defence pursuant to his answer of 22 March to the hon. Member for Chorley, *Official Report*, columns 548–49W on the Future Joint Combat Aircraft programme, what the original *(a)* estimated cost and *(b)* delivery date of the Joint Strike Fighter was; and what the current projected final cost is. [170470]

Mr. Ingram: The original estimated cost at the time of the US Defense Acquisition Board approval of the Systems Demonstration and Development phase of the Joint Strike Fighter was $33 billion. The current projected final cost of the phase is $41 billion.

The original estimated delivery date, based on the Short Take Off/Vertical Landing variant of the aircraft, was 2010.

IT Outsourcing

Mr. Hancock: To ask the Secretary of State for Defence when, during the process to outsource IT support and provision across his Department, he will provide to trade unions, *(a)* a risk strategy, *(b)* a scoping study, *(c)* an up to date procurement strategy, *(d)* a personnel impact study, *(e)* an intelligent customer strategy and *(f)* information on a public service comparator; and if he will make a statement. [168288]

Mr. Ingram: As previously agreed with the Council of Civil Service Unions (CCSU), a meeting is being arranged at a mutually convenient date to review the key risks identified within the Defence Information Infrastructure (DII) programme and their management. This meeting should have taken place by mid May. The DII Business Prospectus provides a comprehensive description of the intended scope of the programme. This was made available to the TUs on 3 April 2003.

A copy of the Procurement Strategy Review Note was made available to the TUs on 3 April 2003. At the request of the CCSU, on 13 February 2004 a copy of comments provided by HM Treasury on the Review Note was also provided.

A copy of the report produced at the end of the Personnel Impact Study was made available to TUs on 24 June 2003.

The work on the Intelligent Customer Strategy is in its early stages with the plan for its production currently being formulated. It was agreed with the CCSU at a meeting on 16 February 2004 that they would be directly involved in its development. The plan should be sufficiently developed by 7 May to allow the TUs to see and comment on it.

As the CCSU is aware, the work on the Public Sector Comparator is reaching a state of maturity that will enable it to be communicated to the TUs. Again, this is expected to be done by 7 May.

Mr. Hancock: To ask the Secretary of State for Defence whether he will make it his policy to ensure that there is an in-house bidder for the support and provision of IT across his Department. [168292]

Mr. Ingram: No. A significant proportion of the Department's IT provision has been outsourced in recent years as part of wider initiatives to make greater use of the private sector in the provision of public services. The Department's policy is that when services already delivered under outsourcing arrangements are re-competed or rationalised, in-house bids should not normally be invited because the associated requirement for substantial reinvestment in management, training and support systems makes it unlikely that an in-house option would represent value for money. Where no in-house bid is invited, an estimate of the costs of a public sector option or a "status quo" option would normally be made, in order to provide a value for money benchmark.

Joint Strike Fighter

Mr. Keetch: To ask the Secretary of State for Defence what the current weight of the standard take-off vertical

landing version of the Joint Strike Fighter is; what the required weight at in-service date is; and if he will make a statement. [170353]

Mr. Ingram: Joint Strike Fighter (JSF) requirements are defined in terms of aircraft performance, which is the product of many factors, including weight, drag, and engine thrust. At current engine thrust and drag values, the Short Take Off/Vertical Landing variant of the JSF is some 3300 lbs overweight to meet its stipulated overall performance levels. Work is in hand in the United States to examine options to ensure that the overall performance requirements are met, addressing all possible options including a significant reduction in aircraft weight. This work will not mature in detail until early 2005, although an interim assessment of likely outcome in summer 2004 will enable performance against the United Kingdom's Key User Requirements to be preliminarily evaluated at that time.

Media

Dr. Julian Lewis: To ask the Secretary of State for Defence (1) what contacts *(a)* Defence Ministers and *(b)* departmental staff had with the Deputy Political Editor of *The Sun* in the seven days prior to 6 May; [172580]

(2) whether his Department authorised *(a)* Ministers and *(b)* spokesmen to disclose to (i) *The Times*, (ii) *The Sun* and (iii) other media that an announcement is shortly to be made concerning deployment to Iraq of Royal Marines; [172582]

(3) if he will investigate the *(a)* ministerial and *(b)* departmental origins of stories in (i) *The Times* and (ii) *The Sun* on 6 May claiming to confirm a forthcoming announcement that Royal Marines are to be deployed to Iraq. [172583]

Mr. Hoon: All contacts with the media are conducted in accordance with the Ministerial Code, the Civil Service Code, the Code of Conduct for Special Advisers and Guidance on the Work of the Government Information Service. No decisions have been taken on the deployment of additional troops to Iraq. Should a decision be taken to commit additional forces to Iraq, I shall inform the House in the usual way.

Dr. Julian Lewis: To ask the Secretary of State for Defence what assessment he has made of the effect on service morale of imminent deployment plans to conflict zones being published in the Press. [172581]

Mr. Hoon: When decisions are taken on operational deployments units are informed in the proper manner, through the chain of command. Recent press comment has focused on speculation concerning the Royal Marines. Morale in the Royal Marines remains very good. The Royal Marines continue, as is usual, to focus on their professional preparations for a full range of training and operations. Media speculation does however, have a considerable impact on the morale of young Service families, particularly, as happened on this occasion, when wives and children are accosted by journalists outside schools.

Procurement Contracts (Scotland)

Angus Robertson: To ask the Secretary of State for Defence pursuant to the answer of 11 March, *Official Report*, column 1654W, on Procurement Contracts (Scotland), what the average duration of the contract terms directly placed by his Department with companies based in Scotland was in each of the last four financial years; and what the *(a)* 10 longest and *(b)* 10 shortest running contracts were; and what the total value was of *(a)* and *(b)*. [170433]

Mr. Ingram: Data necessary to respond fully to this question prior to financial year 2003–04 are not held centrally. However, in respect of these earlier years I am able to offer the following information based on the numbers of the new contracts previously reported:

of the 724 new contracts let with companies based in Scotland during 2000–01, 205 of these contracts lasted less than one year and these 205 contracts had an average value of £9,000. 104 of the new contracts let with companies based in Scotland in 2000–01 were still running in 2003–04, and these 104 contracts had an average value of £15 million;

of the 604 new contracts let with companies based in Scotland during 2001–02,180 of these contracts lasted less than one year and these 180 contracts had an average value of £18,000. 110 of the new contracts let with companies based in Scotland in 2001–02 were still running in 2003–04, and these 110 contracts had an average value of £102 million;

of the 600 new contracts let with companies based in Scotland during 2002–03, 292 of these contracts lasted less than one year and these 292 contracts had an average value of £410,000. 308 of the new contracts let with companies based in Scotland in 2002–03 were still running in 2003–04, and these 308 contracts had an average value of £20 million.

Details of new contracts let with companies based in Scotland during 2003–04

Contracts	
Number of new contracts	458
Total value of these new contracts	£204 million
Most valuable new contract let	£40 million
Total value of the 10 longest contracts	£53 million
Total value of the 10 shortest contracts	£0.058 million
Average duration of all new contracts let	[1]282 days

[1] Refers to the average (mean) number of calendar days

Angus Robertson: To ask the Secretary of State for Defence pursuant to the answer of 11 March 2004, *Official Report*, column 1654W, on Procurement Contracts (Scotland), what the total projected annual cost of the procurement contracts his Department placed with companies based in Scotland in *(a)* 2002–03, *(b)* 2001–02 and *(c)* 2000–01 was for each of the 10 years following the placing of the contracts; what the actual total cost was of the contracts placed in (i) 2002–03, (ii) 2001–02 and (iii) 2000–01 for the years for which information is available; and if he will make a statement. [170434]

Mr. Ingram: The information requested in respect of the total projected annual cost of procurement contracts placed by the Ministry of Defence with companies based in Scotland is not held centrally. These data could be provided only at disproportionate cost (Exemption 9 of the Code of Practice on Access to Government Information).

Details of total payments made against contracts placed with companies based in Scotland up until 2003–04 are as follows.

£ million

	Value of payments made in:			
	2000-01	2001-02	2002-03	2003-04
Contracts let before 2000-01	480	410	290	170
Contracts let during 2000-01	50	110	70	50
Contracts let during 2001-02	—	50	150	100
Contracts let during 2002-03	—	—	100	300
Contracts let during 2003-04	—	—	—	50
Total	520	570	610	670

Note:
The figures are exclusive of VAT and have been rounded to the nearest £10 million.

Refuelling Tanker Aircraft

Mr. Keetch: To ask the Secretary of State for Defence whether CV(F) will carry air-to-air refuelling tanker aircraft; and if he will make a statement. [170351]

Mr. Ingram: The primary aircraft operating from CVF will be the future Joint Combat Aircraft (JCA), a role which will be undertaken by the Short Take Off Vertical Landing variant of the Joint Strike Fighter. Should analysis prove it necessary, a refuelling capability could be provided by embarked JCA aircraft adapted for the task. There would be no requirement for the carrier to operate a different aircraft type for refuelling operations.

Royal Tournament

Mr. Hancock: To ask the Secretary of State for Defence what plans he has *(a)* to reintroduce the Royal Tournament, *(b)* stage similar events and *(c)* support a private venture of a similar nature; and if he will make a statement. [169176]

Mr. Ingram: There are no plans to reintroduce the Royal Tournament, the ending of which was announced by my right hon. Friend the Secretary of State for Defence on 25 October 1999, *Official Report*, columns 696–97W. Nor have we any plans to support a private venture of a similar nature.

The Department has, however, continued to mount major set-piece events to demonstrate the capability of the armed forces. Under the umbrella of 'Defence 2000', the armed forces have helped stage the Royal Military Tattoo in 2000, the International Festival of the Sea in 2001, and the Queen's Golden Jubilee Celebrations in Portsmouth in 2002. The department has also continued to participate in a wide variety of smaller events such as open days, ships visits, county shows and showcase events such as the Edinburgh Military Tattoo and the Fairford Royal International Air Tattoo (RIAT). We have also increased our presence in local communities and schools with the Service and Ministry of Defence Presentation Teams.

The recent high level of operational commitments and the associated demands they have placed on Service personnel and their families, have caused us to review our continued involvement in events that could be regarded as discretionary. The large set-piece events of 'Defence 2000' have proved to be particularly demanding. Following our decision not to proceed with the planned events for 2003 and 2004, we have taken the opportunity to review our future strategy. As a result, we have now concluded that we will gain the greatest benefit by focusing our resources on supporting the well established single-service events such as RIAT, specific commemorations such as the 200th anniversary of the Battle of Trafalgar, and by making better use of our contribution to the many smaller events that take place across the length and breadth of the UK. These events, which tend not to be as manpower intensive, have proved to be excellent vehicles for cementing the relationship between the armed forces and local communities, and have done much to raise the overall profile of the Services.

By building on these events, I am fully confident that the current high profile of the armed forces will be maintained. We have therefore decided not to continue with the Defence 2000 Series.

Submarines

Mr. Keetch: To ask the Secretary of State for Defence what the *(a)* expected and *(b)* latest possible in-service dates for the V class SSBN are; and if he will make a statement. [170328]

Mr. Ingram: No decisions have been taken on the decommissioning dates of the Royal Navy's Vanguard class nuclear submarines.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what his policy is regarding ownership of the United Kingdom's submarine building capability. [170749]

Mr. Ingram: The only United Kingdom facilities currently engaged in submarine building are those owned by BAE Systems Marine Ltd. at Barrow-in-Furness. The Government's special share in BAE Systems Marine Ltd. ensures that decisions affecting the ownership of these facilities cannot be taken without Government consent.

HOME DEPARTMENT

Seaport/Airport Security

Patrick Mercer: To ask the Secretary of State for the Home Department what percentage of UK *(a)* seaports and *(b)* airports will have radiation detection equipment installed by 1 July. [169962]

Ms Blears: We have implemented a Programme of work to introduce screening equipment at UK ports for detecting the illicit importation of radioactive materials that could be used by terrorists. By 1 July 2004 screening equipment will be in place at a number of major UK ports of entry. This is an on-going programme based on prudent contingency planning which is planned to be completed by March 2007. It would not be in the interests of national security to give details of the implementation programme.

Air Weapons

Mr. Paice: To ask the Secretary of State for the Home Department how many gas-cartridge air weapons have been *(a)* surrendered to the police and *(b)* granted section 1 Firearms Certificates since the Anti-Social Behaviour Act 2003 became law; and how many gas-cartridge weapons he estimates remain in circulation. [170721]

Caroline Flint: No running total has been kept centrally of the number of self-contained gas cartridge weapons surrendered or entered on a firearms certificate. This information is currently being collated by the police. In the absence of any previous requirement to record details of ownership it is not possible to say how many remain in circulation.

Ambulance Service

Mr. Greg Knight: To ask the Secretary of State for the Home Department if he will make it his policy to ensure that ambulance drivers who are engaged in work of an urgent or emergency nature are neither penalised nor prosecuted for speeding; and if he will make a statement. [171035]

Caroline Flint *[holding answer 5 May 2004]:* Provision already exists in law to protect drivers of vehicles being used for an ambulance purpose from prosecution for excess speed offences. This exemption is contained under section 87 of the Road Traffic Regulation Act 1984.

Car Stereos

Adam Price: To ask the Secretary of State for the Home Department if he will make a statement on the use of Regulation 97 of the 1986 Road Vehicle Regulations to combat noise pollution emanating from car stereos. [170208]

Caroline Flint: Regulation 97 of the Road Vehicles (Construction and Use) Regulations 1986 provides that no motor vehicle shall be used on a road in such a manner as to cause any excessive noise which could have been avoided by the exercise of reasonable care by the driver. I understand from the Association of Chief Police Officers that the police find the provision effective to deal with noisy car stereos. When enforcing the offence, police officers will give an oral warning to the driver, issue a fixed penalty notice or report for prosecution as appropiate.

Adam Price: To ask the Secretary of State for the Home Department if he will make a statement on the powers available to the police to combat noise pollution emanating from car stereos. [170209]

Caroline Flint: Regulation 97 of the Road Vehicles (Construction and Use) Regulations 1986 prohibits the use of a vehicle emitting avoidable excessive noise.

If in a particular case playing a stereo at excessive volume amounted to driving without reasonable consideration for others contrary to Section 3 of the Road Traffic Act 1988 and was causing or was likely to cause alarm, distress or annoyance, the driver may be liable to having his vehicle seized by the police under the provisions of Section 59 of the Police Reform Act 2002.

Care Custody System

Mr. Paice: To ask the Secretary of State for the Home Department what level of integration of data he expects among the *(a)* Care Custody systems, *(b)* Police National Computer, *(c)* fingerprint database, *(d)* DNA database and *(e)* firearms database. [170725]

Caroline Flint: The NSPIS Custody and Case Preparation system will be interfaced with the Police National Computer. This interface will allow for the core data held on the NSPIS Custody and Case Preparation system to be transferred to the Police National Computer and for it to be automatically updated.

The fingerprint, DNA and firearms databases will be integrated via the Police National Computer. Integration with the Police National Computer will allow for cross-checking in each of those databases.

Citizenship

Bob Russell: To ask the Secretary of State for the Home Department whether those seeking British citizenship are required *(a)* to know the words of the National Anthem and *(b)* have knowledge of the flags and patron saints of the nations of the United Kingdom; and if he will make a statement. [165330]

Mr. Browne: This knowledge is not currently required for registration or naturalisation as a British citizen. However, registrars and local authorities are encouraged to play the National Anthem at Citizenship Ceremonies.

When brought into force, the provisions of section 1 of the Nationality, Immigration and Asylum Act 2002 will require applicants to demonstrate "sufficient knowledge" of life in the United Kingdom. Details of precisely what this will entail have yet to be finalised, but the focus will be on the practical knowledge new citizens will need to participate fully in UK society.

Crime (Liverpool)

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will make a statement on the work of the Street Crime Unit in Liverpool. [170565]

Ms Blears: Robbery in Merseyside fell by 5 per cent. in 2002–03, compared to 2001–02. This has been achieved by effective partnership working across all agencies. Overall strategic, management of street crime is carried out by the Multi Agency Group. At an operational level, this is supported by Joint Agency Groups and the Robbery Reduction Team. In the Robbery Reduction Team, police and Crown Prosecution Service are co-located and the Premium Service is provided.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what changes are necessary to ensure the Liverpool Unit achieves the full benefits of co-location. [170566]

Ms Blears: The benefits can be seen in reductions in robbery in Merseyside. There were 5 per cent. fewer robberies in Merseyside in 2002–03 than in 2001–02. Merseyside aims to provide a good quality of prosecution, using the Premium Service approach. This involves the Crown Prosecution Service working closely with the police, with whom they are co-located, from an early stage of investigation to facilitate incisive progression of cases through the courts, with their co-operation.

Drug Misuse

Mr. Wyatt: To ask the Secretary of State for the Home Department what public funds were spent on tackling drugs misuse in Sittingbourne and Sheppey in *(a)* 1997–98 and *(b)* 2003–04. [170290]

Caroline Flint: Breakdown of financial allocation to local constituencies is not available to the Home Office. Funding is allocated to Drug Action Team (DAT) areas, in this case Kent DAT.

The period 1997–98 pre-dates National Drug Strategy, accounting procedures mean that the 1997 figures are no longer available and that 1998 figures are not accessible by the DAT.

In 2003–04 the total drugs allocation was £7,591,564. In order to ensure consistency figures supplied are based on funding streams associated with the National Drug Strategy and are readily verifiable. These funding streams are specifically targeted at tackling the harm caused to individuals, families and communities by the misuse of drugs. Other mainstream funding is made available at a local level, this varies and both in amount and origin as a result it is not possible to provide robust financial information.

£

	2003–04
Partnership Capacity	124,425
Treatment Pooled Budget	4,780,000
Through Care After Care Pump Priming	35,000
Building Safer Communities[1]	1,858,242
Young people	793,897
Total	7,591,564

[1] Contains non drug elements

Emergency Services

Mr. Hancock: To ask the Secretary of State for the Home Department what his policy is with regard to drivers of emergency service vehicles who are captured on speed cameras contravening speed limits. [170736]

Caroline Flint: Vehicles being used for fire brigade, ambulance or police purposes are exempt from speed limits when observation of the limit on any specific occasion would hinder them fulfilling their purpose.

The exemption is contained in section 87 of the Road Traffic Regulation Act 1984. The exemption is not automatic. Speeding is dangerous and a driver in an emergency vehicle who exceeds the speed limit unnecessarily will be liable to a fixed penalty or prosecution.

Mr. Hancock: To ask the Secretary of State for the Home Department if he will make it his policy to recompense *(a)* police authorities, *(b)* fire and rescue authorities and *(c)* health trusts, for the annual costs of dealing with the paperwork which is triggered by their emergency vehicles captured on speed cameras contravening speed limits. [170737]

Caroline Flint: There are no plans to make it policy to recompense theemergency services for the costs of processing fixed penalty notices for speeding. Emergency service vehicles are already exempt from speed limits when to observe the limit on a particular occasion would hinder their purpose. The exemption is however not automatic. The police enforce speed limits for everyone's safety on the road and where such a vehicle exceeds the limit unnecessarily a fixed penalty may be appropriate.

We are however working closely with the Association of Chief Police Officers to ensure that emergency service vehicles caught speeding by automatic camera are not followed up unnecessarily when they can rely on this exemption.

Fingerprints

Mr. Gibb: To ask the Secretary of State for the Home Department what his policy is regarding the recording of fingerprints for police use regardless of criminal conviction; and if he will make a statement. [170332]

Ms Blears: Under section 64 of the Police and Criminal Evidence Act 1984, as amended, fingerprints taken from a person in connection with the investigation of an offence may be retained after they have fulfilled the purposes for which they were taken, but shall not be used by any person except for purposes related to the prevention or detection of crime, the investigation of an offence or the conduct of a prosecution.

Identity Cards

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many and what percentage of UK residents have been a victim of identity fraud in each of the last five years. [170327]

Mr. Browne: It is not a criminal offence for a person simply to use another identity. However, false identities are often used to facilitate other offences such as deception and money laundering.

The police do not generally record incidents of identity fraud because prosecutions are recorded for the offences facilitated by false identities.

However, members of CIFAS, the UK's Fraud Prevention Service for the private sector, identified 74,000 cases of identity and impersonation fraud in 2002 and 101,000 in 2003.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department when the communication strategy to ensure engagement with the public regarding identity cards will be completed. [170528]

Mr. Browne: The identity cards communication strategy is an ongoing activity to ensure that the main audiences with an interest in the Identity Cards programme are kept up to date on progress and are informed how the programme may affect them. The communication strategy to engage the public will be regularly reviewed and developed alongside the programme's design, development and implementation to prepare for the roll-out of the first identity cards from 2007–08.

Jean-Marie Le Pen

Mrs. Ellman: To ask the Secretary of State for the Home Department what representations he has received concerning the recent visit of Jean-Marie Le Pen to the UK; and if he will make a statement. [169402]

Caroline Flint: None. It is a long-standing tradition in this country that people are free to gather together and to demonstrate their views provided that they do so within the law. Racism in all its forms damages communities and deserves the severest condemnation.

London Crime

Simon Hughes: To ask the Secretary of State for the Home Department if he will make a statement on crime trends within the Metropolitan Police Authority area. [170492]

Ms Blears: The most recent figures published by the Home Office, for the year 2002–03, show that the total number of recorded crimes for the Metropolitan Police Service increased by 2 per cent. compared to the previous year, but that the introduction of the National Crime Recording Standard (NCRS) inflated the figures in 2002–03 by 12 per cent.

I understand that the Commissioner of Police of the Metropolis recently published recorded crime statistics for the Metropolitan Police Service which showed a decrease in total recorded crime of 2 per cent. for the year ended March 2004, as compared with the previous year.

The national crime statistics for all police forces for 2003–04 are due to be published in July.

Mr. Hade Solemanpour

Alistair Burt: To ask the Secretary of State for the Home Department on what basis he refused a request to extradite to Argentina Mr. Hade Solemanpour, the former Iranian Ambassador to Argentina; and if he will make a statement. [167613]

Caroline Flint: The Argentinean request for Mr. Solemanpour's extradition was not supported by prima facie evidence sufficient to meet the requirements of UK law or of the treaty between our two countries. Accordingly, it was decided on 11 November not to issue an Order to Proceed against Solemanpour and to cancel the warrant for his provisional arrest.

National Identity Register

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department in what circumstances the police could use the National Identity Register to establish an individual's identity without their consent. [170259]

Mr. Browne: The draft Identity Cards Bill published on 26 April provides that disclosure from the National Identity Register may be made to the police where it is in the interests of national security or for purposes connected with the prevention or detection of crime or for other purposes specified by order made by the Secretary of State.

Disclosure of an audit trail of when an individual's entry in the National Identity Register has been checked could be authorised for purposes only connected with the prevention or detection of serious crime. Disclosure of information to Scottish police forces is not permitted in connection with crimes which are within the legislative competence of the Scottish Parliament.

Parliament Square Demonstrations

Mr. Ben Chapman: To ask the Secretary of State for the Home Department what plans he has to offer alternative locations to demonstrators in Parliament Square. [169254]

Caroline Flint: None. It is open to demonstrators in Parliament Square to move to another location to continue their demonstration, provided they do so within the law.

Mr. Ben Chapman: To ask the Secretary of State for the Home Department what discussions he has had with Westminster City Council regarding noise created by demonstrators in Parliament Square. [169255]

Caroline Flint: None. However, the Commissioner of Police of the Metropolis tells me that there have been a number of discussions between the Metropolitan Police and Westminster Council on the use of byelaws to control noisy demonstrations in Parliament Square.

Mr. Ben Chapman: To ask the Secretary of State for the Home Department what discussions he has had with the Metropolitan Police regarding the policing of the demonstrators in Parliament Square. [170214]

Mr. Blunkett: I have regular bilateral meetings with the Commissioner of Police for the Metropolis where current issues about the policing of London are discussed.

Parliamentary Questions

Mr. Brady: To ask the Secretary of State for the Home Department how many days on average his Department took in Session 2002–03 to give a substantive answer to a parliamentary question for ordinary written answer; and what the greatest number of days taken to answer such a question was. [155924]

Fiona Mactaggart: The Home Office does not maintain records in such a way that provides the information in the format requested without incurring disproportionate cost. The last published performance figures for the Home Office from 2001–02 showed that 39 per cent. of all PQs were answered within parliamentary deadlines.

Every effort is made to reply to parliamentary questions within the parliamentary deadlines wherever possible. Consequently the Home Office is currently in the process of introducing a new PQ system, the electronic parliamentary questions system (ePQS) to better monitor and manage the Department's performance.

The ePQS monitoring system has identified the bottlenecks in the PQ process and remedial action is being taken. As is usual with the introduction of any new IT system, performance has shown an initial decline. The benefits of ePQS are now being realised across the Department and performance is improving.

John Thurso: To ask the Secretary of State for the Home Department (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions his Department received in (i) the 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month; [170772]

(2) what proportion of *(a)* Ordinary Written questions to his Department were answered within five sitting days of tabling and *(b)* Questions for a Named Day received a substantive answer on that day in (i) 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month. [170773]

Fiona Mactaggart: The Home Office does not maintain records in such a way that provides the information in the format requested without incurring disproportionate costs. During the period 2002–03 the Home Office received 7115 Parliamentary Questions. The Department has received 4040 Parliamentary Questions so far this session. The published performance figures for 2002–2003 showed that 37 per cent. of all Parliamentary Questions were answered within Parliamentary deadlines.

Every effort is made to reply to Parliamentary Questions within the Parliamentary deadlines wherever possible. Consequently, the Home Office is currently in the process of introducing a new PQ system, the electronic Parliamentary Questions System (ePQS) to better monitor and manage the Department's performance.

The ePQS monitoring system has identified the bottlenecks in the PQ process and remedial action is being taken. The benefits of ePQS are now being realised across the Department

Prisons (Racial Incidents)

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many racial incidents were reported by prisoners during *(a)* 2002 and *(b)* 2003; and what assessment he has made of the thoroughness and effectiveness of the subsequent investigations. [155252]

Paul Goggins: For the period 2002–03, 5,089 racist complaints were recorded across all establishments (excluding the results of 14 women's prisons and Wormwood Scrubs where information was not available within the time scale of this question), of which 1,360 (26 per cent.) were substantiated.

The substantiated complaints are broken down as follows:

Staff on Prisoner complaints (277 substantiated)

Prisoner on Prisoner complaints (666 substantiated)

Prisoner on Staff complaints (384 substantiated)

Staff on Staff complaints (33 substantiated).

These figures are based on the recorded incidents logged by all establishments but further individual breakdown is not available.

The responsibility of ensuring that investigations are carried out effectively rests with the Governing Governor of each establishment, or the Head of Group for Headquarters units. As part of their responsibilities the Race Relations Management Teams in each establishment, are involved in monitoring the investigations of racist complaints and their outcomes. The training for those carrying out incident investigations has been adapted to include specific details on how to deal with a race related complaint.

The outcomes of these investigations range from extra training, disciplinary action, adjudication punishments for prisoners and, for five members of staff within this period, dismissal.

It has been recognised in the joint Prison Service/CRE Race Equality Action Plan that further improvements need to be made with regard to the quality and thoroughness of the investigations of racial incidents and complaints.

Consideration is currently been given to how independent/external agencies might provide some assessment of thoroughness in the handling of racial incidents. The formalisation of all racial incidents is also being looked at to ensure all issues are dealt with in establishments. There is also work being carried out to overhaul the current Racial Incident Reporting process.

Racial Harassment

Mr. Wyatt: To ask the Secretary of State for the Home Department what powers preventing racial harassment have been introduced since 1997; and how many times these powers have been used in Sittingbourne and Sheppey. [170457]

Fiona Mactaggart: Prior to 1997 the Race Relations Act (RRA) 1976 already prohibited discrimination on racial grounds. The RRA did not specifically refer to harassment, but it was clear from case law that racial harassment was a type of detriment capable of amounting to the kind of less favourable treatment prohibited by the Act.

As part of its fulfilment of its obligations under the EC Race Directive the UK amended the Race Relations Act 1976 (by virtue of the Race Relations Act 1976 (Amendment) Regulations 2003) so as to make it unlawful to harass a person, on grounds of race or ethnic or national origins, in the areas of activity covered by the 1976 Act.

The Crime and Disorder Act 1998 created new and separate offences where the offences of causing fear and violence or of causing harassment, alarm or distress under the Public Order Act 1986, or the offences of harassment or putting in fear of violence under the Protection from Harassment Act 1997 were racially aggravated.

Figures for the number of prosecutions in Sittingbourne and Sheppey for this type of offence are not centrally available. Kent police figures for harassment offences (published by the Home Office under the requirements of S95 of the Criminal Justice Act 1991) show a total of 339 recorded offences of this type in the Kent police area over the period 1999–2000 to 2001–02.

Road Safety

Tim Loughton: To ask the Secretary of State for the Home Department how many people have been prosecuted in Sussex for use of mobile telephones while driving since the recent changes to the law were introduced; and what revenues have been collected in penalties from such prosecutions. [169861]

Caroline Flint: The specific offence of driving while using a hand held mobile phone came into effect on 1 December 2003. Use of a hands free mobile phone is not an offence.

Data on police action (written warnings, fixed penalty notices and court proceedings) for the new offence of driving while using a hand held mobile telephone will not be available until the autumn of 2004.

Mr. Amess: To ask the Secretary of State for the Home Department what his strategy is for enforcing legislation on the use of mobile phones while driving. [171096]

Caroline Flint: When use of a mobile phone while driving amounts to some other offence, such as failing to exercise proper control, it has always been enforced as that. Such enforcement will continue when appropriate. The specific new offence of using a hand-held mobile phone while driving is designed to provide a simple, objective method of enforcement and prosecution, which does not depend in the same way on judgments of a driver's degree of control of a vehicle or carelessness. The Association of Chief Police Officers have welcomed it as such. How offences are enforced is an operational matter for individual chief officers of police.

Sexual Offences

Sandra Gidley: To ask the Secretary of State for the Home Department what plans the Advisory Council on the Misuse of Drugs has to appoint a working group on drug rape; and if he will make a statement. [171025]

Caroline Flint: The Advisory Council on the Misuse of Drugs (ACMD) keeps under review all drugs and their associated harms and risks. Currently, the ACMD has no plans to establish a specific Working Group on drug rape. However, if the issue requires the ACMD's consideration it can be raised as an agenda item at either the full Council meeting of the ACMD or at the meeting of the ACMD's Technical Committee. Previously, the ACMD have acted on this issue as highlighted through its recommendation that Gammahydroxybutrate (GHB), which is viewed as a 'date rape' drug be made a controlled drug under Misuse of Drugs Act 1971.

Although the ACMD is not specifically dealing with this issue at the moment there is an Interdepartmental Ministerial Group on Sexual Offending. The purpose of the Group (broadly) is to promote and co-ordinate cross-government action on tackling sexual offending, and provide appropriate support for the victims of sexual crime. Furthermore, under s.61 of the Sexual Offences Act 2003 it is an offence to administer a substance with the aim of stupefying/overpowering a person to engage in sexual activity. This is punishable by a prison sentence of up to 10 years.

Terrorism

Mr. Greg Knight: To ask the Secretary of State for the Home Department how much is being spent on the advertising campaign on promoting anti-terrorism launched by the Metropolitan police on 22 March. [165885]

Ms Blears *[holding answer 11 May 2004]:* The costs for the "Life Savers" campaign is estimated at £266,000.

Mr. Dismore: To ask the Secretary of State for the Home Department if he will extend his powers to detain people he reasonably believes to be linked to terrorist groups to *(a)* groups other than al-Qaeda which pose a threat to United Kingdom security, *(b)* United Kingdom nationals who acquired nationality through (i) marriage and (ii) other routes, other than by birth, and *(c)* all United Kingdom nationals. [169797]

Ms Blears: Part 4 of the Anti-Terrorism, Crime and Security Act 2001 was introduced to enable the detention of foreign nationals believed to be associated with terrorism but who cannot be removed from the country. My right hon. Friend, the Home Secretary has no plans at present to extend these immigration powers.

The Part 4 powers, however, lapse in November 2006. The question therefore arises as to what could or should replace them. The Discussion Paper "Counter-Terrorism Powers: Reconciling Security and Liberty in an Open Society", published on 25 February invites those with an interest in these issues to contribute their ideas to this debate by 31 August.

Travellers

Mr. Michael Foster: To ask the Secretary of State for the Home Department what recent discussions he has had with the Association of Chief Police Officers regarding travellers. [170129]

Ms Blears: My right hon. Friend the Home Secretary has regular meetings with the Association of Chief Police Officers and other police organisations.

Issues concerning travellers are covered in these meetings.

Websites

Matthew Taylor: To ask the Secretary of State for the Home Department what the cost in *(a)* financial and *(b)* other terms was in (i) each financial year since 1997 and (ii) 2003–04 until the latest date for which figures are available of (A) developing and (B) maintaining (1) his Department's website and (2) each website for which his Department is responsible; and how many (C) unique hosts and (D) hits there were in each month for each website in (iii) each financial year since 1997 and (iv) 2003–04 until the latest date for which numbers are available. [155855]

Fiona Mactaggart: The information is as follows.

Costs (Home Office) and page impressions

The available information is shown in the table. For 1998 to 2001, it reflects expenditure on the corporate Home Office website only. Figures for 2001 onwards include all known Home Office funded web properties excluding Criminal Justice System (CJS) Online.

	Cost (£)	*Number of page impressions*
1997–98	Not separately identified	Not available
1998–99	Not separately identified	Not available
1999–2000	40,614	9,066,894
2000–01	58,170	16,495,939
2001–02	1,576,214	3,830,772
2002–03	11,643,356	[1]6,099,197
2003–04	[illegible]381.82	[3]32,690,512

[1] These figures include the cost of the site volcomgrants.gov.uk but no statistics of use are available.
Caveats
As they have evolved, the Home Office websites have used the most suitable statistical analysis software available. The figures shown above therefore represent the most accurate information available to us at the time of each reported statistic.
Because members of the website team have not been employed exclusively on this work throughout the period, their costs have been excluded from this table.
Information is not held centrally on websites that are managed independently of the main site.
Unique Hosts
42 including IND (main IND site, working in Britain and UK nationality sites) and Crime Reduction (38 excluding these) at March 2004. Figures not kept for previous years.
[2] To 5 March 2004, (excludes IND and Crime Red).
[3] To January 2004.

The available information shown in the table for 1998 to 2001 reflects expenditure on the corporate Home Office website only. Figures for 2001 onwards include all known Home Office funded web properties excluding CJS Online.

INTERNATIONAL DEVELOPMENT

Advisers/Consultants

Bob Spink: To ask the Secretary of State for International Development how much his Department and its agencies and non-departmental public bodies spent on external consultants and advisers in each of the last three years. [171872]

Mr. Gareth Thomas: I refer the hon. Member to the answer given on 27 April 2004, *Official Report*, column 941W.

Children

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the work of Plan UK in setting up day care centres in the Philippines to serve children of working parents. [171695]

Mr. Gareth Thomas: Through our Civil Society Challenge Fund DFID channels £246,669 of funding to an Early Childhood Care and Development (ECCD) project in the Philippines with Plan UK. This four year project has been running for two years. The project appears to be progressing well albeit a little more slowly than anticipated due to increased demands on partner organisations as a result of new legislation. A mid-term evaluation is scheduled to take place this year.

Mr. Bercow: To ask the Secretary of State for International Development what representations he has received about the activity of girls in Nepal highlighting the problems of school attendance, alcohol consumption and smoking. [171696]

Mr. Gareth Thomas: Girls' education and school attendance in Nepal is a serious challenge. Around 25 per cent. of girls of primary school age are out of school, and only 3.25 per cent. of fully trained teachers are female. With other donors, DFID is planning to help the Government implement their Education for All basic and primary education programme. The main aim of the programme will be get an additional 477,000 children into school by 2009. Particular attention will be paid to recruiting more female teachers, and using block grants and other incentive measures to encourage schools to increase enrolment of girls.

With regards to alcohol consumption and smoking, data on girls in Nepal is very thin and DFID is not actively involved in this area.

Mr. Bercow: To ask the Secretary of State for International Development what study he has made of the role of children in Haiti in highlighting domestic violence. [171700]

Mr. Gareth Thomas: While DFID has itself made no study of the role of children and domestic violence in Haiti, the UK Government welcome the concern expressed for the countries 2.7 million children. Haitian children have seen their standards of health, education and protection, already among the lowest in the world, drop even further following the violent events earlier this year. The prevailing insecurity in Haiti continues to make children especially vulnerable to abuse and violence within the community and family structure.

In recognition of this, the UK has provided £500,000 in support of the United Nations Children's Emergency Fund (UNICEF), as part of a £1.9 million emergency assistance package approved in April. This is in addition to funds channelled through the EC for emergency assistance to the Haitian population.

UNICEF's primary goal in Haiti, as elsewhere, is to protect and strengthen the rights of children. This is done through a series of activities tailored to local requirements, such as: awareness raising campaigns to discourage and prevent violence against children (particularly street children and domestic servants), the resumption of schooling and support to community groups for women and children.

Given the evolving humanitarian situation, the UK has adopted a flexible approach with respect to its funding, enabling UNICEF to allocate UK resources to immediate priorities for children. In addition, the UK has ensured that its emergency strategy has informed and complemented that of the European Community Humanitarian Office (ECHO), for the benefit of Haitian communities.

DFID's Civil Society Challenge Fund has also funded a project (£190,000, over five years) on Victims of Violence in Haiti which aims to support women through the constitution of a medical/psychological unit for victims of domestic violence.

Mr. Bercow: To ask the Secretary of State for International Development what representations he has received about the activity of ex-child combatants in campaigning against the use of child soldiers in Sierra Leone. [171701]

Hilary Benn: I have not received any representations on this specific issue. In the past, DFID has provided core funding to the Office of the (UN) Special Representative of the Secretary-General for Children and Armed Conflict (OSRSG/CAAC), whose programme has included advocacy work using ex-child combatants. This was not, however, specific to Sierra Leone.

Ethiopia

Mr. Jim Cunningham: To ask the Secretary of State for International Development if he will make a statement on the development role that his Department is taking in Ethiopia. [172266]

Hilary Benn: The problems facing Ethiopia are immense. Almost one-half of its 70 million people live below the national poverty line. Hunger, HIV/AIDS and the need to provide basic services pose enormous challenges. On current plans, DFID is increasing expenditure from £19 million during 2003–04 to £85 million in 2005–06. This will include substantial direct budget support—while also targeting assistance to critical areas such as the struggle against food insecurity and HIV/AIDS and the need to improve basic education and health services. While our focus is on the long-term, we also continue to respond to immediate humanitarian needs as they arise.

In addition to providing direct assistance to reduce poverty in Ethiopia, DFID officials are promoting more coordinated and poverty-focused donor activity. We are also involved in wider issues that could threaten development—such as the need for peace and security in the region.

EU Peace Facility for Africa

Mr. Bercow: To ask the Secretary of State for International Development what the involvement of his Department is in the EU's Peace Facility for Africa. [171678]

Hilary Benn: The Department for International Development has supported the European Union's establishment of a Peace Facility for Africa. DFID is engaged in discussions in the Council leading up to the approval of the Facility. DFID's support is in line with the G8-Africa Joint Action Plan and the Prime Minister's commitment to African peacekeeping.

Extractive Industries Transparency Initiative

Mr. Hunter: To ask the Secretary of State for International Development what technical support his Department plans to provide to *(a)* the Angolan Ministry of Finance, *(b)* Sonangol and *(c)* Endiama to help implement the Extractive Industries Transparency Initiative. [172081]

Hilary Benn: The UK Government are active in promoting greater transparency in revenue management in oil, gas and mining through the Extractive Industries Transparency Initiative (EITI).

DFID has provided an expert to participate in the World Bank's Public Expenditure Management and Financial Accountability Review (PEMFAR), which is to make recommendations on how Angola can adopt transparent, internationally accepted practices in oil revenue management. If Angola is committed to increasing the transparency of their oil revenue management, DFID stands ready to provide further help in implementing EITI in collaboration with the World Bank. DFID would expect implementation to include engagement with Civil Society and with all the oil and mining companies operating in Angola—including Sonangol.

Given its size and growing importance we would expect the Government of Angola to initially focus on the oil sector, hopefully followed by the diamonds sector.

Health Targets (Africa)

Mr. Bercow: To ask the Secretary of State for International Development for what reasons his Department is off course to meet its health targets in Africa, as noted on page 180 of the 2004 Departmental Report. [171685]

Hilary Benn: DFID's Public Service Agreement indicators for health in Africa are linked to internationally agreed targets. DFID is one of a range of organisations which have made a commitment to these targets—others include national governments, other bilaterals and multilaterals.

Targets to reduce child mortality and improve maternal health are particularly ambitious and challenging for sub-Saharan Africa (SSA). Many countries are seriously off- track and on current trends neither of the goals will be met by 2015.

Child mortality has multiple and complex causes. Four diseases are responsible for nearly half of all child deaths, and malnutrition is an underlying cause for many of the rest. But other factors, such as economic decline, inequality, inadequate education for girls, lack of access to safe water and sanitation, and in some countries the HIV/AIDS epidemic plays a role too. Several African countries have also experienced conflict and civil unrest, which restrict progress in reducing child mortality rates.

There has been little movement in rates of maternal mortality since 1990 and very recent progress is not easy to assess, due to lack of accurate data. Improving access to skilled care during delivery, and emergency obstetric care, where necessary, are key to reducing maternal mortality. The main constraints are weak and under-resourced health systems, in particular, the lack of appropriately skilled staff. Inadequate financing for health is a key constraint; current levels of spending in low-income African countries are way below what is needed to achieve the health targets. Addressing the broader determinants of poor health, and increasing health spend and the coverage and utilisation of interventions proven to reduce child and maternal mortality are both needed in order to make faster progress.

DFID is stepping up efforts to tackle the child and maternal health targets and is working with partners to make progress on increasing access to effective health services, including comprehensive reproductive health services, particularly for poor people. DFID is working to tackle the shortage of skilled health workers and also contributes to interventions in other sectors: education, transport, and sanitation, which are also needed to bring improvements.

Effective action requires, above all, political will to act. Great gains are likely when commitment to targets is translated into national poverty reduction strategies and budgets.

India

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the value of the work of young filmmakers in India in drawing attention to *(a)* industrial pollution, *(b)* early marriage, *(c)* child labour and *(d)* prostitution. [171702]

Mr. Gareth Thomas: Effective communication is an essential development tool. In India, we have not specifically assessed the role of young filmmakers in drawing attention to environmental and social issues. DFID supports awareness-raising and advocacy on social issues through a variety of media, in line with the objectives in our recently published Country Assistance Plan.

Infant Mortality

Mr. Bercow: To ask the Secretary of State for International Development if he will list the under five mortality rates for each of the 16 African countries covered by the Millennium Development Goal. [171679]

Hilary Benn: DFID's Public Service Agreement (PSA) sets objectives and interim targets to 2006 to help monitor progress in meeting the MDGs. The PSA focuses on key countries and the 16 key Sub-Saharan Africa countries are listed as follows with their associated under five child mortality rates (per 1000 live births) for 2001.

Under 5 Mortality rate (per 1,000 live births)

PSA Key Countries (Sub-Saharan Africa)	
Year 2001	
Congo, Democratic Republic	205
Ethiopia	172
Ghana	100
Kenya	122
Lesotho	132
Malawi	183
Mozambique	197
Nigeria	183
Rwanda	183
Sierra Leone	316
South Africa	71
Sudan	107
Tanzania	165
Uganda	124
Zambia	202
Zimbabwe	123

Mr. Bercow: To ask the Secretary of State for International Development what the change in the under five mortality rate has been since 1997 in countries receiving his Department's health care assistance in *(a)* Asia and *(b)* sub-Saharan Africa. [171686]

Hilary Benn: The following table gives the change in under-five mortality rates between 1995 and 2001 in our main partner countries in Asia and sub-Saharan Africa. These are the countries listed in our Public Service Agreement. Data for 1997 is not available from standard international sources so the nearest available date, 1995, is provided instead.

Although progress has been mixed, many countries have seen improvements in under-five mortality rates. In Bangladesh, Indonesia and Nepal these improvements have been dramatic with reductions of a quarter or more over the six-year period. On average there has been more progress in Asia than Africa.

DFID provides assistance to the health sector through various different mechanisms. These include direct funding to the health sector and health projects, funding to the general government budget, and indirect funding to health related sectors and multi-lateral and Non-Government organisations. This makes it difficult to accurately identify all countries receiving our health care assistance, and our main partner countries are considered the most useful set for this purpose.

	Under-5 mortality rate Per 1,000 live births		
Country	*1995*	*2001*	*Percentage difference*
Asia			
Bangladesh	[1]116	77	-34
Indonesia	66	45	-32
Nepal	120	91	-24
China	46	39	-15
Pakistan	125	109	-13
Vietnam	43	38	-12
India	104	93	-11
Afghanistan	257	257	0
Cambodia	120	138	15
Average	111	99	-11
Sub-Saharan Africa			
Malawi	216	183	-15
Uganda	145	124	-14
Rwanda	210	183	-13
Ghana	112	100	-11
Mozambique	215	197	-8
Sudan	115	107	-7
Ethiopia	183	172	-6
Lesotho	140	132	-6
Nigeria	187	183	-2

Congo, Democratic. Republic.	205	205	0
Zambia	202	202	0
Tanzania	164	165	1
South Africa	65	71	9
Kenya	111	122	10
Zimbabwe	90	123	37
Average	167	162	-3

[1] 1993

Source:
World Development Indicators 2003

International Finance Corporation

Mr. Jenkins: To ask the Secretary of State for International Development what the Department's stake is as a shareholder in the International Finance Corporation. [172507]

Mr. Gareth Thomas: The United Kingdom's capital stock in the International Finance Corporation is valued at US$121,015,000 that is equal to 5.3 per cent. of the total capital stock; this confers a voting power of 121,265 votes equal to 5.04 per cent. of total voting power.

Iraq

Mr. Bercow: To ask the Secretary of State for International Development (1) what the total value of *(a)* exports from and *(b)* imports to Iraq was in the 12 months immediately before the start of the recent conflict; [171205]

(2) what his estimate is of the total value of *(a)* imports to Iraq and *(b)* exports from Iraq in 2003–04. [171209]

Hilary Benn: Iraq oil exports through the Oil For Food programme (OFF) before the 2003 conflict were in the region of $10 billion per year. Imports, again through OFF, were approximately equal to exports less the administration costs of OFF and 5 per cent. of oil revenues which were set aside as reparations resulting from the 1991 Gulf War. Any trade outside OFF would have been illegal and unrecorded.

Iraq's current oil exports are around 1.7 million barrels per day, which at present oil prices are expected to earn around $16 billion over a year. Reliable data on other exports and imports since the opening of Iraq's borders to trade after the 2003 conflict are not available.

Microbicides

Mr. Gerrard: To ask the Secretary of State for International Development what plans he has for further funding to ensure the Microbicide Development Programme Phase III effectiveness trials of candidate microbicides are completed and facilitate future product development. [171260]

Mr. Gareth Thomas: DFID is strongly committed to research and development and is proud to be the first government donor on microbicides. Women friendly technologies including microbicides will be an essential component of an effective HIV response enabling women to take control of their lives.

Even an only partially effective microbicide to prevent sexual transmission of HIV could prevent 2.5 million deaths from AIDS every three years. DFID welcomes the fact that five clinical field trials of different microbicide candidates will be launched in 2004. It will be important to complete these trials in order to identify the most effective product.

DFID is providing a grant of £16 million over five years (2001–2006) for the Microbicide Development Programme (MDP), co-ordinated by the Clinical Trials Unit of the Medical Research Council (MRC), and Imperial College. The programme is investigating the effectiveness of promising microbicide products, involving research centres in five African countries. DFID support accounts for over half of the projected costs.

DFID has been in discussion with other donors concerning support to the current generation of phase III trials, including the MDP. At a meeting on microbicides in Washington last month, strategies were discussed for ensuring the completion of trials, how best to utilise the data collected and how to ensure new candidates were being brought into early clinical studies. DFID's forthcoming strategy on HIV/AIDS will set out how the department will work, including with other donors, to further the development of technologies to combat HIV/AIDS, including microbicides.

Poverty Environment Partnership

Mr. Bercow: To ask the Secretary of State for International Development if he will list the members of the Poverty Environment Partnership. [171688]

Mr. Gareth Thomas: The Poverty Environment Partnership is an organised donor network, with an open membership which includes bilateral and multilateral agencies, research institutes, and development banks with an interest in the issues. At the most recent meeting, which was held in February 2004, the membership was as follows:

Bilateral donor countries/agencies:

Belgium, Canada (CIDA), Denmark (DANIDA), Finland, Germany (GTZ), Ireland, Netherlands (DGIS), Norway, Sweden (SIDA), Switzerland (SDC), USAID, UK (DFID)

Multilateral agencies:

World Bank, Asian Development Bank, African Development Bank, Inter-American Development Bank, International Monetary Fund, European Comission (DG ENV and DG DEV), United Nations Development Programme, United Nations Environment Programme, Food and Agriculture Organisation, World Health Organisation.

Non-governmental Organisations/research organisations:

Netherlands Institute for International Relations, Stockholm Environment Institute, World Resources Institute, World Wide Fund for Nature, IUCN—the World Conservation Union.

Mr. Bercow: To ask the Secretary of State for International Development when the analytical methods referred to on page 179 of the 2004 Departmental Report for the integration of poverty-environment issues into Poverty Reduction Strategy processes will be *(a)* finalised and *(b)* published. [171689]

Mr. Gareth Thomas: Relevant analytical methods for the integration of poverty-environment issues into Poverty Reduction Strategies (PRS) and other development planning processes are being produced by DFID unilaterally and in conjunction with other members of the multi-donor Poverty Environment Partnership. Much of this work is formally published, although some comprises "working documents" which will be refined and tested in the field prior to more formal dissemination.

Examples of formal publications, which comprise analytical methodology and innovative developments within the issue, include "Linking Poverty Reduction and Environmental Management" (published July 2002), DFID Environment Guide (published June 2003), Environmental Fiscal Reform (to be published June 2004), OECD-DAC Guidance on Strategic Environmental Assessment (to be published late 2004).

Examples of work that is on-going but which will not be formally published in the near future include DFID's work on the contribution of environmental resources to economic growth, and the extent to which environmental issues are a good entry point for tackling wider issues of pro-poor governance and democratic change.

However, all work that is not formally published is still publicly available on DFID's website.

Primary School Education

Mr. Bercow: To ask the Secretary of State for International Development what percentage of children is enrolled in primary school in *(a)* Bangladesh, *(b)* China and *(c)* India. [171703]

Mr. Gareth Thomas: The latest available information on primary school net enrolment rates for the countries in question are as follows:

	Percentage
Bangladesh[1]	87
China	93
India	83

[1] In addition, in Bangladesh, it is estimated that approximately 8 per cent. of primary age children are catered for in NGO schools.
Source:
World Development Indicators database.

The net enrolment ratio is the ratio of the number of children of official school age (as defined by the national education system, eg in China children can enter primary education at six or seven, so the data refer to children aged 7 to 11-years-old) who are enrolled in school to the population of the corresponding official school age.

Sexual and Reproductive Health

Mr. Bercow: To ask the Secretary of State for International Development what steps he is taking to increase the number of skilled birth attendants in sub-Saharan Africa. [171675]

Hilary Benn: A woman in Africa is over 100 times more likely to die in pregnancy and childbirth than is a woman in a developed country. Many millions more suffer ill health and long-term disability as a result of complications in pregnancy or childbirth. We now know that almost all deaths as a result of pregnancy and childbirth are avoidable when proven health interventions are available and women are able to use them. Improved coverage of skilled care at delivery and access to emergency obstetric care when necessary are key to reducing maternal mortality. In addition, over a third of maternal deaths could be avoided if effective family planning services and affordable, safe, legal abortion services were available and accessible. At present the health systems in most Africa countries are too weak and under-resourced to deliver these interventions.

The Department for International Development is working with partners to identify and address constraints to progress with skilled attendance, and to support work to strengthen health systems that increase coverage and utilization of health services, including addressing issues such as human resource constraints and access to medicines.

In addition, in an increasing number of countries, DFID's health assistance is provided through sector budget support or indirectly through general budget support. In these cases, DFID is increasingly explicit that sustainable child and maternal health outcomes need greater priority in many national planning and budgeting processes.

Internationally, DFID also provides substantial support for research to improve the evidence base on safe motherhood and newborn health. DFID will continue to challenge and support the international system, in particular the UN, to play an effective role in improving peoples' health in Africa and will continue to promote effective international partnerships that have a role to play, particularly the evolving partnership for Safe Motherhood and Newborn Health.

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the work of the New Generation Club on sexual health in Ecuador. [171697]

Mr. Gareth Thomas: DFID has had no contact with this organisation in Latin America.

Tanzania (Anti-drugs Programme)

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the effectiveness of anti-drugs programmes in Tanzania. [171694]

Hilary Benn: We are not currently funding anti-drugs programmes since these are not a priority for the Government of Tanzania. Therefore we have made no assessment of the effectiveness of anti-drugs programmes in Tanzania. The focus of our assistance to is on supporting the Government to implement their Poverty Reduction Strategy, now in its third year of operation. 75 per cent. of our development funding (£60 million in 2003) is now allocated directly to Government budgets for this purpose.

Timber

Ms Walley: To ask the Secretary of State for International Development whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167614]

Mr. Gareth Thomas: Timber procurement policy on timber is the responsibility of the Department of Food, Rural Affairs and the Environment. Defra has replied to the question about the funding of the Central Point of Expertise on Timber (CPET) indicating that it is in discussion with a number of Departments, including DFID. No decision has yet been taken about the funding of the second phase of CPET.

CONSTITUTIONAL AFFAIRS

Judiciary (Ethnic Minorities)

Keith Vaz: To ask the Parliamentary Secretary, Department for Constitutional Affairs what assessment he has made of the common barriers deterring applications from ethnic minority groups to the judiciary. [171309]

Mr. Leslie: The decision whether or not to seek judicial appointment is a personal one which may be influenced by a number of factors. It is possible that some applicants, irrespective of ethnicity or gender, may be deterred from seeking judicial appointment for a variety of reasons, such as:

(a) a sense that the judicial appointments process is not sufficiently open or accountable;

(b) limited access to sufficient information, at key stages in their profession, to enable them to make an informed decision about a potential career in the judiciary;

(c) concerns that certain aspects of judicial office are incompatible with other commitments, for example that working patterns may not be "family friendly".

The first issue will be addressed through the establishment of the new, independent Judicial Appointments Commission which will inspire a more diverse range of applicants through a more open, transparent and accessible system.

In relation to the provision of information, the Department has for some time run a comprehensive outreach programme of events where officials and judicial office holders explain the appointments process and answer any questions. We also provide information de-mystifying the judicial appointments process either as a booklet; video or on our website. We are, however, looking at what else is needed, and when, to assist individual lawyers in deciding whether or not to pursue a judicial career.

Finally, in terms of judicial working patterns, salaried part-time working has already been introduced for some judicial posts and we are investigating whether this can be extended to more. We are also undertaking a review of our policies to consider what more can be done to encourage a more diverse range of legal professionals to seek judicial appointment.

HOUSE OF COMMONS

Television Service

Michael Fabricant: To ask the Chairman of the Information Committee if he will make Fox News available on the television annunciator service to hon. Members. [170583]

Mr. Key: Fox News cannot be made available at present as there are no spare annunciator channels. The annunciator is used by both Houses and any decision on changing the use of a channel is agreed by the Information Committees in both Houses. The Information Committee in this House has recently agreed that Channel 24 may be used for EuroNews. I understand that the Information Committee in the House of Lords will be considering the matter shortly.

CULTURE, MEDIA AND SPORT

Correspondence

Mr. Steen: To ask the Secretary of State for Culture, Media and Sport when she will reply in full to the letter from the hon. Member for Totnes, dated 25 February 2004, concerning tax rules for the British film industry, which was acknowledged on 1 March 2004. [172042]

Estelle Morris: My right hon. Friend the Secretary of State replied in full to the letter from the hon. Member for Totnes on 6 May 2004.

S4C

Mrs. Helen Clark: To ask the Secretary of State for Culture, Media and Sport when she expects the review of the funding of S4C to report. [171929]

Estelle Morris: We expect to receive the final report on the review of S4C later this month.

SCOTLAND

Sea Bass

Mr. Sanders: To ask the Secretary of State for Scotland if he will make it his policy to source all sea bass used in catering outlets for which his Department is responsible from hand-line fishermen rather than pair trawlers. [167536]

Mrs. McGuire: The Scotland Office has no responsibility for any catering outlets.

Steel

Mr. Foulkes: To ask the Secretary of State for Scotland if he will make a statement on the supply of steel within Scotland for Scottish manufacturing industries. [167187]

Mrs. McGuire: There has been a rise in global steel prices in recent months and I am aware of the reports of difficulties in the steel supply market.

However, the industry view is that although prices have increased, all types of steel remain available and I am advised that there is no shortage of supply from UK steel producers.

Wind Farms

Miss McIntosh: To ask the Secretary of State for Scotland what recent representations he has received on the locating of wind farms in Scotland. [169972]

Mrs. McGuire: No such representations have been received. Decisions on proposed locations for particular wind power developments in Scotland are for local authorities and Scottish Ministers.

TRADE AND INDUSTRY

Regional Development Agencies

Mr. Clifton-Brown: To ask the Secretary of State for Trade and Industry what the budget of each of the regional development agencies for 2004–05 is; how much each has spent in each year since 1999; and how much of this was spent on *(a)* staffing and *(b)* administration in each case. [171509]

Jacqui Smith: For eight of the Regional Development Agencies, their first full year of operation was 1999–2000. The London Development Agency was incorporated in 2000–01. The following table illustrates the Agencies' overall expenditure, and within these totals, expenditure on staffing and general administration between the years 1999 and 2004 provided from the Agencies' annual accounts.

£ million

Regional Development Agency	1999–2000 Total	1999–2000 Admin	1999–2000 Staffing	2001–01 Total	2001–01 Admin	2001–01 Staffing	2001–02 Total	2001–02 Admin	2001–02 Staffing

Notes:

1. RDA Single Programme budgets are allocated on a full resource basis and final outturn figures are subject to external audit by the National Audit Office or, in the case of the LDA by Baker Tilly, after the end of the financial year, before annual accounts are approved. Final expenditure figures for 2003–04 are yet to be confirmed and forecasts have been provided by the Agencies. General administration and staffing costs for earlier years are derived from annual accounts.
2. Overall expenditure for 1999 to 2003 and budget allocation figures for 2004–05—yet to be confirmed—are taken from Departmental records.

Renewable Energy

Mr. Benton: To ask the Secretary of State for Trade and Industry if she will make a statement on the effect of recent trends in investment in renewable energy upon residents of Bootle. [171449]

Mr. Timms: As I far as I am aware recent trends in investment have not led directly to new renewables capacity in Bootle itself. The nearest development is the wind farm at Seaforth Dock, composed of six 600 kW wind turbines, which is a little over two miles away. However, this was constructed in 1999 under the then, 'Non Fossil Fuel Obligation'.

For details of developments in the surrounding Liverpool area I refer my hon. Friend to the answer I gave to my hon. Friend the Member for Crosby (Mrs. Curtis-Thomas) on 25 March 2004, *Official Report*, column 1109W and my right hon. Friend the Member for Birkenhead (Mr. Field) on 28 April 2004, *Official Report*, column 1162SW.

Mr. Djanogly: To ask the Secretary of State for Trade and Industry if she will make a statement on the effect of recent trends in investment in renewable energy upon the residents of Cambridgeshire. [170853]

Mr. Timms: As far as I am aware the following are renewable energy facilities that have been constructed within Cambridgeshire:

A 1MW Landfill gas plant at March Landfill Site, built in 2002.

A 1MW Landfill gas plant at Warboys, built in 2001.

A 37MW Biomass plant at Elean Business Park, Sutton built in 2000.

A 2.3MW Landfill gas plant at Cow Lane, Godmanchester, built in 2000

A 2MW Landfill gas plant at Huntingdon, built in 1999.

A 2MW Landfill gas plant at Dogsthorpe Landfill Site, Peterborough, which was built in 1995.

A 2.1MW Landfill gas plant at Milton, built in 1993.

A 225kW wind turbine at Kings Bush Farm, Huntingdon built in 1990.

There are currently no proposals for new developments that fall under Section 36 of the 1989 electricity act. This requires developers to notify my right hon. Friend the Secretary of State of proposals for new generating capacity of greater than 50MW. However, proposals for developments that total less than 50MW in size are the responsibility of the Local Planning Authority.

Businesses (Sittingbourne and Sheppey)

Mr. Wyatt: To ask the Secretary of State for Trade and Industry how many new businesses have started up in Sittingbourne and Sheppey since 1997. [170291]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 2,700 in Kent County (which contains the constituency of Sittingbourne and Sheppey), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and

Wales in 2003. This represents a 19 per cent. increase on the year before. There were 10,800 business start-ups in Kent County in 2003. Data for counties are not available for before 2003.

DTI figures based solely on VAT registrations for Swale local authority (which contains the constituency of Sittingbourne and Sheppey) are shown below for the period 1997 to 2002. Data for 2003 will be available in Autumn 2004.

VAT Registrations: 1997–2002

	Swale
1997	340
1998	315
1999	335
2000	355
2001	385
2002	330

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Trade and Industry what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by her Department over the last five years is of British manufacture. [170811]

Ms Hewitt: All crockery is of UK manufacture. Any cutlery and glassware purchased has been through UK suppliers and manufactured outside the UK.

As a Government department we ensure that EU procurement rules are followed and these rules do not allow the specification of a particular country of origin except in very specific circumstances (such as for reasons of national security). Responsibility for procuring and maintaining stocks of crockery, cutlery and glassware for the DTI HQ restaurants and hospitality services lies with the catering contractor.

Energy Bills

Jon Trickett: To ask the Secretary of State for Trade and Industry (1) how many consumers she estimates have not received an energy bill from their current *(a)* electricity and *(b)* gas supplier over the last four years; [171485]

(2) what regulations are in force to ensure that consumers receive energy bills that are *(a)* on time, *(b)* in an understandable format and *(c)* accurate; and if she will make a statement. [171486]

Mr. Timms: There is no licence condition to require suppliers to bill customers at a particular time, although suppliers are required to inform customers of energy used, on the basis of a meter reading or an estimate. However, certain standard licence conditions are relevant. Condition 17 requires that meters be read at least once every two years; condition 21 requires that customers be advised of their meter reference number at least annually, if not through a bill; condition 27 requires that they be told, at least annually, if not through a bill, about customer service codes; and condition 40 requires that they be told about Energywatch at least annually, if not through a bill. The regulation of gas and electricity supply, including the performance of suppliers against licence conditions, is the responsibility of the Office of Gas and Electricity Markets (OFGEM). I understand that the Chairman of OFGEM will write to the hon. Member about the matters he has raised.

Energy Supplies

Mr. Best: To ask the Secretary of State for Trade and Industry what action she is taking to promote private sector investment in renewable energy. [170281]

Mr. Timms: The importance of private investment going forward cannot be underestimated in achieving our renewables targets. The Renewables Advisory Board established the Finance and Investment Workgroup last year. I commissioned independent research into investor perspectives of renewables and concluded that investors believed that:

> The 2010–11 target, of 10.4 per cent. of electricity generated from renewables, would only be met if there is greater assurance on Government policy post 2010.
>
> Sustaining investor confidence is possible and within Government's control and principally requires promote action to firm up post-2010 targets.

In response to this I announced on 1 December 2003 an extension of the Renewables Obligation target from 10 per cent. in 2010 to 15 per cent. in 2015.

In addition, as part of the DTI's "It's Only Natural" renewables communication campaign, we held a high level seminar, on 26 April for senior representatives from banks, industry and the investment community to discuss the Government's commitment to renewables and to debate the issues facing investors. The event was well attended with over 120 delegates.

European Directives

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will list the European directives implemented by her Department through national regulations in each year since 1990. [169166]

Jacqui Smith *[holding answer 28 April 2004]:* This information could be compiled only at disproportionate cost.

Globalisation

Mr. Jim Cunningham: To ask the Secretary of State for Trade and Industry what assessment she has made of the impact of globalisation on UK *(a)* manufacturing and *(b)* services. [163567]

Mr. Mike O'Brien: The Department is drawing up a White Paper on trade and investment that will cover the causes of globalisation, its potential benefits for the UK and how best to address any adjustment challenges which may arise. This will be available in the summer.

Manufacturing Industry

Mr. Best: To ask the Secretary of State for Trade and Industry what further action she is planning to take to help small and medium UK manufacturing companies. [170285]

Nigel Griffiths: We will continue to make good progress in taking forward the Government's Manufacturing—the first such strategy for 30 years—which we developed in partnership with industry, trade unions and other stakeholders.

The Manufacturing Advisory Service (MAS), a key part of the Strategy, has been a great success since it was launched in 2002, providing easily accessible and practical advice to small and medium sized manufacturers in England and Wales. MAS helped manufacturing companies to see a seven-fold increase in added value from £5 million to £39 million during 2003.

We will continue to help small and medium sized manufacturing companies utilise innovation, investment, best practice, and higher-level skills to succeed in the increasingly competitive global market through.

Mark of Marks Scheme

Brian Cotter: To ask the Secretary of State for Trade and Industry (1) how the Mark of Marks scheme will improve the quality of service in the domestic sector; [172466]

(2) what the required criteria are for the Mark of Marks trade mark; and what role trade associations play in the scheme; [172467]

(3) when the Mark of Marks scheme for the construction industry was established; what trades are involved in it; and what the level of take-up has been. [172469]

Nigel Griffiths: The Mark of Marks concept was developed under the Quality Mark umbrella in early 2003 to promote alignment of the membership requirements of the more reputable trade bodies and other organisations with Quality Mark. The scheme reflects the growing shift within the construction industry to embrace the quality ethos and promote better service to clients. The aim is to secure larger volumes of trades people by allowing members of industry bodies within Mark of Marks to be badged to consumers.

Mark of Marks envisages flexibility in how standards are delivered and consumers protected. Industry bodies have a key role to play in ensuring delivery of quality to consumers. We have been discussing this concept with industry bodies and organisations in a range of sectors have expressed interest, including the gas, heating and ventilating, plumbing, roofing, general building, damp-proofing, glazing, paving and electrical sectors.

Mayflower Buses

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what action her Department will take arising from the collapse of the bus maker Mayflower; and if she will make a statement. [171355]

Jacqui Smith: Officials are in contact with the administrators and with the Regional Development Agencies and Devolved Administrations in the parts of the country in which Mayflower businesses are based. As soon as the new owners of the businesses are known we will contact them to discuss their plans and to ensure that they are aware of the support which could be available to take the businesses forward.

The Department is aware of the widespread concern arising from the failure of Mayflower Corporation. It does have powers to investigate companies under the Companies Act and we are also consulting with other regulators.

New Businesses (Oldham, West and Royton)

Mr. Meacher: To ask the Secretary of State for Trade and Industry how many new businesses have started up in Oldham West and Royton since 1997. [170934]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 400 in Oldham Local Authority (which contains the constituency of Oldham West and Royton), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 increase on the year before. There were 1,900 business start-ups in Oldham Local Authority in 2003. Data for local authorities are not available for before 2003.

DTI figures based solely on VAT registrations for Oldham Local Authority (which contains the constituency of Oldham West and Royton) are shown in the table for the period 1997 to 2002. Data for 2003 will be available in Autumn 2004.

VAT Registrations: 1997–2002

	Oldham
1997	480
1998	470
1999	465
2000	480
2001	440
2002	510

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

North Sea Oil

Bob Spink: To ask the Secretary of State for Trade and Industry what her latest estimate is of North Sea oil reserves; and if she will make a statement. [169794]

Mr. Timms: I refer the hon. Member to the answer given on 19 April 2004, *Official Report*, column 317W.

NPL, Teddington

Dr. Cable: To ask the Secretary of State for Trade and Industry what the original estimated *(a)* cost and *(b)* completion date for the PFI project for the National Physical Laboratory in Teddington was; and what the current estimated (i) cost and (ii) completion date is. [169815]

Ms Hewitt *[holding answer 30 April 2004]*: The original estimated cost for the construction of new facilities at the National Physical Laboratory, Teddington under the 1998 contract with the PFI contractor and its Design and Building Contractor was £82,012,200. The Availability Fee paid by my Department is based on this sum. We do not know the current estimated cost of construction. Since this is a PFI contract, the risk on cost overruns rests with the PFI and Design and Building contractors.

The original completion date for the PFI project was 24 September 2001, and the PFI contractor currently estimates that the final completion date will be June 2006. Fifteen of the 16 modules in the new facilities have been handed over, but additional work is still needed by the PFI Contractor to bring modules into line with the Output Specifications; and, as a result of the delay, changes are needed to some of the new facilities to enable them to meet the current needs of NPL's scientific programmes. The contractor's estimated final completion date of June 2006 provides for the demolition of existing buildings at NPL, the construction of car parking space, and landscaping.

Nuclear Materials

Mr. Simon Thomas: To ask the Secretary of State for Trade and Industry pursuant to her answer of 14 January 2004, *Official Report*, column 788W, on nuclear energy, what the Department's acceptable weight limits are concerning nuclear material unaccounted for; when these limits were adopted; and when they are due to be reviewed. [172094]

Nigel Griffiths: Nuclear material unaccounted for (MUF) is a recognised feature of accounting for nuclear material and is caused primarily by the uncertainties inherent in the techniques used to measure nuclear material. The International Atomic Energy Agency (IAEA) describes standards for the measurement uncertainty expected for closing a nuclear material balance in its Safeguards Glossary, and it publishes International Target Values (ITV) for uncertainties on measurements performed on nuclear material. These are used to determine whether a facility's measurement system meets international standards and are periodically updated by international experts to reflect currently achievable measurement capabilities and to incorporate newly developed measurement techniques and instruments. The values currently used were set in 2000 and were published by the IAEA in April 2001 as a Safeguards Technical Report (STR-327). This report is available from the IAEA in hardcopy only. However, most sections of the report can also be found at www.inmm.org/topics/contents/JNMMPaperITV.pdf. The values will be reviewed when international experts conclude a change is needed.

All civil nuclear material in the UK is subject to Euratom safeguards and to the terms of the UK/Euratom/IAEA safeguards agreement. The European Commission's report on the operation of Euratom Safeguards in 2002, the most recent published, concluded that no evidence for the diversion of nuclear materials was found by the systematic evaluation of MUF reported by nuclear installations.

Mr. Simon Thomas: To ask the Secretary of State for Trade and Industry if she will list nuclear materials unaccounted for at sites operated by *(a)* BNFL, *(b)* the UK Atomic Energy Authority and *(c)* URENCO since 1997; and if she will make a statement on Government oversight of private civilian nuclear facilities. [172093]

Nigel Griffiths: Material unaccounted for (MUF) figures are published annually by the nuclear industry. Copies of the figures published since 1997 were placed in the Libraries of the House on 21 January 2004, *Official Report*, columns 1233–34W in response to a written question.

All civil nuclear material in the UK, irrespective of ownership, is subject to Euratom safeguards and to the terms of the UK/Euratom/IAEA safeguards agreement. The Safeguards Office of DTI is responsible for overseeing these international obligations.

Post Office

Mr. Hancock: To ask the Secretary of State for Trade and Industry (1)what research she has *(a)* commissioned and *(b)* evaluated on the change in numbers of jobs, and the areas involved, which are likely to result from the proposal by Royal Mail to change its pricing structure from weight based charging to size based charging in (i) the photo finishing industry and (ii) other industries; [172516]

(2) what recent discussions she has had with *(a)* Royal Mail, *(b)* the Post Regulator, *(c)* representatives of the photo finishing industry and *(d)* other business representatives on Royal Mail's proposals to change its pricing structure from weight based charging to size based charging. [172517]

Mr. Timms: The proposal by Royal Mail to introduce size-based pricing is a matter for the postal services regulator, Postcomm. Royal Mail's proposal is currently the subject of a full public consultation which runs until 27 July 2004. The consultation can be accessed on the Postcomm website www.postcomm.gov.uk

As well as seeking views of other interested parties, a significant part of the consultation is to gather information from customers likely to be affected by size-based pricing. Following this consultation, Postcomm will produce a Regulatory Impact Assessment taking account of the comments received from customers, including the photo finishing industry.

Regional Development Agency Funding (Lancashire)

Geraldine Smith: To ask the Secretary of State for

Trade and Industry if she will make a statement on Regional Development Agency funding for Carnforth under the Market Towns Initiative. [170232]

Jacqui Smith *[holding answer 10 May 2004]:* I have been advised by the Northwest Development Agency that it has issued guidance to Market Town Partnerships in the North West, including Carnforth, indicating that it is prepared to directly invest up to £1 million in each town.

Geraldine Smith: To ask the Secretary of State for Trade and Industry how much funding the Regional Development Agency has spent or allocated to projects in Lancashire since the agency was created; and if she will list the *(a)* funding and *(b)* projects by constituency in order of amount of funding. [170233]

Jacqui Smith *[holding answer 10 May 2004]:* I have been advised by the Northwest Development Agency that since its creation, NWDA has not collated data by sub-region or parliamentary constituency. Spend has been monitored by programme and/or activity, and many of the Agency's projects and schemes span several constituencies and local authority areas.

As of April 2004, the Agency now has a three year investment strategy which will monitor budgeted expenditure by sub region.

The NWDA has provided funding of over £500,000 to support the following projects in Lancashire:

Preston Post Office

Lancashire West Business Productivity

Lancashire Tourism Partnership (SRB Round 3)

Bacup and Stacksteads (SRB Round 6)

Blackpool Challenge Partnership (SRB Round 6)

Lancashire Small Sites Programme 2002

Michelin Site, Burnley

Pendle Economic Regeneration Programme (PERP)

Fleetwood Marsh Nature Park

Burnley Technology Centre

Pavillions, Blackburn

Cardwell Mill

Rossendale Brownfield Land Project

White Moss Business Park Phase 2

Blackpool Regeneration: Talbot Road South

Acquisition

Green Business Parks (Lancs)

Futures Park Managed Offices Bacup

White Moss Business Park Investment Centre

Skelmersdale Acquisitions

Landgate and Moss Quarries

Former Co Op Burnley

ASP—N and W Lancs Core and Lancs ASP Activities

Lancashire Rural Recovery Plan

Lancashire LSC—Festival of Skills

East Lancs Partnership (SRB Round 5)

Clitheroe Market Town Initiative

F D Sims Ltd

Blackpool: Central Gateway Phase 1

Erlson Engineering Ltd

West Lancashire Investing in Business Programme

Geraldine Smith: To ask the Secretary of State for Trade and Industry what the current position is regarding Regional Development Agency funding for the Midland Hotel and Central Regeneration Project in Morecambe; and when she expects the project will begin. [170234]

Jacqui Smith *[holding answer 10 May 2004]:* I have been advised by the Northwest Development Agency that the Midland Hotel re-development project has been identified in the Agency's three year investment plan for 2004–07. Discussions are about to begin with the owner and developer, Urban Splash, about Agency funding support during that period. The Agency understand that Urban Splash intend to start work in the summer of this year.

Renewable Energy (South Ribble)

Mr. Borrow: To ask the Secretary of State for Trade and Industry if she will make a statement on the effect of recent trends in investment in renewable energy upon residents of South Ribble. [171285]

Mr. Timms *[holding answer 6 May 2004]:* As far as I am aware recent trends in investment have not led to new renewable energy developments in South Ribble.

Small Businesses

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what research her Department has conducted into the effects of late payments on small businesses; and if she will make a statement. [168984]

Nigel Griffiths: Specific research into the effects of late payment has not been carried out because this government has always recognised that late payment of debts can have serious effects on the cash flow of smaller companies, which is why we had a manifesto commitment to introduce a Late Payment Act to allow small businesses to:

claim interest on late payment from other business or public sector bodies, allow creditors to claim a fixed sum of compensation to cover debt recovery costs should late payment happen. Compensation entitlements are: £40 for a debt of up to £999.99, £70 for a debt of between £1,000 and £9,999.99 and £100 for amounts over £10,000.

This package of measures has had a positive effect on payment times. The Grant Thornton European Business Survey showed that the average time taken in the UK to settle accounts in 1997 was 49 days. By 2002 this had fallen to 41 days. By comparison, the average settlement time in our European neighbours was 50 days.

A recent survey by the REL Consultancy Group looked at average days payable outstanding (DPO) and concluded that UK companies' payment performance stands at a commendable 33.6 days against 42.4 days for Europe as a whole, whilrcountries such as Italy (67.9) and France (63.4) perform considerably less well.

TRANSPORT

Airports

John Thurso: To ask the Secretary of State for Transport whether he requires representatives of environmental organisations to be included on airport consultative committees. [172129]

Mr. McNulty: The Government does not specify the composition of airport consultative committees. However, an airport designated under s.35 of the Civil Aviation Act 1982 must provide adequate facilities for consultation to those in the categories there specified, which include organisations "representing the interests of persons concerned with the locality in which the aerodrome is situated".

John Thurso: To ask the Secretary of State for Transport what guidance his Department has issued on the composition of airport consultative committees. [172130]

Mr. McNulty: The Department issued revised guidance on airport consultative committees, including matters relating to their composition, in December 2003. The guidance may be viewed on, and downloaded from, the Department's website.

John Thurso: To ask the Secretary of State for Transport which airports in England have airport consultative committees; and if he will list the members of each. [172131]

Mr. McNulty: The Department does not maintain a central register of consultative committees and the membership of each is a matter for the committee itself. 51 aerodromes are designated under s.35 of the Civil Aviation Act 1982, of which 43 are in England. I understand that all these have consultative committees, as may some aerodromes which are not so designated.

Coastguard

Mr. Carmichael: To ask the Secretary of State for Transport whether his Department has *(a)* produced and *(b)* received a list of coastguard rescue centres that may be closed. [172385]

Mr. Jamieson: There is no list of coastguard rescue centres that may be closed.

Driving Standards Agency

Mr. Damian Green: To ask the Secretary of State for Transport how much the Driving Standards Agency has spent on consultancy fees in each financial year since 1997. [171963]

Mr. Jamieson: In each financial year since 1997, the Driving Standards Agency has spent the following on consultancy fees:

	£
1997–98	586,000
1998–99	749,000
1999–2000	1,105,000
2000–01	751,000
2001–02	1,201,000
2002–03	1,128,000
2003–04	[1]1,338,000

[1] Currently subject to audit.

Mr. Damian Green: To ask the Secretary of State for Transport how many staff were employed by the Driving Standards Agency to handle test booking enquiries, broken down by the number of staff dealing with *(a)* telephone inquiries and *(b)* internet inquiries in the last year. [171964]

Mr. Jamieson: The Driving Standards Agency employs 166 permanent staff in two call centres to deal with practical test bookings and telephone inquiries. Some 100 employment agency staff are also currently employed to ensure that sufficient resource is available to meet the demand. One member of staff has dealt with internet inquiries since the introduction of the practical test internet booking facility in October 2003.

Mr. Damian Green: To ask the Secretary of State for Transport how much money the Driving Standards Agency received from Transport for London under its contract to test Hackney Carriage black cabs within London. [171969]

Mr. Jamieson: The Driving Standards Agency does not receive money from Transport for London under the contract for testing applicants for a hackney carriage licence. Instead, applicants pay the Agency directly for tests that they take. In 2003–04, the Agency conducted 847 tests at a cost of £55.30 a test, resulting in total revenue of £46,839.

International Security Ship Plan

Mr. Carmichael: To ask the Secretary of State for Transport if he will bring forward regulations in relation to enforcement of the International Security Ship Plan. [172386]

Mr. Jamieson: Enforcement of the new ship and port facility security regime agreed by the International Maritime Organization (IMO) in December 2002, including Ship Security Plans and International Ship Security Certificates, will be under the Ship and Port Facility (Security) Regulations 2004. These Regulations are currently being drafted and are expected to be laid before Parliament in early June, to come into force on 1 July at the same time as the IMO regime.

Light Rail

Mr. Damian Green: To ask the Secretary of State for Transport how many pedestrians have been involved in collisions with light rail vehicles in each year since 1997; and how many *(a)* deaths and *(b)* injuries resulted from such collisions. [171954]

Mr. Jamieson: The numbers of pedestrians killed or injured in collisions with Tram/light rail vehicles for each year since 1999, the first year for which figures are available, are shown in the following table.

	Killed	*Injured*
1999	0	14
2000	0	4
2001	0	8
2002	2	15
Total	2	41

Oldham West and Royton

Mr. Meacher: To ask the Secretary of State for Transport what the percentage change in *(a)* deaths and *(b)* serious injuries on the roads of Oldham West and Royton has been since 1997. [170959]

Dr. Howells: The available information relates to local authority areas. In the Oldham local authority area there were 13 deaths in road accidents in 1997 and four deaths in 2002, the latest year for which information is available. The number of serious injuries fell by 33 per cent. from 85 in 1997 to 57 in 2002. Estimates on the basis of parliamentary constituencies will become available in the summer when I shall write to my right hon. Friend with figures for Oldham West and Royton and place a copy of my letter in the Libraries of the House.

Road Traffic Accidents

David Davis: To ask the Secretary of State for Transport how many people *(a)* were seriously injured and *(b)* died in road traffic accidents in the East Riding of Yorkshire in each year since 1997. [171773]

Dr. Howells: The numbers of people killed or seriously injured in road traffic accidents in the East Riding of Yorkshire for each year since 1997, are shown in the following table.

	Killed	*Seriously injured*
1997	23	241
1998	33	270
1999	42	258
2000	21	260
2001	24	266
2002	36	286
Total	179	1,581

Shell Haven

Bob Spink: To ask the Secretary of State for Transport when he expects to report the result of the public inquiry into the Shell Haven Port inquiry. [172559]

Mr. Jamieson: The report of the public inquiry into the proposed London Gateway port at Shell Haven is under careful consideration. The report will be made public as soon as Ministers are able to announce their decision.

Shipping (Straits of Malacca)

Patrick Mercer: To ask the Secretary of State for Transport whether ships are searched as a matter of course if they have passed through the Straits of Malacca en route to the UK. [170062]

Mr. Jamieson: The decision to invoke control measures, including ship searching is largely intelligence led.

Statutory Off-road Notifications

Mr. Simon Thomas: To ask the Secretary of State for Transport what procedures are followed by the Driver and Vehicle Licensing Agency for issuing a reminder notice in the case of Statutory off-road Notifications. [172102]

Mr. Jamieson: Statutory Off Road Notification (SORN) declarations are valid for 12 months. Approximately two weeks before expiry DVLA issues a notice to remind the motorist either to renew SORN or to tax the vehicle.

Transport Direct

John Thurso: To ask the Secretary of State for Transport if he will list the consultants used to conduct work for the Department related to Transport Direct, broken down by *(a)* value of work and *(b)* nature of the work. [170868]

Dr. Howells: The following table provides this information.

£000

Nature of Work	*Value of Work*

Mr. Damian Green: To ask the Secretary of State for Transport when he expects the Transport Direct information service to go online. [171945]

Dr. Howells: The Transport Direct service will become available to the public in July 2004. The service itself came online—under password protection—in December 2003, since when extensive data testing has been undertaken.

Trunk Roads

Mr. Flook: To ask the Secretary of State for Transport which trunk road schemes have been placed by the Department of Transport before regional assemblies for consultation. [171991]

Mr. Jamieson: Regional Assemblies, or their predecessor organisations, have been consulted for their views on all trunk Road schemes considered as candidates for entry to the Targeted Programme of

improvements, either as part of a wider public consultation process, through direct consultation between the Highways Agency and the relevant assembly or through their involvement in the multi-modal and road based studies which were set up following the 1998 Roads Review to examine proposals for major improvements to the motorway and trunk road network.

Walking

Mr. Damian Green: To ask the Secretary of State for Transport when he expects his Department's partnership website on walking to go live. [172051]

Dr. Howells: A website for walking professionals, developed and run by a partnership of national walking organisations, went live on 31 March this year. It can be found at www.walk2l.com. My Department provided some financial support for the project.

NORTHERN IRELAND

Air Quality

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the air quality was in each of the last five years in towns and cities in Northern Ireland for which records are kept. [172064]

Angela Smith: The Environment and Heritage Service (EHS) of the Department of the Environment publishes an annual air quality monitoring report for Northern Ireland in partnership with the Chief Environmental Health Officers Group. The most recent report—for 2002—provides details of all air quality monitoring and results taken from district council and departmental monitoring sites. This report also draws together all the historical air quality monitoring data for Northern Ireland and includes trend analysis and discussion in relation to EU limit values and National Air Quality Objectives, where data permit.

The report can also be accessed on the EHS website. http://www.ehsni.gov.uk/environment/air/air.shtml

Copies of the report have been placed in the Library.

Body Piercing

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on the regulation of body piercing and tattooing establishments in Northern Ireland. [172029]

Angela Smith: Powers for the regulation by district councils of tattooing and ear-piercing establishments in Northern Ireland are provided by Part V of the Local Government (Miscellaneous Provisions) (Northern Ireland) Order 1985.

Under this legislation, district councils may resolve to control tattooing and ear-piercing practices in their districts by requiring practitioners to register themselves and their premises with the district council. They may also make bye-laws concerning the cleanliness of registered premises and practitioners, and for the cleansing and sterilisation of instruments, materials and equipment with their district council.

The Government intend to publish draft legislation for consultation later this year which would bring forward legislative proposals to extend these arrangements to body-piercing practices.

Castlereagh College

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what steps were taken to ensure Castlereagh College's involvement in assisting employees of TK-ECC following closure of the factory at Dundonald; and if he will make a statement. [171029]

Mr. Gardiner: Following two meetings with TK-ECC Senior Management, officials from the Department for Employment and Learning co-ordinated an inter-Departmental Outreach Service at the company's premises, from 8 to 12 March. During the meetings it was indicated to the company that Castlereagh College was keen to provide additional support to the workforce; subsequently, formal contact was established between the company and the college.

The company quickly established the Outplacement Centre, involving the Department for Employment and Learning, Invest Northern Ireland, Social Security Agency and the Inland Revenue in providing advice and guidance on their services, including referrals to jobs and training opportunities, benefit claims and entitlement, advice on business start-up and entitlement to tax credits. While it was the company's intention to engage with other interested organisations, including Castlereagh College, unfortunately, this did not transpire as the premises were vacated on 12 March, prohibiting intervention by these organisations.

The Department for Employment and Learning's District Manager for South and East Belfast met, subsequently, with the Principal and Chief Executive of Castlereagh College to clarify the situation pertaining to the closure of TK-ECC and to establish agreed practices in the event of future redundancies occurring within South and East Belfast.

Child Obesity

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment he has made of the levels of obesity among children of school age; what steps he is taking to encourage exercise and healthy eating among school children; and if he will make a statement. [171985]

Angela Smith: Independent research carried out in 1996 reported that 16 per cent. of 13 and 14-year-olds were overweight. This figure included 3.5 per cent. of boys and 2 per cent. of girls, classified as obese. Additional research on levels of overweight and obesity in children in Northern Ireland is likely to become available in the near future.

A task force is being established under the auspices of the Ministerial Group on Public Health to consider and

evaluate options for tackling obesity in children and young people in Northern Ireland. The task force is expected to make recommendations on how levels of obesity in children should be assessed in future.

Some £500,000 has been made available in 2004–05 for the promotion of physical activity and a new physical activity strategy and action plan will be issued for public consultation before the summer. The Department is also encouraging a healthy diet among school children through programmes such as the pilot, Fresh Fruit in Schools initiative. In addition, the Department of Education has recently launched a 12-month pilot scheme to improve the nutritional standard of school meals.

Community Pharmacies

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland if he will make a statement on the progress of the Community Pharmacy Medicines Management Initiative. [171794]

Angela Smith: Training has been provided to enable 40 per cent. of pharmacies to deliver the service and this will be progressively extended. My Department will continue to work with key stakeholders to extend and consolidate the existing scheme to build further collaboration across the primary care team and the secondary care sector. In addition, the Department is working to develop a referral scheme to formalise patient referral from care providers to the community pharmacist for medicines management advice and guidance services.

The roll-out of the service has been managed at Board level through provision of training and on-going encouragement. Linked to this, Boards are planning to put in place a number of facilitators to support practitioners to take on this new role. A regional facilitator will be appointed to establish a cohesive network with Board personnel to support further uptake of the scheme.

Emergency Admissions (Ulster Hospital)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what conclusions have been drawn from the Improving the Flow of Emergency Admissions project conducted at the Ulster Hospital; and if he will make a statement. [171755]

Angela Smith: The Eastern Health and Social Services Board initiated the Improving the Flow of Emergency Admissions project at the Ulster Hospital in January 2003. The project involves a systematic analysis of patient flows into and through the hospital, in order to identify critical bottlenecks in the system. It is a long-term project and work at the hospital is still on-going. Analysis of systems and processes has identified new ways of working and highlighted shortfalls in resources, which the Trust and the Eastern Board are working to address.

The results of this project to date, along with the outcomes of similar projects elsewhere in Northern Ireland and in Great Britain, are being considered by the Department and will be the subject of discussions to be held at a regional workshop later this month. This workshop will aim to identify key principles learned from the project at the Ulster Hospital and elsewhere that can be applied more widely. These will be incorporated into a regional initiative to improve the flow of emergency admissions.

Football

Lady Hermon: To ask the Secretary of State for Northern Ireland what Government assistance has been provided for the Irish Football Association's *(a)* Give Bigotry the Red Card and *(b)* Football for All campaigns. [170243]

Angela Smith: Funding totalling £165,500 has been provided by the Northern Ireland Community Relations Council for the Football for All project which includes Give Bigotry the Red Card. This consists mainly of an award of £159,500 made under the EU Peace II Programme, which covers the period from 1 July 2002 to 30 June 2005.

Lupus

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what steps he is taking to assist sufferers of lupus; and if he will make a statement. [171753]

Angela Smith: Rheumatologists throughout Northern Ireland manage patients with lupus, with input from other specialists as required. The management of any individual patient with lupus depends on the type of lupus, the nature of their disease and its severity. Specific services for lupus patients include a lupus clinic run by rheumatologists in Belfast, and management in a day ward for patients who require it. Lupus is also an area where there is significant research activity and clinicians working in this area have recently received funding from the Wellcome Foundation.

Motor Cycling

Lady Hermon: To ask the Secretary of State for Northern Ireland whether motorcycle road racing clubs in Northern Ireland can avail themselves of the Safe Sports Grounds fund for essential work at road racing circuits. [170250]

Angela Smith: Motorcycle road racing clubs cannot avail themselves of funding from the Sports Council Safe Sports Grounds fund for essential work at road racing circuits as the Safe Sports Grounds Interim Scheme ended in March 2003. However, approximately £175,000 has been provided, via the Sports Council for Northern Ireland, over the past three years for essential safety work at road racing circuits. Moreover, motor sports clubs may be able to avail of funding for essential works from monies provided by the Sports Council to the two and four Wheel Motor Sport Steering Group Ltd., the umbrella group of motor sports governing bodies, for the development of motor sport as a whole in Northern Ireland.

Northern Ireland Human Rights Commission

Mr. Dodds: To ask the Secretary of State for Northern Ireland who has *(a)* been appointed, *(b)* been dismissed, *(c)* resigned and *(d)* withdrawn from the Northern Ireland Human Rights Commission since its formation; and how much remuneration has been received in each case. [168169]

Mr. Spellar: The information is as follows:

(a) Appointed (and remuneration) to April 2004

Name of commissioner	*Date appointed*	*Current remuneration per annum*	*Remuneration on starting per annum*	*Total remuneration* £
Professor Brice Dickson	1 March 1999	66,854	55,000	302,937
Professor Christine Bell	1 March 1999	[1]—	8,000	28,832
Margaret-Ann Dinsmore QC	1 March 1999	10,000	8,000	44,666
Tom Donnelly	1 March 1999	10,000	8,000	44,666
Reverend Harold Good QBE	1 March 1999	[2]—	8,000	42,999
Professor Tom Hadden	1 March 1999	10,000	8,000	44,666
Angela Hegarty	1 March 1999	[1]—	8,000	14,666
Patricia Kelly	1 March 1999	10,000	8,000	44,666
Doctor Inez McCormack	1 March 1999	[1]—	8,000	28,832
Frank McGuinness	1 March 1999	[2]—	8,000	42,999
Lady Christine Eames	1 December 2001	10,000	8,000	22,000
Doctor Christopher McGimpsey	1 December 2001	[1]—	8,000	18,666
Kevin McLaughlin	1 December 2001	10,000	8,000	22,000
Patrick Yu	1 December 2001	[1]—	8,000	15,333

[1] Resigned.
[2] Term ended 29 February 2004.

(b) Dismissed—not applicable.

(c) Resigned

Name of Commissioner	*Date resigned*
Angela Hegarty	1 December 2000
Professor Christine Bell	9 September 2002
Doctor Inez McCormack	9 September 2002
Patrick Yu	7 July 2003
Doctor Christopher McGimpsey	3 November 2003

(d) Withdrawn

Name of Commissioner	*Remuneration per annum (£)*
Paddy Kelly	10,000
Frank McGuinness	[1]—

[1] Term ended 28 April 2004.

Note:
The Commissioner's salaries were raised from £8,000 to £10,000 from 1 April 2002.

Brice Dickson's increments are as follows:

	Amount (£)
1999[1]	55,000
2000[2]	57,475
2001[2]	60,004
2002[2]	63,604
2003[2]	66,854

[1] Starting salary.
[2] From April.

Police Service

Mr. Swayne: To ask the Secretary of State for Northern Ireland what support his Department is providing to members of the full time police reserve of the Police Service of Northern Ireland to assist them in seeking other employment. [170563]

Mr. Pearson: Members of the full time reserve who leave the Police Service of Northern Ireland under the voluntary severance scheme have access to a range of career and outplacement services. The facilities provided by the Police Retraining and Rehabilitation Trust are also available to all full time reserve officers.

Public Health

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what estimate he has made of the cost to the health service in Northern Ireland of *(a)* tobacco smoking, *(b)* alcohol misuse and *(c)* other drug use in the last year for which figures are available. [171784]

Angela Smith: The information requested is as follows:

(a) In her 2000 Annual Report, the Chief Medical Officer estimated that the annual in-patient care costs to the HPSS of smoking related diseases were in excess of £22 million. Additional treatment costs associated with out-patient and primary care cannot readily be identified.

(b) In the Report, "Reducing Alcohol Related Harm in Northern Ireland", it was estimated that, in 1997–98, the last year for which costs are available, the social costs to the HPSS amounted to £26.8 million pounds per year. This included the costs of occupied psychiatric and acute beds, general practice costs and responses to alcohol related harm.

(c) In relation to other drug use, the information is not available in this format.

Road Accidents (Compensation)

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how much public money has been spent on meeting compensation claims in relation to pedestrians who have had accidents on footpaths and roads in the ownership of the Department for Regional Development in each of the last five years. [172063]

Mr. Spellar: The IT records of the Department for Regional Development do not distinguish pedestrians from other claimants e.g. car passengers. It is believed, however, that the vast majority of claimants claiming against the Department for personal injury are pedestrians and relate to accidents on footpaths or roadways. The following table sets out the total

compensation expenditure paid by the Department for Regional Development in relation to personal injury claims in each of the last five years.

	£
2003–04	4,882,718
2002–03	4,744,835
2001–02	3,069,728
2000–01	2,244,137
1999–2000	3,104,204

Small Businesses

Mr. Beggs: To ask the Secretary of State for Northern Ireland if he will take steps to assist small businesses meet insurance costs. [171714]

Mr. Gardiner: The hon. Gentleman is aware that insurance is a "reserved" matter. HM Government are conscious that many businesses have been hit hard by significant price increases in the liability insurance market. They are committed to playing their part in helping business in this area.

The Government's agenda for action at national and local levels is being directed towards improving the functioning of the insurance market, including promoting better risk management and health and safety practices in order to reduce premium costs.

The Department of Enterprise Trade and Investment is working closely with the Federation of Small Businesses and the Insurance sector on the production of guidance for local businesses.

Mr. Beggs: To ask the Secretary of State for Northern Ireland if he will take steps to reduce regulation on small businesses in Northern Ireland. [171715]

Mr. Gardiner: Government are aware of the potential problems faced by small businesses in complying with regulations.

In December 2001, the Northern Ireland Executive approved the introduction of the Northern Ireland Better Regulation Strategy which actively seeks to reduce the regulatory burden on businesses, including revised arrangements for Regulatory Impact Assessments and the introduction of a Micro Business Test to assess the impact of any proposed legislation on businesses with less than five employees. It also requires Northern Ireland Departments to give businesses at least 12 weeks advance notice of any legislation and to provide appropriate guidance on implementation.

I acknowledge fully the vital role of small businesses in the local economy and the Department of Enterprise, Trade and Investment is striving to ensure that they benefit from the application of the Better Regulation Strategy.

Toxic Materials (Illegal Dumping)

Mr. McGrady: To ask the Secretary of State for Northern Ireland what action he intends to take in relation to the illegal dumping of toxic material at the green area, Annadale Embankment, Belfast. [171236]

Angela Smith: Powers to deal with illegal dumping are enforced by a number of regulatory bodies including district councils, roads service and the Environment and Heritage Service (EHS) of the Department of the Environment. The owners of land where waste has been unlawfully deposited also have responsibilities in the matter. I understand that quantities of waste material have been deposited at Annadale Embankment for the purposes of the 11 July bonfire celebration. Statutory bodies have encountered particular difficulties when endeavouring to deal with waste deposited for bonfire events. To address this, an Interagency Working Group on Bonfires was established by EHS in November 2003. The Report of the Working Group, with guidelines for communities in preparing and organising bonfire events, will be published and sent to all elected representatives in Northern Ireland, and to regulatory bodies involved in the control of bonfires, in the week commencing 17 May 2004.

Legal action will continue to be taken by EHS, when evidence is available, relating to the disposal of commercial waste to bonfire sites by either waste producers or transporters.

Translink

Mr. Beggs: To ask the Secretary of State for Northern Ireland what the status of Translink is; and what the membership is. [171719]

Mr. Spellar: Translink is a brand name, introduced in 1996, of the integrated services of Citybus, Ulsterbus and Northern Ireland Railways. It is a subsidiary of the Northern Ireland Transport Holding Company, which is a public corporation established under the Transport Act (NI) 1967 to oversee the provision of public transport in Northern Ireland.

Transport Review Team

Mr. Beggs: To ask the Secretary of State for Northern Ireland who the members of the Transport Review Team are; and when its report is due to be published. [171720]

Mr. Spellar: I assume that the hon. Gentleman is referring to the Railway Review Group which was set up to gather information on the future needs and requirements of railways in Northern Ireland and is comprised of Officials from the Department for Regional Development, the Department of Finance and Personnel and Senior Translink Officials. The group has reported preliminary findings to me and it is my intention to issue a consultation document relating to the future investment needs in the coming weeks in order to inform the forthcoming spending review process.

Victim Support

Mr. Beggs: To ask the Secretary of State for Northern Ireland how much funding has been allocated to victim support groups in Northern Ireland since 2001–02; which groups are involved; how much each group received; on what basis the funding was given; and how funding is monitored. [159693]

Angela Smith: I have placed a table in the Library which lists the funding allocated and paid up to 31 March 2004 to groups and organisations involved in providing support for victims of the Northern Ireland

conflict. The table lists the groups and organisations that benefited, the amounts allocated and paid, the basis on which the funding was given and indicates how the funding is monitored.

TREASURY

European Union

Sir Teddy Taylor: To ask the Chancellor of the Exchequer what assessment he has made of the reasons why the European Union accounts for 2002 have not been signed or approved by the Court of Auditors; and if he will make a statement. [172486]

Ruth Kelly: The Paymaster General made a full statement on these issues on 23 February 2004 during the debate in European Standing Committee B on the European Court of Auditors' annual report.

Sir Teddy Taylor: To ask the Chancellor of the Exchequer what assessment he has made of the reasons for the increase in the number of recorded fraud cases within the EU in 2002; and how much money was lost in fraud within the EU in 2002. [172487]

Ruth Kelly: Member states are required to report irregularities detected in their own resources, agriculture and structural funds budget sectors to the European Commission and to the European Anti-Fraud Office. These figures are reported every year in the Commission's annual "Fight against Fraud" report. Reported irregularities may include suspected fraud cases, but the Commission does not publish an estimate of fraud. Irregularities rose during 2002 mainly because the heavy audit activity required at the closure of the 1994–1999 Structural Funds programming period led to the detection of a higher number of errors than is usually the case. Any money found to have been paid in error is normally recovered by the paying agency concerned.

Sir Teddy Taylor: To ask the Chancellor of the Exchequer what assessment he has made of the scope for reducing levels of fraud connected with the European Union budget. [172489]

Ruth Kelly: The Government strongly supports measures to reduce fraud against the Community budget. The European Anti-Fraud Office, which was an initiative of the Chancellor, is now up to complement and is doing a good job in tackling fraud, especially in cross-border cases which require investigations in several member states. The Government played an active part in negotiating the new Financial Regulation, a major reform which introduced new levels of accountability. Better financial control regulations in the Structural Funds, and simplification of agricultural payments will also reduce the opportunities for fraud.

Income Distribution

Mr. Willetts: To ask the Chancellor of the Exchequer if he will set out the distribution of original income, by quintile, in each of the past 10 years. [171582]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Willetts, dated 11 May 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking for the distribution of original income, by quintile, in each of the past ten years. (171582)

Estimates in the following table are produced from the Office for National Statistics' analysis "The effects of taxes and benefits on household income" published on the National Statistics website on 6 May 2004 at: http://www.statistics.gov.uk/taxesbenefits.

The analysis includes measures of income inequality for the United Kingdom as a whole based on data from the Expenditure and Food Survey. There have been some changes in the underlying surveys and improvements in the methodology so caution is required when making direct comparisons between years.

The table shows, for the UK, for 1993 to 2002/03, average original income received by all households and for each income quintile group where households are ranked by equivalised disposable income. For example, the 1st quintile boundary is the income level below which one fifth of households are estimated to lie. Equivalisation is a standard methodology that takes into account the size and composition of households and adjusts their incomes to recognise differing demands on resources.

Original income is defined as income before government intervention i.e. from sources such as earnings, occupational pensions and investments. It does not include cash benefits such as the State Retirement Pension, Incapacity benefit, Working Families Tax Credit, child benefit or housing benefit.

Distribution of Original Income, by quintile, 1993[1] to 2002–03—United Kingdom

Aviation Tax

Mr. Best: To ask the Chancellor of the Exchequer what assessment he has made of the impact on demand forecasts for air travel of *(a)* taxing aviation fuel at the same level as motor fuel, *(b)* the aviation industry paying the social and environmental costs of air travel and *(c)* applying VAT to airfares. [168721]

Mr. Meacher: To ask the Chancellor of the Exchequer (1) what estimate he has made of the additional revenue that would be raised, assuming no change in demand, if aviation fuel were taxed at the same rate as will apply to ordinary unleaded petrol for motor vehicles as from 1 September; [171362]

(2) what estimate he has made of the additional revenue that would be raised, assuming no change in demand, if VAT at 17.5 per cent. or a sales tax at 17.5 per cent. were imposed on all domestic and international airline tickets for flights departing from UK airports. [171363]

John Healey: A discussion paper published jointly by HM Treasury and the Department for Transport in March 2003, entitled "Aviation and the Environment: using economic instruments", considered the role of economic instruments and the environmental costs of road transport. This was also considered in Air Transport White Paper, "The Future of Air Transport", published on 16 December 2003 and in chapter 5 of "Aviation and Global Warming", published by the Department for Transport on 10 February 2004.

The Air Transport White Paper set out the conclusions of the Government's analysis, including our view that aviation should be brought within the EU Emissions Trading Scheme by 2008, as the most effective way of tackling the climate change impact. Along with other measures to tackle local environmental impacts, this will help to ensure that the air transport sector meets its environmental costs.

The Government have not undertaken an analysis of the demand impacts of specific measures which are not legally possible, such as tax on fuel for international flights or VAT on air transport, but we are continuing to explore options for using economic instruments.

Mr. Meacher: To ask the Chancellor of the Exchequer what the forecast revenue from air passenger duty is for 2004–05. [171365]

John Healey: Projected receipts from all taxes and duties are published in table C8 of the Financial Statement and Budget Report (HC 301). The forecast for Air Passenger Duty in 2004–05 is £0.9 billion.

Child Tax Credit

Mr. Willetts: To ask the Chancellor of the Exchequer how many parents have *(a)* been eligible for and *(b)* received the higher child tax credit in respect of a child under one in each year since it was introduced. [171600]

Dawn Primarolo: The child tax credit, which includes a baby addition to the family element, and a disregard for families receiving income support or income-based jobseeker's allowance and who have a child aged under one, have been available from April 2003.

Estimates of the numbers benefiting appear in Table 3.2 of "Child and Working Tax Credits. Quarterly Statistics. April 2004", and the footnote to that table. This document is available on the Inland Revenue website at: www.inlandrevenue.gov.uk/stats/personal-tax-credits/menu.htm No estimate of the number of families eligible for such help will be available until the Family Resources Survey for 2003–04 has been analysed.

Mr. Borrow: To ask the Chancellor of the Exchequer how many families in South Ribble have received child tax credits. [171996]

Dawn Primarolo: I refer my hon. Friend to my answer to my hon. Friend the Member for Burton (Mrs. Dean) on 15 March 2004, *Official Report*, column 98W.

Demography

Mr. David Willetts: To ask the Chancellor of the Exchequer how many mothers in each cohort since 1945 have had three or more children. [171601]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Willetts, dated 11 May 2004:

As National Statistician I have been asked to reply to your recent Parliamentary Question asking for the number of mothers in each cohort since 1945 who have had three or more children. (171601)

Statistics on women by the number of children they have given birth to are not readily available. However, estimates can be produced using information from birth registrations and the General Household Survey, together with estimates of the population by age and sex. This exercise is only carried out for England and Wales.

Summaries of these estimates are regularly published in the annual reference volume "Birth statistics (FM1)", but are normally presented in terms of proportions of women rather than numbers of women. However, I have supplied both the estimated numbers and proportions in the attached table.

Cohorts of women born from 1958 onwards have yet to complete their childbearing. As each more recent annual cohort of women have successively more of their childbearing life remaining there are, therefore, successively fewer women who have had three or more children.

Estimated number and percentage of women by year of birth who have had three or more children, based on births to 2002, England and Wales

Thousand, per cent.

Women born in year shown *Year*[1,2,4]	*Number with three or more children*[2,4]	*Percentage with three or more children*[3,5]
Women who have completed their fertility		
1945	107	33
1946	107	33
1947	126	30
1948	118	31
1949	108	30
1950	104	30
1951	99	30
1952	98	30
1953	100	30
1954	100	30
1955	100	30
1956	102	30
1957	107	30
Women who have not yet completed their fertility		
1958	109	30
1959	109	30
1960	112	30
1961	114	29
1962	114	28
1963	112	27
1964	109	26
1965	104	25
1966	99	23
1967	92	22
1968	83	20
1969	74	18
1970	63	16
1971	56	14
1972	46	12
1973	37	10
1974	29	8
1975	22	7
1976	16	5
1977	11	4
1978	8	3
1979	6	2
1980	3	1
1981	2	1
1982	1	0
1983	0	0
1984	0	0
1985	0	0
1986	0	0
1987	0	0
1988	0	0

[1] The years of birth shown are by necessity approximate, since births pre 1963 are available only by calendar year of occurrence and age of mother at childbirth. For instance, women aged 32 giving birth to children in 2002 could have been born in either 1969 or 1970; for convenience, however, such women are here regarded as belonging to the 1970 cohort.

[2] Women who have completed their fertility to age 45, population shown at age 45.

[3] Percentage of women of all parities in given cohort at age 45.

[4] Women who have not yet completed their fertility (have not reached age 45) The populations shown are at age they have completed by 2002, for example the 1970 cohort is at age 32.

[5] percentage of women of all parities in given cohort at age reached in 2002.

Office for National Statistics

Economic Indicators

John Mann: To ask the Chancellor of the Exchequer what his estimates are for gross domestic product growth rates for fiscal years 2004–05 and 2005–06 in *(a)* France, *(b)* Germany, *(c)* Japan and *(d)* the United States. [171357]

Ruth Kelly: HM Treasury does not publish GDP growth forecasts for individual countries other than for the UK. Forecasts for GDP growth in the G7 and Euro area can be found in table B1 of the 2004 Financial Statement and Budget Report.

A number of international agencies, banks and market analysts publish country-specific forecasts. For example, forecasts of GDP growth for France, Germany, Japan and the US can be found in the OECD's Economic Outlook No.74, December 2003, table 1 of the statistical annex.

John Mann: To ask the Chancellor of the Exchequer what he expects the size in percentage terms will be of budget deficits in fiscal years *(a)* 2004–05 and *(b)* 2005–06 in (i) France, (ii) Germany, (iii) Japan and (iv) the United States. [171358]

Ruth Kelly: HM Treasury does not publish projections of budget deficits for individual countries other than the UK. Projections on a calendar year basis, to 2005, for France, Germany, Japan and the US are available from a number of sources. The latest OECD figures are published in its "Economic Outlook" No. 74, December 2003, table 28 of the statistical annex.

John Mann: To ask the Chancellor of the Exchequer if he will make a statement on the percentage of the workforce employed in the public sector over the last 20 years in *(a)* France, *(b)* Germany, *(c)* Japan and *(d)* the United States. [171359]

Ruth Kelly: Definitions of public sector employment vary between countries, but Government employment as a percentage of total employment is a comparable and publicly available indicator. The OECD releases data on Government employment as a percentage of total employment through its Economic Outlook database. Data from 1980 for France, Germany, Japan and the US are presented in the following table.

Government employment, percentage of total employed

	France	Germany	Japan	Percentage US
1980	19.6	14.4	8.8	16.4
1981	20.1	14.6	8.8	16.0
1982	20.5	14.8	8.7	15.9
1983	20.8	15.0	8.6	15.7
1984	21.7	15.0	8.7	15.3
1985	22.0	15.0	8.7	15.3
1986	22.4	14.9	8.5	15.2
1987	22.7	14.9	8.5	15.1
1988	22.5	14.7	8.3	15.1
1989	22.5	14.6	8.1	15.2
1990	22.5	14.2	8.1	15.5
1991	22.8	13.4	8.1	15.8
1992	23.3	13.5	8.1	15.9
1993	24.0	13.4	8.2	15.8
1994	24.1	13.2	8.4	15.7
1995	24.1	12.8	8.3	15.6
1996	24.3	12.7	8.2	15.4
1997	24.1	12.4	8.3	15.2
1998	23.7	12.1	8.3	15.1
1999	23.4	11.7	8.3	15.2
2000	23.0	11.4	8.5	15.2
2001	22.7	11.1	8.4	15.4
2002	22.8	11.1	8.6	15.7
2003	22.9	11.1	8.6	15.6

John Mann: To ask the Chancellor of the Exchequer how income tax receipts as a percentage of the total tax take have varied over the last 20 years in *(a)* France, *(b)* Germany, *(c)* Japan and *(d)* the United States. [171360]

Ruth Kelly: The OECD publishes figures for "Taxes on personal income as a percentage of total taxation" for each of its member countries, in its annual Revenue Statistics publication (OECD Revenue Statistics 1965–2002, October 2003 edition, p.78, Table 11). A copy of this publication is available in the Library of the House.

Employment

Mr. Borrow: To ask the Chancellor of the Exchequer (1) what the *(a)* change and *(b)* percentage change was in the number of full-time permanent jobs in South Ribble from 1997 to 31 December 2003; [172151]

(2) how many new jobs have been created in South Ribble since 1997. [172152]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Borrow, dated 11 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Questions about full-time jobs and jobs created in South Ribble. (172151,172152)

While statistics of jobs created are not available explicitly, statistics from surveys enable comparisons to be made of net changes in numbers of jobs from year to year.

The attached table shows the information requested, relating to all jobs and full-time jobs in South Ribble Parliamentary Constituency for 1997 and 2002, the latest year for which information is available.

Information is not available about whether the jobs were permanent.

Number of full-time employees and total number of employees[1] in South Ribble parliamentary constituency, 1997 and 2002

	Full-time	Total
Number of employees		
1997	19,700	26,600
2002	22,100	30,800
Change from 1997 to 2002		
Absolute	2,400	4,200
Percentage	12.5	15.9

[1] Employee jobs only, not self-employed jobs.

1997; Annual Employment Survey, rescaled 2002; Annual Business Inquiry (ABI).

EU Insurance Mediation Directive

Mr. Drew: To ask the Chancellor of the Exchequer (1) what the timetable is for the introduction of the EU Insurance Mediation Directive; and what consultation he has had with the insurance industry on its potential impact; [171417]

(2) what the definition is of the term insurance business as used on page five of the Financial Services Authority booklet entitled High street firms: application pack for mortgage and general insurance businesses, with regard to the introduction of the EU Insurance Mediation Directive; [171418]

(3) what measures he is putting in place to protect *(a)* smaller companies and *(b)* individual brokers in the lead up to the introduction of the EU Insurance Mediation Directive, with specific reference to costs; [171428]

(4) what the rationale is for the introduction of the EU Insurance Mediation Directive; and how consumer choice will be guaranteed under its provisions; [171429]

(5) what alternatives for a suitable regulatory body for the monitoring of the EU Insurance Mediation Directive were considered before the Financial Services Authority was appointed to this role. [171430]

Ruth Kelly: The IMD is being implemented across the EU and will come into force in the UK on 14 January 2005. The Government has consulted widely on the regulatory regime, publishing a public consultation document including draft regulations and a draft regulatory impact assessment in October 2002. Officials attended a wide range of meetings, working groups and conferences to consult on implementation. The FSA has carried out extensive public consultation on its rules.

In implementing the Directive the Government and the FSA have worked closely with the industry to design a regulatory regime that takes account of market practice, and does not load the industry and ultimately the consumer with unnecessary costs. Both the Government and the FSA have been concerned to minimise the impact on smaller firms and sole traders. The Government also largely implemented the exclusions permitted in the Directive for travel insurance sold as part of a package, and for extended warranties.

Application fees have been set by the FSA according to the volume of business that a firm undertakes, so are cheapest for the smaller firms. The FSA have developed an approach to authorisation that is as streamlined and straightforward as possible. In terms of the wider costs to firms, the FSA have published detailed cost benefit analyses, based on surveys of firms' costs and asked for comment. Where these have revealed that the costs are thought to be disproportionate and/or under-estimated, the FSA have responded in their final decisions. The UK has the largest insurance industry in Europe. Implementing the IMD is a key step in completing the single market in financial services, and will enhance consumer protection in an important sector of financial business. The UK market for selling insurance is competitive with many players giving customers wide choice, and this will continue in the new regime. Already thousands of firms have applied to the FSA for authorisation for the new regime.

The Financial Services and Markets Act 2000 set up the FSA as the single regulatory body for a range of financial services, including the regulation of insurance. The Government therefore decided the FSA, as the single financial services regulator, was the most appropriate body to regulate insurance mediation. For many firms this will simplify and streamline regulation compared to the alternative of a separate regulator for insurance mediation. Intermediaries selling a range of other financial services products, such as pensions, mortgages, or investments, as well as general insurance, will come under the FSA as a single regulator, minimising compliance costs.

The Directive requires the regulation of a range of insurance mediation activities. The activities to be regulated are introducing, proposing or carrying out other work preparatory to the conclusion of contracts of insurance; concluding contracts of insurance; and assisting in both the administration and performance of such contracts, in particular in the event of a claim. The Directive applies to such activities in relation to contracts of insurance. The FSA application pack notes that shortened terms have been used in the pack in four instances. One of them is "insurance business" and refers to "insurance mediation activity in respect of non-investment insurance contracts." Further details of the FSA's regulatory regime can be found on their website at www.fsa.gov.uk

Euro Preparations

Mr. Heathcoat-Amory: To ask the Chancellor of the Exchequer on which dates the *(a)* Standing Committee on Euro Preparations, *(b)* Scottish Euro Preparations Committee, *(c)* Wales Euro Preparations Committee and *(d)* Northern Ireland Euro Preparations Committee met; if he will publish the minutes of the meetings; and what the cost to public funds has been of euro preparations. [171578]

Ruth Kelly: The Chancellor's Standing Committee on Euro Preparations last met on 23 October 2003. Minutes of all Standing Committee meetings are available on the Treasury's euro website, www.euro.gov.uk. An update on the work of the Scottish, Wales and Northern Ireland Euro Preparations Committees, including the timing of recent and forthcoming meetings, was published in Chapters of the spring report on euro preparations, on 29 April 2004. Minutes of the meetings are available at www.dfpni.gov.uk (Northern Ireland), www.wales.gov.uk (Wales) and www.scottishsecretary.gov.uk (Scotland). Details of expenditure on changeover planning were included in the third outline National Changeover Plan, published on 9 June 2003. Copies of the document are in the Library of the House.

Gender Pay Gap

Mr. Denham: To ask the Chancellor of the Exchequer what assessment he has made of the pay gap between men and women employed by his Department and its agencies in *(a)* Southampton, *(b)* Eastleigh, *(c)* Winchester and *(d)* Romsey. [171631]

Ruth Kelly: HM Treasury and its agencies do not have any staff employed in the locations mentioned.

Mr. Denham: To ask the Chancellor of the Exchequer what assessment he has made of the average earnings of *(a)* men and *(b)* women in Hampshire. [171634]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. John Denham, dated 11 May 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking what assessment has been made of the average earnings of *(a)* men and *(b)* women in Hampshire. (171634)

Average earnings are estimated from the 2003 New Earnings Survey (NES) and are provided for full-time employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for NES tables. The NES does not collect data on the self employed and people who do unpaid work.

The 2003 NES estimates that the total average weekly earnings of full-time adult employees in Hampshire were £549.10 for males and £399.50 for females. Please note that these estimates relate to the administrative county of Hampshire, which excludes the unitary authorities of Portsmouth and Southampton.

More detailed information on earnings in each of these areas is available in the published tables from the 2003 NES. The relevant estimates can be found in table A22.5 for males and A23.4 for females, and are available on the National Statistics website at: http://www.statistics.gov.uk/downloads/theme_labour/NES2003_Analyses_By_Region/NES2003_Analyses_By_Region.pdf

The NES, carried out in April of each year, is the most comprehensive source of earnings information in Great Britain. It is a 1 per cent. sample of all employees who are members of pay-as-you-earn (PAYE) schemes, but because of its sampling frame, it has difficulty capturing data on people with very low pay. It is therefore likely to under-represent relatively low paid staff earning below the tax threshold.

The New Earnings Survey publication criteria ensures that all estimates are undisclosive and of reliable quality. A number of estimates have been removed from the published tables for these reasons.

Income Tax

Mr. Borrow: To ask the Chancellor of the Exchequer how many senior citizens in South Ribble have qualified for the 10 pence rate of income tax in each year since its introduction. [171997]

Dawn Primarolo: All income taxpayers benefit from the 10 pence starting rate. The Survey of Personal Incomes estimates there are about 8,000 and 6,000 state retirement pension age taxpayers in the South Ribble constituency in 2000–01 and 2001–02 respectively. However, year on year comparisons should be treated with caution because of sampling variation. Figures for 1999–2000 are currently not available.

Mr. Benton: To ask the Chancellor of the Exchequer how many senior citizens in Bootle qualified for the 10 pence of income tax in each year since its introduction. [172340]

Dawn Primarolo: All income taxpayers benefit from the 10 pence starting rate. The Survey of Personal Incomes estimates that there are about 4,000 state retirement pension age taxpayers in the Bootle constituency in 2000–01 and 2001–02. Estimates should be treated with caution because of sampling variation. Figures for 1999–2000 are currently not available.

Insurance Policies

John Robertson: To ask the Chancellor of the Exchequer what steps his Department is taking to prevent banks and insurance companies from selling unsuitable insurance policies to pensioners; and what redress can be offered to customers in such circumstances. [171772]

Ruth Kelly: The selling of qualifying contracts of long-term insurance (broadly speaking long-term insurance policies that are not pure protection products) is already regulated by the Financial Services Authority (FSA). Any firm which makes a recommendation to a customer must ensure that the contract is suitable to the customer's demands and needs, and this applies to pensioners as to other consumers.

The FSA will regulate the selling of general insurance contracts from 14 January 2005. This regime will also introduce suitability standards such that any firm which makes a recommendation to a customer must ensure that the contract is suitable to the customer's demands and needs. This also applies to pensioners as to other consumers.

International Accounting Standards Board

Mr. Martyn Jones: To ask the Chancellor of the Exchequer what assessment he has made of the effect of the proposed changes by the International Accounting Standards Board to IAS39 on dormant accounts held by retail banks. [171995]

Ruth Kelly: When new International Accounting Standards come into force for listed groups in the EU at 1 January 2005, retail banks will need to ensure that they comply with those standards rather than existing UK accounting standards across all aspects of their business.

Pensioner Taxation

John Mann: To ask the Chancellor of the Exchequer how tax income from pensioners has changed over the last 20 years. [171311]

Dawn Primarolo: It is not possible to separate out income tax from capital gains tax.

Stamp Duty

Harry Cohen: To ask the Chancellor of the Exchequer what plans he has *(a)* to raise the level for which stamp duty is not payable on domestic property transactions in deprived wards and *(b)* increase the number of wards which can have stamp duty exemption under his scheme; and if he will make a statement. [171446]

John Healey: There are currently no plans to raise the threshold. The Government keeps all aspects of the tax system under regular review, including the rates and thresholds of Stamp Duty Land Tax.

There are currently no plans to revise the qualifying wards.

Statistics

Mr. Roger Williams: To ask the Chancellor of the Exchequer what estimate he has made of the amount of

(a) aspartame, *(b)* monosodium glutamate and *(c)* saccharine imported into the UK in processed foods in each year since 1989. [172348]

John Healey: HM Customs and Excise are responsible for the collection of data on imports. It is not possible to identify the amount of these products imported into the UK in processed foods from the data held.

Ms Dari Taylor: To ask the Chancellor of the Exchequer how many job vacancies there were in Stockton South in *(a)* 1997 and *(b)* 2003. [171464]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Dari Taylor, dated 11 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about job vacancies in Stockton South. (171464)

According to Jobcentre Plus administrative records, the number of unfilled vacancies in the Middlesbrough and Stockton travel-to-work area was 1,830 on average during 1997. This represents only a proportion of all the vacancies available, as not all vacancies are notified to Jobcentres.

Figures are not available for Stockton South alone because the vacancies are allocated to local Jobcentres, not according to constituency boundaries, and because of the practice of notifying some vacancies centrally with one Jobcentre taking vacancies for others in the same district.

Jobcentre vacancy statistics were withdrawn from National Statistics in September 2001 as a result of distortions to the data, which occurred following the introduction of new administrative procedures by Jobcentre Plus. Comparable figures for vacancies in 2003 are therefore unavailable.

Results from the ONS Vacancy Survey were released as National Statistics from July 2003, but are not available for local areas.

Ms Dari Taylor: To ask the Chancellor of the Exchequer what the level of unemployment was in Stockton South in each year since 1997. [171468]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from John Pullinger to Ms Dari Taylor, dated 11 May 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question about unemployment. I am replying in his absence. (171468)

The Office for National Statistics (ONS) compiles statistics of unemployment from the Labour Force Survey (LFS) following International Labour Organisation definitions. However, the LFS sample size is too small to give a reliable picture of changes over time of unemployment in the Stockton South Constituency.

ONS also compiles statistics of those claiming Jobseeker's Allowance (ISA) for local areas including parliamentary constituencies.

The table as follows gives the annual average number of JSA claimants for the Stockton South constituency for each year since 1997.

Annual average number of JSA claimants

Stockton South constituency, 1997—2003

	Number of claimants
1997	3,201
1998	2,756
1999	2,780
2000	2,575
2001	2,183
2002	2,032
2003	1,884

Statistics (West Lancashire)

Mr. Pickthall: To ask the Chancellor of the Exchequer how many job vacancies there were in *(a)* 1997 and *(b)* 2003 in West Lancashire. [171493]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Colin Pickthall, dated 11 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about job vacancies in West Lancashire. (171493)

According to Jobcentre Plus administrative records the number of unfilled vacancies notified to Jobcentres in Lancashire West Jobcentre Plus District was 4,730 on average during 1997. This represents only a proportion of all the vacancies available, as not all vacancies are notified to Jobcentres.

Figures are not available for West Lancashire alone because the vacancies are allocated to local Jobcentres, not according to constituency boundaries, and because of the practice of notifying some vacancies centrally with one Jobcentre taking vacancies for others in the same district.

Jobcentre vacancy statistics were withdrawn from National Statistics in September 2001 as a result of distortions to the data, which occurred following the introduction of new administrative procedures by Jobcentre Plus. Comparable figures for vacancies in 2003 are therefore unavailable.

Results from the ONS Vacancy Survey were released as National Statistics from July 2003, but are not available for local areas.

Mr. Pickthall: To ask the Chancellor of the Exchequer how many new jobs have been created in West Lancashire since 1997. [171495]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Colin Pickthall, dated 11 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about jobs created in West Lancashire. (171495)

While statistics of new jobs created are not available explicitly, statistics from surveys enable comparisons to be made of net changes in numbers of jobs from year to year.

The most recent year for which data are available is 2002. There were 35,900 employees in the West Lancashire constituency in 2002 compared to 33,800 in 1997, a net increase of 2,200 jobs during this period. All figures are rounded to the nearest 100, which can introduce rounding error.

The figures provided relate to employee jobs only, with self-employed jobs excluded, and are taken from the rescaled Annual Employment Survey (1997) and the Annual Business Inquiry (2002)

Tax Coding

Mr. Flook: To ask the Chancellor of the Exchequer how many notices of coding sent out in January to March for the 2004–05 tax year included car and fuel benefits attributable to the company car scheme which ceased in 2002–03. [167587]

Dawn Primarolo: The rules of the company car scheme changed in 2002–03. All the notices of coding issued between January and March for the 2004–05 tax year that included car and fuel benefits correctly included them under the new scheme. However, around 468,000 of the coding notices containing car and fuel benefits were incorrect because the rates for 2003–04 were mistakenly used instead of those for 2004–05. Amended notices of coding with revised figures to correct the error were issued in February before the 2004–05 codes were brought into operation.

Tax Repayments

Mr. Caton: To ask the Chancellor of the Exchequer what the reasons were for the decision to limit the option of receiving Inland Revenue tax repayments by cheque to people without bank accounts. [172128]

Dawn Primarolo: The principal reasons for restricting the options for the method of repayment were to improve the level of service given to customers, to improve efficiency around the repayment process, and to improve the security of the payment.

By making a repayment electronically direct to a bank or building society account, the customer is able to have earlier use of the money than if a cheque had been sent through the post. An electronic repayment also has lower processing cost both for the Inland Revenue and the banking sector; and reduces the risk of the payment being intercepted.

But if the customer is unable to accept the repayment electronically, a cheque can be issued.

Timber

Ms Walley: To ask the Chancellor of the Exchequer whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167620]

John Healey: I refer my hon. Friend to an answer provided by my hon. Friend the Minister for Environment and Agri-Environment yesterday, *Official Report*, column 31W.

Unemployment

Mr. Borrow: To ask the Chancellor of the Exchequer what the level of unemployment was in South Ribble in each year since 1997. [172011]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from John Pullinger to Mr. Borrow, dated 11 May 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question about unemployment. I am replying in his absence. (172011)

The Office for National Statistics (ONS) compiles statistics of unemployment from the Labour Force Survey (LFS) following International Labour Organisation definitions. However, the LFS sample size is too small to give reliable estimates of unemployment in the South Ribble Constituency.

ONS also compiles statistics of those claiming Jobseeker's Allowance (JSA) for local areas including parliamentary constituencies.

The table gives the annual average number of JSA claimants for the South Ribble constituency for each year since 1997.

Annual average number of JSA claimants, South Ribble constituency, 1997–2003

	Number
1997	1,281
1998	1,038
1999	1,034
2000	921
2001	763
2002	759
2003	740

Working Tax Credit

Mrs. Brooke: To ask the Chancellor of the Exchequer what representations he has received on the stoppage or reduction of payment of the child care element of the working tax credit in response to earlier overpayments of child tax credit. [171646]

Dawn Primarolo: None. In a case where both working and child tax credit have been awarded and the child care element is payable, the family would be entitled to the maximum amount of child tax credit so we would not expect the situation to arise.

Tax credit awards are adjusted during the year so as to pay out the right amount for the year and prevent overpayments arising. The Inland Revenue's approach to dealing with tax credit overpayments is set out in a Code of Practice, "What happens if we have paid you too much tax credit?", available on the Inland Revenue's website or as a leaflet.

WORK AND PENSIONS

British Sign Language Interpreters

Helen Jones: To ask the Secretary of State for Work and Pensions what steps he is taking to increase the number of qualified British Sign Language/English interpreters. [171012]

Maria Eagle: The lack of tutors at the higher levels is recognised as being a significant blockage in the system to recruit and train BSL/English interpreters. On 4 May, I announced we were putting in place a programme of work to support the Government's position statement on British Sign Language (BSL) and had raised the original funding allocation by a further half million to £1.5 million. One of the two priorities this work will address is helping establish a framework to support BSL tutors, for example by providing on-line training material and developing tutor support packs. These measures will, over time, assist an increase in interpreting provision.

Correspondence

Mr. Kaufman: To ask the Secretary of State for Work and Pensions when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 5 April with regard to Mrs. Robina Abaid. [172265]

Mr. Andrew Smith: The letter has been transferred to my right hon. Friend the Chancellor of the Exchequer. I am sorry that due to an oversight it was not transferred earlier.

Pension Credits (Devon and Cornwall)

Mr. Sanders: To ask the Secretary of State for Work and Pensions how many eligible pensioners he estimates are not claiming *(a)* pension credits and *(b)* council tax credit in Devon and Cornwall, broken down by constituency. [171579]

Malcolm Wicks: The information is not available in the form requested. Estimates of numbers of people eligible are not available at any level lower than that of Government office region. However, the information in the tables gives the numbers of pension credit and council tax benefit recipients aged 60 and over in Devon and Cornwall for the latest dates for which figures are available. As my right hon. Friend the Secretary of State announced on 21 April 2004, *Official Report*, columns 21–22, we have published the latest monthly pension credit progress report with information up to the end of March. The report, which is available in the Library, is accompanied by tables showing the number of pension credit households and corresponding individuals in each constituency in Great Britain.

Table 1: Pension credit recipients in Devon and Cornwall, 31 March 2004

County	*Pension credit recipients (households)*
Devon	30,615
Cornwall	26,090

Note:
Figures are rounded to the nearest five.

Table 2: Council tax benefit recipients aged 60 and over in Devon and Cornwall, 31 August 2003

County	*Thousand Council tax benefit recipients (households)*
Devon	26.1
Cornwall	22.0

Notes:
1. The figures refer to benefit units, which may be a single person or a couple.
2. The figures have been rounded to the nearest hundred and expressed in thousands.
3. Figures for any non-responding authorities have been estimated.
4. Council tax benefit totals exclude any second adult rebate cases.
5. "Aged 60 and over" refers to cases where the claimant and/or partner are aged 60 or over.

Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions pursuant to his answer of 23 April 2004, *Official Report*, column 709W, on pension forecasts, which *(a)* employers and *(b)* pension providers delivered combined pension forecasts in each year since their introduction. [171101]

Malcolm Wicks: The names of the employers and pension providers providing combined pension forecasts in each year since their introduction are set out in the table.

Pilot years
AXA (Provider)
DWP PCSPS
EMAP
J Sainsbury plc
Merseyside Pension Fund
NPI
Prudential (Provider)
2002–03
Bacon and Woodrow
Durham County Council
EMAP

Vencel Resil Limited
Woodgate Fulfilment Limited
WS Atkins Plc

Mr. Webb: To ask the Secretary of State for Work and Pensions pursuant to his answer of 23 April 2004, *Official Report*, column 709W, on pension forecasts, how many individuals have received a combined pension forecast; and how many of that number have received a forecast on *(a)* one, *(b)* two, *(c)* three and *(d)* more than three occasions. [171102]

Malcolm Wicks: The information requested is not available in the format requested. Such information as is available is as follows.

DWP has supplied 1,120,048 state pension forecasts to employers or pension providers for inclusion in combined pension forecasts. However the number of individuals who have received combined forecasts will be less than the total number of forecasts issued. This is because:

all of the employers and providers currently delivering combined pension forecasts issue them annually to their scheme members and therefore some individuals will have received more than one forecast over the period since the service has been available;

some individuals may receive a combined forecast from more than one pension provider.

Retirement Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the cost of abolishing the requirement on recipients of retirement pensions to have made national insurance contributions for at least 25 per cent. of their working life. [172432]

Malcolm Wicks: The information is not available in the format requested.

However, we estimate that it would cost around £95 million in 2004–05 if recipients of graduated retirement pension and/or additional pension were to be paid basic state pension where they have less than 25 per cent. of the required qualifying years.

Notes:

1. The estimated cost has been provided by the Government Actuary's Department.

2. As data are not available on the individual contribution records of those people who have contributed for less than 25 per cent. of their working life, the estimate is based on the assumption that nine years national insurance contributions have been paid, or credited, thus the estimate is the maximum potential cost.

3. The figures are for Great Britain and overseas.

Sure Start

Jim Dobbin: To ask the Secretary of State for Work and Pensions how many mothers in Heywood and Middleton have taken up the Sure Start maternity grant. [168543]

Mr. Meacher: To ask the Secretary of State for Work and Pensions how many mothers in Oldham, West and Royton have taken up the Sure Start maternity grant. [170952]

Mr. Pond: The information is not available in the format requested, the available information is in the table.

	Applications	*Awards*
Sure Start maternity grants for West Pennine social fund district		
2000–01	1,807	1,591
2001–02	2,363	1,794
2002 to December	2,213	1,689
Sure Start maternity grants for the area covered by Oldham and Rochdale Jobcentre Plus district		
2003 January	Not available	325
2003 February and March	682	435
2003–04	4,251	3,059

Notes:

1. Heywood and Middleton parliamentary constituency and, Oldham, West and Royton parliamentary constituency used to be part of West Pennine social fund district and are now part of Oldham and Rochdale Jobcentre Plus district. The latter was formed in January 2003 from part of Oldham social fund district and part of West Pennine social fund district. The two areas for which data is given above are thus different, and the data is not comparable.

2. Sure Start maternity grants were introduced on 27 March 2000. The very small number of cases for 1999–2000 have been excluded for data protection reasons.

3. Data is given for all applications and awards, irrespective of whether the application was made by the mother or her partner.

DWP Social Fund Policy, Budget and Management Information System.

EDUCATION AND SKILLS

Quality Protects

Paul Holmes: To ask the Secretary of State for Education and Skills how much has been spent on the Quality Protects programme in each of the last three years, broken down by region; and if he will make a statement. [170179]

Margaret Hodge: Allocations to support Quality Protects were made to Local Authorities via the Children's Services Grant. Children's Services Grant allocations are set out by region in a table which has been placed in the Library.

Quality Protects was a five year programme launched in 1998 with the aim of improving the management of delivery of children's social services. It focused on working with some of the most disadvantaged and vulnerable children in society; children in need, children looked after by local authorities, young people leaving care, children in the child protection system and disabled children. From April 2004, the funding for quality protects was incorporated into local authorities' funding for children's social services.

Bootle Schools

Mr. Benton: To ask the Secretary of State for Education and Skills how many and what percentage of pupils in Bootle reached the *(a)* mathematics and *(b)* English standard in each of the last seven years. [172023]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member for Westmorland and Lonsdale (Mr. Collins) on 10 May 2004, *Official Report*, column 34W.

Capital Modernisation Fund (South Ribble)

Mr. Borrow: To ask the Secretary of State for Education and Skills how much money has been allocated to South Ribble from the Capital Modernisation Fund. [171999]

Mr. Charles Clarke: The Department for Education and Skills does not hold this information centrally. Capital Modernisation Fund has been allocated by project and not by area.

Child Care

Mr. Kaufman: To ask the Secretary of State for Education and Skills (1) how many *(a)* Sure Start centres and *(b)* early excellence centres have been created in Manchester, Gorton; [167451]

(2) how many new nurseries have been established in Manchester, Gorton since 1997. [167452]

Margaret Hodge: Sure Start Hyde Road Local Programme covers the majority of the Gorton constituency and is currently under development. It was approved by the Sure Start Unit with indicative capital funding of £1,250,000 in May 2003 and the programme is expected to submit their capital plan for this money in the summer. No Early Excellence Centres have been created in Gorton since 1997.

Manchester City Council is responsible for determining local need for nursery provision in Gorton and holding information on current provision. Under the Neighbourhood Nurseries scheme 534 new nursery places have been opened in Manchester, although none of these fall within Gorton constituency.

Mr. Simmonds: To ask the Secretary of State for Education and Skills what steps his Department is taking to improve the provision of childcare for *(a)* children from minority ethnic groups, *(b)* children with special needs and *(c)* children with disabilities. [171366]

Margaret Hodge: The Government are committed to inclusive practice and this principle underpins our strategic guidance to local authorities. Local authorities are required to have policies for equality in developing Early Years and childcare services.

My Department funded four pilot programmes in local authorities during 2003–04 to develop practical ways of ensuring equal access to Early Years and childcare settings for ethnic minority families and recently held a conference to disseminate the findings.

All settings in receipt of nursery education funding are required to appoint one of their staff as a Special Educational Needs Coordinator (SENCO) and local authorities have received specific funding for this purpose over 2004–05 and 2005–06. Every authority is expected to appoint a network of Area Special Needs Coordinators (SENCOs) with a ratio of one Area SENCO to every 20 non-maintained settings delivering funded early education. These coordinators are responsible for training and supporting setting-based SENCOs and other childcare staff to meet the needs of disabled children.

Removing Barriers to Achievement, the Government's strategy for SEN, outlines further actions that Government and our partners will take to improve childcare provision for children with special needs or disabilities. We are taking a range of actions on improving information for the parents of disabled children, improving the co-ordination and responsiveness of childcare services and training the childcare workforce so that children's needs are met.

Mr. Willetts: To ask the Secretary of State for Education and Skills if he will list the funding streams and grants which are available to providers of childcare in respect of children over eight years; and for each one, what the expenditure was in each year for which the scheme has been in existence. [171602]

Margaret Hodge: There is no grant funding available or statistics collated exclusively for providers of childcare in respect of children over eight years. What providers can access is resources available to provide childcare for children from three to 14, and up to 16 for children with special needs. The key funder of out of school childcare has been the Lottery through the New Opportunities Fund (NOF) Out of School Programme since its inception in 1999.

While figures cannot be broken down year on year, from April 1999 to March 2003, NOF grant awards totalled over £270,857,247 million in England. This is because the process of NOF grant funding was based on a rolling allocation of set periods of time rather than an annual award.

From August 2003, local authorities bid direct to the Department as part of the new Sure Start Out of School Programme launched in 2003. In 2003/04, grants allocated from Sure Start provided £19 million for out of school care. For 2004/06, £1.2 billion has been

allocated to local authorities to support the growth of childcare and Early Years services. This includes funding to create 250,000 new childcare places, some of which will be out of school places.

In 2003/04, £2.73 million has been made available to support the childcare element of the main extended schools programme. For 2004/05, this figure has grown to £7.6 million.

Mr. Benton: To ask the Secretary of State for Education and Skills how many child care places have been created in Bootle since 1997. [171298]

Margaret Hodge: The Department is unable to provide details of child care places for Bootle. However, from April 1999 to March 2004 Sefton Local Authority created 3,590 new child care places helping some 6,440 children. This shows an increase in the stock of child care places, taking into account turnover, of 2,009 helping some 3,700 children.

Mr. Borrow: To ask the Secretary of State for Education and Skills if he will make a statement on the number of children in South Ribble who have gained from the National Childcare Strategy. [171666]

Margaret Hodge: The Department is unable to provide details of childcare places for South Ribble. However, from April 1999 to March 2004, Lancashire local authority created 22,581 new childcare places helping some 39,808 children. This shows an increase in the stock of childcare places, taking into account turnover, of 9,826, helping some 17,631 children.

Mr. Borrow: To ask the Secretary of State for Education and Skills how many new nurseries have been established in South Ribble since 1997. [171667]

Margaret Hodge: Lancashire county council is responsible for determining local need for nursery places in South Ribble and hold information on current provision. Under the Neighbourhood Nurseries scheme, 799 new nursery places have been created in 22 nurseries in Lancashire, and a further two nurseries providing 106 places are planned. None of these nurseries are within South Ribble constituency.

Mr. Simmonds: To ask the Secretary of State for Education and Skills if he will make a statement on the effectiveness of ChildcareLink. [171306]

Margaret Hodge: The ChildcareLink programme consists of two separate parts—The ChildcareLink Phoneline and the ChildcareLink website:

ChildcareLink Telephone Help Line

Set up in 1999, the ChildcareLink phoneline provides a signposting service for callers looking for information on child care and early years. The majority of callers are directed to their local Children's Information Service (CIS).

The phoneline covers England and Scotland and is available from 8 am—8 pm Monday to Friday and from 9 am—12 pm on Saturday. These hours offer a service that is accessible to people who do not have the time to look for child care in the 9 am—5 pm working day. Being national, the service also provides a useful service for those looking for child care outside their local area.

The phoneline has a high level of usage and received approx 33,170 calls in 2003.

ChildcareLink website

Set up in 1999, the ChildcareLink website provides details of registered childcare provision across England and Scotland. The service enables users to look for details of registered child care in their local area as well as giving them access to supporting information that would assist them in their search, such as advice on how to pay for child care, and a description of the different types of child care on offer.

The website is available 24 hours a day and, being national, the user is not limited to look only for child care in their local area but can search across the whole of England and Scotland.

The website has a high level of usage and received approx 1.1 million visits during 2003 encompassing over 70 million hits.

Education Funding

Mr. Meacher: To ask the Secretary of State for Education and Skills (1) how many *(a)* Sure Start centres and *(b)* early excellence centres have been created in Oldham, West and Royton; [170913]

(2) how many new nurseries have been established in Oldham, West and Royton since 1997. [170914]

Margaret Hodge: There are five Sure Start local programmes in Oldham: Sure Start Hollinwood; Sure Start Westwood; Sure Start Werneth; Sure Start Coldhurst and Sure Start Glodwick, St. Mary's and Higginshaw. Of these five programmes, three are based within Oldham, West and Royton: Sure Start Westwood, approved in January 2002; Sure Start Coldhurst approved in December 2002 and Sure Start Werneth which was approved by the Sure Start Unit in March 2003. No Early Excellence Centres have been created in Oldham since 1997.

Oldham Metropolitan Borough Council has responsibility for determining local need for nursery places in Oldham and holding information on current provision. Under the neighbourhood nurseries scheme 477 new nursery places have been created in Oldham, with 216 of these places being based within Oldham, West and Royton.

Oldham MBC is currently developing plans to implement children's centres in the 20 per cent. most disadvantaged wards; Oldham will be included in these plans.

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many *(a)* free nursery and *(b)* pre-school places were available for (i) three and (ii) four year olds in the Huntingdon constituency in each of the last seven years. [170846]

Margaret Hodge: The information is not available in the form requested.

Figures on the number of free nursery education places taken up by three and four-year-olds in Cambridgeshire local education authority area are shown in the table.

The latest figures on provision for 3 and 4-year-olds in England were published in a Statistical Bulletin 'Provision for children under five years of age in England—January 2003' which is available on the Department's website www.dfes.gov.uk/rsgateway/.

From April 2004, six months ahead of our original target, all three-year-olds in England whose parents want one, are eligible for a free, part-time early education place.

Children's Fund

Ms Dari Taylor: To ask the Secretary of State for Education and Skills (1) how many *(a)* Sure Start centres and *(b)* Early Excellence centres have been created in Stockton, South; [171452]

(2) how many new nurseries have been established in Stockton, South since 1997. [171454]

Margaret Hodge: There are five Sure Start local programmes in Stockton-on-Tees: Sure Start Hardwick, Mile House and Roseworth; Sure Start Newtown, Portrack and Tilery; Sure Start Parkfield and Victoria; Sure Start Mandale Village and Stainsby and Sure Start Billingham. Of these five programmes, two are based within the Stockton, South constituency: Sure Start Mandate Village and Stainsby and Sure Start Parkfield and Victoria, both approved by the Sure Start Unit in December 2002. There are no Early Excellence Centres in Stockton-on-Tees.

Stockton-on-Tees borough council has responsibility for determining local need for nursery provision in Stockton and holding information on current provision. Under the neighbourhood nurseries scheme, 340 new nursery places have been created in Stockton, with 100 of these places being based within Stockton, South.

Stockton-on-Tees borough council is currently developing plans to implement children's centres in the 20 per cent. most disadvantaged wards; Stockton, South will be included in these plans.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many *(a)* free nursery and *(b)* pre-school places were available for (i) 3 and (ii) 4-year-olds in Stockton, South in each of the last seven years. [171453]

Margaret Hodge: The information is not available in the form requested.

Figures on the number of free nursery education places taken up by 3 and 4-year-olds in Stockton-on-Tees local education authority area are shown in the table.

The latest figures on provision for 3 and 4-year-olds in England were published in a Statistical Bulletin Provision for children under five years of age in England—January 2003' which is available on the Department's website www.dfes.gov.uk/rsaateway/.

From April 2004, six months ahead of our original target, all 3-year-olds in England whose parents want one, are eligible for a free, part-time early education place.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills (1) how many childcare places have been created in Stockton, South since 1997; [171455]

(2) how many children in Stockton, South have gained from the National Childcare Strategy. [171477]

Margaret Hodge: The Department is unable to provide details of childcare places for Stockton, South. However, from April 1999 to March 2004, Stockton-on-Tees local authority created 3,401 new childcare places helping some 5,838 children. This shows an increase in the stock of childcare places, taking into account turnover, of 1,776, helping some 3,081 children.

Mr. Nicholas Brown: To ask the Secretary of State for Education and Skills what the arrangements are for allocating money from the Children's Fund in Newcastle-upon-Tyne; what criteria are applied; and what the audit arrangements are. [166537]

Margaret Hodge: Children's Fund resource is allocated according to a formula that takes into account the number of children and young people in an area, and also the levels of deprivation in that area.

Children's Fund partnerships in 2003–04 had an over-allocation built in to their budgets. This was to ensure that underspends built up in the programme overall would be used up. However, this has now resulted in a projected overspend in the programme. To keep the programme overall within its financial limits this year the Department for Education and Skills held a mid year review of expenditure. This identified underspends in the programme and as a result revised budgets were agreed to some partnerships for the remainder of 2003–04. Decisions at the mid year review were revisited where they compromised partnerships' ability to meet contractual obligations, or were likely to cause unplanned staff redundancy or premature closure of services.

My Department has identified new resources from outside the Children's Fund which means that the total budget for partnerships this year will be £160 million. This is only slightly below the originally notified total allocation of £164.6 million. As such, the allocation for the Newcastle-upon-Tyne partnership has been reduced from £1.25 million to £1.215 million. I have also agreed that they can carry forward any underspend from previous years, where this can be shown to maintain services that continue to deliver value for money and bring benefit to local communities.

All partnerships must have an accountable body, which is ultimately responsible for the spending of the Children's Fund grant. The accountable body must undertake audit requirements as set out in the terms and conditions of grant, with which all of the Children's Fund partnerships must comply.

Children's Information Services

Mr. Simmonds: To ask the Secretary of State for Education and Skills if he will make a statement on the effectiveness of children's information services. [171304]

Margaret Hodge: Figures provided by CISs for 2003 showed that they are dealing with almost 24,000 inquiries per week—over a million per year.

Although parents' surveys have suggested low usage, it appears that many parents may not necessarily be aware that they are being helped by CISs, which are often seen as being part of the host organisation e.g. the local authority or voluntary organisation involved.

CISs services are aimed at anyone seeking childcare or other Sure Start services, but there is a strong emphasis on reaching people without existing networks of contacts through outreach work with groups who find it hard to access childcare services.

The CIS Strategy, published in November 2003, sets out clear delivery standards and requires CISs to work toward achieving "model CIS" status by 2006. All CISs have been set targets for further improving numbers of weekly inquiries by 2006.

Computer Learning Centres

Mr. Meacher: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Oldham, West and Royton. [170926]

Mr. Charles Clarke: Four Capital Modernisation Funded UK online centres have been established in Oldham, West and Royton.

Mr. Benton: To ask the Secretary of State for Education and Skills how many *(a)* teachers and *(b)* families in Bootle have benefited from the Computers in Reach programme. [171127]

Mr. Charles Clarke: The Computers Within Reach (CWR) scheme closed on 31 October 2001 having delivered over 24,000 recycled computers to people in 22 pilot areas, at a cost of £7.1 million over two years. Those eligible were in receipt of certain working age benefits or a State Pension with minimum income guarantee.

At the same time as funding was made available for the Computers within Reach scheme, funding was also provided for the Computers for Teachers programme. For teachers who met certain criteria, this programme subsidised the cost of a computer. It was subsequently replaced by the current Laptops for Teachers scheme which dispensed with subsidies, and through which sufficient funding will be provided to enable two thirds of teachers to receive a laptop by March 2006.

Of the 24,000 computers delivered through the Computers within Reach scheme, approximately 3,000 were for people in the Liverpool area, including those in and around Bootle.

Mr. Borrow: To ask the Secretary of State for Education and Skills how many families in South Ribble have benefited from the Computers Within Reach scheme; and how many teachers have benefited from the Computers for Teachers programme. [171978]

Mr. Charles Clarke: The Computers Within Reach (CWR) scheme closed on 31 October 2001, having delivered over 24,000 recycled computers to people in 22 pilot areas, at a cost of £7.1 million over two years. Those eligible were in receipt of certain working age benefits or a state pension with minimum income guarantee.

At the same time as funding was made available for the Computers Within Reach scheme, funding was also provided for the Computers for Teachers programme. For teachers who met certain criteria, this programme subsidised the cost of a computer. It was subsequently replaced by the current Laptops for Teachers scheme, which dispensed with subsidies, and through which sufficient funding will be provided to enable two-thirds of teachers to receive a laptop by March 2006.

South Ribble was not one of the pilot areas for the CWR scheme.

Mr. Borrow: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer learning centres have been established in South Ribble. [171979]

Mr. Charles Clarke: 15 Capital Modernisation Fund UK online centres have been established in South Ribble.

Mr. Borrow: To ask the Secretary of State for Education and Skills how much public funding has been spent on computers for schools in South Ribble in each of the last seven years. [171980]

Mr. Charles Clarke: My Department does not collect information on school spend on computers at constituency level. However, South Ribble is in Lancashire LEA and in the last seven years schools in Lancashire have benefited from the following funding through the Standards Fund grant for ICT (including match funding from the LEA):

	Allocation to Lancashire LEA (£)
1998–99	2,500,000
1999–2000	1,627,867
2000–01	5,576,036
2001–02	6,483,142
2002–03	8,983,493
2003–04	9,169,124
2004–05	11,892,478

Computers (Bootle)

Mr. Benton: To ask the Secretary of State for Education and Skills how many people in Bootle have received a computer to assist in seeking employment or retraining. [171305]

Mr. Charles Clarke: At present no centrally funded schemes exist which provide people with a free or low cost computer to assist in seeking employment or retraining.

Computers within Reach

Mr. Meacher: To ask the Secretary of State for Education and Skills how many *(a)* teachers and *(b)* families in Oldham, West and Royton have benefited from the Computers within Reach programme. [170927]

Mr. Charles Clarke: The Computers within Reach (CWR) scheme closed on 31 October 2001 having delivered over 24,000 recycled computers to people in 22 pilot areas, at a cost of £7.1 million over two years. Those eligible were in receipt of certain working age benefits or a state pension with minimum income guarantee.

At the same time as funding was made available for the Computers within Reach scheme, funding was also provided for the Computers for Teachers programme. For teachers who met certain criteria, this programme

subsidised the cost of a computer. It was subsequently replaced by the current Laptops for Teachers scheme which dispensed with subsidies, and through which sufficient funding will be provided to enable two thirds of teachers to receive a laptop by March 2006.

Oldham, West and Royton was not one of the pilot areas for the CWR scheme.

Early Years Education

Mr. Simmonds: To ask the Secretary of State for Education and Skills what Government expenditure on early years education was in each year since 1997, broken down by main budget heading. [171302]

Margaret Hodge: From April 2003, all funding to support the delivery of early years education was consolidated within the under-fives sub-block of each LA's Education Formula Spending Share (EFSS)—the main source of education funding. Prior to that time, provision in the private, voluntary and independent sectors together with new places in the maintained sector was funded through separate ring-fenced grant and existing places in the maintained sector were funded through the Standard Spending Assessments (SSAs). Expenditure on early education and funding for the under-fives block was as follows:

£

	Early education (expenditure)	*Under-fives block (funding)*
1997–98	637	562
1998–99	134	1,170
1999–2000	150	1,280
2000–01	247	1,340
2001–02	224	1,490
2002–03	326	1,620
2003–04[1]	42	2,600

[1] Provisional.

Notes:

1. Outturn figures for early education in 2003–04 are provisional. Final figures will be available later in 2004.
2. Funding for the under-fives block in 2003–04 includes an apportionment of the pensions transfer into EFSS.

Mr. Simmonds: To ask the Secretary of State for Education and Skills how many nursery managers are qualified to NVQ level 3 or above. [171368]

Margaret Hodge: According to the 2001 Childcare Workforce Survey, 78 per cent. of nursery managers were qualified to NVQ level 3 or above. Results from the 2003 survey are due to be published shortly.

Mr. Simmonds: To ask the Secretary of State for Education and Skills if he will make a statement on recruitment and retention of staff in the nursery and childcare sectors. [171371]

Margaret Hodge: The Government are committed to increasing both Early Years provision and the quality of that provision. We have already created new childcare places for 1.6 million children and are now committed to creating at least 250,000 new places for 450,000 children by 2006. Recruiting and retaining sufficient numbers of good quality staff to support this expansion is essential and we are helping early years' employers to do so.

Over the next two years, we are providing local authorities with £129.9 million for workforce development, including £14 million to support recruitment in their local areas. Our childcare recruitment campaign has been running since 2000 and has been successful in raising the profile of job opportunities in the sector. To date, we have received over 200,000 responses to the campaign.

Mr. Simmonds: To ask the Secretary of State for Education and Skills how many childminder inspections were carried out by Ofsted's Early Years Directorate in each year since 2000. [171372]

Margaret Hodge: The number of childminder inspections carried out by Ofsted is a matter for the Office of Standards in Education (Ofsted) and the HM Chief Inspector for Schools, David Bell will write to the hon. Member and place a copy of his letter in the Library.

Education (Heywood and Middleton)

Jim Dobbin: To ask the Secretary of State for Education and Skills how many new nurseries have been established in Heywood and Middleton since 1997. [168495]

Margaret Hodge: Rochdale City Council is responsible for determining the local need for nursery places in Heywood and Middleton and currently holds this information. 235 new nursery places have been opened in Rochdale under the Neighbourhood Nurseries scheme, of which 25 places are in Heywood and Middleton.

Educational Attainment

Mr. Kaufman: To ask the Secretary of State for Education and Skills how many and what percentage of 11-year-old pupils in Manchester, Gorton reached level four in *(a)* mathematics and *(b)* English in each of the last seven years. [167438]

Mr. Miliband: The information requested is as follows:

	Mathematics			*English*		
	Manchester, Gorton		*England*	*Manchester, Gorton*		*England*
	Number of pupils achieving Level 4 +	*Percentage of pupils achieving Level 4 +*	*Percentage of pupils achieving Level 4 +*	*Number of pupils achieving Level 4 +*	*Percentage of pupils achieving Level 4 +*	*Percentage of pupils achieving Level 4 +*
2003	659	61	73	690	64	75
2002	711	64	73	688	62	75
2001	628	61	71	638	62	75
2000	612	60	72	621	61	75
1999	584	55	69	593	56	71
1998	456	43	59	548	52	65
1997	526	49	62	568	53	63

Mr. Collins: To ask the Secretary of State for Education and Skills what percentage of pupils in England have achieved five GCSEs A*-C including *(a)* mathematics, *(b)* English and *(c)* mathematics and English in each year since 1997, broken down by parliamentary constituency. [167567]

Mr. Miliband: The information requested has been placed in the Libraries.

Free Nursery Places (Croydon)

Richard Ottaway: To ask the Secretary of State for Education and Skills whether Croydon council is in breach of its obligations in the provision of free nursery places for three-year-olds. [171448]

Margaret Hodge: Section 118 of the School Standards Framework Act 1998 places a duty on all LEAs to ensure sufficient nursery education for children of the prescribed age. They must also have regard to a Code of Practice which makes clear that, with effect from 1 April 2004, and six months ahead of target, all three-year-olds are entitled to receive a free part-time place for at least six terms prior to compulsory school age. Croydon council has yet to confirm that all three-year-olds will receive that entitlement in full. I have asked my officials to investigate the matter and to work closely with the local authority officials to ensure that parents and children in Croydon are able to benefit fully from the free entitlement.

Information Technology Training

Mr. Meacher: To ask the Secretary of State for Education and Skills how many women in Oldham, West and Royton have visited an information and communications technology training centre in order to learn skills to return to work. [170929]

Mr. Charles Clarke: In the period October 2003[1]—March 2004, 1,717 people visited a UK online centre in Oldham, West and Royston, 962 (56 per cent.) of these people were women. Since learndirect was launched in 1999, 2,931 people from Oldham, West and Royton have enrolled on a learndirect course. 1,634 (56 per cent.) of these people were women. Of the total number of women who enrolled on a course 8 per cent. did so in order to learn skills to return to work.

[1] Please note the complete statistics are not available for UK online prior to September 2003 as the DfES did not collect this data on a centre-by-centre basis.

Mr. Meacher: To ask the Secretary of State for Education and Skills how many people in Oldham West and Royton have received a computer to assist in seeking employment or retraining. [170930]

Mr. Charles Clarke: At present no centrally funded schemes exist which provide people with a free or low cost computer to assist in seeking employment or retraining.

Mr. Benton: To ask the Secretary of State for Education and Skills how many women in Bootle have visited an information and communications technology training centre in order to learn skills to return to work. [171124]

Mr. Charles Clarke: Seven Capital Modernisation Funded UK online centres have been established in Bootle.

Mr. Benton: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Bootle. [171125]

Mr. Charles Clarke: Seven Capital Modernisation Funded UK online centres have been established in Bootle.

Learning Disabilities

Paul Holmes: To ask the Secretary of State for Education and Skills how many children with learning disabilities are educated in mainstream schools; and if he will make a statement. [170608]

Margaret Hodge: The provisional figures from the pupil level annual schools census for January 2004, published on 29 April, show that 148,200 pupils with statements of Special Educational Needs are being educated in maintained mainstream nurseries, primary schools or secondary schools.

The provisional figures also show that 1,137,600 pupils with SEN but without statements are being educated in maintained mainstream nurseries, primary schools and secondary schools.

Section 312 of the Education Act 1996 states that children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them.

Local Authority Care (Children)

Tim Loughton: To ask the Secretary of State for Education and Skills how many *(a)* boys and *(b)* girls are looked after by local authorities (i) in total, (ii) in foster care and (iii) in children's homes. [169040]

Margaret Hodge: The information requested is provided in the table as follows.

Number of children looked after in total, in foster placements and in children's homes at 31 March 2003, by gender

Number of Children Looked After at 31 March 2003[1]	*Boys*	*Girls*	*Total*
England	33,600	27,200	60,800
Foster Placements	22,000	19,100	41,100
Children's Homes[2]	4,300	2,400	6,600
Other Placements[3]	7,300	5,800	13,100

[1] Figures exclude children looked after under an agreed series of short term placements

[2] Children's homes include secure units, homes and hostels but excludes residential schools.

[3] Includes children who are placed for adoption, with parents and in residential schools. Also includes those living independently or in residential employment and other accommodation.

Source:
Children Looked After by Local Authorities, Year Ending 31 March 2003

Medical Students

Mr. Clappison: To ask the Secretary of State for Education and Skills how many students who are aged under 21 years and have less than the equivalent of three grade Cs at A level he expects to be recruited for courses leading to registration with the General Medical Council and subsequent practice as a doctor in *(a)* the academic year 2004–05 and *(b)* subsequent years. [168186]

Alan Johnson: The information is not held centrally. Admission of students to medical, and other, courses is a matter for individual institutions. However, latest figures from the Higher Education Statistics Agency show that, of those students aged under 21 with A levels entering undergraduate courses in Pre-clinical medicine in 2002/03, only 95 (or 3 per cent.) had A level tariff scores equivalent to less than 3 grade Cs.

National Childcare Strategy

Paul Holmes: To ask the Secretary of State for Health how many childcare staff have been employed through the National Childcare Strategy to support disabled children; and if he will make a statement. [170609]

Margaret Hodge: We do not collect information in the form requested. All childcare settings in receipt of funding for nursery education are required to appoint a Special Educational Needs Co-ordinator (SENCO) whose role is to support children with disabilities or special needs and to advise other staff in the setting.

Parliamentary Questions

Mr. Clappison: To ask the Secretary of State for Education and Skills when he will reply to the questions tabled by the hon. Member for Hertsmere *(a)* on 20 April, references (i) 168185, (ii) 168186, (iii) 168202, (iv) 168203 and (v) 168204 and *(b)* on 23 April, reference 168913. [172362]

Alan Johnson: I have issued a response to the hon. Member's question 168186 today. Responses were provided to 168185 on 6 May 2004, *Official Report*, column 1767w and 168202,168203 and 168204 on 10 May 2004, *Official Report*, columns 37–38w.

Pupils (Continence Problems)

Dr. Murrison: To ask the Secretary of State for Education and Skills what psychological support is available in schools to help children with continence conditions. [171135]

Margaret Hodge: The joint DfES/Department of Health guidance, "Supporting Pupils with Medical Needs: A Good Practice Guide", is designed to help schools draw up policies on managing medication in schools and to put effective systems in place to support individual pupils with medical needs.

Individual schools are best placed to decide on arrangements to meet the needs of their pupils and may decide that a counselling service, for example, would best serve the interests of a child experiencing anxiety or depression as a result of continence difficulties. Children may also receive help from specialist mental health professionals, many of whom will be located within the Child and Adolescent Mental Health Service.

Reading

Mr. Amess: To ask the Secretary of State for Education and Skills what action his Department is taking to promote reading in schools; and if he will make a statement. [169930]

Mr. Stephen Twigg: The Government is committed to raising standards of reading in our schools and to promoting an enjoyment of reading among young people.

The National Literacy Strategy has transformed standards of reading in our primary schools. This was confirmed by the publication last year of the 'Progress in International Reading Literacy Study', which reported that England's 10 year olds achieved the third highest standards of reading in the world. It also reported that the literacy strategy had introduced primary school pupils to a wider range of reading texts and that pupils in England had the highest use of real books and reading schemes in the classroom.

Building on this improvement is a key aim of our strategies for primary and secondary schools and we are also working closely with the National Literacy Trust on a range of activities to encourage children to read for pleasure.

School Computers

David Davis: To ask the Secretary of State for Education and Skills what the computer to pupil ratio is in *(a)* primary schools and *(b)* secondary schools in the East Riding of Yorkshire. [171785]

Mr. Charles Clarke: The information requested is not available centrally. Figures for England, which were derived from a sample of schools, are shown in the table. Average number of pupils[1] per computer (used solely or mainly for teaching and learning purposes) by type of school in England (year ending March 2003).

Maintained schools

	Primary	*Secondary*
2003	7.9	5.4

[1] Full-time equivalent numbers of pupils

The latest information on ICT in schools was published in Statistical Bulletin 'Survey of Information and Communications Technology in Schools 2003', which is available on my Department's website www.dfes.gov.uk/rsgateway/.

School Standards

Mr. Meacher: To ask the Secretary of State for Education and Skills (1) how many and what percentage of pupils in Oldham West and Royton reached the *(a)* mathematics and *(b)* English standard in each of the last seven years; [170921]

(2) how many and what percentage of 11 year old pupils in Oldham West and Royton reached level four in *(a)* mathematics and *(b)* English in each of the last seven years. [170922]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member for Westmorland and Lonsdale (Mr. Collins) on 10 May 2004, *Official Report*, column 34W.

Mr. Neil Turner: To ask the Secretary of State for Education and Skills (1) how many and what percentage of pupils in Wigan have reached the *(a)* mathematics and *(b)* English standard in each of the last seven years; [169285]

(2) how many and what percentage of eleven year olds in Wigan reached level four in *(a)* mathematics and *(b)* English in each of the last seven years. [169286]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member for Westmorland and Lonsdale (Mr. Collins)on 10 May 2004, *Official Report*, column 34W.

School Transport (London)

Simon Hughes: To ask the Secretary of State for Education and Skills how many children have used home to school transport in Greater London, in each of the last five years, broken down by local education authority. [170500]

Mr. Charles Clarke: The information requested is not collected by my Department. However, a joint survey conducted in 2003 by the Confederation of Education Service Managers (ConfEd) and DfES into the number of pupils receiving free home to school transport in 2001/02 is reported in the following table:

LEA number	*LEA name*	*Pupils[1] receiving free home-school transport (2001/02)*
201	City of London	38
202	Camden	680
203	Greenwich[2]	0
204	Hackney[2]	0
205	Hammersmith and Fulham	253
206	Islington	111
207	Kensington and Chelsea	610
208	Lambeth	1,585
209	Lewisham	1,636
210	Southwark[2]	0
211	Tower Hamlets	688
212	Wandsworth	440
213	Westminster[2]	0
301	Barking and Dagenham[2]	0
302	Barnet	1,741
303	Bexley	1,005
304	Brent	697
305	Bromley[2]	0
306	Croydon[2]	0
307	Ealing	2,151
308	Enfield	1,758
309	Haringey[2]	0
310	Harrow[2]	0
311	Havering	1,250
312	Hillingdon	2,342
313	Hounslow	480
314	Kingston upon Thames	843
315	Merton[2]	0
316	Newham	446
317	Redbridge	2,916
318	Richmond upon Thames	644
319	Sutton	1,459
320	Waltham Forest	476
Total		24,249

[1] Primary, secondary, special school and other pupils.

[2] Did not respond.

Solvent Abuse

Tim Loughton: To ask the Secretary of State for Education and Skills which projects dealing with solvent abuse among children have been awarded funding from the Children's Fund; and how much was awarded to each. [169060]

Margaret Hodge: The Department does not directly monitor the number of projects in receipt of Children's Fund which deal with solvent abuse. Of the 4,665 projects in receipt of Children's Fund in the period July to September 2003 (the most recent period for which complete data is available) 398 were for services that worked in areas involving substance misuse. Other projects will work to educate and support children, young people and their families about the misuse of a range of substances, which in many cases will include solvents.

With regard to the funding that each of these projects receives, this information could be obtained only at disproportionate cost and so is not included in this reply.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how much money has been allocated to schools in Stockton South for information and communication technologies since 2001. [171457]

Mr. Charles Clarke: My department does not hold information on school level allocations for information and communication technologies. However, Stockton South is in Stockton-on-Tees and since 2001 schools in Stockton-on-Tees have benefited from the following funding through the Standards Fund grant for ICT (including match funding from the LEA):

	Allocation to Stockton-on-Tees LEA (£)
2001–02	921,142
2002–03	1,308,008
2003–04	1,333,573
2004–05	1,745,924

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many women in Stockton South have visited an information and communications technology training centre in order to learn skills to return to work. [171458]

Mr. Charles Clarke: In the period October 2003[1]—March 2004, 4,848 people visited a UK online centre in the Stockton South constituency. 2,714 (56 per cent.) of these people were women.

Since learndirect was launched in 1999, 3,819 people from the Stockton, South constituency have enrolled on a learndirect course. 1,441 (38 per cent.) of these people were women. Of the total number of women who enrolled on a course, 8 per cent. did so in order to learn skills to return to work.

[1] Please note the complete statistics are not available for UK online prior to September 2003 as the DfES did not collect this data on a centre-by-centre basis.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Stockton, South. [171459]

Mr. Charles Clarke: 12 Capital Modernisation Funded UK online centres have been established in Stockton South.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many and what percentage of 11 year old pupils in Stockton South reached level four in *(a)* mathematics and *(b)* English in each of the last seven years. [171472]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member for Westmorland and Lonsdale (Mr. Collins) on 10 May 2004, *Official Report*, column 34W.

Sure Start

Tony Cunningham: To ask the Secretary of State for Education and Skills what plans he has further to develop Sure Start programmes in the Workington constituency, with particular reference to rural areas. [171618]

Margaret Hodge *[holding answer 10 May 2004]:* Local authorities are currently developing children's centres as the next phase in the Government's strategy to deliver better outcomes for children and families. Funding has been allocated to Cumbria county council to develop children's centres in their 20 per cent. most disadvantaged wards by March 2006, building on existing Sure Start local programmes and other provision. The local authority has determined the location of its children's centres. In the Workington constituency, one major new children's centre will be established in Workington. Children's centres are also being developed from the existing Sure Start West Allerdale rural local programme based around Maryport town and from the existing North Allerdale mini rural Sure Start covering Aspatria and Silloth. Both of these children's centres will continue to serve rural areas within the Workington constituency.

Child Care (West Lancashire)

Mr. Pickthall: To ask the Secretary of State for Education and Skills how many childcare places have been created in West Lancashire since 1997. [171491]

Margaret Hodge: The Department is unable to provide details of childcare places for West Lancashire. However, from April 1999 to March 2004, Lancashire local authority created 22,581 new childcare places helping some 39,808 children. This shows an increase in the stock of childcare places, taking into account turnover, of 9,826, helping some 17,631 children.

HEALTH

Drug Treatment

Mr. Neil Turner: To ask the Secretary of State for Health how many people in Wigan are receiving drug treatment. [169339]

Miss Melanie Johnson: In 2000–01, there were 882 people receiving drug treatment in Wigan. This is the latest data available. Data broken down by drug action team for 2001–02 and 2002–03 has not yet been published.

Abortions

Mr. Amess: To ask the Secretary of State for Health how much was spent on medical instruments which are used in abortions in each year since 1994; and if he will make a statement. [169935]

Ms Rosie Winterton: This information is not held centrally.

Anaesthetists

Mr. Alan Campbell: To ask the Secretary of State for Health how many anaesthetists have been employed in the NHS in each of the last five years. [170429]

Mr. Hutton: The information requested is shown in the table.

Hospital, Public Health Medicine and Community Health Services (HCHS): Staff with a specialty in Anaesthetics

numbers (headcount)

	1998	*1999*	*2000*	*2001*	*2002*	*2003*	*December 2003* [1]
All Staff	6,731	6,939	7,178	7,517	8,056	8,511	n/a
of which: Consultants	2,955	3,136	3,293	3,549	3,822	4,053	4,127

[1] All data as at 30 September each year, except for 2003 December where data is at 31 December.
n/a—not applicable.
Source:
Department of Health medical and dental workforce census.

The number of consultant anaesthetists increased by 1,172, or 40 per cent, between September 1998 and December 2003.

Barnet and Chase Farm NHS Trust

Mr. Dismore: To ask the Secretary of State for Health if he will make a statement on the financial position of Barnet and Chase Farm NHS Trust. [169782]

Mr. Hutton: Unaudited information on in-year financial forecasts is subject to exemption two of the code of practice on access to Government information. The audited information in respect of the 2003–04 financial position of all national health service trusts will be published in their individual annual accounts and will be available centrally in autumn 2004.

Cancer

Mr. Burstow: To ask the Secretary of State for Health when his Department plans to repeat the NHS cancer patients survey; and if he will make a statement. [169716]

Miss Melanie Johnson: The responsibility for carrying out future patient surveys now rests with the Commission for Healthcare Audit and Inspection. The

Commission is looking at a number of factors before deciding when the next cancer patient survey will take place.

The recently published secondary analysis of the cancer patient survey to identify variations within and between trusts on various cancer types will be used to inform plans for any future surveys. Copies of the report are available in the Library, and on the Department's website.

In addition to this work, the National Audit Office (NAO) will be publishing a report later in 2004 on improving the patient experience of cancer services in England. As part of this study the NAO have carried out a cancer patient survey. This report forms part of a suite of three NAO studies on the delivery of cancer services. The first of these studies 'Tackling Cancer in England—Saving More Lives' was published on 19 March 2004.

Cancer Services

Bob Spink: To ask the Secretary of State for Health what plans he has to resolve the patient pathway delays for cancer patients identified by the National Audit Office in its recent report on cancer services. [163987]

Miss Melanie Johnson: I refer the hon. Member to the response I gave to my hon. Friend the Member for Norwich, North (Dr. Gibson), today.

Cancer Treatment

Dr. Gibson: To ask the Secretary of State for Health (1) what measures he is taking to encourage patients to seek medical attention when they have suspicious symptoms which may be cancer; and if he will make a statement; [164232]

(2) what plans he has to extend the national cancer clinical audits to all major cancers; [164238]

(3) what plans he has to ensure that each general practitioner receives a copy of the updated referral guidelines for patients with suspected cancer when they are published; [164233]

(4) what plans he has to ensure that waiting times for radiotherapy are monitored at the local level using standardised national measures; [164234]

(5) what plans he has to develop a mechanism to audit the time taken for assessment and treatment of patients who are referred routinely by general practitioners and subsequently diagnosed with cancer; [164236]

(6) if the Department of Health will issue guidance to primary care trusts on the provision and role of administrative support for multi-disciplinary teams providing cancer services; [164237]

(7) if extra resources will be made available to hospitals providing radiotherapy and radiology services in order to assess local need for extra staff and facilities. [164240]

Miss Melanie Johnson: The primary purpose of the national health service cancer plan is to save more lives. Reducing waiting times is key to achieving this. The ultimate goal in the NHS Cancer Plan is to offer patients a maximum one-month wait from an urgent referral for suspected cancer to the beginning of treatment. Where patients wait longer, this should be because of the needs of the diagnostic process or their personal choice, not because of in-built delays in the system of care. We hope to achieve this goal by 2008. There is a series of milestones towards this goal: By 2005, there will be a maximum one-month wait from diagnosis to treatment for all cancers. By 2005, there will be a maximum two-month wait from urgent general practitioner referral to treatment for all cancers.

Progress towards these targets is being achieved through increased investment, additional staff working in new ways, installing new radiotherapy and diagnostic facilities and streamlining of cancer care pathways for all cancer patients through the cancer services collaborative 'Improvement Partnership'.

The Department will take the National Audit Office report's recommendations into account as we further develop and improve cancer services. The report will be discussed in detail at a Committee of Public Accounts hearing scheduled for 16 June 2004. Sir Nigel Crisp, chief executive of the NHS and Professor Mike Richards, national cancer director, have been called to give evidence at the hearing. The government will respond to the Committee's subsequent report in the form of a Treasury Minute.

Chest Pain Clinics

Mr. Benton: To ask the Secretary of State for Health how many rapid access chest pain clinics there are in Bootle. [170074]

Miss Melanie Johnson: There is no rapid access chest pain clinic in Bootle. There is a rapid access chest pain clinic located at Aintree Hospitals National Health Service Trust.

Children (Chronic Illness)

Tim Loughton: To ask the Secretary of State for Health how many children developed type II diabetes in each year since 1998. [169476]

Ms Rosie Winterton: This information is not collected centrally.

Tim Loughton: To ask the Secretary of State for Health in what ways the National Service Framework for chronic conditions will specifically address children with chronic illness. [169480]

Dr. Ladyman: The national service framework (NSF) for long term conditions will aim to improve the standard of services for people with neurological conditions and also address some of the common issues that can promote independence for people living with a disability or long term condition. The NSF will focus on people of working age but will also look at ensuring people can move smoothly between different services regardless of their age or if they move to another geographical area.

The NSF for children, young people and maternity services will address the needs of all children, young people, pregnant women and families. It will set standards covering a broad range of services, including the management of chronic conditions.

Tim Loughton: To ask the Secretary of State for Health what percentage of children are needle phobic; and what estimate he has made of the percentage of children who would take-up a needle-free insulin delivery system. [169484]

Ms Rosie Winterton: The research suggests that in children and young people with diabetes the prevalence of self-reported needle phobia is around 10 per cent.. The take up of needle-free insulin delivery systems would depend on their suitability for use by the individual involved.

Chronic Dehydration (Children)

Mr. Burstow: To ask the Secretary of State for Health if he will estimate the prevalence of chronic dehydration amongst children; and if he will make a statement. [169705]

Dr. Ladyman: Information on the prevalence of this condition is not collected centrally. The importance of children having access to a wholesome supply of drinking water is recognised in guidance relating to schools, and within advice issued by the Department on nutrition and maintaining a healthy life style.

Conference Attendance

Mr. Burnett: To ask the Secretary of State for Health how many *(a)* days and *(b)* half-days were spent by NHS staff attending conferences in each year since 1996–97, broken down by (i) clinicians and (ii) non-clinicians. [169459]

Mr. Hutton *[holding answer 29 April 2004]:* The Department does not hold this information centrally.

Continuing Care Eligibility Criteria

Mr. Burstow: To ask the Secretary of State for Health pursuant to the answer of 19April, *Official Report*, column 180W, on eligibility criteria, how many individual cases were granted recompense. [169721]

Dr. Ladyman: The Department expects to make information on the number of cases granted recompense available in due course.

Coronary Angioplasty

Mr. Moss: To ask the Secretary of State for Health what the cost of a coronary angioplasty was in each NHS hospital trust in England in the latest period for which figures are available. [168595]

Miss Melanie Johnson: The information requested has been placed in the Library.

Demographics

Mr. Dismore: To ask the Secretary of State for Health (1) what assessment he has made of the likely impact on health services in Hendon *(a)* generally and *(b)* with reference to Edgware hospital of the expected population growth in (i) Barnet, (ii) Harrow and (iii) Brent; and if he will make a statement; [169783]

(2) what changes he expects in the number of patients requiring health services in Hendon over the next 10 years; and if he will make a statement. [169798]

Mr. Hutton: The responsibility for determining local need for health services in Hendon lies with Barnet Primary Care Trust (PCT).

Barnet PCT is carrying out a health impact assessment on the projected increases in population, which will inform decisions about local services including those provided at Edgware hospital.

Dentistry

Tim Loughton: To ask the Secretary of State for Health how many children under the age of 18 were given mercury fillings in England *(a)* in 2004 up to the latest date for which figures are available and *(b)* in each of the last five years. [169589]

Ms Rosie Winterton: The table shows the number of children under the age of 18 who were given mercury fillings in the general dental service (GDS) in England.

Number of individual children given mercury fillings in the GDS

Year ending March	*Number of individual children treated*
2000	528,193
2001	520,845
2002	510,202
2003	503,129
2004	494,257

Source:
Dental Practice Board

The figures do not includes mercury fillings given in other dental services such as the personal dental service, community dental services and hospital dental services.

Tim Loughton: To ask the Secretary of State for Health how many children aged under 18 years had the removal of wisdom teeth funded by the NHS in 2003–04. [169637]

Ms Rosie Winterton: The most recent information on the number of children aged under 18 years who had the removal of wisdom teeth funded by the national health service in 2003–04 in England and Wales is shown in the table. The figures cover patients treated in the general dental service, personal dental service and hospital dental service.

Number of patients aged under 18 who had a wisdom tooth extracted during the year ending March 2004

	Number of patients
General dental service or personal dental service patients	[1]2,047
Hospital dental service patients	[2]724

[1] In England and Wales 2003–04.
[2] In England 2002–03.
Source:
Dental Practice Board and Hospital Episode Statistics.

The figures do not cover those patients treated in the community dental service.

Elective Admissions

Jim Dobbin: To ask the Secretary of State for Health if he will make a statement on the levels of elective admissions to the NHS in Heywood and Middleton in the past five years. [168493]

Miss Melanie Johnson: Information on the numbers of elective admissions to the relevant national health service trust is shown in the table.

Count of in-year elective admissions, 1998–99 to 2002–03 (admission method = 11,12,13) by provider North Manchester Healthcare NHS Trust, Oldham NHS Trust and Pennine Acute Hospitals NHS Trust

Provider	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
North Manchester Healthcare NHS Trust	21,450	24,409	24,519	24,782	—
Oldham NHS Trust	30,093	31,393	30,369	27,237	—
Pennine Acute Hospitals NHS Trust	—	—	—	—	83,193
Rochdale Healthcare NHS Trust	19,082	18,977	20,373	17,439	—
Bury Health Care NHS Trust	19,003	19,577	18,831	13,274	—

Note:
1. An in-year admission is the first period of in-patient care under one consultant within one healthcare provider, excluding admissions beginning before 1 April at the start of the datayear. Periods of care on-going at the end of the datayear (unfinished admission episodes) are included. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).

Source:
Hospital Episode Statistics (HES), Department of Health

Mr. Benton: To ask the Secretary of State for Health if he will make a statement on the levels of elective admissions to the NHS in Bootle in the past five years. [170075]

Miss Melanie Johnson: The information requested is not collected on a constituency basis but at national health service trust level. The information is shown in the table.

In year elective admission episodes 1998–99 to 2002–03

	Aintree Hospitals NHS Trust
1998–99	30,363
1999–00	31,063
2000–01	32,959
2001–02	32,437
2002–03	33,401

Notes:
Ungrossed Data:
Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).
In-year admissions:
An in-year admission is the first period of in-patient care under one consultant within one healthcare provider, excluding admissions beginning before 1 April at the start of the datayear. Periods of care ongoing at the end of the datayear (unfinished admission episodes) are included. Please note that admissions do not represent the number of in- patients, as a person may have more than one admission within the year.

Hospital Episode Statistics (HES), Department of Health.

Health Services

Mr. Benton: To ask the Secretary of State for Health if he will make a statement on NHS waiting times for heart surgery in Bootle. [169262]

Miss Melanie Johnson: In March 1997, there were 138 people waiting nine months, and 40 people waiting over 12 months, for heart surgery at the cardiothoracic centre—Liverpool National Health Service Trust. The latest available figures show that, in February 2004, there were no people waiting nine months and over for surgery.

Mr. Benton: To ask the Secretary of State for Health whether there is a diagnostic and treatment centre located in Bootle. [169266]

Miss Melanie Johnson: There is no treatment centre in Bootle. A treatment centre is located at the Aintree Hospital National Health Service Trust.

Mr. Benton: To ask the Secretary of State for Health how many NHS *(a)* therapists and *(b)* scientists were located in Bootle in each of the last seven years. [170538]

Miss Melanie Johnson: The information requested is shown in the table.

NHS hospital and community health services: Qualified scientific, therapeutic and technical staff in each specified organisation as at 30 September each specified year

	South Sefton PCT	*Aintree Hospitals NHS Trust*	*Headcount Total*
1997	n/a	393	393
1998	n/a	415	415
1999	n/a	470	470
2000	n/a	500	500
2001	n/a	507	507
2002	19	482	501
2003	19	555	574

n/a = Not applicable.

Source:
Department of Health Non Medical Workforce Census.

Mr. Benton: To ask the Secretary of State for Health (1) how many senior citizens in Bootle aged over 60 years have benefited from the abolition of charges for eye tests; [170539]

(2) how many senior citizens in Bootle have access to free eye tests. [170540]

Miss Melanie Johnson: Data for the number of sight tests by constituency or by the number of senior citizens is not collected centrally.

The total number of sight tests paid for by Cheshire and Merseyside Strategic Health Authority in the year 2002–03 for the aged 60 and over category was 201,180. The total number eligible for a free sight test for those aged 60 and over was 507,080. Sight tests cannot be equated to the number of patients.

Mr. Djanogly: To ask the Secretary of State for Health how many NHS *(a)* doctors and *(b)* nurses there were in the Huntington constituency in each of the last seven years; and if he will make a statement. [170852]

Dr. Ladyman: Information on the number of doctors and nurses in the Huntington constituency in each of the last seven years has been placed in the Library.

Nationally, more staff are returning to the NHS:

With over 3,000 nurses and midwives in training since 1999.

With over 15,800 former nurses, midwives and health visitors returned since 1999.

With over 3,600 expressions of interest in the flexible careers scheme.

Golden hello scheme—3,500 beneficiaries since April 2001.

Simon Hughes: To ask the Secretary of State for Health what the average general practitioner list size was in Greater London, broken down by national health service trust, in each of the last 10 years. [170506]

Mr. Hutton: Information on the average list sizes in London has been placed in the Library. Information by primary care trust is only available from 2001.

Mr. Alan Campbell: To ask the Secretary of State for Health what the level of funding for sexual health services in North Tyneside was in each year since 1997. [170422]

Miss Melanie Johnson: This information is not collected centrally.

Funding is allocated to primary care trusts on the basis of the relative needs of their populations. It is for primary care trusts in partnership with strategic health authorities and other local stakeholders to determine how best to use their funds to meet national and local priorities for improving health, tackling health in equalities and modernising services.

Mr. Alan Campbell: To ask the Secretary of State for Health how many *(a)* private dentists and *(b)* NHS dentists there are in North Tyneside; and if he will make a statement. [170423]

Miss Melanie Johnson: Information on the number of dentists in North Tyneside who are working wholly privately is not available.

The table shows the number of primary care national health service dentists in North Tyneside.

National health service: Number of dentists in North Tyneside as at 30 September 2003

Primary Care Trust	Number of Dentists: General Dental Service	Personal Dental Service	Community Dental Service
North Tyneside PCT	62	5	2

Notes:

1. GDS dentists are dentists whose main work is in North Tyneside. PDS dentists exclude dentists already counted as GDS dentists.
2. Dentists in the General Dental Service include Principals, Assistants and Vocational Dental Practitioners. These figures are on a headcount basis rather than whole time equivalent (wte) basis and therefore take no account of part-time working.
3. These figures exclude 127 dentists working in the Hospital Dental Service in Newcastle upon Tyne Hospitals Trust, which covers a wider area than North Tyneside.

Source:

Dental Practice Board and Department of Health medical and dental workforce census.

Mr. Alan Campbell: To ask the Secretary of State for Health how many pensioners living within the North Tyneside Primary Care Trust area benefited from free eye tests in *(a)* 2002 and *(b)* 2003. [170424]

Miss Melanie Johnson: Data for the number of sight tests by constituency or by the number of senior citizens is not collected centrally.

The total number of sight tests paid for by Northumberland, Tyne and Wear strategic health authority in the year 2002–03 for those aged 60 and over was 50,860. *Source:*

Department of Health Statistics.

Mr. Neil Turner: To ask the Secretary of State for Health how much public funding has been spent on health in Wigan in each of the last seven years. [169353]

Miss Melanie Johnson: The information is not available in the format requested. Expenditure per weighted head in the Greater Manchester Strategic Health Authority (SHA) area, which includes the constituency of Wigan, has increased from £582.33 in 1997–98 to £992.61 in 2002- 03, the latest year available. This does not represent the total expenditure per head as an element of health expenditure cannot be identified by SHA area.

Healthy Living Centres

Mr. Alan Campbell: To ask the Secretary of State for Health how many healthy living centres *(a)* have been built, *(b)* are being built and *(c)* are planned. [170416]

Miss Melanie Johnson: Healthy living centres (HLCs) all vary in the approaches that they use and the settings in which they work. In some cases, the HLC will be a building, but in others it will be a network with a range of projects taking place in a number of different locations within a neighbourhood.

Of the 257 HLCs in England, 54 schemes have received capital grants for building. Of these, 26 have been built, 17 are in the process of being built and 11 are planned.

Mr. Alan Campbell: To ask the Secretary of State for Health what has been the total cost to date of healthy living centres. [170418]

Miss Melanie Johnson: In total, £300 million was made available by the New Opportunities Fund for healthy living centres across the United Kingdom, of which £233 million was for England.

To date, 257 awards, worth £204 million, have been made in England.

Mr. Alan Campbell: To ask the Secretary of State for Health how many healthy living centres are run directly by local authorities. [170419]

Miss Melanie Johnson: Healthy living centres have been established as a partnership between a range of different organisations.

Sixty six healthy living centres in England are led by local authorities (LAs). LAs are listed as partner organisations in 210 of the 257 healthy living centres in England.

Hospital Land Sales

Mr. Dismore: To ask the Secretary of State for Health what his policy is toward land sales of sites at *(a)* Edgware hospital and *(b)* Colindale hospital; and what assessment he has made of the implications for such sales of (i) anticipated population growth, (ii) changes in demand for car parking at Edgware hospital and (iii) the availability of affordable housing in the area (A) generally and (B) for key workers. [169764]

Mr. Hutton: The responsibility for disposal of land at Edgware hospital and Colindale hospital lies with Barnet Primary Care Trust (PCT), and with Barnet, Enfield and Haringey Mental Health Services National Health Service Trust respectively. In accordance with long-term local plans the PCT and the Barnet, Enfield and Haringey Mental Health Services NHS Trust are disposing of surplus land at Colindale and Edgware hospitals. The land sales are being managed locally to ensure the need of the local NHS are met. The PCT and the Barnet, Enfield and Haringey Mental Health Services NHS Trust will take into account the identified factors in disposing of land and any requirements of the local authority in terms of affordable housing.

Human Embryos

Jim Dobbin: To ask the Secretary of State for Health whether an application for a licence to create human embryos by cell nuclear replacement has been submitted to the Human Fertilisation and Embryology Authority. [169473]

Miss Melanie Johnson: From 7 May 2004, the Human Fertilisation and Embryology Authority (HFEA) will publish the titles and lay summaries of research licence applications on its website.

The HFEA has received one application for a licence to create human embryos by cell nuclear replacement. The title and lay summary are as follows:

Title—Derivation of human embryonic stem cell lines using nuclear transfer and parthenogenically activated oocytes.

Centre—Newcastle Fertility Centre at Life.

Lay summary—It is recognised that human embryonic stem cells offer a great potential for therapies for many diseases such as diabetes. These stem cells are derived from embryos which are created for in-vitro fertilisation treatment, but which are not suitable for treatment. If stem cell treatments are to reach their full potential we need to derive stem cell lines which are genetically similar to the recipient so they will not be rejected. This may require the application of techniques such as nuclear transfer and parthenogenic activation. Nuclear transfer involves the transfer of genetic material from adult skin cells to eggs which have had the cell's nucleus removed. Parthenogenic activation involves an egg being artificially stimulated by chemical or electronic means in order to make the egg start embryo development. The present application is to undertake some of the initial studies that are needed to understand methods that will develop this technology.

Mental Health Provision

Simon Hughes: To ask the Secretary of State for Health how many *(a)* consultant psychiatrists, *(b)* mental health nurses and *(c)* primary care mental health workers are employed in each Greater London NHS trust; and how many of these work (i) part time and (ii) full time. [168939]

Mr. Hutton: The information requested has been placed in the Library.

Mobile Phones

Mr. Watson: To ask the Secretary of State for Health pursuant to his Answer of 21 April 2004, *Official Report*, column 646W, on mobile phones, if he will evaluate the research on the dielectric property of cells by Bo Sernelius of Linkoping University, Sweden. [170176]

Miss Melanie Johnson: The paper by Bo Sernelius is a recent contribution to the scientific literature and is a theoretical study. It is one of many papers appearing in scientific journals that may have relevance either directly, or as in this case indirectly, to understanding the interaction of radiofrequency electromagnetic fields with people.

The author of the paper considers the findings indicate the need for further work on the measurement of dielectric properties of materials and specifically cautions against interpreting the findings of the study as evidence that mobile phones are harmful.

The publication of work such as this emphasises the need for continuing research and evaluation into the possible health effects of mobile phone technology. This paper and others will continue to be considered by expert review groups such as the National Radiological Protection Board's independent advisory group on non-ionising radiation, which authored the most recent review of the subject in January 2004.

National Service Frameworks

Mr. Waterson: To ask the Secretary of State for Health if he will make a statement on progress towards the National Service Framework milestone for strategic and operational plans to include the development of an integrated falls service. [170628]

Dr. Ladyman: I refer the hon. Member to the response I gave to my hon. Friend the Member for Forest of Dean (Diana Organ) today.

Neonatal Intensive Care

Tim Loughton: To ask the Secretary of State for Health how many intensive care beds for newborn babies are operational in each hospital trust in England. [169054]

Dr. Ladyman: This information requested has been placed in the Library.

NHS Staff (Assaults)

Helen Jones: To ask the Secretary of State for Health how many NHS trusts have *(a)* met the targets for reducing assaults on staff, *(b)* failed to meet those targets and *(c)* reported an increase in such assaults in the latest period for which figures are available. [169462]

Mr. Hutton *[holding answer 4 May 2004]:* A Health Circular issued in 1999, entitled Working Together, required health bodies to have systems in place to record incidents of violence and aggression against national health service staff and set targets for reducing violence and aggression by 20 per cent. by 2001 and by 30 per cent. by 2002. These targets were incorporated in the Improving Working Lives standard in October 2000.

As part of the Working Together initiative, the Department undertook a national survey to identify the reported incidents of violence and aggression. The first survey, conducted in 2000–01, identified 84,214 incidents. The following survey, conducted in 2001–02, showed an increase on the previous year to 112,000 incidents.

Figures from the Department for 2002–03 show a three per cent. increase in reported incidents to 116,000 on the previous year.

The National Health Service Security Management Service (SMS) assumed policy and operational responsibility for the management of security in the NHS in April 2003. This remit includes work previously carried out under the NHS Zero Tolerance campaign. In November 2003, the SMS introduced a new framework for tackling violence against NHS staff, including consistent definitions of physical and non-physical assault and a national reporting system for physical assaults. The SMS is currently developing robust methodologies to identify the true nature and scale of the problem of violence—to measure both the perception as well as the reality.

Helen Jones: To ask the Secretary of State for Health what steps he is taking to reduce the number of assaults on NHS staff who work in clients' homes; and if he will make a statement. [169463]

Mr. Hutton *[holding answer 4 May 2004]:* The national health service Security Management Service (SMS) assumed policy and operational responsibility for the management of security in the NHS in April 2003. This remit includes work previously carried out under the NHS "Zero Tolerance" campaign.

In November 2003, the SMS introduced a new framework for tackling violence against NHS staff. A number of key practical reactive and proactive measures were introduced, among which was the development and implementation of a national syllabus for conflict resolution training to be delivered to all NHS frontline staff, with the aim of giving them the necessary skills and expertise to defuse aggressive situations before they become violent incidents.

The new national reporting system for physical assaults will allow hard accurate information about the nature of the problem to be gathered and analysed for the first time so that further practical solutions can be developed and implemented.

The SMS is exploring how best technology and other interventions can be used to better protect staff, particularly those who work alone in the community. A device based on mobile phone technology is being trialled that is designed to allow the member of staff to covertly summons assistance when faced with a threatening situation and automatically transmit their location so that appropriate help can be given.

Helen Jones: To ask the Secretary of State for Health what estimate he has made of the number of assaults on NHS staff which take place *(a)* in clients' homes, *(b)* in isolated units and *(c)* at night. [169464]

Mr. Hutton *[holding answer 4 May 2004]:* Statistics on the number of assaults on national health service staff taking place in clients' homes, isolated units and at night have not been collated centrally.

The NHS Security Management Service (SMS) assumed policy and operational responsibility for the management of security in the NHS in April 2003. This remit includes work previously carried out under the NHS "Zero Tolerance" campaign.

In November 2003, the SMS launched a new national system for the reporting and recording of physical assaults. Part of its purpose is to gather hard accurate information about the nature of assaults on NHS staff so that appropriate solutions can be developed to minimise the risk of them reoccurring.

NHS Staff (Manchester)

Mr. Kaufman: To ask the Secretary of State for Health how many NHS *(a)* doctors and *(b)* nurses there were in Manchester, Gorton in each of the last seven years. [167383]

Miss Melanie Johnson: The information requested has been placed in the Library.

Northumbria NHS Trust

Mr. Alan Campbell: To ask the Secretary of State for Health what steps have been taken to improve accident and emergency services at hospitals within the Northumbria NHS Trust since 1997. [170420]

Miss Melanie Johnson: The following steps have been taken to improve accident and emergency services at Northumbria Healthcare:

Opening a rapid assessment and treatment unit.

Expansion of the A&E consultant team to 10 consultants at the North Tyneside General Hospital and Wansbeck General Hospital.

A major refurbishment and extension of the two A&E departments.

Opening of a dedicated minor injuries area.

Development of a dedicated emergency nurse practitioner services at both hospital sites.

Development of an emergency nurse practitioner services in community hospitals.

Introduction of care facilitators across the trust to reduce delays during hospital care and to help co-ordinate the patient's journey.

The emergency services collaborative has also helped to redesign systems and unnecessary steps out of the patient pathway. This is being continued under the Improving Partnership in Hospitals programme.

Osteoporosis

Diana Organ: To ask the Secretary of State for Health whether he expects the first National Service Framework osteoporosis milestone to be achieved by April. [169872]

Dr. Ladyman: The national service framework for older people requires integrated falls services to be in place locally by April 2005. This should include appropriate links to osteoporosis. The Department will be monitoring formally the 2005 milestone at strategic health authority (SHA) level as this is included as one of the key targets in Improvement, Expansion and Reform, the priorities and planning framework for 2003–06. All SHAs except one currently report that the April 2005 target will be achieved in their area. The Department has offered support to this SHA.

Pharmacy Services

John Cryer: To ask the Secretary of State for Health if he will place in the Library copies of responses to the consultation on proposals to reform and modernise the NHS (Pharmaceutical Services) Regulations 1992 in relation to the proposed exemption of large shopping developments from the control of entry requirements for retail pharmacy services. [157513]

Ms Rosie Winterton *[pursuant to her answer, 8 March 2004, Official Report, c. 1334W]:* I regret my previous response was incorrect. The number of responses to the Department's consultation on proposals to reform and modernise the NHS (Pharmaceutical Services) Regulations 1993 should have been 267.

Radiographers

Mr. Alan Campbell: To ask the Secretary of State for Health how many radiographers have been employed in the NHS in each of the last five years. [170430]

Mr. Hutton: The information requested is shown in the table.

NHS hospital and community health services: qualified radiographers in England as at 30 September each specified year

	Total qualified radiography staff	Diagnostic radiography[1]	Headcount Therapeutic radiography
1999	12,330	10,839	1,491
2000	12,489	11,036	1,453
2001	12,706	11,163	1,543
2002	13,031	11,489	1,542
2003	13,344	11,687	1,657

[1] New occupation codes for healthcare scientists were introduced in 2003. As a result, a small number of staff previously included under diagnostic radiography are now classified within medical physics.

Source:

Department of Health Non-Medical Workforce Census.

Serotonin

Paul Flynn: To ask the Secretary of State for Health how many prescriptions have been issued for selective serotonin reuptake inhibitors for *(a)* children and *(b)* adults in each of the last 10 years. [169897]

Ms Rosie Winterton: Information on the total number of prescription items of selective serotonin reuptake inhibitors (SSRIs) dispensed in the community in England and the estimated number of prescription items of SSRIs dispensed in the community in England to children and adults are shown in the table. Figures for the total number of SSRI items are provided for the last 10 years (1994 to 2003). However, the Department does not have information on the estimated numbers of prescription items dispensed to children or adults available before 1999.

Total number of prescription items of SSRIs, and estimated number of prescription items of SSRIs dispensed to children and adults which were dispensed in the community in England, 1994 to 2003

Total number of prescription items of SSRIs and estimated number of prescription items of SSRIs dispensed to children and adults which were dispensed in the community in England, 1994 to 2003

Thousand

	Total number of prescription items	Estimated number of prescription items dispensed to: Children	Adults
1994	2,681.2	[1]—	[1]—
1995	3,807.8	[1]—	[1]—
1996	5,136.0	[1]—	[1]—
1997	6,555.8	[1]—	[1]—
1998	7,581.6	[1]—	[1]—
1999	8,929.4	100	8,800
2000	10,442.5	110	10,000
2001	12,085.1	150	12,000
2002	13,304.0	170	13,000
2003	13,816.9	110	14,000

[1] Information for groups of patients not required to pay a charge (e.g. children) prior to 1999 is not available.

Notes:

1. PCA data covers all prescription items that were dispensed in the community in England. It does not include items dispensed in hospitals or private prescriptions.
2. Information for groups of patients not required to pay a charge (e.g. children) is based on a 1 in 20 sample of all exempt prescriptions dispensed in the community. The information for children and hence adults is therefore an estimate and subject to sampling errors. To reflect this the figures have been rounded appropriately. (Figures over 100,000 are rounded to the nearest 10,000. Figures over a million are rounded to the nearest 100,000, and figures over 10 million are rounded to the nearest million.) Rounding applies to exemption data only. The total number of SSRI prescriptions is an actual figure (not an estimate) and has not been rounded. The number of items dispensed to adults was estimated by subtracting the estimates for children from the total SSRI items. Hence, rounding also applies to the adults.
3. Due to rounding, the sum of the components may not equal the total items.
4. Data on exemption categories for SSRIs is only available from 1999. The exemption data for children and adults for 1999 and 2000 is not strictly comparable with data for 2001 onwards. Exemption data for children and adults from 2001 is based on a 1 in 20 sample of all exempt prescriptions dispensed by community pharmacists, appliance contractors and dispensing doctors. Exemption data for 1999 and 2000 is based on those dispensed by chemists and appliance contractors only and excludes those dispensed by dispensing doctors. No exemption figures for dispensing doctor for 1999 and 2000 are available but the figures presented are the best estimates of the total figure for children and adult prescriptions. This does not apply to the total number of SSRI prescription items—data for all years includes all items dispensed in the community (including dispensing doctors).
5. Children are defined here as children aged under 16 and young people in full-time education aged 16,17 or 18.

6. The exemption data is identified from the box ticked on the back of the prescription form and relies on the form being completed correctly which may not always be the case.
7. SSRIs are defined in the British National Formulary (BNF) paragraph 4.3.3.
8. Data in the table is in thousands.
9. Definition of prescription item: Doctors write prescriptions on a prescription form. Each single item written on the form is counted as a prescription item.

Source:
Prescription Cost Analysis (PCA) data from the Prescription Pricing Authority (PPA).

Waiting Lists

Mr. Benton: To ask the Secretary of State for Health what changes there have been to NHS waiting list times in the last seven years for the residents of Bootle. [170080]

Miss Melanie Johnson: Information most closely associated with place of residency is not collected on a constituency level, but at a health services commissioner level. The data in the tables is given for Sefton health authority for the period 1997–2002, and for South Sefton Primary Care Trust for 2003.

In-patient waiting lists by Commissioner for Bottle residents

								Waiting list in months	
	Quarter	Name	TWL	0–2[1]	3–5[1]	6–4[1]	9–11[1]	12–14[1]	15–17[1]
1996–07	4	Sefton HA	9,239	4,046	2,247	1,531	1,166	246	3
1997–08	4	Sefton HA	8,975	4,204	1,952	1,328	984	367	80

Written Answers to Questions

Wednesday 12 May 2004

CULTURE, MEDIA AND SPORT

Advisers/Consultants

Bob Spink: To ask the Secretary of State for Culture, Media and Sport how much her Department and its agencies and non-departmental public bodies spent on external consultants and advisors in each of the last three years. [171876]

Mr. Caborn: The use of external consultants and advisers over the period 2000 to 2003, the last full years of accounting, were as follows:

	£
2000–01	358,000
2001–02	693,000
2002–03	323,820

These figures include the Royal Parks Agency. The Department for Culture, Media and Sport has over 66 sponsored bodies and compiling the figures for them could be provided only at disproportionate cost.

Archaeological Sites

Mr. Allan: To ask the Secretary of State for Culture, Media and Sport what assessment she has made of the impact of the decision by the Crown Prosecution Service not to proceed with the case against Mr. Robert Duqueria for the alleged removal of objects from the scheduled site of Cunetio, Wiltshire on her strategy to protect archaeological sites in England; and if she will make a statement. [172212]

Estelle Morris: It is for the Crown Prosecution Service to determine whether any prosecutions are in the public interest and it judges each case on its individual merit. Through the Ancient Monuments and Archaeological Areas Act 1979 and the Treasure Act 1996, there is a framework of legislation in place to protect important heritage sites. I would expect those who operate in this area would do so in accordance with the law.

In addition, the recently expanded Portable Antiquities Scheme, through its network of Finds Liaison Officers, is designed to encourage closer working relations between archaeologists and metal detector users.

Bingo Hall Conversions

Mr. Grogan: To ask the Secretary of State for Culture, Media and Sport what estimate she has made of the number of bingo halls which occupy more than 10,000 sq ft and would be eligible to convert to a casino under the terms of the draft Gambling Bill. [172046]

Mr. Caborn: There is no central record of the total area which each licensed bingo club covers; but we have seen estimates that over half of the current total of about 700 clubs have a total area in excess of 10,000 sq ft. We indicated last August that, under the proposed Gambling Bill, the minimum size of the area set aside for table games in a new casino should be 5,000 sq ft. We are now looking again at that requirement in the light of the views of the Joint Scrutiny Committee on the Bill and the points made by interested bodies and individuals in commenting on the Bill proposals. It is, however, relevant to note that a 5,000 sq ft minimum table gaming area would entail a total casino size considerably in excess of that, particularly if the casino also wanted to provide bingo for its customers.

Early Retirement

Bob Spink: To ask the Secretary of State for Culture, Media and Sport how many employees in her Department took early retirement, and at what total cost, in the last financial year. [172185]

Mr. Caborn: In DCMS one employee was granted approved early retirement terms in the financial year 2003–04 at a cost of £9,361. In addition, two employees were awarded compensation payments at a cost of £61,887.

Ice Hockey UK

Lady Hermon: To ask the Secretary of State for Culture, Media and Sport what assistance is provided by her Department to Ice Hockey UK. [172077]

Mr. Caborn: Ice Hockey is classified as an Olympic sport and as such funding decisions are a matter for UK Sport.

The top priority for UK Sport is the provision of support for those senior athletes/teams operating at a UK/GB level who have realistic chances of winning medals at the highest level (Olympic Games/World Championships within the current Olympic cycle).

UK Sport have informed us that in recent years, GB Ice Hockey has been unable to provide evidence that it can meet this criteria and has not, therefore, received support from UK Sport.

There is scope for developing talent via the home country Sports Councils but sports would be assessed against a number of criteria. Ice Hockey has not been deemed a priority at present by Sport England.

However, UK Sport does acknowledge that if GB athletes are to win medals in the Winter Olympics, in the longer term, some form of support needs to be provided. In recognition of this, UK Sport is in discussion with a number of partners, including an Olympic Winter Sports Group. Ice Hockey UK is represented on the Winter Olympic Sports Group.

Productivity

Bob Spink: To ask the Secretary of State for Culture, Media and Sport what her policy is for *(a)* increasing the productivity and *(b)* cutting the costs of (i) her Department and (ii) its agencies and non-departmental public bodies. [172190]

Mr. Caborn: I refer the hon. Member to the answer given to him by my hon. Friend the Financial Secretary to the Treasury on 10 May 2004, *Official Report*, columns 148–49W.

Regional Tourism

Mr. Borrow: To ask the Secretary of State for Culture, Media and Sport how much money has been spent on the digitisation of content in libraries in South Ribble since 1997. [172143]

Estelle Morris: This information is not held centrally.

The New Opportunities Fund £50 million Digitisation of Learning Materials Programme has delivered 150 projects across the UK to enable resources which support learning of all kinds held in libraries as well as museums, archives and other public-sector institutions, to be made available online through the People's Network and the National Grid for Learning. This initiative has created a body of material containing over 2 million images, tens of thousands of sound and video clips and documents and over 1,000 learning packages. All projects can be accessed via the EnrichUK portal at http://www.enrichuk.net.

Information on grants awarded to individual local authorities and their expenditure can be obtained from the relevant authority.

Mr. Borrow: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the work of regional development agencies in developing tourism in South Ribble. [172144]

Mr. Caborn: The North West Development Agency (NWDA) is working closely with the Lancashire and Blackpool Tourist Board, the nominated Destination Management Organisation (DMO) for Lancashire. The new DMOs are, in effect, smaller versions of tourist boards. They aim to ensure a strong visitor and market focus to all that is done within the region and strengthen the connection between businesses and other organisations in the tourism sector.

During 2003–04, the Lancashire and Blackpool Tourist Board received £275,000 from the agency's tourism budget for a variety of tourism marketing and development projects. South Ribble has also benefited from the agency's contribution of £60,000 during 2003–04 towards the construction of a visitor centre in Cuerden Valley Park.

Mr. Borrow: To ask the Secretary of State for Culture, Media and Sport how much money from the New Opportunities Fund was allocated to South Ribble in each year since 1997. [172153]

Estelle Morris: The New Opportunities Fund began making grants in 1999. The awards to South Ribble are shown in the table.

Financial year	*Amount (£)*
1999–2000	482,994
2000–01	273,735
2001–02	0
2002–03	0
2003–04	31,296

The information is freely available from the Department's searchable Lottery award database at www.lottery.culture.gsi.gov.uk, which uses information supplied by the Lottery distributors.

Sports Funding (Chorley)

Mr. Hoyle: To ask the Secretary of State for Culture, Media and Sport what grants are available to build *(a)* a running track and *(b)* rugby football and other sports stadia in Chorley; and what other assistance her Department can give to such projects in Chorley. [172332]

Mr. Caborn: Grants for the provision of sports facilities, including running tracks and sports stadia, are available through the following programmes: Community Club Development Programme and Active England, administered by Sport England; and the New Opportunities Fund for PE and Sport, administered by the New Opportunities Fund. In addition, grants are available to support football facilities through the Football Foundation.

Chorley Cricket Club has benefited from a Community Club Development Fund grant of £53,000 to provide cricket practice areas and nets.

Terrestrial Television (Wales)

Lembit Öpik: To ask the Secretary of State for Culture, Media and Sport how many households in Wales she estimates cannot receive a terrestrial television signal from the public service broadcasters. [172440]

Estelle Morris: The spectrum planners working for the Government's Digital Action Plan have been working to improve the accuracy of the planning tools used to derive both analogue and digital coverage. Until this work is compieted, OFCOM estimates that approximately 3 per cent. of households in Wales are unable to receive PSB services (excluding Five) via terrestrial means (analogue or digital).

Analogue coverage for Five is not available on a per country basis. According to figures given by Ofcom, 20 per cent. of UK households do not currently have access to Five in analogue form, although some of these will be able to receive it by digital terrestrial TV.

DEFENCE

Afghanistan

Mr. Battle: To ask the Secretary of State for Defence what the Government's response is to the recent request of the transitional Government in Afghanistan for extra military forces from NATO to ensure security; and if he will make a statement. [172050]

Mr. Ingram: The Afghan Transitional Authority holds ultimate responsibility for the security of the Afghan national elections due in September 2004. NATO's planned expansion of the International Security Assistance Force will, however, contribute to creating the security conditions within which free and fair elections may take place. As I explained to the

House on 31 March 2004, *Official Report*, column 96WS, we have offered to play a leading role in this expansion in Northern Afghanistan.

Army Air Corps (Medical Care)

Miss McIntosh: To ask the Secretary of State for Defence (1) what specialised diagnosis services are available to personnel based at *(a)* AAC Aldergrove, *(b)* AAC Hereford, *(c)* AAC Wattisham, *(d)* AAC Middle Wallop, *(e)* AAC Netheravon and *(f)* AAC Dishforth; [169988]

(2) what the average waiting time is for specialised diagnosis services available to personnel based at *(a)* AAC Aldergrove, *(b)* AAC Hereford, *(c)* AAC Wattisham, *(d)* AAC Middle Wallop, *(e)* AAC Netheravon and *(f)* AAC Dishforth. [169989]

Mr. Caplin: Specialised diagnosis services would require secondary care opinion that would normally be provided within the NHS, including those NHS Trusts which host Ministry of Defence Hospital Units. Waiting times would be based on clinical need and would vary depending on the type of specialised diagnosis required.

Cluster Bombs

Mr. Sarwar: To ask the Secretary of State for Defence if he will place a moratorium on the *(a)* use, *(b)* manufacture, *(c)* sale and *(d)* export of cluster bombs until new international law on the use and clearance of these weapons is introduced. [172024]

Mr. Ingram: No. Cluster bombs are legal weapons that are not indiscriminate. They provide a unique capability for use against wide area or dispersed targets. Were we not to use them, it would be necessary to use a large number of either unitary bombs or artillery shells to cover an equivalent area, involving a greater tonnage of explosive. Increasing the number of munitions launched also increases the risk that one or more launches may go astray. In many instances, using munitions other than cluster bombs may pose a far greater risk to civilians at the time of attack. Any applications for the export of cluster bombs would be considered on a case by case basis against criteria announced by the Foreign Secretary on 28 July 1997 and the EU Code of Conduct on Arms Sales.

Defence Medal Offices

Mr. Luff: To ask the Secretary of State for Defence to whom the legal title of the land occupied by the Droitwich Spa Army Medal Office belongs; and who would receive the proceeds of any sale of the site. [172034]

Mr. Caplin: The land was acquired on 30 March 1940 by 'The Commissioners of His Majesty's Works and Public Buildings'. Subsequent Government inter-departmental transfers culminated in the disaggregation of the Common User Estate by the Government's Property Holdings Unit in April 1996. This resulted in the land transferring (again on an inter-department basis) to the Ministry of Defence although technically the legal title remains with the successor to 'The Commissioners of His Majesty's Works and Public Buildings'. The proceeds of the disposal would fall to the MOD.

Mr. Luff: To ask the Secretary of State for Defence (1) if he will place in the Library a copy of the investment appraisal for the proposed closure of the Droitwich Spa Army Medal Office and the relocation of its services to RAF Innsworth; [172036]

(2) what the costs of upkeep and maintenance of the Army Medal Office, Droitwich Spa, were in the most recent year for which figures are available. [172037]

Mr. Caplin: A copy of the Investment Appraisal will be placed in the Library. It considered the options for co-location of all functions that will come into the Joint Personnel Administration Centre, but did not deal exclusively with the issue of the Army Medal Office. I have also placed in the Library a letter dated 18 March 2004 to the Trade Unions, in which more details were provided on the specific business and financial justification for the closure of Droitwich and the creation of the Joint Medal Office at RAP Innsworth.

For financial year 2003–04, the property management costs for the upkeep and maintenance of the Army Medal Office were some £110,000. This figure excludes staff and medal bullion/production costs. Utility costs for the same period were some £22,600.

HMS Trafalgar

Dr. Julian Lewis: To ask the Secretary of State for Defence if he will make a statement on the safety of HMS Trafalgar following its repairs. [170663]

Mr. Ingram *[holding answer 4 May 2004]:* I refer the hon. Gentleman to the answer I gave on 6 May 2004, *Official Report*, column 1713W, to my hon. Friend the Member for Leyton and Wanstead (Harry Cohen).

Infantry Anti-structure Weapon System

Bob Spink: To ask the Secretary of State for Defence what his policy is on the procurement of an infantry anti-structure weapon system; and if he will make a statement. [167231]

Mr. Ingram: I refer the hon. Member to my Written Ministerial Statement of 6 May 2004, *Official Report*, column 86WS.

Iraq

Mr. Keetch: To ask the Secretary of State for Defence what laws apply to the activities of private contractors operating in *(a)* Iraq and *(b)* UK controlled areas; and which courts have jurisdiction. [171441]

Mr. Ingram *[holding answer 11 May 2004]:* I will write to the hon. Member and place a copy of my letter in the Library of the House.

Mr. Keetch: To ask the Secretary of State for Defence what the *(a)* average and *(b)* maximum tour lengths of troops deployed to Iraq since 1st May 2003 were for (i) territorial army and (ii) regular personnel; and if he will make a statement. [171442]

Mr. Ingram *[holding answer 11 May 2004]:* The average tour length for troops deployed to Iraq, for both Territorial Army and Regular Army personnel, since 1 May 2003, is approximately five to seven months, while the maximum tour length is six months.

A small number of TA personnel have extended their period of mobilisation, and will have undertaken successive tours over the period, which in total will amount to over six months. Where this has occurred, it has been at the individual's own request.

Operation Telic

Mr. Soames: To ask the Secretary of State for Defence when payments for expenses incurred in financial year 2003–04 relating to Operation Telic will be made to his Department. [172125]

Mr. Ingram: The net additional costs of Operation Telic are met from the Reserve in the year in which they fall. Funds to cover these costs are voted by Parliament under Request for Resources 2 in Main and Supplementary Estimates. Final expenditure will be reported in the notes to the Ministry of Defence's Annual Report and Accounts to be published in September.

Suez Medal

Mrs. Brooke: To ask the Secretary of State for Defence how long it has taken, on average, to process each application for the General Service Medal, Suez Canal Zone, 1951–54. [172367]

Mr. Caplin: I refer the hon. Member to the answer I gave on 22 April 2004, *Official Report*, column 663W, to my hon. Friend the Member for The Wrekin (Peter Bradley).

The updated situation since then is:

Service Medal Office	*Applications received*
Royal Navy	5 November 2003
Royal Marines	As they arrive
Army	5 September 2003
RAF	11 November 2003

Mrs. Brooke: To ask the Secretary of State for Defence how many outstanding claims there are for the General Service Medal for serving in the Suez Canal Zone between 1951 and 1954. [172368]

Mr. Caplin: As at 7 May there were 29,153 applications requiring assessment. It is not possible to estimate the total number of claim applications that will be received.

Mrs. Brooke: To ask the Secretary of State for Defence how many General Service Medals have been issued for service in the Suez Canal Zone between 1951 and 1954. [172369]

Mr. Caplin: As at 7 May 7,696 medals and/or clasps had been dispatched to veterans or their families.

Support Vehicle Contract

Mr. Hoyle: To ask the Secretary of State for Defence if he will hold discussions with Leyland Trucks on the contract for the supply of the Support Vehicle. [172073]

Mr. Ingram: Leyland Trucks withdrew from the competition for the supply of the Support Vehicle in June 2002. This competition is now at an advanced stage and it would be inappropriate to invite their further interest. We are confident that the existing competition, involving four bidders, will deliver an operationally effective, value for money solution.

DEPUTY PRIME MINISTER

Council Housing (Stockton, South)

Ms Dari Taylor: To ask the Deputy Prime Minister what assessment he has made of how the change in the level of council funding for housing has affected the residents of Stockton South since 1997. [171469]

Keith Hill: Since 1997 allocations of capital funding to local authorities for housing purposes have risen consistently by an average of 15 per cent. per annum. This includes the Major Repairs Allowance we introduced in 2001–02 specifically for the improvement of local authority housing stock alongside the Decent Homes Standard that set minimum standards to be met by 2010. Stockton's allocations in the period 1997 to 2003–04 have risen by some 320 per cent. In addition, Arms Length Management Organisation initial resources of £44.5 million are available with a further £8 million to follow to facilitate Decent Homes improvements over the whole of the Stockton borough.

Increased resources have also been generated through the Neighbourhood Renewal Fund and Single Housing Investment Partnerships (SHIP) to target non-decent and non-sustainable housing stock. In the last three years alone £12.7 million has been invested in the local authority housing stock with future investment up to 2010 expected to be £11.45 million.

In the private sector and as a result of successful SHIP/English Partnerships bids £6.9 million has been secured in addition to £532,000 for renovation grants, home repair assistance, empty homes and damp proofing.

Coverage Care

Mr. Clifton-Brown: To ask the Deputy Prime Minister pursuant to the answer of 29 April 2004, *Official Report*, column 1227W, on Coverage Care, when he expects the matter to be resolved. [172095]

Yvette Cooper: I understand that on 28 April 2004 all parties to Gloucestershire county council met in private session to discuss options for the long term continuation of care provision to the county. The council hope that this matter can be resolved by the end of the year.

Departmental Budget

Mr. Austin Mitchell: To ask the Deputy Prime Minister how much he expects to spend in this financial year; how much was spent last year; how much is budgeted next year for writing off outstanding debt of local authorities that transfer housing stock; and from which budget this sum is allocated. [172276]

Keith Hill: Payments to meet local authorities' overhanging debt are made where the value of the housing stock transferring is less than a local authority's associated housing debt. £90.9 million was paid in 2003–04. The budget is £616 million for both 2004–05 and 2005–06. The payment reflects the liability the

Office of the Deputy Prime Minister would otherwise have to pay continuing subsidy on a local authority's housing attributable debt. It is not possible to use this resource for capital purposes.

Housing (Chorley)

Mr. Hoyle: To ask the Deputy Prime Minister what his policy is on the percentage of housing land to be made available for *(a)* low cost housing and *(b)* part-rent-part-buy schemes in the Chorley constituency; and what advice he gives to local authorities on the matter. [172334]

Keith Hill: This is a matter for local assessment. National planning advice in Planning Policy Guidance Note 3 "Housing" (PPG3) and Circular 6/98, 'Planning for Affordable Housing' makes it clear that each local authority should assess the local need for affordable housing within its area. Policy UR9 of Regional Planning Guidance for the North West gives further advice on the need for affordable housing.

PPG3 advises that where there is a demonstrable lack of such housing, local planning authorities should include a policy in their development plan seeking affordable housing in suitable housing developments. It advises them to identify sites on which affordable housing will be expected and to indicate the amount of such housing to be sought as a proportion of the overall dwelling provision on a site. Decisions about the amount and types of affordable housing to be provided in individual proposals should reflect local housing need and be a matter for agreement between the local authority and the developer.

The Office of the Deputy Prime Minister has published for consultation proposed changes to the current policies for affordable housing set out in PPG3 and Circular 6/98. The proposed changes re-emphasise the above policy, but also include allowing local authorities to seek affordable housing on smaller sites where this is justified. The changes are designed to help deliver more affordable housing where it is needed, and deliver a better match between a community's housing needs and supply.

Housing Stock Transfer

Mr. Austin Mitchell: To ask the Deputy Prime Minister if he will place in the Library the research evidence showing how housing stock transfer better meets the interests of tenants. [172274]

Keith Hill: The Office of the Deputy Prime Minister's housing research report entitled Views on the Large Scale Voluntary Transfer Process—May 2000, examines the degree to which tenants who have transferred from a local authority to a new landlord under a Large Scale Voluntary Transfer scheme are satisfied with their new landlord.

A copy of the report is available in the Library of the House.

Parliamentary Questions

John Thurso: To ask the Deputy Prime Minister (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions his Department received in (i) 2002–03 and (ii) this parliamentary session, broken down by month; [171187]

(2) what proportion of Ordinary Written Questions to his Department were answered within five sitting days of tabling, and what proportion of Questions for a Written Answer on a named day received a substantive answer on that day, in *(a)* the 2002–03 parliamentary session and *(b)* this parliamentary session, broken down by month. [171188]

Yvette Cooper: I refer the hon. Member to the answer given by my right hon. Friend the Leader of the House on 3 March 2004, *Official Report*, column 907W. The effective handling of parliamentary questions is an issue to which my right hon. Friend the Deputy Prime Minister and ministerial colleagues attach great importance, endeavouring to reply to all Parliamentary Questions within Parliamentary deadlines wherever possible.

The information requested is tabled as follows:

	Number of named day PQs tabled to ODPM	*Number of named day PQs answered on time (percentage)*	*Number of ordinary written PQs tabled to ODPM*	*Number of ordinary written PQs answered within five working days (percentage)*
Parliamentary Session 2002–03				
November 2002[1]	85	84.7	245	88.2
December 2002	60	91.7	155	87.1
January 2003	71	90.1	237	65
February 2003	27	85.2	253	63.2
March 2003	53	84.9	258	63.2
April 2003	21	95.2	176	61.4
May 2003	34	88.2	234	56.4
June 2003	27	74.1	253	73.1
July 2003	32	84.4	201	82.6
September 2003	16	31.3	115	58.3
October 2003	34	88.2	170	88.2
November 2003[2]	25	96	135	68.9
Parliamentary Session 2003–04

January 2004	105	73.3	393	85.5
February 2004	51	96.1	267	67
March 2004	75	90.7	320	72.5
April 2004	28	92.9	178	86.5

[1] 13 November to 30 November 2002.
[2] 1 November to 12 November 2003.
[3] 26 November to 30 November 2003.

Planning Inspectorate

Mrs. Helen Clark: To ask the Deputy Prime Minister how the planning inspectorate has ensured that value for money was achieved when employing external consultants; and who was responsible for making such value for money assessments. [170045]

Keith Hill: The Planning Inspectorate follows standard Government purchasing procedures including best practice guidance issued by the Office of

Government Commerce from time to time. Particular care is taken to achieve value for money in the procurement of external consultancy which is always handled by the Agency's specialist procurement unit.

Public Bodies

Mrs. Spelman: To ask the Deputy Prime Minister what the staff numbers were for 2003 of the *(a)* Standards Board for England, *(b)* Advisory Panel on Beacon Councils and *(c)* Review of the Needs Indices used in the allocation of housing capital resources to local authorities and registered social landlords. [172471]

Keith Hill: The information requested is as follows.

(a) The number of staff in post at the Standards Board for England on 31 March 2003 was 105,

(b) the Advisory Panel on Beacon Councils, an advisory Non-Departmental Public Body, has no staff. Its board of 10 core members and 10 specialist advisors is supported by officials in the Office of the Deputy Prime Minister, and

(c) I refer the hon. Member to the answer given on 29 March 2004, *Official Report*, column 1257W.

Queen Elizabeth II Conference Centre

Mr. Edward Davey: To ask the Deputy Prime Minister when he expects the planned re-valuation of the Queen Elizabeth II Conference Centre to be *(a)* finished and *(b)* published; and if he will make a statement. [169116]

Yvette Cooper: The Office of the Deputy Prime Minister expects the revaluation to be completed later in 2004. The valuation report will not be published, but the valuation amount will be included in the Office for the Deputy Prime Minister's Resource Accounts for 2004–05.

Regional Assemblies

Mr. Jenkin: To ask the Deputy Prime Minister pursuant to his answer of 1 April 2004, *Official Report*, column 1649W, on regional assemblies, what proportion of the set-up costs of elected regional assemblies he estimates will be *(a)* premises, *(b)* wages and salaries, *(c)* equipment and stationery and *(d)* other costs for (i) the North East, (ii) the North West and (iii) Yorkshire and the Humber. [169441]

Mr. Raynsford: Available estimates, rounded to the nearest 5 per cent. are:

Percentage

	North East	*North West*	*Yorkshire and the Humber*
Premises	10	5	5
Staff and supplies	35	20	25
Other	55	75	70

Tourism

Mr. Moss: To ask the Deputy Prime Minister how much was spent by local authorities in promoting tourism in each of the last 10 years to *(a)* domestic markets and *(b)* overseas markets. [172393]

Mr. Caborn: I have been asked to reply.

The only information available, for English local authority net expenditure on tourism, is as follows:

	Amount (£ million)
1998–99	75
1999–2000	92
2000–01	99
2001–02	106
2002–03	109
2003–04	102

Sources:
Revenue (Outturn) Forms 1998–99 to 2002–03, and Revenue Account (budget) form 2003–04.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Combined Heat and Power

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the development of combined heat and power in the UK in the last three years. [171031]

Mr. Morley *[holding answer 5 May 2004]:* In 2000 we announced a target of achieving at least 10,000 megawatts of Good Quality CHP capacity by 2010 and to developing a Strategy to achieve it. We consulted on a draft Strategy in 2002, reaffirmed our commitment to the target in the February 2003 Energy White Paper and published "The Government's Strategy for Combined Heat and Power to 2010" on 26 April of this year.

Development of CHP in terms of installed capacity for each of the last three years for which we have figures is: 4,730MWe in 2000, 4,753MWe in 2001 and 4,742MWe in 2002. A figure for 2003 will become available when the annual Digest of UK Energy Statistics (DUKES) is published in the summer by DTI.

Environmental Support

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on progress being made on the introduction of new entry level schemes for environmental support. [168792]

Mr. Morley: Entry Level Stewardship (ELS) has been developed in response to recommendations made by the Policy Commission on the Future of Farming and Food. The ELS is intended to tackle countrywide environmental problems such as diffuse pollution, loss of biodiversity and landscape character and damage to the historic environment. A pilot scheme has been running in four areas of England since February 2003, and an evaluation of these pilots has confirmed that the scheme is popular with farmers and has the capacity to deliver widespread environmental benefits.

Following the success of the pilot, Defra intend to launch Entry Level Stewardship (ELS) as part of a new agri-environment scheme called Environmental Stewardship in early 2005. Proposals for the new scheme have recently been submitted to the European Commission for approval. It is proposed that the ELS should be open to all farmers in England and that they

will be paid at a flat rate of 30 per ha in return for carrying out a certain amount of environmental management options across their whole farm.

A parallel Organic Entry Level Stewardship (OELS) is proposed, which will have the same design as the standard Entry Level Scheme but would be tailored towards organic farming systems. It is proposed that organic farmers will receive a higher payment rate of 60 per ha, in recognition of the contribution that organic farming systems make towards increases in soil health and fertility, benefits for biodiversity and wider landscape benefits.

Entry Level Stewardship and its Organic equivalent will be complemented by Higher Level Stewardship, which is designed to build on the basic Entry Level in order to deliver significant environmental benefits in targeted high priority situations and areas. Further information on Environmental Stewardship will be available once Commission approval has been received. Final details of the new Scheme will be made available immediately prior to the launch in 2005. Application packs will not be available until the launch of the Scheme.

Flooding

Mr. Michael Foster: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment she has made of the impact of flash flooding in *(a)* Worcester, *(b)* Worcestershire and *(c)* England and Wales; and if she will make a statement; [170130]

(2) what advice she has received on the future incidence of flash flooding. [170131]

Mr. Morley: I understand the recent flash floods in Worcester resulting from exceptionally intense rainfall equivalent to around a month's rain in just a few hours. This caused extensive highway flooding and some local property flooding. This flooding was from surface runoff and storm sewer/highway drain overflow and not from the main river system.

Although the Environment Agency (EA) issued a Floodwatch and were operating a local storm balancing system on the Barbourne Brook in Worcester, the wider emergency response to the flash flooding fell for the most part to Severn Trent water and the local highway authority who are primarily responsible for responding to such incidents, the EA will be assisting its partners in the follow up investigation and the review of the storm event.

The Government recognise the need for Integrated Drainage Plans for urban areas prone to such flooding, and this will be considered as part of Defra's new strategy on flood and coastal erosion risk management. However any assessment on flash flooding would need to take into account detailed knowledge of the drainage systems in the area, the local topography, together with modelling of the effects of different types of event. This information is not generally available and carries a high degree of uncertainty. The EA are in the meantime working with Research Councils and the Flood Risk Management Research Consortium to develop improved modelling and prediction of flooding in urban areas.

Mr. Nigel Jones: To ask the Secretary of State for Environment, Food and Rural Affairs (1) if she will estimate how many properties in Cheltenham will be affected by flooding in a once in 100-year event if no bund is constructed at Cox's Meadow; [168387]

(2) if she will estimate how many properties will be affected by flooding in a once in 100-year event if *(a)* the Cheltenham Flood Alleviation Project including the bund at Cox's Meadow and *(b)* the Cheltenham Flood Alleviation Project approved in 1998 is constructed; [168388]

(3) if she will publish the results of modelling used to assess the impact of flooding in Cheltenham of a once in 100-year event; [168389]

(4) if she will make a statement of the expected impact on Cheltenham caused by a once in 100-year flooding event. [168390]

Mr. Morley: The final stage of the Cheltenham Flood Alleviation Scheme is currently being considered by Defra for formal approval.

The Project, including the bund at Cox's Meadow and the Project approved in 1998, was designed to protect over 600 properties from flooding up to, and including, a one in 100 year flood. I understand from the Environment Agency (EA) that with no bund constructed at Cox's Meadow, the majority of the 600 properties identified at risk before the project began would remain vulnerable.

The extent and impact of the 100 year modelled floods were published in the EA's Environmental Report for the Combined Works Contract dated October 2003. This report is available from Cheltenham Library or the local EA office at Tewkesbury. A summary of the modelling that has been prepared for the EA by their consultant's specifically for the benefit of interested parties and members of the public is also available from the local EA office.

Linda Perham: To ask the Secretary of State for Environment, Food and Rural Affairs what assistance her Department has provided to alleviate the risk of flooding in the London borough of Redbridge since 2000. [164878]

Mr. Morley: The Environment Agency has powers to undertake works to manage flood risk on designated "main rivers" while Redbridge borough council has similar powers for "ordinary watercourses" in their area.

The Agency is undertaking a study into flood risk from the River Roding which is due to report in December 2004. Working with Thames Water (which has responsibility for the drainage system) and the council, the Environment Agency aims to agree a strategy to reduce flood risk in the area. Funding of the Environment Agency's Flood defence function will almost entirely be funded by Defra from 1 April 2004.

Defra has also grant-aided the council for two studies—the Seven Kings Water Hydraulic Study and the Cran Brook Hydraulic Study, both carried out in 2001–02. Our grant amounted to £9,225.00 and £7,425.00 respectively for these two studies. I understand the council plans to apply for grant aid for

a further study in 2004–05 into flood risk adjacent to the River Roding in the Chigwell Road and Roding Lane South areas.

In addition the Office of the Deputy Prime Minister supports the borough's own flood defence expenditure through the local government funding system.

Flood Defence

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the written statement of 20 April 2004, *Official Report*, columns 7–8WS, on the flood defence finding review, what other substantial reforms to improve accountability and effectiveness will be introduced in the next 12 to 24 months as part of the Government's development of a long-term strategy on flood defence. [171516]

Mr. Morley: The Government intend to consult on the proposed content of a new strategy for flood and coastal erosion risk management in England during summer 2004. The final strategy will have a long-term delivery plan from 2005 onwards.

Background information on the scope of the strategy and updates on progress are available via http://www.defra.gov.uk/environ/fcd/policy/strategy.htm

Government Funding (Animals)

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what Government funding was allocated to zoos in 2003–04. [169947]

Mr. Morley: The Department's spending on issues connected with zoos in 2003–04 totalled £36,708.76. This covered funding of the Zoos Forum (the Government's advisory body on zoos issues); publicity material relating to zoo policy (including a Defra Circular on the Zoo Licensing Act 1981 following amendments to that Act) and a research study on the operation of the Zoo Inspectorate.

In addition the Department donated £50,000 to 21st Century Tiger (a partnership between London Zoo and a non-governmental organisation called Global Tiger Patrol) to undertake tiger conservation projects in the wild.

These figures do not include the Department's staff costs for officials working on issues relating to zoos or spending by local authorities in respect of their statutory role under the Zoo Licensing Act 1981.

Household Waste

Mr. Dhanda: To ask the Secretary of State for Environment, Food and Rural Affairs if she will broaden the duty of care provisions under section 34 of the Environmental Protection Act 1990 to encompass prosecution for dumping of household waste. [169983]

Mr. Morley: A review of section 34 of the Environmental Protection Act 1990, which sets out the framework for the current duty of care regime, began in March this year. The terms of reference for this review are currently being finalised, though it is expected that the review will consider the issue of householders and household waste.

It is currently a criminal offence under section 33 of the 1990 Act for a householder to dispose of household waste outside the curtilage of his or her property other than in accordance with a waste management licence.

Illegal Imports (Animals/Endangered Species)

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what action her Department is taking to stop the illegal import of *(a)* animals and *(b)* endangered species into the United Kingdom. [169855]

Mr. Morley: Most commercial consignments of live animals must be imported into the UK via a Border Inspection Post (BIP) where import checks are carried out by a veterinarian. The only BIPS approved to check live animals in the United Kingdom are at Gatwick, Glasgow, Heathrow, Luton, Manchester, Prestwick and Stansted airports. There are no live animal BIPS at UK seaports.

Rabies susceptible mammals, including some commercial consignments, may be imported into specified ports and must be pre-licensed and moved directly from the port of entry to an approved quarantine establishment by an authorised carrying agent. The carrying agent submits a report to Defra to state that the animal has been delivered to the quarantine premises.

As an exemption to quarantine, cats and dogs may also enter under the Pet Travel Scheme. The animal must enter using an approved transporter on an approved route where the transport company is responsible for checks on the animals documents for compliance with the rules of the Scheme. If an animal is entering on an unapproved route then they are licensed into quarantine.

It is illegal to import rabies susceptible mammals into the UK without a licence issued by the Government. The penalties for not complying are detention of the animal in quarantine at the owners' expense, re-export or destruction. The person responsible is also liable to prosecution and/or imprisonment.

Accompanied pet birds have to be pre-licensed and under go quarantine under the supervision of a veterinarian at the place of destination.

Outside border inspection posts enforcement responsibility for ensuring that animals are not introduced illegally rests with the local authority. The State Veterinary Service (SVS) also take action when they receive information that animals have been illegally imported.

HM Customs and Excise have a presence at all points of entry and if they find live animals they detain or seize (as appropriate) and inform the local Divisional Veterinary Manager of the SVS.

The "Washington" Convention on International Trade in Endangered Species of Wild Fauna and Flora, more commonly known as CITES, aims to protect certain plants and animals by regulating and monitoring

their international trade to prevent it reaching unsustainable levels. My Department acts within the UK as the UK CITES Management Authority.

As part of our efforts to stop the illegal import of endangered species a dedicated team of Customs officers is located at Heathrow airport and they are recognised worldwide as a "centre of excellence".

Furthermore, we are continuing to contribute to the National Wildlife Crime Intelligence Unit, to help counter serious national and international wildlife crime, including the import of endangered species.

Landfill Directive

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 10 March 2004, *Official Report*, column 1534W, on meetings with the Deputy Prime Minister on compliance with the Landfill Directive, on what dates meetings were held; and what was discussed on each occasion. [168371]

Mr. Morley: As stated in the answer of 10 March 2004, *Official Report*, column 1534W, my right hon. Friend the Secretary of State has many meetings with the Deputy Prime Minister to discuss all manner of topics. However, while there have been exchanges of correspondence between my right hon. Friend and the Deputy Prime Minister on Landfill Directive compliance issues, there has not been a formal meeting to discuss this matter specifically.

Pharmaceutical Crops

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the use of pharmaceutical crops. [167830]

Mr. Morley: 'Pharmaceutical crops' is a term used for plants that have been genetically modified so that they contain proteins or other chemicals that may be used for the treatment of disease in humans or animals. Such plants are regulated as all other GMOs, and must be kept under contained conditions as required by the legislation on the contained use of GMOs. Release of such crops into the environment requires consent under the deliberate release legislation.

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what research into bio-pharmaceutical crops she has commissioned in the last five years; whether this research was carried out outdoors; and what plans her Department has to commission further research. [167831]

Mr. Morley: The Department has not commissioned any specific research in this area.

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received from companies proposing to plant genetically modified food crops for commercial scale drug production. [167833]

Mr. Morley: We have not yet received any representations from companies proposing to plant genetically modified food crops for commercial scale drug production.

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs whether the Government's policy on pharmaceutical crops differs from its policy on other genetically modified crops. [167835]

Mr. Morley: The Government's policy on genetically modified organisms applies to any GM crop whether intended for pharmaceutical use or other purposes.

Recycling

Mr. Sheerman: To ask the Secretary of State for Environment, Food and Rural Affairs what the tonnage of household recycling was in 2002–03 of the 10 local authorities in England that achieved the *(a)* highest and *(b)* lowest rates for household recycling in 2002–03. [169772]

Mr. Morley: Provisional results from Defra's 2002–03 Municipal Waste Management Survey indicate that the tonnage of household waste recycled and composted by the local authorities in England that achieved the 10 highest and lowest rates for household recycling and composting in 2002–03 (as measured by the Best Value Performance Indicator dataset for 2002–03), is as presented in the following table:

Local authority	*Type of local authority*[1]	*Tonnage of household waste recycled and composted in 2002–03*[2]
Daventry District Council	WCA	16,132
Lichfield District Council	WCA	17,428
Wyre District Council	WCA	11,312
Melton District Council	WCA	6,001
Isle of Wight District Council	UA	18,823
St. Edmundsbury District Council	WCA	14,258
Windsor and Maidenhead Borough Council	UA	19,009
Forest Heath District Council	WCA	7,444
Eastleigh	WCA	10,759
Chiltern District Council[3]	WCA	7,870
Dorset County Council[3]	WDA	55,658
Kettering District Council	WCA	1,412
North Tyneside Council	UA	3,735
Rochdale Metropolitan Borough Council	WCA	2,778
Corby District Council	WCA	928
Tower Hamlets London Borough	UA	2,684
Bolsover District Council	WCA	1,030
Hackney London Borough	WCA	2,426
Sunderland City Council	UA	2,718
Barking and Dagenham London Borough	WCA	2,090
Liverpool Metropolitan Borough Council	WCA	3,320

[1] The Waste Disposal Authority (WDA) and Unitary Authority (UA) recycling rate includes all recycling in the area, i.e. the amount recycled by the authority through its own civic amenity sites plus the amount recycled by its constituent collection authorities through bring or kerbside collection schemes. Waste Collection Authorities' (WCA) rates do not take account of waste deposited at civic amenity sites for recycling or disposal.

[2] The tonnage of household waste sent for recycling and composting by each local authority is not collected with the Best Value Performance Indicator dataset. The tonnages given are collected through the Municipal Waste Management Survey 2002–03.

[3] Joint tenth place.

Sewers

Simon Hughes: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of the population in their domestic premises in Greater London has access to *(a)* mains sewerage systems, *(b)* unadopted sewers, *(c)* sewers connected to a private treatment facility and *(d)* septic tanks. [168943]

Mr. Morley: Detailed information on the number of properties served by various types of sewerage system is not available. However, estimates do exist.

(a) I have been informed by Thames Water that the vast majority of properties in the Metropolitan London area are connected to the foul water sewerage system. I understand that virtually every property has the opportunity to connect to the public sewerage system under Section 106 of the Water Industry Act 1991.

(b) Nationally around 40 per cent. of properties connect to public sewers via unadopted sewers. (This is assuming 'unadopted sewers' mean all private sewers i.e. they are not adopted by the relevant sewerage undertaker). Separate data for Greater London are not available.

(c) Nationally around 10 per cent. of properties are estimated to be connected to completely private systems. This includes those connected to private treatment facilities, septic tanks and cesspools. Separate data for Greater London are not available.

(d) No data are available on the number of properties with a septic tank, as distinct from other forms of private sewage treatment, either nationally or for Greater London.

Ship Dismantling (Teesside)

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will place in the Library a copy of the environmental assessment underlying the decision that dismantling of the US ghost ships on Teesside is now the preferred environmental option; what views have recently been expressed on the matter by the Environment Agency; on what date her view was reached; and if she will make a statement. [169857]

Mr. Morley *[holding answer 30 April 2004]:* The Government position remains as stated to the House on 22 April 2004, *Official Report*, column 435. Four US ships are currently docked in Graythorp dock near Hartlepool. Applications are due to be submitted for the necessary permissions for dismantling to take place at this location, and an associated Environmental Impact Assessment is being prepared. The applications will need to be considered by the relevant authorities. In the meantime, dismantling work is prevented, and the ships are subject to regular inspection by the Environment Agency.

Substitute Fuels Protocol

Dr. Murrison: To ask the Secretary of State for Environment, Food and Rural Affairs what measures have been taken to consult the public over proposed amendments to the Environment Agency's Substitute Fuels Protocol. [169924]

Mr. Morley: The Environment Agency is undertaking a 12 week consultation on its proposals to revise the Substitute Fuels Protocol for use on cement and lime kilns, in accordance with Cabinet Office Code of Practice on Written Consultations. Responses are invited by 18 June 2004. The consultation document has been sent to a variety of stakeholders and published on the Environment Agency's website. The Agency has engaged with the environmental trade press to encourage coverage of the consultation in relevant magazines and journals.

In preparing the list of consultees for direct mailing, the Agency has included national organisations such as trade associations, Government agencies, local organisations and members of the public with an interest in this subject.

Dr. Murrison: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received to extend the consultation period for amendments to the Environment Agency's Substitute Fuels Protocol. [169925]

Mr. Morley: The Department has not received any representations to extend the consultation period.

Dr. Murrison: To ask the Secretary of State for Environment, Food and Rural Affairs if she will extend the consultation period for amendments to the Environment Agency's Substitute Fuels Protocol. [169926]

Mr. Morley: The consultation period, of 12 weeks, has been set in accordance with the Cabinet Office Code of Practice on Written Consultations. The Environment Agency considers that the 12-week period is appropriate in this case. The Agency has consulted on amendments to the Substitute Fuels Protocol on several consultations in the past.

Sustainable Development

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on *(a)* the positions taken by her delegation at the 12 Commission on Sustainable Development in New York and *(b)* the outcome of that meeting. [172020]

Mr. Morley *[holding answer 10 May 2004]:* The Twelfth UN Commission on Sustainable Development (CSD 12) met in New York from 19 to 30 April to review progress towards implementation of the Millennium Development Goals and World Summit on Sustainable Development (WSSD) commitments on water, sanitation and human settlements. Over 100 Ministers attended the ministerial segment (28 to 30 April) including my right hon. Friend the Secretary of State and myself, along with senior representatives of the major UN and other international institutions. UN Secretary General Kofi Annan addressed the opening session.

The UK delegation, led by the Secretary of State, played a leading role at CSD 12, in concert with EU partners, in identifying obstacles to progress and examples of best practice. Amongst the priorities we identified were: incorporation of water, sanitation and

human settlements issues in Poverty Reduction Strategy Papers and national Sustainable development strategies; integrated water resource management plans to be in place by 2005; innovative financial mechanisms, such as the UK's proposed International Finance Facility; promotion of small-scale local initiatives and partnerships; and improved coordination between UN agencies and with international financial institutions.

CSD 12 raised the profile of these issues and stimulated inclusive and interactive debate by all parties. The Chairman's Summary of the ministerial segment recognises that we are not yet on track to meet the targets, identifies the main obstacles faced and picks up on most of the UK's priorities. It also sets out a number of challenges to be addressed in the second year of the cycle on water, sanitation and human settlements, culminating at CSD 13 in May 2005, which has the task of agreeing the policy responses needed to get back on track with these international targets.

Two Tree Island

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs (1) which councils and bodies are responsible for monitoring pollution on Two Tree Island in the constituencies of Castle Point and Southend West; [170825]

(2) what assessment she has made of the risk to children on Two Tree Island of the accidental ingestion of dust or soil; [171527]

(3) what the cost was of the Halcrow Report into Two Tree Island; and what steps have been taken to publicise the report's conclusions; [171528]

(4) whether it is safe for the public to consume *(a)* vegetables and *(b)* fruit grown on Two Tree Island; [171529]

(5) what estimate she has made of the cost of stopping the old Two Tree Island waste dump polluting the environment; [170829]

(6) what assessment she has made of the potential and actual impact on *(a)* bird life, *(b)* marine life and *(c)* mammals of the pollutants within and seeping from the old Two Tree Island waste dump; [170830]

(7) which areas of land on Two Tree Island may be subject to contamination from leakage from *(a)* old landfill and *(b)* old sewage works; [171530]

(8) when repair work to Two Tree Island's sea wall was first identified as necessary; and when that work will commence; [171531]

(9) if she will give advice to *(a)* walkers and *(b)* bathers regarding the pollutants in and seeping from the old Two Tree Island waste dump; [170831]

(10) if she will list the health hazards to *(a)* walkers and *(b)* bathers around and on Canvey Island and Two Tree Island resulting from pollutants from the old Two Tree Island waste dump; [170832]

(11) if she will list the toxic substances *(a)* within and *(b)* seeping into the Thames and surrounding areas from the old Two Tree Island waste dump; and if she will make a statement; [170833]

(12) what assessment she has made of the extent of leakage of pollutants from the old Two Tree Island waste dump; [170834]

(13) if she will make a statement on the Halcrow Report into environmental problems associated with Two Tree Island in the Castle Point constituency; [170835]

(14) what investigations have been undertaken by the Environment Agency into leachate seeping into the Thames from Two Tree Island. [171532]

Mr. Morley: The local authorities, that is Southend borough council and Castle Point borough council, are responsible for preventing pollution from this landfill site as it was closed before 1990. In this case, the local authority is also the landowner and is responsible for the sea defences.

I understand that Southend borough council commissioned a consultant, Halcrow, in 2001 to assess the risks associated with the sea defence failure at Two Tree Island and to prepare a management strategy. Following wide consultation with relevant bodies, including the Environment Agency, a report was produced that considered the options. The local authorities involved are considering action in light of the recommendations made in the report.

Questions about the pollution risks and the assessment of any health impacts associated with this landfill site are a matter for the local authorities.

Warm Front

Mr. Borrow: To ask the Secretary of State for Environment, Food and Rural Affairs how many homes in South Ribble have benefited from the Warm Front and Home Energy Efficiency Schemes. [171278]

Mr. Morley: The Home Energy Efficiency Scheme is now marketed as Warm Front. Between the launch of the scheme in June 2000 and the end of March 2004, approximately 1,800 households in South Ribble received assistance from the Scheme.

Mr. Meacher: To ask the Secretary of State for Environment, Food and Rural Affairs how many homes in Oldham, West and Royton have benefited from the Warm Front and Home Energy Efficiency Schemes. [170881]

Mr. Morley: The Home Energy Efficiency Scheme is now marketed as Warm Front. Between the launch of the scheme in June 2000 and the end of March 2004, approximately 3,600 households in Oldham West and Royton received assistance from the Scheme.

Water Report

Joyce Quin: To ask the Secretary of State for Environment, Food and Rural Affairs whether her Department intends to hold a public consultation on the recommendations of the Report commissioned by her Department from PricewaterhouseCoopers on the future structure of the Consumer Council on Water and the future of WaterVoice organisations. [169478]

Mr. Morley: A wide range of groups were consulted by PricewaterhouseCoopers during their study of the organisational and regional structure of the Consumer Council for Water, including water industry representatives, consumer organisations, and WaterVoice members and staff.

The Government do not intend to carry out a further consultation. The priority now is to work towards a successful establishment of the Consumer Council for Water in October 2005 based on the consultants' report and to seek to minimise the uncertainties for WaterVoice and its staff.

Joyce Quin: To ask the Secretary of State for Environment, Food and Rural Affairs what the cost to her Department has been of commissioning the PricewaterhouseCoopers report on the structure of the Consumer Council on Water and the future of WaterVoice organisations. [169479]

Mr. Morley: The PricewaterhouseCoopers study of the organisational and regional structure of the Consumer Council for Water cost £93,261.41.

HOME DEPARTMENT

Asylum Processing

David Davis: To ask the Secretary of State for the Home Department what targets are in place for the length of time taken to process asylum claims; when these targets were introduced; and which Minister in his Department approved the setting of these targets. [166557]

Mr. Browne: The principal target for processing asylum claims made in 2003–04 is to decide and serve 75 per cent. within two months. This was an element of target 7 of the Home Office Public Service Agreement (PSA) covering the period 2003–04 to 2005–06. The PSA targets were agreed between my right hon. Friends the Prime Minister, the Home Secretary and the Chancellor of the Exchequer and formed the basis for the Home Office's funding settlement for SR2002.

The technical notes were published on 25 March 2003, and this was announced by Written Ministerial Statement on 25 March 2004, *Official Report*, column 55WS, by the Minister for the Environment and Agri-environment, my hon. Friend the Member for Scunthorpe (Elliot Morley). The notes are held on the Home Office website and can be accessed at http://www.homeoffice.gov.uk/inside/aims/index.html. The relevant section is on p20. Latest published performance figures against this target indicate that 80 per cent. of applications, received between April and September 2003, were decided and served within two months.

Body Armour

Mr. Paice: To ask the Secretary of State for the Home Department if he will make a statement on the level of ballistic protection provided by *(a)* HG1 and *(b)* HG1A body armour. [172356]

Caroline Flint *[holding answer 11 May 2004]:* HG1 and HG1A are body armour protection levels defined in a Home Office body armour standard. Both HG1 and HG1A afford the same ballistic protection. They both provide protection against standard ammunition fired from short-barrelled handguns. In the case of HG1A a back face deformation of the armour to a maximum depth of 44mm is allowed and in the case of HG1 this maximum deformation is reduced to 25mm. The back face deformation is a measure of the trauma that would be inflicted.

Mr. Paice: To ask the Secretary of State for the Home Department when he was informed *(a)* that Highmark Manufacturing Co Ltd. had changed the specification of its KCW223 model of body armour and *(b)* that the body armour used by some police forces did not meet the protective HG1/KR2 classification of the original tender. [172357]

Caroline Flint *[holding answer 11 May 2004]:* Highmark did not change the specification of the armour. In mid 2001 it incorporated a material that had been cured in a different way. They did not inform the Home Office of this change. It has now been established that the fully cured material affords a lower ballistic trauma protection level than the partially cured material. The Home Office was informed of the problem in February 2004 and established its extent in March 2004. All affected forces have been told what action they should take, and the manufacturers are providing upgrade packs to return the armour to the specified protection level.

Mr. Paice: To ask the Secretary of State for the Home Department *(a)* which police forces and *(b)* how many police officers are using body armour supplied by Highmark Manufacturing Co Ltd. that does not meet the protective HG1/KR2 specification of the original tender. [172358]

Caroline Flint *[holding answer 11 May 2004]:* The police forces in England and Wales using KCW223 model of body armour supplied by Highmark Manufacturing Co Ltd. are Avon and Somerset constabulary, Cheshire constabulary, Cumbria constabulary, Devon and Cornwall constabulary, Dorset police, Durham constabulary, Greater Manchester police, Hampshire Constabulary, Lancashire constabulary, Leicestershire constabulary, North Wales police, South Wales police, West Midlands police and West Yorkshire police. 30,000 models of this armour have been supplied and the manufacturers are supplying upgrade packs to return the armour to its original HG1/KR2 level (where required).

Mr. Paice: To ask the Secretary of State for the Home Department how long police forces have been using body armour supplied by Highmark Manufacturing Co Ltd. that does not meet the protective HG1/KR2 specification of the original tender. [172359]

Caroline Flint *[holding answer 11 May 2004]:* In mid 2001, Highmark Manufacturing Co Ltd. started using a material that makes up part of the construction of the armour model KCW223 which was supplied to police forces. This material had been cured in a different way to material previously used. This resulted in the armour in having a reduced ballistic (trauma) protection level in

terms of the HG1/A specification and a slightly reduced stab protection level that placed it just below the KR2 level in some carriers and just above KR2 in others.

Mr. Paice: To ask the Secretary of State for the Home Department how long police forces were using HG1A body armour before it was approved by his Department; and what action his Department is taking to ensure that police forces are issued with the certification of body armour they specify at tender. [172360]

Caroline Flint *[holding answer 11 May 2004]:* The Police Scientific Development Branch (PSDB) of the Home Office produces a body armour standard. HG1A is a body armour protection level, which was introduced in early 2002. PSDB approved test houses test body armour to the current PSDB standards and the results are published in the Manual of Ballistic and Stab Resistant Body Armour maintained by PSDB. When body armour is tested at a PSDB test house the manufacturer is asked to provide a Declaration of Construction that details the material used in the manufacture of the armour along with a detailed description of the construction of the armour. Any model of armour tested is assigned an identification number that uniquely identifies it and the test sample is retained by PSDB. This procedure is designed to ensure that all armour bearing a particular model number that has met a PSDB defined protection level, which is subsequently supplied by the manufacturer, is of the same construction as the original test armour.

Care Custody System

Mr. Paice: To ask the Secretary of State for the Home Department when he expects the Care Custody computer system to be fully operational throughout England and Wales. [170722]

Caroline Flint: The current plan proposes that the Custody and Case Preparation software applications will be installed and ready for service in all 43 Police Forces by October 2005 and that Forces will have the systems in full operational use by March 2006.

Mr. Paice: To ask the Secretary of State for the Home Department whether *(a)* the Care Custody computer system will contain all data held in England and Wales regarding an individual and *(b)* the information will be limited to locally-held data. [170723]

Caroline Flint: As currently designed the bulk of the Custody and Case Preparation information will be held locally within the force area and only core data and that information required to be recorded on the PNC will be available nationally.

Mr. Paice: To ask the Secretary of State for the Home Department what timescale targets he intends to set for the input of data into the Care Custody system regarding custody decisions, bail and court decisions. [170724]

Caroline Flint: The current requirement established by the Association of Chief Police Officers and monitored by Her Majesty's Inspectorate of Constabulary, (HMIC), stipulates that the following timeliness performance indicators are required to be met by the Police for entry onto the Police National Computer:

Arrest and Charge

1. Initial key details of arrestee and charge—90 per cent. within 24 hours of arrest.

2. Full entry—90 per cent. within five days

3. Once compliance with 1 and 2 is obtained then a staged improvement to 90 per cent. within 24 hours for full entry.

Bail

1. Police bail 100 per cent. within 24 hours

Court Case Results—Police Entered.

2. 100 per cent. entered within 72 hours of the result from the court coming into Police possession.

Court Case Results—Court Entered 1.

100 per cent. within 24 hours.

Correspondence

Mr. Kaufman: To ask the Secretary of State for the Home Department *(1)* when he intends to reply to the letter to him from the right hon. Member for Manchester, Gorton, dated 19 February, with regard to Wajid Shamsul Hasan; [167260]

(2) when he intends to reply to the letter to him from the right hon. Member for Manchester, Gorton dated 25 March with regard to Mr. Amanah Ullah. [172254]

(3) when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 30 March with regard to Ms S.A. Ntonga. [172255]

(4) when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 30 March with regard to Mr. Cristian Cornel Peres. [172256]

Mr. Blunkett: I wrote to my right hon. Friend on 11 May 2004.

Drugs

John Mann: To ask the Secretary of State for the Home Department what meetings Ministers have had with their counterparts from *(a)* Sweden, *(b)* Greece, *(c)* Belgium, *(d)* Denmark, *(e)* Finland, *(f)* Spain, *(g)* the USA, *(h)* Portugal, *(i)* Italy, *(j)* New Zealand, *(k)* Ireland, *(l)* Canada, *(m)* Jamaica, *(n)* the Netherlands, *(o)* Switzerland, *(p)* France and *(q)* Germany on drug abuse in the past two years. [171622]

Caroline Flint: Over the past two years, in addition to the regular contacts we have with European colleagues in the Council of Ministers and with other counterparts at other international meetings, my right hon. Friend the Home Secretary has met counterparts from Greece, Belgium, Denmark, the United States, Italy, Ireland, Canada, the Netherlands, Germany and France; my predecessor as Parliamentary Under-Secretary of State at the Home Office with responsibility for drugs issues, my hon. Friend the Member for Coventry, North-East (Mr. Ainsworth), met his counterparts from Ireland, Jamaica and France; I have met my counterparts from Jamaica and the Netherlands. As a matter of major concern to Home Affairs and Justice Ministers across the world, drugs will have featured in most of these discussions. Home Office Ministers also have ready

access to drug policies and practice in those countries through published reports from and about them and through advice from officials and others who keep in close touch with developments.

Mr. Meacher: To ask the Secretary of State for the Home Department what public funds were spent on tackling drugs misuse in Oldham, West and Royton in *(a)* 1997–98 and *(b)* 2003–04. [170957]

Caroline Flint: Breakdown of financial allocation to local constituencies is not available to the Home Office. Funding is allocated to Drug Action Team (DAT) areas, in this case Oldham Drug and Alcohol Action Team (DAAT).

The period 1997–98 pre dates the Government's current National Drug Strategy. Expenditure across all appropriate agencies in the area at this time is estimated to have been £977,350. This figure is based on locally held information for the period 1998–99 and has been supplied by Oldham DAAT.

In 2003–04 the total drugs allocation for Oldham was £1,697,123. In order to ensure consistency figures supplied are based on funding streams associated with the National Drug Strategy and are readily verifiable. These funding streams are specifically targeted at tackling the harm caused to individuals, families and communities by the misuse of drugs. Other mainstream funding is made available at a local level, this varies and both in amount and origin as a result it is not possible to provide robust financial information.

2003–04

	£
Partnership Capacity	69,259
Treatment Pooled Budget	1,016,000
Through Care After Care Pump Priming	35,000
Building Safer Communities[1]	386,069
Young people	190,795
Total	1,697,123

[1] Contains non-drug elements.

Mr. Borrow: To ask the Secretary of State for the Home Department what public funds were spent on tackling drugs misuse in South Ribble in *(a)* 1997–98 and *(b)* 2003–04. [171656]

Caroline Flint: Breakdown of financial allocation to local constituencies is not available to the Home Office. Funding is allocated to Drug Action Team (DAT) areas, in this case Lancashire DAT.

In 1997–98 (pre-dating National Drugs Strategy) funding available to Lancashire DAT area totalled £670,000.

In 2003–04 the total drugs allocation for Lancashire was £6,015,000. In order to ensure consistency, figures supplied are based on funding streams associated with the National Drug Strategy and are readily verifiable. These funding streams are specifically targeted at tackling the harm caused to individuals, families and communities by the misuse of drugs. Other mainstream funding is made available at a local level; this varies both in amount and origin, as a result it is not possible to provide robust financial information.

2003–04

	£
Partnership capacity	118,000
Treatment pooled budget	3,980,000
Through care after care pump priming	35,000
Building safer communities[1]	1,147,000
Young people	735,000
Total	6,015,000

[1] Contains non-drug elements.

Emergency Services

Mr. Hancock: To ask the Secretary of State for the Home Department how many administrators were involved, and at what cost, in each police authority, to deal with the paperwork resulting from emergency police vehicles captured on speed cameras contravening speed limits. [170733]

Caroline Flint: The information requested is not collected centrally.

European Communities Association Agreement

David Davis: To ask the Secretary of State for the Home Department whether Ministers in his Department were informed of the letter from the UK Vice Consul in Bulgaria to the Home Office Business case Unit, of 20 November 2002, regarding the operation of the European Communities Association Agreement scheme. [166558]

Mr. Browne: The operation of the ECAA scheme, including letters to the Home Office about it, is covered by the investigation which Ken Sutton is undertaking of the operation of the ECAA scheme for Bulgaria and Romania. I do not wish to pre-empt the investigation by commenting on the issues before it is completed.

Explanatory Notes

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department on how many occasions the Department did not make explanatory notes available on the day a Bill was published in the last two years; and what steps are being taken to ensure that this does not occur in future. [165897]

Fiona Mactaggart: This has happened on only one occasion in the last two years. The guidance issued to Bill teams makes clear that "Explanatory Notes" must accompany the Bill and this is also reflected in the training they receive.

Forensic Science Service

Mr. Pound: To ask the Secretary of State for the Home Department when the outline business case and financial analysis of the privatisation of the Forensic Science Service will be published. [171397]

Caroline Flint: It is not intended to privatise the Forensic Science Service, but to develop the organisation as a public private partnership (PPP). The outline business case currently being prepared will look in detail at how to optimise the performance and economic prospects of the PPP and will include a

financial analysis of the impact of the proposed change of status. We expect to be able to announce the results of the work on the outline business case by July.

Colin Burgon: To ask the Secretary of State for the Home Department how many times since July 2003 he has met trade unions representing the Forensic Science Service workforce to discuss the future of the Service. [171759]

Caroline Flint *[holding answer 10 May 2004]:* Ministers last met formally with the Forensic Science Service trade union representatives on 20 October 2003. Since then there have been a number of helpful meetings at official level.

Immigration (Northern Ireland)

Rev. Martin Smyth: To ask the Secretary of State for the Home Department what discussions have been held between his Department and the Police Service of Northern Ireland regarding immigration irregularities in *(a)* Northern Ireland and *(b)* south Belfast. [158610]

Mr. Browne: UK Immigration Service (UKIS) has an office in Belfast and there is regular contact between the Police Service for Northern Ireland (PSNI) and UKIS staff. At operational level, the police refer details of potential immigration offenders, and UKIS staff work with them to investigate illegal working allegations and other similar issues. At a more strategic level there is a local Immigration Organised Crime group, chaired by PSNI, with delegates from UKIS, the police and the Garda National Immigration Bureau, Dublin, which meets regularly to discuss matters relating to immigration crime in Northern Ireland (including cross border issues).

Apart from routine day-to-day contact in respect of immigration offenders throughout Northern Ireland, South Belfast has not been the subject of any special discussions in respect of immigration irregularities.

North London Mosque

Mr. Todd: To ask the Secretary of State for the Home Department if he will make a statement on *(a)* the policing of street preaching outside North London Central Mosque and *(b)* monitoring the compliance of views expressed in that preaching with the law. [169785]

Caroline Flint: The Commissioner of the Police for the Metropolis tells me that the activities outside the Finsbury Park Mosque are monitored by the Metropolitan police who have a duty to ensure public safety and to prevent crime and disorder. It is an offence to use threatening, abusive or insulting words or behaviour with intent or likelihood to stir up racial hatred. The police will take action where appropriate.

Road Traffic Offences

Mr. Gibb: To ask the Secretary of State for the Home Department pursuant to the answer of 4 May 2004, *Official Report*, column 1398W, on road traffic offences, if he will list the centres at which information about points on licences is recorded. [171914]

Caroline Flint: Information about the number of points on the licences of individual motorists is recorded on the database maintained by the Driver and Vehicle Licensing Agency.

Speed Camera (Grape's Hill)

Mr. Bacon: To ask the Secretary of State for the Home Department if he will make a statement on the total value of fines levied as a result of the speed camera at Grape's Hill in Norwich from its installation until its removal. [171745]

Caroline Flint *[holding answer 10 May 2004]:* Information on the value of fines made at specific speed camera locations is not collected centrally.

Tetra

Mr. Gibb: To ask the Secretary of State for the Home Department pursuant to the answer to the hon. Member for Perth (Annabelle Ewing) of 17 March 2004, *Official Report*, column 354W, on Tetra, if he will set out details of the comprehensive programme of work on Tetra health issues; and what institutions are carrying out this work. [171915]

Caroline Flint: Following the publication in May 2000 of the Stewart Report on Mobile Phones and Health, we took expert advice from the National Radiological Protection Board's independent Advisory Group on Non-Ionising Radiation (AGNIR) on the health and safety aspects of TETRA technology.

The AGNIR experts confirmed that it was unlikely that the specific features of TETRA technology could pose a risk to health and suggested a number of areas where further research would be useful. These suggestions have been taken forward as follows:

The Defence Science and Technology Laboratory (Dstl) is assessing the effects of TETRA exposure on various types of cells. Dstl concluded that TETRA has no effect on calcium exchanges in cells. Further work on epileptiform activity and cognitive performance is underway.

Imperial College is carrying out a national health monitoring study of police users of Airwave.

The University of Birmingham and the University of Manchester are looking into patterns of work of Airwave users.

Microwave Consultants Limited are measuring Specific Absorption Rates (SARs) from TETRA equipment.

The National Radiological Protection Board have completed further work on modelling SARs.

The Radiocommunications Agency (now Ofcom) checks emission levels from TETRA base stations.

In addition, we are funding TETRA research as an adjunct to the Mobile Telecommunications and Health Research (MTHR) programme. Studies funded under this arrangement are selected and managed by the MTHR Programme Management Committee. As part of this adjunct programme, the Burden Neurological Institute in Bristol is examining possible effects of microwave radiation on the electrical activity of the brain.

These extensive studies have shown no evidence of any particular risk to health from TETRA.

Fuller details of the research programme are available on the Home Office website at: www.homeoffice.gov.uk/docs/tetra.html.

HOUSE OF COMMONS COMMISSION

Environmental Performance

Norman Baker: To ask the hon. Member for Roxburgh and Berwickshire, representing the House of Commons Commission if he will place in the Library a copy of the review of environmental performance, which the Commission has commissioned. [171511]

Sir Archy Kirkwood: The Report will be placed in the Library once it has been considered by the Board of Management.

SOLICITOR-GENERAL

Infant Deaths

Mr. Curry: To ask the Solicitor-General if she will make a statement on the progress of the Attorney-General's review into infant deaths following the Cannings Judgment. [171552]

The Solicitor-General: I would refer the hon. Member to the Attorney-General's statement, 5 May 2004, *Official Report, House of Lords*, column WS55.

TREASURY

Cancer

Mrs. Calton: To ask the Chancellor of the Exchequer what assessment he has made of the change in the incidence of cancer in each region since the Chernobyl nuclear accident. [171927]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician. I have asked him to reply.

Letter from Len Cook to Mrs. Patsy Calton, dated 12 May 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question concerning what assessment has made of the incidence of cancer in each region since the Chernobyl nuclear accident.

The Chernobyl nuclear accident occurred on 28th April 1986. The attached table gives the incidence of all cancers in England, from 1986 to 2000 (the most recent year for which data are available), by Government Office Region.

Changes over time in the number of cancers registered are affected by many factors unrelated to the Chernobyl accident. These include historic change in smoking patterns, increased testing and screening for specific cancers (e.g. prostate, breast, cervix), and improved ascertainment by regional cancer registries.

Directly age-standardised[1] rates per 100,000 population of newly diagnosed cases of all cancers[2] to residents[3] of England, by Government Office Region, 1986–2000

	England	North East	North West	Yorkshire and the Humber	East Midlands

Office for National Statistics

Coalminers' Compensation Scheme

John Mann: To ask the Chancellor of the Exchequer what assessment the National Audit Office *(a)* has made and *(b)* has been asked to make of the loss to the taxpayer from double charging by solicitors under the coalminers' compensation scheme. [170742]

Nigel Griffiths: I am not aware that the National Audit Office (NAO) has made an assessment about solicitors double charging. The NAO sets its own priorities.

Customs and Excise

John Mann: To ask the Chancellor of the Exchequer what use of ion scanners is made by HM Customs and Excise. [171619]

John Healey: HM Customs and Excise use ion scanners at all main ports and airports in the UK, primarily to detect traces of prohibited Class A drugs in baggage, freight and vehicles. They also use them to train Customs officers from international partner countries in the fight against the illicit drugs trade.

Departmental Expenditure (Entertainment)

Mr. Laws: To ask the Chancellor of the Exchequer what his latest estimate is of the amount spent by his Department on official entertainment in each year from 1996–97 to 2004–05. [169008]

Ruth Kelly: I refer the hon. Gentleman to the answer I gave to him and the hon. Member for North Wiltshire (Mr. Gray) on 24 March 2003, *Official Report*, columns 60–71W.

Expenditure on official entertainment for 2002–03 was £137,000. Figures exclude expenditure on major events such as G7 meetings of ECOFIN. 2003–04 figures will be available after finalisation of the annual resource accounts.

Financial Services and Markets Act

Ian Lucas: To ask the Chancellor of the Exchequer (1) what plans he has to review the conduct of the scheme operated under section 225 of the Financial Services and Markets Act 2000; [172195]

(2) if he will order the amendment of the Dispute Resolution section of the Financial Services Authority's Handbook of Rules and Guidance to improve the speed of consideration of determinations; [172196]

(3) when he expects the review of the Financial Ombudsman Service to report; [172197]

(4) if he will make a statement on the operation of the Independent Assessor of the Financial Ombudsman Service. [172198]

Ruth Kelly: The Financial Ombudsman Service is an independent organisation. In November last year, I announced the two-year review of the operation of the Financial Services and Market Act 2000. As part of that review, I asked the Financial Services Authority and the Financial Ombudsman Service to review the circumstances in which the Financial Services Authority takes regulatory action instead of individual cases being determined by the Ombudsman and to consider introducing a process by which firms may appeal against Ombudsman decisions. The Financial Services Authority and the Financial Ombudsman Service plan to publish a joint consultation paper by early June.

Responsibility for setting timescale targets for the resolution of complaints is a matter for the Financial Ombudsman Service. The Financial Ombudsman Service sets out for consultation annually a draft Plan and Budget of its overall financial and workload targets, including the number of cases it expects to receive and the number it intends to resolve, overall costs, productivity rates, and average timescales within which it aims to resolve cases. Cases that are not resolved within 12 months are monitored by the Board of the Financial Ombudsman Service.

The role of the Independent Assessor is to carry out a final review of the service provided by the Financial Ombudsman Service, in cases where the consumer remains dissatisfied with the Financial Ombudsman Service, the Independent Assessor can investigative the Ombudsman's process and the behaviour of its staff. Disagreements about the merits of decisions are expressly excluded from his jurisdiction but is authorised to make findings and recommendations for redress in cases where he believes it is justified.

Iraq

Harry Cohen: To ask the Chancellor of the Exchequer what his latest estimate is of Iraq's external debt. [171983]

John Healey: The latest IMF estimate suggests Iraq's external debt is approximately US$120 billion.

Harry Cohen: To ask the Chancellor of the Exchequer what his latest estimate is of Iraq's *(a)* gross national product and *(b)* income to the state in 2004–05. [171984]

John Healey: In April this year, the Coalition Provisional Authority forecast the Iraqi Government's total revenue for fiscal year 2004 at US$14.5 billion.

Figures for Iraq's Gross Domestic Product were published in October 2003 by the World Bank and United Nations in their Joint Iraq Needs Assessment. These very preliminary estimates showed GDP for 2004 to be in the range of $15–20 billion.

IT Equipment

Mr. Borrow: To ask the Chancellor of the Exchequer how many businesses in South Ribble have benefited from the 100 per cent. tax exemption for the purchase of computer and internet equipment. [172000]

Dawn Primarolo: I refer my hon. Friend to the answer I gave the hon. Member for Huntingdon (Mr. Djanogly) on 5 May 2004, *Official Report*, column 1505W.

Job Vacancies

Mr. Borrow: To ask the Chancellor of the Exchequer how many job vacancies there were in South Ribble in *(a)* 1997 and *(b)* 2003. [171998]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Borrow, dated 12 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about job vacancies in South Ribble. (171998)

According to Jobcentre Plus administrative records, the number of unfilled vacancies notified to Jobcentres in Lancashire West Jobcentre Plus District was 4,730 on average during 1997. This represents only a proportion of all the vacancies available, as not all vacancies are notified to Jobcentres.

Figures are not available for South Ribble alone because the vacancies are allocated to local Jobcentres, not according to constituency boundaries, and because of the practice of notifying some vacancies centrally with one Jobcentre taking vacancies for others in the same district. Jobcentre vacancy statistics were withdrawn from National Statistics in September 2001 as a result of distortions to the data, which occurred following the introduction of new administrative procedures by Jobcentre Plus. Comparable figures for vacancies in 2003 are therefore unavailable.

Results from the ONS Vacancy Survey were released as National Statistics from July 2003, but are not available for local areas.

Mr. Benton: To ask the Chancellor of the Exchequer how many job vacancies there were in Bootle in *(a)* 1997 and *(b)* 2003. [172331]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Joe Benton, dated 12 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about job vacancies in Bootle. (172331)

According to Jobcentre Plus administrative records, the number of unfilled vacancies in the Liverpool travel-to-work area was 4,403 on average during 1997. This represents only a proportion of all the vacancies available, as not all vacancies are notified to Jobcentres.

Figures are not available for Bootle alone because the vacancies are allocated to local Jobcentres, not according to constituency boundaries, and because of the practice of notifying some vacancies centrally with one Jobcentre taking vacancies for others in the same district.

Jobcentre vacancy statistics were withdrawn from National Statistics in September 2001 as a result of distortions to the data, which occurred following the introduction of new administrative procedures by Jobcentre Plus. Comparable figures for vacancies in 2003 are therefore unavailable.

Results from the ONS Vacancy Survey were released as National Statistics from July 2003, but are not available for local areas.

Unemployment

Mr. Benton: To ask the Chancellor of the Exchequer what the level of unemployment was in Bootle in each year since 1997. [172330]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Joe Benton, dated 12 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about unemployment.

The Office for National Statistics (ONS) compiles statistics of unemployment from the Labour Force Survey (LFS) following International Labour Organisation definitions. However, the LFS sample size is too small to give reliable estimates of unemployment in the Bootle Constituency.

ONS also compiles statistics of those claiming Jobseeker's Allowance (JSA) for local areas including parliamentary constituencies.

The table below gives the annual average number of JSA claimants for the Bootle constituency for each year since 1997.

	Number of claimants
1997	4,368
1998	3,828
1999	3,516
2000	3,218
2001	2,873
2002	2,706
2003	2,543

WALES

Advisers/Consultants

Bob Spink: To ask the Secretary of State for Wales how much his Department spent on external consultants and advisers in each of the last three years. [171879]

Mr. Touhig: The Wales Office has spent the following amounts on external consultants and advisers in each of the last three financial years:

	£
2001–02	44,650
2002–03	6,599
2003–04	587

Health Service Funding

Adam Price: To ask the Secretary of State for Wales pursuant to his oral answer of 5 May 2004, *Official Report*, column 1329, on health service funding, if he will list the 10 hospitals which are planned or have been started in Wales. [172347]

Mr. Touhig *[holding answer 11 May 2004]:* Since 2001, two hospitals—Neath/Port Talbot and St. David's, Cardiff—have been opened.

Two additional hospitals—the second Rhondda and Tenby hospitals—have completed business case development and received approval

The following six hospitals are currently going through various stages of business case development:

Holywell

Porthmadog

Blaenau Gwent (Ebbw Vale)

Caerphilly

Cynon Valley

Merthyr Community.

Nuclear Power Plants (Air Security)

Llew Smith: To ask the Secretary of State for Wales what discussions he has had with *(a)* the Secretary of State for Defence and *(b)* the First Secretary of the National Assembly for Wales on emergency planning procedures to deal with a serious nuclear incident since the release of information by the Ministry of Defence on 1 May 2004 on incidents involving military aircraft and the Berkeley nuclear installations. [171648]

Mr. Touhig: Further to the answer given to my hon. Friend by my right hon. Friend the Minister of State for the armed forces on 6 May 2004, *Official Report*, column 1714W, I can confirm that in the UK, off-site civil nuclear emergency planning has been well established over many years. This includes emergency plans which are prepared for all UK nuclear sites by first tier local authorities under the Radiation (Emergency Preparedness and Public Information) Regulations 2001. The emergency response arrangements are regularly tested in a programme of off-site exercises which bring together local and national organisations, and which are followed up both locally and nationally through the DTI-chaired Nuclear Emergency Planning Liaison Group.

Restricted areas of two nautical miles radius are in place around all major nuclear installations, which apply to both military and civil aircraft.

The Secretary of State for Wales meets with the Secretary of State for Defence and the First Secretary of the National Assembly for Wales on a regular basis to discuss a range of issues, including emergency planning.

Productivity

Bob Spink: To ask the Secretary of State for Wales what his policy is for *(a)* increasing the productivity and *(b)* cutting the costs of his Department. [172193]

Mr. Hain: I refer the hon. Member to the answer given by my hon. Friend the Financial Secretary to the Treasury on 10 May 2004, *Official Report*, column 148W.

Timber

Mr Walley: To ask the Secretary of State for Wales whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167621]

Mr. Hain: I refer my hon. Friend to the answer given by my hon. Friend the Minister of State for Environment and Agri-Environment on 10 May 2004, *Official Report*, column 31W.

CABINET OFFICE

Panel for Regulatory Accountability

Mr. Stephen O'Brien: To ask the Minister for the Cabinet Office pursuant to his answers of 4 May 2004, *Official Report*, columns 1444W and 1404–405W, on the Panel for Regulatory Accountability, who the chairman of the Panel for Regulatory Accountability is. [172097]

Mr. Alexander: In future, any regulatory proposals likely to impose a major new burden on business will require clearance from the Panel for Regulatory Accountability chaired by my right hon. Friend the Prime Minister, and in his absence my right hon. Friend the Chancellor. I will chair panel meetings which consider specific regulatory and policy issues.

Regulatory Impact Assessments

Mr. Stephen O'Brien: To ask the Minister for the Cabinet Office how many regulatory impact statements have been brought to his attention in the last 12 months, with particular reference to the Evaluation of Regulatory Impact Assessments Compendium Report 2003–04, March 2004, pages 25–26. [171610]

Mr. Alexander: The Regulatory Impact Statement (RIS) is a paragraph that can be included in the Cabinet paper or ministerial letter to colleagues seeking collective agreement to a proposal that impacts on business. The Small Business Service can have its view recorded in both the Regulatory Impact Assessment and the RIS. Such correspondence is routinely sent to all members of the relevant Cabinet Committee. As has been the practice under previous Administrations, Cabinet Committee correspondence is exempt from disclosure under Part II of the Code of Practice on Access to Government Information. All Regulatory Impact Assessments (RIAs) must include an assessment of the impact of the proposal on small firms' except where the proposal solely affects the public services.

WORK AND PENSIONS

Employment Statistics

Mr. George Osborne: To ask the Secretary of State for Work and Pensions how many *(a)* unemployment claimants and *(b)* job vacancies there were in each region of the UK in each of the last 12 months. [172127]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. George Osborne, dated 12 May 2004:

As National Statistician, I have been asked to reply to your Parliamentary Question about unemployed claimants and job vacancies in each region of the UK in each of the last 12 months. (172127)

The attached Table 1 gives the number of claimants of Jobseeker's Allowance, seasonally adjusted, for each Government Office Region, and for the UK in total, for each of the 12 months up to March 2004.

The attached Table 2 shows the total numbers of job vacancies in the UK for each month, according to the ONS Vacancy Survey. These vacancy statistics are not available for regions. As these statistics only began in April 2001, they are not yet available on a seasonally adjusted basis.

Jobcentre vacancy statistics, which used to be available by region, were withdrawn from National Statistics in September 2001 as a result of distortions to the data which occurred following the introduction of new administrative procedures by Jobcentre Plus.

Health and Safety

Mr. Greg Knight: To ask the Secretary of State for Work and Pensions when he last met members of the Health and Safety Executive; and what was discussed. [168231]

Jane Kennedy *[holding answer 28 April 2004]:* My right hon. Friend the Secretary of State met with the Director General of the Health and Safety Executive together with the Chair of the Health and Safety Commission on 1 August 2002. He welcomed the Commission and the Executive to the Department, discussed and agreed their strategic priorities and arrangements for them to meet regularly with the Minister of State for Work.

My right hon. Friend also met with Deputy Director General (Policy) on 13 November and 18 November 2003. They discussed implementation of European legislation in the UK.

Jobcentre Plus

Mr. George Osborne: To ask the Secretary of State for Work and Pensions (1) when the Jobcentre Plus Provider Liaison Group was formed; [168842]

(2) who the members are of the Jobcentre Plus Provider Liaison Group; [168843]

(3) what the main *(a)* function and *(b)* purpose is of the Jobcentre Plus Provider Liaison Group; [168844]

(4) what the selection process is for the membership of the Jobcentre Plus Provider Liaison Group; [168845]

(5) how often and where the Jobcentre Plus Provider Liaison Group meetings take place. [168846]

Jane Kennedy: The administration of Jobcentre Plus is a matter for the Chief Executive of the Jobcentre Plus, David Anderson. He will write to the hon. Member.

Letter from David Anderson to Mr. George Osborne, dated 12 May 2004:

As Jobcentre Plus is an Executive Agency, the Secretary of State for Work and Pensions has asked me to reply to your questions concerning the Jobcentre Plus Provider Liaison Group. This is something which falls within the responsibilities delegated to me as Chief Executive of the Agency.

The inaugural meeting of the Jobcentre Plus Provider Liaison Group was held on the 6th September 2002.

The Jobcentre Plus Provider Liaison Group's membership includes representatives from several of our largest work-based private sector providers, together with providers in the voluntary and community sector, smaller private providers and Further Education establishments. In addition, membership includes the Association of Learning Providers (ALP), a trade body for the work-based sector who represent approximately 30% of Jobcentre Plus providers. The Group is supported by a small secretariat from Jobcentre Plus. Full membership of the Group is set out in Annex 1.

The purpose of the Group is to provide a forum in which providers are consulted on changes to policy and operational processes. In practice this gives them the opportunity to comment upon policies from their perspective as organisations that deliver these policies. The Group enables Jobcentre Plus to obtain the views of providers from a wide background and should help ensure that our business can be delivered more effectively and efficiently.

There is no formal selection process. In order to ensure the arrangements are manageable, the Group has a membership of approximately 20. However, we do try to be inclusive as possible, and membership is potentially open to each of our providers. In setting up the group we attempted to ensure that a range of providers was represented. In addition to our inviting a number of the largest providers, each Jobcentre Plus Region was requested to nominate a local provider, to ensure that the Group offers views from smaller providers. Some Jobcentre Plus regions also hold their own meetings of local provider groups where there are region-specific issues to discuss.

The Group meets on a regular basis, usually bi-monthly, and meetings are held in Sheffield.

I hope this is helpful.

Annex 1: Jobcentre Plus Provider Group Membership

Contact	*Provider*
David Bailey	Action for Employment
Steve Marsland	Action for Employment
Pat Taylor	Personnel Evaluation Consultants

Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions pursuant to his answer of 23 April 2004, *Official Report*, column 709W, on pension forecasts, how many *(a)* employers and *(b)* pension providers participated in the service in each year since its introduction. [171100]

Malcolm Wicks: The number of employers and pension providers who participated in the combined pension forecast service, in each year since the combined pension forecast service was introduced is contained in the following table.

	Employers	*Pension providers*
2002 (up to)	5	2
2002–03	7	—
2003–04	64	2

In 2004–05 to date a further 59 employers have agreed to participate.

The table shows two pension providers, however an earlier answer provided on 5 June 2003, *Official Report*, column 546W, stated that four providers were participating.

The difference is accounted for by:

Countrywide Assd Caspil and Countrywide Assd Vax (listed as separate providers in the original reply) have now merged into a single organisation.

Liverpool Victoria Friendly Society was incorrectly described as a provider and has now been correctly classified as an employer.

Sure Start Maternity Grant

Mr. Borrow: To ask the Secretary of State for Work and Pensions how many mothers in South Ribble have made use of the Sure Start maternity grant. [172142]

Mr. Pond: The information is not available in the format requested, the available information is in the tables.

Sure Start maternity grants for Preston Social Fund District

	Applications	*Awards*
2000–01	1,276	1,106
2001–02	1,536	1,305
2002–03	1,836	1,531
2003 (April)	152	95

Sure Start maternity grants for area covered by Lancashire West Jobcentre Plus District

	May 2003 to March 2004
Applications	4,866
Awards	3,710

Notes:
1. South Ribble Parliamentary Constituency used to be part of Preston Social Fund District. In May 2003, Preston Social Fund District was combined with Blackpool Social Fund District and parts of South West Lancashire and, Lancaster and South Cumbria Social Fund Districts to form Lancashire West Jobcentre Plus District. The data for the two areas is not comparable.
2. Sure Start Maternity Grants were introduced on 27 March 2000. The very small number of cases for 1999–2000 have been excluded for data protection reasons.
3. Data is given for all applications and awards, irrespective of whether the application was made by the mother or her partner.

DWP Social Fund Policy, Budget and Management Information System.

INTERNATIONAL DEVELOPMENT

Iraq

9. **Bob Spink:** To ask the Secretary of State, Department for International Development, what support is being provided for the rebuilding of Iraq. [172243]

Hilary Benn: At the Madrid Donors' Conference in October last year, the Government announced a total UK pledge of £544 million towards the reconstruction effort in Iraq from April 2003 to March 2006.

DFID has now committed over £278 million for humanitarian and reconstruction assistance to Iraq. This includes £70 million for the International Reconstruction Fund Facility for Iraq, managed by the World Bank and the United Nations. We are also supporting Iraqi government policies and reforms that benefit the poor, and, in the south of Iraq, helping to restore infrastructure and develop the region's links with central government in Baghdad.

Mr. Keetch: To ask the Secretary of State for International Development if he will make a statement on current levels of *(a)* power generation, *(b)* water provision and *(c)* infrastructure construction in Iraq; and what steps have been taken to maintain provision of these services when contractors leave the country prematurely. [171420]

Hilary Benn: The Coalition Provisional Authority (CPA) reports that average electricity production is in the region of 4,000 megawatts (MW), approximately the same level as before the 2003 conflict. A number of generating units are undergoing maintenance and should be back in service by the summer peak demand period. The CPA's power generation target for 1 June is 6,000 MW.

It is estimated that immediately after the 2003 conflict coverage of water services was 60 per cent. of the urban and 30 per cent. of the rural populations. Considerable work has taken place since then to improve the quantity, quality and reliability of water services to the population. There are no complete statistics on current coverage, but informal estimates suggest that, in the south, supply has increased by 10 to 15 per cent. since May 2003. By the summer of 2004, water quality and volume in Basra is expected to have exceeded pre-conflict levels.

A total of US$32 billion was pledged for the reconstruction of Iraq at the Madrid Donors' Conference in October 2003. Very significant sums are now being committed to specific projects for the reconstruction of power and water infrastructure and in a wide range of other sectors including health, education, transport, irrigation, telecommunications, housing and oil production.

The maintenance of essential services is to a very large extent undertaken by Iraqis rather than by foreign contractors. However, it is clear that some reconstruction projects may be delayed as a result of restrictions imposed by the present security situation on the ability of contractors and development agencies to operate normally throughout the country.

Development Financing

10. **Julie Morgan:** To ask the Secretary of State, Department for International Development, if he will make a statement on mechanisms for financing development. [172244]

Hilary Benn: In January 2003 HM Treasury and the Department for International Development (DFID) launched a proposal for an International Finance Facility (IFF). The IFF is designed to "frontload" aid to help meet the internationally agreed Millennium Development Goals (MDGs). The IFF has the following advantages; it provides the additional resources necessary to help achieve the MDGs, making funds available for education, health, economic development, debt relief and building trade capacity; it is the only feasible proposal at the moment which would deliver these resources; it locks in the political commitment of donors to Monterrey pledges and it provides the predictability and critical mass of aid needed for simultaneous and sustainable investment in developing systems across sectors, tackling the causes rather than the symptoms of poverty.

Commission for Africa

11. **Joan Ruddock:** To ask the Secretary of State, Department for International Development, if he will make a statement on the future programme of the Commission for Africa. [172245]

Hilary Benn: Following first meeting of the Commission on 4 May, consultation and outreach for submissions to the Commission's work will run from now until October, and consultation on the emerging conclusions of the Commission's work will then follow more detailed consultation plans will be posted on the Commissions website when it is up and running at the end of May.

The next meeting of the Commission will be in October, and the final meeting in early 2005 before the launch of the report around March/April 2005.

Sudan

12. **Sir Teddy Taylor:** To ask the Secretary of State, Department for International Development what assistance his Department is making available this financial year to Sudan. [172246]

Hilary Benn: I have allocated £35 million to Sudan for this financial year, in anticipation of a comprehensive peace agreement to end the civil war there. The Africa Conflict Prevention Pool has allocated a further £3.5 million. Last week I announced a further £10 million in response to the humanitarian crisis in Darfur, Western Sudan. Hence, £48.5 million are potentially available for Sudan this financial year.

Ethiopia

13. **Mr. Laurence Robertson:** To ask the Secretary of State, Department for International Development if he will make a statement on the development of irrigation systems in Ethiopia. [172247]

Hilary Benn: Dependence on rain-fed agriculture contributes to the high levels of vulnerability and chronic food insecurity found in Ethiopia. Less than 5 per cent. of the country's arable land is currently irrigated. The Government of Ethiopia recognises the need for appropriate forms of irrigation that will benefit smallholders as well as commercial farmers, in its poverty reduction strategy. Irrigation is an important component of the Government's Water Sector Development Programme. In addition, the Government are undertaking a large programme to promote rainwater harvesting at the smallholder farm level.

DFID supports such initiatives through assisting the development of Government's overall rural development strategies and financing implementation of the country's poverty reduction strategy with direct budget support.

Malawi

14. **Mr. Carmichael:** To ask the Secretary of State, Department for International Development if he will make a statement on the humanitarian situation in Malawi. [172248]

Hilary Benn: The harvest that has just been completed will be the principal determinant of the need for humanitarian action in Malawi over the next year. Preliminary reports suggest a lower harvest than last year's bumper crop, but with major shortfalls restricted to a few areas. In order to assess more accurately the 2004 harvest and its impact on food security and household vulnerability, the Malawi Government, donors and NGOs are undertaking a series of surveys. The results of these studies will be available by the end of May.

Development (School Involvement)

15. **Mr. Plaskitt:** To ask the Secretary of State, Department for International Development what support his Department is giving to projects designed to strengthen school involvement in raising awareness of development issues. [172249]

Mr. Gareth Thomas: DFID is committed to ensuring that every child is educated about development issues, so that they can understand the key global considerations that shape their lives. DFID works closely with the four education ministries across the UK to ensure that the content of what is taught in schools is enriched by the inclusion of global perspectives.

DFID's Enabling Effective Support initiative supports the development of locally owned strategies to achieve comprehensive high quality support to teachers for the delivery of the global dimension in the curriculum and wider school life. Each year some 70 per cent. of DFID's Development Awareness Fund supports projects under this initiative. In 2003–04 the Fund allocated over £3.8 million to 43 projects including the production and promotion of resources for schools; Teacher Education projects; and the Global School Partnerships programme that supports links with schools in developing countries. In 2004–05 the Fund will support 33 projects at a projected cost of £4 million.

Africa

Ann McKechin: To ask the Secretary of State, Department for International Development what recent discussions he has had with the new Commission for Africa regarding the debt burden on Africa. [172240]

Hilary Benn: The first meeting of the Commission for Africa agreed that the debt burden in Africa will be an important issue for the Commission's work. The Chancellor of the Exchequer, Trevor Manuel—the South African Finance Minister—and Ralph Goodale—the Canadian Finance Minister—will lead this work.

Angola

Mr Hunter: To ask the Secretary of State for International Development what plans he has to assist the Government of Angola in preparing for forthcoming elections. [172083]

Hilary Benn: The Government of Angola has not yet set a date for the next elections, indicating that 14 steps, including conclusion of the new constitution and re-establishment of the Electoral Commission, are necessary before an election can take place.

DFID is supporting the electoral process. One of the key aims of our Country Engagement Plan for Angola is "a political system which allows all people to influence state policy and practice". Hence DFID is working closely with the international community and Angolan civil society in developing a strategy to support the forthcoming elections. Specifically, DFID is funding a large-scale programme to help civil society, the media and political parties to prepare for the elections. Through this project DFID envisage providing assistance on technical processes such as election monitoring, although details have yet to be agreed.

Once the date for the elections is set, DFID would anticipate working with other members of the international community to do more. DFID is also willing to consider supporting nationwide consultations on the new constitution. As of yet, there have been no clear indications on how the Government intends to carry out this process and how donors can best support it.

Mr Hunter: To ask the Secretary of State for International Development what efforts have been made by his Department in the last two years to work with civil society in Angola on transparency issues; and what results have been achieved. [172082]

Hilary Benn: DFID completed its first Country Engagement Plan for Angola in September 2003. One of the three outcomes highlighted in the Plan is "government systems for raising and using resources which are transparent and give priority to poverty reduction". Since then DFID has made significant progress on developing and implementing a comprehensive strategy on transparency in Angola. This includes encouraging Angola to participate in the Extractive Industries Transparency Initiative (EITI), contributing to the World Bank's Public Expenditure Management and Financial Accountability Review (PEMFAR), and assisting in development of a G8 Anti-corruption and Transparency (ACT) programme. We have also followed negotiations between the Government of Angola and the IMF on a new staff monitored programme for which greater fiscal transparency is a key pre-condition.

With respect to civil society in Angola, DFID is one of several donors contributing to the Transparency Coalition set up by the international NGO World Learning in September 2003. The coalition consists of six different national NGOs who are working together to raise awareness and disseminate information on

transparency issues throughout the country. The coalition recently put forward a proposal, which DFID has agreed to fund, to analyse and make accessible in layman's terms the complex and very technical Angolan National Budget (OGE). This should allow Angolan civil society to more actively participate in debates on the annual budget process. DFID has also participated in a new forum established by the National Democratic Institute (NDI) in Luanda to look at transparency issues. Through this forum, donors help keep civil society informed on developments in transparency at the political level.

Much of this transparency work is still in its early stages and it will take some time before we see the full effects. It is worth noting however, that one positive result is already evident. Within the Angolan media there is a more open and animated discussion on transparency issues and civil society has been actively participating in this.

Births

Mr. Bercow: To ask the Secretary of State for International Development what the latest proportion is of births assisted by skilled birth attendants in each of the countries covered by his Public Service Agreement target. [172453]

Hilary Benn: The latest figures available on the proportion[1] of births attended by skilled birth attendants for the countries covered by our Public Service Agreement are set out in the following table.

[1].The percentage of deliveries attended by personnel trained to give the necessary supervision, care and advice to women during pregnancy, labour and the post natal period, to conduct deliveries on their own, and to care for new borns.

	Number
Asia	
Afghanistan	no data available
Bangladesh	13
Cambodia	34
China	70
India	42
Indonesia	56
Nepal	12
Pakistan	20
Vietnam	70
Sub-Saharan Africa	
Congo, Dem. Rep.	no data available
Ethiopia	10
Ghana	44
Kenya	44
Lesotho	60
Malawi	55
Mozambique	44
Nigeria	42
Rwanda	31
Sierra Leone	42
South Africa	84
Sudan	86
Tanzania	36
Uganda	38
Zambia	47
Zimbabwe	73

Children

Mr. Bercow: To ask the Secretary of State for International Development what representations he has received about the role of child-to-child clubs in Kenya in highlighting the phenomenon of female genital mutilation in Kenya. [171699]

Hilary Benn: DFID has received no such representations. However, our support for reproductive healthcare and safe motherhood includes work aimed at reducing the incidence—and eventual elimination—of female genital mutilation in Kenya.

Occupied Palestinian Territories

Tony Baldry: To ask the Secretary of State, Department for International Development pursuant to the statement of 29 April 2004, *Official Report*, column 372WH, on the Occupied Palestinian Territories, when he expects his Department to publish the country assistance plan for the Occupied Palestinian Territories. [172088]

Hilary Benn: Following extensive consultations with a wide range of partners in the UK, Palestine and Israel the Secretary of State has now approved the Country Assistance Plan. We expect formal publication to be in June and a printed copy will be placed in the Library of the House. An electronic version will be available on the DFID website shortly.

Tony Baldry: To ask the Secretary of State for International Development pursuant to the statement of 29 April, *Official Report*, column 372WH, on the Occupied Palestinian Territories, what funding and support the negotiations support unit in the Occupied Palestinian Territories receives from his Department. [172089]

Hilary Benn: DFID has committed a total of £9.2 million to support the Palestinian Negotiation Support Unit (NSU). This funding covers the period 1999 to 2006. To date £5.25 million has been disbursed. This provides highly professional legal, policy and communications advice to help Palestinians develop detailed policy positions on complex issues in preparation for and during, permanent status negotiations. NSU's professionalism is widely praised, including by Israeli and US negotiators. We believe that the NSU's work represents an effective use of taxpayer's money.

Tony Baldry: To ask the Secretary of State for International Development pursuant to the statement of 29 April, *Official Report*, column 372WH, on the Occupied Palestinian Territories, what funding and support the Palestinian civil police *(a)* has received and *(b)* is planned to receive from his Department; and how many people have been recruited to the civil police force as a result. [172090]

Hilary Benn: In 2003 DFID provided £700,000 for police vehicles to help increase the efficiency and visible presence of the Palestinian Civil Police. A DFID funded Police Adviser is currently working with the Palestinian Police and Ministry of Interior to assess the type of assistance that would most effectively help to build capacity within the Civil Police. This assistance is likely

to be in the form of technical assistance, training and equipment. It is too early to say what impact this will have on police recruitment.

Pipeline Revenues

Tom Brake: To ask the Secretary of State for International Development what safeguards are in place to ensure that revenues received by the countries through which the Baku-Tbilisi-Ceyhan pipeline runs will receive will not be used to finance regional conflicts. [172416]

Mr. Gareth Thomas: The BTC pipeline has the potential to deliver substantial economic benefits to Azerbaijan, Georgia and Turkey and it will strengthen regional co-operation, developing new economic and political links between the three host countries. All the international parties involved in the BTC pipeline (including BTC Co., EBRD and IFC) are keen to make sure that the revenues generated by the project do not exacerbate regional tensions. Mitigation measures are already in place, including an IMF approved oil fund in Azerbaijan, a commitment by BP to publish what it pays to the host Governments and support by the World Bank and IMF on budgeting and public expenditure management. Furthermore, Azerbaijan is in the first wave of countries to begin to implement the Extractive Industries Transparency Initiative (EITI). The EITI aims to increase the transparency of payments by extractives companies to Governments, as well as the transparency of revenues received by those host countries. Increasing transparency is a key component to reducing poverty, corruption, and the potential for conflict. The UK Government are helping Azerbaijan implement EITI, whereby BTC revenues are channelled through the State Oil Fund to ensure that the people of Azerbaijan benefit. We are also in discussions with the Government of Georgia on the possibility of their involvement in the EITI.

Sexual and Reproductive Health

Mr. Bercow: To ask the Secretary of State for International Development (1) when he will report progress on the Millennium Development Goal for the reduction in the proportion of 15 to 24-year-old pregnant women with HIV; [171676]

(2) when data will be available for the measurement of his Department's targets on HIV/AIDS policy in Africa. [171683]

Mr. Gareth Thomas: The data for monitoring progress towards the target for a reduction in the proportion of 15 to 24-year-old pregnant women with HIV from a 16 per cent. prevalence rate is collected by the United Nations programme on HIV/AIDS (UNAIDS). UNAIDS will publish their Report on the Global HIV/AIDS Epidemic containing this data in Summer 2004.

The data will enable us to update progress towards DFID's Public Service Delivery target for HIV/AIDS (as stated above) in 16 key African countries. It will be published in the Department's Autumn Performance Report later in the year.

Small Arms

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the progress of the National Small Arms Action Plans in Southern African countries. [171677]

Hilary Benn: Under the joint DFID/FCO/MoD Global Conflict Prevention Pool Small Arms and Light Weapons (SALW) Strategy the UK Government have been supporting, since February 2003, a programme to conduct in-depth assessments of small arms issues. The aim is to develop and implement National Action Plans (NAPs) in four East and Southern African countries to address the problem of the proliferation and illicit trafficking of SALW. The NGOs Saferworld and SaferAfrica are undertaking the work together with national Governments and local civil society organisations in Kenya, Mozambique, Namibia and Uganda.

This process is most advanced in East Africa where a draft NAP is with the Kenyan National Security Council for approval. In the Southern African states of Mozambique and Namibia the process is not as advanced. In Namibia the preparatory phase commenced in late 2003 and the mapping process only began last month. In Mozambique the process has been delayed due to a variety of local circumstances, and the timetable is currently being re-assessed.

Although no formal assessments have yet been undertaken due to the preparatory nature of the work in Southern Africa, DFID is committed to evaluating what progress has been made and the effectiveness of the National Action Plans overall at the appropriate stages in the process. The NAPs will be regularly reviewed through on-going reports from the field and by undertaking more formal assessments as part of on-going programme management. An external review of the programme in East Africa is planned for June and this will guide future evaluations of the work in Southern Africa.

Sustainable Development

John Barrett: To ask the Secretary of State for International Development what progress has been made on his Department's sustainable development strategy. [165431]

Hilary Benn: The International Development Act (2002) makes it clear that development assistance is

"assistance provided for the purposes of furthering Sustainable Development . . . "

It is also generally recognised that poverty reduction is a necessary prerequisite for achieving Sustainable Development. For this reason, DFID does not have a stand-alone Sustainable Development Strategy but rather considers Sustainable Development to be integral to the Department's work.

DFID leads on four specific areas in the UK's implementation of the Johannesburg Plan of Implementation (JPOI) agreed at the World Summit on Sustainable Development in 2002.

Water and Sanitation.

Integration of environmental considerations into Poverty Reduction Strategies.

Access to clean energy.

(Together with the Treasury) Financing for development.

DFID has completed a review of its water related activities and prepared a Water Action Plan reaffirming the importance of water resource management, supply and sanitation to poverty reduction.

DFID, along with other Departments, has been contributing to the consultation process currently underway to develop a new UK Sustainable Development Strategy. DFID shares the lead on developing the international dimensions of the UK Sustainable Development Strategy with the Foreign Office.

At a recent consultation meeting held during the UN Commission on Sustainable Development (UNCSD) organised to solicit the views of international agency representatives on the UK's Sustainable Development track record, DFID and the UK were praised for leadership in developing a better understanding of the links between poverty and environment. DFID's work has emphasised the importance of prudent environmental management to achieving poverty reduction and the other Millennium Development Goals.

DFID'S lead role in developing policy and implementation guidance on national strategies for sustainable development/poverty reduction strategies was also cited as an outstanding contribution to international Sustainable Development progress.

DFID's programmes with developing country partners are shaped by the priorities of those countries, what other donors are doing and where value can be added. These priorities are set out in developing countries' own development plans. DFID has been working with developing country partners to ensure sustainable development considerations underwrite these strategies if they are to be effective.

In addition to meeting the UK's own domestic obligations as signatories to various multilateral environmental agreements, the UK assists developing countries meet their own commitments.

For example, climate change is considered to be a key development issue because it is poor people and developing countries that are most vulnerable to its adverse impacts. DFID and other Departments, in partnership with developing countries, are considering options for a global carbon dioxide emissions reduction regime including the necessary incentive to encourage a transition away from carbon intensive economies.

DFID has made good progress towards the targets set out in the Framework for Sustainable Development on the Government Estate. This framework relates to the impact of our offices on the environment. DFID has published delivery plans, used alternatively fuelled vehicles, re-cycle more than 40 per cent. of our waste, purchase more than 50 per cent. green electricity and paper with a 75 per cent. recycled content. DFID is also one of the few departments to meet the water usage targets.

DFID's current building project at our office in East Kilbride achieved a Bream award with an "excellent" environmental rating and we have conducted an audit of local habitat and species. DFID has also built volunteering into our staff development planning.

Zimbabwe

Tom Brake: To ask the Secretary of State for International Development (1) how many representations his Department has received in 2004 on political manipulation of EU-funded food aid by the Zimbabwean Government; and when his Department will publish the results of the investigation announced in February into the alleged misappropriation of UK and EU aid; [171350]

(2) how many representations his Department has received in 2004 on UK and EU aid to Zimbabwe not being spent for humanitarian purposes; [171351]

(3) how many formal meetings his Department had in April with the World Food Programme regarding food aid to Zimbabwe; and whether the Zimbabwean Government's refusal of food aid formed part of discussions. [171352]

Hilary Benn: The risk of politicisation of humanitarian assistance, particularly food aid, has been regularly discussed in Parliament and with our international partners. As a result, significant emphasis is placed on monitoring incidents of political interference in the provision of humanitarian assistance.

Humanitarian assistance provided by the European Union and UK to Zimbabwe is channelled through UN agencies and NGOs. In collaboration with those agencies, DFID operates a policy of zero tolerance towards political interference—including political manipulation of aid—in humanitarian operations. The UN and DFID's NGO partners have procedures in place for those affected to report irregularities. Any such incidents are quickly identified, reported and followed up, including by suspending food distribution where appropriate. As a result of these measures, there has been minimal interference with international assistance. DFID and other donors and agencies also use the media when appropriate to publicise our activities and to explain the extent of donor support to Zimbabwe during the present crisis.

My reply to the hon. Member of Buckingham (Mr. Bercow) on 15 March 2004, *Official Report*, column 25W, set out the position on the report by the European Court of Auditors on the effectiveness of EC aid to Zimbabwe. There was no DFID announcement of a further investigation.

UK programmes in Zimbabwe provide both humanitarian assistance and support for the fight against HIV/AIDS. EC programmes provide humanitarian assistance and support for a range of social programmes. The EC and DFID have well established systems in place to ensure that humanitarian assistance reaches those for whom it is intended. DFID has not received any representation in 2004 on misuse of either UK or EC humanitarian assistance.

The DFID office in Zimbabwe is in close contact with the World Food Programme (WFP) and meets regularly with WFP, NGOs and other donors to discuss issues affecting WFP's operations.

The Government of Zimbabwe's decision not to make an immediate appeal to the United Nations for general food distributions is of concern to the humanitarian community. Although the Government of Zimbabwe appear confident of a good harvest there is considerable divergence of views on the crop forecast. The Government also remain unwilling to discuss with the international community what stocks they hold, and what volume of grains they expect to import to meet any deficit in domestic supply. Without an appeal WFP will face difficulty in planning, securing donor funding for and implementing emergency operations beyond the coming months when existing agreements and stocks will run out. DFID will continue to monitor the situation closely in collaboration with WFP and other partners.

FOREIGN AND COMMONWEALTH AFFAIRS

China

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what the British negotiating position was with regard to the recent European Union discussions on the subject of lifting the EU arms embargo to China. [172510]

Mr. Rammell: I refer my hon. Friend to the answer I gave the hon. Member for Boston and Skegness (Mr. Simmonds) on 29 March 2004, *Official Report*, column 1147W.

Clemency Pleas

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs on behalf of how many British citizens he has made pleas for clemency, broken down by country, since 1997. [172584]

Mr. Mullin *[holding answer 11 May 2004]:* The Foreign and Commonwealth Office does not keep statistics on clemency pleas. But I refer the hon. Member to http://www.fco.gov.uk/Files/KFile/report2001.pdf for details on our clemency policy, which was amended in 2001.

Correspondence

Mr. Lidington: To ask the Secretary of State for Foreign and Commonwealth Affairs when he intends to reply to the letter of 12 December 2003, from the hon. Member for Aylesbury, on behalf of Mrs. R. H. of Aylesbury, refs GU100/49991 and CON/6487, acknowledged by UK Visas on 14 January. [166017]

Mr. Mullin: My noble Friend the Baroness Symons of Vernham Dean replied on 4 May.

Green Minister

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what work his Department's Green Minister has undertaken in the last three months in that capacity; and what meetings his Department's Green Minister has attended in the last 12 months in that capacity; [171806]

(2) if he will list the meetings at which his Department has been present regarding the delivery of sustainable development across Government as co-ordinated by the Ministerial Sub-Committee of Green Ministers; [171807]

(3) what steps he is taking to promote the delivery of sustainable development within Government; [171808]

(4) what progress has been made with his Department's Sustainable Development Strategy. [171809]

Mr. Rammell: As the Foreign and Commonwealth Office's (FCO) Green Minister, I participate fully in ENV(G) Committee activity. I took part in the launch of the consultation on the new UK Sustainable Development Strategy on 21 April this year. I will attend a Royal Parks presentation and discussion in St. James's Park in June to explore how sustainable development relates to the strengths of Government departments.

I am a member of the cabinet committee of Green Ministers. FCO officials attend pre-ENV(G) meetings co-ordinated by the Sub-Committee of Green Ministers. However, exemption 2 of Part 2 of the Code of Practice on Access to Government Information precludes me from divulging the details of cabinet committee business or attendance at meetings. The committee has helped the FCO and other Departments to consider how Government policies can best contribute to sustainable development.

As part of our commitment to Sustainable Development in Government the FCO has implemented an Environmental Management Systems (EMS) across its main London Offices which is certified to environmental standard ISO14001. This covers 78 per cent. of UK based staff and a further 20 per cent. of staff will be covered by an extension to our rural site at Hanslope Park in late 2004. The EMS promotes sustainable development principles in our day-to-day operations. The FCO is working with Defra, DFID and DTI to ensure that international issues are integrated into the new UK Sustainable Development Strategy. The FCO worked with DFID, Defra and DTI to organise a consultation event in New York on the back of the Commission on Sustainable Development 12 on international issues. A further consultation event will be organised in London in July.

The FCO's Strategy (UK International Priorities A Strategy for the FCO, December 2003 Cm 6052) establishes 'sustainable development, underpinned by democracy, good governance and human rights' as one of its eight international priorities.

The Strategy will cover a range of economic, social and environmental issues. It will identify specific actions that the FCO can take through multilateral and bilateral processes and organisations. For example, the strategy will identify how the FCO is working through UN and related international bodies, trade, finance and investment bodies, the EU, G8, the Commonwealth, international partnerships, bilateral action through our posts and programme funds and the UK's Overseas

Territories. The Strategy will also set out how the FCO is managing its Estate sustainably. Country action plans will also be developed in conjunction with posts and other stakeholders. We are working closely with other government departments, external stakeholders including the Sustainable Development Commission. We aim to complete the Strategy by autumn 2004.

Iraq

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs when the Government first indicated that the country of source for the uranium source in Africa by Iraq was Niger. [168284]

Mr. MacShane: The Director-General of the International Atomic Energy Agency (IAEA) stated in February 2003 that papers passed to the Agency concerning Iraqi attempts to procure uranium from Niger appeared to be forgeries.

The Government made clear at that time that it had further evidence to support the claim made in its September Dossier that Iraq had sought to procure uranium from Africa.

The first direct indication that we believed the source to be Niger was made in oral evidence to the Foreign Affairs Committee on 27 June 2003. The evidence is available on the UK Parliament website at: www.publications.parliament.uk/pa/cm200203/cmselect/cmfaff/813/3062707.htm.

Japan

Chris Grayling: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will reopen discussions with Japan under Article 26 of the 1951 Peace Treaty; and if he will make a statement on the status of those who were British passport holders in 1945 who have not received compensation payments from the Government. [171392]

Mr. Rammell: This issue is currently under discussion between my Department and the MOD. I will write to the hon. Member in due course.

Middle East

Mrs. Iris Robinson: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the Road Map for peace; and what role the Government is playing in the initiative. [171811]

Mr. Rammell: The Government are committed to progress towards peace in the Middle East based on the Quartet's roadmap. We are in close contact with both parties and Quartet members (UN, US, EU and Russia) about the political process. The 4 May Quartet statement sets out a balanced approach to encouraging progress. It closely reflects our views on priorities. Since its publication my right hon. Friend the Foreign Secretary has met his Israeli, Palestinian and Egyptian counterparts to discuss next steps.

At a practical level, we are working to help the Palestinian Authority to fulfil its roadmap obligations on security. Although results so far are encouraging, the lack of progress on Phase One of the roadmap, since its publication in April 2003, has been disappointing. Israel should implement a settlement freeze and remove the settlement outposts erected since March 2001. The Palestinian Authority should undertake sustained, targeted and effective operations against terrorists. Both parties and the international community must work to regain the momentum.

Claire Ward: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with representatives of *(a)* Israeli and *(b)* Palestinian people to promote a peaceful settlement; and if he will make a statement. [171885]

Mr. Rammell: My right hon. Friend the Foreign Secretary met both the Israeli Foreign Minister and the Palestinian Foreign Minister on 5 May 2004. The Government are committed to a Quartet roadmap-based peace process. As the Foreign Secretary told both Ministers, both sides need to put an end to violence and take the steps needed to rebuild basic levels of confidence and hope. We are pleased that the Quartet met on 4 May, and welcomed their statement setting out a balanced and constructive way forward. The Quartet reaffirmed the importance of the roadmap, and the need for both parties to meet their obligations under it.

Nuclear Non-Proliferation

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress at the Preparatory Committee meeting for the Nuclear Non-proliferation Treaty Review Conference being held at the United Nations in New York. [171651]

Mr. MacShane: The Third Session of the Preparatory Committee (PrepCom) for the 2005 Review Conference of the Nuclear Non Proliferation Treaty (NPT) in New York concluded on 7 May. The key procedural issues were agreed and this will enable all the necessary preparations for the 2005 Review Conference to go ahead. This outcome met the United Kingdom's main objective for this PrepCom.

The major issues of how to deal with nuclear proliferation and tackle compliance with States' non-proliferation obligations were fully discussed and the United Kingdom presented its ideas and views on these issues in a series of detailed statements. The UK gave full accounts of the practical steps we have taken towards nuclear disarmament and made a presentation on the verification of nuclear disarmament, dealing with the issue of warhead dismantlement.

The United Kingdom also distributed Publicity Material entitled "Making a Safer World" setting out our proposals on countering the proliferation of WMD and the initiatives we have taken; our record on nuclear disarmament; and how we ensure compliance with non-proliferation obligations.

We are now looking forward to working with other States Party and the President-designate of the Review Conference, Ambassador Duarte of Brazil, as he carries out his consultations in the period running up to the Conference in May 2005. It is the role of the Review Conference to take decisions on all issues and recommendations, and the UK will continue to play a major role in strengthening the nuclear non-proliferation regime.

Nuclear Proliferation

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to promote new legislation to tackle nuclear weapons proliferation and the involvement in it of UK citizens and corporations operating from abroad; and if he will make a statement. [171923]

Mr. MacShane: Current legislation provides for the criminalisation of involvement in nuclear weapons proliferation by UK citizens or corporations including when operating from abroad. The Anti-terrorism, Crime and Security Act 2001, which came into force on 14 December 2001, strengthened then existing legislation controlling chemical, nuclear and biological weapons. It introduced equivalent offences to those contained within the Chemical Weapons Act 1996 in respect of biological and nuclear weapons, and introduced a new offence of assisting or inducing certain weapons-related acts overseas. In the nuclear field these are:

knowingly causing a nuclear weapon explosion;

developing, producing, or participating in the development or production of, a nuclear weapon;

having a nuclear weapon in (his) possession;

participating in the transfer of a nuclear weapon; or

engaging in military preparations, or in preparations of a military nature, intending to use, or threatening to use, a nuclear weapon.

The Act applies to acts outside the United Kingdom when they are carried out by United Kingdom nationals, Scottish partnerships and bodies incorporated under the law in any part of the United Kingdom, Channel Islands, Isle of Man or any colony. We will keep under review the need for any further legislation.

Tackling the threat posed by the spread of weapons of mass destruction remains a top priority for the UK, as my right hon. Friend the Foreign Secretary made clear in his Statement to the House on 25 February 2004, *Official Report*, columns 46–49WS. The UK was instrumental in getting Security Council agreement to UNSCR 1540, passed on 28 April 2004. The UNSCR addresses a current gap in international law in addressing the problem of WMD proliferation by non-state actors and is a concrete example of the Security Council responding to a threat to international peace and security. It makes clear that all states have a responsibility to take steps to prevent WMD proliferation, and places legally binding obligations on all states of the UN under Chapter VII of the UN Charter (threats to international peace and security).

Overseas Recruitment

Tom Brake: To ask the Secretary of State for Foreign and Commonwealth Affairs what formal assistance his Department's overseas offices offer to UK-based recruitment agencies in the recruitment of education workers; and how many departmental staff are dedicated to offering such assistance. [170986]

Mr. Mullin: No staff of the Foreign and Commonwealth Office are specifically dedicated to the activity of assisting with the recruitment of education workers. The commercial and other services of overseas Posts of the Foreign and Commonwealth Office are open to eligible UK-based recruitment agencies as to other eligible UK businesses or organisations.

Paper Recycling

Mr. Breed: To ask the Secretary of State for Foreign and Commonwealth Affairs what measures he has put in place to ensure that his Department meets the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that *(a)* all copying paper bought by the Department is 100 per cent. recycled with a minimum of 75 per cent. post consumer waste content and *(b)* all paper for printed publications bought by the Department is 60 per cent. recycled, of which a minimum is 75 per cent. post consumer waste. [171814]

Mr. Rammell: Targets for Sustainable Development in Government, including the DEFRA paper quick wins, are communicated within the Foreign and Commonwealth Office (FCO) as part of our Environmental Management System.

Our purchasing function is currently pursuing a new contract for 100 per cent. recycled copying paper. Until March 2004 we were purchasing 100 per cent. recycled paper but due to a mill closure we have recently been purchasing 80 per cent. recycled content paper in order to ensure continuity of supply.

Our Publication and Print Services teams within the FCO have been issued with guidance on the recycled content target for print publications. From May this year the teams have set a minimum recycled content of 75 per cent. post consumer waste for publications.

Sudan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Sudan concerning *(a)* peace negotiations in the south of the country and *(b)* Darfur. [171389]

Mr. Mullin: My right hon. Friends, the Foreign Secretary and the Secretary of State for International Development, and I discussed these and other issues with the Sudanese Foreign Minister during his visit to London on 11 May.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the peace process in Sudan. [171827]

Mr. Mullin: The Sudan peace talks continue in Naivasha, Kenya, under the auspices of the Inter-Governmental Authority on Development. The UK Special Representative last visited Naivasha on 7–8 May. The parties are hopeful that a framework peace agreement will emerge very soon.

Timber

Ms Walley: To ask the Secretary of State for Foreign and Commonwealth Affairs whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167629]

Mr. Rammell: As timber procurement policy is the responsibility of the Department for Environment, Food and Rural Affairs, I refer my hon. Friend to the reply given by my hon. Friend the Minister of State for the Environment and Agri-Environment (Mr. Morley) on 10 May 2004, *Official Report*, column 31W.

United Arab Emirates

Huw Irranca-Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his recent visit to the United Arab Emirates; and what plans there are for future ministerial visits to foster *(a)* business links and *(b)* cultural relations. [168568]

Mr. Rammell: My right hon. Friend the Foreign Secretary visited the United Arab Emirates (UAE) on 16–17 March. He met the Crown Prince and Deputy Crown Prince of Abu Dhabi and the UAE Deputy Prime Minister and Minister of State for Foreign Affairs. They discussed bilateral and regional issues. We welcome this opportunity to strengthen our relationship with the UAE.

Foreign engagements for the Foreign Secretary and other Ministers are kept under constant review. It is not our practice to announce such visits until they are firm. Because of the unpredictable nature of world events, final decisions on overseas visits are often not possible until very shortly before the day of travel.

Western Sahara

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Government of Morocco encouraging co-operation with the Sahrawis. [172100]

Mr. Rammell: We regularly discuss the situation in Western Sahara with our contacts at all levels in the Moroccan Government. Most recently, my noble Friend the Baroness Symons of Vernham Dean discussed Western Sahara with the Moroccan Minister of Interior Mr. Sahel when he visited London on 28 April.

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs if the UK will press for an increase in the UN presence in the Western Sahara. [172104]

Mr. Rammell: United Nations Security Council Resolution 1541 which was adopted unanimously on 29 April 2004 calls on the Secretary-General to provide an evaluation of the mission size necessary for the United Nations Mission for the Referendum in Western Sahara to carry out its mandated tasks, with a view towards possible reduction, in his next report due before 31 October 2004. Pending these results the Government have no current plans to call for an increase in the UN presence in the Western Sahara.

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs what assurances have been given by the Moroccan Government regarding the safety of inhabitants of the Western Sahara. [172105]

Mr. Rammell: Ministers and Foreign and Commonwealth Office officials regularly raise with all parties to the Western Sahara dispute their responsibilities in the search for a fair and lasting solution to that dispute which allows for the self-determination of the people of Western Sahara.

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs what action the Government is taking to encourage Morocco to resolve the territorial dispute in Western Sahara. [172107]

Mr. Rammell: We continue at Ministerial and official level to urge Morocco to engage constructively with the UN Secretary General's personal envoy, James Baker III, concerning the Peace Plan for Western Sahara, to reach a solution that is acceptable to all parties and allows for self-determination for the people of Western Sahara.

CONSTITUTIONAL AFFAIRS

Departmental Expenditure (Entertainment)

Mr. Laws: To ask the Parliamentary Secretary, Department for Constitutional Affairs what his latest estimate is of the amount spent by his Department on official entertainment in each year from 1996–97 to 2004–05. [169000]

Mr. Lammy: Expenditure by both Officials and Ministers on entertainment for the financial year 2003–04 was £79,050 (£64,718—covers costs related to Ministers and the Lord Chancellor, and £14,332—costs related to Officials), in 2002–03 was £43,378, in 2001–02 was £44,730, in 2000–01 was £60,768, in 1999–2000 was £71,166 and in 1998–99 was £45,087.

Information on previous years and the current year is not readily available.

FOI Requests

Tony Wright: To ask the Parliamentary Secretary, Department for Constitutional Affairs what charges will be made for information requests under the Freedom of Information Act 2000. [172103]

Mr. Lammy: The Freedom of Information Act provides that the Secretary of State may make regulations to determine what fee may be charged. Draft fees regulations were published in 2000. A working group has been considering changes to these regulations and final regulations will be brought forward by the Government in time for being in effect on 1 January 2005.

Mental Incapacity Bill

Dr. Iddon: To ask the Parliamentary Secretary, Department for Constitutional Affairs what assessment he has made of the implications of the judgement given in the European Court of Human Rights on 9 March in the Glass *v.* the UK case for the draft Mental Incapacity Bill. [172448]

Mr. Lammy: The Glass *v.s.* UK case relates to a child, whereas the draft Mental Incapacity Bill does not apply to persons under the age of 16.

However, the draft Mental Incapacity Bill proposes a statutory framework for decision-making on behalf of adults without capacity. The draft Bill stresses the importance of consultation with those engaged in caring for the person before making a decision. This would ensure that all professionals involved in making such decisions are aware of their roles and responsibilities. The Bill also proposes to introduce a new specialist and accessible Court of Protection, which would help to resolve such disputes when they arise in relation to adults without capacity.

Ministerial Visits

Matthew Taylor: To ask the Parliamentary Under Secretary of State for Department for Constitutional Affairs if he will list visits made by each Minister in the Department between December 2003 and April 2004, broken down by *(a)* date, *(b)* constituency visited and *(c)* cost. [171558]

Mr. Lammy: The number of visits undertaken by Ministers in my Department are as follows:

Secretary of State and Lord Chancellor

	Constituency	*Cost(£)*
19 December 2003	Middlesbrough	638.60
2004		
9 January	Belfast South	1,529.70
29 January	Birmingham, Edgbaston	483.85
30 January	Derby North	
20 February	Edinburgh Central	758.76
2 March	Manchester, Blackley	1,043.63
12 March	Harrow East	[1]—
12 March	Oxford West and Abingdon	584.86
19 March	Watford	[1]—
26 March	Southwark Crown Court	[1]—
2 April	Button Coldfield	334.00
16 April	Worcester	[1]—
19 April	Leicester South	[1]—
30 April	Leeds North East	763.71
30 April	Bradford West	763.71

[1] No additional costs incurred aside from the normal cost of running the Ministerial car

Lord Filkin

	Constituency	*Cost (£)*
11 December 2003	Cardiff Central	792.91
12 December 2003	Manchester Central	514.81
2004		
9 January	Cambridge	[1]—
23 January	Kettering	[1]—
18 February	Belfast South	696.44
6 March	Harrogate and Knaresborough	620.64
26 March	Harrogate and Knaresborough	620.64
2 April	Loughborough	[1]—
22 April	Nottingham South	504.00

[1] No additional costs incurred aside from the normal cost of running the Ministerial car

Christopher Leslie

	Constituency	*Cost (£)*
12 December 2003	Shipley	[1]—
2004		
5 February	Reading	78.00
6 February	Liverpool	466.92
6 February	Central Manchester	96.00
20 February	Sheffield	198.63
22 March	Manchester	347.15
22 March	St. Helens	[1]—
22 April	Birmingham	354.00

[1] No additional costs incurred aside from the normal cost of running the Ministerial car

David Lammy

	Constituency	*Cost (£)*
25 February 2004	South Dorset	370.95
21 April 2004	Manchester Central	679.45

[1] No additional costs incurred aside from the normal cost of running the Ministerial car

Referendums

Mr. Greg Knight: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the total cost has been of holding referendums in the UK since 1997. [172045]

Mr. Leslie: The total estimated cost of holding referendums in the UK since 1997, excluding Mayoral Referendums, is £9,600,000. The breakdown of costs is:

1997 Welsh Assembly Referendum £2,300,000.

1997 Scottish Parliament Referendum £4,350,000.

1998 Northern Ireland Good Friday Agreement Referendum £1,450,000.

1998 Greater London Authority Referendum £1,500,000.

30 Mayoral Referendums have also been held under the Local Government Act 2000. The figures for the cost of these referendums are not held centrally and have therefore not been included in the total.

Unmade Roads

Mr. Wyatt: To ask the Parliamentary Secretary, Department for Constitutional Affairs who owns the unmade road at the bottom of Gordon Avenue and Harold Street in Queenborough, Isle of Sheppey. [171384]

Mr. Lammy: Land Registry currently holds information on the ownership of almost 19.5 million registered titled in England and Wales. This information is routinely made available to everyone, on the payment of small fee.

Land Registry processed over four million such requests in 2002–03, over 99 per cent. of which were processed within two working days of receipt. Methods of application for land registration services, and the fees payable, are prescribed by statute and it would be inappropriate for these to be circumvented by a Parliamentary Question.

I have asked the Chief Land Registrar to write to my hon. Friend setting out the options for acquiring this information.

PRIME MINISTER

Advisers/Consultants

Bob Spink: To ask the Prime Minister how much his Office spent on *(a)* external consultants and *(b)* special advisers in each of the last three years. [172341]

The Prime Minister: For these purposes, my office is part of the Cabinet Office. For the cost of external consultants for 2001–02 and 2002–03, I refer the hon. Member to the answer my hon. Friend the Minister for the Cabinet Office (Mr. Alexander) gave to the hon.

Member for North East Hertfordshire (Mr. Heald) on 22 March 2004, *Official Report*, column 561W. Final figures for 2003–04 are not yet available.

For special advisers, I refer the hon. Member to the answer I gave to the hon. Member for Yeovil (Mr. Laws) on 15 January 2004, *Official Report*, column 836W to 837W.

GEC

Mr. Salmond: To ask the Prime Minister if he will list the dates of meetings he held with representatives of GEC in *(a)* 1997, *(b)* 1998 and *(c)* 1999, broken down by subjects discussed. [173001]

The Prime Minister: I have meetings with a wide range of organisations and individuals. As with previous Administrations, it is not the Government's practice to provide details of all such meetings under exemptions 2 and 7 of the Code of Practice on Access to Government Information.

Iraq

Glenda Jackson: To ask the Prime Minister pursuant to his statement of 19 April 2004, *Official Report*, column 21, on Iraq and the Middle East peace process, whether the employment of civilian *(a)* contractors and *(b)* interrogators in Abu Ghraib prison forms part of the political and military strategy in Iraq. [172052]

The Prime Minister: President Bush and I have both made clear, any abuse of human rights, torture or maltreatment of civilians in Iraq is wholly unacceptable and all cases will be investigated fully.

The employment of civilian contractors and interrogators in Abu Ghraib prison is a matter for the US authorities. As has been made clear, three UK military personnel worked in Abu Ghraib between January and April of this year to assist in the gathering of information important to the Coalition's aim of establishing stability in Iraq.

Mr. Andrew Turner: To ask the Prime Minister what representations he has received from hon. Members, and when, concerning maltreatment of Iraqi detainees by US forces. [172663]

The Prime Minister: As far as I am aware, as at Monday 10 May I had received one letter from one hon. Member on 30 April 2004, to which I have replied. As at Monday 10 May I had also received four written Parliamentary Questions from my hon. Friend, the Member for Hampstead and Highgate (Ms Jackson).

President Bush and I have both made clear, any abuse of human rights, torture or maltreatment of civilians in Iraq is wholly unacceptable and all cases will be investigated fully.

Productivity

Bob Spink: To ask the Prime Minister what his policy is for *(a)* increasing the productivity and *(b)* cutting the costs of his Office. [172180]

The Prime Minister: For these purposes, my office is part of the Cabinet Office. I refer the hon. Member to answer given to him by my hon. Friend the Financial Secretary on 10 May 2004. *Official Report*, column 148W to 149W.

NORTHERN IRELAND

All-terrain Vehicles

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans he has to increase safety measures for the use of all-terrain vehicles and motorcycles; and if he will make a statement. [171766]

Angela Smith: There are no plans to increase safety measures for the use of all-terrain vehicles and motorcycles.

These vehicles are primarily intended for off-road use, particularly for agricultural/forestry purposes or leisure use. The Health and Safety Executive (HSE) provides advice on the safe use of these vehicles, sometimes known as quad bikes or all-terrain cycles, for example on such issues as training, protective clothing and equipment, maintenance and safe driving methods. Free leaflets can be downloaded from the HSE website: www.hse.gov.uk.

The design and construction of these vehicles do not normally meet the requirements for unrestricted road use unless they are modified to comply with regulations on construction, use and lighting. Moreover, for such vehicles to be licensed for unrestricted road use they must also comply with the requirements of the EC Directive (92/61/EC) on type approval for motorcycles.

Drivers of these vehicles, when on a road, are required to hold an appropriate driving licence and have minimum third-party insurance.

Asbestos

Malcolm Bruce: To ask the Secretary of State for Northern Ireland if he will list the buildings occupied by his departmental and agency staff which require *(a)* remedial work on and *(b)* removal of asbestos; what this work will cost; what budgets are available for this work for (i) 2004 and (ii) 2005; and what budget is available for future asbestos surveys. [159652]

Mr. Pearson: The following buildings occupied by staff of the 11 departments of the Northern Ireland Administration and its agencies have been identified as requiring remedial work or removal of asbestos.

Ballymena County Hall
Twickenham House, Ballymena
18 Castlewellan Road, Banbridge
6/8 Scarva Street, Banbridge
Churchill House, Belfast
Castle Buildings, Stormont Estate
Ladas Drive, Belfast
Health Estates, Belfast
Fermanagh House, Belfast
Netherleigh, Belfast
56/58 Ann Street, Belfast
20 College Gardens, Belfast

Hampden House, Belfast
Inniskeen House, Enniskillen
Commonwealth House, Belfast
State Building, Belfast
Stormont Estate Sub Station
Courier HQ, Stormont
Gate Lodge, Prince of Wales Ave, Stormont
Victoria Hall, Belfast
Craigantlet Buildings, Stormont
Boiler/Greenhouse, Stormont
1 Davey Street, Carrickfergus
8 Artillery Road, Coleraine
36 Thomas Street, Dungannon
15 East Bridge Street, Enniskillen
Castle Barracks, Enniskillen
45 Pound Street, Larne
4–6 Killane Road, Limavady
14 Asylum Road, Londonderry
Valencia Place, Newcastle
8 East Street, Newtownards
4 Glenford Way, Newtownards
32 Devenney Road, Omagh
42 Kings Street, Magherafelt
86 Main Street, Limavady
1A Belt Road, Londonderry
9 Robert Street, Newtownards
7/9 Conway Square, Newtownards
19 Mountjoy Road, Omagh
20 Derry Road, Strabane
Greenmount Campus (Main) (39 buildings)
Greenmount Campus (Abbey Farm) (4 buildings)
Greenmount Campus (Glenwherry) (8 buildings)
Loughry Campus (39 buildings)
Enniskillen Campus (10 buildings)
Veterinary Sciences Division (12 buildings)
Newforge (14 buildings)
Department of Agriculture and Rural Development (Owned/Leased) (15 buildings)
Craigavon Driver and Vehicle Testing Agency
Omagh Driver and Vehicle Testing Agency
Armagh Driver and Vehicle Testing Agency
Training Centre at Felden

There are no separate budgets for all asbestos-related remedial or removal work, costs are contained within the annual maintenance budgets. No specific budgets have been set aside for future asbestos surveys.

Malcolm Bruce: To ask the Secretary of State for Northern Ireland what proportion of buildings occupied by *(a)* staff of the Department and *(b)* staff of the Department's executive agencies have been surveyed for the purpose of identifying the presence of asbestos prior to the implementation of the Control of Asbestos at Work Regulations 2002. [159660]

Mr. Pearson: Central Procurement Directorate (CPD) acting on behalf of Office estates and Building standards Division (OBD) of the Department of Finance and Personnel has surveyed 94 per cent. of the buildings within the office estate to identify the presence of asbestos.

Of the specialised buildings under the control of the various Departments 91 per cent. have been surveyed for the presence of asbestos.

It has not been possible to distinguish between buildings occupied by staff of the Department and staff occupied by the Department's agencies.

Contaminated Land

Lady Hermon: To ask the Secretary of State for Northern Ireland for what reasons part 3 of the Waste and Contaminated Land (Northern Ireland) Order 1997 has not yet been brought into operation; and if he will make a statement. [172370]

Angela Smith: I refer the hon. Lady to the answer I gave on 21 April 2004, *Official Report*, columns 562–63W.

Domestic Rates

Edward Davey: To ask the Secretary of State for Northern Ireland what the cost to *(a)* his Department, *(b)* the Northern Ireland Rate Collection Agency, *(c)* the Northern Ireland Valuation and Lands Agency and *(d)* local authorities was of administering domestic rates in Northern Ireland in the financial years (i) 2001–02 and (ii) 2002–03; and what the estimated costs are for the financial years (A) 2003–04 and (B) 2004–05. [169955]

Mr. Pearson: It is not possible without incurring disproportionate cost to disaggregate the administration of domestic rates from non-domestic rates. The figures in table 1 as follows, are the direct costs, including non-cash, of administering all rates in relation to *(a)* the 11 departments of the Northern Ireland Administration *(b)* the Northern Ireland Rate Collection Agency and *(c)* the Northern Ireland Valuation and Lands Agency. Information is not readily held in relation to *(d)* local authorities and could only be obtained at disproportionate cost.

Table 1

£000

	Outturn		*Estimate*	
	2001–02	*2002–03*	*2003–04*	*2004–05*
(a) Core Departments[1]	n/a	n/a	743	768
(b) Rate Collection Agency	7,505	7,328	8,914	10,223
(c) Valuation and Lands Agency	6,679	5,731	6,504	7,555

[1] Core Departments include the cost of policy development.

Educational Psychologists

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what funding he will make available to assist local authorities in the transition from a one year course to a three year doctorate for training educational psychologists. [171757]

Mr. Gardiner: The Department for Education and Skills is currently considering the proposals made by the British Psychological society for a three-year doctorate for the training of educational psychologists.

The Department of Education has been in discussion with the Queen's University of Belfast and the five Education and Library Boards about the implications for Northern Ireland if these revised arrangements are adopted.

A Northern Ireland decision on the matter will be taken in light of local needs and the resources available to the Department for future years.

Employer Training Pilots

Mr. Beggs: To ask the Secretary of State for Northern Ireland whether Northern Ireland has been included in the Employer Training Pilots. [171716]

Mr. Gardiner: There are Employer Training Pilots running in 20 designated areas in England only. These are a HM Treasury initiative and at present there are no indications that they will be extended to Northern Ireland. However, the aims of the Pilots are closely allied to the Department for Employment and Learning's strategic objectives for workforce development. Department officials are therefore monitoring developments on the implementation of the Pilots particularly in regard to their effectiveness and value for money.

Farming

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what steps are being taken to assist the farming community in Northern Ireland to promote greater availability of home grown produce to consumers. [172065]

Mr. Pearson: The Department of Agriculture and Rural Development and Invest Northern Ireland continue to work closely with processors in providing financial and technical support to ensure they are in a position to supply the retail multiples. There has also been liaison with the multiples to encourage them to increase trade with Northern Ireland suppliers. In addition the Farmers' Market Initiative, which concerns direct selling to consumers, has received funding under Leader and assistance has been granted to the Northern Ireland Festival of Food and Drink which seeks to promote the uptake of local produce.

Ice Hockey

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps he is taking to promote the development of amateur ice hockey in Northern Ireland. [171926]

Angela Smith: Since 2001–02 a total of £4,150 has been provided, via the Sports Council for Northern Ireland, to the governing body for ice hockey in Northern Ireland, the Northern Ireland Ice Hockey Association (NIIHA), to help it promote the development of both professional and amateur ice hockey in Northern Ireland. In addition, the Sports Council is providing ongoing advice and guidance to a range of organisations involved in the promotion and development of amateur ice hockey in Northern Ireland. These include individual clubs, local authorities, the NIIHA and the Northern Ireland Ice Hockey Federation.

Lady Hermon: To ask the Secretary of State for Northern Ireland whether the Sports Council for Northern Ireland officially recognises any body governing ice hockey. [172079]

Angela Smith: At present the Sports Council for Northern Ireland officially recognises the Northern Ireland Ice Hockey Association (NIIHA) as the body governing ice hockey. I understand, however, that the NIIHA decided last year to reconstitute. Following this decision, the Sports Council entered into discussions with representatives of ice hockey in Northern Ireland in relation to the possibilities of official recognition for an alternative governing body for the sport. These discussions are still on-going and, until they are concluded, the Sports Council will continue to recognise NIIHA as the body governing ice hockey.

Illegal Fuel

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what estimate he has made of the amount of illegal fuel smuggled into Northern Ireland in 2003. [169932]

John Healey: I have been asked to reply.

In Northern Ireland, it is not possible to distinguish between the proportion of non UK duty-paid fuel accounted for by legitimate cross-border shopping and the proportion accounted for by cross-border smuggling and the misuse of rebated and low-tax fuels supplied for non-road use. Customs' latest estimates of the overall revenue loss both from legitimate cross-border shopping and from all forms of oils fraud, including smuggling, in Northern Ireland in 2000, 2001 and 2002 are set out in HM Customs and Excise's Annual Report and Accounts (HC 52) published in December 2003.

Customs' estimates for 2003 will be included in their Annual Report and Accounts for 2003–04.

Members' Salary/Allowances

Lady Hermon: To ask the Secretary of State for Northern Ireland what the total *(a)* salary and *(b)* allowances available to an hon. Member who is also a Member of the Northern Ireland Legislative Assembly are. [172092]

Mr. Paul Murphy: With regard to the hon. Members' salaries and allowances, I refer the hon. Lady to the House of Commons Information Factsheet M5—"Members pay, pensions and allowances", a copy of which is available for the Information Office of the House and online at http: //www. parliament.uk/ document/upload/M05.pdf.

A Member of the Northern Ireland Assembly (MLA) who is a member of either House of Parliament will have their salary payable as an MLA reduced by two thirds, presently to £10,606. MLAs' allowances are payable in respect of their duties as Members of the Northern Ireland Assembly and are not reduced if an MLA is also

a Member of either House of Parliament. The allowances which MLAs may claim in respect of those duties are:

Office Cost Allowance—not exceeding £48,000 in any year
Travel Allowance
Subsistence Allowance
Disability Allowance—not exceeding £10,000 in any year
Travel Allowance—employees
Staff Pensions and Redundancy Allowance
Temporary Secretarial Allowance.

Northern Ireland Human Rights Commission

Mr. Dodds: To ask the Secretary of State for Northern Ireland what the budget was for casework of the Northern Ireland Human Rights Commission in each year since its formation. [168166]

Mr. Spellar: The Northern Ireland Human Rights Commission has provided me with the following details:

	Amount (£)
1999–2000	75,000
2000–01	75,000
2001–02	100,000
2002–03	115,000
2003–04	100,000

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many cases the Northern Ireland Human Rights Commission has supported on behalf of individuals in each year since its formation. [168167]

Mr. Spellar: The Northern Ireland Human Rights Commission has provided me with the following details:

	Cases
1999–2000	11
2000–01	15
2001–02	7
2002–03	10

Mr. Dodds: To ask the Secretary of State for Northern Ireland what the cost was of each case supported by the Northern Ireland Human Rights Commission in each year since its formation. [168168]

Mr. Spellar: The Northern Ireland Human Rights Commission has provided me with the following details:

	Amount (£)
1999–2000	[1]26,520
	3,000
	7,527
	[1]28,179
	6,545
	7,500
	750
	375
	3,750
	1,700
	176
2000–01	[1]8,047
	[1]65,700
	3,967
	411
	100
	110
	250
	176
	470
	235
	1,469
2001–02	[1]80,000
	429

	2,500
	1,270
	794
	1,335
	1,370
	5,000
	1,935

[1] Where a cost is marked incomplete, the case is either still ongoing or final costs have not been submitted. Similarly where the number of cases supported does not tally with the number of case costs listed, costs have not yet been submitted. It should also be noted that the costs associated with a case can be spread over several years and accrued accordingly in the annual accounts.

Case costs vary as some are simply legal opinion or an intervention to the Court while other cases have been supported to the Court of Appeal, House of Lords or the European Court of Human Rights.

Patient Exemption Fraud

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what progress has been made towards meeting the targets for the reduction of patient exemption fraud in each Northern Ireland Health Board area; and what further targets have been put in place. [171796]

Angela Smith: The target for the reduction of patient exemption fraud is set at Northern Ireland, rather than at an individual Health Board, level.

2004–05 Priorities for Action sets a Northern Ireland target for patient fraud exemption of a 45 per cent. reduction from the 1999–2000 level by 31March 2005. The Department remains committed to the achievement of this target.

The most recent available results are in respect of 2002–03, which showed a reduction in the level of estimated patient fraud of around 37 per cent. compared to 1999–2000 levels.

Planning Policy

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on his Department's policy on the development of out-of-town supermarkets in Northern Ireland. [172033]

Angela Smith: The Department of the Environment (NI)'s policy on out-of-town development is set out in Planning Policy Statement 5—Retailing and Town Centres, published in June 1996. A copy has been placed in the Library.

The Department for Regional Development (NI) has commenced work on a review of PPS 5 and aims to publish a draft for consultation in the autumn. A copy of this will then be placed in the Library.

Plastic Bullets

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what assessment has been made of the effects of using *(a)* tasers and *(b)* other devices in place of plastic bullets. [171754]

Mr. Pearson: The Association of Chief Police Officers is currently conducting a trial of the taser in five police forces. The fourth report of the NIO-led Steering Group published on 29 January provided a summary of the initial review of the trial and of the independent assessment of the medical implications on the use within ACPO guidelines of the taser. That medical assessment was set out more fully in the Steering Group's third report, published in December 2002.

The NIO-led Steering Group has assessed the potential of a wide range of commercial products as potential alternatives to the current L21A1 baton round but none to date have met the criteria for an acceptable, effective and less lethal option. The reports of the Steering Group set out the findings of the assessments in detail.

The fourth report also described the progress that the Government have made in developing two alternatives—the attenuating energy projectile and discriminating irritant projectile.

Public Bodies

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the total cost to public funds was of departmentally-related public bodies to which public appointments are made in Northern Ireland in each of the last five years. [170489]

Mr. Paul Murphy: With the exception of 2003, the information on the cost of non-departmental public bodies (NDPBs) in Northern Ireland is available in the 'Public Bodies' publication produced annually by the Cabinet Office. The last five editions are available in the Library.

Information on the cost of NDPBs for financial year 2002–03, which was not include in the Public Bodies 2003 publication, was compiled in December 2003. I have placed a table detailing these costs in the Library.

There are other bodies to which public appointments are made but that information is not held centrally.

Rugby

Lady Hermon: To ask the Secretary of State for Northern Ireland what support the Government will provide to ensure the development of Ravenhill Rugby Ground to enable it to meet current standards. [170245]

Angela Smith: The Government have already provided, through the Sports Council for Northern Ireland's Interim Safe Sports Grounds Scheme, £559,981 to the Ulster Branch of the Irish Rugby Football Union to support essential health and safety works at Ravenhill Rugby Ground. We are also currently engaged in discussions with the Ulster Branch about a wide range of issues facing Rugby in Northern Ireland, including the further development of Ravenhill Rugby Ground and the possibility of additional Government support. Until the present discussions are concluded, it would be inappropriate to comment on whether and to what extent additional Government support might be provided to enable the Ground to meet current standards.

School Travel

Lady Hermon: To ask the Secretary of State for Northern Ireland (1) what the total amount of funding allocated to develop school travel plans in Northern Ireland in each of the last three years was; and how much funding has been allocated for further development; [172007]

(2) what assessment he has made of the safe routes to schools pilots that are being developed; when the final assessment report on the safe routes to schools pilots will be published; and if he will make a statement. [172010]

Mr. Spellar: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has written to the hon. Lady directly in response to these questions.

Letter from Dr. Malcolm McKibbin to Lady Hermon, dated 11 May 2004:

The Secretary of State for Northern Ireland has asked me to respond to your recently tabled Parliamentary Questions about funding allocated to develop school travel plans in Northern Ireland and what assessment has been made of the six safe routes to schools pilots that are being developed.

You will be aware that, as proposed by the Regional Transportation Strategy 2002–12, Roads Service has been working to address the issue of the 'school run', given its impact on morning traffic congestion, through the "Safer Routes to Schools" initiative with the aim of encouraging more children to walk, cycle and use public transport for their journey to school.

The Department of Education, the Department of the Environment Road Safety Team and other agencies are working alongside Roads Service in this project. The following six schools are currently participating in the initiative:

St. Joseph's College, Belfast;

Oakwood Integrated Primary School, Dunmurry;

Wallace High School, Lisburn;

St. Anthony's Primary School, Craigavon;

Parkhall College, Antrim; and St. Brigid's College, Londonderry.

This is the first time a schools initiative to promote sustainable modes of transport in response to a traffic congestion issue has been undertaken in Northern Ireland. Measures at the six schools are mainly exploratory and at different stages of development. The overall aim is to assist each school in developing a travel plan, which sets out a package of measures for reducing the number of car trips made to school. Where appropriate, Roads Service will subsequently introduce improvements to the roadway such as installing pedestrian facilities and traffic calming measures to facilitate children who may want to walk, cycle and use public transport. Additionally, other measures such as cycle shelters and lockers are provided by the Department of Education inside the schools premises.

To get the school travel initiative started, Roads Service and its partners have spent nearly £85,000 over the last three years (2001/02-£ nil, 2002/03-£48,391, 2003/04-£36,253) on assisting development of travel plans for the participating schools. The funding was used to investigate existing infrastructure and facilities at the schools, examine accident data, undertake surveys to establish baseline school travel information and pay for the training of a Travel Plan Co-ordinator who was appointed to champion the initiative in the schools. This work was followed by the preparation of draft travel plans, which were given over to the schools to take ownership of and develop in line with the ethos of the school and its thinking on the sustainable transport concept. No specific funding has been allocated yet for the further development of travel plans as resources are being concentrated for the time being on the pilot group of six schools. However, it is intended, as part of the next stage of the initiative, to develop a practical support package that encourages other schools to engage in the travel plan process.

The improvements to the infrastructure and facilities at each of the pilot schools will be completed this financial year. While we will undertake a preliminary assessment at the end of the school year 2004/05 of how successful these measures have been, initial work including installation of cycle shelters at the schools has had very positive results and generated an increase in cycling among pupils for the school journey. It is anticipated that the planned infrastructure work to the road network adjacent to the schools should have equal effect in facilitating and encouraging more children to use sustainable modes of transport.

I hope this information is helpful.

Sport Governing Bodies

Lady Hermon: To ask the Secretary of State for Northern Ireland what criteria are applied by the Sports Council in recognising a governing body for any sport when there is more than one potential candidate. [172078]

Angela Smith: The Sports Council for Northern Ireland applies the policy criteria adopted by Sports Councils across the United Kingdom in recognising a governing body for any sport. This states that only one body will be recognised per sport. In addition, in recognising a body, criteria are applied under the headings of constitution and management, structure and organisation, promotion of the activity, safety and impact. When there is more than one potential candidate for any sport, the decision is based on which body best meets these criteria.

Sporting Venues

Lady Hermon: To ask the Secretary of State for Northern Ireland what support he is providing to ensure that Casement Park remains a venue for Gaelic games. [172285]

Angela Smith: I have already provided, through the Sports Council for Northern Ireland's Interim Safe Sports Grounds Scheme, £150,000 to the Antrim County Board of the Gaelic Athletic Association (GAA) to help ensure that Casement Park remains a venue for Gaelic Games. The Sports Council has also recently begun discussions with the Ulster Council of the GAA, which is responsible for the overall development of Gaelic sports in Northern Ireland, about the future capital priorities for Gaelic games including those relating to Casement Park. Until these discussions are completed it would not be appropriate to comment on what additional support might be provided to ensure that Casement Park remains a venue for Gaelic Games.

Translink

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many new buses were purchased by Translink for use in Northern Ireland in each of the last five years. [172062]

Mr. Spellar: Translink advise that buses purchased in the last five years are as detailed as follows.

	Buses purchased
2003–04	193
2002–03	17
2001–02	52
2000–01	41
1999–2000	124

Women's Aid Helpline

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland whether funding will be provided to ensure the continued operation of the Women's Aid 24-hour helpline; and if he will make a statement. [171760]

Angela Smith: The Department of Health, Social Services and Public Safety is liaising with NI Women's Aid and I have met with the organisation regarding the projected funding deficit for 2004–05 in respect of their helpline. When all considerations have been determined a decision will be made and it is hoped that this matter will be resolved as a matter of urgency.

TRANSPORT

Aylesbury Southern Distributor Road

Mr. Lidington: To ask the Secretary of State for Transport what assessment he has made of whether the proposed Aylesbury southern distributor road should *(a)* be a dual carriageway, *(b)* be on an embankment and *(c)* have grade separated junctions. [172166]

Mr. Jamieson: None. The Secretary of State has not received a proposal for delivery of the Aylesbury southern distributor road so is not undertaking any assessment.

However, we anticipate that the local authority will submit proposals in due course to deliver this scheme.

Mr. Lidington: To ask the Secretary of State for Transport what estimate he has made of the cost of the Aylesbury southern-distributor road proposed in the Cross-Government Statement on the draft Milton Keynes and South Midlands sub-regional strategy; how it is planned that the road should be funded; and what his current estimate is of the timescale for the project. [172167]

Mr. Jamieson: The Secretary of State has not received any proposals relating to the Aylesbury southern distributor road and, therefore, has made no estimate of the cost.

It is for the Local Authority to bring forward specific proposals for a suitably phased scheme for funding under the Local Transport Plan process, taking into account developer contributions.

The indicative timescale for this scheme is set out in the draft Milton Keynes and South Midlands sub regional strategy.

Bus Partnership Forum

Mr. Damian Green: To ask the Secretary of State for Transport what activities have been undertaken by the Bus Partnership Forum; and how often it has met in each year since its creation. [171938]

Mr. McNulty: I Chair the Bus Partnership Forum, which brings together senior representatives of the bus industry and local government, and first met in July 2002. Since then the Forum has met a further three times, January and July 2003 and on 23 February 2004.

Through the work of a number of task and finish groups and the official level steering group, the Forum is tackling problems that may hinder further growth in the industry and is identifying practical solutions. Achievements to date include:

publication of a report on understanding customer needs;

agreeing a code of practice on service stability (limiting the number of timetable changes made per year) for local implementation;

publication of a CD-ROM resource pack on bus priorities;

publication of model agreements on joint ticketing schemes as a way of encouraging further schemes;

and commissioning the first national survey of bus punctuality, with a view to establishing realistic standards and targets.

Further work is in progress on performance monitoring and integrated ticketing and a report on innovative transport and social inclusion issues is due in the summer of 2004.

Mr. Damian Green: To ask the Secretary of State for Transport what the *(a)* expenditure and *(b)* administration costs of the Bus Partnership Forum were for each year since 1997. [171972]

Mr. McNulty: The forum was established in July 2002. The cost of administering the Forum is negligible and is met from the existing budgets of the constituent organisations. No additional public expenditure has been incurred from the work of the Forum over and above that already planned for in existing research and consultancy programmes.

Bus Stops

Mr. Damian Green: To ask the Secretary of State for Transport what percentage of bus stops in *(a)* rural and *(b)* urban areas outside London have real time bus information. [171973]

Mr. McNulty: In April 2002, DfT awarded £20 million supplementary credit approval (SCA) to support 19 local authorities (LA) and passenger transport executives (PTE) in providing real time information (RTI) on their local bus services. The SCA programme ended at the end of March 2004. It has been used to support the provision of:

over 2,600 buses equipped to provide RTI

nearly 1,300 at-stop signs now providing RTI

12 new or extended websites

seven new or extended SMS services.

The transport direct team (TDT) is currently working on a national database of bus stops and public transport interchange points. Bus stops are recorded by LA, rather than by rural and urban areas. The information provided below is therefore broken down into PTEs and shire counties. PTEs are amalgamations of adjacent urban LAs, and as such have been used as an indication of urban areas. Shire counties have been taken to represent rural areas. The TDT database holds a total of 277,363 bus stops in England, of these 65,954 are in the PTEs outside London and 191,760 in the shire counties.

In late 2003, a survey of bus real time information capability in English local authorities, recorded 361 at stop RTI signs in the PTEs outside London, and 2,067 at stop RTI signs in the shire counties. In addition to signs, there are "virtual stops", which provide bus real time information through short messaging service (SMS). The total number of stops equipped with this capability is: 22,639 in the PTEs and 3,933 in the shire counties.

	PTEs (excl. London)	*Shire counties*
No bus stops	65,055	194,632
RTI signs	361	2,067
SMS capability	22,639	3,933
Total RTI	23,000	6,000
Total percentage	35.4	3.1

Note:
Table 1: RTI enabled bus stops for shire counties and PTEs.

For PTEs outside London, the percentage of bus stops capable of providing RTI to passengers is 35.4 per cent. For the shire counties the percentage is 3.1 per cent. This figure is skewed towards the PTEs due to the large number of stops that have SMS capability. For at stop signage only, the figures are 0.5 per cent. for PTEs and 1.1 per cent. for shire counties.

Car Sharing

Mr. Paul Marsden: To ask the Secretary of State for Transport how much funding has been given by his Department, and its predecessors, in each year since 1997 towards the *(a)* development and *(b)* promotion of (i) car clubs, (ii) car sharing and (iii) the Carplus scheme. [172292]

Mr. McNulty: Car sharing was featured as part of the Government's sustainable development campaign, 'Are Your Doing You Bit' prior to 2000. For example, as part of the programme, the Department's predecessor DETR contributed setting up costs of £150,000 to establish the Edinburgh City Car Club in 1999.

Building on this the Department has been promoting car sharing through its published guidance and initiatives on work place and schools travel plans and by funding bursary schemes.

Since 1999 the Department has been supporting the Carplus car club advisory service with the following annual grants:

1999—£37,000
2000—£38,000
2001—£103,000
2002—£53,000
2003—£60,000
2003—£60,000

Mr. Paul Marsden: To ask the Secretary of State for Transport if he will estimate the average occupancy of motor vehicles for each year since 1997. [172335]

Mr. McNulty: Occupancy figures for cars and light vans for Great Britain from the National Travel Survey are as follows:

1997—1.60
1998—1.59
1999—1.59
2000—1.59
2001—1.59
2002—1.58

Figures for 2003 are not yet available.

Crime Prevention

Tony Cunningham: To ask the Secretary of State for Transport if he will make a statement on progress of the Government's strategy for crime prevention on public transport. [171889]

Mr. McNulty: The Government are raising the profile of public transport crime as an issue which needs to be addressed by a partnership approach between operators, local authorities, the police, Crime and Disorder Reduction Partnerships (CDRPs), and other interested parties.

Examples of effective partnership working include the work of the National Route Crime Group to reduce the risks posed by acts of trespass on railway property and associated acts of vandalism. This and other local and national initiatives have led to a 32 Per cent. reduction of vandalism on the railways in 2002–03. The Secure Stations Scheme encourages train operators to work with other organisations to improve the 'whole journey' experience of rail passengers. Currently approximately two thirds of all overground rail journeys and one half of all London Underground journeys involve passengers starting or finishing their journey at a Secure Station. The Safer Travel on Buses and Coaches Panel is looking at ways to combat assaults, anti-social behaviour and vandalism on vehicles and property. The Panel has recently produced practical guides to protect bus and coach crews.

The British Transport Police (BTP) also play a vital role in keeping Britain's railways safe and secure, and pleasant to use. The Force works closely in partnership with those who manage the railway, staff and tenants, and local police forces. BTP covers crime from serious violent and sexual offences to pick-pocketing and car crime. It also takes a lead in combating the anti-social behaviour that can impact so much on those who use and work on the railway. Other examples of the spreading of crime prevention good practice include a toolkit on reducing crime on public transport, and good practice case studies to improve personal security in bus travel. Department for Transport guidance (to be issued this summer) to local transport authorities on giving greater emphasis to accessibility issues within Local Transport Plans will encourage authorities to adopt a partnership approach with CDRPs, local partners in the health, education and welfare to work sectors, and the local community to address crime and the fear of crime issues as one way of improving people's ability to access jobs and key services.

Delegated Examiner Tests

Mr. Damian Green: To ask the Secretary of State for Transport (1) what the inspection and supervisory regime is for *(a)* institutions and organisations and *(b)* individuals who carry out delegated examiner tests; [171939]

(2) which institutions and organisations carry out delegated examiner tests on behalf of the Driving Standards Agency; and how many candidates *(a)* entered tests and *(b)* were successful, broken down by institution and organisation; [171940]

(3) what the procedure is for permission to be given for delegated examiner tests to take place. [171971]

Mr. Jamieson: A number of organisations are authorised to carry out driving tests for their staff. The organisations are fire brigades, police forces, the Ministry of Defence and some bus companies. The bus companies have to hold a Public Service Vehicles operator's licence.

The Secretary of State for Transport has to be satisfied that these organisations make proper arrangements for conducting tests and keeping proper records, before granting his approval to the appointment of the examiners who may conduct the tests.

Before being appointed, the examiners have to successfully complete the same four week training course that examiners employed by the Driving Standards Agency are required to undertake.

The Agency is responsible for the subsequent supervision of the standards of the examiners, which involves quarterly supervision visits to the organisations to check that tests are conducted and assessed to the required standard.

The number of tests conducted by the fire and police authorities and bus companies last year, and the pass rates have been placed in the Libraries of the House. Equivalent figures for the Ministry of Defence are not available.

Driving Test Centres

Mr. Damian Green: To ask the Secretary of State for Transport (1) which driving test centres have refused to accept candidates because of a lack of capacity at the centre within *(a)* nine weeks, *(b)* 12 weeks and *(c)* more than 12 weeks of a practical test appointment being requested; [171967]

(2) what estimate his Department has made of the number of people who will seek a driving test in 2004–05; [171968]

(3) what the average waiting time is for practical driving tests for *(a)* cars, *(b)* motorcycles, *(c)* large goods vehicles and *(d)* passenger carrying vehicles, broken down by test centre. [171970]

Mr. Jamieson: Candidates are able to book driving tests with the Driving Standards Agency by phone, by post or online via the internet. They can also amend their appointment by phone or post to seek an earlier or later date, so appointment availability at individual test centres continually varies. No applicant for a driving test is refused an appointment.

The Agency has a national target for the average annual waiting time for a practical car driving test in England, Scotland and Wales of six weeks. The national average waiting time at the end of April for car tests was 9.2 weeks. Against the national average waiting time target for a motorcycling test of four weeks, the waiting time was 4.6 weeks. Against the national average waiting time target for a lorry or bus driving test of three weeks, the waiting time was 4.9 weeks.

The latest information about appointment availability for each type of test, at each test centre has been placed in the Libraries of the House.

In order to reduce the current high waiting times for tests in Great Britain the Agency recruited 283 new driving examiners in the last financial year and plans to recruit a further 330 in the coming year. An extra 7.30 am test slot is being added to weekday programmes in some test centres and tests are now offered on Sundays. The Agency is deploying as many driving examiners as possible from Scotland to the London and South East area to tackle the problem of high waiting times there. In the context of its Business Plan for 2004–05, I have set the Agency a target to bring national waiting times for a car driving test down to six weeks by January 2005.

The Agency estimates that it will handle 1,563,000 applications for practical car driving tests in 2004–05. The current pass rate for the practical car driving test is 43 per cent., so the applications will include a number from candidates who have been unsuccessful at a previous test attempt—some of whom will delay reapplying for a further test for over a year. Taking these factors together suggests that between 670,000 and 940,000 people will be making applications in the coming year.

Home Zone Challenge

Mr. Damian Green: To ask the Secretary of State for Transport which local authorities applied for funding under the Home Zone Challenge scheme; and how much each authority received. [171974]

Mr. McNulty: A table has been placed in the Libraries of the House which lists the 110 authorities that applied for funding and their respective maximum allocations.

Mr. Damian Green: To ask the Secretary of State for Transport what measures his Department have put in place to ensure that money given under the Home Zone scheme *(a)* achieves value for money and *(b)* meets the original conditions of the bid. [171975]

Mr. McNulty: The payment of grant through the Home Zones Challenge is subject to terms and conditions which form an agreement for funding the work programme submitted by the authority in its original bid. The terms and conditions set out the requirements relating to value for money and changes, if significant, to the work programme. Copies have been placed in the Libraries of the House.

The Secretary of State has appointed a consultant to assist with the management of the Home Zones Challenge, to monitor progress of the schemes and to disseminate good practice. Local authorities are required to provide quarterly finance and progress reports and the schemes are reviewed regularly at regional meetings. Authorities are visited on occasion by officials from the Department and/or the management consultant to review individual schemes.

Light Rail

Mr. Damian Green: To ask the Secretary of State for Transport what steps his Department has taken to encourage *(a)* local authorities, *(b)* private sector bodies and *(c)* organisations and institutions involved in light rail to share best practice. [171946]

Mr. McNulty: The departmental officials meet regularly with scheme promoters and hold seminars from time to time to disseminate best practice and encourage dialogue between promoters. The Department has also part funded Leeds University's Institute of Transport Studies 'Consult Database' a web-based tool designed to disseminate best practice in local transport planning.

Mr. Damian Green: To ask the Secretary of State for Transport (1) which light rail systems that share road space with road traffic have priority over road traffic; [171949]

(2) what assessment his Department has made of the percentage of proposed new light rail systems that will run across surfaces shared with road vehicles; and if he will make a statement; [171950]

(3) what percentage of current light rail networks run along surfaces shared with road vehicles. [171951]

Mr. McNulty: It is for the promoters to assess the appropriate level of sharing and traffic priority, in the light of local circumstances. All the current and proposed light rail systems have sections of street-running and some degree of priority at junctions.

Mr. Damian Green: To ask the Secretary of State for Transport (1) what estimate his Department has made of the amount of heavy rail track still in use that would be suitable for shared use by light rail systems; and if he will make a statement; [171952]

(2) sport how many kilometres of track are shared by light rail and heavy rail vehicles. [171953]

Mr. McNulty: There are currently about 13 kilometres of track that is shared by light rail and heavy rail vehicles. The Department has made no assessment of the amount of the existing heavy rail network that could be shared with light rail services. However, The Passenger Transport Executive Group on Light Rail is currently looking at the feasibility of more sharing of track between light and heavy rail services and will be presenting their finding to the Department in due course.

Mr. Damian Green: To ask the Secretary of State for Transport what common safety and operational regulations are applied to heavy and light rail projects concerning dangers to pedestrians and motorists. [171955]

Mr. McNulty: A number of regulatory provisions apply to both heavy and light rail systems. These include: the Level Crossings Act 1983; the Railways and Other Transport Systems (Approval of Works, Plant and Equipment) Regulations 1994; the Railways (Safety Critical Work) Regulations 1994, and the Railway Safety (Miscellaneous Provisions) Regulations 1997. All are relevant statutory provisions under The Health and Safety at Work Etc Act 1974.

The measures necessary to meet these provisions reflect scheme specific risk, and so will vary depending on the nature and characteristics of the rail system concerned.

Mr. Damian Green: To ask the Secretary of State for Transport which local authorities have indicated to his Department that they are actively considering building tram and light rail systems. [171961]

Mr. McNulty: Nottingham City and Nottinghamshire county councils, Hampshire county council and Portsmouth city council, Blackpool borough council, along with all the Passenger Transport Executives have indicated to the Department that they are actively considering light rail proposals.

Local Transport Schemes

Mr. Damian Green: To ask the Secretary of State for Transport if he will list the 19 major local transport schemes referred to on page 19 of his Department's Annual Report 2003; and how much funding each received. [171937]

Mr. McNulty: There is no reference to major local transport schemes on page 19 of the Department for Transport's 2003 Annual Report. The new major schemes approved in the 2002 annual local transport settlement, along with their funding allocations, are listed in the table as follows:

	£ million
Norwich Interchange	9.8
A43 Corby Link Road	12.7
Nottingham City Centre Scheme	11.8
North Middlesborough Accessibility Improvements	10.9
Sunderland Central Route	9.1
North Manchester Business Park	20.2
Merseytram Line 1	170
Wigan Inner Relief Route	19.5
Ashton Northern Bypass Stage 2	7.7
A5 8 Blackbrook Diversion	7.9
A57 Cadishead Way	19.9
Warrington Bus Interchange	6.4
A228 Leybourne and West Mailing Corridor Improvement	19.9
Ryde and East Wight Gateway	5.6
A24 Ashington to Southwater	19
A24 Horsham—Capel Improvement	38.6
Mereoak Roundabout	6.3
Walsall Town Centre Transport Package	11.3
Reighton Bypass	6.6

Motorway Bridges

Mr. Greg Knight: To ask the Secretary of State for Transport how many unused and obsolete bridges are in place over motorways in England and Wales; if he will list their locations and who is responsible for each of them; and how many are scheduled for *(a)* repair and *(b)* removal or demolition. [172044]

Dr. Howells: There are 11 unused bridges in place over motorways in England for which the Highways Agency is responsible. Bridges over motorways in Wales are the responsibility of the National Assembly for Wales. The location of the bridges in England is shown in the following table.

Location	*Status*
M1 Junction 26 and Junction 27 (midway) near Greasley	Scheduled for removal
M23 near Hooley (2 bridges)	Possible removal pending the outcome of the preferred scheme for the M23/A23 Hooley junction improvement
M1 Dry Culvert Crossing near Shepshed	—
M40 Great Pinley accommodation bridge near Warwick	—
Ropple Rail Overbridge on the M50	—
A46 Budbrooke Lodge Farm near Warwick	—
M5 near Puriton, Somerset	—
M25 Junction 5 Sevenoaks	—
M1 near Luton	—
M45 south of Rugby	—
M1 Junction 26 and Junction 27 (midway) near Greasley	—

Network Rail

Mr. Clapham: To ask the Secretary of State for Transport whether *(a)* he, *(b)* other Ministers in his Department and *(c)* departmental officials have met representatives of Network Rail to discuss the industrial dispute with the RMT Union. [171223]

Mr. McNulty: My hon. Friend the Minister of State for Transport met the Chairman, Chief Executive and other senior Network Rail officers on 27 April and this issue was one of the items discussed. Departmental officials have also had contacts with Network Rail on this issue.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Transport (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions his Department received in (i) 2002–03 and (ii) this parliamentary session, broken down by month; [171189]

(2) what proportion of *(a)* Ordinary Written Questions to his Department were answered within five sitting days of tabling and *(b)* Questions for a Written Answer on a named day received a substantive answer on that day in (i) the 2002–03 parliamentary session and (ii) this parliamentary session, broken down by month. [171190]

Mr. McNulty: Ministerial colleagues and I endeavour to reply to parliamentary questions within the required deadlines wherever possible. At 5 May 2004, the Department for Transport had answered 4,744 written questions tabled since 13 November 2002, the beginning of the 2002–03 Parliamentary Session. This comprised 3,941 written ordinary questions (90 per cent. of which were answered within five sitting days) and 803 named day questions (76 per cent. of which were given a substantive answer on the specified date). The following table shows the monthly breakdown.

	Ordinary written			*Named day*		
		Number and percentage[1] answered within five sitting days			*Number and percentage[1] answered on date specified*	
	Numbered tabled	*Number*	*Percentage[1]*	*Number tabled*	*Number*	*Percentage[1]*
2002–03 session						
November 2002[2]	199	184	93	109	84	77
December 2002	205	201	98	57	44	77
January 2003	342	295	86	65	46	71
February 2003	217	201	93	20	14	70
March 2003	308	234	76	45	38	84
April 2003	197	186	94	27	21	78
May 2003	233	216	93	35	24	69
June 2003	248	214	86	43	34	79
July 2003	214	209	98	29	25	86
August 2003	—	—	—	—	—	—
September 2003	183	177	97	24	20	83
October 2003	258	231	90	54	44	82
November 2003[3]	181	174	96	29	26	90
Total	2,785	2,522	91	537	420	78
2003–04 session						
November 2003[4]	71	62	87	6	6	100
December 2003	191	168	88	52	34	65
January 2004	247	202	82	73	45	62
February 2004	196	169	86	50	41	82
March 2004	286	261	91	62	52	84
April 2004	165	148	90	23	14	61
Total	1,156	1,010	87	266	192	72

[1] Rounded to the nearest percentage point.
[2] 13 November to 30 November 2002.
[3] 1 November to 20 November 2003.
[4] 26 November to 30 November 2003.

Public Transport (Wirral, South)

Mr. Ben Chapman: To ask the Secretary of State for Transport how many rural bus services in Wirral, South are supported by rural bus grants. [172691]

Mr. McNulty: Rural Bus Subsidy Grant (RBSG) is paid to local transport authorities, in the case of Wirral, South this is the Merseyside Passenger Transport Executive (PTE). It is for the authority to decide which services should be supported with the grant. We understand from the PTE that one rural bus service in Wirral, South is provided by RBSG.

Mr. Ben Chapman: To ask the Secretary of State for Transport how many miles of priority bus lanes have been created in Wirral, South since 1997. [172692]

Mr. McNulty: There is one priority bus lane in Wirral, South 0.2miles long on the southern carriageway of the New Chester Road (B5136). It was created in 1997.

Rail Franchises

Mr. Clapham: To ask the Secretary of State for Transport what costs have been incurred by the Strategic Rail Authority in respect of the tendering process for the Integrated Kent Franchise; and what the anticipated final costs are.– [171224]

Mr. McNulty: Expenditure by the SRA of approximately £1.8 million has been incurred to date on the tendering of the IKF and the total cost is expected to be £3.85 million.

Mr. Clapham: To ask the Secretary of State for Transport whether a public sector comparator will be undertaken to establish whether South Eastern train passenger services could be provided more economically and efficiently than under a franchise agreement if the service were to be run through South Eastern Trains. [171225]

Mr. McNulty: Under the provisions of the Railways Act 1993, as amended by the Transport Act 2000, the Strategic Rail Authority (SRA) is able to act as operator of last resort for any railway franchise but only on a temporary basis. Section 30 of the Act gives the SRA powers to

"secure the provision of services until such a time as they begin to be provided under a franchise agreement".

The Act reflects the Government's policy that passenger train services should be operated by private companies. It does not provide powers to the SRA to take such services

"back into the public sector"

on a permanent basis.

Mr. Clapham: To ask the Secretary of State for Transport whether *(a)* Ministers and *(b)* officials from his Department have met representatives of the (i) Stagecoach Group and (ii) other private train operators and consortiums in relation to the proposed Integrated Kent Franchise. [171226]

Mr. McNulty: No. The franchising process is a matter for the Strategic Rail Authority (SRA) which holds regular discussions with both existing and prospective franchise operators as part of discharging its duties.

Mr. Clapham: To ask the Secretary of State for Transport whether he has received a report from the Strategic Rail Authority on the discussions that have taken place between the Chair of the Authority and the Stagecoach Group in relation to the Integrated Kent Franchise. [171227]

Mr. McNulty: No. Any such discussions are a matter for the Strategic Rail Authority.

Railway Crimes

Mr. Damian Green: To ask the Secretary of State for Transport how many crimes were *(a)* reported and *(b)* subsequently led to a conviction (i) on trains, (ii) at stations and (iii) on railway property in each year since 1997. [171906]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on the total number of crimes reported and the total number of detections since 1998; information is not readily available for earlier than 1998. A split between trains, stations and other railway property is not available. Prosecutions and convictions are a matter for the Crown Prosecution Service.

Table 1: England and Wales

	Total crime	*Total detections*	*Detection rates (percentage)*
1998–99	107,769	35,916	33
1999–2000	110,604	33,614	30
2000–01	103,198	30,183	29
2001–02	104,292	23,647	23
2002–03	119,333	24,225	20
2003–04	123,463	26,400	21

Table 2: Scotland

	Total crime	*Total detections*	*Detection rates (percentage)*
1998–99	10,324	3,676	36
1999–2000	9,794	2,882	29
2000–01	9,859	3,250	33
2001–02	9,452	2,918	31
2002–03	10,323	2,694	26
2003–04	9,860	3,081	31

Mr. Damian Green: To ask the Secretary of State for Transport how many individuals working on the railways have been the victim of a crime while at work in each year since 1997. [171907]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on numbers of railway staff who have been victims of crime while at work since 1999; information is not readily available for earlier than 1999.

Railway staff—victims of crime while at work

	England and Wales	*Scotland*
1999–2000	3,437	235
2000–01	3,571	236
2001–02	3,715	231
2002–03	4,283	264
2003–04	4,518	391

Mr. Damian Green: To ask the Secretary of State for Transport how many acts of vandalism were reported on railway property in each year since 1997. [171908]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on acts of vandalism for both Incidents and Offences recorded since 1998; information is not readily available for earlier than 1998.

Table 1: Acts of vandalism—Incidents

	England and Wales	*Scotland*
1998–99	7,835	999
1999–2000	8,531	1,091
2000–01	8,592	1,063
2001–02	9,424	1,153
2002–03	8,667	1,059
2003–04	11,720	1,094

Table 2: Acts of vandalism—Offences recorded

	England and Wales	*Scotland*
1998–99	5,738	835
1999–2000	6,013	813
2000–01	5,783	753
2001–02	5,499	531
2002–03	5,903	599
2003–04	7,989	563

Mr. Damian Green: To ask the Secretary of State for Transport how many crimes were committed in railway stations in each year since 1997. [171909]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on crimes committed at stations, in station car parks, on railway lines and on other railway land since 1999; information is not readily available for crimes committed solely on stations or for earlier than 1999.

	England and Wales	*Scotland*
1999-2000	83,449	8,336
2000–01	78,526	8,217
2001–02	79,110	7,969
2002–03	86,791	7,968
2003–04	89,229	7,544

Mr. Hoyle: To ask the Secretary of State for Transport how many *(a)* train and *(b)* station staff were attacked in each year since 2000. [172337]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on crimes committed against railway staff while on duty:

	Total number of crimes committed
1999–2000	1,297
2000–01	1,340
2001–02	1,436
2002–03	1,921
2003–04	2,273

The figures supplied represent the total number of assaults against railway staff; a split between train and station staff is not available.

Railways

Mrs. May: To ask the Secretary of State for Transport when he expects that the Strategic Rail Authority will have developed the November 2005 Performance Trajectory with the train operating companies and the National Task Force. [171400]

Mr. Darling: The National Task Force (which includes representatives of the ORR, SRA, train operator owner groups and Network Rail), on behalf of the rail industry, has developed a performance trajectory to help them measure progress on industry efforts to improve rail performance. The National Task Force will review the trajectory in October 2004.

Mrs. May: To ask the Secretary of State for Transport whether he expects the Strategic Rail Authority to achieve delivery of the Train Operating Company operational performance trajectory projections for November. [171401]

Mr. Darling: The Strategic Rail Authority believes that the increased focus on improving operational performance will enable the train operating companies to continue an upward performance trend between now and November 2004.

Mrs. May: To ask the Secretary of State for Transport if he will list the railway and land sites which have been identified by the Strategic Rail Authority as being suitable for disposal since 2002. [171403]

Mr. Darling: Since the end of 2002, the Strategic Rail Authority has identified 36 sites as suitable for disposal. The table lists the sites.

Location	*Site description*
Alloa	Site of former crossing at Hilton Road Whinhill
Aylesbury	Railway club and sports ground Perm Road
Banbury	Fields by Woodford closed line
Banbury	South end of closed line in Woodford Halse
Bexhill	Former Galley Hill sidings
Brize Norton	Part of former Fairford br[illegible]
Cassington	Part of former Fairford branch
Castlethorpe	Former goods yard
Challow	Former station yard
Colchester Town	Lower Yard, Magdalene Street
Corby	Land at Cottingham Road
Dunstable	Land at Skimpot Road/Jeans Way
Elstree	Former goods yard
Exeter	Former goods yard
Exeter	Land and building (Red House)
Exeter	Tan Lane former goods yard
Formby	Andrew's Lane
Frome	Former east goods yard
Glasgow	Eastfield Depot
Goring-by-Sea	Land south of railway
Greenhithe	Land by station
Haltwhistle	Alston branch
Hullavington	Former goods yard
Horwich	Land at site of former railway works
Hunslet	Land between Ivory Street and Jack Lane
Kincardine	Plot of land beneath electricity pylon
Kings Lynn	Land at Extons Place
Lechlade	Part of former Fairford branch
Liverpool, James Street	Moor House
Melrose	Leaderfoot Viaduct
Reddish	Former depot, Wayland Road
Shoreham-by-Sea	Land at Queens Place
Tunbridge Wells	Former goods yard
Walsall	Land off Littleton Street West
Watford	Wiggenhall Road
Wivelsfield	Land at Rockery Lane

David Taylor: To ask the Secretary of State for Transport when he envisages the full restoration of passenger rail services between Coventry and Nottingham. [171505]

Mr. McNulty: The change in service will be permanent. The decision to curtail direct services is aimed at better matching services to demand and improving performance. This was determined under the

Strategic Rail Authority's "Midland Main Line/East Midlands Route Utilisation Strategy", on which they consulted last year. Passengers will be able to travel from Nottingham to Nuneaton, from where a shuttle service will operate to Coventry.

EDUCATION AND SKILLS

Education Services (South Ribble)

Mr. Borrow: To ask the Secretary of State for Education and Skills what public funding has been spent on adult *(a)* literacy and *(b)* numeracy in South Ribble in each of the last five years. [171707]

Mr. Ivan Lewis *[holding answer 10 May 2004]:* The estimated total spend on Skills For Life (the Government's strategy for literacy, language and numeracy needs of all post-16 learners from pre-entry level up to and including level 2) and on Key Skills (essential skills of communication, application of number and information technology), from April 2001 to July 2003, in the Lancashire Learning and Skills Council (LSC) area is set out in the following table:

£000

	Basic skills	*Key skills*
April 2001 to July 2001[1]	3,370	1,270
August 2001 to July 2002	6,577	1,857
August 2002 to July	7,815	1,948

[1] The figures for April to July 2001 include costs incurred from August 2000 on learning aims continuing into April 2001.

From the information available to the LSC it has not been feasible to obtain estimates at constituency level or separate figures by subject without incurring disproportionate cost. Likewise it has not been feasible to obtain comparable figures for periods before April 2001 when the Skills for Life strategy was launched and the LSC was formed, but information shows it was considerably less than at present.

Mr. Borrow: To ask the Secretary of State for Education and Skills (1) how many and what percentage of 11-year old pupils in South Ribble reached Level 4 in *(a)* mathematics and *(b)* English in each of the last seven years; [171660]

(2) how many and what percentage of pupils in South Ribble reached the *(a)* mathematics and *(b)* English standard in each of the last seven years. [171662]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member of Westmorland and Lonsdale (Mr. Collins) on 10 May 2004, *Official Report*, column. 34W.

Mr. Borrow: To ask the Secretary of State for Education and Skills how many teacher vacancies there were in South Ribble on the last date for which figures are available; and what steps he is taking to reduce them. [171708]

Mr. Miliband *[holding answer 10 May 2004]:* Information on teacher vacancies is not available by constituency as it is collected at local education authority level. In January 2003, the latest information available, there were 40 full-time teacher vacancies in Lancashire local education authority.

Like other areas, since 1997 South Ribble has benefited from the initiatives that the Government has put in place to recruit and retain teachers and to increase the number of staff supporting them in schools. Since 1997, the number of full-time equivalent regular teachers in maintained schools in the former Lancashire LEA area has risen by 390, from 11,870 to 12,260 in 2003. Over the same period, the number of full-time equivalent school support staff in the area has grown by 2,870 from 3,620 to 6,490 in 2003.

Adult Literacy and Numeracy

Mr. McNamara: To ask the Secretary of State for Education and Skills what assessment he has made of progress in meeting his Department's target to improve adult literacy and numeracy skills. [169738]

Mr. Ivan Lewis *[holding answer 4 May 2002]:* Skills for Life is the national strategy for improving the adult literacy, language (English for Speakers of Other Languages—ESOL) and numeracy skills needs of all post-16 learners, from pre-entry level up to and including Level 2. It aims to help create a society where adults have the basic skills they need to find and keep work and participate fully in society thereby increasing the economic performance and social cohesion of the country.

Following the launch of Skills for Life in March 2001, we have made significant progress towards our Public Service Agreement target of achieving 1.5 million adults with better basic skills by 2007.

We are confident that we have met our milestone of 470,000 achievements by July 2003. We are also on track to meet our interim target of 750,000 achievements by 2004. In terms of participation, from April 2001 to July 2004 an estimated 2.1 million learners will have taken up 4.3 million Learning and Skills Council (LSC) funded basic skills learning opportunities.

Mr. Djanogly: To ask the Secretary of State for Education and Skills what public funding has been spent on adult *(a)* literacy and *(b)* numeracy in Cambridgeshire in the last five years. [170842]

Mr. Ivan Lewis: The estimated total spend on Skills For Life (the Government's strategy for literacy, language and numeracy needs of all post-16 learners from pre-entry level up to and including level 2) and on key skills (essential skills of communication, application of number and information technology), from April 2001 to July 2003, in the Cambridgeshire Learning and Skills Council (LSC) area is set out in the table.

£000

	Basic skills	*Key skills*
April 2001 to July 2001[1]	610	389
August 2001 to July 2002	2,354	577
August 2002 to July 2003	4,376	345

[1] The figures for April to July 2001 include costs incurred from August 2000 on learning aims continuing into April 2001.

It has not been feasible to obtain comparable figures for periods before April 2001 when the Skills for Life strategy was launched and the LSC was formed, but information shows it was considerably less than at present.

Mr. Meacher: To ask the Secretary of State for Education and Skills what public funding has been spent on adult *(a)* literacy and *(b)* numeracy in Oldham West and Royton in each of the last five years. [170908]

Mr. Ivan Lewis: The estimated total spend on "Skills For Life" (the Government's strategy for literacy, language and numeracy needs of all post-16 learners from pre-entry level up to and including level 2) and on Key Skills (essential skills of communication, application of number and information technology), from April 2001 to July 2003, in the Greater Manchester Learning and Skills Council (LSC) area is set out in the following table:

£000

	Basic skills	*Key skills*
April 2001 to July 2001[1]	8,925	2,598
August 2001 to July 2002	15,369	3,586
August 2002 to July 2003	27,258	4,210

[1] The figures for April to July 2001 include costs incurred from August 2000 on learning aims continuing into April 2001.

From the information available to the LSC it has not been feasible to obtain estimates at constituency level or separate figures by subject without incurring disproportionate cost. Likewise it has not been feasible to obtain comparable figures for periods before April 2001 when the Skills for Life strategy was launched and the LSC was formed, but information shows it was considerably less than at present.

Apprenticeships

Mr. Kilfoyle: To ask the Secretary of State for Education and Skills how many residents of Liverpool, Walton have secured apprenticeships in each year from 1997 to 2003. [166964]

Mr. Ivan Lewis: Modern Apprenticeship data are not available at parliamentary constituency level. The table shows the number of learners to have completed their modern apprenticeship framework in the Greater Merseyside LSC area in 2001/02 and 2002/03. Some learners gain an NVQ, but do not complete the rest of their framework—these are also shown separately in the table. Comparable data for the years prior to 2001/02 are not available due to changes in the way data are collected.

	Leavers achieving the whole framework	*Leavers achieving NVQ only*	*Total achievers*[1]
2001/02	1,300	900	2,200
2002/03[2]	1,800	900	2,800

[1] Totals may not equal sum of columns due to rounding

[2] 2002/03 figures are provisional

Source:

LSC Individualised Learner Record

Mr. Pickthall: To ask the Secretary of State for Education and Skills how many residents of West Lancashire have undertaken apprenticeships in each of the last five years. [171492]

Mr. Ivan Lewis: The information requested is not available at parliamentary constituency level. Nor is the information available on a consistent geographical basis over the last five years. However, the following table shows the number of starts on modern apprenticeships in the Lancashire LSC area between April 2001 and the end of July 2003, as well as the number of starts from April 1998 to March 2001 in the two TECs that amalgamated into Lancashire LSC—ELTEC and LAWTEC.

Time period[1]	*TEC/LSC*	*Advanced MA*	*Foundation MA*
April 1998 to March 1999	ELTEC	1,000	400
	LAWTEC	1,600	100
April 1999 to March 2000	ELTEC	800	1,100
	LAWTEC	1,900	1,800
April 2000 to March 2001	ELTEC	900	1,300
	LAWTEC	1,800	2,100
April 2001 to July 2002	Lancashire LSC	1,900	4,100
August 2002 to July 2003	Lancashire LSC	1,500	3,300

[1] TECs reported the figures in financial years. LSC reports figures in academic years. The first LSC 'year' was 16 months in order to bring the financial year figures into line with academic years.

Care NVQ

Sandra Gidley: To ask the Secretary of State for Education and Skills how many places are available on the NVQ level 2 course to study care *(a)* in England and *(b)* broken down by region; and if he will make a statement. [171008]

Alan Johnson: Information on the number of available places to study National Vocational Qualifications (NVQs) is not held centrally. However, the following table shows the numbers of enrolments on NVQ level 2 care courses in England in (i) Learning and Skills Council (LSC) funded further education (FE) and (ii) LSC funded work based learning for young people (WBLYP), broken down by region in 2002–03.

Enrolments on NVQ work based learning 2 care courses in LSC funded further education (FE) and for young people (WBLYP) in England by region: 2002–03

Region	*FE*[1]	*WBLYP*	*Total*[2]
North East	1,900	1,500	3,400
North West	3,800	3,400	7,100
Yorkshire and Humberside	2,300	2,300	4,500
East Midlands	3,000	1,400	4,400
West Midlands	3,900	1,900	5,800
East of England	1,500	1,800	3,300
Greater London	2,700	700	3,300

Enrolments on NVQ work based learning 2 care courses in LSC funded further education (FE) and for young people (WBLYP) in England by region: 2002–03

Region	FE[1]	WBLYP	Total[2]
South East	2,700	2,100	4,800
South West	3,700	2,000	5,700
England[2]	25,300	17,000	42,400

[1] FE figures are provisional.
[2] totals may not add up due to rounding.

Departmental Work

Mr. Willis: To ask the Secretary of State for Education and Skills (1) what work his Department's Green Minister has undertaken in the last three months in that capacity; [166782]

(2) what meetings his Department's Green Minister has attended in the last 12 months in that capacity; [166783]

(3) if he will list the meetings at which his Department has been represented regarding the delivery of sustainable development across Government as co-ordinated by the Ministerial Sub-committee of Green Ministers. [166784]

Mr. Charles Clarke: As Green Minister for the Department for Education and Skills I meet regularly with other Government Departments, Non-Government Organisations and external partners to take forward the Sustainable Development agenda. For further information on my Department's progress on Sustainable Development I refer the hon. Member to the answer I have given today to question 166786.

It has, however, been established practice under successive Governments not to disclose information relating to the proceedings of Cabinet Committees. This practice is now formalised by Exemption 2 of Part II of the Code of Practice on Access to Government Information.

Education Circulars

Mr. Collins: To ask the Secretary of State for Education and Skills if he will list the circular documents that were sent by *(a)* the Qualifications and Curriculum Authority, *(b)* Ofsted and *(c)* his Department to (i) primary and (ii) secondary schools between 1 January 2003 and 31 December 2003; and how many pages each document contained. [167560]

Mr. Miliband: The following pages show the documents that were sent, including the number of pages, during the period 1 January 2003 and 31 December 2003 from *(a)* the Department for Education and Skills *(b)* the Office for Standards in Education and *(c)* the Qualifications and Curriculum Authority to (i) primary schools and (ii) secondary schools.

In total, 34 documents were sent to all primary schools and 41 documents were sent to all secondary schools in the period from the Department for Education and Skills.

Nine documents were sent to all primary schools and 17 documents were sent to all secondary schools in the period from the Office for Standards in Education, and a total of 22 documents were sent to all primary schools and 21 documents were sent to all secondary schools in the period from the Qualifications and Curriculum Authority.

Where a document has been sent to all primary and all secondary schools it will appear in the totals for both primary and secondary above. Details of each document and how many pages each contained have been placed in the Library.

Education Maintenance Allowance

Mr. Simmonds: To ask the Secretary of State for Education and Skills what cost estimate his Department has made of the educational maintenance allowance over the next three years. [167989]

Mr. Ivan Lewis: The Department estimates the cost of the Education Maintenance Allowance Scheme over the next three financial years to be:

	£ million
2004–05	275
2005–06	403
2006–07	476

These estimates take account of the phased roll-out to one cohort at a time and the cost of administering, promoting and evaluating the scheme. They take account of new estimates on population of young people and household income distribution.

Education Services (Bootle)

Mr. Benton: To ask the Secretary of State for Education and Skills (1) how much public funding has been spent on repairing schools in Bootle in each year since 1997; [172678]

(2) how much funding each school in Bootle has received from the New Deal for Schools. [172680]

Mr. Miliband: The majority of capital support is allocated to schools and local education authorities (LEAs) by formula, and they decide how to invest it in line with their asset management plans. The Department does not, therefore, have complete information about capital investment at constituency level. Table A sets out the capital support given by the Government to Sefton LEA since 1997–98, in total and by programme, including devolved formula capital grants to each school. Table B shows the schools in the Bootle constituency that benefited from investment through the New Deal for Schools (NDS) programme, which ran between 1997–98 and 2000–01.

*Further allocations to be announced

Table B—NDS Allocations to school in the Bootle Constituency

£

	School	Project details		Grant awarded
1997–98	Hillside High School	Conversion and refit of lab	LEA wide grant	[1]836,000
	St.Winefride's RC Infant School	Major structural repair due to ground subsidence	LEA wide grant	[1]836,000
	Litherland High School	Replace felt roof	LEA wide grant	[1]836,000
	The Grange Primary School	Wet rot repairs and external painting	LEA wide grant	[1]836,000
1998–99	Litherland High School	Heating repairs		55,850
	Linacre Primary School	Heating repairs		61,435
2000–01	Hillside High School	Replace temporary classrooms		528,513
	Bootle High School	Boiler replacement package	Project including 4 schools	[2]368,283

[1] For NDS 1 grant was allocated for Sefton LEA wide projects, part of which was used for work at each of 4 schools in the Bootle constituency. The LEA will be able to say how much was allocated to each school.

[2] Allocation shown is the total for package of project within Sefton LEA which included the school shown which is in the Bootle constituency. The LEA will be able to say how much was allocated to the school.

Further Education

Chris Grayling: To ask the Secretary of State for Education and Skills what changes he has made to the fee structure for Level 2 courses in further education; and what steps he is taking to ensure the maintenance of employer contributions to those courses. [171422]

Alan Johnson: No changes have yet been made to the fee structure for Level 2 courses in further education institutions. From September this year we will be trialling, in the North East and South East regions, a new entitlement enabling adults in the labour force without a full level 2 qualification to have access to free tuition for their first full level 2 qualification. Where a learner is taking a publicly available course in further education through this entitlement there will be no tuition fee cost to the learner or their employer. We will continue to expect colleges to collect fees from employers for customised provision. From September the Learning and Skills Council's funding assumption that for dedicated provision employers pay above the standard fee assumption for individual learners will be abolished. As outlined in our White Paper '21st Century Skills—Realising Our Potential' we will consult the sector later this year on changes to the fees framework from 2005–06.

Higher Education (Preston)

Mr. Hendrick: To ask the Secretary of State for Education and Skills how much public funding has been spent on higher education in Preston in each of the last seven years. [168123]

Alan Johnson: The only publicly funded institutions providing higher education in Preston are Preston College and the University of Central Lancashire (UCLAN). The amounts of public funding spent in academic years for which figures are available are shown in the table. Expenditure was by the Higher Education Funding Council for England (HEFCE), and by the Student Loans Company (SLC).

£ million

	1997/98	1998/99	1999/2000	2000/01	2001/02	2002/03	2003/04
HEFCE funding of the University of Central Lancashire [2]	33	37.5	41	42	45	47.5	50
HEFCE funding of Preston College [3]	n/a	n/a	64[1]	n/a	n/a	n/a	n/a
Total SLC expenditure [4]	n/a	n/a	21.62	30.8	37.11	40.01	n/a

[1] Thousand

[2] These figures represent the Basic Teaching and Research Grant. In addition, the University has received an additional £42 million over the seven years for various activities and initiatives, including:Funding for Teaching and Learning; the Collaborative Research Scheme; Higher Education Reach Out to Business and the Community; Restructuring Funds; Inherited Liabilities; Poor Estates; Project Capital; Access Funds; Teachers' Pension Scheme; and New Technology Institutes.

[3] The 1999/2000 figure is the Basic Teaching Grant from HEFCE. Preston College transferred their directly funded student numbers to the University of Central Lancashire from 00/01 and HEFCE do not hold information on the amount of funding passed by UCLAN to Preston College in connection with students studying at the College under their franchise arrangements. Figures for HNC and HND provision funded via the Further Education Funding Council prior to 1999/2000 are not held centrally.

[4] Expenditure by the Student Loans Company includes fees, loans (cash costs) and the Dependants Grant. Data prior to 1999/2000 is not available. Expenditure information on other grants (Disabled Students' Allowances, Care Leavers' Grant and Travel Grant) that were, until 2003/04, paid through local education authorities is not held centrally.

Learn Direct

Charles Hendry: To ask the Secretary of State for Education and Skills what the annual cost to his Department for its contract with Learn Direct is. [170024]

Mr. Ivan Lewis *[holding answer 30 April 2004]:* The Department currently agrees an annual contract with Ufi/learndirect. However, from August 2004 the LSC will assume responsibility for the planning and funding of learndirect provision, support and development for the learndirect Information and Advice Service and support and development for UK online centres. The Department has therefore agreed a four month contract with Ufi/learndirect the cost of which is £24.972 million.

The cost is broken down as follows:

central and development costs for learndirect learning—£19.389 million

support and development for learndirect Information and Advice Service—£4.083 million

support and development for UK online centres—£1.5 million

Learning and Skills Councils

Mr. Dismore: To ask the Secretary of State for Education and Skills if he will make a statement on success rates of *(a)* the North London Learning and Skills Council and *(b)* the Learning and Skills Councils in England on average in the latest year for which figures are available. [170660]

Mr. Ivan Lewis: These are matters for the Learning and Skills Council. Mark Haysom, the Chief Executive will write to my hon. Friend and place a copy of the reply in the Libraries.

Level 4 (Bootle)

Mr. Benton: To ask the Secretary of State for Education and Skills how many and what percentage of 11 year old pupils in Bootle reached level four in *(a)* mathematics and *(b)* English in the last seven years. [171299]

Mr. Miliband: I refer my hon. Friend to the answer I have given to the hon. Member of Westmorland and Lonsdale (Mr. Collins) on 10 May 2004, *Official Report*, column. 34W.

School Funding

Mr. Hoban: To ask the Secretary of State for Education and Skills what assessment he has made of the impact of changing the basis of school funding from the periods coterminous with the Government and local government financial years to an academic year. [171768]

Mr. Miliband *[holding answer 10 May 2004]:* Aligning schools' budgets to the school year would better reflect schools' planning cycles, supporting headteachers and Governing Bodies to make further progress in both schools' financial management and school improvement activities.

The practicality, time scales and best means of moving to three year budgets aligned to the school year will depend on decisions to be taken about the schools' funding regime for 2006–07 and beyond. The Government will consider what changes are required to the schools' funding regime in light of experience of the measures introduced for 2004–05 and 2005–06 to improve stability in individual schools' budgets. Any changes will be fully discussed with local government and schools representatives.

School Standards Fund

Mr. Collins: To ask the Secretary of State for Education and Skills what grants for primary and secondary schools have been available through the Standards Fund since its creation; and on what date each was *(a)* introduced and *(b)* closed. [171085]

Mr. Miliband: The following table shows for each Standards Fund grant supporting schools and pupils: the year in which it was introduced into the Standards Fund, and the final year of operation. The table also show where grants have merged, or where the grant has been transferred to another agency.

The Standards Fund was created in 1998–99 replacing the previous specific grant programme, Grants for Education Support and Training (GEST). The table also shows which Standards Fund grants continued from the GEST programme.

Many of the programmes supported through the Standards Fund are for specific time limited projects and programmes to encourage activities to be continued at local level.

The Government are considering further rationalisation of specific grants to provide a single grant for schools, to allow them to access improvement projects and programmes according to their own needs and priorities.

Standard Fund Grants since 1998–99

		Introduced	*Final year*	
Baseline Assessment	GEST	1998–99	1998–99	merged into School Improvement Grant in 1999–2000

School Development Grant	2004–05	n/a	a combination of eight previously separate grants
School Travel Advisers	2004–05	n/a	

n/a = The grant continues in 2004–05.

[1] Paid as a separate grant outside the Standards Fund prior to 1999–2000.

Note:

GEST means that the grant continued from the previous grant regime.

School Transport

Kevin Brennan: To ask the Secretary of State for Education and Skills if he will estimate the cost of reducing the three-mile limit for free travel to secondary schools to two miles; and if he will make a statement. [172026]

Mr. Charles Clarke: We do not collect information which would allow us to make this estimate.

Post-16 Education/Employment

Lynne Jones: To ask the Secretary of State for Education and Skills what percentage of those aged 16 to 18 years are *(a)* unemployed, *(b)* in training, *(c)* in work and *(d)* in full-time education, broken down by (i) ethnic group and (ii) gender. [171718]

Mr. Ivan Lewis: Provisional estimates of 16 to 18-year-olds participating in education, training and employment by gender for the latest academic year, end 2002, are shown in the table:

Participation in education, training and employment by labour market status and by gender for end 2002

Percentage *Activity*	*Females*	*Males*	*All*
In full-time education	60	53	57
In training[1]	16	20	18
In work (excluding those education and training)[2]	14	16	15
ILO Unemployed[3]	4	7	6
Inactive[4]	5	3	4
Total[5]	100	100	100

[1] 'In training' includes those young people in work based learning (WBL), employer funded training (EFT) and other education and training (OET).

[2] Some young people in education and training will also be in employment. However, these numbers have not been included in the 'In work' figures.

[3] 'ILO unemployed' covers anyone who is out of work and available to start work in the next two weeks, but has either looked for work in the last four weeks or is waiting to start a job they have already obtained.

[4] 'Inactive' includes those neither in employment nor ILO unemployed, that is—not active in the labour market.

[5] The totals are calculated from unrounded figures and so may not be the sum of the individual cells.

Data for 16 to 18-year-olds participating in education, training and employment by ethnic group in England are not published by the Department.

Sustainable Development Strategy

Mr. Willis: To ask the Secretary of State for Education and Skills what progress has been made with his Department's Sustainable Development Strategy. [166786]

Mr. Charles Clarke: The Sustainable Development Action Plan for Education and Skills was launched in September last year. The action plan has four key objectives: education for Sustainable development (ESD); environmental impact of the DfES and its partner bodies; environmental impact of the education estate; and local and global partnership activity. We are already making progress in several areas against the Action Plan. The following are just some examples.

We are supporting subject associations in their work to build on ESD within the curriculum.

On food in schools, we are working with Defra on guidance for school governor organisations. Through website forums we will invite feedback from school managers, governors and parents and report on Food Procurement Implementation.

We are working closely with the Department for Transport, and have jointly published "Travelling to School: An Action Plan5" which gives guidance on sustainable school travel.

Colleges and universities are developing as sustainable organisations, promoting themselves as exemplars and sharing best practice with other institutions.

The Skills agencies have created an online 'toolkit' to encourage, support and promote best practice throughout the sector.

Internationally, we are contributing to the drafting of the United Nations strategy on ESD.

Vocational Qualifications

Mr. Willis: To ask the Secretary of State for Education and Skills how many 14 and 15-year-olds were studying for vocational qualifications in each year since 2001. [171244]

Alan Johnson: Since 2001, the numbers of 15-year-olds entered for General National Vocational Qualifications, either Part One or Full, were as follows:

	Number
2001	22,413
2002	64,494
2003	123,600

Data on the numbers studying vocational qualifications is not available.

Vocational Training

Mr. Willis: To ask the Secretary of State for Education and Skills how many 14 and 15-year-olds are studying for *(a)* NVQs and *(b)* vocational GCSEs. [171245]

Alan Johnson: The Department does not collect data on the numbers of 14 and 15-year-olds presently studying NVQs and GCSEs in vocational subjects. Rather the Awarding Bodies makes available data on the numbers of entries and the results thereof for particular qualifications. This information is routinely placed in the House of Commons Library in the autumn.

TRADE AND INDUSTRY

Parental Leave

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many men *(a)* requested and *(b)* received paternity pay prior to 6 April 2003 in each year since 1997, broken down by (i) region and (ii) income. [171296]

Mr. Sutcliffe: Statutory Paternity Pay was introduced in 2003 for fathers of children born or expected to be born on or after 6 April 2003 and adopters of children placed for adoption on or after 6 April 2003. Statutory Paternity Pay was therefore not paid before 6 April 2003, except to a small number of fathers whose children were born prematurely.

Some employers will, of course have offered contractual paternity leave and pay to their staff before April 2003. Contractual provision is not recorded centrally but surveys suggest that where this provision was available fathers used it.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many men took *(a)* parental leave and *(b)* time off for dependants in each year since 1997 prior to 6 April 2003, broken down by (i) region (ii) income and (iii) length of leave. [171295]

Mr. Sutcliffe: It is not possible to provide the information requested since take up of parental leave and time off for dependants are not recorded centrally. However, a recent survey commissioned by the DTI (The Second Work-life Balance Survey: Results from the Employees' Survey, Employment Relations Research Series No. 27) suggests that 4 per cent. of all parents with dependant children took parental leave in the year preceding the survey.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many women have taken *(a)* ordinary maternity leave and *(b)* additional maternity leave (i) in each year since 1997 up until April 2003 and (ii) since April 2003, and how many women have taken 52 weeks maternity leave, broken down by region. [171301]

Mr. Sutcliffe: Take-up of maternity leave is not recorded centrally, and the regional figures cannot be provided. It is possible to make an estimate of the numbers of mothers taking ordinary maternity leave based on employer returns to Inland Revenue for payment of Statutory Maternity Pay (SMP) they recover. Nationally around 300,000 women receive SMP each year. Some of the women will take additional maternity leave, but as SMP is not paid during additional maternity leave, it is not possible to estimate the number taking additional maternity leave.

In addition, there will be some women who will qualify for maternity leave but not SMP (because they do not meet the earnings criteria) and similarly some who qualify for SMP but not leave (because they are employed earners for the purposes of SMP but not employees in order to qualify for leave).

British Coal

Adam Price: To ask the Secretary of State for Trade and Industry whether the Department has been given Treasury approval to retain surpluses payable to it out of the Mineworkers' Pension Scheme during the last five years to offset expenditure on liabilities inherited from British Coal. [164382]

Nigel Griffiths *[pursuant to his reply, 19 April 2004, Official Report, c.66–67W]:* I regret it covered only the three financial years 2001–02 to 2003–04 and I am taking the opportunity to clarify that for the preceding financial years, the position was as set out in the Government's Expenditure plans 2000–01 to 2001–02 (Cm 4611) which was placed in the Libraries of the House, and which stated:

> "These figures include receipts of 50 per cent. of the surpluses in the coal pension funds which are required under the Coal Industry Act 1994 to be paid into the consolidated fund, except in so far as they may be retained to offset expenditure on liabilities inherited from British Coal."

This reflected the special arrangements agreed between the Department and Her Majesty's Treasury as part of the DTIs CSR to ensure the Department's ability to pay coal health claims as quickly as possible.

Business (South Ribble)

Mr. Borrow: To ask the Secretary of State for Trade and Industry how many new businesses have started up in South Ribble since 1997. [172145]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 2,600 in Lancashire County (which contains the constituency of South Ribble), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 10,200 business start-ups in Lancashire County in 2003. Data for counties are not available for before 2003.

DTI figures based solely on VAT registrations for South Ribble and West Lancashire local authorities (which contain the constituency of South Ribble) are shown in the table for the period 1997 to 2002. Data for 2003 will be available in autumn 2004.

VAT registrations: 1997–2002

	South Ribble	*West Lancashire*
1997	275	260
1998	300	245
1999	255	290
2000	280	265
2001	240	285
2002	250	265

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Mr. Borrow: To ask the Secretary of State for Trade and Industry what steps the Government has taken to help small businesses in South Ribble since 1997. [172146]

Nigel Griffiths: The Business Link Operator for North and West Lancashire has provided assistance to 2,083 enterprises in the South Ribble constituency since 2001. The Small Business Service (SBS) was set up as an agency of the Department of Trade and Industry in April 2000. Contracts were exchanged with a national network of 45 Business Link Operators (seven in the North West) to provide Business Support to small and medium sized enterprises from April 2001. Before this date Government Support to businesses was provided through Training and Enterprise Councils and the Small Business Service does not have access to this data.

The type of assistance provided by the Business Link Operator includes pre-starts, start up advice, intensive assists, IT support, Investors In People.

In addition under the Enterprise Grant Scheme three companies have received offers of grant with a total value of £167,883 since 1997. This scheme has now come to a close from the 1 April 2004.

Business Regulation

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the total *(a)* staff numbers and *(b)* resource budget of the Departmental Regulatory Impact Unit has been since its inception. [168611]

Ms Hewitt: Information about staff numbers and resource budget of the Departmental Regulatory Impact Unit since its inception could not be ascertained without disproportionate cost. However since 2002 the unit has had an average of six full time staff and for the financial year 2004–05 has a total resource budget of £350,000.

Businesses (Sittingbourne and Sheppey)

Mr. Wyatt: To ask the Secretary of State for Trade and Industry how many workers in Sittingbourne and Sheppey have benefited from the national minimum wage. [170293]

Mr. Sutcliffe: It is not possible to provide estimates specifically for the constituency of Sittingbourne and Sheppey. However, based on the Office for National Statistics' Low Pay data released in 2003, the DTI estimates that around 120,000 people in the South East stood to benefit from the introduction of the National Minimum Wage in April 1999. Between 80,000 and 100,000 people were expected to have benefited from the October 2003 uprating of the National Minimum Wage.

Care Staff

Sandra Gidley: To ask the Secretary of State for Trade and Industry what discussions she has had with the Secretary of State for Health about the impact of flexible working for carers on the demand for paid care staff. [172001]

Mr. Sutcliffe: My officials are in discussion with all interested Government Departments, including officials from the Department of Health, to explore how flexible working arrangements can help carers. This is part of on-going work which will inform the review of the flexible working law in 2006 and shape future policy. It is too early to consider the implications on the demand for paid care staff.

As part of this work, we are aiming to hold two roundtables involving employers and individuals who have caring responsibilities, such as those caring for elderly or sick relatives. The roundtables will explore how individuals balance work and caring responsibilities, including how different working patterns suit both carers and their employers. We are discussing the roundtables with the Department of Health and bodies representing carers.

The Government's work-life balance campaign seeks to persuade all employers of the business case to adopt work-life balance policies and to follow best practice by providing flexible working opportunities across the workforce. This applies equally to those providing paid care as it does to those providing unpaid care.

Sandra Gidley: To ask the Secretary of State for Trade and Industry (1) what definition he will use of the term carer in relation to the planned introduction of the right to flexible working for carers; and if he will make a statement; [170974]

(2) when plans for the right to flexible working for carers will be implemented; and if he will make a statement. [171009]

Mr. Sutcliffe: The Government are committed to reviewing the impact of the right to request flexible working and has no plans to extend the provisions of the law until after the review in 2006.

Currently, the law provides eligible parents of children under 6 and disabled children under 18 with a legal right to apply to work flexibly. An issue that the review will consider, which my right hon. Friend the Prime Minister has indicated should be a priority, is extending the law to wider groups of carers, such as carers of elderly or sick relatives. Definition of terms relating to any extension to the law as an outcome of that review, including carers, will be something that will be addressed at that time.

Corporate Governance

Sandra Gidley: To ask the Secretary of State for Trade and Industry how many FTSE 250 companies have recruited at least one non-executive director from the not-for-profit sector. [172383]

Jacqui Smith: This information is not held centrally and could be collected only at disproportionate cost.

Sandra Gidley: To ask the Secretary of State for Trade and Industry what assessment she has made of the change in proportion of non-executive directors of FTSE 250 companies following the publication of the Tyson Report. [172384]

Jacqui Smith: As recommended by the Tyson Report, the Department commissioned a study by Cranfield University on the diversity of all directors in FTSE 100 companies. This report has now been presented to my Department. In addition, I have participated in a series of roundtables hosted by leading businesses which debated the issues surrounding diversity in the boardroom in an open and constructive manner. We are currently consulting the Financial Reporting Council and a range of business and other organizations on how best to build on these initiatives and will be making an announcement later in the year.

Sandra Gidley: To ask the Secretary of State for Trade and Industry what plans she has for promoting a register of talented candidates from the not-for-profit sector for consideration for non-executive director posts, as recommended in the Higgs Report. [172390]

Jacqui Smith: The Higgs Review made a number of recommendations to stimulate the inclusion of a more diverse range of people on company boards. These were taken forward by the Tyson Group, which decided against developing a list of candidates from the non-commercial sector.

The Government welcome the creation of registers of suitably skilled people, across a range of sectors, to assist companies in identifying potential candidates for non-executive board positions. Such registers should be co-ordinated by the relevant professional or affiliated body.

Sandra Gidley: To ask the Secretary of State for Trade and Industry how many FTSE 250 companies publish their recruitment procedures for non-executive directors; and what plans she has to encourage such publication. [172391]

Jacqui Smith: This information is not collected centrally. This is a matter for companies and their shareholders and is a provision of the Financial Reporting Council's Combined Code. The provision applies on a comply or explain basis to all listed companies, and for all board appointments, and came into effect for reporting years beginning on or after 1 November 2003.

Sandra Gidley: To ask the Secretary of State for Trade and Industry what plans she has to provide a deadline by which FTSE 250 companies should publish their recruitment procedures for non-executive directors. [172392]

Jacqui Smith: This is a matter for companies and their shareholders and is a provision of the Financial Reporting Council's Combined Code. The provision applies on a comply or explain basis to all listed companies. and for all board appointments, and came into effect for reporting years beginning on or after 1 November 2003.

Correspondence

Mr. Kaufman: To ask the Secretary of State for Trade and Industry when she intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 25 March with regard to Jenny Edwards. [172262]

Ms Hewitt: I replied to my right hon. Friend's letter seeking support for the Early Day Motion 576—Corporate Responsibility on 7 May 2004. As outlined in my reply, my Department published draft Regulations on the Operating and Financial Review for consultation on 5 May.

Electricity Network

Mr. Laurence To ask the Secretary of State for Trade and Industry pursuant to the answer of 18 March 2004, *Official Report*, column 501W, on the electricity network, how many warnings have been issued by National Grid Transco about low levels of spare electricity generating capacity *(a)* this year and *(b)* in each of the previous seven years for which figures are available; and if she will make a statement. [172543]

Mr. Timms: National Grid have issued the following system warnings as part of normal operations to inform the market that its projected reserve is not fully met:

	Amount of system warnings
2004	[1]2
2003	13
2002	7
2001	18
2000	41
1999	13
1998	2
1997	1

[1] To date

Energy Bills

Jon Trickett: To ask the Secretary of State for Trade and Industry (1) what percentage of households with electricity accounts she estimates the regulator has been successful in enforcing Standard Licence condition (Electricity) 17 in inspecting meters every two years; [171487]

(2) what percentage of gas accounts she estimates Ofgem has been successful in enforcing Standard Licence condition (Gas) 17 in inspecting meters every two years. [171488]

Mr. Timms: Regulation of gas and electricity is the responsibility of the Office of Gas and Electricity Markets (OFGEM). I understand that the Chairman of the Authority will write to my hon. Friend about the matters he has raised.

Energy Supply

Mr. Laurence Robertson: To ask the Secretary of State for Trade and Industry what recent discussions she has had with energy companies about the integrity and security of supply; and if she will make a statement. [172544]

Mr. Timms: Department of Trade and Industry Ministers hold regular meetings with electricity companies to discuss a wide range of issues, including the integrity and security of energy supplies.

Fireworks

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how long the consultation period on the proposals to prohibit the possession of fireworks was. [171594]

Mr. Sutcliffe: The consultation on the emergency Fireworks Regulations 2003 was launched on 5 November and closed on 26 November—making a total of three weeks of consultation.

Due to the temporary nature of the regulations, they are due to be repealed and incorporated into a comprehensive package of draft measures designed to tackle the misuse of fireworks resulting from supply and use. The consultation was launched on 23 April and will run till 2 July 2004.

Insolvency Service

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what powers the Insolvency Service's Prosecution Section has to investigate people in breach of *(a)* disqualification orders and *(b)* bankruptcy orders. [171614]

Mr. Sutcliffe: The Insolvency Service's Prosecution Section (now Criminal Allegations Team) does not have any powers to investigate people who are in breach of *(a)* disqualification orders and *(b)* bankruptcy orders.

Allegations that individuals are breaching their disqualification orders or bankruptcy orders, which are supported by evidence and documentation are referred by the Criminal Allegations Team to the Department's Legal Services Directorate (Prosecutions), where a lawyer reviews the papers and decides on the course of action to be taken. If the lawyer concludes that the matter is suitable for a criminal investigation, an investigation officer is instructed to conduct such investigation and where necessary take witness statements for any prosecution.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many calls have been received by the Disqualified Directors Hotline of the Insolvency Service's Prosecution Section in the last 12 months; how many cases were taken forward by the Legal Services Directorate as a result; and if she will make a statement. [171615]

Mr. Sutcliffe: The Disqualified Director's Hotline is now called "the Enforcement Hotline" but the telephone number remains the same.

For the period May 2003 to April 2004 there were 807 calls made to the Hotline and these included invalid calls eg hang ups.

From these calls, 166 questionnaires were sent out and on the basis of the information received 36 cases were referred to the Legal Services Directorate (LSD) and of these 25 were accepted by LSD for full investigation. Most of these cases will still be under investigation.

Mineworkers' Pension Scheme

Tony Wright: To ask the Secretary of State for Trade and Industry what meetings she has held with trustees of the Mineworkers Pension Scheme in the last year; when the meetings were held; and what subjects were discussed. [170329]

Nigel Griffiths: I met the Trustees of the Mineworkers' Pension Scheme, along with those of the British Coal Staff Superannuation Scheme, on 30 March 2004. We discussed the Government's commitment to the pension schemes, including the Guarantee arrangements and the agreement to award RPI increases to members despite there being deficits in both schemes.

The Trustees reiterated their view that the Government Guarantee negotiated in 1994 allows them to take a balanced amount of risk in their investments helping the funds to grow and pay around 30 per cent. bonuses to scheme members. Without the Guarantee the Trustees would have had to follow a much more cautious investment strategy that would not have generated the surpluses we have seen.

National Minimum Wage

Mr. Djanogly: To ask the Secretary of State for Trade and Industry how many workers in Huntingdon constituency have benefited from the national minimum wage. [170862]

Mr. Sutcliffe: It is not possible to provide estimates specifically for the constituency of Huntingdon. However, based on the Office for National Statistics' Low Pay data released in 2003, the DTI estimates that around 90,000 people in the Eastern region stood to benefit from the introduction of the National Minimum Wage in April 1999. Between 80,000 and 90,000 people were expected to have benefited from the October 2003 uprating of the National Minimum Wage.

Mr. Meacher: To ask the Secretary of State for Trade and Industry how many workers in Oldham West and Royton have benefited from the national minimum wage. [170937]

Mr. Sutcliffe: It is not possible to provide estimates specifically for the constituency of Oldham West and Royton. However, based on the Office for National Statistics' Low Pay data released in 2003, the DTI estimates that around 140,000 people in the North West stood to benefit from the introduction of the national minimum wage in April 1999. Between 130,000 and 160,000 people were expected to have benefited from the October 2003 uprating of the national minimum wage.

Mr. Pickthall: To ask the Secretary of State for Trade and Industry how many workers in West Lancashire have benefited from the national minimum wage. [171726]

Mr. Sutcliffe: It is not possible to provide estimates specifically for the constituency of West Lancashire. However, based on the Office for National Statistics' Low Pay data released in 2003, the DTI estimates that around 140,000 people in the North West stood to benefit from the introduction of the national minimum wage in April 1999. Between 130,000 and 160,000 people were expected to have benefited from the October 2003 uprating of the national minimum wage.

Mr. Borrow: To ask the Secretary of State for Trade and Industry how many workers in South Ribble have benefited from the national minimum wage. [172147]

Mr. Sutcliffe: It is not possible to provide estimates specifically for the constituency of South Ribble. However, based on the Office for National Statistics' Low Pay data released in 2003, the DTI estimates that around 140,000 people in the North West stood to benefit from the introduction of the National Minimum Wage in April 1999. Between 130,000 and 160,000 people were expected to have benefited from the October 2003 uprating of the National Minimum Wage.

Businesses (Huntingdon)

Mr. Djanogly: To ask the Secretary of State for Trade and Industry how many new businesses started up in Huntingdon constituency in each year since 1997. [170780]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 1,300 in Cambridgeshire county (which contains the constituency of Huntingdon), in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 5,000 business start-ups in Cambridgeshire County in 2003. Data for counties are not available for before 2003.

DTI figures based solely on VAT registrations for Huntingdon Local Authority (which contains the constituency of Huntingdon) are shown in the table for the period 1997 to 2002. Data for 2003 will be available in Autumn 2004.

VAT Registrations: 1997–2002

	Huntingdon
1997	535
1998	540
1999	485
2000	520
2001	485
2002	515

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service, available from: www.sbs.gov.uk/statistics/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Nuclear Power

Mr. Laurence Robertson: To ask the Secretary of State for Trade and Industry what discussions she has had with British Energy about extending the life of Dungeness B nuclear power station; and if she will make a statement. [172546]

Mr. Timms: My officials have regular discussions with British Energy on a range of issues affecting the company. Any decisions about extending the life of Dungeness B or any other British Energy nuclear power station would be a matter for the company who would need to evaluate the safety, technical and economic case, within the overall regulatory framework.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Trade and Industry (1) how many *(a)* Ordinary Written and *(b)* Named Day Questions her Department received in (i) the 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month; [170776]

(2) what proportion *(a)* Ordinary Written Questions to her Department were answered within five sitting days of tabling and *(b)* Questions for a Named Day received a substantive answer on that day in (i) 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month. [170777]

Ms Hewitt: The information requested is as follows:

	Ordinary Written PQs			*Named Day PQs*		
	Total answers	*Answers within 5 days*		*Total answers*	*Answers on named day*	
	Number	*Number*	*Percentage*	*Number*	*Number*	*Percentage*

Total	1679	1300	77	336	117	32

Note:
DTI figures are based on sittings days.

We endeavour to answer all Parliamentary Questions within the Parliamentary deadlines whenever possible. In addition I refer the hon. Gentleman to a reply given by my right hon. Friend the Leader of the House on 3 March 2004, *Offical Report*, column 907W.

Post Offices

Mr. Ruffley: To ask the Secretary of State for Trade and Industry how many sub-post offices were closed in each of the past three years up to March in *(a)* the East of England, *(b)* Suffolk and *(c)* the parliamentary constituency of Bury St. Edmunds. [171869]

Mr. Timms: I am advised by Post Office Ltd. that data on post office closures by county or parliamentary constituency are not available in the form requested as the company does not require this data for its operational purposes. However, I understand that since March 2000 the company has recorded details of post office closures on the basis of Government Region and in the East of England region as a whole, the numbers of net closures were as follows:

East of England Region

	Number
2000–01	70
2001–02	21
2002–03	33

Post Office Ltd. produces statistics on post office closures on a quarterly basis. The latest data on net closures by region currently available for year 2003–04 is to the end of December 2003. Data for the quarter to end March 2004 is expected shortly. There were 61 net closures of post offices in the East of England region to the end of December 2003. These figures include a total of 55 closures in the East of England region under the urban reinvention programme since its commencement in late 2002.

Mr. Andrew Turner: To ask the Secretary of State for Trade and Industry what *(a)* Post Office, *(b)* Royal Mail and *(c)* Government functions are (i) provided by all sub-post offices, (ii) provided by some sub-post offices at the discretion of *(A)* the sub-postmaster, *(B)* Post Office Ltd and *(C)* others, (iii) provided by all Crown post offices and (iv) provided by some Crown post offices at the discretion of *(1)* the manager, *(2)* Post Office Ltd. and *(3)* others. [171936]

Mr. Timms: These are operational matters for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Mr. Flook: To ask the Secretary of State for Trade and Industry when the decision to turn Taunton Crown Post Office into a SPAR store with post office facilities was taken; and if she will make a statement. [171990]

Mr. Timms *[holding answer 10 May 2004]:* This is an operational matter for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

David Wright: To ask the Secretary of State for Trade and Industry what consultation took place between the Government and the main clearing banks prior to the introduction of the Post Office card accounts; and what advice Ministers received on these matters. [172319]

Mr. Timms: Extensive consultation took place between the Government and the banking industry. The result of those negotiations was that all the main High Street banks and the Nationwide Building Society agreed to make a significant contribution to universal banking services at the Post Office. They are contributing £180 million towards the Post Office card account and are each providing access at Post Offices to a basic bank account product. Universal banking services were successfully launched on 1 April 2003.

Mr. Carmichael: To ask the Secretary of State for Trade and Industry pursuant to her answer of 28 April 2004, *Official Report*, columns 1163–64W, on rural post offices, for what reasons she will not publish Postcomm's advice on future levels of support; and when the Department will complete its consideration of this advice. [172547]

Mr. Timms: As I made clear in my answer of 28 April, Postcomm's advice on the future of the rural post office network was submitted to the Government in confidence. There are good reasons for this. The report contains detailed material which is commercially sensitive, both in relation to Post Office Ltd. and to the many individual businessmen and women who own and

run sub-post offices. While I do not rule out the publication in due course, it would be inappropriate to publish it before the Government has taken any decisions on the future of the rural network. The Government is currently considering that advice and will take decisions on the shape of the rural post office network after 2006 in good time to allow for a smooth transition from the current support arrangements. The current funding arrangements for the rural post office network have nearly two years to run yet.

Radio Frequency Identifiers

Mr. Watson: To ask the Secretary of State for Trade and Industry what assessment she has made of the likely change in the number of jobs in the retail sector as a result of the implementation of radio frequency identifier devices. [170163]

Mr. Sutcliffe: To date, DTI has not conducted any assessment of the likely change in retail staff numbers as a consequence of the implementation of RFID technologies.

Regulatory Reform

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry if she will make a statement on the progress of the *(a)* measures in the Regulatory Reform Action Plan and *(b)* regulatory reform orders which her Department has proposed but not completed. [171613]

Nigel Griffiths: The updated Regulatory Reform Action Plan, published in December 2003, contains over 600 deregulatory and simplification measures under way across Government. I am advised that over 300 of these measures have already been delivered.

The DTI proposed 10 Regulatory Reform Orders in the Regulatory Reform Action Plan; two have been implemented, three are in the scrutiny process and the remaining five will be the subject of consultation exercises.

Renewable Energy

Mr. David Stewart: To ask the Secretary of State for Trade and Industry what research she has commissioned on the balance between profit and investment associated with renewable energy development. [170173]

Nigel Griffiths: The Government have created an attractive investment framework for renewable energy developments through the creation of the Renewables Obligation and, for certain technologies, additional support through capital grants. This is in support for our policy goals of securing 10 per cent. of electricity from renewables by 2010 and further significant contributions from this sector 2020 and beyond.

However the specific economics of individual renewable energy projects will differ on a case by case basis for a variety of reasons, notably the location of the project and the technology involved. Those seeking to develop or finance renewable energy developments must reach their own views on the economics of individual projects.

Miss McIntosh: To ask the Secretary of State for Trade and Industry what her policy is on renewable energy. [170792]

Mr. Timms: The Government's target for renewables is that, by 2010, 10 per cent. of our electricity sales will come from renewable sourced electricity. The target is challenging as we are starting from a low base.

The Government's main policy mechanism for achieving the target is the Renewables Obligation (and Renewables Obligation Scotland). Introduced in April 2002, it places an obligation on all licensed electricity suppliers to supply a specified and growing proportion of their sales from electricity generated from a range of eligible renewable sources.

Through the Renewables Obligation (RO), we are looking to accelerate the development of renewables in a wide range of sources and technologies. In order to encourage a more vigorous and diverse renewable energy sector, the Government have also allocated a total of £350 million over four years for capital grants and research grants to promote forms of renewable energy that are further from becoming commercially competitive. This includes among other things grants of £117 million for offshore wind, £66 million for energy crops and biomass, £25 million for solar photovoltaics (PV), £10 million for community schemes and £5 million for wave and tidal demonstration projects.

Scottish Power

Ann Winterton: To ask the Secretary of State for Trade and Industry when she last met representatives of Scottish Power Plc; who was present; and what was on the agenda for discussion. [171781]

Ms Hewitt: I have had no recent meetings with representatives of Scottish Power.

My right hon. Friend the Minister for Energy, E-Commerce and Postal Service, met with representatives of Scottish Power on 11 March to discuss a number of issues relating to electricity supply. Also present were DTI officials.

Social Chapter

Mr. Meacher: To ask the Secretary of State for Trade and Industry if she will make a statement on the effects of the EU Social Chapter on the residents of Oldham West and Royton. [170939]

Mr. Sutcliffe: The residents of Oldham West and Royton have benefited from the EU Social Chapter by having their employment rights extended to include:

the right to parental leave which gives parents the right to 13 weeks unpaid leave at the birth or adoption of a child;

the entitlement of part-time workers to the same pro-rata terms and conditions of employment as full-time workers, thereby removing any discrimination and improving the quality of part-time jobs;

the provision that once a prima facie case has been made in an employment tribunal claim, the burden of proof is placed on the defendant (usually the employer), who will need to demonstrate that sex discrimination has not occurred;

rights under the fixed term work directive that provide equal treatment and prevent abuse of fixed term contracts;

rights under the European works council directive which requires companies with at least 1,000 employees in total and at least 150 workers in each of the two member states, to establish structures for consulting workers on issues that affect them and;

in addition, the information and consultation of employees directive, to be implemented in the UK by March 2005, establishes a right to new minimum standards for workforce communication and involvement in large firms.

Timber

Ms. Walley: To ask the Secretary of State for Trade and Industry whether her Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167618]

Mr. Timms: I refer the hon. Member to the reply given by my right hon. Friend the Secretary of State for Environment, Food and Rural Affairs, on 10 May 2004, *Official Report*, column 31W.

Travel Agents

Richard Burden: To ask the Secretary of State for Trade and Industry if she will make it her policy to require travel firms not bonded with ABTA or ATOL to display this information when advertising their services. [172027]

Mr. Sutcliffe: The Civil Aviation Authority (CAA) is soon to make recommendations to Government on the possible extension of financial protection for consumers in the event of failure of air travel firms. I understand from their published draft advice that CAA may recommend an extension to mandatory protection, but I also expect the proposals to address the scope for improving transparency regarding protection for travel arrangements.

VAT

Norman Baker: To ask the Secretary of State for Trade and Industry how many businesses have *(a)* registered and *(b)* deregistered for VAT in each year since 1997 in each local authority area in East Sussex. [169849]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start-ups in England and Wales, including 1,100 in East Sussex County, in the fourth quarter of 2003. The latest yearly figures show 465,000 business start-ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before. There were 4,700 business start-ups in East Sussex County in 2003. Data for each local authority in East Sussex County are not published by Barclays. Barclays start-up data for counties in England and Wales have only been published for 2003. Barclays closure data for counties in England and Wales have not been published.

DTI figures for VAT registrations and de-registrations for each local authority in East Sussex County are shown below for the period 1997 to 2002. Data for 2003 will be available in autumn 2004.

VAT registrations: 1997–2002

	1997	*1998*	*1999*	*2000*	*2001*	*2002*
East Sussex County	1,745	1,605	1,610	1,575	1,535	1,540
Eastbourne	255	215	240	210	235	215
Hastings	195	180	200	205	185	205
Lewes	355	335	290	275	285	280

Wealden	510	460	500	500	535	505

Source:
Business Start-ups and Closures: VAT Registrations and De-registrations 1994–2002, Small Business Service

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1997. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Work-Life Balance Study

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry what the findings were of the second Work-Life Balance study's accompanying employee survey report. [170519]

Mr. Sutcliffe: "The Second Work-Life Balance Study (WLB2): Results from the Employees' survey" was published in March by my Department as report number 28 in the Employment Relations Research Series. It is based on a survey carried out by MORI in January and February 2003. Key findings from the study are as follows:

There was a high level of support for work-life balance amongst employees with 95 per cent. agreeing that 'people work best when they can balance their work and other aspects of their lives'. However, they were also clear that business considerations should still come first with three-fifths (60 per cent.) agreeing that employees should not expect to 'change their working pattern if to do so would disrupt the business'.

Reported availability of work-life balance practices appeared to have increased since 2000 for several arrangements, but varied considerably from 67 per cent. of employees who said part-time working was available to only 20 per cent. who said that working from home on a regular basis was available.

There has also been an increase in take up of several flexible working practices since 2000. Where employers provided flexible arrangements, take up among employees in the previous year and with their current employer was highest for flexitime (55 per cent.) and working from home (54 per cent.), but lower where hours of work (and thus pay) would be reduced such as for job-sharing (15 per cent.).

A sixth of employees (17 per cent.) had approached their employer in the last two years to make a request to change how they regularly work for a sustained period of time, and 77 per cent. said their request had been agreed. Almost one-third

(29 per cent.) of mothers had requested a change in how they regularly worked from their employer in the last two years, compared to only 12 per cent. of fathers.

However, there was some employee concern, particularly among men, about the consequences of adopting flexible working practices in terms of their job security and career prospects. Although when asked about various working patterns and leave arrangements, only in the case of working reduced hours (such as part-time working) did more employees consider that adopting this way of working would negatively affect their career (51 per cent.) than those who stated that it would not (38 per cent.).

The findings indicate strong support for work-life balance among employees. The increases in provision and take up indicate a shift towards improved work-life balance for employees, and the Department has encouraged this trend through the new employment rights introduced in April 2003. This legislation gives new rights to parents including introducing paternity and adoption leave for the first time, and the right to request flexible working for parents of children under six-years-old and of disabled children under 18-years-old (with a statutory duty on the employer to consider the request), as well as increasing maternity pay and leave.

The report is available free from publications @ dti, or can be downloaded from the DTI website.

Workers' Rights (South Ribble)

Mr. Borrow: To ask the Secretary of State for Trade and Industry if she will make a statement on the benefits to the residents of South Ribble of new rights for night workers. [172138]

Nigel Griffiths: The Working Time Regulations came into force on 1 October 1998. The regulations limit working time to 48 hours per week averaged over a 17-week reference period. For night workers the limit is eight hours per day on average, including overtime where it is part of a night worker's normal hours of work. There is no opt-out from the night working time limit.

Night workers are entitled to 11 hours rest between working days, one day's rest per week, and a 20-minute in work rest break if the working period is longer than six hours.

All night workers should be offered a free health assessment before they start working night and thereafter at regular intervals for as long as they are working nights. The health assessments should take account of the nature of the work and the restrictions on a worker's working time under the regulations. Workers who suffer from problems as a result of working at night, should as far as practicable be offered alternative day work.

All workers are entitled to four weeks paid annual leave. There is no specific data available for night shift workers in South Ribble.

Mr. Borrow: To ask the Secretary of State for Trade and Industry how many residents in South Ribble have benefited from a reduction of the working week to 48 hours. [172139]

Mr. Sutcliffe: The Working Time Regulations provide workers with the right to refuse to work more than 48 hours on average, if they do not want to. Numbers for South Ribble are not available, however it has been estimated that around 300,000 workers resident in the North West region stood to benefit from the introduction of the weekly working time limits in 1998.

Mr. Borrow: To ask the Secretary of State for Trade and Industry how many and what percentage of women in South Ribble have taken 26 weeks maternity leave since 1997. [172148]

Mr. Sutcliffe: Take-up of maternity leave is not recorded centrally. It is possible to make an estimate of the numbers of women taking maternity leave based on employer returns to Inland Revenue of the Statutory Maternity Pay (SMP) they recover (since 2003 this has covered the first 26 weeks of leave). Figures for the take-up of SMP are not available on a regional basis, but nationally around 300,000 women receive SMP each year.

In addition, there will be some women who will qualify for maternity leave but not SMP (because they do not meet the earnings or length of employment criteria for SMP) and similarly some who qualify for SMP but not leave (because they are employed earners for the purposes of SMP but not employees in order to qualify for leave).

HEALTH

Abortions

Miss McIntosh: To ask the Secretary of State for Health what the average cost of an NHS abortion was in each of the past three years; and what the total cost of NHS provision of abortions was in each year. [171508]

Miss Melanie Johnson: The information requested is shown in the table:

National health service funded abortions performed in NHS hospitals in England

	Average cost of an NHS abortion[1] *provision (£)*	*Total cost of NHS abortion (£ million)*
2000–01	393.00	32.7
2001–02	415.00	35.7
2002–03	469.00	38.2

[1] Average cost of a day case surgical abortion.

Source:
National Schedule of Reference Costs, Appendix 1C.

Blood Transfusion

Mr. Burstow: To ask the Secretary of State for Health what work is being undertaken by the National Institute for Clinical Excellence into the most efficient use of alternatives to blood transfusions in the NHS. [164110]

Miss Melanie Johnson: I refer the hon. Member to the response I gave him on 21 April 2004, *Official Report*, columns 548–49W.

The Chief Medical Officer's national blood transfusion committee is looking at how to encourage the most efficient use of blood donations in the national health service.

Breast Cancer (Preston)

Mr. Hendrick: To ask the Secretary of State for Health how many and what percentage of women in Preston with suspected breast cancer saw a specialist within two weeks in each of the last five years. [168102]

Miss Melanie Johnson: The information requested is not collected on a constituency basis. The information shown in the table relates to the national health service organisations serving the Preston area.

Waiting times for first consultant out-patient appointment for suspected breast cancer following urgent GP referral

	NHS Trust	Seen within 2 weeks	
		Percentage	Number
1999–2000	Chorley and South Ribble NHS Trust	94.5	52
2000–01	Chorley and South Ribble NHS Trust	100.0	169
2001–02	Chorley and South Ribble NHS Trust	100.0	240
2002–03	Lancashire Teaching Hospitals NHS Trust	100.0	238
2003–04	Lancashire Teaching Hospitals NHS Trust	100.0	279

Note:
Lancashire Teaching Hospitals was established on 1 August 2002 from the acute services of Chorley and South Ribble NHS Trust and Preston Acute Hospitals NHS Trust

DH form QMCW.

Care Qualifications

Sandra Gidley: To ask the Secretary of State for Health what assessment he has made of the number of home care workers who have *(a)* obtained and *(b)* have yet to obtain NVQ level 2 in care. [171006]

Mr. Hutton: This information is not collected centrally. Since April 2004, the regulation and inspection of domiciliary care services has been the responsibility for the commission for social care inspection (CSCI). Information about the numbers of staff and their qualifications are provided to the CSCI as part of the registration process. Aggregate information is therefore likely to become available after March 2005.

Sandra Gidley: To ask the Secretary of State for Health what assessment he has made of the availability of courses in NVQ level 2 in care; and if he will make a statement. [171007]

Mr. Hutton: The nature of the National Vocational Qualification (NVQ) level 2 in care and its assessment precludes the provision of courses specifically designed to support study for this qualification. Candidates require access to specific educational or training courses according to their existing level of knowledge and skill. Such courses are provided locally and information about them is not collected centrally by the Department.

Topss England and the Learning and Skills Council have been working to ensure that social care employers have robust NVQ frameworks and increased number of NVQ assessors and verifiers in place so that staff can complete NVQs in care.

Catheter Laboratories

Andrew Bennett: To ask the Secretary of State for Health how many catheter laboratories there are at Manchester Royal Infirmary; when the last new one was opened; how many patients were treated in its first 12 months of working; and what the levels of throughput were of the older laboratories over the same period. [170143]

Miss Melanie Johnson: The information is not collected centrally and is a matter for the Central Manchester and Manchester Children's Hospital National Health Service Trust.

Chief Medical Officer's Report

Mr. Burstow: To ask the Secretary of State for Health (1) what the reasons are for the delay in the publication of the report on health and activity written by the Chief Medical Officer and due to be published last year; [165238]

(2) if he will publish the report on health and activity written by the Chief Medical Officer last year. [165247]

Miss Melanie Johnson: The Chief Medical Officer's (CMO) report, "At Least Five a Week", was published on 29 April. It is the authoritative source document on the health benefits of physical activity for England. The report includes the most up-to-date academic literature and was fully peer reviewed before publication.

Dentistry

Mr. Hunter: To ask the Secretary of State for Health if he will take further measures to increase the availability of NHS dentistry. [168095]

Ms Rosie Winterton: The Government are committed to rebuilding and restoring national health service dentistry to improve oral health. New legislation in the Health and Social Care (Community Health and Standards) Act 2003 will underpin a modernised, high-quality primary dental service, properly integrated with the rest of the NHS. The aim is to deliver better access to services, better working lives for dentists and their teams, better oral health and an improved patient experience.

As part of the new arrangements, the current remuneration system, which is based on item of service fees, will be abolished and replaced by a much simpler contract. Under transitional arrangements we are developing a simple but robust 'base contract' which all dentists and primary care trusts (PCTs) will be able to put in place from 2005. These transitional arrangements will provide protection of dentists gross earnings for three years to enable them to come off the treadmill of item of service fees, to see their patients at intervals appropriate to their oral health needs and to modernise and adjust their workload. These proposals are set out in "Framework proposals for primary dental services in

England from 2005" which was published on 24 February and on which we have been seeking views from dental representative bodies.

In the meantime we have provided new investment totalling £90 million to NHS dentistry over the last year. £59 million will support access and is aimed at increasing access to NHS dentistry for patients. Strategic health authorities have been advised of their shares and are working with their PCTs to address access issues. £30 million is to support information technology and the balance of £1 million will support organisational development locally.

Mr. Dhanda: To ask the Secretary of State for Health what measures he is taking to improve NHS dentistry for pensioners in Gloucester. [169984]

Ms Rosie Winterton: We have provided new investment totalling £90 million to national health service dentistry over the last year. £59 million will support access, and strategic health authorities (SHAs) have been advised of their shares and are working with their primary care trusts (PCTs), including those in Gloucestershire, to address access issues. £30 million is to support information technology and the balance of £1 million will support organisational development locally.

In Gloucestershire, the existing dental access centres offer emergency and routine dental treatment—this is prioritised according to patients' needs and the demands placed on the service.

All the PCTs in Gloucestershire have been invited by Avon, Gloucestershire and Wiltshire SHA to submit proposals to improve access to dental care, funded through the SHA's £2 million share of the access funding. They are also exploring the possibility of establishing an outreach-teaching pilot for dental and dental therapy students with Bristol University.

West Gloucestershire PCT is one of the 16 PCTs in England with which the NHS dentistry support team is working. The support team has made several visits to Gloucestershire towards the end of 2003, and an action plan to establish new dental practices in Cinderford, in the Forest of Dean, and Gloucester City will be agreed by the end of April 2004. Additionally, work is underway to explore the potential for overseas recruitment in Gloucestershire.

This work is to improve NHS dentistry for all patients in Gloucester including pensioners.

Departmental Annual Report

Norman Lamb: To ask the Secretary of State for Health how much the production of his Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171145]

Ms Rosie Winterton: The total cost to the Department of producing the 2004 Departmental report was £27,532. This included £20,577 for design, typesetting and artwork and a further £6,955 for the cost of the copies ordered by the Department.

This year 1,500 copies of the report were printed.

Those who receive free copies of the departmental report are chief executives of strategic health authorities, departmental senior civil service, directors of social care, parliamentary Libraries, Her Majesty's Treasury and Department of Health Ministers' private offices. This came to a total of over 640 copies that were provided free of charge.

Information is not yet available on how many reports have been sold at the cover price.

The report is also available on the Department's website at

http://www.dh.gov.uk/PublicationsAndStatistics/Publications/AnnualReports.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Health what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170801]

Ms Rosie Winterton: Crockery and cutlery in use in the Department for catering and hospitality is supplied by the Department's catering contractor.

Digital Hearing Aids

Mrs. Humble: To ask the Secretary of State for Health when digital hearing aids will be available on the NHS in the constituency of Blackpool, North and Fleetwood. [170591]

Miss Melanie Johnson: Digital hearing aids have been available on the national health service from the Blackpool, Fylde and Wyre Hospitals NHS Trust since January 2004. Priority is currently being given to new patients who require a hearing aid for the first time. However, existing patients are eligible for consideration subject to agreed criteria.

Drug Addicts

Jim Dobbin: To ask the Secretary of State for Health how many people in Heywood and Middleton are receiving drug treatment. [168538]

Miss Melanie Johnson: In 2000–01, there were 712 people receiving drug treatment in Rochdale. This is the latest available data. Data broken down by drug action team for 2001–02 and 2002–03 have not been finalised.

Exubera Inhaler

Miss Kirkbride: To ask the Secretary of State for Health when the Exubera inhaler will gain a certificate of a medicinal product and become available on the NHS to diabetics. [170535]

Ms Rosie Winterton: As with all marketing authorisation applications, before Exubera is granted a licence and becomes available in the United Kingdom it must be fully evaluated in relation to the appropriate standards required in the relevant European rules and

regulations on medicinal products. Data submitted in support of the application will need to demonstrate that the safety, quality and efficacy of the product are satisfactory for its intended use.

Food Procurement

Mr. Drew: To ask the Secretary of State for Health what his Department's policy is towards local food chain procurement; and what attempts he has made to amend his Department's competitive tendering rules. [170140]

Mr. Hutton: The National Health Service Purchasing and Supply Agency (PASA) and NHS Estates have produced an action plan, entitled "Public Sector Food Procurement Initiative", on behalf of the Department. The action plan was produced in response to the action on farming and food programme and it focuses on promoting sustainability in terms of NHS food procurement. This plan can be viewed at the PASA's website at www.pasa.nhs.uk or copies can be requested from the Corporate Affairs Manager, NHS Purchasing and Supply Agency, 80 Lightfoot Street, Chester CH2 3AD.

Mr. Drew: To ask the Secretary of State for Health what his Department's policy is towards special dietary provision by health trusts with reference to *(a)* halal, *(b)* kosher and *(c)* vegan diets. [170141]

Ms Rosie Winterton: Ensuring patients have access to adequate nutrition is a key component of effective health care. National health service trusts should have arrangements in place to ensure that the individual dietary needs of all patients can be met whether these arise from clinical need, cultural or religious requirements, or individual choice.

The NHS Purchasing and Supply Agency is currently re-negotiating two new central agreements for the provision of special diets and authentic ethnic food. The process is currently under way for developing the specifications for these with religious and cultural leaders and with dieticians and the British Dietetic Association to ensure authenticity and acceptability of the products.

General Practitioners

Mrs. Brooke: To ask the Secretary of State for Health what the *(a)* average cost of each patient consultation to a general practitioner and *(b)* average (i) hourly and (ii) daily cost to the NHS of a general practitioner's time was in the last year for which figures are available; and if he will make a statement. [168716]

Mr. Hutton: Data on general and personal medical services expenditure and activity are included in the Department's annual reports.

The report for 2004—Cm 6204—was published on 29 April 2004, and figure 7.5 of the report shows that expenditure per consultation was £17.42 in 2002–03.

The Report is available in the Library and on the Department's website at http://www.dh.gov.uk/PublicationsAndStatistics/Publications/AnnualReports/DHAnnualReportsArticle/fs/en?CONTENT_ID=4080936&chk=OsqvVR

General practitioners are self-employed contractors to the national health service and so determine their own hours of work and the hours of work of the staff that they employ to assist them. It is not possible, therefore, to estimate hourly or daily rates for a GP's time.

Bob Spink: To ask the Secretary of State for Health (1) under what circumstances a general practitioner may make a charge to patients for signing official documents; and if he will make a statement; [169746]

(2) if he will issue guidance to primary care trusts on suitable levels for charges by general practitioners for signing documents; [169756]

(3) if he will list the official documents and certificates which require a general practitioner's signature; and what action he is taking to satisfy himself that the level of charges by general practitioners for such signatures are reasonable. [169757]

Mr. Hutton: General practitioners are required to sign the following prescribed list of medical certificates:

To support a claim or to obtain payment either personally or by proxy; to prove incapacity to work or for self-support for the purposes of an award by the Secretary of State; or to enable proxy to draw pensions etc.

To establish pregnancy for the purpose of obtaining welfare foods.

To secure registration of stillbirth.

To enable payment to be made to an institution or other person in case of mental disorder of persons entitled to payment from public funds.

To establish unfitness for jury service.

To support late application for reinstatement in civil employment or notification of non-availability to take up employment owing to sickness.

To enable a person to be registered as an absent voter on grounds of physical incapacity.

To support applications for certificates conferring exemption from charges in respect of drugs, medicines and appliances.

To support a claim by or on behalf of a severely mentally impaired person for exemption from liability to pay the Council Tax or eligibility for a discount in the amount payable.

They must also sign prescription forms. If the doctor is asked to sign another document, such as a passport application form, he or she is not obliged to do so. However, if the GP does do this work, he or she is entitled to charge a fee. There are no plans to issue guidance on the level of this fee since successive Governments have regarded it as a private matter to be agreed upon between doctor and patient.

Mr. Amess: To ask the Secretary of State for Health how much income general practitioners lost in 2003–04 owing to not meeting specific targets imposed on them by his Department in each of the last three years; and if he will make a statement. [170206]

Mr. Hutton: No targets have been imposed on general practitioners in any of the last three years.

Guide Dogs

Mr. Hoban: To ask the Secretary of State for Health what financial support is given to train guide dogs for the blind. [171536]

Dr. Ladyman *[holding answer 10 May 2004]:* The Government do not fund the training of guide dogs. The Guide Dogs for the Blind Association is a registered charity and has not requested core funding from the Department or from the National Lottery.

Health Checks (Over-75s)

Mr. Burstow: To ask the Secretary of State for Health what tests are contained in the general practitioner health check for all patients aged 75 or over who request it and have not had a consultation within the last 12 months. [169717]

Mr. Hutton: Tests to be undertaken in the health check for patients aged 75 and over are not specified. It is a matter of practitioners' clinical judgment, based on the patient's needs arising from the consultation.

Health Directorates

Angela Eagle: To ask the Secretary of State for Health if he will list for each local health directorate in England the number of *(a)* men and *(b)* women elected. [164632]

Ms Rosie Winterton: The information requested is not collected centrally.

Health Services

Mr. Benton: To ask the Secretary of State for Health how many residents in Bootle awaiting heart surgery have had the option of choosing an alternative hospital for quicker treatment in the last 12 months. [169263]

Mr. Hutton: The information requested is not held centrally.

Mr. Benton: To ask the Secretary of State for Health how many and what percentage of suspected cancer patients in Bootle saw an NHS consultant within two weeks in each of the last seven years. [169265]

Miss Melanie Johnson: Information from 2000–01, the earliest available, is shown in the table. BOOTLE—Waiting times for first consultant outpatient appointment for suspected cancer following urgent GP referral.

	Quarter	NHS Trust	Seen within two weeks	
			Percentage	Number
2000–01	4	Aintree Hospitals NHS Trust	100	665
2001–02	1	Aintree Hospitals NHS Trust	100	683
2001–02	2	Aintree Hospitals NHS Trust	100	712
2001–02	3	Aintree Hospitals NHS Trust	100	878
2001–02	4	Aintree Hospitals NHS Trust	100	795
2002–03	1	Aintree Hospitals NHS Trust	100	916
2002–03	2	Aintree Hospitals NHS Trust	100	992

2003–04	1	Aintree Hospitals NHS Trust	100	1094
2003–04	2	Aintree Hospitals NHS Trust	100	1150
2003–04	3	Aintree Hospitals NHS Trust	100	1151

Source:
Department of Health form QMCW.

Mrs. Curtis-Thomas: To ask the Secretary of State for Health how many inpatients in Crosby had to wait more than *(a)* three, *(b)* six, *(c)* nine and *(d)* 12 months for treatment in each year since 1997; and what the percentage change in each year was in each case. [164307]

Miss Melanie Johnson: The information is not collected on a constituency basis but at national health service trust level. This information is shown in the tables.

Selected Trusts in Crosby area: Counts of finished admission episodes (valid waiting list and booked cases) by time waited grouping—NHS hospitals, 1997–98 to 2002–03

Time waited grouping	1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03

Selected Trusts in Crosby area: Year-on-year percentage change of finished admission episodes (valid waiting list and booked cases) for aggregated time waited groupings—NHS hospitals, 1997–98 to 2002–03

Time waited grouping	1997–98 to 1998–99	1998–99 to 1999–2000	1999–2000 to 2000–01	2000–01 to 2001–02	2001–02 to 2002–03
0 to 3 months	-9.6	3.8	4.1	-7.1	-2.2
more than 3 months	19.5	-4.7	3.7	-2.5	-4.3
more than 6 months	20.1	-10.3	5.7	-4.2	-6.6
more than 9 months	19.3	-6.8	1.1	-14.5	2.1
more than 12 months	22.7	-11.5	-11.8	-15.2	-21.7

Notes:
1. A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Figures are grossed for coverage, except for 2001–02 and 2002–03, which are not yet adjusted for shortfalls.
3. Time waited statistics from Hospital Episode Statistics (HES) are not the same as the published waiting list statistics. HES provides counts and time waited for all patients admitted to hospital within a given period whereas the published waiting list statistics count those waiting for treatment on a specific date and how long they have been on the waiting list. Also, HES calculates the time waited as the difference between the admission and decision to admit dates. Unlike published waiting list statistics, this is not adjusted for self-deferrals or periods of medical/social suspension.
4. Trusts in Crosby Area:
REM Aintree Hospitals NHS Trust
REQ Southport and Formby Hospitals NHS Trust
RJV West Lancashire NHS Trust
RVY Southport and Ormskirk NHS Trust.
5. Southport and Ormskirk NHS Trust was created on 1 April 1999 from Southport and Formby Hospitals NHS Trust and part of West Lancashire NHS Trust. The figures for West Lancashire NHS Trust for 1997–98 and 1998–99 are for the whole trust. It is not possible to identify the proportion of this figure attributable to Southport and Ormskirk NHS Trust.

Hospital Episode Statistics (HES), Department of Health

Mr. Neil Turner: To ask the Secretary of State for Health how many and what percentage of suspected cancer patients in Wigan saw an NHS consultant within two weeks in each of the last seven years. [169348]

Miss Melanie Johnson: Information from 2000–01, the earliest available, is shown in the following table.

Waiting times for first consultant outpatient appointment for suspected cancer following urgent GP referral.

	Quarter	NHS Trust	Seen within two weeks: Percentage	Seen within two weeks: Number
2000–01	4	Wigan and Leigh Health Services NHS Trust	100	146
2001–02	1	Wrightington, Wigan and Leigh NHS Trust	100	214
2001–02	2	Wrightington, Wigan and Leigh NHS Trust	100	232
2001–02	3	Wrightington, Wigan and Leigh NHS Trust	100	304
2001–02	4	Wrightington, Wigan and Leigh NHS Trust	100	346
2002–03	1	Wrightington, Wigan and Leigh NHS Trust	100	306
2002–03	2	Wrightington, Wigan and Leigh NHS Trust	100	337
2002–03	3	Wrightington, Wigan and Leigh NHS Trust	100	353
2002–03	4	Wrightington, Wigan and Leigh NHS Trust	100	337
2003–04	1	Wrightington, Wigan and Leigh NHS Trust	100	396
2003–04	2	Wrightington, Wigan and Leigh NHS Trust	100	393

Mr. Neil Turner: To ask the Secretary of State for Health if he will make a statement on NHS waiting times for heart surgery in Wigan. [169349]

Miss Melanie Johnson: In February 2004, no patient waited more than nine months for heart surgery at The Central Manchester and Manchester Children's Hospital National Health Service Trust or the South Manchester University Hospitals NHS Trust.

Mr. Neil Turner: To ask the Secretary of State for Health how many and what percentage of women in Wigan with suspected breast cancer saw a specialist within two weeks in each of the last five years. [169352]

Miss Melanie Johnson: The information requested is shown in the following table.

Waiting times for first consultant outpatient appointment for suspected breast cancer following urgent GP referral

	Quarter	NHS Trust	Seen within 2 weeks: Percentage	Seen within 2 weeks: Number
1999–2000	1	Wigan and Leigh Health Services NHS Trust	100	19
1999–2000	2	Wigan and Leigh Health Services NHS Trust	100	31

DH form QMCW.

Hospitals (Bedside Televisions)

Mr. Burstow: To ask the Secretary of State for Health what action his Department intends to take to resolve the problems in some hospitals where bedside televisions cannot be switched off. [169722]

Mr. Hutton: The bedside televisions provided can be switched off and no action is therefore required. Patients can turn off screens or turn them to face the wall if they prefer.

Immigrant Medical Inspections

Mr. Randall: To ask the Secretary of State for Health which bodies have had the prime responsibility for making available medical staff to support local authorities in their functions related to the Control of Disease Act 1984 during the NHS reorganisations of the last five years; and whether funding has followed these changes. [156843]

Miss Melanie Johnson: Long-standing central guidance has been that the local consultant in communicable disease control (CCDC) should normally be the local authority proper officer for the purposes of the Public Health (Control of Disease) Act 1984. Local authorities also look to the national health service to provide medical officers for the purposes of the port health regulations which are made, or deemed to be made, under powers in the Act.

In the last five years, CCDCs have been employed by health authorities, primary care trusts (PCTs—which were created in three waves, from April 2000, April 2001 and April 2002) and, from 1 April 2003, the Health Protection Agency (HPA).

From 2003–04, funding previously allocated to health authorities has been made available directly to PCTs. From April 2003, all PCTs which transferred staff to the HPA were top-sliced in line with the expenditure associated with the staff transferred. This included the funding for CCDCs and their teams.

Internet Medicine Sales

Mr. Burstow: To ask the Secretary of State for Health if he will list websites which have been *(a)* closed and *(b)* required to amend their web pages by their internet service providers following representations made by (i) the Medicines and Healthcare Regulatory Agency in the last year and (ii) the Medicines Control Agency for each year between 1997 and 2003 for (A) being in breach of the law on the scale of unlicensed medicines via the internet and (B) providing medicines without adequate patient consultations. [167807]

Mr. Hutton: During the period 1997 to 2003, the former Medicines Control Agency (MCA) achieved compliance through amendment to the website by the internet service providers in six cases involving the sale and supply of all medicines via the internet. A further seven websites were closed as a result of the operators voluntarily agreeing to do so. These cases involved both licensed and unlicensed medicines.

Specific enforcement activity is a matter between the Medicines and Healthcare products Regulatory Agency and the individual(s) concerned.

Mobile Telecommunication Masts

Sir Michael Spicer: To ask the Secretary of State for Health what plans he has to undertake further research into the health effects of G3 technology mobile telecommunication masts. [170128]

Miss Melanie Johnson *[holding answer 4 May 2004]:* A review of recent research entitled, "Health Effects from Radiofrequency Electromagnetic Fields", published by the National Radiological Protection Board (NRPB) advisory group on non-ionising radiation concluded:

> "Exposure levels from living near to mobile phone base stations are extremely low, and the overall evidence indicates that they are unlikely to pose a risk to health."

Nevertheless, following the precautionary approach advocated by the independent expert group on mobile phones (IEGMP) in May 2000 (www.iegmp.org.uk), the LINK mobile telecommunications and health research (MTHR) programme, was established under an independent programme management committee (PMC), following the publication of the IEGMP report. The PMC has expressed its wish to undertake research into the effects of 3G exposures and discussions are already taking place on how this can be added to the overall programme of research. Further information about this programme as a whole can be found on the MTHR website at www.mthr.org.uk.

The operators of mobile telephone equipment, including 3G technologies, ensure that public exposure does not exceed national and international guidelines. A substantial number of measurements of potential exposures of the public from base station emissions, have been made by a number of bodies, including the National Radiological Protection Board (NRPB) (www.nrpb.org) and Ofcom, formerly the Radiocommunications Agency (www.ofcom.org.uk). In all cases, exposures have been very much lower than guidelines.

National Service Frameworks

Mr. Waterson: To ask the Secretary of State for Health if he will make a statement on progress towards the National Framework milestone for primary care group and primary care trust schemes for older people to receive more help from pharmacists in using their medicines. [170617]

Ms Rosie Winterton: While we do not collect data centrally on the number of primary care trusts (PCTs) that have schemes in place so that older people can get more help from pharmacists in using their medicines, there is good evidence to indicate that the number of pharmacists providing support to patients, general practitioners and PCTs to improve medicine taking has increased significantly since 2001, when the older people's national service framework was published.

PCTs now employ over 1,000 pharmacists, some of whom provide hands on support to GP practices to set up medicines management schemes, which help patients take their medicines more effectively. Through the national medicines management collaborative at least 393 community pharmacies are actively involved in programmes such as prescription intervention schemes, medication reviews, return of unwanted medicines, and minor ailment schemes, thereby encouraging self-care and support to vulnerable groups, particularly older people. This includes enhanced prescription collection and delivery services, medicines management services to care homes and domiciliary visiting. The Department is also funding a trial of structured services based exclusively in community pharmacies for patients with coronary heart disease, led by the pharmaceutical services negotiating committee.

The proposed new community pharmacy contractual framework, which is currently being negotiated, will also be an important driver for change and will help to ensure that pharmacists are more involved in supporting patients in using their medicines. Repeat dispensing, which is expected to be an essential service provided by all pharmacies, will enable patients with stable conditions to obtain a prescription from their GP, which can then be dispensed in several instalments by their pharmacy over an agreed period of time.

The first pharmacist supplementary prescribers have qualified and will be writing their first prescriptions imminently. Supplementary prescribing within a clinical management plan agreed with the doctor will be particularly beneficial for patients with chronic diseases. The work of the medicines partnership taskforce, funded by the Department, has helped professionals and older people to become more involved in medication reviews.

Mr. Waterson: To ask the Secretary of State for Health if he will make a statement on progress towards the National Service Framework milestone for single integrated community services. [170619]

Dr. Ladyman: Of the 138 areas in England that have been identified to be covered by integrated health and social services community equipment services, 110, or 72 per cent., predicted in January 2004 that they would meet the four integration criteria, which are: to have a pooled budget, a sole manager, a manager's advisory board, and unified stock. The majority of the remaining services are expected to complete their integration during the course of the year.

Neurosurgical Consultants

Bob Spink: To ask the Secretary of State for Health how many neurosurgical trainees who were awarded their Certificate of Completion of Specialist Training more than six months ago have not yet received a consultant appointment, excluding locum consultancies. [167059]

Mr. Hutton: This information is not collected centrally.

NHS Land Sales

Mr. Alan Campbell: To ask the Secretary of State for Health if he will make a statement on the sale of surplus NHS land within the Northumbria NHS Trust area. [170414]

Ms Rosie Winterton: An agreement in principle has been given to transfer surplus land in the ownership of Secretary of State for Health to the Office of the Deputy Prime Minister. Details of the transaction and the price to be paid have still to be determined.

Some of the land under consideration for transfer falls within the area covered by Northumbria national health service trust.

Mr. Hoban: To ask the Secretary of State for Health (1) what conditions attach to the receipt of the proceeds of sale of the surplus NHS land to the Office of the Deputy Prime Minister; [168350]

(2) what arrangements have been entered into with the Office of the Deputy Prime Minister to ensure that the Department receives a share of any profits made on the subsequent sale of the surplus NHS sites by the Office of the Deputy Prime Minister. [168351]

Mr. Hutton: The announcement on 7 April was of an in-principle agreement to transfer the sites and the detailed terms of the transfer are still under discussion.

NHS Recruitment

Mr. Baron: To ask the Secretary of State for Health what assessment he has made of whether NHS organisations adhere to the Code of Practice on Ethical Recruitment in the granting of work permits to foreign healthcare applicants. [170668]

Mr. Hutton *[holding answer 4 May 2004]:* We monitor compliance to the code of practice through information supplied by strategic health authorities and also publish of a list of agencies who agree to comply with the code.

National health Service employers may only apply for a work permit following a professional registration assessment by the relevant statutory body.

Dr. Murrison: To ask the Secretary of State for Health what assessment his Department has made of the extent to which medical professionals from EU accession countries after 1 May will help to fill vacancies for *(a)* doctors, *(b)* nurses and *(c)* dentists in the NHS. [168069]

Mr. Hutton: No assessment has been made on how many national health service vacancies could be filled by healthcare professionals from European Union accession countries after 1 May.

However, international recruitment has a long established history with many healthcare staff from around the world having come to the United Kingdom at some point in their career. International recruitment has made a key contribution to the delivery of services in the NHS, and is a two way process. Welcoming healthcare professionals from abroad gives valuable opportunities for a transfer of experience and the sharing of ideas.

NHS Therapists

Paul Holmes: To ask the Secretary of State for Health how many NHS therapists for children with disabilities in mainstream schools have been recruited in the last three years; how many additional training places for such NHS therapists have been created in the last three years; and if he will make a statement. [170607]

Mr. Hutton: Information is not specifically available on the number of therapists for children with disabilities that have been recruited to the national health service. The tables show the number of physiotherapists, occupational therapists and speech and language therapists employed in the NHS and entering training each year.

Between September 2000 and 2003, the number of speech and language therapists employed in the NHS has increased by 15 per cent. Physiotherapists have increased by 15 per cent., and occupational therapists by 17 per cent.. The Government is also increasing the number of students entering training each year; since 1999–2000, training places in speech and language therapy have increased by 31 per cent., in occupational therapy by 44 per cent., and by 60 per cent., in physiotherapy.

NHS Hospital and Community Health Services (HCHS): Qualified speech and language therapists, occupational therapists and physiotherapists employed in the NHS as at 30 September each year

Headcount

	2000	*2001*	*2002*	*2003*	*Increase Number*	*Percentage*
Speech and language	5,430	5,685	5,960	6,243	813	15.0
Therapists						
Occupational therapists	13,129	13,914	14,749	15,391	2,262	17.2

Parliamentary Questions

Dr. Tonge: To ask the Secretary of State for Health when the hon. Member for Richmond Park will receive an answer to her questions regarding the use of Thimerosal, tabled on 22 March. [168865]

Miss Melanie Johnson: I replied to the hon. Member on 4 May 2004, *Official Report*, column 1474W and 5 May 2004, *Official Report*, column 1626W.

Patient Forums

Bob Russell: To ask the Secretary of State for Health what assessment he has made of the effectiveness of patient forums in representing the interests of patients following the abolition of community health councils; and if he will make a statement. [167291]

Ms Rosie Winterton: Community health councils had a general duty to represent the interests of the public in the health service. The new system of patient and public involvement is a much broader structure with a range of specific features.

The new system comprises on the spot support for patients through patient advice and liaison services (PALS), independent support for complainants through the independent complaints advocacy service (ICAS), the powers to scrutinise health services by overview and scrutiny committees of local authorities, and a duty on the national health service to involve and consult patients and the public in the planning and development of services.

On top of these arrangements there are also 572 independent patients' forums with a clear remit to monitor local NHS services, obtain the views of patients using those services and feed those views into local decision-making.

The Commission for Patient and Public Involvement in Health, the independent body responsible for supporting, advising on and monitoring the work of forums will also be responsible for reviewing how effectively forums have been in carrying out their responsibilities. It is also responsible for ensuring that appropriate and high quality support is provided to forums by the forum support organisations—it does this through rigorous contract and performance management arrangements.

Press Officers

Mr. Laws: To ask the Secretary of State for Health how many press officers were employed in his Department in each year from 1990–91 to 2003–04; what the total cost was in each year; and if he will make a statement. [162845]

Ms Rosie Winterton: The cost for all staff employed in the media centre from 1997–98 to 2003–04 is shown in table 1.

Table 1

	Cost (£ million)
1997–98	1.062
1998–99	1.239
1999–2000	1.253
2000–01	1.233
2001–02	1.279
2002–03	1.077
2003–04	1.284

Information showing the number of press officers employed by the Department is shown in table 2.

Table 2

	Staff
1990–91	11
1991–92	12
1992–93	14
1993–94	14
1994–95	14
1995–96	17
1996–97	17
1997–98	15
1998–99	15
1999–2000	16
2000–01	19
2001–02	22
2002–03	24
2003–04	26

The cost of employing press officers from 1990–91 to 1996–97 could be supplied only at disproportionate cost.

QA Business Services

Richard Burden: To ask the Secretary of State for Health (1) what action he is taking to complete the compensation calculations in respect of former employees of QA Business Services to achieve final conclusion of their claims; [170476]

(2) when he expects all the agreed compensation claims in respect of former employees of QA Business Services to be settled and paid. [170532]

Dr. Ladyman: Almost all the former employees of QA Business Services, who have taken legal action over compensation, have now received offers in settlement. The professional advisers for the litigants have responded to the offers. We are currently considering the issues raised and will respond to the litigants shortly. It will then be a matter for the litigants to decide if the revised offers are acceptable or not.

All those non-litigants who have been shown to have suffered losses on the same basis as the litigants have already received compensation payments.

Rheumatological/Musculoskeletal Conditions

Andy King: To ask the Secretary of State for Health (1) what proportion of hospital trusts provide access to a multidisciplinary team for patients with rheumatological conditions; [171931]

(2) what steps are being taken to increase patient access to direct advice, information and support to assist them in coping with their conditions. [171933]

Dr. Ladyman: Information is not collected centrally on the proportion of hospital trusts with access to a multidisciplinary team for patients with rheumatological conditions.

The Department is driving forward a major programme of work to improve equality of access to all national health service treatment and care services. Priorities for health and social care are set out in "Improvement, Expansion and Reform", the priorities and planning framework for 2003–06. Although rheumatological conditions are not identified specifically, people with these conditions stand to benefit from the improvement in access to specialist care for patients with any form of orthopaedic condition.

Maximum waiting times have fallen over the past few years and will continue to do so. By the end of 2005, the maximum waiting time for a first out-patient appointment with a consultant will fall to three months and the maximum wait for inpatient treatment will fall to six months. Also, the older peoples' national service framework set standards that will improve treatment and care for a range of older people, including those with rheumatological conditions.

Royal Colleges

John Mann: To ask the Secretary of State for Health how many of those classified as *(a)* senior managers, *(b)* managers, *(c)* clerical staff and *(d)* administrative staff within the NHS are eligible to join a royal college; and how many are not. [171361]

Mr. Hutton: The information requested is not collected centrally.

Scanners

Mr. Burstow: To ask the Secretary of State for Health if he will estimate the cost of a *(a)* MRI scanner and *(b)* CT scanner. [169709]

Miss Melanie Johnson: The costs of computed tomography (CT) and magnetic resonance imaging (MRI) scanners are dependent on the precise specification of equipment required at each individual institution. Costs may also be influenced by the method used to purchase equipment.

In England, costs range from £300,000 to £700,000 for CT scanners and £650,000 to £1,500,000 for MRI scanners. These costs are not inclusive of value added tax or any necessary build and installation costs.

Solvent Abuse

Tim Loughton: To ask the Secretary of State for Health (1) how many children were treated for solvent abuse in each of the last seven years; [169031]

(2) what the average waiting time is for children requiring consultations for solvent abuse. [169032]

Miss Melanie Johnson: The information requested is not available centrally.

Tuberculosis

Simon Hughes: To ask the Secretary of State for Health how many cases of tuberculosis there were in Greater London, broken down by national health service trust, in each year since 1997. [170501]

Mr. Hutton: Information on the number of tuberculosis cases is not available broken down by national health service trust. As the nearest alternative, information on tuberculosis notification is shown in the table at local authority level.

Local authority	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*[1]

Population denominators ONS.

Simon Hughes: To ask the Secretary of State for Health how many and what percentage of people eligible for the BCG inoculation in Greater London, broken down by national health service trust, received it in each year since 1997. [170507]

Mr. Hutton: Information is not available in the format requested. The number of BCG vaccinations to children aged under one and those aged 10–15 given by trusts in London is shown in table 9 of the annual statistical bulletin "NHS Immunisation Statistics,

England: 2002–03" and in similar tables in earlier bulletins, copies of which are available in the Library. Copies of bulletins from 1998–99 onwards are also available electronically on the Department's website at:

Waiting Lists/Times

Mr. Pike: To ask the Secretary of State for Health how many and what percentage of patients with suspected cancer in Burnley saw an NHS consultant within two weeks in each of the last seven years. [167943]

Miss Melanie Johnson: The information requested is not collected on a constituency basis. Information from 2000–01, the earliest available, is shown in the table and relates to the national health service organisations serving the Burnley area.

Waiting times for first consultant out-patient appointment for suspected cancer following urgent GP referral

	NHS Trust	*Seen within 2 weeks*	
		Percentage	*Number*
2000–01	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	100.0	175
2000–01	Burnley Healthcare NHS Trust	100.0	173
2001–02	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	100.0	229
2001–02	Burnley Healthcare NHS Trust	100.0	262
2002–03	Blackburn Hyndburn and Ribble Valley Health Care NHS Trust	99.6	246
2002–03	Burnley Healthcare NHS Trust	100.0	317
2003–04	East Lancashire Hospitals NHS Trust	100.0	688

Note:
East Lancashire Hospitals NHS Trust was formed from the merger of Blackburn, Hyndburn and Ribble Valley Health Care NHS Trust and Burnley Healthcare NHS Trust on 1 April 2003

Vaccinations

Bob Russell: To ask the Secretary of State for Health whether there is a shortage of serum for *(a)* measles, *(b)* mumps and *(c)* rubella for children whose parents opt for individual inoculations; and if he will make a statement. [171738]

Miss Melanie Johnson: The Department holds no information about the supply of single vaccines.

Norman Baker: To ask the Secretary of State for Health what analysis he has made of the potential link between the use of mercury-based whooping cough vaccines and the incidence of autism; and if he will make a statement. [167767]

Ms Rosie Winterton: As with all medicinal products, vaccine safety is continually monitored by the Medicines and Healthcare products Regulatory Agency (MHRA) and its independent expert advisory body, the Committee on Safety of Medicines (CSM). The MHRA and CSM have thoroughly reviewed the safety of mercury-containing vaccines, including alleged links with autism, on a number of occasions.

In 2001, CSM conducted a major review of the available evidence and has since then considered new data as it has emerged. In 2003, following a review of further studies, including two United Kingdom studies involving more than 100,000 children, CSM advice was placed on the MHRA website at http://medicines.mhra.gov.uk.

Further studies from Denmark involving almost half a million children have also specifically investigated the suggested link between mercury-containing vaccines and autism. None of these studies found any evidence of a causal association.

On the basis of the available data, the advice of CSM remains that there is no evidence of harm from the form of mercury contained in vaccines, with the exception of possible hypersensitivity reactions, typically skin rashes or local swelling at the site of injection. The CSM advises that the benefits of immunisation with such vaccines outweigh any potential risks of vaccination. This view concurs with that of the World Health Organisation.

Despite the strong evidence supporting the safety of mercury-containing vaccines, the European medicines regulatory body, the European Agency for the Evaluation of Medicinal Products (EMEA) continues to promote the development of vaccines without, or with the lowest possible levels of, mercury compounds. The CSM supports the EMEA position. In response to this, several UK licensed vaccines have had levels of such compounds reduced or removed completely from the manufacture of the component antigens or from the final vaccine.

Written Answers to Questions

Thursday 13 May 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Fraudulent Compensation Claims

Sir Teddy Taylor: To ask the Secretary of State for Environment, Food and Rural Affairs what procedures exist to prosecute fraudulent farmers who make claims for compensation from the European Union for sheep destroyed during the foot and mouth crisis. [172488]

Mr. Bradshaw *[holding answer 11 May 2004]:* Ordinarily the Investigation Branch of DEFRA would investigate such an allegation and pass the evidence gathered to the Criminal Advisory and Prosecution Division of DEFRA. Prosecution lawyers in that Division would review the evidence and if there were a realistic prospect of conviction and it were also in the public interest to prosecute DEFRA would commence criminal proceedings in the criminal courts.

In the event of a conviction the prosecution would seek a compensation and/or confiscation order to compensate the loser for the financial loss and deprive the convicted person of the benefit from the offences proved.

Hazardous Waste

Mr. Clifton-Brown: To ask the Secretary of State for Environment, Food and Rural Affairs what studies she has undertaken to evaluate the risk of additional transportation of hazardous waste as a result of the closure of hazardous waste treatment centres. [168373]

Mr. Morley: The Government recognise that with the expected reduction in the number of landfill sites taking hazardous waste from July 2004, hazardous waste could travel further in the short term. Nevertheless, it is recognised that even under the present system significant amounts of special waste travel across the country. In 2002, 42 per cent. of hazardous waste crossed a regional boundary. Government have not commissioned any specific studies to evaluate the forthcoming changes on this specific issue. Clearly in the longer term, the implementation of the Landfill Directive requirements will see an increase in treatment costs, which in turn will provide a greater incentive for hazardous waste minimisation and the use of more sustainable treatment technologies.

British Wildlife

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the health of Britain's wild animals. [169863]

Mr. Bradshaw: The broad stewardship of wildlife and specific policies on conservation and biodiversity are managed as part of Government's broader remit for the environment. In addition, through the UK Veterinary Surveillance Strategy launched last year, we will develop a better overview and understanding of the health of the health of Britain's wildlife in relation to its impact on public health and other animals.

Government, through its developing Animal Health and Welfare Strategy, recognises that there are a number of diseases of livestock where wildlife may act as a reservoir or a source of infection. Government has a role in science, research, intervention in some specific cases, and ensuring advice is available.

The Veterinary Surveillance Strategy provides a framework for ensuring the potential risks posed by wildlife to public health (through zoonotic disease) or to farmed livestock (for example from migrating birds) are effectively identified and managed. The Strategy will also cover the impact of disease control policies for farmed livestock on wildlife and certain welfare issues involving the protection from cruelty.

Where naturally occurring disease affecting animals in the wild occurs, Government have a role to ensure appropriate action is taken to monitor and manage the situation in accordance with the principles of the animal health and welfare strategy.

Correspondence

Mr. Kaufman: To ask the Secretary of State for Environment, Food and Rural Affairs (1) when she intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 25 March with regard to Jenny Edwards; [172263]

(2) when she will reply to the letter from the right hon. Member for Manchester, Gorton dated 25 March, with regard to Jenny Edwards. [170703]

Alun Michael: My right hon. Friend the Secretary of State replied on 10 May.

Mr. Kaufman: To ask the Secretary of State for Environment, Food and Rural Affairs when she intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 5 April with regard to Mr. Ian Boddison. [172264]

Alun Michael: I replied to the right hon. Member on 8 May.

Departmental Annual Report

Norman Lamb: To ask the Secretary of State for Environment, Food and Rural Affairs how much the production of her Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171140]

Alun Michael: The DEFRA Departmental Report 2004 cost Defra £66,070. This cost was for designing, typesetting and proofing of the report.

The Stationary Office Limited handled the printing of the document. They bore the full cost of printing and publishing of the document.

DEFRA does not have information on how many copies were printed and sold. The Stationary Office is not obliged to give us this information, and so soon after the Reports publication it does not yet have details of the number of reports sold. However they have been able to provide us with the numbers for the 2003 report, where they issued 514 copies.

DEFRA has purchased and distributed 600 copies of the 2004 Report for its own use. The bulk of these have been made available to the Senior Civil Service and other staff on request. In addition copies were sent to Parliament and the Forestry Commission.

The report is also freely available on the Department's intranet, which all staff can access. It is also available on DEFRA's website at: http://www.defra.gov.uk/corporate/deprep/default.htm.

Fisheries

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 27 April 2004, *Official Report*, column 861W, on fisheries, which member states have *(a)* an historic entitlement and *(b)* an entitlement without an historic track record to fish within the UK six to 12 miles zone; and whether those entitlements are transferable to any fishing vessel from that nation state. [172459]

Mr. Bradshaw: France, Belgium, Germany, Ireland and the Netherlands have a historical entitlement to fish in the UK six to 12 mile zone. No other member states have access to this zone.

Milton Keynes and South Midlands Sub-regional Strategy

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs what plans *(a)* her Department and *(b)* the Environment Agency have for new water and sewerage infrastructure to serve the Aylesbury area in the context of the draft Milton Keynes and South Midlands sub-regional strategy; and what the (i) time scale for and (ii) cost of such works will be. [172162]

Yvette Cooper: I have been asked to reply.

The Government are committed to ensuring that all the growth areas are equipped with the water and sewerage services and infrastructure necessary to guarantee the long-term health of these communities. To achieve this, we recognise the importance of involving the respective water undertakers and environmental regulators at an early stage in the development of proposals.

The Environment Agency has previously (June 2003) provided companies with draft breakdowns of the indicative housing numbers by sub-region and company area, to assist in draft Water Resource Plans work. But given the varying and quickly evolving extent of information available, the Water Resources Planning Guideline (issued by the Environment Agency to companies on how they should produce their water resources plans) is not prescriptive about how companies should take account of the sustainable communities plan. However, the Environment Agency report "Securing water supply" (November 2003) states that it will work with companies to understand the implications and that:

> 'Where appropriate companies should ensure that they have included the latest proposals in the sustainable communities initiative in their plans'.

The Environment Agency expects the water companies supplying the Milton Keynes/South Midlands area to provide their best available estimates of the impacts of the sustainable communities programme on their supply demand balance contained in their water resources plans. However, it is recognised that the next periodic review will have access to more definitive numbers.

Woodcraft Folk

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs whether any of the Department's *(a)* present and *(b)* previous staff are members of the Friends of the Woodcraft Folk. [170753]

Alun Michael: There are no records of staff being members of the Friends of the Woodcraft Folk. Staff are not required to register their private interests, such as membership of clubs or societies, unless these bring them into direct conflict with their official duties. In these cases, staff must declare their interest to senior managers, who will determine how best to proceed on a case-by-case basis.

DEFRA's staff are subject to the provisions of the Civil Service Code. This requires them to act with integrity, honesty, impartiality and objectivity in carrying out their duties and to conduct themselves in such a way as to deserve and retain the confidence of Ministers.

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions have been held between her officials and Chichester district council about the Woodcraft Folk. [170755]

Alun Michael: The only discussions I am aware of relate to a campsite operated by the Woodcraft Folk in Lurgashall for which an approach was made for a camping exemption certificate. DEFRA has responsibility for camping exemption certificates under section 296 of the Public Health Act 1936. There were objections to the application and correspondence was received from the constituency MP and from MPs representing users of the campsite.

My officials held a meeting with members of the Woodcraft Folk, Chichester district council and Lurgashall parish council on 9 June 2003 to discuss the Woodcraft Folk's application for a camping exemption certificate.

The discussions demonstrated that there were differences of view regarding past usage of the site so I agreed to DEFRA's commissioning an independent mediator to facilitate a further discussion between the Woodcraft Folk and the two councils on 3 and 4 February 2004. In the light of the mediator's report, I agreed to issue a camping exemption certificate to the Woodcraft Folk for one year, subject to further discussion between the parties to resolve outstanding issues.

LEADER OF THE HOUSE

Early Retirement

Bob Spink: To ask the Leader of the House how many employees in his Office took early retirement, and at what total cost, in the last financial year. [172186]

Mr. Hain: In the last financial year no staff in my office have taken early retirement.

PRIME MINISTER

Iraq

Tom Cox: To ask the Prime Minister what discussions he has had with the United States Administration, and with whom, on the cases of abuse that have taken place against Iraqi prisoners at the Abu Ghraib prison in Iraq; and if he will make a statement. [173075]

Glenda Jackson: To ask the Prime Minister what changes to the *(a)* political and *(b)* military strategy in Iraq are being considered by the (i) UK Government and (ii) US Administration as a consequence of the International Committee for the Red Cross report in February 2004. [173219]

The Prime Minister: Both President Bush and I have made clear that any abuse of human rights, torture or maltreatment of civilians in Iraq is wholly unacceptable and all cases will be dealt with.

TREASURY

Children's Fund

13. **Tim Loughton:** To ask The Chancellor of the Exchequer, if he will make a statement on his intentions for future funding for the children's fund. [172723]

Mr. Boateng: My right hon. Friend the Chancellor of the Exchequer said in his Budget statement that the children's fund will be continued to 2008 to allow a smooth transition to new children's trusts, which will be focused on preventative work and developed and delivered with the full engagement of the voluntary sector.

Tax Burden

14. **Mr. Jack:** To ask The Chancellor of the Exchequer, if he will make a statement on the distributional impact of the tax burden projections contained in the Financial Statement and Budget Report. [172724]

Ruth Kelly: The tax projections are based on macroeconomic assumptions set out in the Budget 2004 report. Estimating the distributional impact would require many more assumptions, which are unnecessary for our projections.

World Debt

15. **Mr. Ben Chapman:** To ask The Chancellor of the Exchequer, what discussions he held with international Finance Ministers on tackling world debt at the spring meetings of the IMF and World Bank. [172725]

John Healey: At the spring meetings of the IMF and World Bank, the Chancellor had various discussions with Finance Ministers. In addition to continuing to support countries in making progress through the Heavily Indebted Poor Countries (HIPC) initiative, it was recognised that there was an urgent need to support countries as they emerge from conflict and progress towards participation in the initiative.

It was also recognised that it was important to take forward work on the debt sustainability framework that the IMF and World Bank have proposed, in order to support long-term debt sustainability for poor countries.

However, debt relief alone is not sufficient. All HIPC countries will need additional aid to meet the millennium development goals (MDGS). That is why the UK's proposal for an international finance facility is so important. It can provide the much-needed substantial increase in resources—in the form of grants, concessional loans, or further debt relief—needed to attain the MDGS.

Dr. Gibson: To ask the Chancellor of the Exchequer what preparations he is making for discussions at the forthcoming meeting of the G7 Finance Ministers on tackling world debt. [172732]

John Healey: At the meeting of the G7 Finance Ministers, the Chancellor will be calling for the full implementation of the heavily indebted poor countries (HIPC) initiative, including additional relief to be provided to countries that have suffered economic shocks, in a full and timely manner. The Chancellor will also be calling for the HIPC initiative to be extended to ensure that eligible countries—many of which are in the process of exiting from conflict—are able to benefit from debt relief.

However, debt relief alone is not sufficient. All HIPC countries will need additional aid to meet the millennium development goals (MDGS.) The Chancellor will press the UK's proposal for an international finance facility, demonstrating that it can provide the much-needed substantial increase in aid—in the form of grants, concessional loans, or further debt relief—needed to attain the MDGS.

International Finance Facility

16. **Helen Jackson:** To ask the Chancellor of the Exchequer what consultations he has had with EU partners since 1 April regarding the international finance facility. [172726]

John Healey: The IFF proposal was discussed at the 8 April conference on Financing for Development which the Chancellor co-hosted with French Finance Minister Sarkozy, attended by representatives from over 55 countries including many of our EU partners. At the conference France reiterated its strong support for the initiative. We continue to build on this support with other EU countries in other fora.

17. **Ross Cranston:** To ask the Chancellor of the Exchequer what progress has been made on the international finance facility as a result of spring meetings with the IMF and World Bank. [172727]

John Healey: Good progress has been made in taking forward the IFF proposal at the Spring Meetings with a number of countries expressing their support. Following the developing country statement at the 8 April conference, both the G24 and African Governors endorsed the IFF and called on donors to implement the proposal. The World Bank's interim paper on Financing Modalities found that the IFF is technically feasible and concluded that frontloading of aid holds considerable attractions. Communiqués looked forward to reviewing the on-going joint World Bank and IMF work on aid effectiveness, absorptive capacity and, results-based measurement mechanisms, such as an IFF, at the Annual Meetings in September 2004.

House Prices

19. **Mr. Gordon Prentice:** To ask the Chancellor of the Exchequer what economic instruments are available to him to moderate the rise in house prices. [172730]

Ruth Kelly: In Budget 2003, the Chancellor noted that a reduction in housing market volatility would enhance macro-economic stability. He asked Kate Barker to review housing supply in the UK, and David Miles to review the UK mortgage market.

At the time of Budget 2004, both reviews presented their final reports. The Government have welcomed their analysis and recommendations for action.

As recommended in the Barker Review, the Government are implementing a programme of change to the planning system and to the delivery of development, consulting with stakeholders as necessary. The Government accept the case for releasing more resources to boost housing supply, improve affordability and lock in macro-economic stability, and will make a start in the forthcoming Spending Review.

The Government endorse David Miles' conclusion that urgent reform is desirable to make the UK mortgage market work better for consumers in a number of areas. The FSA has in train reforms in the mortgage market, which will move to statutory regulation on 31 October. The Chancellor has asked the FSA to consider and report on the further reforms proposed by David Miles.

Fuel Duty

20. **Mr. Chaytor:** To ask the Chancellor of the Exchequer what representations he has received concerning his proposed increase in fuel duty. [172731]

John Healey: Treasury Ministers receive a wide range of representations about all areas of taxation policy, both in the run-up to and after the Chancellor's annual Budget statement.

Financial Services Authority

Dr. Cable: To ask the Chancellor of the Exchequer if he will list the *(a)* consultation papers and *(b)* other documents issued by the Financial Services Authority in each of the last five years, broken down by number of pages. [172901]

Ruth Kelly: The matters raised in this question are the responsibility of the Financial Services Authority (FSA), whose day-to-day operations are independent from Government control and influence. The Chairman of the FSA has offered to write to the hon. Member shortly, addressing the matters raised. Every FSA consultation paper can be found by year of publication on the FSA's website, together with other FSA documents.

Insurance Mediation Directive

Mr. Drew: To ask the Chancellor of the Exchequer (1) if he will make a statement on implementation of the EU Insurance Mediation Directive *(a)* in this country and *(b)* elsewhere in the EU; [172839]

(2) what new regulations will be required on insurance brokers in order for them to meet Financial Services Authority guidelines for the introduction of the Insurance Mediation Directive; [172938]

(3) if he will reduce the fee structure for the Insurance Mediation Directive; [172840]

(4) on what date the Financial Services Authority required authorisation of brokers under the Insurance Mediation Directive; and whether this is common to all EU countries; [172937]

(5) what assessment he has made of the impact on the number of insurance brokers of the introduction of the Insurance Mediation Directive. [172939]

Ruth Kelly: The UK has the largest insurance industry in Europe. Implementing the IMD is a key step in completing the single market in financial services, and will enhance consumer protection in an important sector of financial business. The UK market for selling insurance is competitive with many players giving customers wide choice, and this will continue in the new regime. Already thousands of firms have applied to the FSA for authorisation for the new regime.

The Financial Services and Markets Act 2000 requires the FSA to publish a cost-benefit analysis of its proposed rules and guidance. The FSA has published cost benefit analysis in each of its consultation papers, which includes analysis of the market impact on firms. These state that regulation might result in some reduction in the number of firms selling insurance. In particular they stated that some businesses for whom selling insurance was a marginal activity may withdraw from the market once subject to statutory regulation. However there will be thousands of firms in the market providing consumers with a wide choice. The FSA have estimated that around 20,000 new firms will come into regulation as a result of mortgage and general insurance regulation and the vast majority of these will be involved in general insurance business.

The Government have consulted widely on the regulatory regime, publishing a public consultation document including draft regulations and a draft regulatory impact assessment in October 2002. Following analysis of the responses to the consultation, Parliament approved legislation on 24 June 2003. The activities to be regulated are: introducing, proposing or carrying out other work preparatory to the conclusion of contracts of insurance; assisting in the administration

and performance of such contracts, in particular in the event of a claim; and concluding contracts of insurance. In drawing up its rules for insurance mediation, the FSA has carried out extensive public consultation on its rules. Further information is available from the FSA's website, www.fsa.gov.uk.

FSA regulation of insurance brokers will commence from 14 January 2005. This date is two years from the publication of the directive in the *Official Journal* of the European Communities. All member states have to implement the directive by this date.

In implementing the directive the Government and the FSA have worked closely with the industry to design a regulatory regime that takes account of market practice, and does not load the industry and ultimately the consumer with unnecessary costs. Both the Government and the FSA have been concerned to minimise the impact on smaller firms and sole traders.

The fees charged are a matter for the FSA. Application fees for insurance intermediaries have been set following consultation with the industry and are based on the volume of business undertaken. Up to 50 per cent. discount is offered for an early application together with further discount if the application is made electronically. Smaller intermediaries seeking authorisation could pay a fee of only £500. If a firm is already authorised by the FSA for other regulated activities, the application fee it would pay for IMD activities is halved. The periodic annual fee which will be charged by the FSA for on-going supervision of authorised intermediaries following the commencement of regulation has not yet been set and will be the subject of a forthcoming consultation this summer.

Monitoring the implementation of the IMD across the EU is a matter for the Commission. The UK has focused its efforts on the implementation of the IMD in the UK market. We do however have informal working level contacts with other member states.

Labour Statistics (Bootle)

Mr. Benton: To ask the Chancellor of the Exchequer how many people were employed in tourism-related jobs in Bootle on the latest date for which figures are available. [173145]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mr. Joe Benton, dated 13 May 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question about tourism-related jobs in Bootle. I am replying in his absence. (173145)

The latest available data, from the 2002 Annual Business Inquiry, shows that the total number of jobs in tourism related industries in Bootle Parliamentary Constituency was 1,700. This total is obtained by combining figures for those working in the following industries, as identified by Standard Industrial Classification 2003:

hotels

restaurants

bars

activities of travel agencies

libraries, archives, museums etc.

sporting activities

other recreational activities.

Military Expenditure

Mr. Best: To ask the Chancellor of the Exchequer how many taxpayers have sought to divert or withhold the proportion of their contribution going to military expenditure in the last three years. [167871]

Dawn Primarolo: The information requested is not available.

Mr. Best: To ask the Chancellor of the Exchequer how many representations entitled 'peace tax returns' have been received by the Treasury. [167872]

Dawn Primarolo: We have no central record of the number of representations received entitled 'peace tax returns'.

National Insurance

Paul Flynn: To ask the Chancellor of the Exchequer what the current unneeded surplus is in the national insurance fund. [172728]

Dawn Primarolo: I refer the hon. Member to table two on page six of the report by the Government Actuary on the drafts of the Social Security Benefits Up-rating Order 2004 and the Social Security (Contributions) (Re-rating and National Insurance Funds Payments) Order 2004 (CM6117).

Any surplus contributions are used to buy gilts on behalf of the fund.

Norwich Union

Jim Dowd: To ask the Chancellor of the Exchequer what discussions he has had with the Association of British Insurers in the last 12 months in relation to the service provided by Norwich Union to its policy holders. [173223]

Ruth Kelly: Treasury Ministers and officials have meetings with a wide range of organisations and individuals as part of the process of policy development and analysis. As was the case with previous Administrations, it is not the Government's practice to provide details of all such meetings, as provided for under Exemption 7*(b)* of the "Code of Practice on Access to Government Information". Treasury meetings are conducted in accordance with the Ministerial Code and the Civil Service Code, as appropriate.

Pensions

Mr. George Osborne: To ask the Chancellor of the Exchequer what he estimates the cost would be to the Exchequer under its proposed reform of pension taxation of imposing no annual limit on pension savings in the year 2006–07 and each of the subsequent three years. [172126]

Ruth Kelly: The annual allowance protects against large payments being made into a tax privileged pension scheme that might then be removed from the scheme without the imposition of tax. So there would therefore

be a cost attached to having no annual allowance under the proposed simplified pension regime—even if the lifetime allowance were retained.

The size of this cost depends upon behavioural effects and any estimate of cost would inevitably be very broad-brush. However, given the potential additional pension savings from those in the top 1 per cent. of the earnings distribution, plus the possibility of the additional scope for tax avoidance or evasion, the cost to the Exchequer could be up to several hundred million pounds over this period.

Stability and Growth Pact

Mr. David: To ask the Chancellor of the Exchequer what progress is being made in discussions at a European level about the stability and growth pact. [172729]

Ruth Kelly: The Government continue to emphasise the need for a prudent interpretation of the stability and growth pact, taking into account the economic cycle, sustainability and the important role of public investment.

The Government published alongside Budget 2004 a discussion paper comparing our British fiscal framework with the rules of the European Union's stability and growth pact, examining the principles, based on our experience, which should guide the evolution of fiscal policy.

Statistics (Stockton, South)

Ms Dari Taylor: To ask the Chancellor of the Exchequer how many businesses in Stockton South have benefited from the 100 per cent. tax exemption for the purchase of computer and internet equipment. [171467]

Dawn Primarolo: I refer the hon. Member to the answer which was given to the hon. Member for Huntingdon (Mr. Djanogly) on 5 May 2004, *Official Report*, column 1505W.

VAT

Claire Ward: To ask the Chancellor of the Exchequer what plans he has to reduce VAT on devices which improve safety in the home. [171886]

John Healey: Member states are permitted only to introduce reduced rates of VAT from the prescribed list of goods and services as set out in Annex H of the EC Sixth VAT Directive. There is no general provision in Annex H for devices which improve safety in the home.

But Annex H does allow a reduced rate for certain works to housing and the Government have used this to introduce a reduced rate of VAT for the grant-funded installation of certain security measures (for example window and door-locks and smoke alarms), when installed at the same time as energy saving materials or central heating systems also paid for by a qualifying grant. Qualifying grants are targeted at people aged 60 or over and those receiving specified benefits, so the related reduced rate is similarly well targeted at those who need help most.

The UK's existing zero rates also cover a number of measures that contribute to safety in the home, such as burglar alarms and security lights, but only if they are installed in new homes at the time of construction.

A review of the reduced rate provisions is currently under way in Europe and the Government have made clear in these negotiations that we will not agree to the removal of any of our zero and reduced rate VAT derogations.

CONSTITUTIONAL AFFAIRS

Historical Papers

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs whether all the documents relating to the murder of Field Marshal Sir Henry Wilson MP in 1922 are now in the public domain; and if he will make a statement. [170548]

Mr. Leslie: Records kept by several Government Departments relating to the murder of Field Marshall Sir Henry Wilson in London in June 1922 are available for public inspection in the National Archives. A search of the National Archives' electronic catalogue did not reveal any documents unavailable for public inspection.

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs whether all official documents relating to Rudolf Hess are now in the public domain; and if he will make a statement. [170549]

Mr. Leslie: A search of the National Archives' electronic catalogue provides details of records relating to the career of Rudolf Hess originating from several Government Departments and now kept at Kew. All of this material appears to be available for public consultation. Since Mr. Hess did not die until 1987, it is quite possible that more material relating to him is still held in Government Departments, in accordance with the 30-year rule and other provisions of the Public Records Acts.

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs which documents relating to the late Duke of Windsor are withheld from public inspection in the Public Records Office, broken down by category; and if he will make a statement. [170541]

Mr. Leslie: Many public records relating to the Duke of Windsor, including some concerning his career after the Abdication in December 1936, were made available to the public for the first time on 30 January 2003. Further information about these and other records relating to the Duke kept at the National Archives can be obtained from its electronic catalogue on the internet at http://catalogue.pro.gov.uk. A search of the catalogue has not revealed any reference to the Duke's career which is not available for public consultation.

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs whether all the documents relating to the death of the late Duke of Kent in 1942, with particular reference to

the itinerary of his final projected journey, are now in the public domain and available for inspection; and if he will make a statement. [170544]

Mr. Leslie: The National Archives holds some correspondence and papers relating to the Duke of Kent's fatal air crash in Caithness in August 1942, mainly among the Air Ministry records. It is not aware of any significant body of material concerning this matter in other public archives.

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs which documents referring to personalities and events relating to the conflict in Ireland between 1919 and 1923 are withheld from inspection at the Public Records Office; and if he will make a statement. [170545]

Mr. Leslie: There is a considerable amount of material relating to the conflict in Ireland during this period, mainly but not exclusively among the historical records of the Cabinet Office, the War Office, the Colonial Office and the Home Office, now kept at the National Archives. It is not possible to supply a definitive answer concerning the availability of all this material without incurring disproportionate cost, but initial searches in the National Archives' electronic catalogue indicate that only a very few of the relevant files are not now open to public inspection.

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs which documents relating to the Irish plenipotentiaries who negotiated the Treaty of 1921 with the United Kingdom Government are withheld from pubic inspection in the Public Records Office; and if he will make a statement. [170546]

Mr. Leslie: There is a full official record of the negotiations between the British Government and the Irish plenipotentiaries, which resulted in the Treaty of 6 December 1921, among the Cabinet Office records now kept at the National Archives, in particular series CAB 21, CAB 24, CAB 27 and CAB 43. These records are open for public consultation.

The Royal Irish Constabulary's file on Michael Collins, one of the leading plenipotentiaries, covering the period 1916–1920, is also publicly available (reference: CO 904/196).

Andrew Mackinlay: To ask the Parliamentary Secretary, Department for Constitutional Affairs which documents that relate to Anthony Blunt are withheld from public inspection in the Public Record Office, broken down by category; and if he will make a statement. [170547]

Mr. Leslie: An initial search of the electronic catalogue relating to public records kept by the National Archives does not reveal any records relating to Anthony Blunt which are not open to public inspection. However, since he remained a prominent public figure until his death in 1983, it is quite possible that some material relating to him held by Government Departments has yet to be transferred to the National Archives, in accordance with the 30-year rule and other provisions of the Public Records Acts.

British-Irish Council

Rev. Martin Smyth: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the role of the British-Irish Council is in monitoring and co-ordinating the implementation of the provisions of the Charter for Regional and Minority Languages. [168815]

Mr. Lammy: The British-Irish Council does not have a role in monitoring and co-ordinating the implementation of the provision of the European Charter for Regional and Minority Languages. This is a matter for the Council of Europe and each of the Charter's ratified signatories. (Out of the BIC Members, only the UK and Ireland are members of the Council of Europe, and the UK is the only ratified signatory to the Charter.)

The British-Irish Council however has a sectoral working group looking at Indigenous, Minority and Lesser-Used Languages, led by the Welsh Assembly Government. The work of the BIC in this area will complement current UK initiatives in respect of the Charter.

Correspondence

Mr. Kaufman: To ask the Parliamentary Secretary, Department for Constitutional Affairs when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 25 March with regard to Mr. Martin Rathfelder. [172259]

Mr. Lammy: The Secretary of State and Lord Chancellor wrote to the right hon. Member on 4 May in response to his letter of 25 March.

Legal Aid

Mr. Dismore: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will make a statement on the dispute with the Bar over legal aid in criminal trials. [169800]

Mr. Lammy: Very high cost criminal cases (VHCCCs) represent around 1 per cent. of all Crown court cases but take up (currently) around 51 per cent. of Crown court expenditure (£250–300 million). Over the last three years the percentage increase in the cost of the most expensive 1,000 criminal cases in each year has been 14 per cent. The new contracting scheme, which now applies to all these cases, introduces greater control and works on the basis of fixed rates for both barristers and solicitors. Cases are paid for as each stage is completed. That is an advantage from the lawyer's point of view over the former system where cases are on average paid two years after their start.

The Secretary of State for Constitutional Affairs and I are concerned about the refusal by barristers to take on some very high cost criminal cases (VHCCCs) under the contracting regime which now applies to all cases. We have therefore set up a Review Committee with the Bar and Law Society to examine the VHCCC regime and report by 28 May 2004. The committee also includes the Legal Services Commission, the Treasury and the Crown Prosecution Service. I am pleased to note that

the Chairman of the Bar has written to his members to help ensure that the essential public interest priorities are met pending the outcome of the review.

The VHCCC Review Committee met for the first time on 26 April, under the chairmanship of Ian Magee CB (Second Permanent Secretary at the Department of Constitutional Affairs, and Chief Executive, Operations with responsibility for legal aid). There was a useful exchange of views between the Bar, the Law Society, my Department and the Crown Prosecution Service and a programme of rapid work has been agreed, which should enable a full report to be prepared by 28 May.

The Review Committee's terms of reference are:

"To examine the workings so far of the very high cost criminal case regime and to make recommendations on how its procedures and structures might be improved to provide a better service to clients and a better system for those working within it.

The Review should consider:

the management and bureaucracy of the Scheme, including the balance between cost management and professional judgment;

whether there are opportunities to rebalance payments in the scheme to address anomalies;

the validity of the categories;

whether there would be advantage in extending the upper threshold of the graduated fee scheme (i.e. whether the graduated

The Review is to report on 28 May, unless parties agree to extend.

There is no commitment on the part of the Government to fund any measures, which would have the effect of increasing overall legal aid expenditure. But if the length of cases reduces overall, this may be reflected in increased rates."

Legal Aid (NHS Cases)

Mr. Gordon Marsden: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many *(a)* patients and *(b)* patients' families have received legal aid support for disputes with NHS trusts in the last five years. [166692]

Mr. Lammy: The information requested is not directly available. The Legal Services Commission's computer systems do not record the status of the person receiving legal aid nor do they indicate who the dispute is against. However, the Commission is able to provide figures for the number of funding certificates where the Commission has granted Legal Representation for actual or potential clinical negligence proceedings. The figures are not necessarily reflective of the number of individuals involved:

	Number
1998–99	7,867
1999–2000	7,375
2000–01	7,329
2001–02	7,309
2002–03	6,307

The Commission has figures for the pre-representation legal advice and assistance stage only from April 2001. These are as follows—again the figures are not necessarily reflective of the number of individuals involved:

	Number
2000–01	4,550
2001–02	4,903
2002–03	4,554

SOLICITOR-GENERAL

Anti-social Behaviour

Chris Ruane: To ask the Solicitor-General which areas will be covered by the new anti-social behaviour prosecutors; and what mechanisms are in place for spreading best practice in combating antisocial behaviour. [172930]

The Solicitor-General: The twelve Areas covered by the new anti-social behaviour prosecutors are: Northumbria, Lancashire, South Yorkshire, Merseyside, Manchester, West Mercia, Birmingham, South Wales, Avon and Somerset, Sussex, Kent and London (North Sector).

The specialist prosecutors will be responsible for prosecuting anti-social behaviour cases and seeking orders on conviction.

Best practice is shared on a regular basis via a central project team and a dedicated Crown Prosecution Service intranet bulletin board. The expert prosecutors will be holding regular meetings with the Attorney General where they will circulate local good practice and feed back practitioner impact.

Those CPS Areas not included in the scope of the current project have now appointed lead anti-social behaviour prosecutors.

CULTURE, MEDIA AND SPORT

Regional Tourism

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport how much funding for tourism has been made available to each regional development agency (RDA) in the current year; and how much of this funding each RDA passed on *(a)* to its regional tourist board, *(b)* to local authorities, *(c)* to local and regional businesses and *(d)* for use for marketing. [172389]

Mr. Caborn: In 2004–05, the RDAs will receive £3.6 million specifically for tourism as follows:

	Amount (£)
Advantage West Midlands	252,000
East of England Development Agency	543,000
East Midlands Development Agency	252,000
North West Development Agency	713,000
One North East	333,000
South East Development Agency	744,000
South West Regional Development Agency	403,000
Yorkshire Forward	360,000

This money is ring-fenced for the Regional Tourist Boards until the end of 2005–06. Those regions which no longer work with an RTB have sought the Department's approval to pass the money to other designated tourism

delivery bodies. The RDAs will determine what objectives and targets the RTBs or other organisations should meet in return for the funds, working as appropriate with local authorities and businesses.

In the North East, ONE has taken over the core functions of the former Northumbria Tourist Board, and will retain the funding on the basis that it is ring-fenced for this purpose. In the North West, the NWDA has established four destination management organisations to take over the role of the former NW Tourist Board.

NORTHERN IRELAND

Disabled Facilities Grant

Gregory Barker: To ask the Secretary of State for Northern Ireland what assessment has been carried out of the effectiveness of abolishing the Disabled Facilities Grant means test for children in Northern Ireland. [172874]

Mr. Spellar: The abolition of the Disabled Facilities Grant (DFG) means-test for parents of children with disabilities came into effect from 16 February 2004. It is therefore too early for any assessment of effectiveness to be carried out. The working group which was set up to look at the matter considered the potential impact of the abolition in terms of cost to the Government and numbers who could be helped by the abolition. It was estimated that 25–30 applications for DFG are withdrawn each year due to the high contribution.

Homelessness

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many *(a)* homeless and *(b)* other people living rough there are in Northern Ireland. [171798]

Mr. Spellar: The exact number of people "living rough" is unknown. However, a survey early this year estimated that between 20 and 30 people who frequently use Housing Executive funded Outreach services could be regarded as "living rough". The survey did not, however, attempt to determine whether they were statutorily homeless or not. This is a very small percentage compared the number of households on the Housing Executive's waiting list registered as homeless which at 31 March 2004 stood at 5,287.

Sports Grounds

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on the status of the Safe Sports Grounds funding made available for essential health and safety work to stadia in Northern Ireland; and how much funding has been made available *(a)* in each of the past three years and *(b)* since January for this purpose. [170249]

Angela Smith: The Interim Safe Sports Grounds Scheme ended in March 2003 and the Sports Council for Northern Ireland is currently planning development of a new Sports Grounds Development Programme, the main purpose of which is to address the long-term health and safety deficiencies of major sports grounds in Northern Ireland. Government funding made available for the health and safety work to Northern Ireland stadia in each of the last three financial years.

£ million

Financial year	*Amount made available*
2001–02	0.5
2002–03	1
2003–04	Nil

SCOTLAND

Chernobyl

Llew Smith: To ask the Secretary of State for Scotland how many farms in Scotland, comprising what land areas and in what locations, have restrictions applied to them in respect of land use as a result of the residual radioactivity from the Chernobyl nuclear accident. [169878]

Mrs. McGuire: This is a devolved matter within the responsibility of the Scottish Executive, who are advised by the Food Standards Agency. However, the following table from the Food Standards Agency shows the number of farms in Scotland, their location and area of land covered by restrictions on the movement of sheep as a result of the residual radioactivity from the Chernobyl nuclear accident. There have been no restrictions on land use as a result of the Chernobyl accident.

Restrictions in Scotland at 30 April 2004

	Number
Number of Farms	14
Land Area (hectares)	16,300
Location	[1]

[1] South West and Central Scotland.

Departmental Expenditure (Entertainment)

Mr. Laws: To ask the Secretary of State for Scotland what his latest estimate is of the amount spent by his Department on official entertainment in each year from 1996–97 to 2004–05. [169103]

Mrs. McGuire: The Scotland Office was established on 1 July 1999.

Since that date the Office has spent the following on hospitality and entertainment:

	£000
1999–2000	[1]10,638
2000–01	41,638
2001–02	25,789
2002–03	41,782
2003–04[2]	25,969

[1] Part-year cost.

[2] Estimate.

Note:

Expenditure for 2004–05 is expected to be of a similar order to 2003–04.

Nuclear Power Plants (Air Security)

Llew Smith: To ask the Secretary of State for Scotland what discussions he has had with the Secretary of State for Transport in respect of the breach of the air exclusion zone around the Chapel Cross nuclear plant this year; and what steps have been taken to improve air security around the plant. [171650]

Mr. Timms: I have been asked to reply.

My officials have discussed this matter with the Ministry of Defence, who have confirmed that no breach of the air exclusion zone at the Chapel Cross nuclear power station has taken place.

Telephone Costs

Mr. Peter Duncan: To ask the Secretary of State for Scotland what his Department's expenditure on *(a)* fixed and *(b)* mobile telephones was in each of the last five years. [165967]

Mrs. McGuire: The Scotland Office was established on 1 July 1999.

Since that date the Office has spend the following on telephone costs.

£000

	Fixed lines	*Mobile telephones*
1999–2000	[1]36,622	[1]6,760
2000–01	85,483	14,275
2001–02	86,697	11,850
2002–03	81,756	7,216
2003–04[2]	82,131	6,646

[1] Part-year costs.

[2] Estimate.

Note:

The costs in 2000–01, 2001–02 reflect the additional expense of purchase mobile telephone equipment.

Timber

Ms Walley: To ask the Secretary of State for Scotland whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167617]

Mrs. McGuire: I refer my hon. Friend to the answer given by my hon. Friend the Minister for Environment, Department for Environment, Food and Rural Affairs, on 10 May 2004, *Official Report*, column 31W.

TRANSPORT

British Transport Police

Mr. Damian Green: To ask the Secretary of State for Transport how many British Transport Police officers have been assaulted while on duty in each year since 1997. [171902]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on officers assaulted while on duty in each year since 1997:

	Number of Officers assaulted
1997–98	187
1998–99	184
1999–2000	194
2000–01	227
2001–02	227
2002–03	213
2003–04	267

Car Sharing

Mr. Paul Marsden: To ask the Secretary of State for Transport (1) what research his Department has conducted into car-sharing schemes; and if he will place copies of such research findings in the Library; [172290]

(2) what plans his Department has to provide guidance for local transport plans relating to car-sharing schemes. [172291]

Mr. McNulty: Research into the effectiveness of car sharing and other travel plan measures was published in 2002 in "Making Travel Plans Work: Research Report", copies of which were placed in the Library.

Last year, the Department commissioned research into the influence of soft factors on travel demand. The final report, which will include a chapter on car sharing, is expected to be completed shortly and copies will be placed in the Libraries of the House.

Following a commitment made in the Government's Response to the Motorist's Forum Report on car sharing and car clubs on 3 December 2002, *Official Report*, column 72WS, the Department has commissioned research into best practice in setting up formal car sharing and car club schemes in closed communities. From the research, we will provide new guidance for local authorities, schools and employers on the effective implementation of car share schemes. The research and guidance is expected to be completed in October and copies will be placed in the Libraries of the House.

Mr. Paul Marsden: To ask the Secretary of State for Transport what the locations of high occupancy vehicle lanes are; and how long each lane is. [172293]

Mr. McNulty: There are high occupancy vehicle (HOV) lanes operating in two local authorities in England: two lengths of HOV lane in Leeds totalling 1.5 km and four lengths totalling 1.9 km in South Gloucester.

Mr. Paul Marsden: To ask the Secretary of State for Transport what research his Department has collated on the effectiveness of high occupancy vehicle lanes. [172294]

Mr. McNulty: The HOV lanes on Stanningley Road in Leeds are included as one of the case studies in the Bus Partnership Forum's Resource Pack "Bus Priority—The Way Ahead" published by the Department in September 2003. This reports the results of an evaluation of the HOV lanes carried out by Leeds City Council.

Dual Carriageways (Nottinghamshire)

Mr. Kenneth Clarke: To ask the Secretary of State for Transport when he expects the construction of the A46 dual carriageway improvement between Newark and Widmerpool in Nottinghamshire to begin. [171518]

Dr. Howells: The future programme depends on funding and how quickly the various statutory processes can be completed but we currently expect that start of works will be in 2007 with the road opening to traffic in 2009.

Mr. Kenneth Clarke: To ask the Secretary of State for Transport when he expects the construction of the A453 dual carriageway improvement between Clifton in Nottinghamshire and Kegworth to begin. [171519]

Dr. Howells: The future programme depends on funding and how quickly the various statutory processes can be completed but we currently expect that start of works will be in 2008–09 with the road opening to traffic in 2011.

East-West Rail Route

Mr. Lidington: To ask the Secretary of State for Transport if he will make a statement on the Government's policy on the proposed Western Section (Oxford to Bedford) of the East-West Rail route. [172170]

Mr. McNulty: The East-West Rail Consortium (a group of local authorities along the route, working in partnership with the regional assembly and the regional development agencies) has now put forward an updated business case for the Bedford to Bletchley section of the East West Rail Link. This proposal involves upgrading and re-opening the line between Oxford and Bedford. Officials at the Office of the Deputy Prime Minister are considering the updated business case, particularly in light of the potential impact of the scheme on the delivery of the Sustainable Communities Plan. The Strategic Rail Authority is also considering the Bedford to Bletchley business case. Any appraisal will need to be considered against other priorities—and in the context of the financial constraints on the industry at the present time.

Light Rapid Transit

Mr. Viggers: To ask the Secretary of State for Transport when he will make an announcement of his decision on the Light Rapid Transit project between Fareham, Gosport and Portsmouth. [172376]

Mr. McNulty: A decision will be announced in due course.

London Underground PPP

Mr. Clapham: To ask the Secretary of State for Transport which management consultants undertook work for *(a)* his Department and its predecessor and *(b)* London Underground in respect of the London Underground Public Private Partnership; and if he will list the total payments in each management consultancy company. [171222]

Mr. McNulty: During procurement of the Public Private Partnership (PPP) the Department and London Underground made joint use of external advisers wherever possible to keep costs to a minimum. Management consultants used on the PPP were PricewaterhouseCoopers, Arthur Andersen, PA Consulting, KPMG, Hornagold & Hills and Ernst & Young. The value of work done by individual consultants and advisers is commercially confidential. London Underground's total expenditure for all external advice on the PPP—including management consultancy, legal, financial, engineering and operational advice—was £103.5 million. The Department had separately spent £1.5 million on external advice.

MOT Computerisation

John Thurso: To ask the Secretary of State for Transport what progress has been made in the testing of the MOT computerisation system by VOSA and Siemens Business Systems. [172132]

Mr. Jamieson: Siemens Business Services have fully completed four cycles of Main System Test and are in the process of completing a fifth. Trial stage 1 (VOSA Acceptance Testing) is due to begin on 21 June 2004.

John Thurso: To ask the Secretary of State for Transport what progress has been made with the planned two-month volunteer MOT trial at 50 garages. [172133]

Mr. Jamieson: Trials at 45 stations are due to begin on 2 August 2004.

Volunteers have been sought and applicants are being sifted. Those who have been selected to conduct these initial trials will be notified shortly

John Thurso: To ask the Secretary of State for Transport when the MOT computerisation programme will be installed in 1,000 MOT garages as planned; when the service is due to go live; and when it will be rolled out to other MOT garages. [172134]

Mr. Jamieson: The service is due to be rolled out and trialled in 1,000 MOT stations from, 27 September 2004 onwards. These stations will trial the service in parallel with, operating the current test administration protocols.

The service is due to be rolled out to all MOT stations, and go live, from 29 November 2004.

John Thurso: To ask the Secretary of State for Transport when the planned series of MOT computerisation seminars will take place; and what these seminars are planned to do. [172135]

Mr. Jamieson: VOSA runs a series of national MOT seminars each year. The subject of the 2004 round of seminars was MOT Computerisation; they took place between January and April. The seminars facilitate two-way communications between VOSA and the trade on issues relating to MOT testing. No further seminars are planned before roll-out starts to all stations.

Productivity and Costs

Bob Spink: To ask the Secretary of State for Transport what his policy is for *(a)* increasing the productivity and *(b)* cutting the costs of (i) his Department and (ii) its agencies and non-departmental public bodies. [172182]

Mr. McNulty: I refer the hon. Member to the answer given by my hon. Friend the Financial Secretary to the Treasury on 10 May 2004, *Official Report*, columns 148–49W. The Department for Transport has been working on proposals to meet the Chancellor's efficiency target. These proposals will be finalised as part of the 2004 Spending Review.

Public Transport (Wirral, South)

Mr. Ben Chapman: To ask the Secretary of State for Transport if he will make a statement on the effect of investment in railway improvements over the next 10 years upon residents of Wirral South. [172693]

Mr. McNulty: Merseyrail which operates local services in Wirral, South is a consistently high performer. Residents of Wirral, South will also benefit from the West Coast Main Line upgrade and the new TransPennine Express franchise to make fast inter-city journeys out of Liverpool. The TransPennine Express franchise, which commenced in February secures investment of around £260 million, which will include the introduction of a new fleet of 100 mph diesel trains leading to increased capacity, improved service quality and performance across the region.

Railway Crimes

Mr. Damian Green: To ask the Secretary of State for Transport how many crimes of a sexual nature were committed on the railways in each year since 1997. [171910]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on how many crimes of a sexual nature were committed on the railways in each year since 1997:

Total number of offences recorded

	England and Wales	*Scotland*
1997–98	719	37
1998–99	1,185	29
1999–2000	1,079	34
2000–01	1,009	31
2001–02	1,020	34
2002–03	1,003	29
2003–04	1,120	36

Mr. Damian Green: To ask the Secretary of State for Transport how many arrests have been made by the British Transport Police on railway property in each year since 1997. [171911]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on arrests made on railway property in each year since 1999; information is not readily available for earlier than 1999.

	Total number of arrests
1999–2000	6,393
2000–01	6,788
2001–02	7,049
2002–03	7,434
2003–04	8,151

Mr. Damian Green: To ask the Secretary of State for Transport how many arrests have been made by the British Transport Police in each year since 1997 for suspected crimes committed on property other than the railways. [171912]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on arrests made for crimes committed on property other than the railways since 1997.

Arrests made for other forces including Scottish forces

	Total number of arrests
1997–98	1,119
1998–99	1,513
1999–2000	1,174
2000–01	1,175
2001–02	1,000
2002–03	760
2003–04	1,224

Railway Stations

Mr. Damian Green: To ask the Secretary of State for Transport (1) how many stations are not served by at least one train in each direction on one or more weekdays each week; [171941]

(2) which stations are not served by trains on *(a)* Saturdays and *(b)* Sundays; [171942]

(3) which stations are served by one train a week in each direction; [171943]

(4) which stations are served by fewer than 14 trains a week. [171944]

Mr. McNulty: The information is not readily available and could be provided only at disproportionate cost because it would involve very detailed analysis of the National Rail Timetable, table by table.

Railway Travel Bans

Mr. Damian Green: To ask the Secretary of State for Transport how many individuals have been banned from travelling on the railways in each year since 1997. [171905]

Mr. McNulty: The British Transport Police (BTP) has only had the power to apply for ASBOs (antisocial behaviour orders) since December 2003. Since then the BTP have successfully applied for 52 orders. There are also presently 30 suspects who have football banning orders that stop people from travelling on the railway on certain match days.

Rural Bus Services

Mr. Hancock: To ask the Secretary of State for Transport what research he has *(a)* commissioned and *(b)* evaluated on the numbers of (i) rural bus services and (ii) rural bus passengers during the last five years. [172518]

Mr. McNulty: We monitor annually the number of services supported by local authorities with funds provided under the Rural Bus Subsidy Grant (RBSG) scheme and the number of passenger journeys made on these services. In 1998, the year the grant was introduced, it provided 850 new and enhanced services, rising to over 2,100 services in 2002–03. In 2002–03 26 million passenger journeys were supported in England through RBSG.

We have commissioned research into the impact of the Department's two funding streams for rural bus services, RBSG and the Rural Bus Challenge. A report is on the Department's website.

We also monitor the accessibility of rural communities to bus services through the National Travel Survey. The latest Survey published in December 2003 shows 48 per cent. of rural households to be within a 10 minutes walk of an hourly or better bus service compared to 39 per cent. in the 1997–1999 Survey. This shows the position for all bus services, including those supported by RBSG.

Mr. Hancock: To ask the Secretary of State for Transport how much Government funding has been provided for rural bus services in each of the last five years for which figures are available. [172519]

Mr. McNulty: The following table shows specific rural bus funding provided by Government since 1998 the year each of the funding schemes concerned were introduced:

£ million

	Countryside Agency grants[1]	*Rural Bus Challenge*[2]	*Rural Bus Subsidy Grant*	*Total*
1998–99	2.3	11.4	24.1	37.8
1999–2000	3.3	16.8	32.0	52.1
2000–01	4.8	21.2	32.3	58.2
2001–02	7.5	20.5	41.2	69.2
2002–03	13.5	20.0	47.3	80.8
2003–04	35	20.3	48.4	103.7

[1] Countryside Agency Grants 1998–2000 Rural Transport Partnership (RTF) and Rural Transport Development Fund, since 2001 RTF and Parish Transport Grant.
[2] Rural Bus Challenge funding awarded for projects typically lasting 2–3 years.

In addition local transport authorities use some of their general funding to subsidise socially necessary local bus services in rural areas, and Bus Service Operators Grant is paid to bus operators and community transport providers.

Mr. Hancock: To ask the Secretary of State for Transport if he will make a statement on the expected level of subsidy for rural bus services for future years. [172520]

Mr. McNulty: As announced in the 2003 Budget, Rural Bus Subsidy Grant will continue until April 2006. Allocations to local authorities for 2005–06 will be announced in due course. Decisions on the grant beyond that year, and on the future of the Rural Bus Challenge scheme, will be announced following completion of the current review of bus subsidies and the Government's Spending Review.

Shell Haven

Bob Spink: To ask the Secretary of State for Transport what assessment he has made of the risk relating to explosives remaining on the SS Richard Montgomery in the Thames from the possible operation of Shell Haven Port; and if he will make a statement. [172560]

Mr. Jamieson: The main Yantlet shipping channel is over 2 km from the wreck of the SS Richard Montgomery, and is separated by the extensive Nore Sands sandbank. This whole area lies within Port of London Authority jurisdiction, and they have undertaken a risk assessment of the whole London Gateway Project. This suggests that there would be no additional risk from vessel movements which could not be handled by the Vessel Traffic Services.

Special Advisers

Mr. Damian Green: To ask the Secretary of State for Transport how many special advisers and political advisers were employed by his Department and its predecessors in each year since 1997. [171962]

Mr. McNulty: The following table states the numbers of special advisers employed in the Department for Transport and its predecessors since 1997.

	Title of Department	*Number of special advisers in post*
2004	Department for Transport	1
2003	Department for Transport	2
2002	Department for Transport	2
2001	Department for Transport, Local Government and the Regions	2
2000	Department for Environment, Transport and the Regions	1
1999	Department for Environment, Transport and the Regions	1
1998	Department for Environment, Transport and the Regions	2
1997	Department for Environment, Transport and the Regions	2

Speed Cameras

Mr. Damian Green: To ask the Secretary of State for Transport how many cameras at legacy sites meet the Government's criteria for the siting of speed cameras; and if he will make a statement. [171892]

Mr. Jamieson: These safety camera sites were established before the current criteria for location of new safety cameras, under the guidance contained in the 1992 Circular 'Use of technology for traffic enforcement: Guidance on deployment', which asked highway authorities to base sites on systematic analysis of accident statistics, but did not set quantified criteria.

Mr. Damian Green: To ask the Secretary of State for Transport how much money raised through speed cameras has been returned to the Treasury in each year since 2001; and if he will make a statement. [171893]

Mr. Jamieson: Safety Camera Partnerships operating within the cost recovery scheme returned £6,281,051 of their receipts resulting from fixed penalty fines to the Treasury in 2001–02. The figures for 2002–03 will be available shortly. All fine receipts resulting from safety cameras operated outside the cost recovery scheme accrue to the Treasury. I am advised by my right hon. Friend the Home Secretary that information on the amount of these receipts relating to convictions from safety cameras is not separately identifiable.

Mr. Damian Green: To ask the Secretary of State for Transport how many legacy camera sites maintained cameras with film in them on 31 March. [171921]

Mr. Jamieson: Any safety camera housing may have a camera operating in it at any time, deployment of cameras around safety camera sites is a police operational matter.

Timber

Ms Walley: To ask the Secretary of State for Transport whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167619]

Mr. McNulty: I refer my hon. Friend to the answer given by my hon. Friend the Minister for the Environment and Agri-Environment on 10 May 2004, *Official Report*, column 31W.

INTERNATIONAL DEVELOPMENT

Bangladesh

Mr. Jenkins: To ask the Secretary of State for International Development what action the Department is taking to implement the aid and assistance work it is undertaking with regard to the Second Primary Education Development Programme in Bangladesh in other countries *(a)* within South East Asia and *(b)* in the rest of the developing world. [172501]

Mr. Gareth Thomas: The Second Primary Education Development Programme (PEDP2) in Bangladesh is distinctive in that it is part of a sector wide programme supported by all donors. It thus replaces all previous separate education projects funded by donors. It is Government led, with donor inputs coordinated by a joint donor office headed by the lead donor, the Asian development bank. DFID is one of the largest donors having approved £100 million over six years. The programme is focused on improving access and quality in primary education.

PEDP2 is in the early stages of implementation. As the programme progresses we will disseminate lessons learnt to other parts of South East Asia and other developing countries where primary education is a priority sector. Harmonised support for sector wide programmes in education is DFID's preferred way of working and similar programmes are currently running, or being developed in, many of the over 30 developing countries, mostly in South Asia and in sub-Saharan Africa, where DFID supports primary education for all children.

Burma (EU Sanctions)

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the impact of EU sanctions on Burma. [171692]

Mr. Gareth Thomas: The EU Common Position was strengthened last year, in response to the violent attack on and subsequent detention of Aung San Suu Kyi and other members of the National League for Democracy (NLD). DFID considers that the effect of EU measures do have a real impact on the military regime. They signal how seriously the EU takes the State Peace and Development Council (SPDC) breaches of international standards of behaviour and helps to provide support for the pro-democracy forces.

The EU Common Position aims to apply targeted sanctions against the regime to persuade the SPDC of the need for political progress, but as far as is possible, to avoid measures which hurt the ordinary Burmese people.

In keeping with the EU Common Position, DFID spent £3.4 million during 2003–04 on initiatives largely focussed on HIV/Aids and health services for the poor and on refugees. DFID's future focus will be on these areas, as well as on food security, and quality basic education for poor people. DFID has consulted with the NLD about our approach and focus.

Child Mortality (Pakistan and India)

Mr. Bercow: To ask the Secretary of State for International Development what the latest under five mortality rate is in *(a)* Pakistan and *(b)* India. [172455]

Mr. Gareth Thomas: The World Bank 2003 Development Indicators records the following for under five mortality:

(a) 109 per 1,000 live births in Pakistan in 2001, and

(b) 93 per 1,000 live births in India in 2001.

Commission for Africa

Tom Brake: To ask the Secretary of State for International Development what the budget is for the Commission for Africa, broken down by *(a)* staffing costs, *(b)* consultancy costs, *(c)* communication costs, *(d)* expenses and *(e)* other available budget headings. [172562]

Hilary Benn: The budget for the Commission for Africa will not be finally agreed until Commissioners have drawn up their work plans in consultation with the Commission for Africa Secretariat. This will take place over the coming month. Following these discussions the overall budget may increase and the allocation between budget headings change. The current breakdown over 14 months is:

(a) staffing costs (including salaries, staff travel, training and office costs): £1,115,000;

(b) consultancy costs: currently there is no budget heading covering consultancies, but we plan to use the £700,000 originally earmarked for Commissioners' staff for this purpose;

(c) communication costs: currently there is no budget heading covering communication costs, though we have allocated £20,000 for the production of the final report;

(d) expenses: staff travel is included within the staffing costs budget heading. The allocation for Commissioners' travelling expenses is £144,000;

(e) Consultation meetings across Africa and elsewhere on the work of the Commission: £1,200,000;

(f) Commission meeting costs (venue hire, meal booking, press conference costs, transcription, vehicle hire, security): £240,000.

Tom Brake: To ask the Secretary of State for International Development (1) how many people the Commission for Africa will employ when it is fully staffed; [172563]

(2) how many people the Commission for Africa employs. [172561]

Hilary Benn: The Secretariat to the Commission for Africa currently consists of 14 full-time members of staff and is looking to recruit up to six more people over the next month, which will bring the staff total to 20. More staff may be recruited over the coming year to undertake expert analysis.

Democratic Republic of Congo

Mr. Jenkins: To ask the Secretary of State for International Development what the outcomes were of the discussions that the Minister had with President Kabila, Vice President Ruberwa, Vice President Bemba and Foreign Minister Ghonda on his recent trip to the Democratic Republic of Congo. [172503]

Hilary Benn: I visited the DRC recently to discuss the transition process with the President and Vice-Presidents. We agreed that the TNG and the international community needed to focus on making the transition work by addressing the critical security issues and establishing the necessary stable environment for the elections planned for next year.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for International Development what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170803]

Hilary Benn: All procurement decisions are taken on grounds of value for money. Crockery, cutlery and glassware for our staff restaurants are purchased by our catering contractors, who have operated our current London staff restaurant for 2½ years. All of the crockery and cutlery purchased was manufactured in Great Britain. Glassware is of French origin. Information regarding procurement by our previous contractors is not readily available and could be obtained only by incurring a disproportionate cost.

Early Retirement

Bob Spink: To ask the Secretary of State for International Development how many employees in his Department took early retirement, and at what total cost, in the last financial year. [172176]

Mr. Gareth Thomas: In the last financial year there were 19 early retirements from DFID. One retirement was on medical grounds with the remainder on compulsory terms.

The total cost of these early retirements will be £1,609,274.97 of which £935,024.79 was paid during 2003–04.

Education Workers (Overseas Recruitment)

Tom Brake: To ask the Secretary of State for International Development what assistance his Department's overseas offices offer to UK-based recruitment agencies in the recruitment of education workers from overseas; and how many staff in his Department were involved in offering such assistance on the latest date for which figures are available. [171500]

Mr. Gareth Thomas: DFID overseas offices have not offered such assistance.

Iraq

Harry Cohen: To ask the Secretary of State for International Development what reports he has received concerning the adequacy of firefighting outfits used by Iraqi firefighters; what assessment he has made of the asbestos-lined suit they use; what plans he has to provide urgent and direct aid to upgrade the quality of the firefighters' outfit; and if he will make a statement. [172278]

Hilary Benn: DFID has received no information on, nor undertaken any assessment of, the adequacy of Iraqi fire fighters' suits. Our plans for assistance to Iraq do not include the upgrading of fire fighters' suits.

Harry Cohen: To ask the Secretary of State for International Development what arrangements are in place for accountability of the Coalition Development Fund for Iraq; what demands for accountability have been made by the Independent Monitoring Board; what the policy is of *(a)* the UK Government and *(b)* the Coalition Provisional Authority on each demand; what has happened to the £7.6 billion surplus from the oil-for-food programme which was transferred to the Coalition Development Fund; and if he will make a statement. [172280]

Hilary Benn: All funds in the Development Fund for Iraq are subject to audit by the International Advisory and Monitoring Board (IAMB), created under UN Security Council Resolution 1483. The role of the Board is to ensure that the Development Fund for Iraq is used in a transparent manner for the benefit of the people of Iraq, and that export sales of petroleum, petroleum products, and natural gas from Iraq are made consistent with prevailing international market best practices. The Board consists of representatives of the UN, the Arab Fund for Economic and Social Development, the International Monetary Fund (IMF) and the World Bank.

DFID is unaware of any specific demands for accountability from the IAMB. As recorded in the statement following their 23 April meeting (www.iamb.info) the IAMB continue to work closely with the Coalition Provisional Authority (CPA) and others in the achievement of their objectives.

Surplus funds received from the oil-for-food programme, above those required to complete existing contracts, are paid into the Development Fund for Iraq. Like other funds, including oil revenues, seized and vested assets, their allocation is decided by the CPA Programme Review Board. These allocations are then subject to IAMB oversight.

Miss McIntosh: To ask the Secretary of State for International Development if he will make a statement on the humanitarian situation in Iraq. [172295]

Hilary Benn: In spite of continuing security problems, there is no widespread humanitarian crisis in Iraq. Iraqi Ministries, United Nations agencies, the Red Cross and Red Crescent, NGOs and Iraqi citizens have been working together to assist people affected by the recent fighting in Falluja, and have made preparations for the provision of emergency humanitarian assistance, if required, in other parts of Iraq. An Emergency Co-ordination Group has been established to ensure the effective coordination of emergency assistance in Iraq. Its membership includes UN agencies, the Red Cross and Red Crescent, and NGOs.

US$32 billion in grants and soft loans was pledged for the reconstruction of Iraq at the Madrid Donors' Conference in October last year. DFID has committed

£278 million to humanitarian and reconstruction work in Iraq since the beginning of 2003. Over the last year, Iraqi Ministries, together with the Coalition Provisional Authority and aid agencies, have made significant progress in restoring essential services, maintaining the Public Distribution System for food rations, reopening hospitals and schools and beginning the process of longer-term reconstruction.

Mr. Amess: To ask the Secretary of State for International Development what recent representations he has received about the current humanitarian situation in Iraq. [172465]

Hilary Benn: I receive representations from many sources about assistance to Iraq. Since the 2003 conflict, most of Iraq's requirements have been for reconstruction rather than for immediate humanitarian assistance. At the Madrid Donors' Conference in October last year, the Government pledged a total of £544 million in assistance to Iraq for the three years from April 2003. DFID has so far committed £278 million in humanitarian and reconstruction assistance in Iraq since March 2003.

Primary Schools (Pakistan and India)

Mr. Bercow: To ask the Secretary of State for International Development what the ratio is of girls to boys enrolled in primary school in *(a)* Pakistan and *(b)* India. [172456]

Mr. Gareth Thomas: The World Bank 2003 Development Indicators record the following for the ratio of girls to boys enrolled in primary school:

(a) 58 per cent. for Pakistan in 2000

(b) 83 per cent. for India in 2000.

Tuberculosis

Mr. Bercow: To ask the Secretary of State for International Development for what reasons there has been slippage on his Department's public service agreement target to increase the tuberculosis case detection rate above 70 per cent. [172452]

Hilary Benn: The target to detect 70 per cent. of (smear positive) Tuberculosis (TB) cases globally by 2005 was set by the World Health Assembly and forms the basis for DFID's public service agreement target. Much progress has been made. In 2002 an estimated 37 per cent. of estimated new smear positive cases were notified under the internationally recommended control strategy for TB (DOTS), an increase from 27 per cent. in 2001 and halfway towards the 2005 target.

However, even with these encouraging recent trends at current progress the case detection rate will only be 50 per cent. by 2005. Concerted international action is needed to overcome challenges to scale up effective TB programmes in high burden countries, including strengthening political commitment, health systems, human resource capacity, primary health care provision, private sector and corporate sector contributions and working with poverty reduction strategies. DFID is committed to playing its role in accelerating progress towards the 2005 target as an active member of the Stop TB partnership.

Mr. Bercow: To ask the Secretary of State for International Development what the latest tuberculosis cure treatment rate is in each of the countries covered by his Public Service Agreement target. [172454]

Hilary Benn: The cure rates for tuberculosis in 2001, measured by Directly Observed Treatment Short-course (DOTS) treatment success rate in countries where DFID has a Public Service Agreement are listed in the 2004 World Health Organisation (WHO) Global Tuberculosis Control report. Figures for 2002 are not yet available.

Country	*Internationally recommended control strategy for TB (DOTS) treatment success rate (Percentage)*
Africa	
Ethiopia	76
Democratic Republic of Congo	77
Ghana	42
Kenya	80
Malawi	70
Mozambique	77
Nigeria	79
Rwanda	[1] 61
Sierra Leone	80
South Africa	65
Lesotho	71
Sudan	80
Tanzania	81
Uganda	56
Zambia	75
Zimbabwe	71
Asia	
Bangladesh	84
China	96
Pakistan	77
India	85

[1] in 2000–01 figure not yet known

Turkey/Armenia Border

Mr. Jenkins: To ask the Secretary of State for International Development what the Department's assessment is of the economic development effects of the opening of the border between Turkey and Armenia for *(a)* Turkey and *(b)* the Caucasus states. [172505]

Mr. Gareth Thomas: DFID has not made a detailed assessment of possible economic benefits of the opening of the border between Turkey and Armenia. In general, the opening of borders between states tends to lead to improved trade and economic growth. DFID's bilateral programme for the region promotes good-governance, conflict reduction and pro-poor economic growth. Successful implementation of these programmes will have a positive impact on the wider issues of cross border co-operation and trade.

Zimbabwe

Mr. Jenkins: To ask the Secretary of State for International Development what the Department's most recent assessment is of the humanitarian situation in Zimbabwe. [172499]

Hilary Benn: There have been significant humanitarian needs in Zimbabwe for nearly three years as a result of the Government of Zimbabwe's misguided economic policies, including the poorly implemented

fast track land programme. These needs are exacerbated by the effect of the HIV/AIDS epidemic and erratic rainfall.

The current Emergency Operation of the World Food Programme and the general distributions by NGOs whom we fund directly are beginning to wind down as this year's crop is now being harvested. The harvest should temporarily make food available to the majority of the population.

The Government of Zimbabwe have cancelled the joint crop assessment with WFP and FAO, claimed that they will produce 2.4 million MT of maize, and declared that international food aid will not be needed this year. The UK and other donors do not believe that the Zimbabwean Government's crop forecast is credible and regret the cancellation of the joint crop assessment which would have provided an internationally accepted basis on which to plan for humanitarian operations later this year. The UN and the rest of the international community have consistently made clear to the Zimbabwean authorities that their lack of transparency in dealing with humanitarian issues, including their plans to import food, makes it more difficult for us to respond effectively. We and other donors will nevertheless continue to work with the UN and other agencies to monitor the humanitarian position in Zimbabwe. Households most likely to be in need of assistance will be those with no access to land or income that are also affected by HIV/AIDS or include orphans, disabled children and the elderly.

TRADE AND INDUSTRY

Business Regulation

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry pursuant to her answer of 28 April 2004, *Official Report*, column 1151W, on business regulation, how many regulatory impact statements have been issued by her Department in the last 12 months; and if she will make a statement. [171595]

Nigel Griffiths: This information could only be obtained by a manual sift.

The Regulatory Impact Statement (RIS) is a paragraph that can be included in the Cabinet paper or ministerial letter to colleagues seeking collective agreement to a proposals that impacts on business.

Call Centre Industry

Mr. Best: To ask the Secretary of State for Trade and Industry what assessment she has made of future employment prospects in the UK call centre industry. [170284]

Ms Hewitt: My Department published on 6 May a report of the study we commissioned to look at the competitiveness of the UK call and contact centre industry. The study which covers a wide range of call centre issues forecasts that the UK industry is to gain around 200,000 jobs in the next three years, directly employing over a million people by 2007.

Energy Supply

Mr. Laurence Robertson: To ask the Secretary of State for Trade and Industry what recent discussions she has had with the governments of *(a)* Russia, *(b)* Algeria, *(c)* Qatar and *(d)* other countries, in connection with securing supplies of gas for importing to the UK; and if she will make a statement. [172545]

Mr. Timms: Chapter six of the Energy White Paper clearly lays out our policy with regard to the security of gas supplies for the UK. Para 6.5 states:

> "Our role is to continually monitor developments, and to create a competitive market place, including through good international relations, within which liberalised markets will deliver energy reliability."

To this end my Ministers and officials have over the past year held a number of meetings with representatives of foreign governments.

On June 26 2003 during the State Visit of President Putin of Russia we held the "Russia UK Energy Conference: Long Term Partners" bringing together politicians, officials and the private sectors from both countries to discuss possible areas for energy cooperation. The event culminated in the signing of a Memorandum of Understanding in which the UK and Russia agreed to work closely together on the North European Gas Pipeline. During the visit I met with Deputy Prime Minister Kudrin and discussed a wide range of matters.

This event was followed up by a UK Russia Energy Roundtable held in London on 3 March 2004 at which the public and private sectors of both the UK and Russia came together to share perspectives on the development of Russia's hydrocarbon reserves.

On 2 October 2003, I announced the agreement of the key principles of a Framework Agreement with Norway which will among other things govern the building of a pipeline to supply Norwegian gas from the Ormen Lange field to the UK. It is anticipated that the agreement itself will be complete by the end of 2004 and the pipeline will become operational by 2007.

On Thursday 26 February 2004 I met with Mr. Khelil, the Energy Minister of Algeria. The BP/Sonatrach joint venture aimed at bringing new supplies of LNG to the UK was among other matters discussed

On Wednesday 10 March 2004 I met with the Qatari Minister of Energy H.E. Abdullah Hamad Al Attiyah. The possibility of Exxon Mobil supplying Qatari LNG to the UK on a long-term contract was amongst other matters discussed.

I will lead a British Government delegation to the International Energy Forum to be held in Amsterdam from May 22 to 24 2004. This is a major opportunity for discussion on oil and gas security issues both on a bilateral and multilateral basis with representatives of key producing states.

Export Credits Guarantee Department

Mr. Todd: To ask the Secretary of State for Trade and Industry what progress has been made in agreeing the future financial governance of the Export Credits Guarantee Department. [172733]

Mr. Mike O'Brien: ECGD's governance arrangements have recently been strengthened with the creation of the new position of Chair of its Management Board, to work alongside the Chief Executive. Both these positions have recently been filled by appointees from the private sector, who will bring valuable commercial experience to ECGD. Further changes to financial governance will be put in place with the establishment of a Trading Fund; Ministers are presently considering the arrangements for this and an announcement will be made in due course.

Invest-UK

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the resource budget of Invest-UK was in each year between 1999 and 2002. [171593]

Mr. Mike O'Brien: The resource budgets of Invest UK (and its forerunner the Invest In Britain Bureau) for financial years 1999–2000 to 2001–02 were as follows:

1999–2000

£17.8 million, of which £11.1 million was allocated to grant in aid for Regional Development Agencies; £4.1million to Invest UK promotional expenditure, and £2.6 million to local running costs.

2000–01

£20.9 million, of which £12.2 million was allocated to grant in aid for Regional Development Agencies; £6.1 million to Invest UK promotional expenditure, and £2.6 million to local running costs.

2001[1]–02

£21.0 million, of which £12.4 million was allocated to grant in aid for Regional Development Agencies; £5.7 million to Invest UK promotional expenditure, and £2.9 million to local running costs.

[1] 2001–02 was the first year that departmental Resource Accounts were prepared on an accruals basis.

Miners' Compensation Scheme

Adam Price: To ask the Secretary of State for Trade and Industry what the average number of coal health compensation claims settled each month was in *(a)* England, *(b)* Scotland and *(c)* Wales since the scheme began; how many claims are awaiting settlement; and what the timetable is for settling outstanding claims. [170873]

Nigel Griffiths: As of 6 May 2004 the figures for Respiratory Disease are as follows:

	Month settled	England	Scotland	Wales	Total
1996	January	2	—	3	5
1996	February	10	1	14	25
1996	April	—	—	1	1
1996	May	1	—	1	2
1996	June	3	—	—	3
1997	September	2	—	—	2
1997	October	—	1	—	1
1997	December	2	2	—	4
1998	January	1	1	—	2
1998	February	2	1	2	5
1998	March	12	1	2	15
1998	April	10	—	2	12
1998	May	18	1	1	20
1998	June	21	—	2	23
1998	July	36	—	4	40
1998	August	10	—	1	11
1998	September	5	—	37	42
1998	October	14	1	1	16

Total Outstanding		334,411	32,974	63,177	430,562

Notes:

1. Total settlements include claims settled by denial/withdrawal.

2. Claim receipts are those claims that are fully registered. These figures exclude claims registered partially on the website (yet to be fully registered within ICMS due to a submission error during input) and claims held within the holding policy (pool of claims

accepted with minimum data, awaiting further information to permit cross referencing and duplicate checks prior to full registration).

With regard to the timetable for settling outstanding claims, I refer my hon. Friend to House of Lords, *Official Report*, of 21 April 2004, column WA49.

As of 6 May 2004 the figures for Vibration White Finger are as follows:

	Month settled	*England*	*Scotland*	*Wales*	*Total*
1996	January	139	2	1	142
1996	February	2	2	—	4
1996	April	1	—	—	1
1996	May	3	—	—	3
1996	June	3	—	2	5
1996	July	2	—	—	2
1996	August	1	—	—	1
1996	November	1	—	—	1
1997	February	1	—	—	1
1997	April	15	—	14	29
1997	May	28	9	32	69
1997	June	89	35	23	147
1997	July	55	56	49	160
1997	August	54	55	27	136
1997	September	93	41	72	206
1997	October	33	20	13	66
1997	November	31	13	32	76
1997	December	23	38	11	72
1998	January	44	18	28	90
1998	February	50	75	107	232
1998	March	87	29	50	166
1998	April	58	18	40	116
1998	May	91	18	21	130
1998	June	75	45	32	152
1998	July	102	68	41	211
1998	August	47	21	23	91
1998	September	38	40	19	97
1998	October	100	30	8	138
1998	November	164	27	36	227
1998	December	179	18	12	209
1999	January	67	6	17	90
1999	February	38	3	3	44
1999	March	93	1	26	120
1999	April	180	7	15	202
1999	May	236	22	15	273
1999	June	185	32	24	241
1999	July	212	16	211	439
1999	August	288	12	76	376
1999	September	313	16	60	389
1999	October	360	14	130	504
1999	November	412	19	196	627
1999	December	382	13	173	568
2000	January	286	49	95	430
2000	February	280	22	36	338
2000	March	405	32	90	527
2000	April	245	30	61	336
2000	May	328	53	132	513
2000	June	431	84	153	668
2000	July	316	104	113	533
2000	August	350	32	76	458
2000	September	245	43	70	358
2000	October	374	59	122	555
2000	November	359	22	68	449
2000	December	217	15	48	280
2001	January	296	226	78	600
2001	February	414	61	98	573
2001	March	584	38	116	738
2001	April	455	153	99	707
2001	May	583	80	104	767
2001	June	525	37	94	656
2001	July	740	68	211	1,019
2001	August	771	43	179	993
2001	September	745	51	133	929
2001	October	1,994	109	413	2,516
2001	November	492	45	136	673
2001	December	395	32	100	527
2002	January	1,113	134	270	1,517
2002	February	1,467	59	175	1,701
2002	March	2,391	56	292	2,739
2002	April	3,944	119	467	4,530
2002	May	1,987	113	446	2,546
2002	June	1,057	54	181	1,292
2002	July	1,157	48	149	1,354
2002	August	910	34	135	1,079
2002	September	683	36	154	873
2002	October	1,343	85	182	1,610
2002	November	1,102	129	256	1,487
2002	December	1,393	45	294	1,732
2003	January	1,954	54	452	2,460
2003	February	1,610	58	319	1,987
2003	March	2,390	112	504	3,006
2003	April	1,767	115	244	2,126
2003	May	3,074	143	284	3,501
2003	June	2,930	115	225	3,270
2003	July	2,868	74	360	3,302
2003	August	2,077	82	182	2,341
2003	September	2,111	146	201	2,458
2003	October	2,921	80	166	3,167
2003	November	2,496	122	299	2,917
2003	December	2,344	84	114	2,542
2004	January	2,444	75	181	2,700
2004	February	1,410	64	130	1,604
2004	March	1,606	79	295	1,980
2004	April	1,696	106	183	1,985
Total Settlements		70,450	4,748	11,604	86,802
Total Receipts		137,158	11,480	20,936	169,574
Total Outstanding		66,708	6,732	9,332	82,772

Most general damage claims for VWF should be settled in 2005 with most claims for Services settled in 2007.

Nuclear Installations

Llew Smith: To ask the Secretary of State for Trade and Industry what recent assessment she has received on the adequacy of protection measures against malevolent adversaries and terrorists at nuclear installations. [173342]

Mr. Timms: My officials are in frequent contact with the Office for Civil Nuclear Security about security arrangements and the protection of civil nuclear sites.

It is not Government policy to disclose the substance of those discussions and assessments, since such information may be of potential use to terrorists. However, the Director of Civil Nuclear Security publishes an annual report on the state of security in the civil nuclear industry and the effectiveness of security regulation. His next report is due this summer.

Post Office Closures

Mr. Djanogly: To ask the Secretary of State for Trade and Industry how many sub-post offices have been closed in *(a)* Cambridgeshire and *(b)* the constituency of Huntingdon in each year since 1997. [172632]

Mr. Timms: I am advised by Post Office Ltd. that data on post office closures by county or Parliamentary constituency is not available in the form requested as the company does not require this data for its operational purposes. However, I understand that since March 2000 the company has recorded details of post office closures

on the basis of Government region and in the East of England region as a whole, the numbers of net closures were as follows:

Region: East of England

	Number
2000–01	70
2001–02	21
2002–03	33

Post Office Ltd. produces statistics on post office closures on a quarterly basis. The latest data on net closures by region currently available for year 2003–04 is to the end of December 2003. Data for the quarter to end March 2004 is expected shortly. There were 61 net closures of post offices in the East of England region to the end of December 2003. These figures include a total of 55 closures in the East of England region under the urban reinvention programme since its commencement in late 2002.

Renewable Energy

Mr. David Stewart: To ask the Secretary of State for Trade and Industry what plans she has to make it obligatory for renewable energy developers to deliver community benefit. [170174]

Mr. Timms *[holding answer 12 May 2004]:* I have no plans to do so. However the Department is commissioning a study of the actual and potential impact of community benefits schemes on the deployment of renewable, especially wind, energy projects.

Mr. David Stewart: To ask the Secretary of State for Trade and Industry what steps are being taken to facilitate negotiations between renewable energy developers and local communities affected by wind farm development regarding the calculation and delivery of community benefit. [170175]

Mr. Timms *[holding answer 12 May 2004]:* The community impact of wind farm developments, and any possible compensating benefits, should be addressed through the planning process in the normal way.

The Department is commissioning a study of the actual and potential impact of community benefits schemes on the deployment of renewable, especially wind, energy projects.

Mr. Ben Chapman: To ask the Secretary of State for Trade and Industry if she will make a statement on the effect of trends in renewable energy upon residents in Wirral, South. [170378]

Mr. Timms: As I far as I am aware recent trends in investment have not led directly to new renewables capacity in Wirral South itself. For details of developments in the surrounding Liverpool area I refer my hon. Friend to the answers I gave my hon. Friend the Member for Crosby (Mrs. Curtis-Thomas) on 25 March 2004, *Official Report*, column 1109W, my right hon. Friend the Member for Birkenhead (Mr. Field) on 28 April 2004, *Official Report*, columns 1162–63W and my hon. Friend the Member for Bootle (Mr. Benton) on 11 May 2004, *Official Report*, column 248W.

DEPUTY PRIME MINISTER

Accountancy Services

Mr. Cousins: To ask the Deputy Prime Minister what the *(a)* nature and *(b)* value was of all contracts, consultancies or other services placed with the accountancy firms (i) Deloitte & Touche, (ii) Ernst & Young, (iii) KPMG and (iv) PricewaterhouseCoopers since 2000–01 by the Department and its agencies. [166090]

Yvette Cooper: Since the Office of the Deputy Prime Minister was established on 29 May 2002, the value of contracts placed with the suppliers detailed in the question are listed as follows, along with the values of those let by agencies. The nature of all the contracts can be provided only at disproportionate cost.

	£
ODPM	
Deloitte & Touche	1,279,920
Ernst & Young	12,120,102
KPMG	3,329,904
PricewaterhouseCoopers	5,108,650
The Planning Inspectorate	
KPMG	156,921
PricewaterhouseCoopers	17,625
The Fire Service College	
Deliotte & Touche	9,037
PricewaterhouseCoopers	68,258

The QE2 Conference Centre has not placed any contracts with the consultancy firms in question.

Deprivation

Richard Burden: To ask the Deputy Prime Minister what arrangements are being made with *(a)* local authorities and *(b)* other agencies to publish by district council information on pockets of deprivation identified by the new index of deprivation. [172028]

Yvette Cooper: The Indices of Deprivation 2004, published on 26 April, contains information on small pockets of deprivation. These are known as super output areas and cover between 1,000 and 3,000 people. The published information contains a rank and score for each super output area as well as the local authority and Government office region in which it is located.

Fire Service

Mr. Clifton-Brown: To ask the Deputy Prime Minister what discussions he has had with the Secretary of State for Defence and the Secretary of State for Trade and Industry to ensure that fire services for which their departments are responsible are aware of the Government's commitment to a change agenda following the Independent Review of the Fire Service. [172524]

Mr. Raynsford: My right hon. Friend the Deputy Prime Minister meets with Cabinet colleagues on a regular basis. Ministers and officials of the Office of the Deputy Prime Minister are also in regular contact with colleagues from other Government Departments in the

course of Government business, including matters relating to the modernisation agenda for the Fire and Rescue Service.

Grahame Park

Mr. Dismore: To ask the Deputy Prime Minister whether Barnet council is meeting the terms of his Department's grant for neighbourhood wardens for Grahame Park; and if he will make a statement. [153840]

Yvette Cooper: The Government Office for London have pursued the issue of whether Barnet council has complied with the terms of their funding in 2003–04. It is the understanding of the Office of the Deputy Prime Minister that they have done so. We have been advised however that since August 2003, Barnet has not been supporting the eight street wardens and four neighbourhood wardens for annual leave, sickness and training under the scheme. Also because of where the base station has been located, wardens were spending 30 minutes of their duty at the beginning and end of the day travelling to and from Grahame Park. Funding from the Office of the Deputy Prime Minister for wardens schemes in Barnet began in December 2000 and ceased on 31 March 2004. Future funding is a matter for local agencies. Over 80 per cent. of the first round of warden schemes have already secured ongoing funding.

Green Belt

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to the answer of 30 April 2004, *Official Report*, columns 1331–32W, on Green Belt, (1) if he will estimate how much land was used for such developments in *(a)* 1999 and *(b)* each year since 2001 for which figures are available; [172478]

(2) if he will estimate how much land was used for such developments in *(a)* 1999 and *(b)* each year since 2001 for which figures are available;. [172479]

(3) if he will estimate the number of such developments in *(a)* 1999 and *(b)* each year since 2001 for which figures are available. [172480]

Keith Hill: The answers referred to gave the full extent of information currently available. Land Use Change Statistics are derived from Ordnance Survey's map revision process. In urban areas Ordnance Survey records mostly change within six months of the development taking place but in rural areas there can be up to five years between a change taking place and its recording by Ordnance Survey. Early estimates of percentages of dwellings that are on previously developed land and of dwellings per hectare on new developments have been found to be robust and are published early. Totals of land or dwellings, however, continue to increase as further data come in and at present only the 2000 figures are close enough to their final values to be published. There was a particular problem with the 1999 data, which is incomplete and will remain so.

Housing Stock Transfer

Mr. Austin Mitchell: To ask the Deputy Prime Minister what proposals he has for bringing housing in local housing authorities where tenants have voted against stock transfers or Arms Length Management Organisations up to the decent homes standards specified in Labour's 2001 manifesto. [172282]

Keith Hill: Where local authorities need additional funds over and above the substantial increases this government has made to funding for council housing, they have three options, establishing an Arms Length Management Organisation, using the Private Finance Initiative or transfers or their stock to a registered social landlord. If tenants reject all of these options then we will respect their decision. The Office of the Deputy Prime Minister has no proposals for providing additional resources above the three options. It is for local authorities with their tenants to work through the Options Appraisal process and to reach a decision from the options available.

Local Government Finance

Mr. Djanogly: To ask the Deputy Prime Minister what the standard spending assessment for youth and community in *(a)* Cambridgeshire and *(b)* the constituency of Huntingdon (i) was in each of the last five years and (ii) is for 2004–05. [172635]

Mr. Raynsford: The Youth and Community block is a sub-block within the Education service block and was introduced in 2003–04. In the same year the Government replaced Standard Spending Assessments (SSA) with Formula Spending Shares (FSS). Huntingdonshire is a district council and does therefore not provide Education services. The Youth and Community FSS figures for Cambridgeshire are:

	£
2003–04	4,036,647
2004–05	4,211,442

Chris Ruane: To ask the Deputy Prime Minister which local authorities have been capped in the last 25 years. [172931]

Mr. Raynsford: The local authorities capped each year in England were:

	Local authorities
1985–86	Basildon; Brent; Camden; Greenwich; Hackney; Haringey; Islington; Lambeth; Leicester; Lewisham; Portsmouth; Sheffield; Southwark; Thamesdown
1986–87	Basildon; Camden; Greenwich; Hackney; Haringey; Islington; Lambeth; Lewisham; Liverpool; Newcastle-upon-Tyne; Southwark; Thamesdown
1987–88	Basildon; Brent; Brighton; Camden; Gateshead; Greenwich; Hackney; Haringey; Hounslow; Islington; Lambeth; Lewisham; Middlesbrough; Newcastle-upon-Tyne; Newham; North Tyneside; Sheffield; Southwark; Thamesdown; Tower Hamlets
1988–89	Basildon; Camden; Ealing; Greenwich; Hackney; Haringey; Hull; Lambeth; Lewisham; Liverpool; Manchester; Middlesbrough; Newcastle-upon-Tyne; Southwark; Thamesdown; Tower Hamlets; Waltham Forest
1989–90	Camden; Greenwich; Hackney; Lewisham; Southwark; Thamesdown; Tower Hamlets

	Local authorities
1990–91	Avon; Barnsley; Basildon; Brent; Bristol; Calderdale; Camden; Derbyshire; Doncaster; Greenwich; Hammersmith and Fulham; Haringey; Hillingdon; Islington; Lambeth; North Tyneside; Rochdale; Rotherham; Southwark; St. Helens; Wigan
1991–92	Basildon; Bristol; Greenwich; Ipswich; Lambeth; Langbaurgh; Middlesbrough; Milton Keynes; Norwich; Reading; Somerset; Stoke; Warwickshire; Wirral
1992–93	Basildon; Cheltenham; Gloucester; Gloucestershire; Greenwich; Hillingdon; Lambeth; Langbaurgh; Middlesbrough; Warwickshire
1993–94	Castle Point; Gloucestershire; Harlow
1994–95	Langbaurgh; Sheffield; Slough
1995–96	Norwich; Barnsley; Sheffield; Newcastle upon Tyne; Devon; Gloucestershire; Shropshire
1996–97	Cambridgeshire; Oxfordshire
1997–98	Oxfordshire; Somerset; Warwickshire
1998–99	Derbyshire

Capping legislation was originally introduced in 1984. More flexible reserve capping powers were taken in 1999. These have not been used until this year. My Statement in the House on 29 April 2004, *Official Report*, column 1019, sets out the action the Office of the Deputy Prime Minister is taking this year.

Diana Organ: To ask the Deputy Prime Minister what the standard spending assessment for youth and community services in Gloucestershire *(a)* was in each of the last four financial years and *(b)* is for 2004–05. [169874]

Mr. Raynsford: The youth and community block is a sub-block within the education service block and was introduced in 2003–04. In the same year the Government replaced standard spending assessments (SSA) with formula spending shares (FSS). The youth and community FSS figures for Gloucestershire are:

	£
2003–04	4,138,595
2004–05	4,303,748

Ministerial Visits

Matthew Taylor: To ask the Deputy Prime Minister if he will list visits made by each Minister in the Department between December 2003 and April 2004, broken down by *(a)* date, *(b)* constituency visited and *(c)* cost. [171572]

Yvette Cooper: The information requested could be provided only at disproportionate cost.

FOREIGN AND COMMONWEALTH AFFAIRS

Afghanistan

Mr. Battle: To ask the Secretary of State for Foreign and Commonwealth Affairs what his latest estimate is of the number and percentage of registered voters for the pending national election in each province of Afghanistan; and if he will make a statement. [172091]

Mr. Mike O'Brien: According to the Afghanistan Joint Electoral Monitoring Body, as of 6 May a total of 2,033,568 Afghans (approximately 20 per cent.) have been registered to vote, of whom 30 per cent. (615,818) are women. Following is a regional breakdown.

Regional breakdown	*Number*
Central	837,650
East	299,416
North East	150,790
South East	49,844
Central Highlands	46,576
North	212,568
South	143,846
West	292,878

Phase I of voter registration (in Kabul and regional centres) has been completed. Phase II (designed to reach more rural areas) was launched on 1 May.

The UK is committed to supporting the electoral process. Last year we contributed £10.55 million to support election registration. We have pledged a further £0.5 million for voter education and £2.77 million to support preparations for the elections themselves.

British Citizens (Imprisonment Abroad)

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British citizens were imprisoned abroad in each of the last three years, broken down by country of imprisonment. [171254]

Mr. Mullin: The total number of British citizens detained overseas in the last three years is:

	Number
2002–03	7,861
2001–02	7,499
2000–01	8,428

I have placed a breakdown by country of imprisonment and British Posts for 2002–03 in the Library of the House. It would incur disproportionate costs to provide a breakdown by country for those detained in 2001–02 and 2000–01. However, the following tables show those British Posts recording the highest numbers of British citizens detained for the last three years:

2000–01

Post	*Numbers detained*	*Percentage of British citizens detained compared to all overseas Posts*	*Country*
Ibiza	2,006	24	Spain
Malaga	394	5	Spain
Tenerife	296	4	Spain
Orlando	296	4	USA

2000–01

Post	Numbers detained	Percentage of British citizens detained compared to all overseas Posts	Country
Lille	292	3	France
Los Angeles	253	3	USA
New York	229	3	USA
Sydney	220	3	Australia
Alicante	216	3	Spain
Houston	155	2	USA
Total	4,357	52	—

2001–02

Post	Numbers detained	Percentage of British citizens detained compared to all overseas Posts	Country
Ibiza	1,531	20	Spain
Orlando	492	7	USA
Tenerife	318	4	Spain
Lille	272	4	France
Los Angeles	257	3	USA
New York	243	3	USA
Kingston	230	3	Jamaica
Palma	229	3	Spain
Athens	190	3	Greece
Sydney	164	2	Australia
Total	3,926	52	—

2002–03

Post	Numbers detained	Percentage of British citizens detained compared to all overseas Posts	Country
Malaga	619	8	Spain
Orlando	546	7	USA
Houston	391	5	USA
Los Angeles	384	5	USA
New York	327	4	USA
Tenerife	315	4	Spain
Sydney	246	3	Australia
Alicante	231	3	Spain
Palma	227	3	Spain
Dublin	225	3	Ireland
Total	3,511	45	—

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British citizens were sentenced to life imprisonment abroad in each of the last three years, broken down by country of imprisonment; and how many of these sentences were revised on appeal. [171256]

Mr. Mullin: The number of British Nationals detained in prisons overseas is collected on a quarterly and annual basis by the Foreign and Commonwealth Office. The data is not categorised by the length of sentence received and only represents those prisoners who have asked the local authorities to inform the British consulate of their arrest or who request consular assistance.

Burma

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Department's assessment is of *(a)* the Burmese Government's seven point road map to democracy and *(b)* the proposed national constitutional convention. [172511]

Mr. Mike O'Brien: We are encouraged by the State Peace and Development Council's plans to reconvene the National Convention on 17 May to draft a new constitution, the first step of the road map outlined by Prime Minister Khin Nyunt on 30 August 2003. But it is essential that the National Convention is an inclusive, transparent process with a clear time frame. All political parties and ethnic groups should be invited to join the Convention, and to select their representatives freely. Daw Aung San Suu Kyi and all other National League for Democracy (NLD) members should be released immediately to allow them to prepare their approach to the National Convention.

Without the participation of the NLD, the Convention will lack all credibility. There must be full freedom of debate and speech in the Convention and freedom of activity and association for political parties and ethnic groups. This includes ensuring that the 104 principles of the previous National Convention (1993–1996) are open for debate. Freedom from prosecution for views expressed on the Convention must be guaranteed.

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions the Department has had with the Burmese Government regarding the *(a)* recent opening of the National League for Democracy's headquarters in Rangoon and *(b)* the continued closure of its other offices. [172513]

Mr. Mike O'Brien: We welcome the recent opening of the National League for Democracy's (NLD) headquarters in Rangoon. We have repeatedly called on the Burmese regime to re-open all NLD offices throughout Burma.

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions have taken place with the Burmese Government regarding the possible release of Aung San Suu Kyi. [172515]

Mr. Mike O'Brien: We have repeatedly called on the Burmese regime to fully release Daw Aung San Suu Kyi and all political prisoners and to allow them to play an active role in national reconciliation in Burma.

Correspondence

Mr. Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he intends to reply to the letter from the right hon. Member for Manchester, Gorton dated 6 April with regard to Mr. Mehrat Din and Muhammed Aqdas Din. [172250]

Mr. MacShane: My right hon. Friend the Foreign Secretary replied on 28 April.

Departmental Staff

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs what percentage of policy entrants to his Department in each of the last five years attended public or independent schools. [172116]

Mr. Mike O'Brien: The information requested is in the following table.

Policy entrants

	Percentage from independent schools
1999	60
2000	64
2001	48
2002	24
2003	37

The recruitment section records school information as "independent" (which includes public schools) or "comprehensive".

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs who the members of the Departmental Board are, broken down by *(a)* gender, *(b)* race or ethnicity, *(c)* whether they attended public or independent school and *(d)* whether they attended Oxford University or Cambridge University; and how long each has been in post. [172117]

Mr. Straw: The Data Protection Act prevents us from providing information about the ethnicity or race of individuals. The members of the Foreign and Commonwealth Office Board, and the background information requested, as published in Who's Who, is as follows:

Sir Michael Jay—Sir Michael has been in his current post for two years. He was educated at Oxford and London Universities, and Winchester College.

Sir Stephen Brown—Sir Stephen has been in his current post for two years. He was educated at Sussex University, the Royal Military Academy Sandhurst and Leeds Grammar School.

John Sawers—John Sawers has been in his current post for one year. He was educated at Nottingham University, and Beechen Cliff School, Bath.

Kim Darroch—Kim Darroch has been in his current post for one year. He was educated at Durham University, and Abingdon School.

Martin Donnelly—Martin Donnelly has been in his current post for two months. He was educated at Oxford University and Saint Ignatius College.

William Ehrman—William Ehrman has been in his current post for two years. He was educated at Cambridge University, and Eton.

Richard Stagg—Richard Stagg has been in his current post for one year. He was educated at Oxford University, and Winchester College.

David Warren—David Warren has been in his current post for three months. He was educated at Oxford University, and Epsom College.

Simon Fraser—Simon Fraser has been in his current post for two years. He was educated at Cambridge University, and St. Paul's School.

Simon Gass—Simon Gass has been in his current post for three years. He was educated at Reading University, and Eltham College.

The Board also has two non-executive members, Allan Gormly, Chairman of BPB Industries, and Lucy Neville-Rolfe, Director of Corporate Affairs, Tesco plc.

The Foreign and Commonwealth Office needs to be, and to be seen to be, representative of the diverse UK population as a whole; we are committed to achieving this and now have 21 female and two minority ethnic heads of posts. But we are aware that we have some way to go.

Iraq

Mrs. Iris Robinson: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government supports the establishment of a United Nations mediator to Iraq. [171810]

Mr. Rammell: The Government supports a vital and developing role for the United Nations in Iraq. The UN Secretary-General's Special Adviser, Lakhdar Brahimi, is already playing an important role building an Iraqi consensus on the formation of an Interim Government by 30 June. We welcome his proposals and look forward to working with him and the people of Iraq on developing them. We also welcome the role of Carina Perelli, Head of the UN's Elections Assistance Division, whose proposals for the preparations for elections in early 2005 have been agreed by the Iraqi Governing Council.

Ms Drown: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will encourage those responsible for the final Iraq constitution to amend the constitution so that the target of 25 per cent. of women in political positions in the interim constitution becomes a minimum requirement. [172201]

Mr. Rammell: The Transitional National Assembly will be formed by democratic elections by early 2005. The Transitional Administrative Law stipulates that the electoral law shall aim to achieve the goal of having women constitute no less than one quarter of the National Assembly. The members of that Assembly will draft the Iraqi constitution, which will then be ratified by a referendum. We would expect democratically-elected members to ensure appropriate representation of women and we will ensure they are fully aware of the Government's policy of encouraging this.

Libya

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government has made to the Libyan Government concerning the sentencing to death of five Bulgarian nurses and a Palestinian doctor for allegedly infecting children with HIV; what discussions the Government has held with European partners on this matter; what plans the Government has to raise this matter at the UN Commission on Human Rights; and if he will make a statement. [172667]

Mr. Straw: My noble Friend the Baroness Symons of Vernham Dean telephoned Libyan Foreign Minister Shalgam on 9 May to express our concern at the verdict. The EU Troika met Mr. Shalgam during the EuroMed Ministerial in Dublin on 6 May to highlight the EU's concern at the court's decision and underline that a satisfactory resolution to this case is a factor in the further improvement of Libya's relations with the EU. I spoke immediately after the verdicts were handed down to Bulgarian Foreign Minister Passy to offer our support. The next session of the United Nations Commission on Human Rights will take place in spring 2005. The Government will consider nearer the time whether action in that forum is appropriate.

Nigeria

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions have taken place with the Nigerian Government regarding the issue of people trafficking. [172512]

Mr. MacShane: The British High Commission in Abuja is in regular contact with the Nigerian National Agency for the Prohibition of Traffic in Persons to identify ways to intensify co-operation to prevent trafficking in human beings. President Obasanjo has recently appointed a Special Assistant on Trafficking who is charged with establishing a National Strategy.

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with EU partners on the situation in Darfur; and if he will make a statement. [172664]

Mr. Straw *[holding answer 12 May 2004]:* The situation in Darfur was discussed at the EU General Affairs and External Relations Council on 26 April. Since then it has also been discussed by the Political and Security Committee, the Africa Working Group and the Africa, Caribbean and Pacific Working Group. Our Ambassador in Khartoum, as a member of the local EU Troika, took part in a demarche on the acting Foreign Minister on the subject of Darfur on 8 May.

I met the Sudanese Foreign Minister, Dr. Mustafa Osman Ismail on 11 May in London.

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment the Government have made of the relationship between the Janjaweed militias and the Sudanese Government in Darfur. [172666]

Mr. Straw *[holding answer 12 May 2004]:* According to reports from the UN and non-governmental organisations, the Janjaweed militias have been operating in close coordination with the forces of the Government of Sudan. The Secretary of State for International Development and I made clear to the Sudanese Foreign Minister, during his visit on 11 May, that the Sudanese Government has an obligation to protect its civilians and must act now to rein in the Janjaweed militias.

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the recent report commissioned by the Office of the UN High Commissioner for Human Rights on the situation in Darfur. [172696]

Mr. Straw *[holding answer 12 May 2004]:* The Office of the UN High Commissioner for Human Rights has recently issued a report on its visit to Darfur, western Sudan. The Acting High Commissioner for Human Rights briefed the Security Council on the content of this report on 7 May, highlighting the seriousness of the humanitarian and human rights situation in Darfur. We are studying the recommendations in the report and considering the best way in which to take these forward.

We have called on all parties to abide by the cease-fire and stop targeting civilians. I met the Sudanese Foreign Minister on 11 May and made clear that the human rights abuses and breaches of international humanitarian law are unacceptable and must stop, and that the Sudanese Government has a responsibility to rein in the Janjaweed militias which are responsible for many of the worst atrocities.

Sudan

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the recent vote in the UN Human Rights Commission concerning the human rights situation in Western Sudan, with particular reference to the Government's position on the two defeated amendments to the Human Rights Commission's decision on the Sudan moved by the United States. [172665]

Mr. Straw *[holding answer 12 May 2004]:* The language of the Commission on Human Rights decision on Sudan was disappointingly weak. But it was a better outcome than last year, as the decision mandates an independent expert to provide formal international scrutiny of the human rights situation in Sudan. The EU insisted on the establishment of an independent expert to carry out this work. Such international scrutiny has been lacking since the end of the mandate of the Special Rapporteur when the EU-sponsored Sudan Resolution was defeated at last year's Commission on Human Rights.

We fully supported the draft EU Item 9 Resolution on Sudan, but Commission on Human Rights procedure meant that an alternative draft decision on Sudan, tabled by the African Group under a different agenda item, took precedence. We also supported the two amendments to the decision proposed by the US, but these were defeated in a vote.

Syria

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions the Department has had with the Syrian government regarding the recent arrest of the lawyer and human rights activist Aktham Naisse. [172506]

Mr. Rammell: We regularly raise our concerns about Syria's human rights record, bilaterally and in conjunction with EU partners. Our Ambassador to Damascus was a member of the EU Troika which demarched the Syrian government on the arrest of Aktham Naisse on 26 April 2004.

Vietnam

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions the Department has had with the Vietnamese Government regarding human rights abuses against the Central Highlands minority Christian population. [172509]

Mr. Mike O'Brien: I raised human rights and the situation in the Central Highlands with the Vietnamese government during my visit to Vietnam in March. We are very concerned about the recent violence in the region, and the reported deaths of several protesters. Our Ambassador in Hanoi expressed our concern to the Vietnamese government on 16 April and I subsequently discussed the issue with the Vietnamese Foreign Minister on 4 May, and with Deputy Foreign Minister Le Van Bang, whom I met in London on 5 May. The EU has also made representations, calling on the

Vietnamese authorities to respect fully international human rights standards in their response to demonstrations; to allow the international community access to the area; and to address the grievances of the ethnic minority people in the Central Highlands.

EDUCATION AND SKILLS

Apprenticeships

Mr. Willis: To ask the Secretary of State for Education and Skills how much funding will be made available for the establishment of *(a)* Young Apprenticeships, *(b)* Pre-Apprenticeships, *(c)* Apprenticeships and *(d)* Advanced-Apprenticeships in the next financial year. [172975]

Mr. Ivan Lewis: For Young Apprenticeships £3.5 million is available in the programme's first academic year 2004/05. Funding of Apprenticeship programmes post 16 are a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Member with this information and a copy of his reply will be placed in the Library.

Ms Dari Taylor: To ask the Secretary of State for Education and Skills how many residents of Stockton, South have undertaken apprenticeships in each of the last five years. [171456]

Mr. Ivan Lewis: The information requested is not available at parliamentary constituency level. However, figures are available for Learning and Skills Council (LSC) areas and, prior to the creation of the LSC, Training and Enterprise Council (TEC) areas. The following table shows the number of starts on modern apprenticeships in Tees Valley LSC area between April 2001 and the end of July 2003, as well as the number of starts from April 1998 to March 2001 in Tees Valley TEC area.

Time period[1]	*TEC/LSC*	*Advanced MA*	*Foundation MA*
April 1998 to March 1999	Tees Valley TEC	1,700	400
April 1999 to March 2000	Tees Valley TEC	1,900	3,100
April 2000 to March 2001	Tees Valley TEC	2,100	3,300
April 2001 to July 2002	Tees Valley LSC	1,000	3,200
August 2002 to July 2003	Tees Valley LSC	900	2,600

[1] TECs reported figures in financial years. LSC reports figures in academic years. The first LSC 'year' was 16 months in order to bring the financial year figures into line with academic years.

Note:
All figures rounded to nearest 100.

TEC Management Information.
LSC Individualised Learner Record.

Bootle Schools

Mr. Benton: To ask the Secretary of State for Education and Skills how many schools in Bootle deemed to be failing since 1997 have since reached satisfactory standards. [172022]

Mr. Miliband: One school in Bootle has been deemed to be failing since 1997 and has subsequently reached satisfactory standards.

Bullying

Sarah Teather: To ask the Secretary of State for Education and Skills how many instances of bullying were recorded in *(a)* primary and *(b)* secondary schools in Brent in each year since 1997; and what the average figures for (i) English borough councils and (ii) London boroughs were in each year. [172811]

Mr. Ivan Lewis: Data on bullying are not collected centrally and there is no reliable basis for an estimate of prevalence. However, any level of bullying is too high and we are determined to help schools to tackle the problem. Our guidance pack 'Bullying: Don't Suffer in Silence' and the anti-bullying Charter and the anti-bullying website www.dfes.gov.uk/bullying offer detailed advice on preventing and addressing bullying. In November 2003 I launched our anti-bullying Charter for schools, which schools are now signing. It is accompanied by a summary of effective practice to help schools review and enhance their anti-bullying policies. The Charter was launched at the first of a series of regional conferences which have been running since November 2003 and culminate with a final conference in June. These conferences are an opportunity for schools and other partners to share good practice on this issue. Details of the conferences can be accessed online at www.teachernet.gov.uk/antibullying.

Class Sizes (Wigan)

Mr. Neil Turner: To ask the Secretary of State for Education and Skills how many children in Wigan were taught in classes of more than 30 *(a)* in 1997 and *(b)* at the latest date for which figures are available. [169283]

Mr. Stephen Twigg: The information requested is shown in the table, final figures for 1997 and 2003 plus latest provisional figures for 2004 have been provided.

Maintained primary and secondary schools[1]*: number of pupils in classes of 31 or more pupils taught by one teacher*

Position as at January each year

	Maintained primary			*Maintained secondary*		
		Number of pupils in classes of 31 or more			*Number of pupils in classes of 31 or more*	
Wigan parliamentary constituency	*Total pupils in all classes*	*Number of pupils*	*Percentage of pupils*[2]	*Total pupils in all classes*	*Number of pupils*	*Percentage of pupils*[2]
1997	7,130	3,260	45.7	4,890	220	4.5
2003	6,230	1,290	20.8	5,470	700	12.7
2004 (Provisional)	6,320	1,300	20.5	5,630	800	14.2

[1] Includes middle schools as deemed.
[2] Percentage of pupils in those classes expressed as a percentage of pupils in the sum of constituent items and the total.

Note:
Figures have been rounded to the nearest 10, therefore there may be discrepancies between all classes taught by one teacher.

Annual Schools' Census

Classics

Mr. Quentin Davies: To ask the Secretary of State for Education and Skills which secondary schools in the maintained sector in England offer *(a)* Ancient Greek and *(b)* Latin at A level. [17244f]

Mr. Miliband: The DfES does not have on information which schools offer individual subjects. We can only identify those schools where pupils were entered for a subject in a part.cular year.

There are eight maintained secondary schools where at least one student attempted an A level in Greek in the academic year 2002–03. The schools are:

The Camden School for Girls
St. Francis Xavier's College, Liverpool
Weatherhead High School, Wallasey
Easingwold School, York
Ripon Grammar School
Reading School
Colchester Royal Grammar School
Lancaster Royal Grammar School

There are 84 maintained secondary schools where at least one student attempted an A level in Latin. The schools are:

The Camden School for Girls, Camden
The London Oratory School, Hammersmith and Fulham
The Cardinal Vaughan Memorial RC School, Kensington and Chelsea
The Henrietta Barnett School, Barnet
St Michael's Catholic Grammar School, Barnet
Chislehurst and Sidcup Grammar School, Bexley
St. Olave's and St. Saviour's Grammar School, Bromley
Drayton Manor High School, Baling
The Latymer School, Enfield
St. Ignatius College, Enfield
The Tiffin Girls' School, Kingston upon Thames
Tiffin School, Kingston upon Thames
Ilford County High School, Redbridge

Oxted School, Surrey
George Abbot School, Surrey
Stratford-upon-Avon Grammar School for Girls A Specialist Language College, Warwickshire
Kenilworth School and Sports College, Warwickshire
Rugby High School, Warwickshire
Chichester High School for Girls, West Sussex
Hazelwick School, West Sussex
Bishop Luffa Church of England School, Chichester, West Sussex

Correspondence

Mr. Illsley: To ask the Secretary of State for Education and Skills under what circumstances the Minister for Lifelong Learning and Higher Education received a copy of the letter written by the hon. Member

for Barnsley, Central to Professor Boucher, the Vice-Chancellor of the University of Sheffield, dated 26 January. [171105]

Alan Johnson: I will write to the hon. Gentleman.

Departmental Policies

Linda Perham: To ask the Secretary of State for Education and Skills if he will set out, with statistical information relating as closely as possible to the constituency of Ilford, North, the effect of his Department's policies on Ilford, North since 1997. [164884]

Mr. Charles Clarke: The constituency of Ilford, North falls within Redbridge local education authority. Where the Department for Education and Skills (DfES) can or does collect information by constituency, it has been provided.

Additional information could be provided only at disproportionate cost. However, my Department is investigating ways in which we disseminate information about the effects of our policies at a local level. We hope to have systems to facilitate this in place later this year.

Children, Young People and Families

Early Education

All 3 and 4-year-olds are now guaranteed a free, part-time, Government funded, early education place if their parents want it throughout England. We understand that the current early education participation rate in the Redbridge authority is around 68 per cent.

Child Care

There has been a major expansion in child care provision since 1997. We only have figures at local authority level. Since April 1999 we had created, by March 2004, over 3,200 new child care places benefiting over 5,800 children in Redbridge.

Children's Social Services

Children's social services in the constituency are delivered by Redbridge council which is a two star social services authority, with services for children and families assessed as serving most people well with promising prospects (as published in the Annual Review of Performance Reports, issued by the Chief Inspector of the Social Services Inspectorate).

Disadvantaged Area Programmes

Some of our key programmes for young children and families target the most disadvantaged communities. We have created three Neighbourhood Nurseries in the constituency with 136 new places. There are no Sure Start local programmes or Early Excellence Centres within the constituency. Redbridge intends to create four children's centres at least one of which is likely to be in Ilford, North.

Connexions

Connexions, the Government's front line support service for all young people aged 13–19, is providing advice, guidance and support to young people in Ilford, North constituency through East London Connexions Partnership. Since its launch in June 2002, young people aged 13–19 have had access to support and advice on a range of issues to help them participate and achieve in education, employment and training and to reach their full potential as adults.

Youth Services

Although not recently inspected by Ofsted, Redbridge Youth Service has used the findings of an independent inspection based on the Ofsted Framework and the Government's requirements within Transforming Youth Work to reconfigure the service during 2003/04. The 2004–05 plan, although still draft, demonstrates a commitment to achieving the performance measures required by Transforming Youth Work: Resourcing Excellent Youth Services.

Extended Schools

The Department is supporting the rollout of up to 240 full service extended schools by 2006, so that there will be at least one in each LEA area. Redbridge LEA will be developing one full service extended school from this year.

Schools

Recurrent Funding

The estimated[1] increase in per pupil funding in Redbridge in real terms from 1997–98 to 2004–05 is £700 compared with the national average of £880.

Capital Funding

Redbridge LEA had an allocation of £13.1 million (including £3.2 million which is devolved directly to schools) for 2003–04 compared with £9.9 million in 1996–97. Redbridge LEA has been allocated £16.1 million for 2004–05. Some Voluntary Aided allocations have still to be included for 2004–05.

School Performance Tables

Key Stage (KS) figures can be found at on the DfES website at: www.dfes.gov.uk/performancetables

Class Sizes

The number of 5, 6 and 7-year-olds in classes over 30 has fallen from 2,331 in 1997 to 95 by January 2003.

Teachers

Since 1997 (to 2003) there are 370 more teachers (FTE), 429 more teaching assistants and 548 more support staff.

Specialist Schools

There are nine Specialist Schools in Redbridge LEA.

Beacon Schools

There are two Beacon Schools in Redbridge LEA.

Primary Strategy Leadership

10 primary schools in Redbridge LEA are part of the Primary Strategy Leadership programme this year. Additional schools will be selected by the LEA to enter the programme in 2004/05.

Leadership Incentive Grant

There is one secondary school in Redbridge in receipt of LIG, the Loxford School of Science and Technology. This is a high-performing school which receives LIG because more than 35 per cent. of its pupils are eligible for Free School Meals.

Behaviour Improvement Projects

All secondary schools in Redbridge LEA receive support from the Behaviour and Attendance strand of the Key Stage 3 Strategy, including a behaviour audit and training materials and support from specialist LEA-level consultants. Primary schools in the area receive

support through the Primary National Strategy's Behaviour and Attendance Pilot, which includes a primary behaviour audit and curriculum and training materials with special focus on children's social, emotional and behavioural skills.

14–19 Education

The Government's strategy for 14–19 education and training, set out in "14–19: opportunity and excellence", will provide all young people with the opportunity to continue their education in different settings, including schools, colleges, and the workplace.

The impact of the 14–19 agenda on Ilford, North includes:

Strategic Area Reviews (StARs)

In April 2003, all local Learning and Skills Councils (LSCs) started strategic area reviews (StARs) of post-16 LSC-funded provision. These reviews aim to achieve the right mix of provision in an area to improve participation, raise attainment and improve learner choice. StARs will ensure that there is the breadth of opportunity and quality of provision to meet the needs of learners, employers and communities.

All local LSCs have been gathering information, reviewing provider missions, and consequently building an understanding of each provider's role and the provision on offer. The next step is to develop strategic options.

In the case of Ilford, North, and its local LSC, London East, progress is good and work continues with developing borough profiles and strategic proposals.

To support the StAR process, and to provide local providers with a clear understanding of what the local learning and skills priorities are, LSC London East are producing an over arching strategic framework document.

The LSC London East has, in addition to the StAR process, conducted a survey to test its assumptions about what young people, adults and employers want from education.

Vocational Provision

London East LSC currently has four work-based learning providers delivering vocational programmes in the constituency of Ilford, North.

Learners in the borough have access to all of the remaining 42 work-based learning providers in the London East portfolio. Within a reasonable travelling distance they can gain entry to over 40 occupational areas ranging from Accounting, Engineering, Childcare, Retail, Hospitality and Catering and Information technology.

Educational Maintenance Allowances

Redbridge is not an EMA pilot area. However the scheme has now been launched nationally and all eligible students in England can apply for EMA for academic year 2004/05.

Higher Education

The number of 18 to 20-year-olds entering full-time Higher Education courses, are as follows.

Redbridge LEA

	Number
1997	1,317
1998	1,366
1999	1,389
2000	1,604
2001	1,648
2002	1,799

Adult Education

The Local Labour Force Survey shows that in Ilford, North:

The proportion of working age people qualified to at least level 4 rose from 17.4 per cent. in 1999 to 21.1 per cent. in 2002.

The proportion of working age people qualified to at least level 2 rose from 59.5 per cent. in 1999 to 64.3 per cent. in 2002.

The proportion of working age people without any qualification rose from 11.5 per cent. in 1999 to 14.7 per cent. in 2002.

The proportion of working age people who received job related training in the last four weeks has fallen from 12.3 per cent. in 1999 to 9.4 per cent. in 2002.

[1] Includes provisional estimates of grants and allocations still to be confirmed. Total funding per pupil aged 3–19 includes Education Formula Spending (EFS) and all relevant grants in the DfES Departmental Expenditure Limits but, for comparability, exclude the pensions transfer to Learning and Skills Council and EFS in 2003–04 and 2004–05. Real terms at 2002–03 prices.

Mr. Nicholas Brown: To ask the Secretary of State for Education and Skills if he will set out, with statistical information relating as directly as possible to the Newcastle East and Wallsend constituency, the effects on Newcastle, East and Wallsend of his Department's policies and actions since 1997. [166879]

Mr. Charles Clarke: The constituency of Newcastle Upon Tyne, East and Wallsend covers part of both Newcastle upon Tyne and North Tyneside local education authorities. Where the Department for Education and Skills (DfES) can or does collect information by constituency, it has been provided.

Additional information could be provided only at disproportionate cost. However, my Department is investigating ways in which we disseminate information about the effects of our policies at a local level. We hope to have systems to facilitate this in place later this year.

Children, Young People and Families

Early Education

All 3 and 4-year-olds are now guaranteed a free, part-time, Government funded early education place if their parents want it throughout England. We understand that the current early education participation rate in the Newcastle upon Tyne authority is around 100 per cent. and in the North Tyneside authority 94 per cent.

Child Care

There has been a major expansion in child care provision since 1997. We only have figures at local authority level, but at March 2004 we had created over 4,200 new child care places since April 1999, benefiting over 7,500 children, in Newcastle upon Tyne, and over 4,300 new places benefiting over 7,700 children in North Tyneside.

Children's Social Services

Children's social services in the constituency are delivered by two councils—Newcastle and North Tyneside. Newcastle is a three star social services authority with services for children and families assessed as serving most children well with excellent prospects. North Tyneside is a one star council with services for children and families assessed as serving some children well with promising prospects. These judgments are set out in the annual review of Performance Ratings for Social Services in England published by the Chief Inspector of the Social Services Inspectorate in November 2003.

Disadvantaged Area Programmes

Some of our key programmes for young children and families target the most disadvantaged communities. The constituency contains three Sure Start local programmes, two in Newcastle (West Walker and Fossway) and one in North Tyneside (Wallsend). The West Walker programme is also linked to the Walkergate Early Years Centre Early Excellence Centre. Wallsend and West Walker also have Neighbourhood Nurseries which, along with another two standalone projects, have created 131 new places in the constituency. Both authorities are now working on their plans for children's centres which will build on this existing provision. Newcastle upon Tyne intends to create nine centres and North Tyneside six, two of which have already been designated.

Connexions

Connexions, the Government's front line support service for all young people aged 13–19, is providing advice, guidance and support to young people in Newcastle Upon Tyne, East and Wallsend constituency through Tyne and Wear Connexions Partnership. Since its launch in April 2002 young people aged 13–19 have had access to support and advice on a range of issues to help them participate and achieve in education, employment and training and to reach their full potential as adults.

Youth Services

There are two local authority youth services in Newcastle upon Tyne, East and Wallsend: Newcastle; and North Tyneside. Both services have been subject to Ofsted inspections in recent years, and in both significant weaknesses were found. But both local authorities have responded positively, increasing their investment in their youth services. They have also revised and updated many of their procedures and have fully embraced the Transforming Youth Work agenda.

Extended Schools

The Department is supporting the rollout of up to 240 full service extended schools by 2006, so that there will be at least one in each LEA area. Benfield School in Newcastle LEA has been developing as a full service extended school from 2003–04.

Schools

Recurrent Funding

The estimated[1] increase in per pupil funding in real terms from 1997–98 to 2004–05 is £920 in Newcastle upon Tyne and £940 in North Tyneside compared with the national average of £880.

Capital Funding

North Tyneside LEA had an allocation of £11.5 million (including £2.6 million which is devolved directly to schools, £2.4 million in targeted Capital funding and £0.5 million in VA Targeted Capital funding) for 2003–04 compared with £1.4 million in 1996–97. North Tyneside LEA has been allocated £6.7 million for 2004–05. Some Voluntary Aided (VA) allocations have still to be included for 2004–05.

Newcastle LEA had an allocation of £16.3 million (including £3.4 million which is devolved directly to schools and £5 million for VA Targeted Capital funding) for 2003–04 compared with £1.0 million in 1996–97. Newcastle LEA has been allocated £69.7 million for 2004–05 (including 360 million in PFI credits). Some VA allocations have still to be included for 2004–05.

School Performance Tables

Key Stage (KS) figures can be found at on the DfES website at: www.dfes.gov.uk/performancetables

Class Sizes

In North Tyneside LEA the number of 5, 6 and 7-year-olds in classes over 30 has fallen from 2,183 in 1997 to 0 by January 2003.

In Newcastle upon Tyne LEA the number of 5, 6 and 7-year-olds in classes over 30 has fallen from 2,964 in 1997 to 63 by January 2003.

Teachers

In North Tyneside LEA the number of teachers (FTE from 1997 to 2003) is unchanged. However there are 110 more teaching assistants than in 1997 and 345 more support staff than in 1997.

In Newcastle LEA the number of teachers has risen by 50 (FTE from 1997 to 2003). However there are 246 more teaching assistants than in 1997 and 434 more support staff than in 1997.

Specialist Schools

There are eight specialist schools in Newcastle upon Tyne LEA and seven specialist schools in North Tyneside LEA.

Beacon Schools

There are six beacon schools in Newcastle upon Tyne LEA and eight beacon schools in North Tyneside LEA.

Primary Strategy Leadership

17 primary schools in Newcastle upon Tyne LEA and 13 primary schools in North Tyneside LEA are part of the Primary Strategy Leadership programme this year. Additional schools will be selected by the LEAs to enter the programme in 2004/05.

Leadership Incentive Grant

There are 11 secondary schools in Newcastle upon Tyne in receipt of LIG and 11 secondary schools in North Tyneside in receipt of LIG. All are eligible for LIG because they are part of the Excellence in Cities programme.

Behaviour Improvement Projects

All secondary schools in Newcastle upon Tyne and North Tyneside receive support from the Behaviour and Attendance strand of the Key Stage 3 Strategy, including a behaviour audit and training materials and support from specialist LEA—level consultants. In addition, four secondary schools and 27 primary

schools in Newcastle upon Tyne and four secondary schools and 15 primary schools in North Tyneside participate in the Behaviour Improvement Programme, which provides more intensive support for schools facing the greatest challenges.

14–19 Education

The Government's strategy for 14–19 education and training, set out in "14–19: opportunity and excellence", will provide all young people with the opportunity to continue their education in different settings, including schools, colleges, and the workplace.

The impact of the 14–19 agenda on Newcastle Upon Tyne, East and Wallsend includes:

16–19 Area Inspection (14–19 from March 2003)

16–19 Area Inspections were introduced in 1999 as a key means of securing improvements in learning for young people. Both Newcastle Upon Tyne and North Tyneside have had a 16–19 area inspection, copies of their Ofsted reports can be found on their website www.ofsted.gov.uk.

With Tyne and Wear LSC in the lead, local partners have developed Action Plans for both areas, which have been accepted by Ministers. Tyne and Wear LSC are responsible for the implementation of both action plans, which are still ongoing.

In the autumn, Newcastle will under-go a further Area Inspection of 14–19 learning which will be undertaken jointly by Ofsted and the ALI. The LSC Tyne and Wear and the LEA will be jointly asked, along with local partners to prepare and implement an Action Plan, following the 14–19 Area Inspection.

Strategic Area Reviews (StARs)

In April 2003, all local Learning and Skills Councils (LSCs) started strategic area reviews (StARs) of post-16 LSC-funded provision. These reviews aim to achieve the right mix of provision in an area to improve participation, raise attainment and improve learner choice. StARs will ensure that there is the breadth of opportunity and quality of provision to meet the needs of learners, employers and communities.

All local LSCs have been gathering information, reviewing provider missions, and consequently building an understanding of each provider's role and the provision on offer.

In LSC Tyne and Wear's area there were five 16–19 area wide inspections between spring 2000 and spring 2002, including for Newcastle and North Tyneside (the local authority areas in which the constituency of Newcastle East and Wallsend falls). As a result of these inspections both authorities, in conjunction with the local LSC and many other partners in the Learning Partnerships, produced and are now implementing 14–19 strategies. The objectives of these strategies align perfectly with that of the LSC's Strategic Area Review process.

In both authorities, learning providers work in partnership on a wide range of learning issues, to deliver a learner entitlement for all young people. Over the last three years both authorities have seen an upward trend in participation and attainment at both GCSE and post-16 levels.

The StAR process for LSC Tyne and Wear in relation to 14–19 provision is, therefore, one which builds on this effective partnership work, rather than proposing structural reorganisation.

Vocational Provision

Learners in Newcastle have easy access within the city to 21 work-based learning providers delivering a wide range of vocational programmes covering occupational areas/sectors which are significant to the sub-regional economy including Business and Administration, Construction, Engineering, Health and Care, Hospitality, ICT, Retail. These programmes are available at a range of levels, from Entry to Employment through Foundation Modern Apprenticeships to Advanced Modern Apprenticeships and, increasingly, to 14–16 learners as part of their individual learning programme.

Four work-based learning providers are based in North Tyneside offering Business Administration, Construction, Engineering, Hair and Beauty, Hospitality and Catering programmes, as well as a very significant amount of Entry to Employment programmes and provision for learners with learning difficulties. Like Newcastle the provision in North Tyneside is appropriate for employment opportunities in the Tyne and Wear area.

In the compact sub-region which comprises LSC Tyne and Wear learners from both of these local authority areas have access to more than 60 providers of work-based opportunities.

Educational Maintenance Allowances

There is one Education Maintenance Allowance (EMA) pilot area in Newcastle upon Tyne East and Wallsend. The pilot scheme has been in operation in North Tyneside since September 2000. In its first year the EMA provided financial support for 800 students and in each subsequent year 1,500 students have benefited from the scheme. In the financial year 2003–04 a total of £1.3 million in EMA payments were made for eligible students living in North Tyneside.

The scheme has now been launched nationally and all eligible students in England can apply for EMA for academic year 2004/05.

Higher Education

The number of 18 to 20-year-olds entering full-time Higher Education courses, are as follows:

	Newcastle upon Tyne LEA	*North Tyneside LEA*
1997	826	746
1998	925	772
1999	956	821
2000	1,001	769
2001	1,242	698
2002	1,269	651

Adult Education

The Local Labour Force Survey shows that in Newcastle upon Tyne, East and Wallsend:

The proportion of working age people qualified to at least level 4 rose from 15.8 per cent. in 1999 to 21.1 per cent. in 2002.

The proportion of working age people qualified to at least level 2 has fallen from 65.2 per cent. in 1999 to 62.7 per cent. in 2002.

The proportion of working age people without any qualifications rose from 18.3 per cent. in 1999 to 19.4 per cent. in 2002.

The proportion of working age people who received job related training in the last four weeks rose from 7.5 per cent. in 1999 to 12.5 per cent. in 2002.

[1] Includes provisional estimates of grants and allocations still to be confirmed. Total funding per pupil aged 3–19 includes Education Formula Spending (EPS) and all relevant grants in the DfES departmental Expenditure Limits but, for comparability, exclude the pensions transfer to Learning and Skills Council and EPS in 2003–04 and 2004–05. Real terms at 2002–03 prices.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Education and Skills what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170798]

Mr. Stephen Twigg: The percentage of crockery, cutlery and glassware procured by my Department over the last five years, which is of British manufacture is as follows:

(a) crockery 90 per cent.

(b) cutlery unknown country of origin not displayed

(c) glassware 0 per cent.

Education Services (Bootle)

Mr. Benton: To ask the Secretary of State for Education and Skills how many children in Bootle have benefited from the Excellence in Cities programme; and what the per pupil spending was in each year since the programme's inception. [172682]

Mr. Miliband: The following table shows the number of children in Bootle benefiting from EiC, and the annual spend per pupil for the years in question.

	Number of children	*Total EiC expenditure[1] (£)*	*Spend per pupil (£)*
2000–01	4,219	373,916	88.63
2001–02	7,846	1,150,998	146.70
2002–03	7,821	1,297,269	165.87
2003–04	7,825	2,498,105	319.25

Note:
All funding figures supplied by Sefton Excellence in Cities Coordinator.

The increase in the number of pupils benefiting from EiC from 2001 onwards is due to the schools in the Education Action Zones in the area coming under the control of the Sefton EiC Partnership.

The large increase in the rate of EiC funding in 2002–03 is due to the extra funding provided through the Behaviour Improvement Programme and the increase in 2003–04 is due to the introduction of the Leadership Incentive Grant.

Education Statistics (Manchester)

Mr. Stringer: To ask the Secretary of State for Education and Skills what public funding has been spent on adult *(a)* literacy and *(b)* numeracy in Manchester, Blackley in each of the last five years. [172889]

Mr. Ivan Lewis: The estimated total spend on "Skills For Life" (the Government's strategy for literacy, language and numeracy needs of all post-16 learners from pre-entry level up to and including level 2) and on Key Skills (essential skills of communication, application of number and information technology), from April 2001 to July 2003, in the Greater Manchester Learning and Skills Council (LSC) area is set out in the following table:

£000

	Basic skills	*Key skills*
April 2001 to July 2001[1]	8,925	2,598
August 2001 to July 2002	15,369	3,586
August 2002 to July 2003	27,258	4,210

[1] The figures for April to July 2001 include costs incurred from August 2000 on learning aims continuing into April 2001.

From the information available to the LSC it has not been feasible to obtain estimates at constituency level or separate figures by subject without incurring disproportionate cost. Likewise it has not been feasible to obtain comparable figures for periods before April 2001 when the Skills for Life strategy was launched and the LSC was formed, but information shows it was considerably less than at present.

Mr. Stringer: To ask the Secretary of State for Education and Skills how many schools in Manchester, Blackley deemed to be failing since 1997 have since reached satisfactory standards. [172890]

Mr. Miliband: One primary school in Manchester, Blackley has been deemed to be failing on two inspections since 1997 and placed in special measures twice. Following the second designation, the requirement for special measures was removed in June 2003.

Free School Meals (Edmonton)

Mr. Love: To ask the Secretary of State for Education and Skills how many children received free school meals in the constituency of Edmonton in *(a)* 1991–92, *(b)* 2001–02 and *(c)* 2003. [169304]

Mr. Stephen Twigg *[holding answer 5 May 2004]:* The available data on free school meals is shown in the table. Information for 1991–92 is not available at Parliamentary Constituency level.

Maintained nursery, primary and secondary schools[1]: school meal arrangements Position as at January each year—Edmonton Parliamentary Constituency

	Number on roll	*Number of pupils taking free school meals*	*Percentage taking free school meals*	*Number of pupils known to be eligible for free school meals*	*Percentage of pupils known to be eligible for free school meals*
Maintained Nursery and Primary					
2001	10,703	2,556	23.9	2,977	27.8
2002	10,686	2,540	23.8	3,046	28.5
2003[2]	10,616	2,611	24.6	3,097	29.2

Maintained nursery, primary and secondary schools[1]: school meal arrangements Position as at January each year—Edmonton Parliamentary Constituency

	Number on roll	Number of pupils taking free school meals	Percentage taking free school meals	Number of pupils known to be eligible for free school meals	Percentage of pupils known to be eligible for free school meals
Maintained Secondary					
2001	5,791	822	14.2	1,282	22.1
2002	5,964	727	12.2	1,258	21.1
2003[2]	5,822	738	12.7	1,189	20.4

[1] Includes middle schools as deemed.
[2] Includes dually registered pupils and boarding pupils.
Source:
Annual Schools' Census

GCSEs

Mr. Neil Turner: To ask the Secretary of State for Education and Skills what percentage of 15 and 16-year-olds in Wigan achieved five or more GCSEs at grade A* -C or GNVQ equivalent in each of the last seven years. [169287]

Mr. Miliband: The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A–C at GCSE/GNVQ*

Percentage

Academic year	Wigan	England
1997	44.8	45.1
1998	43.2	46.3
1999	45.7	47.9
2000	46.7	49.2
2001	47.1	50.0
2002	49.3	51.6
2003	50.7	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year i.e. 31 August and therefore reaching the end of compulsory education at the end of the school year.

Mr. Love: To ask the Secretary of State for Education and Skills what the GCSE results in the constituency of Edmonton were in *(a)* 1991–92, *(b)* 2001–02 and *(c)* 2003. [169305]

Mr. Miliband *[holding answer 5 May 2004]:* The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A-C at GCSE/GNVQ*

Academic year	Edmonton parliamentary constituency	England
1991/92	42.4	38.3
2001/02	42.4	51.6
2002/03	44.0	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year i.e. 31 August and therefore reaching the end of compulsory education at the end of the school year.

Mr. Borrow: To ask the Secretary of State for Education and Skills what percentage of 15 and 16-year-olds in South Ribble achieved five or more GCSEs at grade A* -C or GNVQ equivalent in each of the last seven years. [171981]

Mr. Miliband: The information requested is as follows:

Percentage of 15-year-old pupils[1] achieving five or more grades A–C*

Percentage

Academic year	South Ribble	England
1997	54.7	45.1
1998	53.9	46.3
1999	56.0	47.9
2000	61.0	49.2
2001	59.5	50.0
2002	61.5	51.6
2003	63.7	52.9

[1] GCSE/GNVQ results are reported as standard as the results of pupils aged 15 at the start of the academic year i.e. 31 August and therefore reaching the end of compulsory education at the end of the school year.

Higher Education (Specialist Courses)

Sir Nicholas Winterton: To ask the Secretary of State for Education and Skills how many students enrolled on specialist textile and clothing education courses in universities and colleges in each of the last 15 years for which figures are available. [167591]

Mr. Ivan Lewis: The following table shows the number of enrolments on fashion and textiles courses in further education colleges from 1995–96 to 2002–03 inclusive. Figures for earlier years are not available due to changes in data collection methods. Figures for higher education enrolments to textile and clothing education courses are not held centrally.

Enrolments on 'fashion and textiles' courses in further education sector colleges in England: 1995–96 to 2002–03

	Number of enrolments[1]
1995/96	7,890
1996/97	9,970
1997/98	9,600
1998/99	7,960
1999/2000	7,410
2000/01	6,480
2001/02	6,210
2002/03[2]	4,990

[1] Council-funded further education only.
[2] Provisional.
Note:
Numbers are rounded to nearest 10.
Source:
LSC Individualised Student/Learner Record

Key Stage 2

Chris Ruane: To ask the Secretary of State for Education and Skills what proportion of pupils achieved each level for *(a)* literacy and *(b)* numeracy at Key Stage 2 in each year since the introduction of SATs. [172934]

Mr. Miliband: The information requested is:

Percentage of pupils achieving each level

	D	A	F	B	N	W	1	2	3	4	5
English											
2003[1]	1	1	—	3	2	—	—	1	17	48	27
2002	1	1	—	3	2	—	—	1	17	46	29
2001	1	1	—	3	2	—	—	1	17	46	29
2000	1	2	—	4	2	—	—	1	20	47	23
1999	0	2	—	3	2	—	—	1	20	48	22
1998	0	2	—	4	2	—	—	1	26	48	17
1997	0	3	—	4	2	—	—	1	26	48	16
1996	0	3	2	—	—	0	1	6	30	45	12
Mathematics											
2003[1]	0	1	—	3	2	—	—	1	20	44	29
2002	1	1	—	2	2	—	—	1	20	46	27
2001	0	1	—	2	2	—	—	1	22	45	25
2000	0	2	—	3	2	—	—	1	20	45	26
1999	0	2	—	3	2	—	—	1	23	45	24
1998	0	2	—	3	3	—	—	1	31	42	17
1997	0	3	—	3	2	—	—	2	28	44	18
1996	0	3	2	—	—	0	1	5	34	40	14

[1] 2003 results are provisional.

Notes:

A—represents pupils who were absent.

D—represents pupils who have been disapplied under section 364/365 of the Education Act.

B—represents pupils who were assessed by teacher assessment only.

N—represents pupils who took the tests but failed to register a level.

W—represents pupils who are "working towards" level 1 but have not yet achieved the standards needed for level 1.

F—represents pupils who have failed to register a level for reasons other than absence.

Mayoral Meetings

Simon Hughes: To ask the Secretary of State for Education and Skills on what dates *(a)* he and *(b)* his predecessor has held official meetings with the Mayor of London since July 2000; and what the subject of each meeting was. [171437]

Mr. Stephen Twigg *[holding answer 10 May 2004]:* Ministers from the Department for Education and Skills have met the Mayor of London from time to time and discussed a variety of subjects relating to education and skills.

Residential Experiences

Norman Lamb: To ask the Secretary of State for Education and Skills pursuant to his address to the NASUWT conference, if he will make a statement on funding support for residential experiences for school children. [171057]

Mr. Miliband: Many schools already offer opportunities for residential experience for their students. My Department is looking at how residential opportunities can contribute to more young people taking advantage of extra curricular activities. As a starting point a map of existing residential opportunities will be established. I will also reflect fully on further advice from the Tomlinson Group on 14–19 reform about young people developing broader skills through wider activities.

Safe Routes to Schools Programme

Mr. Crausby: To ask the Secretary of State for Education and Skills what percentage of schools *(a)* in Bolton, North East, *(b)* in Greater Manchester and *(c)* in England have implemented initiatives under the Safe Routes to Schools programme. [172601]

Mr. Jamieson: I have been asked to reply.

Local transport plan annual progress reports submitted by local authorities at the end of July 2003 showed that by the end of March 2004 *(a)* they did not expect any schools in the area covered by Bolton metropolitan borough council to have either a safe route to school or a school travel plan in place; *(b)* they expected 260 schools in Greater Manchester to have at least one safe route to school and 167 to have a school travel plan in place; and *(c)* they expected over 3,800 schools nationally to have at least one safe route to school and over 3,500 to have a school travel plan in place. Local transport plan annual progress reports do not enable us to identify the numbers of safe routes to school and school travel plans by constituency area.

Although no schools in Bolton currently have a safe route to school or school travel plan in place, I understand that at least seven local traffic calming schemes have been implemented within the immediate environs of schools, one school has prepared a draft school travel plan and several others have expressed an interest in developing a plan.

School Buildings

Mr. Caton: To ask the Secretary of State for Education and Skills what the cost was of outstanding repairs to school buildings identified by the 2003 Asset Management Survey; and when he will publish the full results of that survey. [171241]

Mr. Miliband: The data supplied to the Department by English local education authorities and derived from their condition assessments of school buildings show maintenance requirements of approximately £8,000 million. This figure includes outstanding repairs and work needed over a five year period from the dates of the assessments. The Department has been working with authorities to resolve data quality issues and will shortly publish analysis of the data.

Central government capital support for investment in school buildings has increased from under £700 million in 1996–97 to £4.5 billion this year and will rise further to over £5 billion by 2005–06. Progress is being made year-by-year in improving the quality of the school building stock.

School Exclusions

Mr. Viggers: To ask the Secretary of State for Education and Skills what reports he has received on the exclusion of disruptive children from schools during Ofsted inspections. [172375]

Mr. Miliband: My right hon. Friend the Secretary of State has not received any reports of disruptive children being excluded during Ofsted inspections.

Pupils may be excluded only for disciplinary reasons, in response to serious breaches of a school's discipline policy, and if allowing the pupil to remain in school would seriously harm the education or welfare of the pupil or others in the school.

An exclusion which is not carried out in accordance with the formal procedures set out in regulations and guidance would be illegal.

School Locations

Mr. Willis: To ask the Secretary of State for Education and Skills how many *(a)* primary and *(b)* secondary school pupils live more than three miles away from the school that they attend, broken down by region. [167866]

Mr. Miliband *[holding answer 26 April 2004]:* The information requested is shown in the table.

Numbers of pupils living more than three miles [1] from the maintained primary and secondary schools [2] that they attend—January 2003

	Primary Number of school population travelling more than three miles	Secondary Percentage of school population travelling more than three miles	Number of school population travelling more than three miles	Percentage of school population travelling more than three miles
North East	5,996	2.6	22,703	12.5
North West	17,045	2.7	62,996	13.3
Yorkshire and the Humber	12,909	2.8	51,235	14.6
East Midlands	14,931	4	58,757	19.6
West Midlands	17,648	3.6	54,095	14.2
East of England	21,386	4.7	88,607	22.9
London	14,576	2.3	55,741	13.2
South East	30,805	4.7	114,785	22.5
South West	19,891	5	78,074	23.9
England	155,187	3.7	586,993	17.8

[1] Distances calculated are straight line.

[2] Includes middle schools as deemed.

Source:

Pupil Level Annual Schools' Census.

Schools (Outdoor Pursuits)

Mr. Amess: To ask the Secretary of State for Education and Skills when he last discussed access to outdoor and adventurous activities for young people with the Secretary of State for Culture, Media and Sport. [171604]

Mr. Stephen Twigg: Outdoor and adventurous activities is one of six areas of activity for which programmes of study have been drawn up within National Curriculum Physical Education. The Secretaries of State for Education and Skills and for Culture, Media and Sport have regular bilateral meetings at which a range of issues are discussed, including provision for PE and school sport.

Mr. Amess: To ask the Secretary of State for Education and Skills what steps his Department is taking to promote adventure holidays and outdoor pursuits in schools; and if he will make a statement. [171606]

Mr. Stephen Twigg: The extent to which schools incorporate adventure holidays, and outdoor pursuits in their provision (beyond the provision for outdoor and adventurous activities within National Curriculum Physical Education), is at their discretion. The Department will reflect fully on further advice from the Tomlinson Group on 14–19 reform about young people developing broader skills through wider activities.

Secondary Schools (Cambridgeshire)

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many vacant secondary school places there were in Cambridgeshire, broken down by *(a)* school year group, *(b)* district and *(c)* establishment, at the start of the spring term of school year 2003–04. [172637]

Mr. Miliband: The following table shows the number of surplus secondary school places in Cambridgeshire broken down by individual establishment. The figures state the position at the beginning of the calendar year beginning 2003 rather than the school year.

We do not collect surplus place data by school year group, or borough or district area.

Number of surplus places in secondary schools in Cambridgeshire at January 2003

School name	Surplus
Bottisham Village College	40
Impington Village College	61
Swavesey Village College	128
Parkside Community College	0
Chesterton Community College	122
Coleridge Community College	223
Cottenham Village College	114

St. Ivo School	13
Ernulf Community School	103
City of Ely Community College	244
The Neale-Wade Community College	34
Hinchingbrooke School	65
Ramsey Abbey School	0
St. Bede's Inter-Church Comprehensive School	21
Gamlingay Village College	54
Bassingbourn Village College	37
The Queen's School	198
Sawtry Community College	0
Comberton Village College	158
Sawston Village College	90
Ailwyn Community College	3
Longsands College	27
St. Peter's School	243
Soham Village College	36
Union Village College	32
Total	2,876

Teacher Numbers

Harry Cohen: To ask the Secretary of State for Education and Skills how many *(a)* teachers, *(b)* support staff and *(c)* teachers in secondary schools there were (i) in 1997 and (ii) on the latest date for which figures are available in (A) the London borough of Waltham Forest and (B) the London borough of Redbridge. [171992]

Mr. Miliband: The tables show the total number of full-time equivalent regular teachers in all maintained schools, support staff in maintained schools and regular teachers in maintained secondary schools in January 1997 and 2003 in the two local education authorities requested.

Redbridge LEA

	Regular teachers	Support staff	Regular secondary teachers
1997	2,100	600	1,060

Annual School Census (support staff) and the annual survey of teachers in service and teacher vacancies (618g) (teachers).

Teacher Workload

Mr. Willis: To ask the Secretary of State for Education and Skills what assessment he has made of the change in teacher workload since the publication of Red Tape and Bureaucracy in Schools; and what progress has been made against the targets announced in the document. [171828]

Mr. Miliband: The main means by which teacher workload is monitored is through the regular diary surveys undertaken for the Office for Manpower Economics. Last year's survey was conducted in March 2003. The most recent one was conducted in March 2004, with results available in the autumn. The March 2003 survey showed some reductions in hours, but this was obviously too early to draw any conclusions. The "Making a Difference—Red Tape and Bureaucracy in Schools Second Report" was published in March 2003. The Report included 125 separate outcomes to be completed up to September 2005, of which 79 have now been completed.

The Implementation Review Unit (IRU) panel of 12 experienced practitioners drawn from schools across England was established in April 2003 to ensure that the bureaucratic and workload implications of both new and existing policies are kept under rigorous review, and to advise how red tape and bureaucracy can be minimised. Their first annual report was published on 30 April 2004, which provides an assessment of the progress that has been made, including the introduction of a system within the DfES to assess the impact of new initiatives before they are introduced. The report is available at www.dfes.gov.uk/iru.

Teenage Pregnancy

Mr. Hopkins: To ask the Secretary of State for Education and Skills what measures are being taken in schools to *(a)* promote the safer sex message and *(b)* reduce unplanned pregnancies. [172577]

Mr. Stephen Twigg: Teaching about safer sex is a key element of the Government's sexual health strategy and is covered by our Sex and Relationship Education (SRE) guidance which was sent to all schools in July 2000. All maintained secondary schools have a statutory responsibility to teach SRE including sexual health, contraception and the range of advice and support services which are available.

Effective SRE should ensure that young people understand the reasons for delaying sexual activity, including unwanted pregnancies, and give them the skills and knowledge to make informed decisions.

Truancy (Nottinghamshire)

Mr. Kenneth Clarke: To ask the Secretary of State for Education and Skills what the average truancy rate for secondary schools in Nottinghamshire was in each of the last five years. [171517]

Mr. Ivan Lewis: The information requested is as follows.

Percentage of half days missed due to unauthorised absences for secondary schools in Nottinghamshire

Academic year (September-May)	*Percentage*
1998	1.49
1999	1.38
2000	1.34
2001	1.24
2002	1.30
2003	1.49

Unemployed Graduates

Mr. Simmonds: To ask the Secretary of State for Education and Skills how many graduates claimed unemployment benefit for *(a)* one to three months, *(b)* four to six months, *(c)* seven to nine months and *(d)* 10 to 12 months directly after graduation in each year since 1997. [172628]

Alan Johnson: Administrative data relating to claims of jobseekers' allowance in the year after graduation are not available.

Information on economic activity more generally is collected, though not at the detailed level requested. The Higher Education Statistics Agency (HESA) collects data on the employment position of students six months after graduation, through the annual First Destination Survey. Summary results are available in the relevant Statistical First Releases which are placed in the House of Commons Library.

The Department also commissioned the Institute of Employment Research to analyse the early careers of 1995 graduates. The published report[1] provides more detail of labour market transitions in the first year post-graduation. This research is currently being extended in an analysis of 1999 graduates which we expect to be published later this year.

[1] Elias, P. & K. Purcell (1999) Moving On—Graduate Careers Three Years After Graduation DfEE-CSU-AGCAS-IER

Universities

Ian Lucas: To ask the Secretary of State for Education and Skills (1) when his Department will agree the new criteria for degree-awarding powers and university title in England and Wales; [172288]

(2) whether the Quality Assurance Agency for Higher Education has extended its moratorium on the grant of new degree-awarding powers to institutions in Wales. [172289]

Alan Johnson: A moratorium on new applications for Degree Awarding Powers (DAP) and University Title (UT) was put in place for institutions in England and Wales last year as we consulted on revised criteria for DAP and UT. In a written ministerial statement on 16 March 2004, *Official Report*, column 16WS, I announced that we would be holding further discussions on renewable DAP and a paper will be issued on 14 May 2004. A copy of this paper will be placed in the House Libraries and will also be available on the Department for Education and Skills website. We hope to finalise new criteria for DAP and UT in England and Wales by this summer.

Vocational Qualifications

Mr. Willis: To ask the Secretary of State for Education and Skills what progress has been made in reducing the number of adults without a NVQ level 2 or equivalent qualification by 2010; and if he will make a statement. [172976]

Mr. Ivan Lewis: Good progress is being made to reach our 2010 target of reducing by 40 per cent. those without a level 2 qualification (NVQ level 2 or equivalent). According to the Labour Force Survey, the reduction realised as of autumn 2003 was 5.4 per cent. from the autumn 2001 baseline. The interim milestone for 2006 is that there should be 1 million more adults in the workforce with full level 2 or better than in 2002. Autumn 2003 figures show an increase of 187,000 adults with at least a level 2 compared to the autumn 2002 baseline.

These figures are broadly in line with the planned trajectories for meeting the PSA targets for both 2006 and 2010.

The Skills Strategy White Paper (published July 2003) includes a wide range of interlinked measures to remove barriers to learning, support participation for individuals and increase the amount of training undertaken with employers. It set out our intention to introduce a new entitlement for any adult in the labour force to have access to free tuition for their first full level 2 qualification. We are working with the LSC on phasing in the level 2 entitlement, with phase one in 2004–05 and full rollout beginning the following year.

In September 2003, we started piloting the new Adult Learning Grant in ten local LSC areas, which offers up to £30 per week to adults on low incomes studying full-time for a first full level 2 qualification. Over 3,000 ALG applications have been received and over 2,000 awards have been made to learners. From September, we are doubling the size of the current pilot by extending the ALG throughout the SE and NE regions, as part of linked trials of key initiatives announced in the Skills Strategy.

There are currently 12 Employer Training Pilots (ETPs) which are testing new financial support measures to improve access to training and enable employees to attain basic and level 2 skills. By mid April over 49,000 learners and nearly 9,000 employers were engaged. The expansion of ETPs was announced in the Budget and ETPs will now be available in 20 LSC areas in England.

We believe that these and other related measures in the Skills Strategy will enable us to accelerate the trajectory towards meeting these targets.

WORK AND PENSIONS

Advisers/Consultants

Bob Spink: To ask the Secretary of State for Work and Pensions how much his Department and its agencies and non-departmental public bodies spent on external consultants and advisers in each of the last three years. [171874]

Maria Eagle: The Department for Work and Pensions was formed in 2002. Expenditure for years 2000–01 and 2001–02 is for the former Department of Social Security.

	£ million
2000–01	104.7
2001–02	169.5
2002–03	291.5

Benefit Claimants (Over-50s)

Paul Holmes: To ask the Secretary of State for Work and Pensions what proportion of claimants of disability benefits aged between 50 and state pension age worked immediately prior to their claim, in each year since 1997, broken down by region; and if he will make a statement. [172540]

Maria Eagle: Information is not available on whether people worked immediately prior to claiming disability living allowance or industrial injuries disablement benefit. Both of these benefits can be paid to people in work, as well as to those who have stopped work or never worked.

Carers' Allowance

John Robertson: To ask the Secretary of State for Work and Pensions if he will estimate the cost to the Exchequer of abolishing the overlapping benefit rule in respect of carers' allowance for *(a)* women over 60 years and *(b)* men and women over 65 years. [171344]

Maria Eagle: The gross cost of exempting all pensioners over 65 in receipt of carers' allowance from the overlapping benefits rule would be around £200 million. After adjusting for offsets in income-related benefits the cost would be around £130 million[1]. Exempting women only, aged 60 and over, would cost £155 million (£100 million after adjustments), although our commitment to the European directive on equal treatment would of course prevent us from introducing such a measure.

These costs do not take account of the introduction of pension credit where carers' allowance is taken fully into account but an additional amount may be awarded in respect of the caring.

Neither do the figures take account of the behavioural effect of carers who have not claimed a carer's allowance but who would be induced to do so if the overlapping benefits rules were amended as suggested.

[1] Estimates use benefit rates for 2003–04 and are based on a 100 per cent. extract of claims for carers' allowance taken from the carers' allowance computer system for May 2003, a 5 per cent. extract from claims recorded on the income support computer system in 2003 and a 1 per cent. extract of housing benefit/council tax benefit claims of May 2001.

Departmental Annual Report

Norman Lamb: To ask the Secretary of State for Work and Pensions how much the production of his Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171159]

Maria Eagle: The Department for Work and Pensions latest departmental report was published on 29 April 2004. Final expenditure figures are not yet available, but the costs of production incurred by the Department are estimated to be £38,897. Publishing costs are met by the publisher, TSO (The Stationery Office), and do not fall to government.

1,500 copies of the report were produced, of which 1,160 were for the Department's use. Distribution details are set out in the following table. The report is also available free of charge on the departmental website.

The production and sale of remaining copies of the report are matters for the publisher. Meaningful information about the number of copies of the 2004 report sold at the cover price of £27 is not yet available as publication is so recent.

Recipients	*Number of copies distributed free of charge*
House of Lords	50
House of Commons	200
Chair of the Treasury Select Committee	1
Chair and members of Work and Pensions Select Committee	23
Opposition spokesmen	4
Social Security Advisory Committee	15
HM Treasury and Cabinet Office	3
Health and Safety Commission/Executive	10
Departmental staff	854
Total	1,160

Departmental Appointments

Paul Holmes: To ask the Secretary of State for Work and Pensions how many people have been employed on 13 week casual appointments in his Department in the last 12 months, broken down by agency; and if he will make a statement. [171591]

Maria Eagle: The information is in the table.

Thirteen week casual appointments during the period 1 April 2003 to 31 March 2004

Business area	*Number*
DWP Corporate Centre	0
Jobcentre Plus	138
The Pension Service	5
Child Support Agency	1
Disability and Carers Service	13
The Appeals Service	0
Total	157

Departmental Computers

Bob Spink: To ask the Secretary of State for Work and Pensions what plans he has to update computer *(a)* hardware and *(b)* software standard packages used in his Department. [166370]

Mr. Pond: By June this year we will have completed the modernisation of the desktop infrastructure across the Department. This has involved replacing almost all existing desktop hardware, and supporting file and print servers, upgrading the networks and delivering a standard set of software applications and packages.

In future, in common with standard industry practice, IT equipment and services will be updated in line with ongoing business needs, with value for money being an important factor in determining how and when any updates take place. Additionally, our strategy and thinking will be informed by opportunities presented by advances in technology, benchmarking against industry standards and consultation with our existing suppliers and other Government Departments.

Departmental Pay

Lynne Jones: To ask the Secretary of State for Work and Pensions what proportion of his Department's staff earn less than two-thirds of male median earnings. [170584]

Maria Eagle: The information is in the table. The figures reflect the first stage of the DWP 2003 pay award. The numbers of staff earning below two-thirds of the male median will reduce when the second stage of the award is paid with May 2004 salaries.

DWP	*Under £6.00 ph*	*Over £6.00 ph*	*Total staff*
Total staff in post (Number)	26,902	117,536	144,438
Percentage of total	18.6	81.4	100

Notes:

1. The Median of Male Gross Earnings (all employees) is £9.07 according to the Office for National Statistics Labour Force Survey for Winter 2003–04. Two-thirds is therefore £6.00.
2. DWP data is taken from the February 2004 payroll.
3. DWP salaries include allowances, but not overtime as the hourly rate calculations from which the numbers are derived are based on DWP standard contractual hours.
4. The standard contractual hours used for the figures are 41 for full-time staff in the London pay zones, 36 for part-time staff in the London pay zones, 42 and 37 respectively for staff working outside these areas.

Disability Benefits

Paul Holmes: To ask the Secretary of State for Work and Pensions what proportion of people are on disability benefits, broken down by *(a)* benefit and *(b)* region; and if he will make a statement. [171587]

Maria Eagle: The information is in the following tables.

People receiving disability living allowance (DLA), attendance allowance (AA) and industrial injuries disablement benefit (IIDB), as a percentage of the population of Great Britain and broken down by benefit combinations and Government Office region

Thousand

Region	*Total*	*Percentage of population*	*DLA only*	*DLA and IIDB*	*DLA and AA*	*DLA, AA and IIDB*
All	4,172.2	7.3	2,408.9	102.7	14.3	0.8
North East	250.7	10.0	141.3	13.0	0.8	[2]—
North West	625.4	9.3	381.1	18.1	2.1	[1]0.2
Yorkshire and Number	391.2	7.9	235.7	10.1	0.9	[1]0.1
East Midlands	308.8	7.3	170.3	10.2	0.9	[1]0.1
West Midlands	412.3	7.8	230.5	10.6	1.6	[1]0.1
East	320.4	5.9	170.7	6.1	1.3	[2]—
London	383.3	5.2	240.4	4.4	1.1	[2]—
South East	389.0	4.8	210.9	6.5	1.8	[2]—
South West	323.3	6.5	163.0	5.2	1.2	[1]0.1
Wales	322.7	11.1	194.8	9.0	1.1	[1]0.2
Scotland	444.8	8.8	270.1	9.5	1.5	[2]—

Thousand

Region	*AA only*	*AA and IIDB*	*IIDB only*
All	1408.1	19.2	218.2
North East	67.2	2.1	26.3
North West	191.4	2.7	29.8
Yorkshire and Number	117.2	2.1	25.2
East Midlands	104.5	1.9	20.8
West Midlands	146.9	2.1	20.6
East	126.7	0.8	14.7
London	126.4	0.7	10.4
South East	148.7	0.9	20.3
South West	137.4	1.3	15.2
Wales	102.5	2.6	12.6
Scotland	139.2	2.1	22.5

[1] Figures are less than 500 and subject to a high degree of sampling variation.

[2] Denotes nil or negligible.

Notes:

1. Figures taken from a 5 per cent. sample at 31 August 2003 for AA and DLA and at 30 September 2003 for IIDB.
2. Figures are in thousands and rounded to the nearest hundred.
3. From November 2002, the methodology for producing these figures was changed to allow statistics to be published much sooner. This has resulted in a small increase in the reported caseload. This is because some cases which have actually terminated but have not yet been updated on the computer system are now included.
4. Population Figures used to produce the percentages are mid 2002 for population of all ages. *Source:* Office for National Statistics.

5. DLA is payable to all ages, if claimed before 65. IIDB is payable to working age claimants. AA is only payable on new claims to those aged 65 plus. There remain a number of AA claims in payment from before 6 April 1992, which were not converted to DLA with the introduction of the new scheme, which explains why some people still receive a combination of DLA mobility component and AA for their care costs.
6. The total for AA does not match published individual benefit statistics as published AA statistics use rating factors to take account of late terminations.
Source:
IAD Information Centre.

Departmental Website

Mr. Willetts: To ask the Secretary of State for Work and Pensions what the cost of maintaining his Department's website was in the last 12 months; how many staff are responsible for the maintenance of the website; and how many hits it received in the last 12 months. [170589]

Jane Kennedy: Development of the DWP website is carried out by the Department's own in-house web team who are responsible for its production, management and maintenance. It is not possible to quantify internal costs for the site.

There were no contracted or quantifiable costs for the Department's website in the last 12 months.

The department's IT contractor provides hosting of departmental sites, and provision of web hosting services. However, internet services are not accounted for separately and it is not possible to disentangle these costs.

The equivalent of five full-time members of staff maintain the site.

The site attracted 77,031,942 hits in the last 12 months.

Incapacity Benefit

Mr. Goodman: To ask the Secretary of State for Work and Pensions when he will publish an assessment of the incapacity benefit pilots; and if he will make a statement. [172855]

Maria Eagle: We will be publishing reports at intervals during the course of the evaluation of the incapacity benefit pilots, although the full and final impact assessment will not be available until early 2007. From later this year onwards, qualitative findings on areas such as personal advisers and customer experiences of the reforms will be published. An interim assessment of the impact of the incapacity benefit pilots will also be available in summer 2005. In parallel we will be assessing direct feedback from those responsible for, and participating in, the pilots in order to further improve the effectiveness of the support available, and apply appropriate lessons more widely.

Occupational Pension Schemes

Vera Baird: To ask the Secretary of State for Work and Pensions if he will fund compensation for members of occupational pension schemes who have suffered serious loss and will not be eligible for the Pension Protection Fund. [172712]

Malcolm Wicks: I refer my hon. Friend to my reply to the hon. Member for Guildford (Sue Doughty) on 26 April 2004, *Official Report*, column 848W.

Pension Protection Fund

Mr. Willetts: To ask the Secretary of State for Work and Pensions whether *(a)* the Chairman, *(b)* the Chief Executive and *(c)* the staff of the Pension Protection Fund will be in pensionable employment liable for the levy to the Pension Protection Fund. [172929]

Malcolm Wicks: As a part of the Pension Protection Fund (PPF) employment terms and conditions the Chairman, the Chief Executive and the staff of the Pension Protection Fund will have the opportunity to join the Principal Civil Service Pension Scheme. This is in line with the pension provision currently provided for OPRA staff. The Principal Civil Service Pension Scheme, along with other similar schemes, is a funded public service pension scheme with a crown guarantee and therefore will not be required to pay the pension protection fund levies.

Public Awareness Campaigns

Mr. Willetts: To ask the Secretary of State for Work and Pensions what public awareness campaigns have been undertaken by his Department since 2001; and what the cost was of each. [170587]

Maria Eagle: During 2003–04 the Department for Work and Pensions ran a number of initiatives alerting people to their rights, responsibilities and entitlements through public awareness campaigns. Details of these campaigns and their respective costs are in the table.

2003–04 campaign	*Publicity expenditure (£)*
Future Pensioners/Informed Choice	2,700,000
Pensioners' Guide	1,250,000
Pension Credit	15,580,000
The Pension Service	2,650,000
Direct Payment	12,474,000
Direct Payment road show	480,000
Fraud	9,362,000
Winter Fuel	938,000
Council Tax Benefit	652,000
New Deal	7,600,000
Jobcentre Plus awareness	531,000
Jobseeker Direct help-line	1,700,000
Jobcentre Plus employer marketing	1,016,000
Age Positive	946,000
DDA Awareness	300,000

Notes:
1. All costs exclude VAT.
2. Figures have been rounded to the nearest thousand.
3. Information campaigns costing under £250,000 and the details of highly localised publicity activity by the Department's customer-facing businesses have generally not been included as a disproportionate cost would be incurred in compiling these figures.

A breakdown of publicity spend for 2001–02 and 2002–03 can be found in the Department's annual reports, copies of which are in the Library.

Unemployment Statistics (Over-50s)

Paul Holmes: To ask the Secretary of State for Work and Pensions (1) how many and what proportion of people between the age of 50 and state pension age were

not in work in each year since 1997, broken down by gender; and if he will make a statement; [172531]

(2) how many and what proportion of people were in work immediately before reaching state pension age in each year since 1997, broken down by gender; and if he will make a statement; [172534]

(3) what percentage of people between the age of 50 and state pension age were long-term unemployed in each year since 1997; and if he will make a statement. [172535]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician. I have asked him to reply.

Letter from Colin Mowl to Mr Holmes dated 13 May 2004:

The National Statistician has been asked to reply to your Parliamentary Questions about employment and unemployment. I am replying in his absence. (172531, 172534,172535)

The attached tables provide the information requested for the three months ending in February each year from 1997 to 2004. Table 1 shows the numbers of people in employment by gender at an age one year less than the State retirement age. Table 2 shows the numbers of people by gender, aged between 50 and State retirement age, who were not in employment. Table 3 shows the numbers of people by gender, aged between 50 and State retirement age, who were unemployed for 12 months or longer.

All estimates are taken from the ONS Labour Force Survey. As with any statistical sample survey, estimates from the Labour Force Survey are subject to sampling variability.

Table 1: Numbers and proportion of people in employment immediately prior to State retirement age, United Kingdom, three months ending February each year from 1997 to 2004

Thousand, percentage

	Men aged 64 and women aged 59		*Men aged 64*		*Women aged 59*	
	Number	*Percentage*[1]	*Number*	*Percentage*[1]	*Number*	*Percentage*[1]
1997	235	41.4	102	38.0	132	44.5
1998	209	38.4	90	36.7	118	39.8
1999	226	41.1	92	36.6	134	44.9
2000	218	39.9	95	34.6	123	45.3
2001	250	42.0	103	36.1	147	47.5
2002	258	43.7	102	39.2	157	47.2
2003	274	43.5	106	36.7	168	49.3

ONS-Labour Force Survey.

Websites

Mr. Heald: To ask the Secretary of State for Work and Pensions what the total cost of the websites of *(a)* his Department and *(b)* executive agencies of his Department was in the most recent year for which figures are available. [160019]

Jane Kennedy: Development for the DWP website, agency and other campaign websites is carried out by the Department's own in-house web team who are responsible for production, management and maintenance of all sites.

Contracted and quantifiable costs are included in the following information for Jobcentre Plus and The Pensions Service websites, however it is not possible to quantify internal costs for the Department's and Child Support Agency sites.

The department's IT contractor provides hosting of departmental websites, and provision of web hosting services. However, internet services are not accounted for separately and it is not possible to disentangle these costs. Web hosting is included within the quantified costs for the Jobcentre Plus:

Organisation	*URL*	*Costs for 2002–03*
DWP	www.dwp.gov.uk	No external costs
CSA	www.csa.gov.uk	No external costs
Jobcentre Plus	www.jobcentreplus.gov.uk	[1]£763,285
The Pension Service	www.thepensionservice.gov.uk	£188,093

Widows' Pensions

Mr. Drew: To ask the Secretary of State for Work and Pensions if he will make a statement on the advice he gives to those *(a)* public and *(b)* private pension schemes which will allow a recipient to keep a widow's pension in the event of re-marriage. [172853]

Malcolm Wicks: In the private sector, provision of widows' and widowers' benefits is a matter for pension scheme rules. It is up to trustees to decide what information is given to members. Where a scheme is contracted out, it must provide for widows' and

widowers' benefits, but it is down to individual schemes to decide whether such payment should cease on re-marriage.

Most public service schemes have statutory rules which require widows' and widowers' pensions to terminate on re-marriage or cohabitation.

The Local Government Pension Scheme introduced widows' and widowers' pensions for life from April 1998.

Since October 2002 the new Civil Service pension scheme has provided for survivor pensions to be paid to unmarried partners; the costs of these benefits are being met by higher member contributions. At the same time the requirement to terminate widows' and widowers' pension on remarriage or cohabitation was removed.

DEFENCE

Apprenticeships

Mr. Gray: To ask the Secretary of State for Defence whether there will be apprenticeships in the Royal Navy in the future; and if he will make a statement. [172859]

Mr. Caplin: There are no plans to change the training of Royal Naval personnel in respect of apprenticeships in the future. The Royal Navy will continue to encourage personnel to gain external qualifications through accreditation with civilian organisations as this is a positive recruiting initiative and provides a well trained civilian work force for the future.

The training delivered to over 90 per cent. of personnel in the Royal Navy is eligible for the award of an apprenticeship as defined by the Learning and Skills Council (LSC). Currently over 3,200 personnel are working towards a Level 2 qualification.

BAE Systems

Mr. Jack: To ask the Secretary of State for Defence if he will make a statement on the Government's relationship with BAE Systems; and what assessment he has made of the ways in which it can be improved. [171801]

Mr. Ingram *[holding answer 10 May 2004]:* Her Majesty's Government have a professional relationship with all defence contractors, and senior company officials meet regularly with the Ministry of Defence, and other Government departments.

The MOD has set up Key Supplier Management (KSM) programmes to work with all major suppliers to improve performance from both the supplier and customer points of view.

Civilian Staff

Angus Robertson: To ask the Secretary of State for Defence how many civilian staff are employed *(a)* by Ministry of Defence Trading Funds and *(b)* as Royal Fleet Auxiliaries; how many of his Department's civilian staff are on (i) career breaks, (ii) long-term sick leave and (iii) secondments; and if he will list these numbers (A) for the whole of the UK, (B) for Scotland and (C) for Wales. [170450]

Mr. Caplin: The number of full-time equivalent, permanent, industrial and non-industrial civilian staff employed by the Ministry of Defence Trading Funds and Royal Fleet Auxiliaries in the whole of the United Kingdom, in Scotland and in Wales, as at the latest available date:

1 March 2004

	Trading funds	*Royal fleet auxiliaries*
Total UK	11,280	2,340
Of which:		
Scotland	540	n/a
Wales	2,470	n/a

The number of full-time equivalent, permanent, industrial and non-industrial MOD civilian staff on career breaks and secondments for the whole of the United Kingdom, for Scotland and for Wales, as at the latest available date:

1 March 2004

	Career breaks	*Secondments*
Total UK	510	220
Of which:		
Scotland	10	—
Wales	—	—

Information on the numbers of long-term sick leave for 2003 is not yet available. I will write to the hon. Member when it has been collated and place a copy of my letter in the Library of the House.

Defence Medal Offices

Mr. Luff: To ask the Secretary of State for Defence (1) how many staff are employed at defence medal offices, broken down by *(a)* sex and *(b)* those employed on a (i) permanent, (ii) fixed-term and (iii) casual basis; [172035]

(2) what assessment he has made of the number of experienced staff who are prepared to transfer from Droitwich Spa to RAF Innsworth after the closure of the Army Medal Office. [172038]

Mr. Caplin: As at 10 May 2004, the following staff were employed at the four Defence Medal Offices.

	Sex	*Permanent*	*Fixed term*	*Casual*	*Total*
Army Medal Office	29 female 26 male	52	2	1	55
RAF Medal Office	6 female 9 male	12	0	3	15
RM Medal Office	6 female 1 male	7	0	0	7
RN Medal Office	11 female 1 male	11	0	1	12
		—	—	—	89

The Investment Appraisal assumed nine staff would transfer from Droitwich to Innsworth to build upon the existing cadre of experienced Innsworth based RAF Medal office staff. Until the current staff preference exercise is completed at the end of May, no further assessment can be made as to the number of experienced staff prepared to transfer from Droitwich to Innsworth.

Mr. Luff: To ask the Secretary of State for Defence (1) what the timetable is for the closure of the Army Medal Office in Droitwich Spa; [172039]

(2) if he will make a statement on his plans to minimise disruption in the issuing of medals normally issued by the Army Medal Office in Droitwich Spa during the period of its closure and relocation to RAF Innsworth. [172040]

Mr. Caplin: My written statement on 20 April 2004, *Official Report*, column 12WS, made clear that this will be a phased operation. The phased closure is part of the risk reduction strategy to counter the temporary disruption in the issuing of medals that may occur during the actual move.

Defence Projects

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will list all *(a)* category A, *(b)* category B and *(c)* category C projects of his Department that have achieved their in-service date since 31 March 1997; and when the in-service date was achieved. [170560]

Mr. Ingram: A list of all Category A, Category B and Category C equipment projects procured by the Defence Procurement Agency and achieving in-service date is set out in the following table. Details prior to 1 April 2001 are incomplete as project information before that time is not held centrally and could only be provided at disproportionate cost.

Project name	*ISD*
Ocean Survey Vessel (HMS SCOTT)	June-1997
Skynet 4 Stage II	May-1998
PtarmiganMapps (Deployable Trunk Communications System)	December-2000
Medium Support Helicopter Aircrew Training Facility (MSHATF)	April-2001
Verticle Launched Anti-tank Munition (Shielder)	May-2001
COBLU-RN Communications Electronic Surveillance Measures	July-2001
Joint Command System (Logistics)	August-2001
Tractor Wheeled Earthmoving Medium	August-2001
C-17—Strategic Airlift	September-2001
Joint Operations Command System	September-2001
CHUB (Classified project)	November-2001
High Frequency Broadcast Modernisation	December-2001
SCAD 101 (submarine counter-measures acoustic devices)	December-2001
SCAD 200 (submarine counter-measures acoustic devices)	December-2001
ASRAAM (Advanced Short-Range Air-to-Air Missile)	January-2002
BOWMAN Personal Role Radio	January-2002
Replacement Precision Approach Radar (RPAR)	March-2002
RAF Command Control and Information System (RAF CCIS)	March-2002
Sea King MK7	March-2002
Combined Arms Tactical Trainer (CATT)	May-2002
Lynx Mk 7/9 Aircrew Training Service	May-2002
Radar Type 996	May-2002
Sea Dart IR Fuze	July-2002
SA80 Modification	August-2002
PSC 504—portable sitcom terminal	September-2002
Tactical Communications Digitisation Programme	November-2002
JTIDS (Joint Tactical Information Distribution System) into the SeaKing *(w)* Mk 7	December-2002
Area Weapons Effects Simulation (AWES)	January-2003
Tornado GR4 Synthetic Training Service (TSTS)	January-2003
Range Airborne Instrumented Debriefing System (RAIDS)	January-2003
Auxiliary Oiler	March-2003
Attack Helicopter Conversion Training (for aircrew, groundcrew and maintenance technicians)	April-2003
RORO—Strategic Sealift	April-2003
Secure Comms for the RAF	April-2003
Man-Portable Chemical Agent Detector (MCAD)	May-2003
Typhoon (agile combat aircraft)	June-2003
Heavy Equipment Transporter	July-2003
Landing Platform Dock (Replacement)	July-2003
DLH Offboard Active Decoy	September-2003
Survey Vessels (HMS ECHO)	September-2003
AH Crew and Special-to-arm collective training	November-2003
General Key Management	November-2003
Integrated Biological Detection System (IBDS)	November-2003
Directional Infra-Red Counter Measures (DIRCM)	December-2003
Very Low Frequency Received Signal Service	December-2003
Land System Reference Centre—Internet Protocol	January-2004
All Terrain Vehicle (Platform)—Viking	February-2004
BOWMAN—Tactical Communication System	March-2004
Hunt Mid-Life Update—Sonar Type 2193	March-2004
Successor Identification Friend or Foe (SIFF)	March-2004

Departmental Executive Agencies

Mr. Soames: To ask the Secretary of State for Defence if he will list place in the Library copies of the annual report and accounts for the *(a)* Fleet Air Arm Museum, *(b)* Royal Marines Museum, *(c)* Royal Naval Museum, *(d)* Royal Navy Submarine Museum, *(e)* National Army Museum and *(f)* Royal Air Force Museum for financial years 1997–98 to 2001–02. [172123]

Mr. Caplin: Yes.

Equipment Service Dates

Mr. Gerald Howarth: To ask the Secretary of State for Defence (1) what the forecast in-service date was on 31 March 1997 for the Advanced Air-Launched Anti-Armour Weapon; [170366]

(2) what the forecast in-service date was on 31 March 1998 for the High Velocity Missile System; [170367]

(3) what the forecast in-service date was on 31 March 1999 for the *(a)* High Velocity Missile System and *(b)* Advanced Short Range Air-to-Air Missile. [170368]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the library of the House.

Royal Naval Engineering Artificer

Mr. Gray: To ask the Secretary of State for Defence for what reason the title of Royal Naval Engineering Artificer is to be replaced by Engineering Technician; and whether there will be a change in the standards expected of occupants of the post. [172858]

Mr. Caplin: A review of the structure, organisation and training of both the Warfare and Engineering Branches of the Royal Navy is currently taking place. It is probable that the term Engineering Technician will be adopted for all members of the Engineering Branch below the rank of Commissioned Officer, replacing the Artificer and Mechanic titles currently in use. The title Artificer no longer adequately describes the professional role that those personnel undertake in the modern Navy. Replacing them with Engineering Technicians will align the Navy with the standards of competence published by the Engineering Council United Kingdom, and refresh the image of this key role against increasingly competitive recruitment market forces.

The fleet continues to require highly trained and experienced personnel to provide the necessary technical support to ensure that the Royal Navy delivers its full range of operational capability. An expected outcome from the current review is that training will be better targeted through a career, and that naval Engineering Technicians who complete the training satisfactorily will be awarded a Foundation Degree, reflecting the comprehensive set of skills that they will possess.

Saudi Armed Forces Project Office

Mrs. Brooke: To ask the Secretary of State for Defence what discussions have taken place between BAE Systems and the Department regarding the Saudi Armed Forces Project office of the Ministry of Defence between 2000 and 2002; when these discussions took place; what the nature of each discussion was; what the outcome of each was; and if he will make a statement. [171609]

Mr. Ingram: The Saudi Armed Forces Project, which is a part of the Ministry of Defence, is responsible for fulfilling the MOD's obligations in respect of the Al Yamamah (AY) programme. This includes monitoring the progress and performance of the programme prime contractor, BAE Systems, in the delivery of goods and services supplied to the Saudi Armed Forces. In this role and as the Department's focal point for AY matters, there is daily contact between members of the Project and representatives of BAE Systems on a wide range of issues affecting the performance of the AY contracts.

Support Vehicles

Mr. Laxton: To ask the Secretary of State for Defence what assessment his Department has made of the reliability of the Oshkosh support vehicles currently deployed in Iraq; and if he will make a statement. [171575]

Mr. Ingram: I assume that the Oshkosh support vehicles to which you refer are the Heavy Equipment Transporters. A fleet of 16 was deployed to Iraq in November 2003, and their reliability is assessed on a monthly basis against Key Performance Indicators. To date, these have all been achieved.

Sustainable Development

Mr. Breed: To ask the Secretary of State for Defence what steps he is taking to promote the delivery of sustainable development within Government. [171804]

Mr. Caplin: The Ministry of Defence fully supports the Sustainable Development in Government Initiative. We have been working actively with the Department of the Environment, Food and Rural Affairs in the development of targets in respect of the Framework for Sustainable Development on the Government Estate.

For each of the Framework targets published to date (environmental management systems, travel, water, biodiversity and energy), the Department has published a statement within the timeframe required, outlining the steps it will take to address the targets.

The MOD contributes data to the annual Government Report on Sustainable Development report produced by DEFRA. Details of the Department's progress are available in the 2nd Annual Report (2003). The MOD will be producing an annual sustainable development report in November 2004.

We are also engaged in the current review of the UK Sustainable Development Strategy.

In addition MOD is working on its own Sustainable Development Strategy.

Mr. Breed: To ask the Secretary of State for Defence what progress has been made with his Department's Sustainable Development Strategy. [171805]

Mr. Caplin: The Ministry of Defence has been developing its own Sustainable Development Strategy (which will support its activities) based on the Government's existing strategy. We intend to publish a summary version in the near future.

In addition to its own Strategy, MOD contributes to the wider framework for sustainable development on the Government estate led by the Department of the Environment, Food and Rural Affairs. MOD has published a statement for each of the framework targets published to date (environmental management system, travel, water, biodiversity and energy) outlining the steps it will take them to address them.

Territorial Army

Mr. Soames: To ask the Secretary of State for Defence what the total strength of the Territorial Army was on 1 May; how many of its members are deployed abroad; and in which countries. [172118]

Mr. Caplin: The information requested is not yet available. For the most recent figures relating to the strength of the Territorial Army (TA) and numbers deployed, I refer the hon. Member to the answer I gave on 26 April 2004, *Official Report*, column 728W, to the hon. Member for Portsmouth, South (Mr. Hancock).

The countries in which members of the TA are currently deployed are Iraq, Bosnia, Kosovo and Afghanistan.

Timber

Ms. Walley: To ask the Secretary of State for Defence whether his Department plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167626]

Mr. Caplin: I refer my hon. Friend to the answer given to her on 10 May 2004, *Official Report*, column 31W, by my hon. Friend the Minister of State for the Environment and Agri-Environment.

Weapons Testing

Llew Smith: To ask the Secretary of State for Defence whether *(a)* his Department, *(b)* non-departmental public bodies or executive agencies responsible to his Department and *(c)* consultants contracted to his Department used non-human primates in experiments to test the effects of weapons in each of the last three years. [170996]

Mr. Ingram: The only work carried out or sponsored by the Ministry of Defence on non-human primates is that undertaken by the Defence Science and Technology Laboratory, (an agency of MOD) which has during the last three years conducted work using non-human primates to assess the effects and significance of human exposure to nerve agents and to develop medical countermeasures as appropriate. Additionally, work has been conducted in collaboration with allies to evaluate the performance and safety of protective countermeasures, for example, new vaccines against biological warfare agents.

Young Service Personnel (Deaths)

Mr. Stinchcombe: To ask the Secretary of State for Defence how many members of the UK armed forces under the age of 18 have died while serving in each of the last 10 years. [171799]

Mr. Caplin: Between 1 January 1994 and 31 December 2003, 28 regular armed forces personnel under the age of 18 have died in service. These deaths occurred in the following years:

Deaths in regular armed forces personnel aged under 18 years

	Number
1994	0
1995	3
1996	2
1997	0
1998	3
1999	5
2000	2
2001	5
2002	4
2003	1
Total	28

CABINET OFFICE

Buckingham Palace Garden Parties

Andrew Mackinlay: To ask the Minister for the Cabinet Office pursuant to his answer of 26 April, to Question ref 168814, on garden parties, whether an exception has been made in the last 10 years to the policy of not permitting nominations for Commonwealth citizens to be made on the nomination form used by hon. Members. [169727]

Mr. Lammy: I have been asked to reply

The arrangements under which Commonwealth citizens are nominated by their High Commissions for invitations to Royal Garden Parties have been in place for well over 10 years. I am not aware of any exceptions having been made.

Green Minister

Norman Baker: To ask the Minister for the Cabinet Office if he will list the meetings his Department has been present at regarding the delivery of sustainable development across Government as coordinated by the Ministerial Sub-committee of Green Ministers. [167740]

Mr. Alexander: Departmental officials regularly attend meetings to discuss the delivering of sustainable development across Government.

As regards to Cabinet Committee business, it is established practice under exemption 2 of Part II of the Code of Practice on Access to Government Information not to disclose such information.

Recycled Paper

Norman Baker: To ask the Minister for the Cabinet Office what percentage of paper for printed publications used by the Department in 2002–03 was from recycled sources; and how much post-consumer waste this paper contained. [167733]

Mr. Alexander: Since August 2002 all printing contractors used by the Cabinet Office use the cross-departmental framework contract for the supply of

recycled paper for printed publications. Paper supplied is 100 per cent. recycled with a minimum post consumer waste content of 75 per cent.

Shareholder Executive

Mr. Stephen O'Brien: To ask the Minister for the Cabinet Office what consultations have been conducted by the Shareholder Executive on corporate finance and governance; and which of these consultations have been published. [171616]

Mr. Alexander: The Shareholder Executive has conducted a wide range of consultations on shareholder and governance issues, including with shareholding departments, companies owned by Government and other relevant parties outside Government. The Shareholder Executive is using these consultations to inform its work to improve Government's performance as a shareholder.

Mr. Stephen O'Brien: To ask the Minister for the Cabinet Office what the *(a)* resource budget, *(b)* administration cost and *(c)* staff numbers of the Shareholder Executive were for 2003–04; and when the annual report will be published. [171617]

Mr. Alexander: The resource budget allocated to the Shareholder Executive for 2003–04 was £2.2 million. The outturn administration cost, currently estimated at £1 million, reflects the Shareholder Executive being created only part way through the year. At the 31 March 2004, there were 12 members of staff in the Shareholder Executive. The Shareholder Executive is an integral part of the Cabinet Office and its activities are covered by the Cabinet Office's annual report.

Timber

Ms Walley: To ask the Minister for the Cabinet Office whether the Office plans to contribute financially to the establishment of the second phase of the Central Point of Expertise on Timber. [167623]

Mr. Alexander: I refer my hon. Friend to the answer given to her by my hon. Friend the Minister for the Environment Food and Rural Affairs (Mr. Morley) on 10 May 2004, *Official Report*, column 31W.

HOME DEPARTMENT

Ethnic Minorities

Keith Vaz: To ask the Secretary of State for the Home Department what steps he is taking to bring the number of employees from ethnic minority backgrounds in *(a)* the Police Service and *(b)* the judiciary into line with ethnic breakdown of the population in Britain. [171081]

Ms Blears: The Government are committed to achieving a culturally diverse workforce in the police service that is representative of the local communities it serves. We are engaged with the leadership of the police service in addressing diversity and promoting race equality in the areas of recruitment, training and development.

We are pursuing a number of positive initiatives to improve representation in the police service. We have introduced national recruitment, assessment and selection processes that are fair and transparent and designed to weed out applicants with racist attitudes. Within this, we are encouraging, for example, all forces to use members of their minority communities as assessors in their selection processes.

In January we launched a new action plan "Breaking Through—Promoting Minority Ethnic Employment in the Police Service" to help forces focus on steps to improve recruitment, retention and progression of ethnic minorities.

We have recently conducted advertising aimed at ethnic minorities and have produced a new ethnic minority recruitment leaflet for forces. Our relaunched police recruitment website encourages applications from ethnic minorities and women.

In terms of the Judiciary, my right hon. noble and learned Friend, the Secretary of State for Constitutional Affairs and Lord Chancellor has introduced a bill to create a new, independent, Judicial Appointments Commission which will inspire a more diverse range of applicants through a more open, transparent and accessible system. The Department is also examining whether other barriers exist to deter applicants from minority groups, while continuing to run its comprehensive outreach programme.

Active Communities Unit

Tim Loughton: To ask the Secretary of State for the Home Department who the recipients of grants made by the Active Communities Unit were in *(a)* 2003–04 and *(b)* in each of the previous five years. [171064]

Fiona Mactaggart: A full listing of Active Community Unit grant recipients in 2003 04, and in each of the previous five years, has been placed in the House of Commons Library.

Tim Loughton: To ask the Secretary of State for the Home Department what the Active Communities Unit's budget is for 2004–05. [171066]

Fiona Mactaggart: The Active Community Unit's budget for 2004–05, rounded to the nearest million pounds, is currently £84 million. In addition, the unit is responsible for £57 million of the Futurebuilders Fund, which is being distributed by an independent provider under contract to the Home Office.

Antisocial Behaviour

Mr. Damian Green: To ask the Secretary of State for the Home Department how many *(a)* anti-social behaviour orders, *(b)* curfew orders and *(c)* other measures have been used to ban individuals from railway stations without intent to travel in each year since 1997. [171904]

Ms Blears: *(a)* Anti-Social Behaviour Orders (ASBOs)—Introduced under the Crime and Disorder Act (1998) ASBOs have been available to the courts since 1 April 1999. The statistical database does not identify the type of restriction imposed on orders.

(b) Curfew Orders—It is not possible from the information collected centrally to identify the individual requirements of Curfew Orders imposed at magistrate's courts and the Crown Court.

(c) Other measures— British Transport Police advise that it is their policy to ask for extended conditions to keep offenders of the railway when a Football Banning Order (FBO) is applied for. Currently there are 30 subjects whose FBO has conditions stopping persons from travelling upon the railway.

Mr. Oaten: To ask the Secretary of State for the Home Department how many anti-social behaviour orders have been issued against businesses in each of the last five years, broken down by region. [172427]

Ms Blears: Anti-Social Behaviour Orders (ASBOs) cannot be made against businesses, they can only be made against named individuals.

Asylum/Immigration

Mr. Kidney: To ask the Secretary of State for the Home Department what factors prevent his Department from removing failed asylum seekers from the UK to *(a)* Afghanistan, *(b)* Iraq, *(c)* Somalia, *(d)* Zimbabwe and *(e)* Eritrea. [164109]

Mr. Browne: All asylum and human rights claims are considered on their individual merits in accordance with our obligations under the 1951 UN Refugee Convention and the European Convention on Human Rights (ECHR). Should a claim be refused and any appeal before the independent Immigration Appellate Authority be unsuccessful, it means that for that individual it is safe to return.

We have an agreement with the Afghan Authorities which enables us to return significant numbers of Afghan failed asylum seekers to Afghanistan each month.

We have also reached an agreement with the Coalition Provisional Authority in Iraq to begin enforced returns of Iraqi failed asylum seekers.

We are currently working on the practicalities of the returns programme, and will commence returns as soon as these arrangements are finalised.

We are currently facilitating the return of those Iraqis who wish to go home through the International Organisation for Migration.

We also have a returns agreement with the Somaliland authorities and have also begun to return small numbers of failed asylum seekers to Somalia.

We are currently in discussion with the Eritrean Government on improving the issuing of re-documentation to Eritrean nationals who we wish to return.

The only country to which, as a matter of policy, we do not at present generally enforce the return of failed asylum seekers is Zimbabwe. This policy is based not on asylum or human rights reasons but on our view that in the wider context of the Government's position on Zimbabwe, it would be inappropriate forcibly to return failed asylum seekers applicable at this time.

Harry Cohen: To ask the Secretary of State for the Home Department what mechanisms are in place to ensure asylum decisions affecting nationals of EU accession countries, including outstanding cases where an initial refusal was given but which are subject to further process, are expedited after 1 May when National Asylum Support Service and local authority provision for such asylum seekers ends. [167327]

Mr. Browne *[holding answer 26 April 2004]:* In relation to the small number of asylum seekers who may not yet have received an initial decision on their asylum application, these cases will be dealt with as a priority. Nationals of EU accession countries who have outstanding appeals against the decision to refuse their asylum claim will be advised of their rights as EU nationals and invited to withdraw their appeals. If they do not formally withdraw their appeals and are issued with a residence permit, their appeal will automatically be treated as abandoned.

In relation to the ending of support on 1 May, the National Asylum Support Service (MASS) wrote to all NASS-supported cases on 5–6 April and all interim cases on 16 April informing them of their options, namely that they can work, become otherwise self-supporting, or leave the UK.

John Robertson: To ask the Secretary of State for the Home Department how many asylum seekers have *(a)* applied for and *(b)* been refused help under section 4 of the Immigration and Asylum Act 1999. [171346]

Mr. Browne: The information requested is not available and could be produced only at a disproportionate cost.

When it is not possible for a failed asylum seeker to return to their country of origin following a negative decision, an application may be made for support under Section 4 of the Immigration and Asylum Act 1999, which came into force on 11 November 1999. There are no published statistics on the number of failed asylum seekers who have applied, and have been accepted or refused, for accommodation under Section 4.

Information on the number of asylum seekers supported by the National Asylum Support Service is published quarterly. The next publication covering the first quarter of 2004 (January to March) will be available on 25 May on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html

John Robertson: To ask the Secretary of State for the Home Department how many asylum seekers have applied for judicial review in the last 12 months; and how many have been *(a)* successful and *(b)* unsuccessful in their application. [171347]

Mr. Browne: Information on the number of asylum seekers who have applied for judicial review, for the latest 12-month period for which data are available, are given in the table. The table shows the total number of applications, decisions and grants of permission to apply for judicial review as well as the outcomes of judicial review hearings. Decisions do not necessarily correspond to applications for permission to apply for judicial review in any given period. Only a small proportion, nine per cent. of applications for permission to apply for judicial review were granted in 2002.

Application for Judicial Review, and outcomes, excluding dependants, 2002[1]

Applications for permission to apply for Judicial Review[2]	
Applications	3,075
Decisions[3]	2,980
of which:	
Granted permission on to apply	260
Percentage of applicants granted permission to apply[4]	(9)
The outcome of judicial review hearings[2]	
Allowed[5]	
Total	25
As percentage of total determined	(30)
Dismissed[6]	
Total	60
As percentage of total determined	(67)
Withdrawn	
Total	5
As percentage of total determined	(3)

[1] Provisional figures

[2] Figures based on Administrative Court data. Figures (other than percentages) rounded to the nearest 5 with * = 1 or 2

[3] Decisions do not relate to applications in any given period

[4] The number of which granted leave to move as a percentage of decisions

[5] The decision of the respondent (in this case, the Home Office or the Immigration Appeal Tribunal) was quashed. These figures include consent order where the JR was conceded by the respondent

[6] The decision of the respondent was upheld

Statistics on judicial review are published annually; data covering 2003 are due to be published towards the end of August 2004. Copies of the most recent publications are available from the Library of the House or on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Mr. Malins: To ask the Secretary of State for the Home Department how many Immigration and Nationality Directorate caseworkers dealt with asylum claims in each of the past three years; what the *(a)* target and *(b)* actual maximum case load was in each year; what staff turnover was in each year; how many days' work was lost through sickness in each year; and what provision has been made for staff to receive stress counselling. [170104]

Mr. Browne: During 2003 there were 570 full time equivalent staff employed as asylum caseworkers in post. This compares with 556 and 632 caseworkers during 2002 and 2001.

The Home Office's Public Service Agreement (PSA) target for 2003–04 was to ensure that 75 per cent. of new substantive asylum applications (excluding withdrawals and third country cases) were decided within two months. This was an increase from the 65 per cent. and 60 per cent. targets met in 2002–03 and 2001–02 respectively, and reflects the Government's commitment to, and success in, speeding up the initial decision-making process.

The total number of applications received during 2003, 2002 and 2001 was 49,370, 84,130 and 71,025 respectively.

The number of asylum applications awaiting an initial decision as of December 2003 was 24,500 (the latest date for which published figures are available), the lowest level for 10 years. This compares to 42,200 and 41,300 for 2001 and 2002 respectively and is a significant reduction from the 1997 level of 51,795.

Information on the number of asylum applications out tanding and the timeliness of initial decisions is published quarterly on the Home Office website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Data are not recorded for staff turnover or absenteeism of caseworkers in contrast to other members of staff within the Home Office and would be available only at disproportionate cost. Sickness absence for the Home Office is recorded and published by the Cabinet Office.

Advice, support and counselling on dealing with stress is available to all members of the Immigration and Nationality Directorate. This is provided through the Home Office Health and Welfare Service.

Annabelle Ewing: To ask the Secretary of State for the Home Department how many EU citizens have been removed from the United Kingdom in each year since 1997 in circumstances where they are deemed to be unable to support themselves and are an unreasonable burden on the state, broken down by EU member state. [161402]

Mr. Browne: Information on the number of EU nationals removed from the UK and on the personal circumstances of those people who are removed is not available.

Under EEA regulations an EU national can be removed and excluded from the UK if it is decided that their removal is justified on the grounds of public policy, public security or public health. Any right of residence is subject to that individual demonstrating that they can exercise a specific treaty right to reside.

The number of people removed from the UK in 2003 is due to be published in the Home Office Statistical Bulletin "Control of Immigration: Statistics United Kingdom 2003" on the Home Office web-site at the end of August. www.homeoffice.gov.uk/rds/immigration1.html

Brain Fingerprinting

Mr. Watson: To ask the Secretary of State for the Home Department: pursuant to his answer of 5 May 2004, *Official Report*, column 1541W, on brain fingerprinting, if he will evaluate the effectiveness of brain fingerprinting technologies that monitor the involuntary electrical waves emitted by the brain. [172049]

Ms Blears: There are no plans at present for the Home Office to evaluate brain fingerprinting technologies. However claims about the effectiveness of this technology will be considered in the Police Science and Technology Strategy Group with a view to deciding whether any research should be considered.

Correspondence

Mr. Kaufman: To ask the Secretary of State for the Home Department when he will reply to the letter to him from the right hon. Member for Manchester, Gorton dated 5 April with regard to Mrs. Rahmat Bibi. [171780]

Mr. Blunkett: I wrote to my right hon. Friend on 12 May 2004.

Crime

Mr. Meacher: To ask the Secretary of State for the Home Department what the percentage change in *(a)* overall recorded crime, *(b)* recorded violent crime, *(c)* burglaries and *(d)* vehicle thefts in Oldham, West and Royton has been since 1997. [170954]

Ms Blears: The information requested is not available centrally.

Oldham West and Royton comes within the Oldham Crime and Disorder Reduction Partnership (CDRP) area. Data at CDRP level has only been published from 1999–2000 onwards. Detailed statistics at CDRP level are available for 2002–03 on the new Home Office website: http://www.crimestatistics.org.uk

Mr. Borrow: To ask the Secretary of State for the Home Department what the percentage change in *(a)* overall recorded crime, *(b)* recorded violent crime, *(c)* burglaries and *(d)* vehicle thefts in South Ribble has been since 1997. [171658]

Ms Blears: The information requested is not available centrally.

South Ribble is a Crime and Disorder Reduction Partnership (CDRP) area. Data at CDRP level has only been published from 199902000 onwards. Detailed statistics at CDRP level are available for 2002–03 on the new Home Office website: http://www.crimestatistics.org.uk

Mr. Pickthall: To ask the Secretary of State for the Home Department what the percentage change since 1997 is in West Lancashire in *(a)* overall recorded crime, *(b)* violent crime, *(c)* burglaries and *(d)* vehicle thefts. [171722]

Mr. Blunkett: The information requested is not available centrally.

West Lancashire is a Crime and Disorder Reduction Partnership (CDRP) area. Data at CDRP level has only been published from 1999–2000 onwards. Detailed statistics at CDRP level are available for 2002–03 on the new Home Office website: http://www.crimestatistics.org.uk

Crimes Against Business

Mr. Oaten: To ask the Secretary of State for the Home Department what proportion of the prosecutions brought as a result of National Criminal Intelligence Service operations in the last 10 years related to crimes against business. [172287]

Ms Blears: Prosecutions brought as a result of National Criminal Intelligence Service operations cannot be identified in the court proceedings statistics collected centrally.

Mr. Oaten: To ask the Secretary of State for the Home Department on which dates he met small and medium sized enterprises and manufacturers to discuss crimes against business in *(a)* 2001, *(b)* 2002, *(c)* 2003 and *(d)* 2004. [172413]

Ms Blears: My right hon. Friend, the Home Secretary, Junior Ministers and officials in the Home Office have many meetings with small and medium sized enterprises and manufacturers to discuss a range of business crime issues.

Recently we have established a Small Business Forum with members from a wide range of organisations to hear at first hand the particular crime problems small and medium sized enterprises face, and to develop and implement practical and effective measures to reduce those crimes.

Departmental Response Times

David Davis: To ask the Secretary of State for the Home Department what percentage of *(a)* Written Answers, *(b)* replies to hon. Members' written correspondence and *(c)* public correspondence with his Department was (i) seen and (ii) cleared by special advisers before being published in 2003–04. [170530]

Mr. Blunkett: Special Advisers in this Department have access to material produced by permanent civil servants in accordance with paragraph 14e of the "Model Contract for Special Advisers". Ministers approve answers to all Parliamentary Questions and replies to hon. Members' written correspondence. They also approve replies to public correspondence except that dealt with directly by permanent civil servants.

Entry Clearance Standards

Mr. Oaten: To ask the Secretary of State for the Home Department pursuant to his Statement of 30 March, *Official Report*, column 1433, on entry clearance standards, whether *(a)* the hotline and *(b)* the website he announced has been set up. [172439]

Mr. Browne: I can confirm that the telephone hotline and website have been set up as announced by my right hon. Friend the Home Secretary on 30 March 2004, *Official Report*, column 1433.

Hirst *v.* UK

Mr. Oaten: To ask the Secretary of State for the Home Department what action he proposes to take in response to the judgment of the European Court of Human Rights in the case of Hirst *v.* United Kingdom concerning a violation of Article 3 Protocol 1 of the European Convention on Human Rights. [172394]

Mr. Leslie: I have been asked to reply.

The Government have noted the judgment and intends to request that the case be referred to the Grand Chamber of the European Court of Human Rights in accordance with Article 43 of the Convention.

Identity Cards

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many biometric identifiers will be used on national identity cards. [170261]

Mr. Browne: There has been no firm decision made on how many biometric identifiers will be used on the identity card.

These decisions will be made in the light of work under way on the feasibility of different technologies and the design of processes around identity enrolment and verification.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will make a statement on the relationship between the proposed National Identity Register and the proposed population register. [170343]

Mr. Browne: Legislation on Identity Cards—A Consultation (CM 6178) explains that the National Identity Register and the population register are separate but complementary proposals. The Home Office is working closely with the Registrar-General for England and Wales on the development of the two proposals.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what *(a)* preparatory work and *(b)* testing he is planning to assess the (i) requirements for the design of identity cards and (ii) arrangements for application. [170348]

Mr. Browne: Over recent months the Home Office has been in wide ranging discussions with both the public and private sectors about their potential requirements for the ID cards scheme. As explained in CM 6178—Legislation on Identity Cards— A Consultation, this will now be followed by a programme definition phase. We intend to undertake volume testing from 2007 that will cover the end to end process.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how the application process for identity cards will be *(a)* monitored and *(b)* assessed. [170349]

Mr. Browne: Legislation on Identity Cards—A Consultation (CM 6178) invites views on the governance options of the scheme.

Mr. Gerald Howarth: To ask the Secretary of State for the Home Department what alternative eye technologies his Department investigated before concluding that the iris should form the basis for an identity card. [170552]

Mr. Browne: Both retina and iris recognition were considered by the National Physical Laboratory in their evaluation of biometric technologies. It has not yet been decided that iris recognition will be used in the identity card scheme. The feasibility of using iris recognition for identity cards is under investigation.

Mr. Gibb: To ask the Secretary of State for the Home Department which companies are being considered as potential suppliers of systems for issuing identity cards. [170814]

Mr. Browne: The Home Office has not yet made any decision about which companies would be considered potential suppliers of systems for ID Cards.

Mr. Gibb: To ask the Secretary of State for the Home Department if he will list the categories of private sector organisations that will be able to apply for accreditation to access the National Identity Register under the Draft Identity Card Bill; and whether this includes overseas *(a)* private sector organisations and *(b)* governments. [173010]

Mr. Browne: No decisions have yet been taken on the precise arrangements for accreditation of businesses or other organisations seeking verification of an individual's identity from the National Identity Register.

Identity Theft

Brian White: To ask the Secretary of State for the Home Department when the international standards of biometric data were agreed; and how many countries have agreed them. [173050]

Mr. Browne: In May 2003 the Air Transport Committee of International Civil Aviation Organisation (ICAO) agreed world-wide standards for the introduction of biometrics in travel documents to protect against fraud and forgery. ICAO is a United Nations organisation with 188 contracting states.

Brian White: To ask the Secretary of State for the Home Department what standards the new passport biometrics will be required to meet; and whether they are compliant with US standards. [173051]

Mr. Browne: The Air Transport Committee of the International Civil Aviation Organisation (ICAO) agreed that the primary biometric identifier should be a facial image stored on a contactless radio frequency chip. Also that additional biometrics may be used by nations on a bi-lateral basis; fingerprints and iris being agreed for this purpose. These standards were accepted and endorsed by the Committee as the globally interoperable standard and implemented through the International Standards Organisation (ISO), Standards Committee SC37. The USA along with the UK are active participants in this standards work.

Immigration and Nationality Directorate

Mr. Randall: To ask the Secretary of State for the Home Department what procedures are in place for staff in the Immigration and Nationality Directorate to raise matters of concern with *(a)* their superiors and *(b)* ministers. [160515]

Mr. Browne: *[holding answer 11 March 2004]:* Home Office staff can raise concerns or matters of conscience either with the Head of Department or confidentially with a nominated official outside their line management chain and, if still dissatisfied, have the right to raise the matter with the Civil Service Commissioners. If events develop so rapidly that it is not possible to follow this procedure, staff may write to the Head of Department who will advise the Departmental Minister, if applicable, and inform the Head of the Home Civil Service. My right hon. Friend the Home Secretary announced on 30 March column 1433 that a telephone hotline would be set up alongside the existing procedures for staff to raise concerns or matters of conscience.

National Identity Register

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how he proposes to ensure that information stored on the National Identity Register concerning and individuals' address is up-to-date. [170260]

Mr. Browne: The draft Identity Cards Bill published on 26 April includes a requirement under clause 12 for an individual to whom an ID card has been issued to notify prescribed changes which affect the accuracy of the Register. This will help to ensure compliance with the Fourth Principle of the Data Protection Act 1998 which states that personal data should be accurate and, where necessary, kept up-to-date.

Drivers are already used to the requirement to notify a change of address to the Driver and Vehicle Licensing Agency and we expect that people will want to keep their details up-to-date otherwise their card will be less useful to them. Failure to update prescribed details may result in the imposition of a civil penalty not exceeding £1,000 under clause 12(6).

Online Advice

Andrew Mackinlay: To ask the Secretary of State for the Home Department what information is available online giving guidance to people from EU accession states on living and working legally in the UK. [165055]

Mr. Browne: Full guidance about the rights and responsibilities of accession nationals wishing to work and live in the United Kingdom for accession nationals was published on the Immigration and Nationality Directorate websites, www.workingintheuk.gov.uk and www.ind.homeoffice.gov.uk on 27 April 2004.

Police

Mr. Mark Field: To ask the Secretary of State for the Home Department how many police community support officers were employed by the Metropolitan Police on 1 January 2004. [170871]

Ms Blears: On 1 January 2004 the Metropolitan Police Service employed 1157 Community Support Officers.

Mr. Mark Field: To ask the Secretary of State for the Home Department how many fully qualified police officers were employed by the Metropolitan police on *(a)* 1 May 1997 and *(b)* 1 January. [170872]

Ms Blears: Information on police numbers is collected quarterly. The Metropolitan Police Service had 26,677 police officers on 31 March 1997. This had increased to a record number of 29,441 officers on 31 December 2003. All police officers are available for duty from the day of joining the force.

Additionally the Metropolitan police had 12,093 police staff and 1,431 Community Support Officers at the end of December 2003.

Mr. Mark Field: To ask the Secretary of State for the Home Department what percentage of the total Metropolitan police uniformed force is accounted for by police community support officers. [170997]

Ms Blears: The Metropolitan Police Service does not keep records of which Police Officers and staff members are currently working in uniform. The table shows the total strength of Police Officers, Staff, Traffic Wardens and Community Support Officers as of 1 January 2004. Community Support Officers account for 2.7 per cent. of the total strength of the force.

Personnel	*Strength*
Police officers	29,886.27
Police staff (excluding CSOs and Traffic Wardens)	11,772.59
Traffic Wardens	543.30
Community Support Officers	1,157.14
Total	43,359.3

Mr. Hoyle: To ask the Secretary of State for the Home Department how many *(a)* traffic police, *(b)* mounted police, *(c)* police dog handlers, *(d)* armed response team officers and *(e)* Criminal Investigation Department officers there are in Lancashire. [171232]

Ms Blears: Published information on police strength by police force area is available for rank, gender and ethnicity but not function. Figures on Police Strength for March 2003, were published in Home Office Statistical Bulletin 11/03, copies of which are available in the library or on the internet site: http://www.homeoffice.gov.uk/rds/hosbpubs1.html.

Mr. Borrow: To ask the Secretary of State for the Home Department what the percentage change in full-time police officers in South Ribble has been since 1997. [171659]

Ms Blears: South Ribble is in the Southern Basic Command Unit (BCU) of Lancashire Constabulary. BCU strength figures are only available for March 2002 and 2003. The information is given in the table.

	Strength	*Percentage change*
31 March 2002	462	—
31 March 2003	500	+8.2

Racial Equality Councils

Mr. McNamara: To ask the Secretary of State for the Home Department if he will list the racial equality councils that have been successful in securing section 44 funding; and what the total funding allocation was. [169737]

Fiona Mactaggart: The Commission for Racial Equality notified applicants of its funding decisions on Thursday 6 May.

Dr. Iddon: To ask the Secretary of State for the Home Department how many racial equality councils are estimated to be in danger of closure as a result of recent allocations of Commission for Racial Equality section 44 funding for 2004–05. [172860]

Fiona Mactaggart: The Commission for Racial Equality (CRE) advises me that following its initial assessment based on grant previously awarded and local knowledge, potentially up to 11 racial equality councils may be in danger of closure. In the event of closure or significant reduction in services provided, CRE staff will work with local councils, Government Offices and Local Strategic Partnerships where appropriate to ensure there is local ownership, support and continuity of services in the areas affected.

Dr. Iddon: To ask the Secretary of State for the Home Department for what reasons the Commission for Racial Equality has decided to grant its section 44 funding to groups other than racial equality councils. [172861]

Fiona Mactaggart: Section 44 of the Race Relations Act 1976 sets out the purpose for which grant may be awarded. It does not prescribe which types of bodies may receive financial assistance and therefore does not limit such assistance to racial equality councils.

We warmly welcome the Commission for Racial Equality's policy of using the Getting Results programme to support any innovative project which is making a difference to race equality and race relations within its local community.

Dr. Iddon: To ask the Secretary of State for the Home Department how many applications were received for Commission for Racial Equality section 44 funding in each of the last five bid rounds. [172862]

Fiona Mactaggart: The Commission for Racial Equality is collating this information. The chair of the CRE will write to my hon. Friend in due course.

Small Retailers

Mr. Oaten: To ask the Secretary of State for the Home Department (1) how much has been spent through the Small Retailers in Deprived Areas initiative in each year since 2001, broken down by region; [172429]

(2) what targets are in place to measure and assess projects undertaken as part of the Small Retailers in Deprived Areas scheme; [172430]

(3) when he will publish the review of the Small Retailers in Deprived Areas scheme. [172431]

Ms Blears: The £15 million from the Capital Modernisation Fund for the Small Retailers in Deprived Areas initiative was made available as follows; 2001–02—£3 million; 2002–03—£6 million; and 2003–04—£6 million. A small amount was set aside for administration and evaluation, with the regional allocations as follows:

£

Region	*2001–02*	*2002–03*	*2003–04*	*Total*
Eastern	196,620	393,475	393,475	983,570
East Midlands	236,060	471,052	471,052	1,178,164
London	454,720	910,515	910,515	2,275,750
North East	248,530	496,244	496,244	1,241,018
North West	470,670	942,209	942,209	2,355,088
South East	246,500	493,580	493,580	1,233,660
South West	194,300	389,604	389,604	973,508
Wales	190,820	381,257	381,257	953,334
West Midlands	333,210	666,182	666,182	1,665,574
Yorkshire and Humber	327,410	655,882	655,882	1,639,174

All the funding, other than a small amount in the region of £250,000 due to slippage on some projects in 2003–04, has been fully disbursed. This equates to 1.7 per cent. of the total capital allocation.

Individual projects are developed by local Crime and Disorder Reduction Partnerships in conjunction with Regional Home Office Directors. Part of this process is to ensure adequate local targets have been set and systems put in place to measure performance against them.

The evaluation of the scheme will pull out key best practice and learning points from eight case studies, plus four other regional sites. The evaluation will examine ways in which the scheme has impacted upon businesses, such as changes in levels of retail crime; fear of crime among businesses and their customers; business viability; partnership working; and improved security behaviour among businesses.

We hope to publish the full evaluation of the Small Retailers scheme later this year.

Stolen Goods

Mr. Oaten: To ask the Secretary of State for the Home Department what assessment he has made of the role of *(a)* pawnbrokers and *(b)* shops dealing in second hand goods in providing a market for stolen goods; and if he will make a statement. [172400]

Ms Blears: In 1998, Dr. Mike Sutton produced, on behalf of the Home Office, a report entitled 'Handling stolen goods and theft: a market reduction approach'. This identified five distinct markets for stolen goods, one of which was commercial outlets such as pawn brokers and second hand goods shops.

Under the Targeted Policing Initiative (part of the Crime Reduction Programme, which ran from 1999 to 2003), we provided funding totalling around £1.4 million to projects in Stockport, Kent and West Mercia aimed at reducing the market in stolen goods. The second hand goods trade was just one of several distribution channels for stolen goods that these projects targeted. In particular, the Stockport and Kent projects used local legislation, which regulates second hand goods outlets. Under the terms of the Kent and Medway Acts 2001, Kent and Medway Councils must also present the Home Office with a report on the working provisions of the Acts by 1 December, which will subsequently be laid before Parliament.

The Home Office has also commissioned the University of Kent to evaluate the effectiveness of these and similar pieces of legislation and we are planning to lay a summary of the results of this research before Parliament at the same time.

We are also aware of further research that is being undertaken into thieves' preferred method of disposing of stolen property and we will be looking to see what this adds to our existing knowledge.

Our programme of work to drive down the market for stolen goods includes, amongst other things, activities aimed at those pawn brokers and other second hand goods outlets that deal in stolen property.

Stolen Vehicles

Mr. Watson: To ask the Secretary of State for the Home Department whether he plans to bring forward legislative proposals to make the drivers of stolen vehicles that have been immobilised remotely and which cause an accident legally responsible for any liability. [172048]

Ms Blears: There are no plans to bring forward such legislation.

Although the remote stopping of moving vehicles is technically possible, achieving this in a way that is safe and secure is some way off. Further research is being conducted into this technology and this will include the examination of legal liability issues.

Stowaways

Lembit Öpik: To ask the Secretary of State for the Home Department what estimate he has made of the number of undetected stowaways entering the UK in each of the last three years; and if he will make a statement. [160372]

Mr. Browne: There is no official estimate of the number of clandestine entrants to the UK.

Illegal entry action is initiated against those people who are detected having entered or attempting to enter the country clandestinely or by means of deception, either verbal or documentary.

The available figures include those people who were identified as having entered the country clandestinely, they are not separately identifiable as such information would only be available by examination of individual case-files at disproportionate cost.

Wormwood Scrubs

Mr. McNamara: To ask the Secretary of State for the Home Department what measures have been taken to identify and interview members of staff of HM Prison Wormwood Scrubs who were employed in the months leading up to and including the day of the death of John Boyle in December 1994, who may have witnessed or been involved in bullying and abusive behaviour. [155659]

Paul Goggins *[holding answer 2 March 2004]:* Mr. Boyle's death at HM Prison Wormwood Scrubs in December 1994 predates current Prison Service policy for investigating deaths in custody and, from the information currently available, there is no evidence to suggest that an investigation was conducted. However, staff working on the Segregation Unit on the day of Mr. Boyle's death were asked to submit incident reports at the time. A coroner's inquest into Mr. Boyle's death, for which several members of staff were called as witnesses, returned an open verdict in May 1995.

HEALTH

Animal Welfare

Llew Smith: To ask the Secretary of State for Health what guidelines his Department issues for experimentation on non-human primates in order to improve cures to illnesses shared by primates and humans; and what plans he has to introduce alternatives to the use of primates in medical research. [170995]

Miss Melanie Johnson: Under the Animals (Scientific Procedures) Act 1986, no animals can be used in scientific procedures if alternatives are available and primates can only be used if no other species are suitable and readily obtainable. Every effort will continue to be required to minimise primate use and find alternatives where practicable. The United Kingdom legislation regulating animal experiments is widely regarded as the toughest in the world. The Government's policy is never to allow the use of great apes.

The Medical Research Council (MRC) has established the Centre for Best Practice for Animals in Research (CBPAR) as part of its continuing commitment to high standards in laboratory animal use and welfare. Following consultation with vets, scientists, experts in primate welfare, and animal welfare organisations, CBPAR has developed guidelines on best practice in the accommodation and care of primates used in scientific procedures. These guidelines have now been published and will shortly be available on the MRC website at www.mrc.ac.uk.

Baby Food

Mr. Stunell: To ask the Secretary of State for Health (1) what evidence he has collated of a link between consumption of high sugar content baby foods and obesity in children; and if he will make a statement; [170252]

(2) what plans he has to require baby food labelling to show prominently the sugar content; [170253]

(3) what representations he has received on the labelling of baby foods to show sugar content. [170254]

Miss Melanie Johnson: We have not collated evidence of a link between consumption of high sugar content baby foods and obesity in children.

Labelling rules for baby foods are agreed at European Union level. The presence of sugar added as an ingredient to baby foods must be declared as an ingredient—as part of the list of ingredients appearing on the product label.

Additional specific labelling requirements for these foods require the actual amounts of certain nutrients present, such as protein, fat and carbohydrate, to be declared. However, a declaration of the actual amounts of sugar present is not mandatory and there are no plans to introduce such a requirement at this time.

There have been no representations on the labelling of sugar content for baby foods over the past year.

Bounty Packs

Mrs. Brooke: To ask the Secretary of State for Health how many Bounty packs were distributed to new mothers within maternity units in Britain in each year since 1995. [171042]

Dr. Ladyman: This information is not collected centrally. Bounty is an independent commercial organisation that distributes free product samples and packs containing information to expectant and new mothers.

Care Homes

Mr. Amess: To ask the Secretary of State for Health how many anonymous complaints about care homes have been received since 1997; and if he will make a statement. [171607]

Dr. Ladyman: The Department does not collect information on complaints about care homes. Since April 2002, all care homes in England have been regulated by the National Care Standards Commission (NCSC), which was replaced by the Commission for Social Care Inspection (CSCI) in April 2004. The NCSC and CSCI collects information about complaints.

I understand from the Chairman of CSCI that the number of anonymous complaints about care homes recorded on the Registration and Inspection database are as shown in the following table.

	Number
2002–2003	1596
2003–2004	1914

Departmental Staff (Drugs)

John Mann: To ask the Secretary of State for Health how many of his Department's employees received counselling for drug use in 2003. [171626]

Ms Rosie Winterton: The Department has a contract with Corecare to provide a counselling service for its employees. Corecare received no requests from the Department's employees requesting counselling for drug use in 2003.

Emergency Services

Mr. Hancock: To ask the Secretary of State for Health (1) how many administrators are involved, and at what annual cost in each trust, in dealing with the resulting paperwork from emergency service staff captured on speed cameras contravening speed limits; [170729]

(2) on how many occasions in each of the last 12 months ambulances on emergency calls in each health trust area have been captured on speed cameras contravening speed limits. [170731]

Ms Rosie Winterton: The information requested is not available centrally.

However, the Department is aware that speeding tickets issued to ambulances on emergency journeys are creating extra administration costs in some areas. Officials have already had useful discussions with the Home Office and are working closely with them to provide a workable solution.

Mr. Hancock: To ask the Secretary of State for Health what recent discussions he has had with the Secretary of State for Home Affairs on the annual cost to health trusts of dealing with the paperwork generated by ambulances on emergency calls captured on speed cameras contravening speed limits. [170730]

Ms Rosie Winterton: The Department is aware that speeding tickets issued to ambulances on emergency journeys are creating extra administration costs in some areas. Officials have already had useful discussions with the Home Office and are working closely with them to provide a workable solution.

Gender Pay Gap

Mr. Denham: To ask the Secretary of State for Health what assessment he has made of the pay gap between men and women employed by his Department and its agencies in *(a)* Southampton, *(b)* Eastleigh, *(c)* Winchester and *(d)* Romsey. [171620]

Ms Rosie Winterton: The Department, and its agencies do not employ any staff in Southampton, Eastleigh, Winchester or Romsey, except for the NHS Estates agency which employs 15 staff in Winchester.

It conducts an equal pay assessment each time a new employee is appointed or when an existing employee is promoted and the proposed salary has to be agreed by the chief operating officer who conducts a "benchmarking" exercise via the human resources department.

Gloucestershire Tri-Service Centre

Mr. Laurence Robertson: To ask the Secretary of State for Health how much money was spent on setting up the Gloucestershire Tri-Service Centre at Quedgley; when it became fully operational; and if he will make a statement. [172364]

Ms Rosie Winterton *[holding answer 11 May 2004]:* The Gloucestershire Tri-Service Centre has been fully operational since April 2003. It was set up with £2.6 million of funding from the Government's Invest to Save budget. The local fire, police and ambulance services jointly contributed a further £1.9 million.

Health Development Agency

Mr. Kaufman: To ask the Secretary of State for Health if he will make a statement on the effect on residents of Manchester, Gorton of the Health Development Agency; [167377]

Jim Dobbin: if he will make a statement on the effect on residents of Heywood and Middleton of the Health Development Agency; [168494]

Mr. Benton: if he will make a statement on the benefits for residents of Bootle of the Health Development Agency; [170537]

Tony Cunningham: if he will make a statement on the effect on residents of Workington constituency of the Health Development Agency; [170715]

Mr. Neil Turner: if he will make a statement on the effect on residents of Wigan of the Health Development Agency; [169351]

Mr. Hendrick: if he will make a statement on the effect on residents of Preston of the Health Development Agency; [168105]

Mr. Pike: what assessment he has made of the effects on residents of Burnley of the Health Development Agency; [167955]

Mr. Meacher: if he will make a statement on the benefits for residents of Oldham, West and Royton of the Health Development Agency; [170894]

Mr. Burrow: if he will make a statement on the benefits for residents of South Ribble of the Health Development Agency. [171670]

Miss Melanie Johnson: The work of the Health Development Agency (HDA) is focused on service delivery that supports the whole of the region's public health development.

The HDA manages the national healthy school standard, which is part of the Government's national strategy to reduce health inequalities for children.

The North West HDA organised the largest ever regional public health conference in March 2004 to address the problem of obesity. Over 300 regional public health professionals, including representatives from health services responsible for Gorton, will have learned of the latest obesity data for the region and will collaboratively plan a regional obesity action plan. The workshop will draw together best practice from across the region and in addition to the HDA guidance on obesity, this will provide the basis for local and regional work to tackle obesity in the coming years.

The North West HDA is currently working with the North West public health observatory and the regional cancer registries to review the main causes of cancer related deaths across the region.

The HDA, in partnership with Liverpool John Moores University and the North West Public Health Observatory, is currently completing a regional report Alcohol: A Situational Analysis for the North West.

Health Funding (Manchester)

Mr. Kaufman: To ask the Secretary of State for Health how much public funding has been spent on health in Manchester, Gorton in each of the last seven years. [167380]

Miss Melanie Johnson: The information is not available in the format requested. Expenditure per weighted head in the Greater Manchester Strategic Health Authority (SHA) area, which includes the constituency of Gorton, has increased from £582.33 in 1997–98 to £992.61 in 2002–03 (the latest year available). This does not represent the total expenditure per head as an element of health expenditure cannot be identified by SHA area.

Health Services

Mr. Meacher: To ask the Secretary of State for Health how many people in Oldham, West and Royton are receiving drug treatment. [170958]

Miss Melanie Johnson: In 2000–01, there were 737 people receiving drug treatment in Oldham. This is the latest available data. Data broken down by drug action team for 2001–02 and 2002–03 has not yet been finalised and published.

Mr. Meacher: To ask the Secretary of State for Health (1) how many senior citizens in Oldham, West and Royton have access to free eye tests; [170882]

(2) how many residents in Oldham, West and Royton aged over 60 years have benefited from the abolition of charges for eye tests. [170883]

Miss Melanie Johnson: Figures for the number of sight tests by constituency, or senior citizens are not collected centrally.

In 2002–03, the total number of national health service sight tests paid for patients aged 60 and over in Greater Manchester Strategic Health Authority was 189,900. The total number eligible for free sight test for those aged 60 and over was 493,100.

Mr. Meacher: To ask the Secretary of State for Health how many NHS *(a)* doctors and *(b)* nurses there were in Oldham, West and Royton in each of the last seven years. [170884]

Miss Melanie Johnson: The information requested has been placed in the Library.

Mr. Meacher: To ask the Secretary of State for Health how many NHS *(a)* therapists and *(b)* scientists there were located in Oldham, West and Royton in each of the last seven years. [170885]

Miss Melanie Johnson: The information requested is shown in the table.

NHS hospital and community health services: Qualified scientific, therapeutic and technical staff in the Greater Manchester strategic health authority area as at 30 September each specified year

Department of Health form QMCW.

Mr. Meacher: To ask the Secretary of State for Health if he will make a statement on NHS waiting times for heart surgery in Oldham, West and Royton. [170888]

Miss Melanie Johnson: There was one patient waiting more than nine months for heart surgery in the Oldham Primary Care Trust area at 30 June 2002. No patients have waited more than nine months since this date.

Mr. Meacher: To ask the Secretary of State for Health how many residents in Oldham, West and Royton awaiting heart surgery have had the option of choosing an alternative hospital for quicker treatment in the last 12 months. [170889]

Miss Melanie Johnson: The information requested is not collected centrally.

Mr. Meacher: To ask the Secretary of State for Health if he will make a statement on the levels of elective admissions to the NHS in Oldham, West and Royton in the past five years. [170890]

Miss Melanie Johnson: The information is shown in the table.

Primary care trust of responsibility, 5J5 Oldham PCT count of in-year selective admissions (waiting list, booked and planned cases) NHS hospitals, 1998–99 to 2002–03

	In-year admissions
1998–99	34,871
1999–2000	37,389
2000–01	34,386
2001–02	30,932
2002–03	29,988

Notes:
In-year admissions
An in-year admission is the first period of in-patient care under one consultant within one healthcare provider, excluding admissions beginning before 1 April at the start of the datayear. Periods of care ongoing at the end of the datayear (unfinished admission episodes) are included. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.

Ungrossed Data
Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).
Primary Care Trust (PCT) and Strategic Health Authority (SHA) Data Quality
PCT and SHA data was added to historic data-years in the HES database using 2002–03 boundaries, as a one-off exercise in 2004. Data quality of PCT of GP practice for 1998–99 is poor, with a high proportion missing values where practices changed or ceased to exist. Users of time series analysis including these years need to be aware of these issues in their interpretation of the data.

Hospital Episode Statistics (HES), Department of Health

Mr. Meacher: To ask the Secretary of State for Health how many rapid access chest pain clinics there are in Oldham, West and Royton. [170891]

Miss Melanie Johnson: There is a rapid access chest pain clinic at the Royal Oldham Hospital, part of the Pennine Acute Hospitals National Health Service Trust.

The clinic is meeting the national service framework two-week target for patients to be seen from date of referral by general practitioner.

Mr. Meacher: To ask the Secretary of State for Health whether there is a diagnostic and treatment centre located in Oldham, West and Royton. [170892]

Miss Melanie Johnson: There is no treatment centre in Oldham West and Royton. A treatment centre is planned for Trafford Healthcare national health service trust.

Mr. Meacher: To ask the Secretary of State for Health how many NHS beds were available in Oldham, West and Royton in each year since 1997. [170893]

Miss Melanie Johnson: The information requested is shown in the tables.

Department of Health form QMCW.

Mr. Meacher: To ask the Secretary of State for Health how much public funding has been spent on health in Oldham, West and Royton in each of the last seven years. [170897]

Miss Melanie Johnson: The information is not available in the format requested. Expenditure per weighted head in the Greater Manchester Strategic Health Authority (SHA) area, which includes the constituency of Oldham West and Royton, has increased from £582.33 in 1997–98 to £992.61 in 2002–03 (the latest year for which data is available). This does not represent the total expenditure per head, as an element of health expenditure cannot be identified by SHA area.

Mr. Borrow: To ask the Secretary of State for Health how many NHS *(a)* therapists and *(b)* scientists were located in South Ribble in each of the last seven years. [171274]

Miss Melanie Johnson: The information requested is shown in the table.

NHS hospital and community health services: Qualified scientific, therapeutic and technical staff in the Cumbria and Lancashire Strategic Health Authority area by organisation as at 30 September each specified year

DH form QMCW.

Mr. Borrow: To ask the Secretary of State for Health if he will make a statement on NHS waiting times for heart surgery in South Ribble. [171277]

Miss Melanie Johnson: There were eight patients waiting more than nine months for heart surgery in Chorley and South Ribble Primary Care Trust area at 30 June 2002. No patients have waited for more than nine months since this date.

Mr. Benton: To ask the Secretary of State for Health how many NHS *(a)* doctors and *(b)* nurses there were in Bootle in each of the last seven years; and if he will make a statement. [169264]

Miss Melanie Johnson: The information requested has been placed in the Library.

Mr. Flook: To ask the Secretary of State for Health how many residents in Taunton awaiting heart surgery have been offered the option of choosing an alternative hospital for quicker treatment in the last 12 months. [172012]

Ms Rosie Winterton: The information requested is not held centrally.

Mr. Neil Turner: To ask the Secretary of State for Health (1) how many senior citizens in Wigan have access to free eye tests; [169343]

(2) how many residents in Wigan aged over 60 years have benefited from the abolition of charges for eye tests. [169344]

Miss Melanie Johnson: Data for the number of sight tests by constituency or by the number of senior citizens are not collected centrally.

The total number of National Health Service sight tests paid for by the Greater Manchester Strategic Health Authority in 2002–03 for patients aged 60 and over was 180,900. The total number eligible for a free sight test for those aged 60 and over was 493,100. Sight tests cannot be equated to the numbers of patients.

Macular Degeneration

Mr. Tyler: To ask the Secretary of State for Health what arrangements are being made for the funding and delivery of photo dynamic therapy treatment for wet age-related macular degeneration in the Peninsula Strategic Health Authority area; and whether they comply with National Institute for Clinical Excellence guidelines. [171584]

Ms Rosie Winterton *[holding answer 10 May 2004]:* In line with our policy to shift the balance of power, responsibility for the funding and delivery of health services now rests with primary care trusts (PCTs). In the South West Peninsula strategic health authority area, the Peninsula Local Specialised Commissioning Group is leading on the implementation of the National Institute for Clinical Excellence guidelines on photodynamic therapy on behalf of its PCTs. Photodynamic therapy is currently provided by the South Devon Healthcare National Health Service Trust at Torbay Hospital and the service will be expanded from June to accept referrals from across the Peninsula. In addition, consideration is being given to involving some other hospitals in the area so as to improve local access to this service.

ME

John Robertson: To ask the Secretary of State for Health what steps his Department is taking to improve the provision of essential services for severely affected sufferers of ME. [171343]

Dr. Ladyman: On 20 January 2004, I announced new services for chronic fatigue syndrome/myalgic encephalomyelitis, (CFS/ME), funded by a £8.5 million cash injection. This money will see the creation of 12 new CFS/ME centres and 28 local support teams throughout England in the coming months.

Local teams are expected to develop a network of services (health, education and social services) for those more severely affected who may be house-bound or bed-bound. The Department also provides funding to support the work of voluntary organisations working with people with CFS/ME.

In addition, in response to a request from the Chief Medical Officer, the Medical Research Council produced a research strategy on CFS/ME on 1 May 2003.

The National Institute for Clinical Excellence has been commissioned to develop clinical guidelines for the diagnosis and management of CFS/ME. These guidelines will underpin the training of health professionals, ensuring people with this condition receive sound advice and support and will address a range of issues including assessment and diagnosis, adjustment and coping, symptom management and the use of rehabilitation strategies to optimising functioning and achieving greater independence.

Milton Keynes and South Midlands Sub-regional Strategy

Mr. Lidington: To ask the Secretary of State for Health (1) which *(a)* individuals and *(b)* organisations will be consulted by those charged with carrying out the studies commissioned by the Milton Keynes and South Midlands Health and Social Care Sub-Group; [172168]

(2) what the *(a)* terms of reference and *(b)* intended date for completion is of each of the studies mentioned in paragraph 53 of the Cross-Government Statement (matters 1, 2, 3, 4) on the draft Milton Keynes and South Midlands Sub-Regional Strategy that the Miltion Keynes and South Midlands Health and Social Care Group has commissioned; and who is responsible for carrying out each one; [172169]

(3) when he intends to publish a 30-year health and social care vision for the Milton Keynes and South Midlands sub-region, as mentioned in paragraph 98 of the Cross-Government Statement (matters 1, 2, 3, 4) on the Milton Keynes and South Midlands Sub-Regional Strategy. [172172]

Yvette Cooper: I have been asked to reply.

The studies commissioned by the Milton Keynes South Midlands Health and Social Care Sub-group have been funded through the Office of the Deputy Prime Minister's Growth Areas Fund. These studies cover two workstreams. The first workstream is to examine how the interaction between health and the built environment can inform best practice in developing sustainable communities in the MKSM Growth Area. The second workstream is focusing on the delivery of health and social care services in response to the proposed growth in housing and population. The studies will provide a 30 year health and social care vision for the sub-region with a development plan and action plan to achieve the vision. The studies are due to be completed in June 2005.

The Chief Executive of the Leicestershire, Northamptonshire and Rutland Strategic Health Authority is the Chair of the Sub-Group. A full-time Project Director has also been appointed for the studies and to co-ordinate consultation activity.

The Sub-group has comprehensive representation from the health community, including the representatives of the relevant Primary Care Trusts, local authority social care departments, the three Strategic Health Authorities: the three Regional Public Health Groups of the Department of Health; the three Workforce Development Confederations (WDCs) and from NHS Estates. In addition a stakeholder reference group has been formed which will enable emerging ideas to be tested with a wide range of stakeholders, including health service users. This currently includes representatives from the local NHS Trusts, local authority Health Scrutiny Committees and patient representatives, and the intention is to expand its scope to include District Councils, Local Strategic Partnerships, independent sector service providers, and other interested groups.

Official Meetings (Mayor of London)

Simon Hughes: To ask the Secretary of State for Health (1) on what dates *(a)* he and *(b)* his predecessors have held official meetings with the Mayor of London since July 2000; and what the subject of each meeting was; [171436]

(2) if he will list the official meetings he and his predecessor had with the Mayor of London since July 2000 to discuss health matters in London, and the dates and subject of each meeting. [172207]

Ms Rosie Winterton *[holding answers 10 May and 11 May 2004]:* My right hon. Friend the Member for Darlington (Mr. Milburn) and my right hon. Friend the Minister of State for Health (Mr. Hutton) met the Mayor of London from time to time and discussed a variety of subjects relating to health.

Productivity

Bob Spink: To ask the Secretary of State for Health if he will set out his policy for increasing the productivity and cutting the costs of his Department and its agencies and non-departmental public bodies. [171732]

Ms Rosie Winterton: I refer the hon. Member to the reply given by my hon. Friend, the Financial Secretary to Her Majesty's Treasury on 10 May, *Official Report*, columns 148-49W.

Radiation

Bob Spink: To ask the Secretary of State for Health what assessment he has made of the potential health risk from exposure to low-level *(a)* ionising and *(b)* non-ionising radiation; and if he will make a statement. [170822]

Miss Melanie Johnson: The Government is advised on the potential health risks from ionising and non-ionising radiation by a variety of bodies. The National Radiological Protection Board (NRPB) provides statutory advice to Government (www.nrpb.org). The Committee on Medical Aspects of Radiation in the Environment (COMARE) provides advice on health effects of radiation at the levels encountered in the general environment. Low-level internal radiation emitters are the remit of the Committee Evaluating Radiation Risks from Internal Emitters and it is due to report to COMARE in the autumn of 2004. The risks from exposure to low-level internal emitters are also regularly reviewed by international organisations, such as the United Nations Scientific Committee on the Effect of Atomic Radiation.

In addition, the Department runs its own radiological protection research programme in the area of low-level radiation exposure (both ionising and non-ionising), that provides information on the quantification of the risk to public health and the implementation of appropriate preventative measures. Research specifically aimed at investigating the potential health effects of mobile phone technology was set up in 2001 under the mobile telecommunications and health research programme.

For non-ionising radiation, the NRPB has recently reviewed the scientific evidence relating to possible adverse health effects of exposure to electromagnetic fields in the frequency range 0–300GHz (Documents of the NRPB: Vol 15, No 3, 2004). This document provides

the basis of NRPB advice on quantitative restrictions on exposure and other measures to avoid adverse effects. It is available on the NRPB web site.

Sexual Health/HIV

Mr. Hopkins: To ask the Secretary of State for Health if he will make a statement on the National Strategy for Sexual Health and HIV; and what assessment he has made of its impact on the sexual health of young people in the UK. [172575]

Miss Melanie Johnson: The national strategy for sexual health and HIV, which is closely linked to the Government's teenage pregnancy strategy, identifies young people as a priority group for action to improve sexual health. The Government's 'Sex Lottery' and teenage pregnancy media campaigns are raising awareness among young people of sexually transmitted infections (STIs), and how to avoid them. We are also tackling the most common STI through our national chlamydia screening programme, which already covers a quarter of primary care trusts in England, and is being rolled-out across the rest of the country.

Vaccinations

Bob Russell: To ask the Secretary of State for Health what his policy is on ensuring that there is an adequate provision of serum for children whose parents opt for individual inoculations rather than the combined MMR. [171743]

Miss Melanie Johnson: The Department does not supply single vaccines. It provides the combined measles, mumps and rubella (MMR) vaccine because it provides the most effective protection against three potentially serious diseases. The availability of single vaccines is an issue for the private clinics who offer them.

Written Answers to Questions

Friday 14 May 2004

INTERNATIONAL DEVELOPMENT

China

Mr. Drew: To ask the Secretary of State for International Development pursuant to his answer of 28 April 2004, *Official Report*, columns 1068–69W, on China (coercive population control), how and by whom the independent monitoring and evaluation of the impact of UN FPA's work in China is carried out; and if he will make a statement. [172985]

Mr. Gareth Thomas: In 2002, an impact survey was conducted by the China Population and Information Research Centre (CPIRC). Using funds provided by DFID, Southampton University provided technical assistance and quality control in the process of preparing the impact survey report.

In the current country programme which lasts from 2003 to 2005, the baseline survey and monitoring are funded by the United Nations Population Fund (UNFPA) and conducted jointly by CPIRC and the Chinese Ministry of Health. The baseline was completed in September last year. DFID is again providing funding to Southampton for quality control of the surveys. The total amount of funding from DFID is £99,200.

Development Aid (Africa)

Mr. Jenkins: To ask the Secretary of State for International Development what the total amount of UK development aid to African countries has been since 1992. [172502]

Hilary Benn: The total amount of UK development aid to African countries since 1992 is set out in the first table. This includes development expenditure by DFID, other government departments and the CDC (formerly the Commonwealth Development Corporation), whose recent reorganisation will greatly enhance its ability to mobilise investment into Africa. The fluctuations in this series are due to volatility in CDC investments and debt relief over which DFID has no control.

Total UK Development Programme to Africa

	£ million
1992–93	521
1993–94	458
1994–95	475
1995–96	436
1996–97	445
1997–98	450
1998–99	574
1999–2000	631
2000–01	783
2001–02	879
2002–03	871

Source:
Statistics on International Development and Statistics database.

The DFID programme expenditure for Africa is shown in the second table; this did in fact increase by £164 million in 2002–03 although there was a slight decrease in the overall UK development aid.

DFID Programme Expenditure for Africa

	£million
1992–93	407
1993–94	395
1994–95	410
1995–96	351
1996–97	350
1997–98	345
1998–99	446
1999–2000	495
2000–01	651
2001–02	586
2002–03	750

Source:
Statistics on International Development and Statistics Database

HIPC Initiative

Mr. Bercow: To ask the Secretary of State for International Development when the countries which have reached decision point in the highly indebted poor countries initiative will receive their irrevocable debt relief. [172463]

Hilary Benn: Thirteen of the 27 countries that have qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) Initiative have reached Completion Point, the stage at which they receive an irrevocable reduction in their stock of debt. The next country expected to receive irrevocable debt relief is Ghana, which is expected to reach Completion Point by July 2004. A further five countries—Cameroon, Chad, Madagascar, Malawi and Rwanda—are expected to reach Completion Point by the end of 2004. Of the remaining countries, seven—Gambia, Guinea, Guinea-Bissau, Honduras, Sao Tome and Principe, Sierra Leone and Zambia—are expected to reach Completion Point in 2005, and one, the Democratic Republic of Congo by the end of 2006.

Mines

Norman Lamb: To ask the Secretary of State for International Development if he will place in the Library a copy of the recent report on UK mine action funding policy. [171053]

Hilary Benn: In reviewing its current policy on humanitarian mine action DFID commissioned an internal report to assist in the decision making process. The report is exempt from release under Part II, section 2 of the Code of Practice on Access to Government Information on the basis that to do so would harm the frankness candour of internal discussion.

The resulting changes in policy from the review have been announced to the House in a Statement dated 10 May. I have also written to the Chair of the Commons All Party Landmine Eradication Group and the Heads of the United Nations Mine Action Service (UNMAS), the United Nations Development

Programme (UNDP) Mine Action Team and the main UK based Non-Governmental Organisations working in the Humanitarian Landmine Sector.

Sudan

Mr. Laxton: To ask the Secretary of State for International Development what actions his Department is taking to work with the UN World Food Programme and other non-governmental organisations to assist refugees in Sudan. [171118]

Hilary Benn: There are approximately 100,000 refugees currently in Sudan. These are of Eritrean origin and are being supported by the World Food Programme's (WFP) Protracted Relief and Recovery Operation. DFID does not contribute to this World Food Programme operation.

Since October 2003, DFID has provided the following for World Food Programme operations in Sudan.

Beneficiaries	*Amount (£ million)*
Sudanese affected by conflict in Darfur	2
Sudanese refugees from Darfur in Eastern Chad	1
Sudanese population affected by war and natural disasters	3
Further support for Sudanese affected by worsening conflict in Darfur	2

DFID also provided £2 million to UNHCR in the last financial year for the assistance of Sudanese refugees in Chad.

World Bank

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of how the World Bank's Extractive Industries Review will influence future policy-making, with particular reference to *(a)* the link between extractive industries and poverty alleviation, *(b)* consultations with indigenous populations before extractive industries are set in place, *(c)* human rights obligations where extractive industries are about to be set up and *(d)* giving a higher profile and better funding to renewable energy projects. [172986]

Hilary Benn: The Government have been actively engaged in the Extractive Industries Review (EIR) process. DFID does not anticipate that the review will significantly influence future UK policy-making. It will however contribute to the ongoing process of improving the sustainable development performance of oil, gas and mining sectors; and the high standards that the World Bank encourages from its partners.

DFID supports the main conclusion of the review that the World Bank Group should remain engaged with the extractives sector and agrees that it is important that social and environmental safeguards are rigorously applied, that human rights are respected, and that efforts are made to improve the governance and transparency of revenue flows from the sector.

DEFENCE

Afghanistan

Harry Cohen: To ask the Secretary of State for Defence to which locations UK military forces have been deployed in Afghanistan in the past six weeks; for what reason in each case; whether the deployed forces have been involved in conflict; and if he will make a statement. [172279]

Mr. Ingram: The United Kingdom currently has military forces routinely deployed in Kabul as part of the International Security Assistance Force, across the five northern provinces of Balkh, Faryab, Jowjzan, Samangan and Sar-e Pol covered by our Provincial Reconstruction Team (PRT) and in both Kabul and Bagram as part of the coalition headquarters. All of these forces are routinely engaged in creating the conditions for stability in Afghanistan, through conflict prevention and resolution; examples during the past six weeks include the PRT's contributions towards facilitating Disarmament, Demobilization and Reintegration in the North, and to calming tensions in Meymanyeh.

Defence Fire Service

Mr. Clifton-Brown: To ask the Secretary of State for Defence what the size is of the backlog of members of the Defence Fire Service, RAF fire-fighters and contractors' personnel from military sites for their four-yearly residential refresher training at DFS Central Training Establishment at RAF Manston. [172523]

Mr. Ingram: It is estimated that there are around 1,200 fire fighters whose refresher training is now overdue. This has been caused by a temporary shortage of instructors at the Defence Fire Service Training Establishment at RAF Manston, a situation we expect to remedy over the next three months.

Mr. Clifton-Brown: To ask the Secretary of State for Defence what progress has been made on his Department's consideration of the option to transfer Defence Fire Service and related training from Manston to the Fire Service College at Moreton-in-Marsh. [172525]

Mr. Ingram: Fire fighter training is included within the scope of the Airfield Support Services Project which is seeking to establish the most cost effective method of providing airfield support, and wider fire services, without compromising operational effectiveness. We are currently in the process of reviewing the bids we have received from the competing consortia and the Public Sector Comparator. Should it be determined that the Defence Fire Services will remain within the public sector we can then reassess the position with regard to the future provision of fire fighter training.

Mr. Clifton-Brown: To ask the Secretary of State for Defence what plans there are for the temporary use of the Fire Service College to clear any backlog in refresher training at the Defence Fire Service Central Training Establishment. [172526]

Mr. Ingram: There are no plans for the temporary use of the Fire Service College to deliver the Ministry of Defence refresher training. To provide such training at the Fire Service College would require personnel,

equipment and vehicles to be transferred to that location, which would then have a direct impact on other specialist fire training that is undertaken at the Defence Fire Service Central Training Establishment.

Iraq

Paul Flynn: To ask the Secretary of State for Defence what discussions he has had with his counterpart in the US Administration on releasing data on the amount of munitions containing depleted uranium used by US forces during the Iraq war. [166868]

Mr. Ingram: There have been no such discussions as this is a matter for the United States Government. However, officials have advised their US counterparts of the information published by the Ministry of Defence on 1 September 2003, *Official Report*, column 900W, on the amount of depleted uranium used by United Kingdom forces during the recent conflict in Iraq.

Glenda Jackson: To ask the Secretary of State for Defence whether British forces were engaged in the siege of Fallujah. [171924]

Mr. Ingram: No.

Kosovo

Andrew Rosindell: To ask the Secretary of State for Defence if he will make a statement on the deployment of troops in Kosovo. [173374]

Mr. Ingram: The United Kingdom normally contributes around 200 personnel to the NATO KFOR mission in Kosovo. In response to the outbreak of violence in mid-March, we deployed the Ready Battalion—the UK contribution to NATO's Over the Horizon reserve for the Balkans—to Kosovo on 17 March to assist in calming tensions. This additional deployment ceased on 17 April 2004.

Support Vehicles

Mr. Laxton: To ask the Secretary of State for Defence when a decision will be made on the support vehicle contract; and if he will make a statement. [171574]

Mr. Ingram: On current plans an announcement on the preferred bidder is scheduled for the early summer.

WALES

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Wales what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170809]

Mr. Touhig: The overriding principle for all purchases by the Wales Office is value for money. It holds a stock of crockery, cutlery and glassware, some of which was manufactured in Britain.

Late Payments

Mr. Evans: To ask the Secretary of State for Wales how many invoices were not paid by the Wales Office within the target of 30 days in the last 12 months for which figures are available; and what the cost was of the late payment of these invoices. [172760]

Mr. Touhig: Of 1,686 invoices paid by the Wales Office in the 2003–04 financial year, 67 or just under 4 per cent. were paid late, with the remainder paid promptly within 30 days.

The Office is not aware of any charge being incurred as a result of these late payments.

Official Vehicles

John Barrett: To ask the Secretary of State for Wales what percentage of official vehicles used by the Wales Office are run on *(a)* petrol, *(b)* diesel, *(c)* liquid petroleum gas and *(d)* compressed natural gas. [172776]

Mr. Hain: The Government Car Service provides the Wales Office with two ministerial cars, both run on petrol.

University Students

Mr. Wiggin: To ask the Secretary of State for Wales what the average university student debt in Wales was in each year since 1997. [172590]

Mr. Touhig: General measures relating to student finance have not yet been devolved to the National Assembly for Wales.

The latest data issued by the Department for Education and Skills (from the Student Income and Expenditure Survey) revealed that the average anticipated student debt from all sources for students graduating in 2002–03 was 8,666 compared with 3,150 (3,465 in real terms) in 1998–99.

The previous survey was in 1995–96.

There are no separate figures for Welsh students or students studying at Welsh Institutions.

Mr. Wiggin: To ask the Secretary of State for Wales how many students whose home is in Wales were at *(a)* universities in Wales and *(b)* universities in England in each year since 1997. [172592]

Mr. Touhig: Welsh domiciled full time higher education enrolments at Welsh and English Higher Education Institutions[1] is as follows.

Academic year	*Studying in Wales*	*Studying in England*
1996–97	27,980	20,565
1997–98	28,715	20,650
1998–99	29,785	20,340
1999–2000	29,675	20,035
2000–01	30,595	19,900
2001–02	32,300	19,495
2002–03	33,295	19,725

[1] As at December.

Notes:

All figures have been rounded to the nearest 5.

Includes undergraduate and postgraduate enrolments.

HESA Student Record

TRADE AND INDUSTRY

Business Regulation

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry if she will place in the Library a copy of the Regulatory Impact Assessment accompanying the Conduct Regulations for Employment Agencies. [168610]

Mr. Sutcliffe: A copy of the Regulatory Impact Assessment for the Conduct of Employment Agencies and Employment Businesses Regulations 2003 was deposited in the Libraries of the House on 27 November 2003. The title of the RIA is the Revision of Regulations for the Private Recruitment Industry.

Dairy Industry

Adam Price: To ask the Secretary of State for Trade and Industry what representations she has received on competition issues in the dairy industry. [170182]

Alun Michael: I have been asked to reply.

Over time we have received a number of representations from hon. Members and others that have raised matters to do with competition issues in the dairy sector. Where appropriate we have taken these up with the DTI and competition authorities who are responsible for competition policy and its administration.

Departmental Publications (Citizens Advice Bureaux)

Dr. Cable: To ask the Secretary of State for Trade and Industry how many representations the Department has received from citizens advice bureaux about shortages of the Department's leaflets and forms in each year since 1997. [172603]

Mr. Sutcliffe: I am not aware that the Department has received any representations from citizens advice bureaux specifically about shortages of the Department's leaflets and forms.

Dr. Cable: To ask the Secretary of State for Trade and Industry if she will list the *(a)* leaflets and *(b)* forms supplied by the Department to citizens advice bureaux; and how many of each leaflet were printed in the last 12 months. [172604]

Mr. Sutcliffe: The Department's publications are listed on its website: www.dti.gov.uk/publications. The Department does not produce leaflets and forms specifically for citizens advice bureaux.

I refer the hon. Member to the answer given on 11 March 2004, *Official Report*, column 1679W, which provides information on those organisations that ordered the largest number of publications for the year ending February 2004.

Paid Leave (Oldham, West and Royton)

Mr. Meacher: To ask the Secretary of State for Trade and Industry how many residents of Oldham West and Royton qualify for paid leave entitlements. [170941]

Mr. Sutcliffe: All workers resident in Oldham West and Royton qualify for paid annual leave entitlements; at least four weeks as set out in the Working Time Regulations. Whilst all women are entitled to 26 weeks ordinary maternity leave, only those who meet the eligibility criteria will be able to claim statutory maternity pay for that period.

All employees in Oldham West and Royton who are eligible will be entitled to take statutory paternity leave with pay and statutory adoption leave with pay.

Workers' Rights (South Ribble)

Mr. Borrow: To ask the Secretary of State for Trade and Industry how many residents of South Ribble qualify for paid leave entitlements. [172149]

Mr. Sutcliffe: All workers resident in South Ribble qualify for paid annual leave entitlements; at least four weeks as set out in the Working Time Regulations. Whilst all women are entitled to 26 weeks ordinary maternity leave, only those who meet the eligibility criteria will be able to claim statutory maternity pay for that period.

All employees in South Ribble who are eligible will be entitled to take statutory paternity leave with pay and statutory adoption leave with pay.

HOME DEPARTMENT

Air Guns

Bob Spink: To ask the Secretary of State for the Home Department how many prosecutions have been brought for offences involving air guns in each of the last five years; and if he will make a statement. [172444]

Caroline Flint: The available information is given in the table.

Statistics for 2003 will be published in the autumn.

Persons[1] proceeded against for offences relating to air weapons, England and Wales 1998 to 2002

Offence description	*Statute*	*1998*	*1999*	*2000[2]*	*2001*	*2002*
Possession of air weapon with intent to endanger life	Firearms Act, 1968 Section 16	35	29	27	35	32
Using air weapons or imitation air weapon to resist arrest	Firearms Act, 1968 Section 17(1)	1	4	1	—	—
Possessing air weapon or imitation air weapon at time of committing or being arrested for an offence specified in schedule 1 of the act	Firearms Act, 1968 Section 17(2)	34	35	47	11	32
Possessing air weapon or imitation air weapon with intent to commit an indictable offence or resist arrest	Firearms Act. 1968 Section 18(1)	16	14	21	12	11
Possession of an air weapon or imitation air weapon with intent to cause fear of violence	Firearms Act, 1968 Section 16A (as amended by Firearms (Amendment) Act 1994	136	141	154	120	127
Possession of air weapon by persons previously convicted of crime	Firearms Act 1968 Section 21(4) as amended by the Criminal Justice and Public Order Act 1994, Section 157 Sch. 8 part III	73	73	51	54	57

Persons[1] proceeded against for offences relating to air weapons, England and Wales 1998 to 2002

Offence description	*Statute*	*1998*	*1999*	*2000[2]*	*2001*	*2002*
Supplying air weapon to person denied them under Section 21	Ibid Section 21 (5) as amended by the Criminal Justice and Public Order Act 1994, section 157 Sch. 8 part III	—	1	—	—	—
Carrying loaded air weapon in public place etc.	Ibid Section 19	246	237	213	241	186
Trespassing with air weapon in a building	Ibid Section 20(1)	1	2	6	1	2
Trespassing with air weapon on land	Ibid Section 20(2)	76	35	30	35	32
Person under 17 acquiring air weapon	Ibid Section 22(1)	6	3	3	2	—
Person under 14 having with him an air weapon or ammunition therefore	Ibid Section 22(4)	9	13	21	12	7
Person under 17 having with him an air weapon in a public place	Ibid Section 22(5)	60	68	66	66	51
Person under 14 making improper use of air weapon when under supervision	Ibid Section 23(1)	2	—	1	1	1
Person supervising person under 14, permitting improper use of air weapon	Ibid Section 23(1)	—	—	2	—	—
Selling or letting on hire an air weapon to person under 17	Ibid Section 24(1)	—	—	—	—	—
Supplying air weapon to person under 14	Ibid Section 24(4)	1	2	4	2	2
Supplying air weapon to person drunk or insane	Ibid Section 25	—	—	—	—	—
Failure to hand over air weapon or ammunition on demand by constable	Ibid Section 47(2)	—	—	—	—	—
Total		696	657	647	592	540

[1] These data are on the principal offence basis.
[2] Excludes figures for Staffordshire.

Bob Spink: To ask the Secretary of State for the Home Department what his policy is on preventing *(a)* crimes and *(b)* accidents involving air guns. [172447]

Caroline Flint: The Government are determined to tackle all aspects of gun crime and the underlying culture that supports it, working with the police and other statutory agencies, the voluntary sector and local communities, to tackle gun crime on a variety of fronts.

We have recently introduced measures in the Anti-social Behaviour Act 2003 raising the age limit to 17 for owning air weapons and making it an offence to have an air weapon in a public place without lawful authority or reasonable excuse. This means that the police can now challenge anybody seen in a public place with an air weapon and arrest them if they are unable to give a satisfactory explanation.

The Home Office produces a leaflet on the safe use of air weapons and arrangements have been made for a copy to be included with all new purchases.

Animal Research

Mr. Djanogly: To ask the Secretary of State for the Home Department what plans he has to visit Huntingdon Life Sciences in Huntingdon. [170856]

Mr. Blunkett: I have no plans at present to visit Huntingdon Life Sciences. However, since becoming Home Secretary, I and other Home Office Ministers have held many discussions aimed at ensuring businesses and individuals involved in important scientific research and testing where animal experimentation is necessary can safely carry on their work without impediment from those who try to intimidate or obstruct them. Most recently, my hon. Friend the Under-Secretary of State for the Home Department (Caroline Flint) met with you on 29 March 2004 to discuss the adverse effect the activities of animal rights extremist is having on members of staff at Huntingdon Life Sciences and the surrounding community.

Animal Rights Activists

Michael Fabricant: To ask the Secretary of State for the Home Department what steps his Department has taken to curb illegal activities of animal rights activists. [172060]

Caroline Flint: I refer the hon. Member to the reply given to him on 6 May 2004, *Official Report*, column 1692W.

Arson

Tim Loughton: To ask the Secretary of State for the Home Department (1) how many children have been prosecuted for arson in each of the last seven years; [169107]

(2) how many children have been prosecuted for arson under the influence of sniffing petrol in each of the last seven years. [169108]

Paul Goggins: The requested information on the number of persons aged 10 and under 18 years proceeded against for arson, England and Wales 1996 to 2002 is contained in the table.

It is not possible from the information collected centrally by the Home Office to identify the number of persons aged 10 and under 18 years who were proceeded against for arson, who had been under the influence of sniffing petrol.

Statistics on court proceedings for 2003 will be published in the autumn.

Number of persons aged 10 and under 18 years proceeded against at the magistrates' courts for arson—England and Wales 1996 to 2002[1]

	Proceeded against
1996	708
1997	878
1998	823
1999	924
2000	1,005
2001	1,134
2002	1,064

[1] These data are on the principal offence basis

CCTV

Mr. Wyatt: To ask the Secretary of State for the Home Department how much public funding has been spent on CCTV security cameras in Sittingbourne and Sheppey since 1997. [170289]

Ms Blears: Since 1997, the Home Office has provided a total of £471,347 for CCTV schemes to Swale Borough Council, which includes the Sittingbourne and Sheppey constituency.

Allocation of that funding is a matter for Swale Borough Council and Kent County Constabulary. The information is not held centrally.

Mr. Meacher: To ask the Secretary of State for the Home Department how much public funding has been spent on CCTV security cameras in Oldham, West and Royton since 1997. [170956]

Ms Blears: Since 1997, the Home Office has provided £221,938 to Oldham Metropolitan Borough Council, which includes the Oldham West and Royton Constituency for CCTV schemes.

Allocation of funds across this area is the responsibility of Oldham Metropolitan Borough Council and Greater Manchester Police.

Child Offenders (Injuries)

Harry Cohen: To ask the Secretary of State for the Home Department what recent representations he has received on injuries sustained by children in penal institutions, with particular reference to broken limbs; how many such injuries were suffered by children in such institutions in each of the last five years; how many and what percentage of the total are considered to have been inflicted by staff working in such institutions; what plans he has to introduce new or revised policies on the issue; and if he will make a statement. [169526]

Paul Goggins: My right hon. Friend the Home Secretary has not received any recent representations on this subject.

Statistical information on injuries is not collected centrally, but the Youth Justice Board has been reviewing the use of physical restraint procedures and the National Children's Bureau recently produced a report for the board on the use of physical intervention within the juvenile secure estate. The board is currently drawing up a code of practice on the use of physical restraint, which it is intended will apply in all establishments holding young people under 18. The board is also planning to review the techniques that are used in establishments, in the light of the tragic death of Gareth Myatt at Rainsbrook on 19 April.

Civil Servants

Bob Spink: To ask the Secretary of State for the Home Department if he will list for each civil service grade within his *(a)* Department and *(b)* Department's executive agencies, the total number of staff employed, broken down by (i) gender, (ii) ethnic group and (iii) age group; and how many are registered disabled. [166390]

Fiona Mactaggart: Data on staffing levels in the Civil Service is collected by the Cabinet Office and published in Civil Service Statistics. A copy of Civil Service Statistics, 2002 is available in the Library, and at www.civil-service.gov.uk/statistics. The 2003 edition will be published in summer 2004.

More recent data for the Home Department and its executive agencies is given in the tables, which will be placed in the Library.

Commission for Racial Equality

Derek Conway: To ask the Secretary of State for the Home Department if he will list the grant from public funds to the Commission for Racial Equality in each of the last five years; and if he will make a statement on the reasons for the delay in distributing funds to commission area councils for racial equality, including Bexley. [169448]

Fiona Mactaggart: The grant-in-aid paid to the Commission for Racial Equality (CRE) in each of the last five years was as follows:

	£ million
2000–2001	16.685
2001–2002	20.516
2002–2003	20.424
2003–2004	[1]23.902
2004–2005	19.200

[1] A further £4 million was provided in-year to cover a predicted shortfall in the value of Race Equality Council pension scheme.

Substantial additional sums were allocated in the three year period 2001–02 to 2003–04 to allow the CRE to implement the provisions of the Race Relations Amendment Act and its modernisation programme. This increase was carried forward to the baseline for this year. The new baseline of £19.2 million (which includes a 4.5 per cent. reduction in administration costs) will be the starting point for considering next year's budget.

The closing date for bids for Section 44 applications grants was 13 February 2004. Since that time the CRE and the Home Office have been working to agree this years delegated budget, and the CRE has been assessing a large pool of applications in accordance with its criteria. The number of successful applicants is higher than last year. The Commission notified applicants of its funding decisions on Thursday 6 May 2004.

Correspondence

Mr. Amess: To ask the Secretary of State for the Home Department how many letters his Department received from the right hon. and hon. Members in each month *(a)* between May 1997 and June 2001 and *(b)* since June 2001. [163122]

Fiona Mactaggart: The information is as follows:

(a)

Month	*No of letters received*[1]
April 2001	1,734
May 2001	1,423
June 2001	1,065

[1] excludes letters addressed to officials/agencies

Figures for previous years are not readily available and could only be provided at disproportionate cost.

(b)

Month	*No of letters received*[1]
July 2001	724
August 2001	833
September 2001	1,346
October 2001	1,730
November 2001	1,602
December 2001	949
January 2002	1,723
February 2002	1,735
March 2002	1,443
April 2002	1,944
May 2002	1,654
June 2002	1,296
July 2002	2,001
August 2002	2,067
September 2002	1,407
October 2002	1,741
November 2002	1,466
December 2002	1,046
January 2003	2,107
February 2003	1,703
March 2003	1,963
April 2003	1,869
May 2003	1,574
June 2003	1,792
July 2003	2,270
August 2003	1,558
September 2003	1,824
October 2003	1,797
November 2003	1,800
December 2003	1,682
January 2004	1,140
February 2004	1,761

[1] excludes letters addressed to officials/agencies

Crime and Disorder Reduction Partnerships

Mr. Oaten: To ask the Secretary of State for the Home Department what measures he has taken to encourage business participation in crime and disorder reduction partnerships. [172428]

Ms Blears: We fully recognise the importance of business participation in the work of crime and disorder reduction partnerships (CDRPs) and we have taken steps in a number of ways to encourage this.

Firstly, companies and retail bodies are named under section 5(3) of the Crime and Disorder Act 1998 as invitees to participate in CDRP audits which are currently under way.

We have also appointed 10 regional business crime reduction advisers who are currently engaged in a mapping exercise that will pull together data on how CDRPs across the country are prioritising business crime in their strategies. The advisers will work with the CDRPs to promote ways of including business crime activities in their strategies.

A new toolkit on audits and strategies has been developed for CDRPs on the Crime Reduction website and a section on consulting on the findings of the audit will be available shortly highlighting the importance of consulting businesses during this process.

Finally, one of the aims of the Action Against Business Crime (AABC) group is to strengthen the links between businesses and CDRPs, further reinforcing the importance of CDRPs and business working together.

David Davis: To ask the Secretary of State for the Home Department what the figures for crime and disorder reduction partnerships were for *(a)* violence against the person, *(b)* sex offences, *(c)* robbery, *(d)* burglary, *(e)* theft of a motor vehicle, *(f)* theft from a vehicle and *(g)* total crime in each year since 1999 to 2000. [170373]

Ms Blears: Recorded crime statistics at Crime and Disorder Reduction Partnership (CDRP) level for the six offence groups mentioned are available on a financial year basis from 1999–2000. There are currently 376 CDRPs in England and Wales.

CDRP figures for 1999–2000 and 2000–01 were published in July 2001 (Table 10 of Statistical Bulletin 12/01 'England and Wales, 12 months to March 2002') and can be accessed via the Home Office Research, Development and Statistics website at the following address: http://www.homeoffice.gov.uk/rds/pdfs/hosb1201.pdf

CDRP figures for 2001–02 and 2002–03 can be found on the same website at the following address: http://www.homeoffice.gov.uk/rds/pdfs2/hosb703sup1.xls

The National Crime Recording Standard (NCRS) was introduced across England and Wales in April 2002. Some police forces adopted the standard prior to this date. Broadly, the NCRS had the effect of increasing the number of crimes recorded by the police. Therefore, following the introduction of the standard, numbers of recorded crimes are not directly comparable with previous years.

The new Home Office website www.crimestatistics.org.uk/tool/ contains quarterly data for the 2002–03 financial year at CDRP level for a wide range of offences within the Recorded Crime series.

Criminal Justice Interventions Programme

Mr. Jenkins: To ask the Secretary of State for the Home Department how many offenders have been enrolled in the Criminal Justice Interventions Programme since its inception. [172496]

Caroline Flint: The Criminal Justice Interventions Programme (CJIP) is a three-year programme to develop and integrate measures for directing drug-misusing offenders out of crime and into treatment. The programme draws together and builds on the best existing solutions available and introduces new elements. Delivery at a local level is through integrated teams, using a case management approach to offer access to treatment and support from an offender's first point of contact with the criminal justice system through custody, court, sentence and beyond.

As the programme engages offenders in a wide range of circumstances and at different times in an individuals' contact with the Criminal Justice System, there is no concept of "enrolling" offenders in the programme. Data systems for analysing activity and outcomes across the programme are still in progress but by March 2004 some 2,800 offenders per month were being drug tested of whom 52 per cent. were testing positive.

Approximately 900 Drug Treatment and Testing Orders were being commenced each month and criminal justice drugs workers were making 5,500 contacts with offenders. These numbers will increase from April 2004 as 36 more Basic Command Units join the full programme.

Cycling Offences

Bob Russell: To ask the Secretary of State for the Home Department how many prosecutions were made for riding a cycle *(a)* without lights during the hours of darkness and *(b)* on the pavement in the last 12 months for which figures are available. [172156]

Caroline Flint: 180 defendants were proceeded against in England and Wales in 2002 for lighting and reflector offences connected with bicycles (this includes cycling without lights during the hours of darkness) and 94 defendants were proceeded against for cycling on the footway (pavement).

Statistics on court proceedings for 2003 will be published in the autumn.

Dangerous Driving

Tim Loughton: To ask the Secretary of State for the Home Department what plans he has to introduce a new penalty category of offences committed by drivers without a licence who maim or kill. [169072]

Caroline Flint: The Government is reviewing the existing framework of the criminal law concerning bad driving, particularly where death or injury results, in order to ensure that appropriate offences and penalties are put in place. The offence of driving otherwise than in accordance with a licence is not specifically included within the terms of reference of the review, which focus on the standard of driving, but the Government will of course consider all responses and issues raised during the consultation process. We hope to publish a consultation paper in the near future.

Euro 2004

Mr. Jenkins: To ask the Secretary of State for the Home Department what action the Department is taking to work with and assist the Portugese authorities in policing the Euro 2004 football tournament. [172493]

Caroline Flint: Multi-agency preparations for Euro 2004, co-ordinated by the Home Office, have been under way for two years. The preparations will be the most extensive ever for an overseas tournament and incorporate very close and effective liaison with the Portuguese Government, police and other authorities.

A joint communique on Anglo/Portuguese police co-operation, signed in February 2004 by the Minister of State for policing and her Portuguese counterpart, identified some key measures designed to minimise the risk of significant disorder involving England fans. These measures centred on maximum use of tough banning order legislation to prevent around 2,500 known English football troublemakers from travelling to the tournament and the deployment in Portugal of an English police delegation expert in policing English football crowds.

National Criminal Intelligence Service

Mr. Oaten: To ask the Secretary of State for the Home Department what recent representations he has received regarding the number of police officers seconded to the National Criminal Intelligence Service. [173135]

Caroline Flint: I refer the hon. Member to the answers I gave on 28 April 2004, *Official Report*, column 1105W.

The balance between the need to retain skills and contacts with local forces, while developing new capabilities is a matter for the Director General of the National Criminal Intelligence Service.

Paedophiles

Tim Loughton: To ask the Secretary of State for the Home Department pursuant to the answer of 19 April 2004, *Official Report*, column 106W, on paedophilia, for what reason the Prison Service does not have a specific offence code to cover paedophiles. [169105]

Paul Goggins: There is no specific offence code to cover paedophiles because there is no specific offence of "paedophilia". The sexual abuse of children can occur in a variety of ways and our law, if it is to be effective, has to reflect this. The Sexual Offences Act 2003, which came into force on 1 May 2004, includes a variety of new offences which cover various forms of sexual abuse inflicted on children.

Probation and Prison Services

Mrs. Helen Clark: To ask the Secretary of State for the Home Department what the budget outturn for *(a)* the National Probation Service and *(b)* HM Prison Service was for (i) 2002–03 and 2003–04. [166594]

Paul Goggins: The National Probation Service budget outturn for 2002–03 was £693.3 million. The forecast outturn for 2003–04 is £851.0 million and includes £80 million for Electronic Monitoring, which was not part of the service in the previous year.

The Prison Service budget outturn for 2002–03 was £2,636 million. The forecast outturn for 2003–04 is £2,377 million. The 2003–04 figures exclude the costs of the privately managed prisons (£173.6 million) and include income from the Department of Health to meet Prison Healthcare of £130 million.

Serious Organised Crime Agency

Mr. Oaten: To ask the Secretary of State for the Home Department whether the *(a)* National Criminal Intelligence Service and *(b)* National Crime Squad Service Authorities will cease to exist when the Serious Organised Crime Agency becomes operational; and if he will make a statement. [172398]

Ms Blears: Proposals for the Serious Organised Crime Agency (SOCA) were set out in the White Paper "One Step Ahead: A 21st century strategy to defeat organised crime" (CM6167), published on 29 March. As the National Criminal Intelligence Service (NCIS) and the

National Crime Squad (NCS) will become part of SOCA there will no longer be a role for the current Service Authority once the new agency comes into being.

We have invited comments on the White Paper proposals by 30 July and will consider these carefully when planning the new agency.

Standards of Proof

David Davis: To ask the Secretary of State for the Home Department what recent discussions he has had on reducing the standards of proof in trials of terrorist or other serious criminal offences. [171480]

Ms Blears: I have had no recent discussions on this issue. As I said on 25 February 2004, *Official Report*, column 328, it is not my intention to lower the standard of proof in criminal cases.

A discussion paper on the future of our anti-terrorism law is currently out for consultation and I look forward to hearing the right hon. Member's contribution to that consultation.

Vehicle Registration Plates

Bob Russell: To ask the Secretary of State for the Home Department what advice he has given to chief constables to enforce the provisions of the Vehicles (Crime) Act 2001 relating to vehicle registration plates. [172158]

Caroline Flint: The Driver and Vehicle Licensing Agency (DVLA) has undertaken a number of actions to raise police awareness of these provisions. These include guidance on police powers of entry and inspection of registered premises, a telephone helpline (also available to vehicle registration plate suppliers and trading standards officers), meetings with police forces and accompanying police on targeted operations.

Bob Russell: To ask the Secretary of State for the Home Department how many prosecutions have been made in the last 12 months for which figures are available for breaches of provisions of the Vehicles (Crime) Act 2001 relating to vehicle registration plates; and how many of these involved *(a)* the incorrect positioning of letters and numbers and *(b)* an incorrect typeface. [172159]

Caroline Flint: Within the Home Office Court Proceedings Database individual offences under the Vehicles (Crime) Act 2001 cannot be separately identified. In 2002 no prosecutions were recorded under the Act.

TRANSPORT

British Transport Police

Mr. Damian Green: To ask the Secretary of State for Transport how many officers have been employed by the British Transport Police in each year since 1997. [171899]

Mr. McNulty: The British Transport Police (BTP) have provided the following information on officers employed by the BTP since 1997.

	Number of BTP officers
1997	2,132
1998	2,095
1999	2,113
2000	2,091
2001	2,109
2002	2,123
2003	2,206
2004	2,280

Mr. Damian Green: To ask the Secretary of State for Transport how many British Transport Police officers patrol on board trains after 11 p.m. on *(a)* weekdays and *(b)* weekends. [171901]

Mr. McNulty: The British Transport Police (BTP) do not record this information at such a specific level. Officers actively patrol railway property including stations and trains.

East Midlands Airport

Mr. Garnier: To ask the Secretary of State for Transport (1) what research his Department has conducted into the *(a)* levels and *(b)* effects of (i) noise and (ii) air pollution on the residents of (A) Harborough District, (B) Oadby and Wigston Borough, (C) Melton Borough, (D) Charnwood District, (E) Loughborough and (F) North West Leicestershire District arising from increases in day and night flights into and out of Nottingham East Midlands Airport by (1) 5,000, (2) 10,000, (3) 20,000, (4) 30,000, (5) 40,000, (6) 50,000, (7) 60,000, (8) 70,000 and (9) 80,000 aircraft movements per year over the next decade; and what assessment has been made of the effects in each case of such increases between 10 pm and 6 am each day; [173011]

(2) what research his Department has conducted into the *(a)* levels and *(b)* effects of (i) noise and (ii) air pollution on the residents of (A) Harborough District, (B) Oadby and Wigston Borough, (C) Melton Borough, (D) Charnwood District, (E) Loughborough and (F) North West Leicestershire District arising from increases in day and night flights into and out of Nottingham East Midlands Airport by (1) 5,000, (2) 10,000, (3) 20,000, (4) 30,000, (5) 40,000, (6) 50,000, (7) 60,000, (8) 70,000 and (9) 80,000 aircraft movements per year over the next decade (x) using the eastern and south-eastern approach and departure flight paths only and *(y)* where approaching aircraft have to circle in stacks before receiving clearance to land. [173015]

Mr. McNulty: Environmental controls at Nottingham East Midlands Airport are a matter for local control by the airport.

It is not envisaged that air pollution from these levels of movements would result in exceedence of any air quality standards. Under the system of local air quality management (LAQM), local authorities have a duty to review and assess the current, and likely future, air quality in their areas against the national objectives set out in the "Air Quality Strategy for England, Scotland, Wales and Northern Ireland" and prescribed in the Air Quality Regulations 2000.

The Department is engaged in a major research study looking into attitudes to aircraft noise, "Attitudes to Noise from Aviation Sources in England" (ANASE).

Phase 1, which is nearing completion, is intended to ensure that the methodology for valuing subjective annoyance from aircraft noise, to be used in phase 2 (the main social survey), is robust.

Mr. Garnier: To ask the Secretary of State for Transport if he will list the *(a)* employees of the airport and *(b)* the airline companies that use or intend to use this airport with whom Ministers and officials held discussions about the expansion of the capacity of Nottingham East Midlands Airport; when and where the discussions took place; and which Ministers and officials conducted them. [173012]

Mr. McNulty: During the preparation of the White Paper "The Future of Air Transport", Ministers and officials discussed the future of Nottingham East Midlands Airport on numerous occasions with a wide range of interested parties as part of the extensive consultation process. These included the management of the airport and its parent company and relevant airlines, but also other parties concerned with the future development of the airport including its consultative committee, local authorities, regional and local development agencies, business interests and environmental and local community groups. Similar discussions will continue to take place as we look to implement the policies set out in the White Paper.

Mr. Garnier: To ask the Secretary of State for Transport what his Department's policy is on the level of use of the Antonov and Boeing 747 400 freighter aircraft at Nottingham East Midlands Airport; and if he will make a statement. [173014]

Mr. McNulty: The Department does not have a policy on which types of aircraft may use particular airports, providing that restrictions such as planning conditions and noise agreements are observed and safety requirements are met.

Night Flights

Mr. Garnier: To ask the Secretary of State for Transport what his Department's policy is on the *(a)* expansion and *(b)* restriction of night flights over rural areas; and if he will make a statement. [173013]

Mr. McNulty: At airports designated for the purposes of section 78 of the Civil Aviation Act 1982, controls on aircraft noise at night may be set under that power: at present, only Heathrow, Gatwick and Stansted are so designated. At regional airports, controls may be imposed voluntarily by the airport operator, in consultation with those affected. The Department has issued Guidance to the Civil Aviation Authority (CAA) on how to assess environmental impacts of changes to airspace arrangements to augment directions to the CAA under section 66(1) of the Transport Act 2000. The guidance picks up and promotes broader Government policy that the CAA should pursue policies that will help to preserve the tranquillity of the countryside where this does not increase significantly the environmental burdens on congested areas.

Shell Haven

Bob Spink: To ask the Secretary of State for Transport pursuant to the Maritime and Coastguard Agency report on the condition of SS Richard Montgomery, what the *(a)* timing and *(b)* frequency will be of further surveys of the main crack at the No. 2 Hatch. [172571]

Mr. Jamieson: Surveys are undertaken during optimal tidal and weather conditions. For visual inspections this is on Neap Tides during the summer months.

The survey of the SS Richard Montgomery is an evolving process which takes advantage of new technology and understanding. Diver surveys have been undertaken on approximately a decennial basis, with intervening sonar surveys to increase knowledge of the status of the wreck and surrounding area. It is not anticipated that another full visual diver survey of No. 2 Hatch area will be undertaken until 2013. However, if intervening surveys suggest a requirement to gather such information earlier, a visual survey would then be commissioned.

Bob Spink: To ask the Secretary of State for Transport if he will undertake further sampling and metallurgical analysis of the hull plates on the SS Richard Montgomery in the Thames. [172572]

Mr. Jamieson: The form of the next survey, planned for 2005, will be discussed with specialist advisers, and decisions will be based on furthering knowledge of relevant aspects of the condition of the wreck. The use of sonar, (multi-beam, sidescan), Remotely Operated Vehicle, physical sampling, and visual or ultra sonic diver survey will all be considered, and might include further sampling and metallurgical analysis. However, as stated in the most recent report, there has been little appreciable change to the thickness of the hull plating in the last 22 years, so there is no reason to suggest this will be necessary before the next full diving survey.

TREASURY

Army Medal Office

Mr. Luff: To ask the Chancellor of the Exchequer what assessment he has made of the implications for the Droitwich Spa office of Customs and Excise of the proposed closure of the Army Medal Office. [171977]

John Healey: I understand that the Ministry of Defence (MOD) are to close their office in Droitwich. HM Customs and Excise have an arrangement with the MOD to occupy the building until March 2006. Customs are now considering the implications for its 115 staff based at Droitwich and are exploring alternative accommodation options.

Childcare Tax Credit

Mr. Willetts: To ask the Chancellor of the Exchequer how many spot checks the Inland Revenue has carried out on child care providers to check that the childcare tax credit has been properly used in each quarter since the introduction of the childcare tax credit. [171603]

Dawn Primarolo: Of working tax credit awards for 2003–04 that included help with child care costs, there were about 350,000 instances in which claimants reported making payments to child care providers. For all of these, Inland Revenue has contacted the child care provider by letter or telephone to check child care.

Civil Service

Mr. Letwin: To ask the Chancellor of the Exchequer pursuant to his Answer of 1 April 2004, *Official Report*, column 1677W, on the Gershon Review, when he expects the first reductions in the number of civil servants to be made as a result of the Lyons Review. [171393]

Mr. Boateng: I refer the right hon. Gentleman to the answer I gave in the House on 13 May 2004, *Official Report*, column 466.

Mr. Letwin: To ask the Chancellor of the Exchequer pursuant to his answer of 1 April, *Official Report*, column 1677W, on the Gershon Review, when he expects the first reductions in the number of civil servants to be made towards the reduction of 14,000 civil servants in the Inland Revenue and HM Customs. [171394]

Mr. Boateng: I refer the right hon. Gentleman to the answer my right hon. Friend the Chancellor of the Exchequer gave yesterday in the House *Official Report*, column 453—and in particular that implementing the job reductions will be included in the remit of the first executive Chairman of Her Majesty's Revenue and Customs (HMRC).

Council Tax

Dr. Vincent Cable: To ask the Chancellor of the Exchequer if he will update the information set out in the Answer of 10th June 2003, Official Report, columns 746–47W, on council tax, to take account of the effects of taxes and benefits on household income in 2002–03. [172602]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician. I have asked him to reply.

Letter from Colin Mowl to Dr. Vincent Cable, dated 14 May 2004:

As National Statistician, I have been asked to reply to your recent question to the Chancellor of the Exchequer asking for an update for 2002–03 of the figures for council tax as a percentage of gross income for Great Britain, together with a breakdown for England, Scotland, and Wales, given in the previous answer of 10 June 2003. (172602)

Estimates have been produced from the Office for National Statistics' analysis "The effects of taxes and benefits on household income" published on the National Statistics website on 6 May 2004 at http://www.statistics.gov.uk/taxesbenefits. The analysis includes measures of income inequality for the United Kingdom as a whole based on data from the Expenditure and Food Survey.

The current analysis presents data for the category 'Council tax and Northern Ireland rates', as opposed to the category 'Local taxes' used in previous analyses. This is because, from this year, charges made by water authorities for water, environmental and sewerage services have been excluded. This treatment conforms to the National Accounts classification and definition of taxes where water rates and related charges are considered a charge for services rather than a tax. They have therefore been excluded from the calculation of disposable income. This reply is based on the new methodology and I have included updated figures on this basis for 2001–02 for comparison.

The following table shows the estimated gross and net council tax for all households in Great Britain and *(a)* England, *(b)* Scotland and *(c)* Wales, for each income quintile where households are ranked by equivalised disposable income. The net council tax figures are gross council tax less benefits and discounts. The table also shows the equivalised disposable income quintile point boundaries, which have been calculated separately for Great Britain and each country. For example, the 1st quintile point for each country is the income below which one fifth of households in that country are estimated to lie.

Council tax as a percentage of gross income

Great Britain *Percentages*

		Quintile groups of all households ranked by equivalised disposable income									
		Bottom		*2nd*		*3rd*		*4th*		*Top*	*All households*

Source:

Office for National Statistics, based on the analysis 'The effects of taxes and benefits on household income', published on the ONS website and in Economic Trends.

Operation Gestalt

Norman Lamb: To ask the Chancellor of the Exchequer if he will make a statement on the assistance being provided by *(a)* the Government and *(b)* government agencies to the Metropolitan Police with regard to Operation Gestalt. [172421]

John Healey: It is for the Metropolitan Police Service to determine the nature and extent of their inquiries and the information they require. The Commissioners of Customs and Excise have made it clear that the police will have their full co-operation in any investigation.

Tax Credits

Mr. David Willetts: To ask the Chancellor of the Exchequer when the Inland Revenue expects to finalise awards of *(a)* child tax credit and *(b)* working tax credit in respect of 2003–04. [172897]

Dawn Primarolo: I refer the hon. Member to the reply I gave the hon. Member for Birmingham Northfield (Richard Burden) on 19 November 2003, *Official Report*, columns 1099–1100W.

Tax Credits (Blackpool, South)

Mr. Gordon Marsden: To ask the Chancellor of the Exchequer how many families in Blackpool, South have received the child tax credit. [173065]

Dawn Primarolo: I refer my hon. Friend to my answer to my hon. Friend the Member for Burton (Mrs. Dean) on 15 March 2004, *Official Report*, column 98W.

Teenage Pregnancy

Mr. Brazier: To ask the Chancellor of the Exchequer what the percentage change in conceptions among girls under *(a)* 18 and *(b)* 16 years in Kent is since 2001. [172214]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Julian Brazier, dated 14 May 2004:

As National Statistician I have been asked to reply to your recent question asking what the percentage change in conceptions, among girls under *(a)* 18 and *(b)* 16 years, in Kent is since 2001. (172214)

The table gives the numbers and rates of conceptions in 2001 and 2002 (the latest year for which figures are available) among girls aged under 16 and under 18 in Kent. The table also shows the percentage change in the rates of conception between these two years.

Numbers of conceptions are estimated from registrations of births and notifications of abortions. Miscarriages before the 24th week of gestation are not included.

	Conceptions at ages: Under 16			*Conceptions at ages: Under 18*		
	Number	*Rate*[1]	*% change in rate*	*Number*	*Rate*[2]	*% change in rate*
2001[3]	205	8.0	-12	986	39.3	-5
2002[4]	183	7.0		945	37.2	

[1] Rate per 1,000 females aged 13 to 15

[2] Rate per 1,000 females aged 15 to 17

[3] Provisional figures

[4] Provisional estimate based on incomplete abortion data

WORK AND PENSIONS

Computers (Wigan)

Mr. Neil Turner: To ask the Secretary of State for Work and Pensions how many people in Wigan have received a computer to assist in seeking employment or retraining. [169362]

Jane Kennedy: No computers have been purchased for customers within the Wigan District. However, help has been provided to three customers to upgrade an existing computer; to enable the purchase of parts to repair a computer; and for the purchase of a printer. The purchase of such items is via the Advisers Discretionary Fund (ADF). ADF is a financial option designed to help Jobcentre Plus customers make the transition from claiming benefits to employment. ADF was introduced to help support customers with their jobsearch and/or to purchase essential items without which they would be unable to take up a job. Advisers have the discretion to make awards from the ADF, up to a maximum of £300, for any goods and services needed to support the customer in taking up a job.

Departmental Staff

Mr. Webb: To ask the Secretary of State for Work and Pensions how many new appointments have been made to his Department and its agencies in the last five years; and of these how many were aged *(a)* 60 years or over and *(b)* 65 years or over. [173298]

Malcolm Wicks: Information on the number of new appointments made to the Department for Work and Pensions and its agencies in the last three years is in the table. Information on new recruits in earlier years is not available.

	Total appointments	Appointments aged 60 years and over	Appointments aged 65 years and over
2001–02	14,855	91	0
2002–03	10,917	97	0
2003–04	8,342	73	4

Notes:
Numbers exclude temporary appointments.
Each year stated runs from 1 April to 31 March.

Employment Training (Wirral, South)

Mr. Ben Chapman: To ask the Secretary of State for Work and Pensions if he will make a statement on the provision of employment training in Wirral, South. [168912]

Jane Kennedy: Employment training for unemployed people in Wirral South is available through a range of Jobcentre Plus programmes. Training is provided in occupations including: construction, engineering, administration, agriculture, retail, basic skills, IT, health care and self employment.

People in Wirral South can also access training in construction and IT through our Ambition programmes. These programmes are designed to give unemployed and disadvantaged people the skills and experience they need to get sustained jobs with career potential in areas of specific local labour market shortages. On the 28 April, we announced our Ambition Health programme which will give people the chance of support and training to help them into jobs in the NHS. The Merseyside pilot, which Wirral South residents will be able to access, starts in September.

Help with travel costs is available for unemployed people undertaking our training programmes, and those known to face particular disadvantage in the labour market may be exempt from an unemployment qualifying period and can join Jobcentre Plus programmes from day one of their unemployment. These can include: disabled people, lone parents and people with basic skills needs.

Health and Safety

Mr. Greg Knight: To ask the Secretary of State for Work and Pensions what representations the Government has received from *(a)* sporting groups and *(b)* others involved in outdoor pursuits with regard to health and safety issues within the last six months; and if he will make a statement. [168232]

Jane Kennedy *[holding answer 28 April 2004]*: The Health and Safety Executive is responsible for enforcement of health and safety legislation in Great Britain. It has received approximately 430 representations from sporting groups and others involved in outdoor pursuits with regard to health and safety issues within the last six months. This includes meetings, letters to Ministers and officials in HSE, and also approximately 350 responses to the Health and Safety Commission's consultation document on proposals for work at height regulations. HSC/E is currently considering these and other responses to the consultation document before putting final proposals to Ministers. I also refer the hon. Member to the answer given to the hon. Member for Bedfordshire North East on the 26 April 2004, *Official Report*, column 847–48W.

Pension Credit

Mr. Willetts: To ask the Secretary of State for Work and Pensions what his most recent estimate is of the average time between a pensioner submitting an application for pension credit and receipt of the first payment. [172003]

Malcolm Wicks: The information is not available in the form requested. However, the average time taken to clear Pension Credit applications in March was 9.6 working days, running from the time when all the necessary evidence has been obtained from the customer to the point at which a decision on the application is made. Payment will normally follow within a few days.

Mr. Willetts: To ask the Secretary of State for Work and Pensions whether his Department plans to reduce the length of the pension credit application form. [172006]

Malcolm Wicks: The pension credit application form is kept under review and improved where necessary, most recently in April this year. There are no current plans to fundamentally alter its format or length. The application process for pension credit has been designed to be straightforward and the majority of application forms are completed for the customer over the freephone application line.

Mr. Webb: To ask the Secretary of State for Work and Pensions pursuant to his answer of 4 May 2004, *Official Report*, column 1461W, on pensions, if he will estimate the effects of this reform in 2006–07 on the number of recipients of pension credit. [173397]

Malcolm Wicks: It is estimated that under the suggested reform there would be 1,100,000 fewer recipients of pension credit in 2006–07 (rounded to the nearest 100,000) than under the existing system.

EDUCATION AND SKILLS

Adult Learning

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what funding will be provided for adult learning in colleges over the next four years. [171890]

Alan Johnson *[holding answer 12 May 2004]*: The Department allocates funds to the Learning and Skills Council for the provision of education and training in the post-16 learning and skills sector. The Department does not provide a specific budget to the LSC for adult learning in further education colleges. It is for the Learning and Skills Council to determine for itself the right level of investment in further education colleges for the provision of adult learning from the funds allocated to it for learning participation. Mark Haysom, the Council's Chief Executive, will to write to the hon. Friend on this matter. A copy of his reply will be placed in the House Library.

Broadband

Malcolm Bruce: To ask the Secretary of State for Education and Skills pursuant to his answer of 29 April, *Official Report*, column 1253W, on broadband, if he will

list the schools which *(a)* have and *(b)* do not have access to broadband connectivity, broken down by type of local authority in which they are located. [173096]

Mr. Charles Clarke: My Department does not hold the information requested as collection would incur disproportionate costs. I provided available information on the proportion of rural schools with broadband connections at August 2003 in my response to PQ 168668, on 29 April, *Official Report*, column 1253W.

Capital Modernisation Fund

Mr. Kaufman: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Manchester, Gorton. [167442]

Mr. Charles Clarke: Five Capital Modernisation Funded UK online centres have been established in Manchester, Gorton.

Mr. Pike: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Burnley. [167932]

Mr. Charles Clarke: Four Capital Modernisation Funded UK online centres have been established in Burnley.

Mr. Pike: To ask the Secretary of State for Education and Skills how much money has been allocated to Burnley from the Capital Modernisation Fund. [167934]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Mr. Hendrick: To ask the Secretary of State for Education and Skills how much money was allocated to Preston from the Capital Modernisation Fund. [168121]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Mr. Meacher: To ask the Secretary of State for Education and Skills how much money was allocated to Oldham West and Royton from the Capital Modernisation Fund. [170928]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Mr. Benton: To ask the Secretary of State for Education and Skills how much money has been allocated to Bootle from the Capital Modernisation Fund since its establishment. [171128]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Mr. Kaufman: To ask the Secretary of State for Education and Skills how much money has been allocated to Manchester, Gorton from the Capital Modernisation Fund. [167432]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Computer Learning Centres (Birkenhead)

Mr. Frank Field: To ask the Secretary of State for Education and Skills how many capital modernisation fund computer learning centres have been established in Birkenhead. [166322]

Mr. Charles Clarke: Four capital modernisation fund computer learning centres have been established in Birkenhead.

These are at:

Arch Initiatives, Oliver Street East;

Birkenhead Central Library, Borough Road;

Encore Computer Training, Odyssey Business Centre; and

Livingstone Street Play and Community Centre, St. Anne's Street.

Consultants

Bob Spink: To ask the Secretary of State for Education and Skills how much his Department and its agencies and non-departmental public bodies spent on external consultants and advisors in each of the last three years. [171877]

Mr. Charles Clarke: This Information could be supplied only at disproportionate cost.

Education (Heywood and Middleton)

Jim Dobbin: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Heywood and Middleton. [168507]

Mr. Charles Clarke: Thirteen Capital Modernisation Funded UK online centres have been established in Heywood and Middleton.

Jim Dobbin: To ask the Secretary of State for Education and Skills how much money was allocated to Heywood and Middleton from the Capital Modernisation Fund. [168509]

Mr. Charles Clarke: Capital modernisation funding is awarded to individual projects. Projects often span constituency boundaries and therefore the information is not available on the basis requested.

Education Maintenance Allowance

Colin Burgon: To ask the Secretary of State for Education and Skills what estimate he has made of the cost of introducing the educational maintenance allowance in schools in England. [173394]

Mr. Ivan Lewis: The Education Maintenance Allowance Scheme will be available in colleges as well as schools. The Department estimates the overall cost for the next three financial years to be:

2004–05—£275 million

2005–06—£403 million

2006–07—£476 million

These estimates take account of the phased roll-out to one cohort at a time and the cost of administering, promoting and evaluating the scheme. They take account of new estimates of the population of young people and household income distribution.

Education Services

Mr. Gordon Marsden: To ask the Secretary of State for Education and Skills how much public funding has been spent on computers for schools in Blackpool South in each of the last seven years. [173067]

Mr. Charles Clarke: My Department does not collect information on school spend on computers at constituency level. However, Blackpool South is in Blackpool LEA and in the last seven years schools in Blackpool have benefited from the following funding through the Standards Fund grant for ICT (including match funding from the LEA):

£

	Allocation to Blackpool LEA
1998–99	233,891
1999–2000	376,443
2000–01	471,538
2001–02	531,056
2002–03	750,176
2003–04	774,460
2004–05	1,021,894

Mr. Jenkins: To ask the Secretary of State for Education and Skills how much public money has been spent on computers for schools in *(a)* Tamworth constituency and *(b)* Staffordshire in the last five years. [173281]

Mr. Charles Clarke: My Department does not collect information on school spend on computers at constituency level. However, Tamworth is in Staffordshire LEA and in the last five years schools in Staffordshire have benefited from the following funding through the Standards Fund grant for ICT (including match funding from the LEA):

	Allocation to Staffordshire LEA (£)
2000–01	3,000,000
2001–02	4,383,181
2002–03	6,933,997
2003–04	6,257,291
2004–05	8,262,812

FE Colleges

Rob Marris: To ask the Secretary of State for Education and Skills whether it is his policy for per capita funding for 16 to 18 years old students attending further education colleges to be the same as that for 16 to 18 year old pupils attending state schools; and if he will make a statement. [169471]

Alan Johnson: The government has set out its investment plans for 2003–04 to 2005–06 to support its Success for All strategy to reform further education and training. These plans enable the Learning and Skills Council to increase funding for further education significantly. For the academic year 2003–04, core funding rates per qualification increased by 3 per cent. for school sixth forms and 4.5 per cent. for further education colleges (setting aside the impact on rates of changes to targeted funds for pay and staff training and teachers' pension funding). Our expenditure plans to 2005–06 should see that trend continue.

Headquarters Staff

Mr. Letwin: To ask the Secretary of State for Education and Skills pursuant to his answer of 19 April 2004, *Official Report*, column 41W, how many headquarters staff there were in his Department as at 17 March. [171391]

Mr. Charles Clarke: As at 1 April 2004, my Department employed 4,487 staff. Staffing numbers are produced quarterly.

Mr. Letwin: To ask the Secretary of State for Education and Skills pursuant to his answer of 19 April 2004, *Official Report*, column 41W, on headquarters staff, what information is being provided to staff regarding plans to reduce the number of headquarters staff in his Department; and if he will place a copy of that information in the Library. [171409]

Mr. Charles Clarke: Staff received the latest in the series of messages from the Permanent Secretary on 30 April 2004 which set the context for the changes and explained how the reductions will be achieved. In addition, staff have been given information on the Human Resource policies to support the transition. Senior managers have written to staff in their parts of the Department and are discussing the changes with them. A copy of the Permanent Secretary's message will be placed in the House of Commons Library.

Mr. Letwin: To ask the Secretary of State for Education and Skills pursuant to his answer of 19 April 004, *Official Report*, column 41W, on headquarters staff, when he expects the first reductions in the number of headquarters staff in his Department to be made. [171410]

Mr. Charles Clarke: The Department plans to reduce its size by 850 posts by April 2006 and a further 610 posts by April 2008, based on the full time equivalent staff in post, figures as at October 2003 (4660). Reductions will be spread throughout that period and the Department intends to make the first reductions of staff by the end of 2004.

Mr. Letwin: To ask the Secretary of State for Education and Skills pursuant to his answer of 19 April 2004, *Official Report*, column 41W, on headquarters staff, what discussions he has had with trade unions regarding his plans to reduce the number of headquarters staff in his Department. [171411]

Mr. Charles Clarke: I met the Trade Unions in my Department on 25 March 2004 and plan to do so again in June.

More generally there have been regular and constructive discussions between management and the unions about the reductions and how they will achieved.

Information and Communication Technologies (Preston)

Mr. Hendrick: To ask the Secretary of State for Education and Skills how many Capital Modernisation Fund computer-learning centres have been established in Preston. [168119]

Mr. Charles Clarke: 16 Capital Modernisation Funded UK online centres have been established in Preston.

Modern Apprenticeships

Rob Marris: To ask the Secretary of State for Education and Skills how much of the 2004–05 budget for Modern Apprenticeships is allocated to large businesses to convert their existing training for young employees into Modern Apprenticeship qualifications; and what proportion this represents of the total Modern Apprenticeship training budget allocation. [169467]

Mr. Ivan Lewis: This is a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Friend with this information and a copy of his reply will be placed in the Library.

Truancy

David Davis: To ask the Secretary of State for Education and Skills how many children in the East Riding of Yorkshire played truant from school in each of the last five years. [171791]

Mr. Miliband: The information requested is as follows:

Number of pupils that missed at least a half day due to unauthorised absence in schools in East Riding of Yorkshire

Academic year[1]	*Primary schools*	*Secondary schools*
1998	1,844	3,853
1999	1,419	3,643
2000	2,013	4,171
2001	1,766	2,875
2002	1,956	3,805
2003	1,725	4,025

[1] September to May

Percentage of pupils that missed at least a half day due to unauthorised absence in schools in East Riding of Yorkshire

Academic year[1]	*Primary schools*	*Secondary schools*
1998	7.67	20.36
1999	6.07	18.84
2000	8.31	20.97
2001	7.21	14.26
2002	8.07	18.34
2003	7.62	19.20

[1] September to May

HEALTH

Anti-psychotic Drugs

Mrs. Helen Clark: To ask the Secretary of State for Health (1) how many items of *(a)* anti-psychotic drugs excluding atypicals and *(b)* atypical anti-psychotic drugs were prescribed in (i) January to March 2000 and (ii) January to March 2003; [172417]

(2) how many anti-psychotic drug items were prescribed in *(a)* January to March 2000 and *(b)* January to March 2003. [172418]

Ms Rosie Winterton: The information requested is shown in the table. The data covers prescription items dispensed in the community in England only. It does not cover prescription items dispensed in hospitals/mental health trusts or private prescriptions.

Number of prescription items (thousands) of anti-psychotics dispensed in the community in England January to March 2000 and January to March 2003

Prescription items (thousands)

	January to March 2000	*January to March 2003*
Anti-psychotics excluding atypicals	953.5	574.4
Atypical anti-psychotics	244.5	701.2
Total anti-psychotics	1,198.1	1,275.6

Notes:

1. The prescription information is from the Prescription Cost Analysis system and is based on a full analysis of all prescriptions dispensed in the community, i.e. by community pharmacists and appliance contractors, dispensing doctors and prescriptions submitted by prescribing doctors for items personally administered in England. Also included are prescriptions written in Wales, Scotland, Northern Ireland, and the Isle of Man but dispensed in England. The data do not cover drugs dispensed in hospital or private prescriptions.
2. Antipsychotics are defined in the table as British National Formulary paragraph 4.2.1 "Antipsychotic drugs". Antipsychotic depot injections (BNF paragraph 4.2.2) are not included in this data.

Asylum Seekers (Health Screening)

Mr. Fallon: To ask the Secretary of State for Health how many asylum claimants refused the offer of basic health screening in the last 12 months for which figures are available. [171856]

Dr. Ladyman: The information requested is not available on a national basis. Data collected locally shows that health screening was refused by around one per cent. (28 of 2,406) of asylum claimants who were received at the East Kent induction centre during the last six months. A new system of collating data was introduced in autumn 2003, and local information for a 12-month period could only be provided at disproportionate cost.

Clinical Negligence

Mrs. Iris Robinson: To ask the Secretary of State for Health (1) what plans he has to bring forward a bill on clinical negligence; and if he will make a statement; [171761]

(2) which of the recommendations of the Chief Medical Officer's report, Making Amends into Medical Negligence, have been implemented. [171762]

Ms Rosie Winterton: The Department is reviewing the responses to the consultation document 'Making Amends'. It is intended to publish a statement of policy later this year, setting out how the National Health Service response to clinical negligence will change in the

future. Following this, the Department intends to introduce the changes which require primary legislation as soon as Parliamentary time allows.

Competent Authorities (EU Accession States)

Miss McIntosh: To ask the Secretary of State for Health pursuant to the answer of 29 April 2004, *Official Report*, column 1222W, on competent authorities (EU accession states), when he expects to receive from the European Commission a list of competent authorities operating in the accession countries in respect of the health and social care profession. [172101]

Mr. Hutton: The European Commission has undertaken to provide this information within the next month. Meanwhile, it has advised that the competent authorities are the Health Ministries of the Member States concerned.

Correspondence

Mr. Hawkins: To ask the Secretary of State for Health when he will respond to the letter he has received from Mr. C.J. Ray of Ash Vale, Surrey, a constituent. [172796]

Ms Rosie Winterton *[holding answer 13 May 2004]:* A reply was sent to Mr. Ray on 10 May 2004.

Dentistry

Dr. Richard Taylor: To ask the Secretary of State for Health what measures he is taking to ensure that NHS dentists understand the detail of the new NHS contract. [169817]

Ms Rosie Winterton *[holding answer 4 May 2004]*: This Government is committed to rebuilding and restoring National Health Service dentistry to improve the oral health of the Nation. The proposals in the Health and Social Care (Community Health and Standards) Act 2003 represent the most radical reform of NHS dentistry since 1948. Our proposals for NHS dentistry will underpin a modernised, high-quality primary dental service provided through contracts between primary care trusts (PCTs) and dental practices. The service will be properly integrated with the rest of the NHS providing better access to services and an improved patient experience.

We have made considerable progress on implementation. We have consulted widely with representatives of stakeholders on the framework proposed for the new primary dental services. The consultation period ended on 30 April and we are considering the responses received and will use them to inform implementation plans.

The Department, supported by the special health authority shadow arrangements we put in place last year, will ensure that the NHS, both strategic health authorities and their PCTs, have the information they need to open meaningful discussion with their potential local providers of primary dental services to establish contracts for the provision of NHS dentistry in the new world. PCTs will be supported in this through the national primary and care trust development programme (NatPaCT) and by the shadow special health authority.

The underpinning principles on which we are working were set out in a letter from the Chief Dental Officer to all dentists in England in January 2004, copies of this letter have been placed in the Library. Now that the consultation on the framework proposals is over, the Department plans to communicate directly with dentists in England on a regular basis to keep them informed of developments.

Eating Disorders

Brian Cotter: To ask the Secretary of State for Health what additional funding his Department has made available to support the implementation of the new National Institute for Clinical Excellence guidelines relating to the treatment of eating disorders. [172477]

Ms Rosie Winterton: Funding to meet recommendations of the National Institute for Clinical Excellence has been included in the allocations notified to primary care trusts for the period 2003–04 to 2005–06. This funding is not separately identified.

Fluoride

Mr. Etherington: To ask the Secretary of State for Health if he will make a statement on the availability of routine NHS dental treatment to remove the physical manifestations of dental fluorosis. [172111]

Ms Rosie Winterton: Dental fluorosis is characterised by a flecking or more rarely a mottling of the teeth, which may leave some people concerned about the appearance of their teeth, although they are endowed with the extra resistance to decay offered by exposure to fluoride.

The report, A Systematic Review of Water Fluoridation, published by the University of York in October 2000 estimated that only 12.5 per cent, of cases of dental fluorosis were the cause of aesthetic concern. Often the effects can be ameliorated by dental polishing or alternatively National Health Service patients can, if clinically appropriate, have veneers fitted to the front of the affected teeth.

General Practitioners

Miss McIntosh: To ask the Secretary of State for Health how many and what percentage of general practitioners *(a)* work part-time, *(b)* will retire in three years' time and *(c)* have indicated that they are prepared to work out of hours under the new general practitioner contract. [171507]

Dr. Ladyman: Of the 33,564 all general practitioners employed in the National Health Service as at September 2003 8,687 or 25.9 per cent, were part-time.

We do not collect information on the number of GPs who will retire in three years' time. Neither do we centrally collect any information on the workings of local out of hours services. Strategic health authorities have responsibility for the performance management of their primary care trusts in their delivery of out of hours services.

Health Services

Mr. Borrow: To ask the Secretary of State for Health how many rapid access chest pain clinics there are in South Ribble. [171270]

Miss Melanie Johnson: Lancashire Teaching Hospitals National Health Service Trust has rapid access chest pain clinics at both the Royal Preston Hospital and Chorley and South Ribble Hospital. Both clinics are meeting the national service framework two week target for patients to be seen from date of referral by a General Practitioner.

Mr. Borrow: To ask the Secretary of State for Health (1) how many residents in South Ribble aged over 60 years have benefited from the abolition of charges for eye tests; [171272]

(2) how many senior citizens in South Ribble have access to free eye tests. [171279]

Miss Melanie Johnson: I refer my hon. Friend to the response I gave to my hon. Friend the Member for Workington (Tony Cunningham) today.

Mr. Borrow: To ask the Secretary of State for Health what changes there have been to NHS waiting list times in the last seven years for residents of South Ribble. [171275]

Miss Melanie Johnson: Information most closely associated with place of residency is not collected on a constituency level, but at a health services commissioner level.

Data are shown as follows for the South Lancashire Health Authority for the period 1997 to 2002 and the Chorley and South Ribble and West Lancashire Primary Care Trusts for 2003.

In-patient waiting list in months

Mr. Borrow: To ask the Secretary of State for Health how many residents in South Ribble awaiting heart surgery have had the option of choosing an alternative hospital for quicker treatment in the last 12 months. [171268]

Miss Melanie Johnson: This information requested is not collected centrally.

Mr. Pickthall: To ask the Secretary of State for Health how many residents in West Lancashire aged over 60 years have benefited from the abolition of charges for eye tests. [171547]

Miss Melanie Johnson: I refer my hon. Friend to the response I gave to my hon. Friend, the Member for Workington (Mr. Cunningham) today.

Tony Cunningham: To ask the Secretary of State for Health (1) how many senior citizens in Workington constituency have access to free eye tests; [170704]

(2) how many residents in Workington constituency aged over 60 years have benefited from the abolition of charges for eye tests. [170705]

Miss Melanie Johnson: Data for the number of sight tests by constituency or by the number of senior citizens is not collected centrally.

The total number of sight tests paid for by Cumbria and Lancashire Strategic Health Authority in the year 2002–03 for those aged 60 and over was 189,100.

The total number of eligible for a free eye test for those aged 60 and over was 429,300. Sight tests cannot be equated to the number of patients.

Department of Health form QMCW.

Tony Cunningham: To ask the Secretary of State for Health how many residents in Workington constituency awaiting heart surgery have had the option of choosing an alternative hospital for quicker treatment in the last 12 months. [170711]

Miss Melanie Johnson: This information is not collected centrally.

Tony Cunningham: To ask the Secretary of State for Health if he will make a statement on the levels of elective admissions to the NHS in Workington constituency in the past five years. [170712]

Miss Melanie Johnson: The information requested is shown in the table.

Count of in-year elective (waiting time, booked, planned) admissions—Primary care trust of responsibility—5D6 West Cumbria PCT—NHS Hospitals, England 1998–99 to 2002–03

PCT of responsibility	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
5D6 West Cumbria PCT	16,395	16,163	16,579	16,577	16,613

Notes:
1. An in-year admission is the first period of in-patient care under one consultant within one health care provider, excluding admissions beginning before 1 April at the start of the datayear. Periods of care on-going at the end of the datayear (unfinished admission episodes) are included. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).

Hospital Episode Statistics (HES), Department of Health.

Tony Cunningham: To ask the Secretary of State for Health how much public funding has been spent on heart disease and cancer care in Workington constituency in each of the last five years. [170716]

Miss Melanie Johnson: The information requested is not collected centrally. Allocation of funding for particular treatments are matters for local primary care trusts.

Tony Cunningham: To ask the Secretary of State for Health how much public funding has been spent on health in Workington constituency in each of the last seven years. [170718]

Miss Melanie Johnson: The information is not available in the format requested. Expenditure per weighted head of the population in the Cumbria and Lancashire Strategic Health Authority (SHA) area, which includes the constituency of Workington, has increased from £600.03 in 1997–98 to £1,173.57 in 2002–03 (the latest year available). This does not represent the total expenditure per head as an element of health expenditure cannot be identified by SHA area.

Hip Fractures

Rob Marris: To ask the Secretary of State for Health what steps his Department is taking to *(a)* raise public awareness of osteoporosis and *(b)* reduce the number of avoidable hip fractures. [169468]

Dr. Ladyman: A considerable amount of work is under way which will help to raise general awareness of osteoporosis, for example, The National Institute for Clinical Excellence is to develop two clinical guidelines and a technology appraisal to provide the best available evidence of what is effective in:

the assessment and prevention of falls in older people;

the assessment of fracture risk and the prevention of osteoporotic fractures in individuals at high risk; and

the prevention and treatment of osteoporosis

The clinical guideline on the assessment and prevention of falls in older people is currently out for consultation. Although osteoporosis does not cause falls it significantly increases the likelihood of a fracture when a fall happens.

The falls guideline will provide recommendations for good practice that are based on the best available evidence of clinical and cost effectiveness. It is due to be completed in August this year. A second clinical guideline has been commissioned to look at the assessment of fracture risk and the prevention of osteoporotic fractures in individuals at high risk.

We know it is the fractures which result from osteoporosis which can lead to pain, disability, greatly reduced quality of life and premature death. This guideline will look at all groups of people recognised to be at high risk of osteoporotic fracture. It will examine both interventions used to prevent an initial fracture and those used to prevent subsequent fractures where one has already occurred.

It will cover care from primary and secondary National Health Service healthcare professionals who have direct contact with and make decisions about the care of high risk individuals. It will look at areas where collaboration is needed between primary and secondary NHS services. Although it does not specifically cover areas outside the NHS, it will be relevant to practice in non-NHS residential and nursing homes, social services and the voluntary sector. This guideline will build on and where necessary extend the work already completed around osteoporosis. It is due to be completed in June 2005.

Rob Marris: To ask the Secretary of State for Health what *(a)* number and *(b)* percentage of patients who suffered a hip fracture died as a consequence of the fracture in (i) 2001–02 and (ii) 2002–03. [169469]

Dr. Ladyman: Numbers are not available on patients who die specifically from hip fractures. However there is information on the number of deaths with the main injury of hip fracture and also with an underlying cause of osteoporosis.

Information on the number of hospital episodes of patients admitted with hip fracture is shown in the tables.

Number of deaths with underlying cause of death of Osteoporosis[1] persons, England and Wales 2001–02

	Number of deaths
2001	11,542
2002	11,605

[1] ICD-10 codes M80-M81

Number of deaths with main injury of Hip fracture[1] persons, England and Wales 2001–02

	Number of deaths
2001	2,214
2002	2,151

[1] ICD-10 codes S72.0-S72.2

These two groups are mutually exclusive.

Count of finished admission episodes primary diagnosis hip fracture (ICD-10 diagnosis code S72)—NHS

NHS hospitals	*Finished admission episodes*
2001–02	63,999
2002–03	70,508

Note:
Finished admission episodes—A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Please note that number of in-patients, as a person may have more than one admission within the year.

Figures have not been adjusted for shortfalls in data (ie the data are ungrossed)

Immigrant Medical Inspections

Mr. Randall: To ask the Secretary of State for Health when the publication Instructions to Medical Inspectors was last updated; and if he will place a copy in the Library. [156839]

Miss Melanie Johnson: "Instructions to Medical Inspectors" was last updated in 1992. It was marked for disclosure "only to persons authorised to receive it", but it is no longer known why this restriction was placed on the document. I am arranging for a copy to be placed in the Library. We will consider the need to review the "Instructions" in the light of any decisions taken as a result of the Cabinet Office review of imported infection.

Mr. Randall: To ask the Secretary of State for Health who is responsible for making appointments of medical inspectors of immigrants; who employs them; who is responsible for the policy to be operated by medical inspectors; and what changes to these arrangements will occur if the Health Protection Agency Bill is enacted. [156841]

Miss Melanie Johnson: Paragraph 1(2) of Schedule 2 to the Immigration Act 1971 (c.77) provides that medical inspectors for the purposes of the Act may be appointed by the Secretary of State, or in Northern Ireland, by the Minister of Health and Social Services or other appropriate Minister of the Government of Northern Ireland in pursuance of arrangements made between that Minister and the Secretary of State.

The Secretary of State's responsibilities for appointing medical inspectors in Scotland was transferred to Scottish Ministers by The Scotland Act 1998 (Transfer of Functions to the Scottish Ministers etc.) Order 1999 (Statutory Instrument 1999 No. 1750).

Medical inspectors are employed by the National Health Service (in England, in some cases by primary care trusts and in others by the Health Protection Agency). The policy to be operated by medical inspectors is governed by the Immigration Act and Immigration Rules (HC 395 as amended) and is the joint responsibility of the Home Office (which is responsible for immigration policy) and the Department of Health and the devolved administrations (which are responsible for health policy).

Paragraph 3 of Schedule 3 to the Health Protection Agency Bill will allow the Secretary of State to direct that his function of appointing medical inspectors is also exercisable by such persons specified in the direction who exercise functions relating to health in England or Wales. The intention is to use this power to delegate the appointment of medical inspectors to the National Assembly for Wales in Wales, and to the Health Protection Agency in England. Such delegation takes account of the fact that arrangements for identifying medical inspectors are best made locally. The Bill does not change the responsibility for the policy operated by medical inspectors.

NHS (Road Traffic Matters)

Mr. Greg Knight: To ask the Secretary of State for Health how many persons employed by or on behalf of the NHS undertake work relating to road traffic matters, including alleged speeding offences of ambulance drivers; and what the annual salary cost thereof to public funds was in 2003–04. [171036]

Ms Rosie Winterton *[holding answer 5 May 2004]:* The information requested is not collected centrally.

However, the Department is aware that speeding tickets issued to ambulances on emergency journeys are creating extra administration costs in some areas. Officials have already had useful discussions with the Home Office and are working closely with them to provide a workable solution.

NHS Beds (Burnley)

Mr. Pike: To ask the Secretary of State for Health how many NHS beds were available in Burnley in each year since 1997. [167954]

Miss Melanie Johnson: Information on beds is collected on a provider basis from national health service organisations and the latest data available is for the year 2002–03. Beds data for 2003–04 will be published later this year.

Beds data for the relevant trusts is shown in the tables.

Sexually Transmitted Diseases

Mr. Brazier: To ask the Secretary of State for Health what the percentage change in sexually transmitted infections among *(a)* girls and *(b)* boys under (i) 18 and (ii) 16 years in Kent is since 2001. [172213]

Ms Rosie Winterton: The percentage change in the number of sexually transmitted diseases diagnosed in males and females in the under 16, and 16 to 19 age groups in Kent between 2001 and 2002 are shown in the table. The data refer to diagnoses made in genitourinary medicine clinics.

Diagnoses of sexually transmitted infections[1] by gender and selected age groups, Kent: 2001 to 2002

Gender	Age group	2001	2002	Percentage change
Female	16	32	55	72
Male	16	13	11	-15
Female	16–19	553	738	33
Male	16–19	260	310	19

[1] Primary and Secondary syphilis, uncomplicated gonorrhoea, uncomplicated genital chlamydia, genital herpes (first attack) and genital warts (first attack)

Stoke Mandeville Hospital

Mr. Lidington: To ask the Secretary of State for Health if he will make a statement on the time scale for the signing and implementation of the private finance initiative agreement to rebuild Stoke Mandeville Hospital. [172208]

Mr. Hutton *[holding answer 11 May 2004]:* The £46 million redevelopment of Stoke Mandeville Hospital, part of Buckinghamshire Hospitals National Health Service Trust, is expected to reach financial close this month.

CONSTITUTIONAL AFFAIRS

Legal Aid (London)

Simon Hughes: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many people *(a)* applied for and *(b)* received legal aid in Greater London, broken down by borough, in each of the last seven years. [173197]

Mr. Lammy: The Legal Services Commission is unable to answer in full the question asked. The Commission will shortly be able to provide details of the applications received from suppliers for funding, and funding certificates issued but only for the last four years, broken down by its London bid zones which largely equate to the London boroughs. This information will not be a wholly accurate representation of the number of people assisted in each London borough, since applicants can be assisted by lawyers based in different geographical areas from those where the applicants are resident and vice versa.

CULTURE, MEDIA AND SPORT

British Grand Prix

Mr. Boswell: To ask the Secretary of State for Culture, Media and Sport what further consultations with outside interests her Department is holding, in conjunction with other departments, in order to safeguard the long-term position of the British Grand Prix. [172974]

Mr. Caborn: The East Midlands Development Agency is currently leading discussions on behalf of the Government about the developments around Silverstone. These discussions are ongoing. The current negotiations about the retention of the British Grand Prix at Silverstone are part of a commercial deal, and the Government is not directly involved.

Computer File Formats

Mr. Allan: To ask the Secretary of State for Culture, Media and Sport what her Department's policy is in respect of the computer file formats used for the *(a)* distribution and *(b)* archiving of publicly available documents. [173354]

Mr. Caborn: The Department follows the e-GIF standards as set out by the Office of the e-Envoy. The standard formats used for distributing publicly available documents are Microsoft Word and Adobe Acrobat.

Publicly available documents committed to archive are stored on paper as per our obligations under the Public Records Act. The Department is moving to a full electronic document management system and documents held in this system will be stored in their original e-GIF compliant format.

Mayor of London (Meetings)

Simon Hughes: To ask the Secretary of State for Culture, Media and Sport if she will list the official meetings she and her predecessor had with the Mayor of London since July 2000 to discuss matters on London within her Department's responsibilities, and the dates and subject of each meeting. [172205]

Tessa Jowell *[holding answer 11 May 2004]:* Between July 2000 and July 2001 my predecessor met the Mayor of London on 1 occasion in the course of official business:

23 March 2001—Lee Valley meeting

Since July 2001 I have met the Mayor of London on 10 occasions in the course of official business:

24 September 2002—Olympics meeting
16 January 2003—Olympics meeting
22 January 2003—Olympics meeting
13 April 2003—Marathon lead vehicle
15 May 2003—Olympics meeting
20 October 2003—Olympics meeting
28 October 2003—Olympics meeting
23 January 2003—Olympics meeting
10 January 2004—Olympics meeting
16 January 2004—Olympics launch

Simon Hughes: To ask the Secretary of State for Culture, Media and Sport if she will list *(a)* the official meetings she has had with the Mayor of London since July 2000 and *(b)* the dates and subject of each meeting. [170568]

Tessa Jowell *[holding answer 4 May 2004]:* Since July 2001 I have met the Mayor of London on 10 occasions:

24 September 2002—Olympics meeting
16 January 2003—Olympics meeting
22 January 2003—Olympics meeting
13 April 2003—Marathon lead vehicle
15 May 2003—Olympics meeting
20 October 2003—Olympics meeting
28 October 2003—Olympics meeting
23 January 2003—Olympics meeting
10 January 2004—Olympics meeting
16 January 2004—Olympics bid launch

Official Vehicles

John Barrett: To ask the Secretary of State for Culture, Media and Sport what percentage of official vehicles used by her Department are run on *(a)* petrol, *(b)* diesel, *(c)* liquid petroleum gas and *(d)* compressed natural gas. [172780]

Mr. Caborn: The Department for Culture, Media and Sport does not have official vehicles, but uses cars, supplied with drivers, by the Government Car and Despatch Service. Vehicles used by the Royal Parks Agency are either diesel fuelled (40 per cent.) or duel fuelled Petrol/Liquid Petroleum Gas (60 per cent.).

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Advisers/Consultants

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs how much her Department and its agencies and non-departmental public bodies spent on external consultants and advisers in each of the last three years. [172436]

Alun Michael: The information requested is not held centrally and could only be provided at disproportionate cost.

Bovine TB

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what measures are taken to confirm that badgers found to have TB after testing in an animal sanctuary or hospital have been destroyed. [159068]

Mr. Bradshaw: Triple testing of badger cubs for TB in animal sanctuaries or hospitals, is part of a voluntary protocol adopted by responsible wildlife rehabilitation organisations and endorsed by the National Federation of Badger Groups, the Royal Society for the Prevention of Cruelty to Animals, and the Secret World Wildlife Rescue. Cubs testing positive to any of the three TB blood tests must be euthanased under licence from Defra.

Mr. Watson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 29 April 2004, *Official Report*, column 1180W, on badgers, when she expects to decide whether to allow departmental policymakers access to the interim results of the Independent Scientific Group on Cattle TB. [171271]

Mr. Bradshaw: This is currently being considered by Ministers.

BSE

Mr. Waterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the time scale is for the introduction of comprehensive testing for BSE; and if she will make a statement. [170624]

Mr. Bradshaw: The UK already undertakes extensive BSE testing which includes all casualty cattle and fallen stock aged over 24 months; all healthy cattle entering the Over Thirty Months Scheme (OTMS) aged over 42 months and born after 31 July 1996; a random sample of 10,000 older healthy animals entering the OTMS; and any cattle aged over 30 months sold for human consumption (currently limited to a small number of cattle aged 30 to 42 months from herds approved under the Beef Assurance Scheme). Since January 2001, the UK has tested over a million cattle.

Health Ministers are currently considering advice from the Food Standards Agency that the Over Thirty Month rule could be replaced by testing. For practical reasons related to the need to cull cohorts of BSE cases, Rural Affairs Ministers agreed last year that cattle born before August 1996 should remain permanently excluded from the food chain for both domestic consumption and export. Any cattle aged over 30 months sold for human consumption will be tested.

Departmental Staff

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs how many employees in her Department took early retirement and at what total cost, in the last financial year. [170824]

Alun Michael: In 2003–04, 45 Defra employees took early retirement at a total cost of £6,109,000.

33 of these left the Department under the provisions of the Early Departure Scheme, which falls within strand four of the Defra Change programme. Departures consisted of eight SCS, four Grade 6s and 21 Grade 7s. The total cost amounted to 5,204,000.

The remaining 11 employees who took early retirement cost a total of £905,000. They consisted of four HEOs; one SAHO; two EOs; one AO; two typists and one SGB2.

Fisheries

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 27 April 2004, *Official Report*, column 861W, on fisheries, in which member states UK registered fishing vessels have *(a)* an entitlement and *(b)* an historic entitlement to fish within six to 12 miles zones. [172460]

Mr. Bradshaw: All UK registered vessels, except those in the beam trawling fleet with engine powers in excess of 221 kWs, are permitted to fish within the six to 12 mile zone.

Horse Passports

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs when she intends to publish the revised Horse Passport Statutory Instrument. [171387]

Alun Michael: We hope to lay the revised Horse Passport Statutory Instrument later this month.

Parish Councils

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of parish and town clerks she estimates have achieved a relevant qualification in order to help qualify towards their council being a Quality Parish Council. [171390]

Alun Michael: Since the launch of the Certificate in Local Council Administration as the bespoke qualification for town and parish clerks, 55 clerks have qualified while another 450 clerks have requested to take the qualification in the next 12 months representing 6 per cent. of the 7,900 parish and town clerks in England. This figure is based on estimates provided by the Society of Local Council Clerks. This represents an excellent start for such a new professional qualification.

Clerks who have gained the Certificate of Higher Education in Local Policy, provided by the University of Gloucester also meet the relevant Quality Council criteria. Since this course started in 1987 the University estimate that over 450 people have gained the qualification although it is not known how many of the earlier students are still serving as clerks.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of Ordinary Written Questions to her Department were answered within five sitting days of tabling, and what proportion of Questions for a Written Answer on a named day received a substantive answer on that day, in *(a)* the 2002–03 parliamentary session and *(b)* this parliamentary session, broken down by month. [171183]

Alun Michael: Records for Session 2002/03 were not maintained in such a way to enable the Department to extract the information requested without incurring disproportionate costs. I can confirm that the new database does record all the information.

For this parliamentary session up to 30 April 2004 the information requested is below.

Written Questions

	Total Received	Number answered within five sitting days	Percentage answered within five sitting days
27/11/2003–27/12/2003	395	205	51.9
28/12/2003–27/01/2004	478	263	55
28/01/2004–27/02/2004	490	126	25.7
28/02/2004–28/03/2004	590	114	19.3
29/03/2004–30/04/2004	228	80	35

Named Day Questions

	Total Received	Number received a substantive answered on the given day	Percentage answered on the given day
27/11/2003–27/12/2003	69	9	13
28/12/2003–27/01/2004	73	20	27.4
28/01/2004–27/02/2004	73	13	17.8
28/02/2004–28/03/2004	108	13	12
29/03/2004–30/04/2004	45	0	0

Defra endeavours to reply to all parliamentary questions within parliamentary deadlines wherever possible. I refer the hon. Member to the answer given by my right hon. friend the Leader of the House to the hon. Member for Lewes (Norman Baker) on 3 March 2004, *Official Report* column 907W.

Productivity

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs what her policy is for *(a)* increasing the productivity and *(b)* cutting the costs of (i) her Department and (ii) its agencies and non-departmental public bodies. [172181]

Alun Michael: I refer the hon. Member to the answer given by my hon. Friend, the Financial Secretary to the Treasury (Mrs Ruth Kelly) on 10 May 2004, *Official Report*, column, 149W.

FOREIGN AND COMMONWEALTH AFFAIRS

Departmental Expenditure

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs what the cost to his Department has been for *(a)* first and *(b)* business class travel incurred by employees in each of the last three financial years; and which of his Department's staff are entitled to travel *(a)* first and *(b)* business class. [172114]

Mr. Mike O'Brien *[holding answer 13 May 2004]:* Foreign and Commonwealth Office expenditure on First and Business class air travel by its staff during the last three financial years was:

£

Financial year	*First class*	*Business class*
2001–02	723,145	12,392,629
2002–03	675,400	11,684,958
2003–04	377,680	10,983,035

For journeys with a flying time of up to three hours only Senior Management Staff in Pay Band 2 or above may travel business class. Where flights last over three hours Senior Management Staff with Permanent Secretary rank may travel first class, others business class.

Heads of Mission not entitled to first class by grade may travel first class on the last leg of the journey on first arrival at their Post, on the first leg of the journey on final departure from their Post or on their first visit to any other country, to which they are accredited.

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs how much has been spent from his Department's budget towards paying school fees for children of his Department's staff in each of the last three years. [172115]

Mr. Mike O'Brien *[holding answer 13 May 2004]:* During the last three financial years Foreign and Commonwealth Office expenditure on education fees for children of members of staff was:

£

Financial year	*Amount*
2001–02	13,806,197
2002–03	15,990,618
2003–04	17,761,886

The Foreign and Commonwealth Office accounts for 2003–04 have not yet been finalised and may therefore be subject to revision. The published accounts will be expressed in resource rather than cash terms.

Early Retirement

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs how many employees in his Department took early retirement, and at what total cost, in the last financial year. [172194]

Mr. Mike O'Brien: 46 employees of the Foreign and Commonwealth Office took early retirement during the 2003–04 financial year at an initial cash cost of £1,385,153. Ongoing payments to employees who retired before 2003–04 amounted to a further £2,026,971.

The Foreign and Commonwealth Office accounts for 2003–04 have not yet been finalised and may therefore be subject to revision. The published accounts will be expressed in resource rather than cash terms.

Saddam Hussein

Mr. Robathan: To ask the Secretary of State for Foreign and Commonwealth Affairs what effects the *(a)* possibility of Saddam Hussein receiving a capital sentence and *(b)* implications of the European Convention on Human Rights have had on the provision of information by the UK Government to the investigations into Saddam Hussein's alleged crimes. [162066]

Mr. Rammell: On 10 December 2003, the Iraqi Governing Council approved the Statute creating the Iraqi Special Tribunal to try major crimes committed under the former Ba'athist regime. The Transitional Administrative Law signed on 8 March 2004 confirms the establishment of the Tribunal. The Tribunal itself must now be set up and the judges selected.

The UK Government has made it clear that it opposes the use of the death penalty. We were instrumental in securing the suspension of the death penalty in Iraq under Coalition Provisional Authority Order No 7. It will be up to the new Iraqi Government to determine whether this punishment will be reinstated following the transfer of authority. After the transfer of power to the new Iraqi Government, we will continue to lobby against the death penalty.

The UK will consider any request to provide information to the Tribunal consistent with our obligations under the European Convention on Human Rights and our opposition to the death penalty. Iraq is in any event an evidence rich environment, with considerable documentary proof of the atrocities committed by the former regime. The important question is how to ensure that Saddam and other members of his regime suspected of major crimes are tried under an Iraqi process that meets international standards.

Taiwan

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what his policy is on the forthcoming Peace Referendum in Taiwan. [160083]

Mr. Rammell: The referenda failed to get the necessary number of votes to make them valid.

The United Kingdom monitors cross-straits relations closely.

We attach great importance to the avoidance of conflict. We take every appropriate opportunity to convey to the Chinese Government and, through informal channels, to the Taiwanese Authorities our strong opposition to the use of force or any action that raises cross-straits tensions.

United Nations

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs what the *(a)* timetable for the preparation of draft reports, *(b)* consultation period, *(c)* deadlines for submission to reporting bodies and *(d)* provisional dates and locations of public hearings to consider the UK periodic reports for each UN international obligation are; and which (i) Department and (ii) officials have primary responsibility in each case. [171373]

Mr. Rammell: Setting out the situation with regard to all the UK periodic reports for every obligation within the UN framework would incur disproportionate costs. However, it might be helpful to set out the process with regard to one specific area, human rights, as an example of the UK's reporting obligations.

With regard to the six core UN international human rights treaties which require States Parties to submit reports, the timetables for reporting and consideration of reports vary from treaty to treaty and can depend on the workload of, and recommendations expressed by, the relevant treaty monitoring body. Lead responsibility for the UK's reports also varies within Government, but in each case the Foreign and Commonwealth Office is responsible for coordinating material relating to the Overseas Territories and Crown Dependencies.

For the International Covenant on Civil and Political Rights, reporting is required every five years. The UK's last report was submitted in 1999 and examined in October 2001. The relevant treaty monitoring body has asked that the UK submits its next report by 1 November 2006. The Department for Constitutional Affairs is responsible for coordinating the UK's report, directed by officials from within its Human Rights Division.

For the International Covenant on Economic, Social and Cultural Rights, reporting is also required every five years. The UK's last report was submitted in 2001 and examined in May 2002. The relevant treaty monitoring body has asked that the UK submits its next report by 30 June 2007. The Foreign and Commonwealth Office is responsible for coordinating the UK's report, directed by officials from within its Human Rights Policy Department.

For the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, reporting is required every four years. The UK's latest report was submitted on 4 December 2003. A date has not yet been scheduled for the examination in Geneva. The timing of the next report will depend on the recommendations of the relevant treaty monitoring body. The Department for Constitutional Affairs is responsible for coordinating the UK's report, directed by officials from within its Human Rights Division.

For the International Convention on the Elimination of All Forms of Racial Discrimination, reporting is required every two years. The UK's last report was submitted in October 2002 and examined on 6–7 August 2003. The relevant treaty monitoring body has asked that the UK submits its next two reports combined by 6 April 2006. The Home Office is responsible for coordinating the UK's report, directed by officials from within its Race Equality Unit.

For the Convention on the Rights of the Child, reporting is required every five years. The UK's last reports were submitted in 1999 and examined in September 2002 for the UK and 2000 for the Overseas Territories and the Isle of Man. The relevant treaty monitoring body has asked that the UK submits its next two reports combined by 15 July 2007. The Department for Education and Skills is responsible for coordinating the UK's report, directed by officials from within its Children, Young People and Families Directorate.

For the Convention on the Elimination of Discrimination Against Women, reporting is required every four years. The UK's last report was submitted in July 2003. The relevant treaty monitoring body has scheduled an examination of the report for July 2005 in New York and the date of the next report will depend on its recommendations. The Department for Trade and Industry is responsible for coordinating the UK's report, directed by officials from within its Women and Equality Unit.

DEPUTY PRIME MINISTER

Planning

Bob Spink: To ask the Deputy Prime Minister if he will list the occasions when costs have been awarded against *(a)* a local council and *(b)* councillors following an appeal against their refusal to grant planning permission when their decision was to uphold their local plan. [173083]

Keith Hill: The Office of the Deputy Prime Minister does not record such details.

Empty Homes (London)

Simon Hughes: To ask the Deputy Prime Minister how many empty residential dwellings there were in each Greater London borough, in each year since 1997. [173296]

Keith Hill: The available information on empty residential dwellings in Greater London boroughs is presented in the table. This data has been provided from a combination of the Office of the Deputy Prime Minister's Housing Investment Programme return and Housing Corporation's Regulatory Statistical Return.

Total vacant dwellings at 1 April in London boroughs, 1997–2003

	2003	2002	2001	2000	1999	1998	1997
Barking and Dagenham	775	1,117	1,329	2,172	2,005	1,727	1,509

Sources:
ODPM's annual Housing Investment Programme (HIP) returns and the Housing Corporation's annual HAR 10 and Regulatory and Statistical Return (RSR).

Guildford (Council Elections)

Sue Doughty: To ask the Deputy Prime Minister if he will list the letters and reports he has received from the Electoral Commission in relation to the Guildford borough council elections of 1 May 2003. [173299]

Phil Hope: I refer the hon. Member to the answers given on 11 May 2004, *Official Report*, column 211W and 29 April 2004, *Official Report*, column 226W. The statutory evaluation report referred to is the only report or letter that the Government have received from the Electoral Commission on the all-postal pilot election held in Guildford on 1 May 2003.

Homelessness

Simon Hughes: To ask the Deputy Prime Minister how many homeless families there were in each Greater London borough, in each of the last seven years. [173294]

Yvette Cooper: The latest available information reported to the Office of the Deputy Prime Minister about the number of households accepted by each of the London boroughs as eligible for assistance, unintentionally homeless and in priority need is tabled as follows.

Households accepted as homeless and in priority need

	1997–98[1]	1998–99[1]	1999–2000[1]	2000–01[1]	2001–02[1]	2002–03[1]	2003[2]

Housing

Mr. Edward Davey: To ask the Deputy Prime Minister what his Department's definition of affordable housing is. [172879]

Keith Hill: For the purposes of Government funding, a working definition of affordable housing is housing available at social rents (i.e. subject to the rent restructuring regime) or other forms of submarket housing, which can generally only be accessed by existing social tenants or people on waiting lists or others groups specifically identified, such as key workers, with other groups having much lower priority.

For the purposes of planning decisions, guidance (PPG3) puts the onus on local planning authorities to define affordable housing in terms of the relationship between local income levels and housing prices or rents for different types and sizes of housing, and housing for identified groups such as key workers, and for these definitions to be based on an up-to-date assessment of housing needs.

Local Authority Housing (Evictions)

Simon Hughes: To ask the Deputy Prime Minister how many evictions there were from local authority housing stock for rent arrears in *(a)* Greater London and *(b)* each London borough during each of the last three years. [173297]

Keith Hill: The information requested is not held centrally and could be provided only at disproportionate cost.

Milton Keynes and South Midlands Sub-regional Strategy

Mr. Lidington: To ask the Deputy Prime Minister what plans he has to inform local residents in

Buckinghamshire of the results of the examination in public of the draft Milton Keynes and South Midlands sub-regional strategy. [172163]

Yvette Cooper: Once the Public Examination Panel report is completed it will be made available to all participants and posted on the web. Following this there will be a wide consultation for eight weeks, including the Aylesbury area, on any proposed alterations to Regional Planning Guidance as a result of the sub-regional strategy.

Mr. Lidington: To ask the Deputy Prime Minister what the Government's policy is on the relationship between Aylesbury South area and the villages of *(a)* Stoke Mandeville, *(b)* Weston Turville, *(c)* Wendover and *(d)* Aston Clinton in the context of the draft Milton Keynes and South Midlands sub-regional strategy. [172164]

Yvette Cooper: This relationship between Aylesbury and nearby villages is one of a number of issues currently being considered by the independent panel that was appointed to undertake a public examination of the sub-regional strategy. The Government await the outcome of the panel's report before making any decisions.

Mr. Lidington: To ask the Deputy Prime Minister pursuant to paragraph 15 of the Cross-Government Statement (matters 5b and c) on the draft Milton Keynes and South Midlands sub-regional strategy, how many dwellings the Government offices believe should be transferred from the post-2016 to the pre-2016 period. [172165]

Yvette Cooper: The Government made this suggestion as a possible way of assisting with the sustainability of Aylesbury. Precise figures were not specified because this whole matter is for the independent panel to consider and to provide recommendations from all the representations made and the evidence at the public examination.

Vacant/Derelict Land (London)

Simon Hughes: To ask the Deputy Prime Minister how much previously developed land was *(a)* vacant and *(b)* derelict in each Greater London borough, in each year since 1997. [173295]

Keith Hill: The available figures are from borough responses to the National Land Use Database of Previously Developed Land in 1998, 2001 and 2002, tabled as follows. Figures for 2003 will be published later in the summer. Response to the survey is voluntary and not all local authorities make a response every year.

PRIME MINISTER

Regulatory Reform

Mr. Stephen O'Brien: To ask the Prime Minister on how many occasions, and on what dates, he has chaired meetings on regulatory reform since 1997. [173261]

The Prime Minister: I have regular meetings and discussions with ministerial colleagues and others on a wide range of subjects, including on regulatory reform. As with previous Administrations it is not my practice to provide details of all such meetings under exemption 2 of the Code of Practice on Access to Government Information.

Iraq

Mr. Gordon Prentice: To ask the Prime Minister whether any coalition partners in Iraq have disapplied the Geneva Convention in respect of detainees held there; and if he will make a statement. [173006]

The Prime Minister: No. All Coalition partners have consistently stated that they regard themselves as bound by the Geneva Convention in their conduct in Iraq.

Written Answers to Questions

Monday 17 May 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Departmental Computers

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to update computer *(a)* hardware and *(b)* software standard packages used in her Department. [166363]

Alun Michael: The wide range of Defra's responsibilities and its geographic spread result in a variety of computer hardware and software being employed. These are constantly reviewed and updated where necessary in order to ensure they continue to meet business requirements, offer value for money and are fully supportable.

The supply of computer hardware and software standard packages to Defra is currently subject to an outsourcing procurement exercise.

Food Labelling

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the use of the red tractor logo on food produced in the UK. [172451]

Alun Michael: The Red Tractor logo is privately owned and its use on food is licensed by a private company, Assured Food Standards (AFS). The logo denotes foods which comply with standards of production set by AFS or by schemes that AFS has recognised as being equivalent. The Government plays no part in setting those standards nor in validating its operations.

Greenhouse Gases

Mr. Chaytor: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she will take during 2004 *(a)* to increase awareness of the dangers of global climate change and *(b)* to promote education about ways in which (i) citizens, (ii) businesses, (iii) public services and (iv) the media can help the Government to reach its target for cutting greenhouse gas emissions. [171228]

Mr. Morley: The Department provides funding to two key bodies which as part of their activities run programmes to promote energy efficiency and climate change, including advertising schemes, events, marketing, and awards.

The Energy Saving Trust encourages the sustainable use of energy in the domestic and small business sectors. Work includes an Energy Efficiency campaign to encourage domestic consumers to take up energy efficiency measures.

The Carbon Trust aims to enable UK business and public sectors to move towards a sustainable, low carbon economy while maintaining business competitiveness. Their recent "Lifeblood" campaign has had wide coverage.

"Energy Efficiency: the Government's Plan for Action" published on 26 April confirms the Government's commitment to raising awareness on climate change and its links to energy use. As stated in the Action Plan, the Government are exploring the scope for a new climate change information campaign.

The UK has also signed up to Article 6 of the UN Framework Convention on Climate Change (UNFCCC), through which Parties to the Convention have a legally binding commitment to carry out activities on education, public awareness, public access to information, public participation and international co-operation.

At the Eighth Conference of the Parties to the Convention (COPS) in New Delhi, in October-November 2002, the Parties adopted a five-year non-binding Article 6 work programme, known as the New Delhi Work Programme to steer Parties towards implementation of Article 6. As part of this, UK officials are currently involved in the planning stage of a web-based internet clearing house that will act as hub for public users to find out information on Article 6 related activities carried out by different countries.

Milk (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs how many milk processing companies in Lancashire are available for farmers in Lancashire to sell the milk they produce. [172072]

Alun Michael: There are 112 milk processing establishments in Lancashire, approved under the Dairy Products (Hygiene) Regulations 1995. However, producers are not restricted to delivering their milk to purchasers or processors within their county. Farmers in Lancashire can therefore deliver their milk to milk processing companies outside Lancashire.

Orchards

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what advice her Department gives on how many years should elapse before apple trees can be replanted in the same field. [168144]

Alun Michael: Defra has not issued advice on this subject.

Parish Councils

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* parish and *(b)* town councils have been awarded Quality status in (i) Lancashire and (ii) Chorley. [172071]

Alun Michael: To date no applications for Quality status has been received from parish councils or town councils in Lancashire or Chorley. However, the Lancashire and Mersey County Training Partnership

(CTP) has received 14 registrations from clerks who are working towards the Certificate in Local Council Administration. So far one clerk has passed the qualification that was developed in line with the Quality Council Scheme launched in August 2003.

Websites

Mr. Heald: To ask the Secretary of State for Environment, Food and Rural Affairs what the total annual cost of her Department's websites, including those of its agencies, was in the most recent year for which figures are available. [159514]

Alun Michael: The use of websites is now a mainstream of communication for any organisation in the public sector or the private sector and for business units throughout any large organisation. Direct operating costs for the main Defra website (www.defra.gov.uk)—including technical and staff costs associated with hosting of the site, and staff costs for the central team with lead responsibility for updating and maintaining the content of the site—are estimated at around £294,000 for the financial year 2003–04.

Additional costs arise from the activities of a large number of staff in business units across the Department, contributing to the content of the website as part of their communications activities, but an overall cost for this could not be accurately estimated without incurring disproportionate cost.

A number of other websites are operated by the Department and its agencies, for which costs are either covered by the budgets for specific programmes (and not separately identified), or included within the above figures. Detailed information is not held centrally for other websites managed by the Department, its agencies and non-departmental public bodies, and could not be obtained without incurring disproportionate cost.

CULTURE, MEDIA AND SPORT

Community Sports

Mr. Jim Cunningham: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the effects of Government expenditure policy on community sports since 1994. [173478]

Mr. Caborn: The Government has invested over £3 billion Exchequer and lottery funding in sport since 1997. Government policy is to marry mass participation with sporting excellence, as illustrated by the 45 County Sports Partnerships, comprising local authorities, schools, governing bodies of sport and the voluntary sector, established to generate competitive and grass roots sport. Community sport has also benefited from unprecedented investment in facilities, improving community access. To complement this, the Government is investing in coaching and volunteering to deliver community activities. For children and young people the Government is investing almost £120 million this year to deliver the entitlement to high quality PE and School Sport.

Licensing Act

Mr. Austin Mitchell: To ask the Secretary of State for Culture, Media and Sport what consultations were held with the police about the effects of binge drinking on local alcohol and violence problems before the introduction of the Licensing Act 2003; and what consultations are going on now about its implementation. [173665]

Mr. Caborn: Prior to the publication of the White Paper on licensing reform in April 2000 (Cm 4696), the Association of Chief Police Officers ("ACPO") were thoroughly consulted on the related development of the policy. Following the publication of the White Paper, ACPO, the Association of Police Superintendents' Association and the Police Federation engaged in the public consultation, as well as several individual police forces. In developing the legal instructions for the Licensing Bill, ACPO provided advice to officials in weekly meetings. In July 2002, a Licensing Bill Advisory Group was formed which included a wide range of stakeholders, including ACPO, and assisted the Government in preparing the Bill. The Group met on a weekly basis and continued to meet regularly throughout the Bill's parliamentary stages. Since Royal Assent in July 2003, this Group has continued to meet on a monthly basis to discuss issues relating to the implementation of the Licensing Act 2003. In addition, during the House of Commons stages of the Licensing Bill, my right hon. Friend, the Secretary of State also met ACPO to discuss underage drinking and the way in which the Bill dealt with children and the then Minister responsible, the hon. Member for Pontypridd (Dr. Howells), also met ACPO to discuss other general licensing issues. More recently, I have met the police in a Working Group which is examining issues relating to alcohol related violent crime.

Ministerial Visits

Matthew Taylor: To ask the Secretary of State for Culture, Media and Sport if she will list visits made by each minister in the Department between December 2003 and April 2004, broken down by *(a)* date, *(b)* constituency visited and *(c)* cost. [171560]

Tessa Jowell: I have listed visits made by each Minister in my Department, specifying date and constituency visited. The cost of each visit could be provided only at disproportionate cost.

Radio Services

Mr. Boswell: To ask the Secretary of State for Culture, Media and Sport what consultations she has held with the commercial radio sector about the relationship between its activities and proposed commercially-funded community radio stations, with particular reference to *(a)* the protection of the economic viability of existing services, *(b)* the requirement to offer specific and quantifiable evidence of any harm to that viability, *(c)* the establishment of clear and transparent rules for withholding any licence on the basis of harm to viability and *(d)* the interaction of OFCOM and her Department in determining these issues. [172960]

Estelle Morris: A public consultation of the draft community radio Order finished on 20 April 2004. We are carefully considering all the issues raised, including those from the commercial radio sector. In addition, my right hon. Friend the Secretary of State, Ministers and officials have met, or will be meeting, representatives of the Commercial Radio Companies Association to discuss these issues before the Order is laid. Officials will also discuss these views with Ofcom.

Satellite Digital Television

Mr. Boswell: To ask the Secretary of State for Culture, Media and Sport what discussions she has held with broadcasters on the introduction of a free satellite digital television service; and if she will make a statement. [172884]

Estelle Morris: The Department is in ongoing discussions with broadcasters and with Ofcom about the further development of digital television services. Ofcom have indicated that they will consider whether regulatory intervention is needed to secure a viable free-to-view satellite proposition before switchover.

DEFENCE

BAE Systems

18. **Mr. Jack:** To ask the Secretary of State for Defence if he will make a statement on his Department's relations with BAE Systems. [173166]

Mr. Hoon: The Ministry of Defence's relationship with BAE Systems is based on the need to purchase and maintain equipment to meet the requirements of the armed forces affordably and effectively.

BAE Systems is currently the largest defence supplier to the Ministry of Defence. The changing pattern of demand for defence equipment makes it important that the Ministry of Defence works closely with them and other defence suppliers, in keeping with the Government's Defence Industrial Policy.

Our relations with BAE Systems' work force continue to be excellent. I pay tribute to their dedication and commitment.

Defence Logistics

19. **Mr. Kidney:** To ask the Secretary of State for Defence what changes he has made to defence logistics operations in the light of lessons learned from Operation Telic. [173167]

Mr. Ingram: In light of the lessons learned from Operation Telic the Ministry of Defence has taken steps to address issues such as its holding of a range of desert equipments including body armour, clothing and boots. A package of improvements for logistics materiel management has been introduced which will greatly increase our visibility of logistic materiel in theatres of operations.

Future Rapid Effects System

20. **Angela Watkinson:** To ask the Secretary of State for Defence when the Future Rapid Effects System will enter service with the Army. [173168]

Mr. Ingram: The in-service date for Future Rapid Effects System will not be endorsed until the main investment decision, but on current plans, the intention is to introduce early variants into service around the end of the decade.

Iraq

22. **David Taylor:** To ask the Secretary of State for Defence what plans there are to change the *(a)* number and *(b)* composition of British troops serving in southern Iraq; and how regularly this is reviewed. [173170]

Mr. Hoon: We keep under continuous close review the level of forces we require in Iraq. We are currently considering, with other partners, the levels and dispositions of forces in the context of the forthcoming crucial period from the handover of authority to the Iraqi Interim Government on 30 June, through to the election of the Transitional Assembly and Government around the turn of the year.

Claire Ward: To ask the Secretary of State for Defence if he will make a statement on the progress of investigations into allegations of abuse by the military in Iraq. [173169]

Mr. Hoon: Investigations by the Royal Military Police Special Investigations Branch into allegations of abuse continue and as I have already informed the House, I cannot put a precise timeframe on how long these might take. As I said, in my statement last week, it is essential that the integrity of the criminal justice process be maintained. This can involve detailed and lengthy processes, but these are crucial to allow the necessary impartial evaluation of the evidence. As I said last week, two cases have reached an advanced stage with decisions on prosecution pending.

Adam Price: To ask the Secretary of State for Defence whether the legal immunity granted to coalition forces in Iraq from prosecution under local law will continue after the handover of power to the Iraq Governing Council. [162665]

Mr. Ingram: Following the hand over of authority to the Iraqi Interim Government on 30 June 2004, currently we expect that coalition forces will continue to be granted immunity from prosecution under local law by virtue of an amended Coalition Provisional Authority Order 17. However, they will be subject to the jurisdiction of their home state.

Mr. Keetch: To ask the Secretary of State for Defence if he will make a statement on the role of UK forces in protecting *(a)* tankers at ports and *(b)* oil terminals in Iraq. [171419]

Mr. Ingram: Currently coalition forces, including those from the United Kingdom, are working closely with the Iraqis to provide effective protection of both ports and offshore installations within Iraqi territorial waters.

Harry Cohen: To ask the Secretary of State for Defence what arrangements are in place for families of Iraqis detained by British forces to *(a)* have access to information about the detention and *(b)* visit those detained; and if he will make a statement. [172304]

Mr. Ingram: Following the detention of a suspect the individual is taken to the Divisional Temporary Detention Facility. Upon arrival at the detention facility the suspect is provided with a form setting out the reasons for their detention (this has been approved by the International Commission of the Red Cross) and is asked to provide details of a person who he wishes to notify of the detention. The military then inform the person nominated. Internees are entitled to three visits per week by members of their family.

Adam Price: To ask the Secretary of State for Defence if he will name the Iraqi individuals whose treatment by UK armed forces personnel has been the subject of a Special Investigation Branch inquiry, broken down by individuals for whom *(a)* investigations are ongoing, *(b)* the finding is that there is no case to answer and *(c)* a report has been submitted to the Army Prosecuting Authority. [172346]

Mr. Ingram *[holding answer 11 May 2004]:* I refer the hon. Member to the answer I gave him on 19 January, *Official Report*, column 917–18W. In addition the death of Tanik S Mahmud in April 2003 is the subject of an ongoing RAF Police investigation and the deaths of Mr. Zaher in March 2003 and Ghanim Gala'e Hacham Daghir Roomi in January 2004 are the subject of ongoing Royal Military Police investigations. However, it would be inappropriate to disclose the names of living individuals whose alleged treatment has been the subject of a Service Police investigation.

Of the 33 cases I referred to in the statement I made to the House on 4 May 2004, *Official Report*, column 1213, 16 involve alleged ill treatment by members of the UK Armed Forces. Of these, eight are subject to ongoing Service Police investigations, four have been discontinued for lack of evidence and two have been referred to the Army Prosecuting Authority for consideration. In the remaining two cases the police investigation has concluded and legal advice is being sought in relation to what further action might be necessary.

Harry Cohen: To ask the Secretary of State for Defence what the outcome was of the investigation into the deaths of the six Royal Military Police soldiers killed in Iraq on 24 June 2003; whether Her Majesty's Government received a response to it from the families of the men; whether he plans to make public the relevant communications log; and if he will make a statement. [173319]

Mr. Ingram: I refer the hon. Member to the answer I gave him on 12 February 2004, *Official Report*, column 1637W. Although extensive inquiries have been undertaken, the investigation is still ongoing and it remains unclear when it will conclude.

Aircraft Carriers

23. **Mr. Sarwar:** To ask the Secretary of State for Defence if he will make a statement on progress with the aircraft carrier orders placed with BAE Systems. [173171]

Mr. Ingram: The Future Carrier (CVF) programme remains in the Assessment Phase. Ministers are currently considering proposals on the overall CVF programme, the Alliance strategy, and on when to proceed to the Demonstration and Manufacture phases.

Defence Exports

24. **Jim Knight:** To ask the Secretary of State for Defence if he will make a statement on the measures the Ministry of Defence is taking to promote defence exports. [173172]

Mr. Ingram: The Defence Export Services Organisation, within the Ministry of Defence, promotes legitimate defence exports by offering advice and assistance to the United Kingdom defence industry. The organisation invites and hosts foreign delegations at defence exhibitions in the United Kingdom, and provides military support teams in the promotion of military products and services. The Department continues to work for better market access for United Kingdom manufacturers to foreign defence markets.

Joint Strike Fighter

25. **Mr. David Stewart:** To ask the Secretary of State for Defence what recent discussions he has had with the US Administration on the implementation of the Joint Strike Fighter programme. [173173]

Mr. Ingram: The Joint Strike Fighter has been selected to meet our Joint Combat Aircraft requirement to replace our current Harrier aircraft. It will be flown from our new aircraft carriers and from land bases. It will also create thousands of jobs and help to boost our economy. Ministers and officials regularly discuss the progress of the programme with our US partners.

Afghanistan

Patrick Mercer: To ask the Secretary of State for Defence what *(a)* quantity and *(b)* type of observation equipment is deployed for British troops to use in Afghanistan. [153038]

Mr. Ingram: I am withholding information on observation equipment available to British Forces in Afghanistan under Exemption 1 of the Code of Practice on Access to Government Information.

Departmental Procurement

Michael Fabricant: To ask the Secretary of State for Defence what percentage of the *(a)* crockery, *(b)* cutlery and *(c)* glassware procured by his Department over the last five years is of British manufacture. [170797]

Mr. Ingram: For the last five years the Ministry of Defence's requirements for crockery, cutlery and glassware have been procured through the Office of Government Commerce (OGC).

The OGC have provided the following information covering the use of British Manufacture, in percentage terms, over the last five years:

British Manufacture

	Percentage
Crockery	100
Cutlery	100
Glassware	0

Eurofighter

Mr. Gerald Howarth: To ask the Secretary of State for Defence whether his Department will receive a discount on its order for the second tranche of Eurofighters similar to that achieved by the German Defence Ministry. [172318]

Mr. Ingram: Negotiations between partner nations and industry for the second Tranche of Eurofighters (Typhoons) are ongoing. We are working to ensure that the Tranche 2 contract is affordable and soundly based to deliver the required capability.

Flakjackets

Harry Cohen: To ask the Secretary of State for Defence what further investigations his Department has undertaken into the *(a)* reasons and *(b)* those responsible for the flakjackets missing since 1999; what conclusions he has reached; and if he will make a statement. [173318]

Mr. Ingram: I have assumed that my hon. Friend has in mind the National Audit Office Report on Operation Telic, which reported that approximately 200,000 sets of Enhanced Combat Body Armour had been issued since the Kosovo campaign in 1999, but seemed to have disappeared.

I should explain that the figure quoted in the NAO report was an estimate provided for the NAO inquiry of the equivalent number of sets of body armour that would have been issued since 1999. However, the body armour ensemble is not usually issued as a complete set. Instead, units request the number of components required to make up the sets they need (covers, fillers and ceramic plates). The fillers and covers are accounted for as items of consumable stock and are, therefore, usually disposed of locally when they wear out, although items may be returned to stock and re-issued if undamaged. Due to their value, the plates, when surplus to unit requirements and serviceable, are returned to stock for re-issue as the need arises.

In light of the concern raised about the supply of body armour, the Defence Logistics Organisation conducted an audit of Enhanced Combat Body Armour The audit has provided a picture of our current holdings. It shows that current stock holdings account for 66 per cent. of the total number of Enhanced Combat Body Armour components procured since 1992. The remainder will have been consumed over this period as a result of wear and tear, and operational loss.

Future Aircraft Carrier

Mr. Hancock: To ask the Secretary of State for Defence if he will make a statement on the prime contractor for the Future Aircraft Carrier programme. [170330]

Mr. Ingram: I refer the hon. Member to the answer I gave on 5 May 2004, *Official Report*, column 1514W, to my right hon. Friend the Member for Newcastle-upon-Tyne East (Mr. Brown).

Kosovo

Mrs. Mahon: To ask the Secretary of State for Defence whether he has studied the Amnesty International Report published on 6 May 2004, Protecting the Human Rights of Women and Girls Trafficked for Forced Prostitution in Kosovo; what assessment *(a)* he and *(b)* his Department have made of the Report's claims that the international community, including United Kingdom members of KFOR and the UN, make up a significant concentration of these women's clientele; and if he will make a statement. [173235]

Mr. Ingram: The Ministry of Defence has studied the Amnesty International report 'So does it mean that we have the rights?—Protecting the Human Rights of Women and Girls Trafficked for Forced Prostitution in Kosovo'. The report's findings are a matter of grave concern. The Government condemns the exploitation of vulnerable people, and expects UK military personnel to adhere to the rules for conduct on operations. Military personnel breaking these rules are dealt with under the relevant military disciplinary procedures and, depending on the offence, UK criminal law. With the exception of two cases where, as the report recognises disciplinary measures were taken, we are not aware of any involvement of UK military personnel in the activities the report describes.

Nimrod MRA4

Mr. Hancock: To ask the Secretary of State for Defence pursuant to his answer of 5 May 2004, *Official Report*, column 1523W, on the Nimrod MRA4, what plans he has to ensure that, in the event of an eventual favourable decision to continue production of the Nimrod MRA4 aircraft, a workforce with the sufficient skills and product knowledge will be available at Woodford. [172415]

Mr. Ingram: BAE Systems is clearly best placed to manage their workforce to provide the skills and knowledge to meet current obligations and likely future business requirements.

Acceptable design maturity and price are needed before a full production order can be placed. The Ministry of Defence, however, has been approving low risk production activities when it makes sense to do so, where these help maintain essential skills and product knowledge as well as preserve schedule.

Prison Warder Duties

Harry Cohen: To ask the Secretary of State for Defence what qualifications armed forces personnel have in prison warder duties; whether the training they receive for such duties leads to a recognised qualification; and if he will make a statement. [171586]

Mr. Ingram: The Ministry of Defence does not run prisons. However, members of the Adjutant General's Corps Military Provost Staff (AGC(MPS)) receive the relevant training to run the Military Corrective Training Centre (MCTC) in Colchester.

The MCTC is subject to independent inspection and is a National Vocational Qualifications Award accredited custodial care assessment centre. Individual qualifications are not awarded; however close liaison with Her Majesty's Prison Service is undertaken in order that best practice is maintained.

AGC(MPS) also run the Regimental Police course at MCTC. This course prepares soldiers to run the unit guardroom and to provide them with the skills necessary to handle soldiers serving short-term periods of detention in the unit guardroom. The course covers all legal, administrative and welfare aspects of detention and provides a City and guilds Qualification.

Radioactive Material

Norman Baker: To ask the Secretary of State for Defence if he will list the occasions since 1 May 1997 when radioactive material has been unaccounted for, broken down by *(a)* location, *(b)* volume and *(c)* radioactivity level of the material; and whether the material remains missing in each case. [173142]

Mr. Caplin *[holding answer 14 May 2004]:* I will write to the hon. Member and place a copy of my letter in the Library of the House.

RAF (Medical Personnel)

Miss McIntosh: To ask the Secretary of State for Defence what the strength of the RAF Medical Services is, broken down by *(a)* service, *(b)* rank, *(c)* specialisation and *(d)* establishment. [169996]

Mr. Caplin: Tables 1 and 2 show the strength of personnel in the RAF Medical Services, by rank and specialisation. Table 3 details the number of RAF medical personnel by Ministry of Defence establishment. These figures do not include dental officers and other ranks.

Those deployed on operations are not shown separately but are recorded at their home unit.

All figures are correct as at 1 April 2004.

Table 1: Officer ranks

	Specialism			
Rank	*Medical officer*	*Medical support*	*Princess Mary Royal Air Force Nursing Service*	*Total*
Air Vice Marshall	1	—	—	1

Totals	437	1,273	1,710

RAF Bases

Mr. Beith: To ask the Secretary of State for Defence what proportion of the savings projected from the transfer of functions from RAF Boulmer to RAF Scampton are assumed to derive from savings in *(a)* personnel costs, *(b)* maintenance and infrastucture running costs and *(c)* depreciation and capital charges. [172987]

Mr. Ingram: The Prime Minister's letter of 21 April to the right hon. Member explained that the estimated net running cost saving from the transfer of functions from RAF Boulmer to RAF Scampton is £13 million a year. Some three fifths of this is attributable to personnel costs and one fifth to maintenance and infrastructure running costs. In accordance with standard accounting practice, depreciation and capital charges were not included in the Investment Appraisal.

Special Service Medal (Nuclear Testing)

Mr. Dismore: To ask the Secretary of State for Defence which members and former members of the UK's armed forces will be entitled to qualify for the Special Service Medal (Nuclear Testing) approved by Royal Warrant SR2002/224; and if he will make a statement. [173529]

Mr. Caplin: None. The Special Service Medal (Nuclear Testing) was instituted by the Government of New Zealand in 2002. Retrospective awards instituted by Commonwealth countries with the permission of Her Majesty The Queen are the sole responsibility of the countries concerned.

Watchkeeper Programme

Mr. Hoyle: To ask the Secretary of State for Defence if he will make a statement on progress with the Watchkeeper programme. [173372]

Mr. Ingram: The Watchkeeper programme will deliver, incrementally, an intelligence, surveillance, target acquisition and reconnaissance (ISTAR) capability using tactical Unmanned Aerial Vehicles. Proposals for the demonstration and manufacture phase of the Watchkeeper project were received from Northrop Grumman and Thales on 18 March 2004 and are currently being assessed. The main investment decision is due later this year.

FOREIGN AND COMMONWEALTH AFFAIRS

British Citizens (Deaths Abroad)

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British citizens were *(a)* killed and *(b)* murdered while living in or visiting another country in each of the last three years, broken down by the country in which the deaths occurred. [171255]

Mr. Mullin *[holding answer 13 May 2004]:* The Foreign and Commonwealth Office collected data on how British citizens died overseas on an informal basis until the end of the 2001–02 Financial Year period. Our records show that the total number of British citizens reported as killed overseas in 1999–2000 was 200, in 2000–01 was 308 and in 2001–02 was 216. Our records show that the total number of British citizens reported as murdered overseas in 1999–2000 was 27, in 2000–01 was 43 and in 2001–02 was 95.

Climate Change

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance he has issued to British embassies and high commissions in respect of encouraging international dialogue about the future of the United Nations Framework Convention on Climate Change. [171230]

Mr. Rammell: We remain committed to the United Nations Framework Convention on Climate Change and its overall aim to stabilise emissions at a level that will prevent dangerous climate change. We are working hard to ensure that ambitious action is taken under its auspices. Our immediate focus is to bring the Kyoto Protocol into force and we are working hard to achieve that. Discussions on further action to follow the Kyoto Protocol commitment period 2008–2012 are not due to start until 2005. However, we regularly brief our posts on the full range of the UK's climate change priorities and are exchanging views informally with other countries on how to promote further effective action on climate change.

Colombia

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received concerning *(a)* threats to and *(b)* abuses of human rights of native tribes in Colombia by (i) paramilitary groups and (ii) drugs lords; and if he will make a statement. [173367]

Mr. Rammell: It is often difficult to distinguish in the field between paramilitary, guerrilla or criminal drug trafficking organisations. Our embassy in Bogota has regular contact with representatives of indigenous groups. In recent months they have met such groups from Amazonas, Choco, the Sierra Nevada de Santa Maria and La Guajira. The meetings covered such groups' treatment by paramilitary and guerrilla groups. Embassy staff have also discussed the situation of indigenous people with representatives of the key UN agencies, the Catholic Church and civil society, and with the Colombian Government.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions *(a)* he, *(b)* senior members of his Department, *(c)* the UK Government's representatives in Colombia, *(d)* the Government's representatives in New York and *(e)* his ministerial colleagues in London have (i) had, (ii) agreed to have and (iii) sought to have with (A) Jan Egeland, the UN Under-Secretary-General for Humanitarian Affairs and Emergency Relief Co-ordinator, (B) other officials of the Office for the Co-ordination of Humanitarian Affairs, (C) members and representatives of the Government of Colombia and (D) non-governmental organisations, in the UK and Colombia, following Jan Egeland's statement of 10 May 2004; and if he will make a statement. [173370]

Mr. Rammell: Our ambassador had three separate meetings with Mr. Egeland during his visit to Colombia, including dinner and a private conversation with him on 8 May. He subsequently met the UN Co-ordinator on 11 May. EU Heads of Mission have a private meeting arranged with the Colombian Foreign Minister on 17 May, and ambassadors from the countries represented at the July 2003 London Meeting on Colombia (the G24) will meet the Colombian Defence Minister on 18 May. Our Ambassador spoke to representatives of British NGOs in Colombia following Mr. Egeland's visit on 10 May. A further meeting with NGOs is planned for later in the month. The foregoing is the extent of our engagement with the UN to date; we are considering our next steps.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs when his Department last assessed the security and humanitarian situation in the Chocó Department in Colombia; and if he will make a statement. [173436]

Mr. Rammell: British embassy officials visited Chocó in February to assess the situation there. During their visit they met a cross-section of society. In addition the ambassador visited the region twice in 2003. He also had a meeting in Bogota to discuss the region's problems with the Bishop of Chocó in March 2004. We are very concerned about the severe social problems the people of Chocó face, including high levels of poverty, illegal drug activity, the presence of illegal armed groups and a vulnerable population. We have raised these with the Colombian authorities. In partnership with UNHCR, we support a project aimed at helping displaced communities there.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made of Colombia's *(a)* economic and *(b)* humanitarian situation; and when this was last updated. [173459]

Mr. Rammell: Our embassy in Bogota provides regular reporting on economic and humanitarian issues, drawing its information from a wide range of governmental and non-governmental sources. The latter includes the Church, local and international NGOs, the business community, academic circles and others. They also supplement their knowledge by travelling around the country to see the situation firsthand. Such reporting is vital as it helps us ensure that our policy towards Colombia is based on the most up to date information and analysis.

Cyprus

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to seek a new settlement plan for the EU for the Cyprus problem which does not involve the indefinite presence in Cyprus of foreign troops. [173224]

Mr. MacShane: We will continue to work with all sides with a view to realising the ultimate objective of achieving a just, lasting and comprehensive settlement so that we can see a reunited Cyprus within the EU.

We believe the UN Secretary General's comprehensive plan established the best possible basis for achieving a settlement. We welcomed the fact that the settlement would have seen a reduction in Greek and Turkish troop numbers to a purely symbolic level. It is now time for reflection on the deal that was rejected and a considered examination of where we go from here.

We look forward to the UN Secretary General's report on the settlement talks as an important first step in that process. In the meantime there is no prospect of a renegotiation of the UNSG's plan, including the provision for a limited number of Greek and Turkish troops to remain. Any change in this would have to be by mutual agreement of the parties concerned.

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to seek a solution to the Cyprus problem on the basis that refugees should, in reasonable time, be allowed the right to return to their homes. [173225]

Mr. MacShane: I refer the hon. Member to the answer I gave him today (UIN 173224).

The UN Secretary General's comprehensive settlement proposals would have enabled a large number of Greek and Turkish Cypriots the right to return to their former homes. Furthermore, every dispossessed owner was entitled to a guaranteed proportion of all their former property under a regime designed to deliver material benefits to all.

We will continue to work with all sides in pursuit of a just and lasting settlement. We continue to believe that the UNSG's plan offers the best possible basis.

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to seek a solution to the Cyprus problem on the basis that Cyprus has control of future migration across its sovereign borders. [173226]

Mr. MacShane: I refer the hon. Member to the answers I gave him today (UINs 173224 and 173225).

An effective migration regime, agreed by the parties and in line with EU principles would be one important element of any future settlement.

European Convention on Human Rights

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions have taken place between the UK Government and *(a)* other European Governments and *(b)* institutions of the European Union regarding the application of the European Convention on Human Rights in Iraq; what the results were; and if he will make a statement. [171553]

Mr. Straw: The Government have not had discussions with other European Governments nor with the institutions of the European Union regarding the application of the European Convention on Human Rights (ECHR) in Iraq. As the Government have said in relation to the current High Court cases brought by the families of 13 Iraqi civilians, the Government's position is that ECHR rights have no application in Iraq.

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what areas of Iraq are under the jurisdiction of the UK for the purposes of *(a)* section 1 of the European Convention

on Human Rights, *(b)* the Geneva Convention and *(c)* UN Security Council Resolution 1511; and if he will make a statement. [171555]

Mr. Straw: The question of whether any areas of Iraq are within the jurisdiction of the UK for the purposes of the European Convention on Human Rights (ECHR) are matters in issue in the current cases before the High Court brought by the families of 13 Iraqi civilians. The Government's position in those cases is that ECHR rights have no application in Iraq. The applicability of the Geneva Conventions and of UN Security Council Resolution 1511 are not matters that turn upon whether jurisdiction is being exercised. Resolution 1511 is a binding Security Council resolution and therefore binds the UK and all other UN member states. The mandate given to the multi-national force to contribute to the maintenance of security and stability in Iraq in resolution 1511 applies to UK forces in those areas where they are operating. The UK accepts that the Geneva Conventions apply to the conduct of UK forces engaged in an armed conflict and that in some areas of southern Iraq, UK forces are exercising sufficient control as an occupying force for the purpose of the application of the Geneva Convention IV.

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs whether UK officials are bound by the European Convention on Human Rights wherever they discharge their duties; and if he will make a statement. [171557]

Mr. Straw: Whether the European Convention on Human Rights applies extra-territorially to the actions of UK officials turns upon whether the United Kingdom can be said to be exercising jurisdiction over an individual in the particular circumstances for the purposes of Article 1 of the Convention in accordance with the jurisprudence of the European Court of Human Rights.

Gibraltar

Mr. Hoyle: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what representations he has made to the Spanish Government concerning cruise liners which have previously docked at Gibraltar being prevented from entering Spanish ports; [171965]

(2) if he will make a statement on the decision by the Spanish Government to refuse entry to the cruise liner Norwegian Dream to the port of Barcelona. [171966]

Mr. MacShane *[holding answer 10 May 2004]:* On the instructions of my right hon. Friend the Foreign Secretary, the British ambassador in Madrid delivered a message to the Spanish Ministry of Foreign Affairs on Friday 30 April and complained again over the weekend of 1–2 May. He complained once more, to the Spanish State Secretary for Europe and the Americas, on 12 May, and to a senior Spanish official on 13 May. He expressed HMG's disappointment and surprise at the Spanish action and stressed how seriously HMG views such hindrance to legitimate business by cruise liners. HMG is in close touch with the Spanish Authorities with a view to achieving an early solution to this problem. I will also raise the issue in meetings with Spanish officials this week.

Honours

Brian White: To ask the Secretary of State for Foreign and Commonwealth Affairs how much time his Department spent dealing with honours in the last year for which figures are available, broken down by Civil Service grade. [173039]

Mr. Straw: Five staff in my Department are employed full-time on honours work: one × D6 (Principal), two × C4 (Higher Executive Officer), one × A2 (Administrative Officer), one × A1 (Administrative Assistant).

In addition, members of the Senior Management Structure (Senior Civil Service) spend a total of approximately six to seven person-weeks in aggregate a year on honours.

Iraq

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what areas of Iraq are under the effective control of the UK. [171554]

Mr. Straw: The UK commands Multinational Division South East (MND SE) which comprises all Coalition military forces in the provinces of Basra, Muthanna, Maysan and Dhi Qar. Troops from 10 states operate in the MND SE Area of Responsibility.

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what his latest estimate is of the amount owed by Iraq in reparations. [171982]

Mr. Rammell: The United Nations Compensation Commission has assessed 98 per cent. of the claims submitted to it for direct losses arising as a result of Iraq's illegal invasion and occupation of Kuwait in 1990. The total amount awarded so far amounts to US$ 48,170,438,256 of which US$ 18,389,089,070.86 has been paid. An amount of US$ 29,781,349,185.20 remains to be paid. Work on assessing the remaining claims is ongoing.

Mr. Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs what payments his Department has made to private military companies working in Iraq. [172695]

Mr. Rammell: The Foreign and Commonwealth Office does not employ any private military companies. It does employ two private security companies to provide armed protection for its staff and assets in Iraq. Payments under these contracts to 31 March 2004 have amounted to approximately £15 million.

Mr. Gordon Prentice: To ask the Secretary of State for Foreign and Commonwealth Affairs what his policy is on encouraging the development of secular political parties in Iraq; and if he will make a statement. [173008]

Mr. Rammell: We fully support the vital role of the UN in helping Iraq prepare for elections in early 2005 to a Transitional National Assembly, as requested by the Iraqi Governing Council. As part of that process, the UN are helping the Iraqis to produce a political parties law which will provide the legal basis for the activities of Iraqi political parties. This and the Transitional Administrative Law will provide the framework in which Iraqis will be free to form political parties and to

compete in elections. The Department for International Development have created a Political Participation Fund for Iraq to increase the opportunities for Iraqi citizens to participate in the democratic process. It is now for the Iraqis to decide what sort of political parties they wish to develop within the legal framework being established.

Official Vehicles

John Barrett: To ask the Secretary of State for Foreign and Commonwealth Affairs what percentage of official vehicles used by his Department are run on *(a)* petrol, *(b)* diesel, *(c)* liquid petroleum gas and *(d)* compressed natural gas. [172766]

Mr. Rammell: The Foreign and Commonwealth Office (FCO) runs two distinct fleets of vehicles. The first is the home fleet run by FCO Services and managed by the Supply Chain Service Delivery Group. Vehicles are situated in London (based at King Charles Street) and at Hanslope Park. London vehicles are used to run the London Messenger and London Car Service; the Hanslope fleet is a diplomatic freight/mail delivery service covering the UK and Europe. The required breakdown of this fleet of vehicles is:

	Percentage
Total number of vehicles (London and Hanslope combined)	36
Petrol	13
Diesel	67
LPG	20

Our vehicle replacement programme for the home fleet pays particular attention to the provision of LPG vehicles in London; this is part of our commitments under the FCO's environmental 'green issues' policy.

The second FCO vehicle fleet is that run by overseas missions in pursuit of diplomatic business, the details we have available on this fleet are as follows:

	Percentage
Total number of vehicles in the FCO Overseas Fleet	1,352
Petrol	45.8
Diesel	33.8
LPG/Hybrid	0.3
Unknown[1]	20.1

[1] Overseas Missions have the option to procure pool vehicles locally.

Productivity

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs what action he is taking to *(a)* increase the productivity and *(b)* cut the costs of his Department and its agencies and non-departmental public bodies. [171881]

Mr. Rammell: I refer the hon. Member to the reply given to him by my honourable Friend the Financial Secretary to the Treasury (Ruth Kelly) on 10 May 2004, *Official Report*, column 149W.

Sudan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will mount an independent investigation with the UN and EU into the role of, and support for, the Janjaweed militias operating in the Darfur region of the Sudan, with specific reference to human rights abuses. [173488]

Mr. Mullin: The Government of Sudan has announced the creation of a national independent human rights committee to investigate alleged human rights abuses in Darfur, with particular focus on the activities of the Janjaweed armed militias. The UK's Special Representative for Sudan is currently in Sudan where he will meet with the head of this committee and senior Government officials to discuss the situation in Darfur.

We are in close contact with the UN Office of the High Commissioner for Human Rights (OHCHR) about Darfur. We are considering the best way to take forward recommendations made following their recent mission to Sudan. We are also working to ensure that the Independent Expert, mandated by 23 April UN Commission on Human Rights decision on Sudan, is appointed as soon as possible. We and our EU partners have made clear that alleged abuses should be thoroughly investigated, and we will continue both to monitor the situation closely and to press the OHCHR to follow up effectively.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with representatives of *(a)* the Sudanese Liberation Army and *(b)* the Justice and Equality Movement about bringing peace to Darfur, Sudan. [173784]

Mr. Mullin: Through our embassy in Khartoum we have been in regular contact with both the Sudanese Liberation Army and the Justice and Equality Movement in the run up to the ceasefire talks in Chad, during the talks, and subsequently. We are urging both groups, and the Sudanese Government, to fully implement the ceasefire agreement, and to ensure unhindered humanitarian access and the protection of civilians, in order to find a sustainable solution to the problems in Darfur in the long-term.

Targeted Assassinations

Mr. George Osborne: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answer of 10 May 2004, on targeted assassinations, question reference 169853, on what basis the Government has determined that the policy of targeted assassinations by the Government of Israel is illegal. [173000]

Mr. Rammell: We recognise Israel's right to defend itself against terrorism but it must act in accordance with the applicable law. We do not consider that Israel's policy of targeted killings is in conformity with its obligations under the Fourth Geneva Convention and international human rights law. In particular, the policy does not appear to meet the conditions required for a killing to be justified as self-defence.

MINISTER FOR WOMEN

Equal Pay

Mr. Denham: To ask the Minister for Women what recent representations she has received from *(a)* trade unions, *(b)* employers and *(c)* other bodies concerning the pay gap between men and women in Hampshire. [171642]

Ms Hewitt: I have had no specific representations concerning the pay gap between men and women in Hampshire. However I have ongoing dialogue with trade unions, employers and others including the Equal Opportunities Commission (EOC) and Opportunity Now concerning action to tackle the gender pay gap. For example, last week I met with over 40 trade union women from across the country to discuss this issue and identify action which builds on what we have already achieved. We have made it easier for employers to pay fairly through EOC toolkits, which have been well received. Recent EOC research shows a significant increase in the number of large organisations undertaking pay reviews which suggest we are on track to meet our Public Service Agreement target of 35 per cent. by April 2006. 41 per cent. of those that had carried out a pay review or were planning to do one said that government policy and publicity had influenced them.

Mr. Denham: To ask the Minister for Women pursuant to the answer of 26 February 2004, *Official Report*, column 486W, on equal pay, what methodology was used to conclude that the gender pay gap in the South East is the second biggest in Great Britain. [171710]

Ms Hewitt: The figure I reported on 26 February 2004 was based on April 2002 figures. Using April 2003 figures shows that the South East had the third largest pay gap of regions in Great Britain. The figures in both cases were taken from the New Earnings Survey (NES), conducted by the Office for National Statistics.

Average earnings are estimated for full-time employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for NES tables. The gender pay gap for each region is derived from the male and female estimates for those regions.

Working Hours

Helen Jones: To ask the Minister for Women what research she has commissioned into the effect of a long working hours culture on women's employment and promotion prospects; and if she will make a statement. [172845]

Ms Hewitt: I have commissioned no specific research into the impact of a long working hours culture on women's employment and promotion prospects, however last year my Department published "Working Long Hours: a review of the evidence" which was commissioned from the Institute for Employment Studies. It is available on the internet at hppt:// www.dti.gov.uk/er/emar.

Its main findings are that 11 per cent. of employees in the UK work long hours (over 48 hours per week). There are clear gender differences with men more likely to work long hours than women. Two thirds of women who work long hours are in managerial and professional occupations (23 per cent. and 40 per cent. respectively).

Through the Work-Life Balance Campaign and the introduction of the right to request flexible working, my Department has sought to demonstrate the benefits of alternative work patterns. Employers who pursue family friendly policies and provide their employees with choice about how they work, report greater motivation and productivity and a reduction in recruitment and retention costs.

In April my Department published research complied by the Office for National Statistics on the first year of the flexible working law. It showed that overall the new flexible working law is proving to have been a huge success. Many more flexible working requests (86 per cent.) are being either fully or partly accepted by employers compared to the rate immediately prior to the new law (77 per cent.). The study can be found at the website mentioned above. 11 per cent. of flexible working requests made since April 2003 were declined, which represents a near halving of the rate of refusal by employers compared with the previous two years. And it suggests the new law has significantly increased employers' willingness to consider employee requests.

The Second Work-Life Balance Baseline Survey of Employers published in 2003 showed that more than nine out of 10 employers agree that people will work best when they can strike a healthy balance between work and the rest of their lives. The report is also available at the website mentioned above. The report also revealed an increase in the provision of flexible working time practices by employers. Significantly this increase was not confined to workplaces of a particular size or in a particular sector or industry.

TRADE AND INDUSTRY

Child Pornography

Brian White: To ask the Secretary of State for Trade and Industry what steps her Department has taken to export the UK model of co-operation between Government, police and industry to tackle child pornography on the internet. [173047]

Mr. Timms: The Department of Trade and Industry attaches great importance to protecting children from illegal or harmful material on the internet. The Government are primarily addressing it through the Home Secretary's Task Force on Child Protection on the Internet. The Department takes part in the activities of the Task Force, and in particular, supports cooperation between Government, law enforcement, industry and other stakeholders to develop self-regulatory responses to problems arising, in order to strengthen the take-up of the internet and the growth of e-commerce. We strongly support the work of the industry-led Internet Watch Foundation.

Child protection on the internet is a common challenge in the UK, Europe and the rest of the world. The UK's approach has served as the model for the EU's main programme to tackle it, the Safer Internet Programme. Since 1999, Safer Internet has funded

over 130 projects across Europe bringing together Government, industry, law enforcement and child protection agencies in the following streams of activity:

hotlines: Safer Internet supports at least one hotline along the lines of the UK's Internet Watch Foundation in each of 17 countries in Europe, allowing users to report internet content they regard as illegal or harmful. INHOPE, based in the UK, is the European hotline coordinating body, responsible for monitoring standards and spreading best practice for these hotlines.

rating and filtering technology: the programme encourages the development of software that empowers users to filter or otherwise limit the amount of unwanted material they receive, as well as ways to measure and benchmark its performance.

promoting cooperation: it has created European-level forums to drive consensus on the challenges and solutions among experts from industry, law enforcement, government, educators, consumer groups, child welfare and other NGOs.

raising awareness: support is offered to initiatives at country, regional or other levels to inform parents and educators of means to use the internet more safely, using techniques based largely on practice developed by members of the Home Office Task Force on Child Protection on the Internet.

UK companies and NGOs are very well represented among the participants in the various projects, and some of them act as coordinators at European level (e.g. for best practice for ways of promoting awareness of self-help techniques).

In March 2004, the European Commission adopted a proposal for Safer Internet Plus, a programme to continue these activities for the next four years. It will increase the international reach of the UK's model approach because it will particularly encourage hotlines and awareness activity in the 10 new member states, and provide resources for the EU to pursue effective cooperation and solutions in international forums and with third countries, especially those which are the origins of a large proportion of illegal, harmful or unwanted material, such as child pornography and spam.

The Government also take opportunities to raise the profile of a cooperative approach to online child protection in international discussions: for example, at the conclusion of the first phase of the United Nations sponsored World Summit on the Information Society in December 2003, the UK, working with its EU partners, strongly supported a statement to the effect that

"all actors in the Information Society should take appropriate actions and preventive measures, as determined by law, against abusive uses of ICTs, such as ... all forms of child abuse, including paedophilia and child pornography..." (Declaration of Principles, para. 59).

As part of its strategy to promote a globally competitive environment for electronic communications businesses, the Department has developed a number of dialogues with other countries' regulators, officials and industry representatives. These discussions have frequently covered the implications of offensive or harmful online material. The Internet Watch Foundation and other leading UK players take part to give a first hand account of the UK's cooperative approach, and also actively pursue their own extensive international contacts, supported wherever possible by the Department of Trade and Industry and other Departments. In addition, meetings recently arranged or to take place within the framework of dialogues with the United States, Japan and Australia will address cooperative solutions to the issue of unsolicited messages (or "spam"), some of which can be linked to child pornography.

Energy Generation

Mr. Ben Chapman: To ask the Secretary of State for Trade and Industry what assessment she has made of the relative efficiency of energy generation by wind power in relation to *(a)* wave power, *(b)* nuclear, *(c)* gas and *(d)* coal generation. [173632]

Mr. Timms: Comparing the efficiency of renewable and non-renewable technologies is difficult. Fuel costs for the majority of renewables are zero, so obtaining the highest level of efficiency is less of a priority than reducing the overall cost of each unit of energy generated. The Department has published estimates of the cost of electricity generation from a variety of technologies by 2020. These come from the 2001 PIU energy review, 2002 Interdepartmental Analysts Group report, and the 2004 Renewables Innovation Review. The following ranges are based upon the lowest and highest estimates from each of these reports:

	p/kWh
Onshore wind	2.0–3.2
Offshore wind	2.0–4.6
Gas	2.0–2.9
Nuclear	2.6–4.0
Marine	4.0–6.2

Equal Pay

Mr. Denham: To ask the Secretary of State for Trade and Industry what assessment she has made of the pay gap between men and women employed by her Department and its agencies in *(a)* Southampton, *(b)* Eastleigh, *(c)* Winchester and *(d)* Romsey constituencies. [171643]

Ms Hewitt: My Department, including the Small Business Service Executive Agency, currently employs no staff in Southampton, Eastleigh, Winchester and Romsey constituencies.

Agency Chief Executives will be replying on behalf of their organisations where they employ staff within the constituencies mentioned. These are Employment Tribunal Service and The Insolvency Service.

Letter from Desmond Flynn to Mr. John Denham, dated 17 May 2004:

The Secretary of State for Trade and Industry has asked me to reply to directly on behalf of The Insolvency Service in respect to your question (2003/2875) asking what assessment have been made of the pay gap between men and women employed by her Department and its agencies in *(a)* Southampton, *(b)* Eastleigh, *(c)* Winchester and *(d)* Romsey constituencies.

In March 2003, The Insolvency Service carried out an Equal Pay audit on a national basis. The Audit along with The Service's action plans setting out proposals for future reviews are available in the House of Commons and published on The Service's website www.insolvency.gov.uk.

Letter from Roger Heathcote to Mr. John Denham, dated 17 May 2004:

You asked the Secretary of State for Trade and Industry what assessment she has made of the pay gap between men and women employed by her Department and its agencies in *(a)* Southampton, *(b)* Eastleigh, *(c)* Winchester and *(d)* Ramsey. I have been asked to reply on behalf of the Employment Tribunals Service (ETS).

ETS undertook an Equal Pay Review in 2003. The Review was undertaken separately for all those staff on London and National pay scales and did not cover the situation in individual offices. The results for staff on our National pay scales, which would include those staff in our Southampton office, showed a differential in favour of males of 5.2% (only 0.2% above the Equal Opportunities Commission benchmark).

Identity Theft

Brian White: To ask the Secretary of State for Trade and Industry what steps her Department is taking to reduce identity theft in areas within the remit of her Department and its agencies. [173052]

Ms Hewitt: The DTI will work closely with—particularly small business—trade unions and others so that a system to combat identify theft maximise the benefits and minimise the compliance costs to law-abiding business and to develop an effective enforcement system that will deal with illegal workers and the majority of businesses that deliberately flout the law.

Effective recruitment procedures are in place to deter identity fraud being used to gain employment within the Department itself.

Imperial Measurements

David Davis: To ask the Secretary of State for Trade and Industry how many prosecutions have been carried out against shopkeepers selling goods in imperial measurements in *(a)* the East Riding of Yorkshire and *(b)* England. [172759]

Mr. Sutcliffe: The Department does not hold comprehensive information on prosecutions carried out by trading standards departments. However, we are aware of five prosecutions of traders selling goods in imperial measurements: one each in Sunderland, Hackney and Sutton and two in Cornwall.

East Riding Trading Standards Department inform us that it has carried out no such prosecutions.

Large Combustion Plants Directive

Mr. Rosindell: To ask the Secretary of State for Trade and Industry if she will make a statement on the likely impact on the UK coal industry of the Large Combustion Plants Directive. [173388]

Mr. Timms: This Department commissioned independent research into the likely impact of the two options for implementing the Large Combustion Plants Directive, by a national plan or by emissions limit values. The results of this study will inform the implementation decision, which has not yet been made. The research report will be published in due course.

Ministerial Visits

Llew Smith: To ask the Secretary of State for Trade and Industry pursuant to the answer of 4 May 2004, *Official Report*, column 1404W, on ministerial meetings/visits, which people and organisations in Japan the Minister of State for Energy, e-Commerce and Postal Services plans to meet or visit; and what matters are to be discussed. [173398]

Mr. Timms *[holding answer 14 May 2004]:* I hope to be able to meet a number of Ministers, senior Government officials and senior representatives from utility power companies responsible for energy, e-commerce and telecommunications issues, including the following;

Mr. Fuji, Chairman of Federation of Electric Power, Mr. Nakagawa, Minister for Economy, Trade and Industry (METI), Mr. Kusaka, Director General, Agency of Natural Resources and Energy, part of the Ministry of Economy and Industry, Mr. Aso, Minister and Mr. Nabekura, Vice-Minister for Policy Co-ordination (International Affairs), Ministry of Public Management, Home Affairs, Posts and Telecommunications, Mr. Abe Senior Vice-Minister, Ministry of Foreign Affairs.

I also hope to meet representatives of British companies operating in Japan.

I shall be having wide-ranging discussions on telecommunications and energy issues, including nuclear and BNFL related issues. I shall also be explaining the changes to the UK nuclear industry described in the Energy Bill and hope to hear an update on Japan's plans for its nuclear energy programme.

Post Office

Mr. Hoyle: To ask the Secretary of State for Trade and Industry if she will instruct Post Office Ltd. not to withhold information requested by hon. Members on closures of local post offices. [172068]

Mr. Timms *[holding answer 10 May 2004]:* Under the public consultation process, Post Office Ltd. supplies extensive information to assist stakeholders and other interested parties in their consideration of post office closure proposals, but detailed financial information is, necessarily, commercially confidential.

David Wright: To ask the Secretary of State for Trade and Industry what advertising is taking place to promote *(a)* Post Office card accounts and *(b)* the use of post offices for the collection of pensions. [172323]

Mr. Timms: The DWP Direct Payment information campaign raises awareness of all the account options for Direct Payment, including bank and building society and Post Office accounts and also accounts that can be accessed through Post Office branches. It is for customers themselves to decide which account will best meet their needs and circumstances.

Post Office Ltd. is responsible for advertising its own services and has undertaken a number of advertising campaigns promoting the banking services which are available at post offices. The current campaign recently launched nationally advertises the banking services of the High Street Banks and the Post Office card account available at post offices.

Post Office Modernisation Fund

Sarah Teather: To ask the Secretary of State for Trade and Industry how much of the Government's Post Office

Modernisation Fund has been spent in Brent since the fund was initiated; and how much has been spent *(a)* to keep post offices open and *(b)* to encourage closures. [172821]

Mr. Timms: Rationalisation is necessary in urban areas where there are too many post offices for all of them to survive on the current levels of business available. Parliament has approved funding of up to £210 million to support Post Office Ltd.'s programme to restructure the urban post office network comprising £180 million to compensate sub-postmasters exiting the business and £30 million for investment in modernising offices.

The administration of the restructuring programme is an operational matter for Post Office Ltd. and I have asked the Chief Executive to reply direct to the hon. Member on how much has been utilised in Brent.

Post Offices (Government Funding)

Chris Ruane: To ask the Secretary of State for Trade and Industry how much Government funding was made available for post offices in *(a)* 2002–03 and *(b)* 2003–04, broken down by local authority; and what spending is planned for 2005–06, broken down by local authority. [172921]

Mr. Timms: The Government's on-going nationwide package of funding for Post Office Ltd. and the post office network amounts to some £2 billion in total since 1999. This funding is not allocated on the basis of local authority boundaries.

Wind Farms

Mr. Ben Chapman: To ask the Secretary of State for Trade and Industry what assessment she has made of the visual impact of wind farms currently in operation. [173633]

Mr. Timms: The Department has made assessments of the visual impact of wind farms currently in operation. Applications for consent to construct wind farms are accompanied by an Environmental Impact Assessment statement, which includes details of visual impact.

INTERNATIONAL DEVELOPMENT

Baku-Tbilisi-Ceyhan Pipeline

Mr. Jenkins: To ask the Secretary of State for International Development what vote was recorded by the UK director of the International Finance Corporation at the 4 November 2004 meeting on the approval for a commercial loan for the Baku-Tbilisi-Ceyhan Pipeline. [172504]

Mr. Gareth Thomas: A decision to support the approval of a loan for the Baku-Tbilisi-Ceyhan (BTC) pipeline was reached by consensus by the shareholders of the International Finance Corporation at the 4 November 2004 Board meeting. No vote was taken. The UK supported the proposed investment in the BTC pipeline as it was felt that both the IFC and EBRD had fully complied with their polices and procedures. DFID also supported the project due to the potential developmental benefits that it will bring to Azerbaijan, Georgia and Turkey.

Although DFID supported the provision of loans for this pipeline, DFID recognises that complex, large-scale projects of this nature raise difficult issues and present risks, including the weak governance environment and the potential social and environmental impacts of the pipeline, which will need to be carefully managed. It is important that both the International Financial Institutions (IFI)s and the international community remain engaged with the implementation of the project going forward so that we can ensure that commitments are delivered. DFID therefore expects the International Finance Corporation (IFC) management to ensure regular independent consultation on monitoring the implementation of the project; encourage enhanced transparency of revenue management; and demonstrate how IFC has learnt from the project.

Departmental Annual Report

Norman Lamb: To ask the Secretary of State for International Development how much the production of his Department's latest annual report cost; how many copies were printed; how many copies of it were sold at its cover price; to whom copies of the report have been provided free of charge; and how many copies were provided free of charge. [171147]

Mr. Gareth Thomas: The Department for International Development (DFID)'s 2004 Annual Report cost approximately £45,000 (estimated figure, not all final invoices have been received) for a print run of 3,050 copies.

600 copies were provided to The Stationary Office Ltd. (TSO) for sale, of which 128 copies have been sold to date at the cover price of £27.00.

As of May 11 2004, 1,478 copies had been distributed free of charge to staff, and external contacts such as other donors, parliamentary and ministerial contacts, NGOs, embassies and high commissions, as well as multilateral organisations such as the UN. This leaves 972 copies to cope with any future demand.

The report is also available to download free of charge from the DFID website www.dfid.gov.uk.

HIPC Initiative

Mr. Bercow: To ask the Secretary of State for International Development if he will list the countries which have now reached decision point in the highly indebted poor countries initiative. [172464]

Hilary Benn: 27 countries have reached Decision Point under the Heavily Indebted Poor Countries (HIPC) Initiative. These countries are Benin, Bolivia, Burkina Faso, Cameroon, Chad, The Democratic Republic of Congo, Ethiopia, The Gambia, Ghana, Guinea, Guinea-Bissau, Guyana, Honduras, Madagascar, Malawi, Mali, Mauritania, Mozambique, Nicaragua, Niger, Rwanda, Sao Tome and Principe, Senegal, Sierra Leone, Tanzania, Uganda and Zambia. Of these countries, 13 have reached Completion Point. These are: Benin, Bolivia, Burkina Faso, Ethiopia, Guyana, Mali, Mauritania, Mozambique, Nicaragua, Niger, Senegal, Tanzania and Uganda.

Nuba Mountains

John McDonnell: To ask the Secretary of State for International Development what aid is being provided to projects to assist the people of the Nuba Mountains. [173652]

Hilary Benn: Since 2003 the Department for International Development has committed more than £3 million through the UN system and international NGOs, in support of projects to assist the people of the Nuba Mountains. Projects supported include joint monitoring of the Nuba Mountains Cease-Fire Agreement, local peace building initiatives and support to basic education.

Productivity

Bob Spink: To ask the Secretary of State for International Development what action he is taking to *(a)* increase the productivity and *(b)* cut the costs of his Department and its agencies and non-departmental public bodies. [171878]

Mr. Gareth Thomas: I refer the hon. Member for Castle Point to the written answer given by the Chief Secretary to the Treasury, the right hon. Member for Brent, South (Paul Boateng) on 10 May 2004, *Official Report*, column 149W.

Statistical Methodologies

Mr. Bercow: To ask the Secretary of State for International Development (1) what the changes are to survey methods and the revisions to statistical estimates in relation to the poverty reduction target for South Asia referred to on page 186 of the 2004 departmental report; [171711]

(2) what the changes in statistical methodologies are which make it impossible to measure firm progress on the target for sustainable poverty reduction in East Asia and the Pacific. [171704]

Mr. Gareth Thomas: The 2000 poverty data are not directly comparable with the 1998 baseline data in these two regions because of significant changes to the raw data used to estimate the poverty figures. This, combined with the inherent uncertainty associated with the data and the small time period being considered, means the available data does not allow an accurate assessment of progress. However, the data does point to a reduction in poverty. More details are provided in the following paragraphs.

Progress towards these poverty reduction targets is measured using the proportion of the population living in absolute poverty (defined as less than an international $1 a day). The data comes from the World Bank, which publishes estimates in their annual Global Economic Prospects report. Each year the World Bank provides the data for the latest year (currently 2000), and revises the data for 1990.

Estimates for past years can change because additional or updated data is included in the analysis, or the estimation methodology is updated. Usually this results in a relatively small change to the data for previous years. However, this year there were substantial changes to the China and India data. These populous countries have a large impact on the East Asia and the Pacific and South Asia regional figures.

In China, data on household expenditure instead of income was used for the first time (this has not been available before). Expenditure data is considered more reliable than income data for poverty analysis as expenditure tends to be more accurately reported by households than income. In India, data from an additional household survey was included in the analysis. This additional data, and other more minor methodological changes, resulted in a significant reduction to the poverty figures in East Asia and the Pacific and South Asia for both 1990 and the latest year when compared with the estimates available last year.

The World Bank does not currently update figures for the years between the latest year and 1990. Hence we do not have 1998 poverty figures that have been estimated using the additional data sets. This means the 1998 baseline data is not directly comparable with the 2000 data published in the Departmental Report.

There are many problems with the accuracy and reliability of this data. However, it is still the best internationally comparable measure of absolute poverty currently available. DFID is working with the World Bank to improve the quality of this data.

More information on the methodology is available in Chapter 1 of the World Bank's 2004 Global Economic Prospects: http://www.worldbank.org/prospects/gep2004/chapter1.pdf.

Vietnam

Mr. Ben Chapman: To ask the Secretary of State for International Development if he will make a statement on development in Vietnam. [172694]

Mr. Gareth Thomas: The Government of Vietnam has made rapid progress in reducing poverty in recent years and in maintaining a high rate of economic growth. The number of people living in poverty halved from 58 per cent. in 1993 to 29 per cent. in 2002 and economic growth has averaged at approximately 7 per cent. over the last 10 years. Despite this, approximately 23 million people still live below the poverty line and an estimated 8.8 million live in hunger. However, health and education indicators are at similar levels to those normally seen in a country with a per capita income two or three times higher than Vietnam's.

This progress is a result of the Government of Vietnam's sustained commitment to development and poverty reduction. Recognising this, DFID has rapidly increased it's programme in Vietnam from £19 million in 2002–03 to an expected spend of up to £60 million by 2005–06. The programme supports the Government of Vietnam's own poverty reduction and growth strategy, and DFID works very closely with the Government and other donors to ensure that we achieve the maximum impact of our resources. Copies of DFID's new Country Assistance Plan for Vietnam have been placed in the House Library.

DFID also supports poverty reduction in Vietnam through our contributions to the European Commission development budget (currently approximately 18 per cent. of the total budget). The EC spent 22.7 million Euros in Vietnam in 2002 (UK contribution: 4.1 million Euros), and is likely to spend 101 million Euros between 2002 and 2004 (UK contribution: 18.2 million Euros).

NORTHERN IRELAND

Academy for Irish Cultural Heritages

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland if he will make a statement on the role of the Academy for Irish Cultural Heritages; and how it is funded. [173196]

Mr. Gardiner: The Academy for Irish Cultural Heritages at the Magee campus of the University of Ulster is one of the centres of research excellence funded under round one of the Support Programme for University Research. The Department for Employment and Learning provides 50 per cent. of the total cost over the period of the programme, the other half being provided by the charitable organisation, Atlantic Philanthropies.

The role of the project is to conduct research of international excellence in the fields of History, Celtic Studies and English.

Alcohol-Related Illness

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will break down the funding allocated to treat alcohol-related illness by *(a)* main budget head and *(b)* recipients. [173594]

Angela Smith: The information is not available in this format.

Autism Services

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what action he is taking to improve services for children with autism in the Northern Board area. [173616]

Angela Smith: In the forthcoming year the Northern Health and Social Services Board proposes to improve diagnostic and assessment services by investing £77,000 to strengthen the existing service in Homefirst Trust with additional speech and language therapy, occupational therapy and clerical support.

£50,000 is also being provided to increase paediatrician and speech and language therapy input, in addition to clerical support, to begin to establish a local service.

£7,000 has been made available for staff training related to Autistic Spectrum Disorders.

Essential Skills

Mr. Beggs: To ask the Secretary of State for Northern Ireland what plans he has to extend educational policy on essential skills beyond numeracy and literacy; and if he will make a statement. [173212]

Mr. Gardiner: The Department for Employment and Learning is currently considering its position on the introduction of Information and Communications Technology as a third essential skill along with literacy and numeracy.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Northern Ireland (1) how many *(a)* ordinary written and *(b)* named day questions his Department received in (i) the 2002–03 and (ii) this parliamentary session up to the most recent date for which figures are available, broken down by month; [170766]

(2) what proportion of *(a)* ordinary written questions to his Department were answered within five sitting days of tabling and *(b)* questions for a named day received a substantive answer on that day in (i) 2002–03 and (ii) the current parliamentary session up to the most recent date for which figures are available, broken down by month. [170767]

Mr. Paul Murphy: The following table sets out the total number of ordinary written question and named day questions asked of my department by hon. Members in 2003 and up to 31 April 2004, broken down by month.

	2003	*2004 (up to 31 April)*
Ordinary written		
January	233	324
February	163	263
March	198	327
April	125	248
May	208	—
June	354	—
July	214	—
August	0	—
September	172	—
October	147	—
November	105	—
December	143	—
Total	2,062	1,162
Named day		
January	15	22
February	34	31
March	32	49
April	33	27
May	9	—
June	19	—
July	16	—
August	0	—
September	10	—
October	17	—
November	10	—
December	28	—
Total	223	129

The other information sought is not available in the form requested, but the following may be of use. From 1 January 2003 to 31 December 2003, a total of 3,134 parliamentary questions, including those asked by Members in Another Place, were tabled for answer by ministers in my Department, or on their behalf.

From 1 May 2003 to 31 December 2003, the 11 Departments of the NI administration for which I currently have responsibility answered 986 ordinary

written questions, of which 79 per cent. were responded to within a working week of the question being tabled. of the 65 named day questions tabled in the same period 80 per cent. were answered by the specified date. The corresponding information in respect of the Northern Ireland Office itself is not currently available.

Productivity

Bob Spink: To ask the Secretary of State for Northern Ireland what his policy is for *(a)* increasing the productivity and *(b)* cutting the costs of (i) his Department and (ii) its agencies and non-departmental public bodies. [172179]

Mr. Pearson: The NIO is committed to delivering the Government's policy on efficiencies of 2.5per cent. a year over the SR2004 period. This policy is applicable to the core Department, its agencies and non-departmental public bodies.

The same focus on promoting efficiency will apply to the 11 Departments of the Northern Ireland Administration, with a target for annual efficiency gains of at least 2.5 per cent. applying to Departments, and other public bodies funded by them, over the SR 2004 period. This will be a central theme to the Northern Ireland Priorities and Budget process, which will conclude with the publication in December 2004 of the Government's spending and efficiency plans. As a starting point, the departments have been asked to draw up plans for efficiency gains, with measures to include a combination of productivity gains and cost reductions that will free up resources to be redeployed to priority front line public services.

Recycled Paper

Mr. McGrady: To ask the Secretary of State for Northern Ireland what percentage of printing in Government Departments in Northern Ireland in 2003–04 was on recycled paper. [168932]

Mr. Pearson: The percentage spend on recycled paper, compared with new paper, during the period April 2003 to 31 March 2004 is 5.63 per cent.

This answer is based on the value of orders placed electronically by Departments for the purchase of paper used for printing and reprographic purposes "in house" and paper purchased by the Central Print Unit, Department of Finance and Personnel. Data on all printed matter produced in-house by Departments and purchased from commercial printers is not readily available and could only be obtained at a disproportionate cost.

Following the adoption of guidance to integrate environmental considerations into procurement practices, as approved by the Procurement Board on 6 April 2004, Departments are required to move to the use of recycled paper. CPD is now implementing this decision.

Rheumatoid Arthritis

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many rheumatoid arthritis sufferers *(a)* have commenced treatment since 1 January 2004 with, *(b)* are prescribed and *(c)* remain on the waiting list for (i) Embrel and (ii) Remicade. [171756]

Angela Smith: Information is not available in the form requested. However, data collected by Health and Social Services Trusts suggest that there are around 230 people who have received or are currently receiving biologic therapies using Embrel and Remicade, and around 450 people on the waiting lists for such treatment.

Statins

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on the availability of statins in the NHS. [173609]

Angela Smith: A range of medicines classified as 'statins' are available to patients on health service prescription, and will remain so.

In addition, it was announced on 12 May 2004 that Ministers had accepted the advice of the expert Committee on Safety of Medicines, that one particular brand of simvastatin in a 10 mg dose, Zocor Heart-Pro, should become available to people with a specific risk of heart disease, without prescription and supplied under pharmacist supervision. This will happen here from July 2004.

EDUCATION AND SKILLS

Careers Guidance

Mr. Simmonds: To ask the Secretary of State for Education and Skills how many practising qualified teachers *(a)* were qualified careers advisers and *(b)* provided careers guidance in schools in each year since 1997. [172627]

Mr. Miliband: Information on the numbers of qualified teachers who are also qualified careers advisers is only available in respect of those who teach careers as a specific subject. This information was published in table 24 of the School Workforce in England Volume 2003 edition and is available from the House of Commons Library or downloaded from the following internet link: www.dfes.gov.uk/rsgateway/DBA/OL/v000443/index.shtml.

This information is not collected on an annual basis.

Careers advice in schools may also take place within other contexts such as during the provision of Personal Social and Health Education. Information is not available in respect of this provision.

Child Care Regulation

Mr. Goodman: To ask the Secretary of State for Education and Skills what recent changes he has made to the regulation of child care; and if he will make a statement. [172854]

Margaret Hodge *[holding answer 13 May 2004]:* We have made two sets of significant changes to the regulation of child care since the national standards for under 8s day care and childminding came into force in the summer of 2001. First, in April 2003, we introduced regulations enabling the Office for Standards in Education (Ofsted), the national registration authority for child care in England, to suspend a provider's

registration in certain circumstances, for example, where there were concerns about their suitability to look after children. Second, the national standards and associated regulations were revised in September 2003, following a public consultation. Amongst the changes were new rules allowing childminders to care for more babies and preventing them from smacking or smoking in front of the children in their care. At this time we also extended the registration requirements to child care provided by schools, which had previously been exempt.

Further changes to improve the regulation of child care are under consultation at present and are planned for introduction in September 2004.

Connexions

Charles Hendry: To ask the Secretary of State for Education and Skills how many one-stop-shops are operated by the Connexions Service in England. [170022]

Margaret Hodge *[holding answer 30 April 2004]:* A survey in December 2003 showed there were nearly 300 one-stop shops already open, operated by Connexions Partnerships. This number is set to increase with a further 100 one-stop-shops planned to open in the next 18 months.

Charles Hendry: To ask the Secretary of State for Education and Skills what his Department's preferred model of delivery is for Connexions partnerships. [172661]

Margaret Hodge *[holding answer 12 May 2004]:* There is no preferred model, and it is for each Connexions Partnership to decide on a structure which they believe will be the most efficient in delivering the Connexions service in their sub-region.

Early Years Education

Mrs. Brooke: To ask the Secretary of State for Education and Skills what steps he is taking to promote the appropriate training of workers engaged in multi-agency work with early years children. [172343]

Margaret Hodge: The Sure Start Unit has allocated £129.9 million to local authorities for the training and development of early years and child care workers for 2004–06 to meet the requirements of the national standards for under 8s day care and childminding. This will include training and development of those working in multi-agency settings such as Children's Centres.

Mr. Simmonds: To ask the Secretary of State for Education and Skills how many new recruits he estimates will be needed over the next three years in the nursery and child care sector to ensure the workforce is at full strength. [171370]

Margaret Hodge: Allowing for the expected growth of child care places and continuing staff turnover, we estimate that up to around 180,000 new recruits may be needed in the early years, child care and play work sector over the three-year period April 2003 to March 2006.

This is a broad estimate, which depends on a range of assumptions, and we will continue to keep it under review in the light of further information about child care growth and staff turnover levels.

Education Act Powers

Mr. Hoban: To ask the Secretary of State for Education and Skills how many times he has used the power under section 71 of the Education Act 2002 to direct a local education authority to exercise its powers to secure provision for an additional number of pupils. [173783]

Mr. Miliband: It has not yet been necessary to exercise this power under section 71 of the Education Act 2002. It was introduced as a complement to the powers of Section 70 of the Act, which require competitions for additional secondary schools. Effectively, it extends the powers of Schedule 7 to the School Standards and Framework Act 1998 to allow LEAs to respond to a direction to provide for an additional number of pupils by either holding a competition for a new school, or using their other powers for the reorganisation of schools.

LEAs are responsible for the provision of sufficient school places in their area, and these powers were always intended as reserve powers in exceptional circumstances.

Education Funding

Mr. Meacher: To ask the Secretary of State for Education and Skills how many *(a)* free nursery and *(b)* pre-school places were available for (i) 3 and (ii) 4-year-olds in Oldham, West and Royton in each of the last seven years. [170912]

Margaret Hodge: The information is not available in the form requested.

Figures on the number of free nursery education places taken up by 3 and 4-year-olds in Oldham local education authority area are shown in the table.

The latest figures on provision for 3 and 4-year-olds in England were published in a Statistical Bulletin 'Provision for children under 5 years of age in England—January 2003' which is available on the Department's website www.dfes.gov.uk/rsgateway/.

From April 2004, six months ahead of our original target, all 3-year-olds in England whose parents want one, are eligible for a free, part-time early education place.

Number of free nursery education places [1,2] taken up by 3 and 4-year-old children in maintained nursery and primary schools and private, voluntary and independent providers—Oldham 1997–2003

Position in January each year	*3-year-olds*	*4-year-olds*
1997	1,500	3,100
1998	1,500	3,100
1999	1,600	3,000
2000	2,300	3,100
2001	2,500	3,100
2002	2,500	3,100
2003	2,600	3,000

[1] Part-time equivalent number of free nursery education places taken up by 3 and 4-year-old children.

[2] A free nursery education place comprises five 2½ hour sessions of early years education per week, for 33 weeks of the year, usually three terms of 11 weeks.

Education Services

Mr. Gordon Marsden: To ask the Secretary of State for Education and Skills how many child care places have been created in Blackpool, South since 1997. [173066]

Margaret Hodge: The Department is unable to provide details of child care places for Blackpool, South. However, from April 1999 to March 2004 Blackpool local authority created 3,060 new child care places helping some 5,505 children. This shows an increase in the stock of child care places, taking into account turnover, of 2,149 helping some 3,899 children.

Mr. Hurst: To ask the Secretary of State for Education and Skills how much was spent on capital projects in schools in *(a)* the County of Essex in each year from 1980 to 1997 and *(b)* the County of Essex and the unitary authorities of Southend-on-Sea and Thurrock in each year from 1998 to 2003. [173322]

Mr. Miliband: The majority of capital funding is now allocated to local authorities and schools by needs-related formulae. Authorities invest according to priorities agreed in their asset management plans. The following table shows total capital allocations to Essex, Southend-on-Sea and Thurrock local education authorities (LEA) since 1996–97. We do not hold details of the capital allocation figures per authority for periods before 1996–97.

Capital allocations in £

	Essex LEA	Southend-on-Sea LEA	Thurrock LEA
1996–97	12,186,000	—	—
1997–98	11,477,000	—	—
1998–99	13,796,000	2,577,000	1,874,000
1999–2000	20,204,000	1,056,000	3,190,000
2000–01	53,120,000	6,547,000	6,014,000
2001–02	35,575,000	5,868,000	5,129,000

Capital allocations in £

	Essex LEA	Southend-on-Sea LEA	Thurrock LEA
2002–03	75,405,000	6,330,000	5,249,000
2003–04	63,462,000	9,907,000	11,007,000
2004–05	60,322,000	13,242,000	12,834,000

* Includes allocations to the voluntary aided sector.

Education Statistics (London)

Sarah Teather: To ask the Secretary of State for Education and Skills how many teaching staff have taken early retirement in *(a)* primary and *(b)* secondary schools in each London borough in each year since 1997; and what the average figures for a local education authority in England were in each year. [172805]

Mr. Miliband: The information requested has been placed in the Libraries.

Sarah Teather: To ask the Secretary of State for Education and Skills how many teaching staff have left the profession as a result of stress or similar conditions in *(a)* primary and *(b)* secondary schools in each London borough in each year since 1997; and what the average figures for a local education authority in England were in each year. [172806]

Mr. Miliband: This information is not collected centrally.

Sarah Teather: To ask the Secretary of State for Education and Skills how many teaching posts there were in *(a)* primary and *(b)* secondary schools in each London borough in each year since 1997; and what the average figures for a local education authority in England were in each year. [172807]

Mr. Miliband: The tables show the full-time equivalent number of regular teachers in local education authorities in London and the national average for all maintained nursery, primary and secondary schools in England, in January of each year.

Source:
Annual survey of teachers in service and teacher vacancies.

Mr. Benton: To ask the Secretary of State for Education and Skills how many *(a)* free nursery and *(b)* pre-school places were available for (i) three and (ii) four-year-olds in Bootle in each of the last seven years. [172785]

Margaret Hodge: I refer my hon. Friend to the answer given on 29 April 2004, *Official Report*, column 1257W.

Mr. Benton: To ask the Secretary of State for Education and Skills (1) how many *(a)* Sure Start centres and *(b)* Early Excellence centres have been created in Bootle; [172786]

(2) how many new nurseries have been established in Bootle since 1997. [172783]

Margaret Hodge: I refer the hon. Member to the replies given on 6 May 2004, *Official Report*, column 1775W and 6 May 2004, *Official Report*, column 1776W.

Examination Results

Mr. Wills: To ask the Secretary of State for Education and Skills how many *(a)* males and *(b)* females achieved five A*–C grades at GCSE in each year since 1994; and how many (i) males and (ii) females achieved 5 A*–C grades at GCSE in the 10 per cent. (A) most and (B) least deprived wards in each year since 1994. [170113]

Mr. Miliband: The information requested is shown in the following tables. Data for years prior to 1997 is not readily available and can be provided only at disproportionate cost.

Number of males and females achieving 5 A–C Grades at GCSE: 1997–2003*

	Male		Female	
	Number	Percentage	Number	Percentage
2003	133,462	46	158,525	56
2002	125,476	44	150,769	55
2001	119,862	43	145,645	53
2000	112,719	41	138,218	52
1999	109,564	40	134,307	51
1998	103,546	39	127,677	49
1997	102,894	38	125,761	48

Number of males and females achieving 5 A–C Grades at GCSE: 1997–2003*

	Male				Female			
	10 per cent. most deprived wards		10 per cent. least deprived wards		10 per cent. most deprived wards		10 per cent. least deprived wards	
	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2003	9,005	32	19,136	60	11,349	42	21,969	71

Failing Schools

Mr. Hoban: To ask the Secretary of State for Education and Skills when the schools categorised as *(a)* subject to special measures, *(b)* having serious weaknesses, *(c)* underachieving and *(d)* having inadequate sixth forms as of 9 April were placed in those categories. [173139]

Mr. Miliband: This is a matter for Ofsted. HM Chief Inspector, David Bell, will write to the hon. Member and place a copy of his letter in the Library.

Mr. Hoban: To ask the Secretary of State for Education and Skills which schools Office for Standards in Education categorised as *(a)* subject to special measures, *(b)* having serious weaknesses, *(c)* underachieving and *(d)* having inadequate sixth forms between 1 January and 9 April. [173140]

Mr. Miliband *[holding answer 14 May 2004]:* This is a matter for Ofsted. HM Chief Inspector, David Bell, will write to the hon. Member and place a copy of his letter in the Library.

Family Fund Trust

Paul Holmes: To ask the Secretary of State for Health how many families have been provided with grants through the Family Fund Trust; what funding will be provided for the Trust over the next three years; and if he will make a statement. [170606]

Margaret Hodge: The Family Fund was set up by the Government in 1973 to give practical help to families with severely disabled and seriously ill children under the age of 16. Since 1998 the charity has received separate funds from the Governments of England, Northern Ireland, Scotland and Wales amounting to over £27million in 2003–4. The number of families assisted in England was £35,226 in 2002–3. England has allocated funding of £22.773 million. for 2004–5. The budgets for the years 2005–6 and 2006–7 are yet to be determined.

Family Support Grant

Mr. Jenkins: To ask the Secretary of State for Education and Skills how many organisations have applied for funding from the family support grant in 2003–04; and how many were successful in their application. [172498]

Margaret Hodge: A total of 287 applications were received for the family support grant (FSG) 2003–04, of which 26 were successful. In addition, three organisations continued to receive core funding from FSG 2003–04, together with another 55 organisations who received on-going funding originally awarded in previous years. Total funding was £6.3 million.

I announced details of FSG 2004–05 projects on 10 May 2004.

Fostered Children

Mr. Jenkins: To ask the Secretary of State for Education and Skills how many children within the foster care system were born outside the UK. [172492]

Margaret Hodge: This information is not collected centrally.

Ministerial Visits

Matthew Taylor: To ask the Secretary of State for Education and Skills if he will list visits made by each Minister in the Department between December 2003 and April 2004, broken down by *(a)* date, *(b)* constituency visited and *(c)* cost. [171559]

Mr. Stephen Twigg: For domestic visits, the Department does not hold this detailed information centrally. To provide this information could only be done at disproportionate cost.

For overseas visits, the Government publishes on an annual basis the total costs of all ministerial overseas travel and a list of all visits by Cabinet Ministers costing in excess of £500. Information for 2003–4 is currently being collected and will be published as soon as it is ready.

Older People

Mr. Webb: To ask the Secretary of State for Education and Skills for what *(a)* initiatives, *(b)* campaigns and *(c)* advisory bodies relating to older people his Department (i) is responsible and (ii) has provided funding since 2001; and what the cost in each year was for each one. [166237]

Alan Johnson: The tables set out the work the Department for Education and Skills has undertaken or funded since 2001 to promote learning for older people (50+). The main work is support for projects under *(a)* initiatives.

The Department has not been responsible for or funded any *(b)* campaigns. Likewise the Department has not established or funded any national advisory bodies for older people under *(c)*.

(a) Initiatives: 2001–02

Title	*Cost (£)*	*Organisation*
Supporting the Better Government for Older People Network	20,000	Better Government for Older People (BGOP)

Total Funding	141,660	

Pre-schools

Mr. Amess: To ask the Secretary of State for Education and Skills what the requirements are for pre-school assistants to be able to work in pre-schools; and if he will make a statement. [173382]

Margaret Hodge: The criteria supporting the national standards for under 8s day care and child minding indicate:

that all pre-school staff should be subject to checks to ensure that they are not disqualified from registration because of previous criminal convictions;

that they are suitable, both mentally and physically, to care for children; and

that they have the appropriate skills and ability to do their jobs.

Reading Disability

Mr. Todd: To ask the Secretary of State for Education and Skills what steps his Department is taking to improve the availability of reading material for those with reading disabilities. [171265]

Margaret Hodge: During the past three financial years £220 million has been made available to schools through the Schools Access Initiative; a further £100 million per annum is available for the current year and for 2005–06. This funding can be used to produce materials in alternative formats to enable access to the curriculum for pupils who have reading disabilities.

It is for schools and local education authorities (LEAs) to ensure that such materials are produced in good time, so that children with reading disabilities are not disadvantaged. Schools and LEAs can use the Department for Education and Skills' Special Educational Needs inclusion site to share information about materials that are required; in production; or already available in different formats.

Recycled Paper

Mr. Willis: To ask the Secretary of State for Education and Skills what measures he has put in place to ensure that his Department meets the quick win targets set by the Department for Environment, Food and Rural Affairs to ensure that all paper for printed publications bought by the Department is 60 per cent. recycled of which a minimum of 75 per cent. is post-consumer waste content. [166792]

Mr. Stephen Twigg: The "quick win targets" set by DEFRA were communicated widely within the Department, particularly to procurement sections, in October 2003. Due to a lack of re-contracting opportunities since that date it has not so far been possible to implement specific measures to ensure the Department meets the quick win targets. Procurement sections have undertaken to introduce these as soon as re-contracting opportunities arise.

School Sports (Preston)

Mr. Hendrick: To ask the Secretary of State for Education and Skills (1) if he will make a statement on the effects on schools of changes since 1997 in the level of investment in school sports in Preston; [168138]

(2) how much money has been allocated to develop school sports in Preston since 1997. [168711]

Mr. Stephen Twigg: This information is not held in the format requested.

Within the context of the statutory National Curriculum, where Physical Education (PE) is compulsory for pupils aged 5–16, it is for individual schools to use their budgets as they judge appropriate.

The Government are investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of 5–16 year olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

The Department is providing just over £440,000 to support the delivery of a School Sport Partnership in Lancashire LEA area. The partnerships includes five secondary and 21 primary schools and provides enhanced sports opportunities for all young people to ensure that their pupils spend a minimum of two hours a week on high quality PE and School Sport. A key objective for all School Sport Partnerships is to ensure that the improvements and enhanced opportunities that they deliver are sustainable and embedded within schools to ensure a lasting legacy. The New Opportunities Fund has provided schools in the Lancashire LEA area with nearly 12 million specifically to enhance PE and school sport facilities.

Latest research, published by the Departments on 4 March 2004 shows that 68 per cent. of pupils in schools that have been in a Partnership for three years, are taking up the two hour entitlement, rising to 90 per cent. at Key Stage 3. Data has been collected from the remaining partnerships and will be published in April.

Schools (Capital Investment)

Mr. Hoban: To ask the Secretary of State for Education and Skills how many wave 1 approvals under Building Schools for the Future involved *(a)* local authorities other than in their capacity as local education authorities, *(b)* learning and skills councils, *(c)* primary care and other NHS trusts and *(d)* other public sector bodies. [172906]

Mr. Miliband: The following table shows the number of local education authorities in wave 1 of Building Schools for the Future who made specific reference to the requested categories in their proposals.

Local education authorities	*Number*
Other local authority services	1
Learning and Skills Councils	12
Primary care and other NHS trusts	4
Other public sector bodies	9

Mr. Hoban: To ask the Secretary of State for Education and Skills what criteria were used in issuing invitations to local education authorities to submit bids for consideration for wave one of Building Schools for the Future; and what criteria were used to assess the bids. [172959]

Mr. Miliband: The information requested is contained in guidance to local authorities, issued in July 2004. A copy is in the House of Commons Library.

Mr. Hoban: To ask the Secretary of State for Education and Skills if he will list the local education authorities which applied to wave one of Building Schools for the Future; and what the reasons were for each unsuccessful bid. [172962]

Mr. Miliband: The following list shows those authorities which applied for wave one funding in the Building Schools for the Future (BSF) programme. Projects that were successful in wave one were those which best met our criteria for prioritisation. The criteria for prioritisation were fully set out in the guidance on applying for prioritisation in the BSF programme which we published last July.

We have discussed with all unsuccessful authorities the reasons why their proposals meet our criteria less well, usually in face to face meetings with my officials.

Mr. Hoban: To ask the Secretary of State for Education and Skills what assessment he has made of the performance of Pathfinder local education authorities in Building Schools for the Future. [172963]

Mr. Miliband: Partnerships for Schools is monitoring and supporting the pathfinder local authorities. By their nature as pathfinders, we are working with authorities to develop Building Schools for the Future, identifying and resolving issues along the way. The pathfinder projects are progressing well and will be submitting outline business cases shortly for formal assessment.

Mr. Hoban: To ask the Secretary of State for Education and Skills what proportion of each successful local education authority's secondary schools in wave one of Building Schools for the Future are covered by its bid. [172965]

Mr. Miliband: The following table shows the proportion of schools in wave 1 of Building Schools for the Future as a percentage of each local authority's total number of secondary schools.

LEA	*Total schools in LEA*[1]	*Of which: included in BSF wave*	*Percentage*
Knowsley	11	11	100.0
Lancashire	134	26	19.4
Leeds	68	42	61.8

Stoke-on-Trent	23	23	100.0
Sunderland	18	9	50.0
Waltham Forest	19	9	47.4

[1] Total number of schools that have been included by the LEA in their submissions to Building Schools for the Future; this may include special, middle and other schools, or units such as pupil referral units, in addition to secondary schools.

Mr. Hoban: To ask the Secretary of State for Education and Skills how many local education authorities participating in wave one of Building Schools for the Future have *(a)* identified city academies as an integral part of the plans and *(b)* included provision for 14–19 education. [172966]

Mr. Miliband: Six local education authorities (LEAs) participating in wave 1 of Building Schools for the Future mentioned planned or established Academies in their proposals. We now expect all projects to provide a proper evaluation of Academy options.

All proposals submitted included provision for 14–19 education.

Mr. Hoban: To ask the Secretary of State for Education and Skills what the Department's financial commitment is for each successful bid in wave one of Building Schools for the Future, broken down by *(a)* private finance initiative credits and *(b)* cash grants. [172967]

Mr. Miliband: Total funding available for pathfinder and wave one Building Schools for the Future projects is over £2.2 billion. This includes PFI credits, capital grant and supported borrowings. Details of allocation will not be made until authorities have submitted satisfactory outline business cases, which is expected later this year.

Mr. Hoban: To ask the Secretary of State for Education and Skills how many projects in wave one of Building Schools for the Future will use the exemplar building design. [172968]

Mr. Miliband: It is too early to say how many projects Wave 1 will use any one of the exemplar designs in their entirety. However, all authorities in Wave 1 have warmly welcomed all the exemplar designs and are actively using them in their deliberations with schools to develop their educational vision.

Mr. Hoban: To ask the Secretary of State for Education and Skills what the cost was of preparing the exemplar building designs in Building Schools for the Future. [172969]

Mr. Miliband: The cost of preparing 11 Exemplar Designs to RIBA Stage C—Scheme Design, including fees, securing copyright for the designs, publishing and dissemination was £3.45 million. We expect that through the stimulation of exemplar designs a number of standardised processes, including strategic partnerships, along the supply chain and off-site fabrication will develop to meet the demands of an increased building programme and secure savings on the costs of new schools of around 10 per cent.

Mr. Hoban: To ask the Secretary of State for Education and Skills which local education authorities have indicated that they wish to participate in wave 2 of the Building Schools for the Future programme. [172970]

Mr. Miliband: Local authorities were invited to submit a proposal for wave 1 and/or an expression of interest for the programme as a whole. All have done so. We will use this information to prioritise projects for the next waves of investment.

Mr. Hoban: To ask the Secretary of State for Education and Skills who owns *(a)* new and *(b)* refurbished schools built under the Building Schools for the Future programme. [172971]

Mr. Miliband: Ownership of schools will not usually change when schools are built or refurbished in the Building Schools for the Future (BSF) programme. Exceptions to this are where investment is through a Private Finance Initiative contract, where ownership of the buildings will pass to the public sector provider for the length of the contract, and then fevert to the previous owner, and also where an Academy is created. In this case, the Academy Trust' will own the buildings for as long as the Academy remains in operation. If the Academy ceases to exist, ownership of the Academy land, and any buildings on it, will revert to the previous owner, which would be either the LEA or the voluntary aided sector body.

Mr. Hoban: To ask the Secretary of State for Education and Skills whether the pathfinders for Building Schools for the Future were originally private finance initiative schemes. [172972]

Mr. Miliband: An offer to all local education authorities in 2003 to submit projects which would access Private Finance Initiative (PFI) credits in 2004–05 also invited expressions of interest to be pathfinders in the Building Schools for the Future programme. Part, but not all, of the funding to support pathfinder Building Schools for the Future projects will be PFI credits.

Mr. Hoban: To ask the Secretary of State for Education and Skills what controls there are to ensure that a wave 1 Building Schools for the Future scheme develops plans for secondary schools, once accepted. [172973]

Mr. Miliband: The development of each local authority project will be monitored by Partnerships for Schools. The Department will also see their plans at two formal points, when the outline and final business cases for each project are submitted for approval. We are also encouraging local authorities to use the local government gateway review process.

Mr. Gordon Prentice: To ask the Secretary of State for Education and Skills when he expects to announce the results of the second round of the Building Schools for the Future initiative. [173005]

Mr. Miliband: We hope to announce the next waves of investment under Building Schools for the Future later in the year—probably in the autumn. We are working to provide this information as soon as possible, once the Secretary of State has decided how to allocate the spending review settlement.

Schools (Physical Exercise)

Harry Cohen: To ask the Secretary of State for Education and Skills what steps he is taking to *(a)* increase the percentage of pupils spending at least two hours a week on physical exercise and school sport and *(b)* increase the time children spend on exercise; and if he will make a statement. [171447]

Mr. Stephen Twigg: The Government are investing more than £1 billion in England to transform PE, school sport and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Culture, Media and Sport, to increase the percentage of 5–16 year olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

Spearheading action is the creation of a network of 400 specialist sports colleges and School Sport Partnerships. There are six other interlinked programmes within the strategy which are designed to help schools and their partners ensure pupils take up their PE and sports entitlement:

1. Professional Development
2. School/Club Links
3. Step Into Sport
4. Gifted and Talented
5. Swimming
6. The QCA PE and School Sport Investigation

Learning through PE and Sport provides a comprehensive guide to the strategy and a copy has been placed in the House Library.

Special Educational Needs

Mr. Simmonds: To ask the Secretary of State for Education and Skills what assessment his Department has made of the effectiveness of special educational needs co-ordinators. [171367]
